Track Record/Monitor

AGC Electric, Inc. is currently performing work for PWWM at a satisfactory level. PWWM has reviewed the Capital Improvements Information System database and found 18 awarded construction contracts as follows:

- one from the Internal Services Department, and
- 17 from PWWM.

The referenced database also lists a total of nine contractor performance evaluations with an overall performance rating of 3.7 (satisfactory performance) out of a possible 4.0 (superior performance) rating. The Regulatory and Economic Resources Department, Small Business Development Division (SBD) History of Violation's report lists no violations for this Contractor.

According to the Florida Department of State, Division of Corporations, AGC Electric, Inc., Company Principals are Tomas V. Curbelo, Enrique I. Guzman and Pierrette De La Sierra, and the Company's address is listed as 2600 West 79 Street, Hialeah, Florida 33016.

Following PWWM's standard operating procedures, after award of this Contract a pre-construction meeting will be scheduled. The person responsible for all PTP projects in PWWM is PTP Coordinator, Mr. Alejandro Martinez-Esteve, RA, LEED AP. Following completion of the award process, the project will be assigned to Mr. Oscar Rubio, Project Coordinator, for day-to-day responsibilities.

Background

As part of the PTP Neighborhood Improvements initiative, PWWM continues to take advantage of various contracting mechanisms such as the Miscellaneous Construction Contract process available under the MCC 7360 Program. Through this process, PWWM forwards a Request for Price Quotation by way of facsimile transmission to a pool of firms that have registered with the Internal Services Department for the respective trade. Additionally, PWWM advertises the project in the *Daily Business Review* and all solicitations are available on-line through the Miami-Dade County portal under the "Procurement Solicitations" link. The project's award evaluation is based upon the bid submitted by the lowest responsive, responsible bidder for the project.

PWWM staff submitted its contract measure recommendation for Certified Small Business Enterprise participation on March 19, 2012. SBD completed its Project Review and Analysis process on March 20, 2012, and recommended a 1.67 percent subcontractor goal participation. A Community Workforce Program Goal is not applicable to this Contract. Subsequent to SBD's Project Review and Analysis, on April 5, 2012, PWWM forwarded the Request for Price Quotation for the PTP Traffic Signal Intersections Project, utilizing the MCC 7360 Plan - CICC 7360-0/08, to a list of 49 pre-registered firms. A total of six firms purchased contract documents, and five firms proffered a bid.

On May 9, 2012, AGC Electric, Inc. proffered the lowest responsive, responsible base bid of $472,102.60, nineteen percent below the County's cost estimate. The second lowest bidder, Statewide Electrical Services, Inc. proffered a base bid of $496,525.00, five percent over the lowest bidder. The third lowest bidder, Under Power Corp. proffered a base bid of $579,206.00, seventeen percent over the second lowest bidder. Based on the results of the solicitation, PWWM issued a recommendation for award on June 7, 2012 for RPQ No. 20120028 to AGC Electric, Inc., with the stipulation that approval for this project must be obtained from the CITT and the BCC in accordance with PTP guidelines.

The work to be accomplished for this project consists of, but is not limited to, furnishing all supervision, labor, required materials, equipment and tools to perform all operations necessary for the installation of traffic signals, including any ancillary work at each specific location as indicated in the work orders. Traffic signalization upgrades include the installation of mastarm combinations, traffic controller assemblies, and the milling and resurfacing of affected roadways. Miami-Dade County will furnish the controller assembly at all new traffic signal installation locations, and the mastarms and anchor bolts for the SW 112 Avenue and SW 236 Street intersection.

The contractor shall furnish and install grounding electrodes, conduits, pull boxes, foundations, pedestrian signal heads with push buttons and signs, overhead signs, internally illuminated street name signs, mounting hardware, loop assemblies, signal cable, and solar school speed zone overhead flashing beacon assemblies. Furthermore, work includes the installation of pedestrian ramps, ground mounted signs, pavement markings, the construction of sidewalks, curbs and gutters, installation of truncated domes, and removing existing signs and traffic signalization devices in conflict with the proposed scope of work.
