Memorandum

MIAMI-DADE COUNTY

Date: March 4, 2014

To: Honorable Chairwoman Rebeca Sosa
and Members, Board of County Commissioners

From: Carlos A. Gimenez
Mayor

Subject: Response to Issues Raised Regarding the County's Procurement Process for Architectural/Engineering (A/E) Services and the Equitable Distribution Program

---

At the Finance Committee meeting of November 12, 2013, Commissioner Juan C. Zapata sponsored a citizen's presentation by the Miami-Dade Architecture and Engineering Society regarding the procurement of architectural, engineering and construction contracts that generated discussion between representatives of the architecture and engineering (A/E) industry and members of the Finance Committee. Additional discussion on this topic also occurred at the Finance Committee meeting of February 11, 2014,

Some of the representatives of the A/E industry suggested various proposals to modify the procurement process related to architectural and engineering contracts, while others argued to leave the current process as status quo. Some of the suggested modifications by the A/E industry included: 1) elimination of low scores for the A/E selection process; 2) requiring that selection committees be comprised solely of County staff, and 3) elimination of the Equitable Distribution Program (EDP), among others.

This report serves to respond to these recommendations, inform the Board as to various proposed changes in these areas that will be forthcoming for Board consideration (Attachment A), and provide requested information related to the EDP (Attachment B). It should be noted that the current A/E selection process also originally evolved as a result of meetings with the A/E industry.

Architectural and Engineering Procurement Process

Staff carefully reviewed each of the recommendations and welcomes the input provided by members of the A/E industry. The Internal Services Department (ISD) is responsible for administering the A/E procurement process. ISD staff has been actively meeting with the A/E industry and held numerous outreach meetings in 2012 and 2013 to revisit and discuss concerns expressed by the industry on the A/E selection process and EDP. As a result of the suggestions received, revisions to the A/E existing selection process are being considered, and a new Implementing Order that will supersede the current Administrative Order 3-39 will be presented for Board consideration in the coming months.

The recommended modifications as outlined in detail in Attachment A, and summarized briefly below, will result in a selection process that is more objective and tailored to the professional A/E services being procured. These proposed amendments are intended to provide greater emphasis on qualifications and expertise of the proposers and simplifying the procurement process. Moreover, the proposed changes will focus on utilizing numerical (qualitative) scores that provide the proposer with insightful information on individual criteria scores assigned by the competitive selection committee members in areas where greater emphasis may be required. Furthermore, using only numerical qualitative scores allows staff to utilize existing databases that automate the calculations for final ranking. These changes should improve the selection process for these services.

The recommended changes are as follows:

- The current IO has firmly established criteria as it relates to experience of firms, approach and qualification of team members, and each criteria has an assigned numerical weighted value. Currently, any modifications or deviations from the established criteria require approval by the Mayor. The modification being proposed will provide project-to-project flexibility, as requested by the client department, in establishing specific technical criteria unique to the project scope. Any

further modifications to the first and second tier evaluation criteria established by the new IO will be in consultation with ISD and the requesting department for solicitations that are complex and highly technical, where specific related information will assist the Competitive Selection Committee in selecting the highest qualified firm.

- Currently, pursuant to Administrative Order 3-34, both the highest and lowest ordinal scores per team in the First Tier only are discarded. The proposed amendment will discard the lowest qualitative scores for First Tier and Second Tier. By not eliminating the highest scores, the evaluation process will follow the requirements of Florida Statutes 287.055 to select the highest qualified consultant.
- Changes proposed to the "dollars awarded" calculation will ensure more accuracy in the evaluation of scores for the dollars awarded to firms in past engagements as prime consultants. The proposed calculation will be based on 65 percent of awarded dollars to the prime consultant only. Furthermore, the point values will be assigned based on a pre-determined table of values for a more objective assignment of points. This will also provide a more accurate account of dollars awarded, as the prime is required to self-report to the County their dollar awards. As it stands now, we are reliant upon subconsultants accurately reporting their past dollars awarded.
- Simplification for breaking ties at First Tier will continue through the use of individual scores for First Tier criteria. For Second Tier ties, only Second Tier criteria will be used to break the tie.
- Provide authority for the County Mayor or County Mayor's designee to award or reject the purchase of professional services, consistent with the award/rejection authority in the Miscellaneous Construction Contracts Program, currently set at $5 million. This will help expedite the design component of capital projects going forward.

