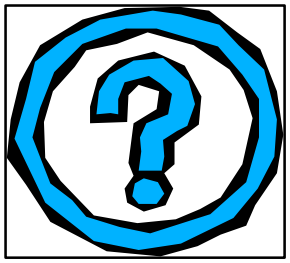
A CITIZENS' GUIDE TO THE TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

MESSAGE TO THE READER

Thank you for your interest and participation in the Miami Urban Area transportation planning process and in particular the Transportation Improvement Program (TIP).

About this document

This document is titled the "Transportation Improvement Program" and also known as the "**TIP**".



What is the TIP

The TIP is a staged multi-year program that prioritizes transportation improvement projects for federal, state and local funding. The TIP is also the capital improvements element of the long range transportation plan (LRTP). The TIP has a role in putting the LRTP into action.

TIP: Putting the Long Range Transportation Plan into action

Picturing the projects contained in the 2025 Long Range Transportation Plan (LRTP) for Miami-Dade County as a warehouse full of transportation projects for the next 20-plus years, the TIP is the vehicle that carries those projects to market.

The TIP not only lists specific projects, but also the anticipated schedule and cost for each project. Like the LRTP, the projects in the TIP must be financially constrained, undergo a series of evaluations, and include opportunity for public comment.

Once compiled, review of the TIP begins. Projects receive air quality and environmental justice analyses. During this period of time there is a 30-day public review.

The TIP is a changing document. Frequently, projects may be added to meet changing priorities or to take advantage of a special opportunity. For this reason, the TIP may be changed after it is approved. It can be amended in order to add, change or delete projects for a variety of reasons. Amendments to the TIP must undergo the same review and public scrutiny as the original TIP.

Some basic facts about Miami-Dade County

Population

With a population of more than 2.2 million, Miami-Dade County is the most populous county in Florida and among the top 20 most populous metropolitan areas in the United States. By the year 2025, the region's population is expected to climb to 3 million, while the number of households grows 37 percent, from the current 0.8 million to 1.1 million. In addition, the number of jobs in the county will increase from 1.19 million to over 1.55 million.

The region

Miami-Dade County is almost 2,300 square miles in area and encompasses thirty-one municipalities and the unincorporated area. The City of Miami is the County's most populous municipality, with a population of more than 362,000 inhabitants. There are 5 municipalities with populations over 50,000 and they are the City of Hialeah, City of Miami, City of Miami Beach, City of North Miami, and City of Coral Gables.

Transportation network

Miami-Dade's transportation network includes 40 miles of interstate freeways, 542 miles of major roadways, over 5,600 miles of local streets and roads, and 180 miles of bike paths. In all, that's over 6,000 miles that must be maintained, policed, cleaned and frequently repaved or rebuilt. In addition, there are 110 bridges, 130 miles of active railroad tracks, one major airport, and one seaport.

Mass transit

Miami-Dade Transit (MDT), the transit operator, owns 580 large buses, which travel an average of 67,000 miles daily on major roads in our county. Total daily ridership averages about 180,000. In addition, daily ridership on Metrorail (the 21-mile elevated rail) averages about 39,000 trips; on the Metromover (the 4½ mile downtown mover), average daily ridership is 12,000. Of all workers in the central business district, an estimated 20% take one of these forms of transit to get to work.

Vehicles

In Miami-Dade County, there are 1.8 million passenger vehicles traveling our road network. In total, those vehicles travel 40 million miles daily; by 2025, that will increase to over 50 million miles daily. The typical household makes eight trips a day. The average resident of Miami-Dade County consumed 381 gallons of fuel in the year 2000 and traveled 17.7 average miles per day. These figures are expected to increase by at least 35 percent over the next twenty years.

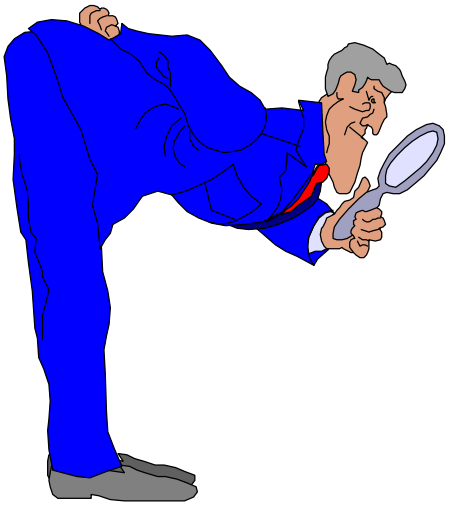
The commute

Work trips account for nearly 20 percent of all travel in Miami-Dade County. On an average workday, 96 percent of the region's commuters travel to work by car, 3 percent by public transit. One percent walk or travel by some other means, such as bicycle, motorcycle, or taxi.