The recommended modifications are a result of considerable experience in the management of the countywide A/E process and, equally important, the ongoing dialogue between the A/E industry representatives and County staff on improvements to the current process. It is anticipated that these modifications will have a positive impact on the County's capital improvement program, and increase contracting opportunities as well as mitigate certain concerns raised by industry representatives.

Equitable Distribution Program

As it relates to EDP, there were representatives that provided comments at the Finance Committee meeting in favor of, and against this program. Staff does not support the elimination of the EDP. EDP was adopted by the Board through Administrative Order 3-33 in June 2001 and designed to increase contracting opportunities for community-based A/E firms, as well as afford County departments with access to qualified professionals for smaller projects in an expedited manner. EDP is a pool of professional architects, engineers, landscape architects, surveyors and testing laboratories, all pre-qualified by Miami-Dade County that have met specific requirements. EDP members are required at a minimum, to have a Miami-Dade County office and have a Business Entity Tax Receipt for a period of one year. Assignments are issued on a rotation, based on a value calculated by a formula within the program's database. The positioning on the rotation list of each firm is determined by the amount of dollars awarded and paid by the County within the last three years. The firms' position on the rotation list is in ascending order with the firms that have received the least amount of work from the County in line to receive the next assignment.

Since the implementation of EDP in July 2002, 1,750 assignments have been initiated by County departments/agencies with potential fees of over $100,000,000. The accompanying report reflects the total number of EDP assignments received by the current 345 active firms over the past three fiscal years and the total award dollar values.

Some of the arguments made by opponents of the EDP have been: 1) members have not received work through EDP, 2) many participants are new to the County, and 3) the amount of work received through EDP is minimal and not equitable. However, Attachment B demonstrates that work within the EDP program is distributed fairly, and EDP provides an efficient, expedited process for firms to receive work. In addition, EDP is an efficient tool for County departments in expediting their capital work. This program allows the engagement of professional A/E consultants at a considerable time savings of 120 days because a protracted selection process is not required. It is also important to point out that approximately 80 percent of the registered Community Business Enterprise firms are active participants in the EDP program, of which 90 percent have received work through the EDP. Additionally, 90 percent of EDP members have maintained an office in the County for five years or more.

This administration is committed to continuously reviewing our process and program to ensure fairness and effectiveness. The recommendations we are making are based on significant dialogue with the industry and are aimed at striking a balance between the wants of the A/E community and the County's needs.

If you have any questions or concerns, please feel free to contact Lester Sola, Director of the Internal Services Department, at 305-375-2363.

Charles Anderson, Commission Auditor

CURRENT AND PROPOSED CHANGES FOR A&E PROFESSIONAL SERVICES and DESIGN-BUILD SERVICES

A/E Professional Services

CURRENT	PROPOSED
Establishes fixed first and second tier evaluation criteria that can only be modified by the County Mayor.	Establishes first and second tier evaluation criteria that can be modified/tailored on a project-by-project basis to emphasize evaluation criteria that are most relevant to each project. Modifications to these criteria will be made during solicitation development in consultation with the client department and Internal Services Department, Professional Services Division.
Discards high and low ordinal scores for each firm during the first tier evaluation only.	Discards only low qualitative score for each firm during first tier and second tier evaluations, and allows high scores to be considered.
Point values for Criterion 4A, *Dollars Awarded and Paid*, are based upon 100% net paid dollars for prime and A/E sub-consultants in the aggregate, and are assigned at the selection committee's professional discretion. The Florida Statute 287.055 requires that volume of work be considered.	Point values for Criterion 4A, *Dollars Awarded*, are based on 65% of awarded dollars for the prime only. Point values are assigned pursuant to a pre-determined table provided to the selection committee by ISD staff. Utilizing dollars awarded, for the prime only, reflects more accurate information as firms are required to self-report to the County the dollars paid to subconsultants.
First Tier tie-breakers remain the same. Second tier tie breakers are as follows: In the event of a tied final score, the first tie-breaker utilized is the firm's highest qualitative numerical score for Criterion 1B, if the tie remains then 2B, if the tie remains, 3B. Should the tie remain then the firm's total qualitative score for 1B, 2B and 3B will be utilized to break the tie. If a tie still results after application of the above noted tie-breakers, then the First Tier total numerical qualitative scores are used to break the tie.	Simplification for breaking ties at First Tier will continue through the use of individual scores for First Tier criteria. For Second Tier ties, only Second Tier criteria will be used to break the tie.
Award of professional services contracts where projects are identified in the Economic Stimulus Program (ESP) have delegated authority for the County Mayor's approval.	County Mayor or designee, has the authority with respect to purchases of professional services whose selection is governed by Sec. 287.055 F.S. and Sec. 2-10.4 of the Miami-Dade County Code to award contracts and /or reject proposals/bids up to $5,000,000.

Design-Build Services

CURRENT	PROPOSED
Evaluation of design-build projects identified as a first and second tier process.	Evaluation of design-build projects identified as a step one and step two process. (Terminology change only).
Establishes first and second tier evaluation criteria. Modifications to these criteria require County Mayor's approval.	Establishes step one and step two evaluation criteria. Modifications to these criteria can be modified/tailored on a project-by-project basis to emphasize evaluation criteria that are most relevant to each project. Modifications to these criteria will be made during solicitation development in consultation with the client department and Internal Services Department, Professional Services Division.
Point values for Criteria 4A, *Dollars Awarded and Paid*, are solely based upon 100% net paid dollars to A/E subconsultants, only, and are assigned at the selection committee's professional discretion. (General Contractor dollars are not considered).	For Design/Build evaluation, eliminate *Dollars Awarded and Paid criterion*. Pursuant to the current A.O., dollars awarded and paid are designated for professional A/E services, only. Florida Statues 287.055 does not mandate volume of work as an evaluation criterion for non A/E professional services.
Award of professional services contracts where projects are identified in the Economic Stimulus Program (ESP) have delegated authority for the County Mayor's approval.	County Mayor or designee has the authority with respect to purchases of professional services whose selection is governed by Sec. 287.055 F.S. and Sec. 2-10.4 of the Miami-Dade County Code to award contracts and /or reject proposals/bids up to $5,000,000.

Active EDP Firm Report as of September 30, 2013

*Includes potential sub service fees.
** No PPEs reported. Evaluations are required when an EDP project is completed. The projects may not be completed or the evaluation input yet.

Note: As of October 1, 2013 there were 345 active EDP firms. Some of the firms just provide surveying and testing services which typically are awarded PW pool contracts.
Over 500 firms have been EDP members. Numerous firms are no longer in the EDP primarily because they no longer have an office in MDC, have been purchased by another firm and/or are no longer in business.

Active EDP Firm Report as of September 30, 2013

*Includes potential sub service fees.
** No PPEs reported. Evaluations are required when an EDP project is completed. The projects may not be completed or the evaluation input yet.

Note: As of October 1, 2013 there were 345 active EDP firms. Some of the firms just provide surveying and testing services which typically are awarded PW pool contracts.
Over 500 firms have been EDP members. Numerous firms are no longer in the EDP primarily because they no longer have an office in MDC, have been purchased by another firm and/or are no longer in business.

Active EDP Firm Report as of September 30, 2013

*Includes potential sub service fees.
** No PPEs reported. Evaluations are required when an EDP project is completed. The projects may not be completed or the evaluation input yet.

Note: As of October 1, 2013 there were 345 active EDP firms. Some of the firms just provide surveying and testing services which typically are awarded PW pool contracts.
Over 500 firms have been EDP members. Numerous firms are no longer in the EDP primarily because they no longer have an office in MDC, have been purchased by another firm and/or are no longer in business.

Active EDP Firm	Years with MDC Tax Receipt 1 year to 5 years or more	(X) Never had a prime award with the County when entered the EDP program	EDP Program Entry Date	Current Small Business Certifications	Number of Employees reported by the firm within the last year.	TOTAL EDP Awards as Prime since entry into the program	*Total EDP Prime Awards in past two years (FY 11 thru FY13) Includes COs	*Total EDP Prime Awards in past three years (FY 10 thru FY13) Includes COs	*All County awards in the past three years FY 11 thru FY13 - Includes COs	** Past Performance Evaluations Reported on the CIIS

Active EDP Firm Report as of September 30, 2013

*Includes potential sub service fees.
** No PPEs reported. Evaluations are required when an EDP project is completed. The projects may not be completed or the evaluation input yet.

Note: As of October 1, 2013 there were 345 active EDP firms. Some of the firms just provide surveying and testing services which typically are awarded PW pool contracts.
Over 500 firms have been EDP members. Numerous firms are no longer in the EDP primarily because they no longer have an office in MDC, have been purchased by another firm and/or are no longer in business.

Active EDP Firm	Years with MDC Tax Receipt 1 year to 5 years or more	(X) Never had a prime award with the County when entered the EDP program	EDP Program Entry Date	Current Small Business Certifications	Number of Employees reported by the firm within the last year.