Transportation and Air Quality go hand in hand

The Clean Air Act Amendment of 1990 requires that all approved transportation improvements demonstrate conformity with national air quality standards, and that emissions from those transportation improvements meet local and regional emission budgets for ozone and carbon monoxide. Miami-Dade County meets all federal air quality standards.

Metrorail in Downtown Miami



The TIP's Mechanics

Why is there a TIP ?

The U.S. Department of Transportation will not approve use of federal funds for an improvement unless the project is identified in the TIP. Inclusion in the TIP does not, however, guarantee federal funding. The TIP is fiscally constrained with reasonable estimates of project costs balanced against anticipated funding. Projects not funded by the federal government are included in the TIP to provide a more comprehensive picture of the proposed allocation of transportation funds in the region.

What does the TIP include?

The TIP includes a prioritized listing of transportation improvement projects for the Miami-Dade County region for the next five fiscal years.

How does the TIP work?

1. One year is current (the funded annual element) and the remaining four are future.
2. Each year adds a new fifth year and advances a new annual period to current funded status.
3. Identifies funding levels, by source and type, and whether funds are to be used for: road capacity, preservation, bridges, transit capital, safety, non-motorized, right-of-way, study or other.
4. Improvements in the TIP are based on MPO-established priorities from LRTP.

5. TIP is consistent with the adopted 2025 Long Range Transportation Plan and the 2030 currently under development.

What fiscal years does this TIP include?

This TIP covers fiscal years 2005 to 2009. Fiscal years spanned are 2005, 2006, 2007, 2008 and 2009. Fiscal years, as opposed to calendar years, begin on July 1st and end on June 30th .

Fiscal Year 2005 ----- begins July 1, 2004 and ends June 30, 2005
Fiscal Year 2006 ----- begins July 1, 2005 and ends June 30, 2006
Fiscal Year 2007 ----- begins July 1, 2006 and ends June 30, 2007
Fiscal Year 2008 ----- begins July 1, 2007 and ends June 30, 2008
Fiscal Year 2009 ----- begins July 1, 2008 and ends June 30, 2009

TIP consistency

The TIP must be consistent with the Long Range transportation plan and meet clean air standards (1990 Clean Air Act Amendments).

Who prepares the TIP?

The TIP is prepared by the Metropolitan Planning Organization (MPO) in cooperation with local transportation agencies. The Metropolitan Planning Organization (MPO) is the agency designated by the Governor of the State of Florida and certified by the federal government to carry out metropolitan transportation planning. The TIP is one of the MPO responsibilities.

Who participates in putting the TIP together?

The MPO, with local transportation agencies and other stakeholders as follows (in alphabetical order):

1. Florida Department of Transportation District 6
2. Florida's Turnpike District
3. Miami-Dade Aviation Department
4. Miami-Dade Department of Environmental Resources Management
5. Miami-Dade Expressway Authority (MDX)
6. Miami-Dade Planning and Zoning Department
7. Miami-Dade Public Works Department
8. Miami-Dade Seaport Department
9. Miami-Dade Transit Department
10. Tri-County Commuter Rail Authority (Tri-Rail)

- Meridian Avenue Bridge Project in Miami Beach -

The TIP's Technicalities

Who must approve the TIP locally?
The Metropolitan Planning Organization (MPO) Governing Board must approved the TIP.

Who must approve the TIP at the State level?
The Governor of the State of Florida must approved the TIP before the document becomes part of the State Transportation Improvement Program.

Who must approve the TIP at the federal level?
The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) approve the TIP for funding purposes.
The U.S. Environmental Protection Agency (USEPA) approves the TIP for air quality purposes. TIP must demonstrate it meets air quality standards. Air quality conformity is documented in a conformity determination report (CDR).

Where does the MPO gets its authority?

FEDERAL LAW: From Title 23 U.S. Code -- "To carry out the transportation planning process .. a metropolitan planning organization shall be designated for each urbanized area with a population of more than 50,000 individuals. In 1973, the Federal Transportation Act mandated that each urbanized area with 50,000 or more in population establish a Metropolitan Planning Organization (MPO). Federal law required that the Governor of the state designate the agency to serve as the MPO.
STATE LAW: From 339.175 Florida Statues: "It is the intent of the Legislature to encourage and promote the safe and efficient management, operation, and development of surface transportation systems" "to accomplish these objectives an MPO shall be designated for each urbanized area". For large urban areas (over 200,000 in population), the Secretary of Transportation certifies these as Transportation Management Areas (TMAs). MPOs that are designated as TMAs have to be certified every three years.

TIP Program Funding

Where does Highway Funding come from?
Gasoline taxes, such as federal gas tax, state motor fuel tax, local option gas tax, voter gas tax
Motor vehicle fees and road impact fees.
Automobile related user fees such as tolls.

Where does Transit Funding come from?
Transit funding comes from a combination of funds from the Federal Transit Administration (FTA), the State of Florida through the Florida Department of Transportation Public Transportation Office and Miami-Dade County's Budget (from local general funds).
