### Director, Neighborhood Regulations Division (002269)

#### Minimum Qualifications

Bachelor's degree and a minimum of five years of progressively responsible experience in code enforcement operations in a government agency or private sector entity to include supervisory experience is required. Knowledge of Miami-Dade County Code regulations is highly desirable.

#### Job Specifications

##### Nature of Work:

This is responsible professional managerial work in directing the activities for the Neighborhood Regulations Division in the Department of Regulatory and Economics Resources. An employee in this class is responsible for managing, supervising and coordinating departmental activities in the enforcement of regulatory ordinances pertaining to minimum housing standards, vacant housing standards, residential and business property maintenance and zoning codes. Responsibilities include providing enforcement of county code regulations concerning Unincorporated Municipal Service Areas. The incumbent exercises considerable independent judgment in the analysis of enforcement activities, identification of risks, and initiation of effective preventive measures. Supervision is exercised, through subordinate supervisors, over an extensive staff of inspection and enforcement employees with assigned responsibilities in various phases of operations. General supervision is received from an administrative superior who holds the incumbent responsible for effective code enforcement and security activities.

##### Illustrative Tasks:

Plans, supervises and coordinates the work of subordinate supervisors in the enforcement of neighborhood regulations. Directs and coordinates the work of subordinate supervisors in the enforcement of neighborhood regulations and code enforcement pertaining to county code regulations regarding minimum housing standards, vacant housing standards, residential and business property maintenance and zoning codes. Analyzes overall enforcement activities and problems, identifies areas of risk and initiates preventive measures; implements short and long-range enforcement projects; assists in the preparation of ordinances to enforce departmental enforcement policies. Coordinates and integrates enforcement activities involving remediation and abandon vehicle removal services. Coordinates division procurement activities consistent with departmental and County policies and procedures. Prepares and reviews budget estimates and documents; administers budget for the division. Manages and reviews federal grants and projects for compliance with contract obligations and requirements. Provides overall direction and coordination on policy and management of citations and Special Master Hearings. Establishes and revises divisional goals and objectives; redirects enforcement priorities as required. Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance. Performs related work as required.

##### Knowledge's, Abilities and Skills:

Thorough knowledge of Miami-Dade County Code, enforcement programs related to County Code Regulations including (Chapter 2, 17, 17A, 19, and 33).

Thorough knowledge of laws, regulations, and ordinances pertaining to Neighborhood Regulation such as minimum housing standards, vacant housing standards, residential and business property maintenance standards and zoning code.

Thorough knowledge of legal procedures related to the enforcement of neighborhood regulations and ordinances.

Thorough knowledge of the principles of management and public administration.

Considerable knowledge of supervisory principles and practices.

Ability to supervise, through subordinate supervisors, the work of a large staff of geographically dispersed enforcement and security employees in a manner conducive to full performance and high morale.

Ability to enforce county codes, ordinances and regulations in accordance with departmental goals and objectives.

Ability to coordinate enforcement activities with other departmental operating units.

Ability to establish and maintain effective working relationships with subordinates, superiors, and officials of other County departments and outside agencies.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to prepare a variety of forms, reports, and schedules.

REV. 10/2012

##### NATURE OF WORK

This is advanced professional and technical work coordinating art design projects in a centralized County-wide graphics design operation.

An employee in this class is responsible for the administration of a county graphics design system and the development of graphics designs and systems for use in county departments and agencies. Emphasis of the work is on coordinating the development of art design projects with various county officials, departments and agencies, supervising a staff of artists and designers, developing and administering procedures for production of final art designs and administration of a county graphics design system providing a consistent county image to the public. The incumbent exercises considerable independent professional judgment in the development and completion of art design concepts and in coordinating work with other county departments and agencies. Supervision is exercised over a staff of artists, designers, technical and clerical subordinates through assignment of art design projects and review of work in progress and upon completion. Supervision is received from a professional and administrative superior who reviews work for effective provision of art design services and for professional quality of completed projects.

##### ILLUSTRATIVE TASKS

Coordinates art design projects for Miami-Dade County through contact with various county officials, and county departments and agencies; develops formats to be used for posters, flyers, folders, booklets, brochures, dedications, advertisements, charts, presentations, stationary, clip sheets, television public service announcements, various reports and promotional campaigns.

Plans, assigns and reviews the work of a staff of artists and designers engaged in the successful development of design projects; directs the artistic development of projects from concept layout to production.

Develops and administers procedures necessary for completion of final art design products including requisitions, purchase orders and work orders; schedules production for designing and printing to meet deadlines; consults with printers to choose stock, ink, check proofs and monitor printing progress.

Administers a county graphics design system; develops design concepts for size, placement and positioning of official county Logo.

Establishes priorities for art design projects, distributes to staff and participates in more difficult assignments, procedures, concepts, layouts and final artwork for production.

Presents art design concepts to various departments and provides advice on deciding on the best designs and on technical processes; assists in the decision making process for selection of the best designs and methods of presentation of information.

Makes recommendations regarding the hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of contemporary art and artistic design.

Thorough knowledge of graphic arts design principles and practices.

##### NATURE OF WORK

This is broadcast engineering work in the programming, operation and maintenance of closed-circuit television and related systems.

An employee in this class is responsible for the programming, operation and maintenance of closed-circuit television and audio-visual equipment in the Metro-Dade County Commission Chambers and Metro-Dade Center. Responsibilities include preparation of presentations on a regular basis requiring split screen formats of technical and data base information, testing of both base and remote equipment, preparation of specifications for contract maintenance and equipment purchases, and supervision of the production of documentary and training tapes. Considerable independent judgment is exercised in the application of television and broadcast engineering knowledges to the programming and operation of closed-circuit television systems and related equipment. Supervision is exercised over subordinate technicians who operate equipment and assist with general broadcasting operations. General supervision is received from an administrative superior who reviews work for satisfactory programming, operation and maintenance of equipment and for quality of presentations and broadcast engineering operations.

##### ILLUSTRATIVE TASKS

Prepares presentations for the Board of County Commissioners and other organizations using the Commission Chambers on a regular basis; coordinates work with Commissioners and other officials to determine the desired outcome and plan necessary activities to complete presentations.

Prepares split screen formats of technical and data base information established by county officials who have use of the equipment for special presentations.

Tests equipment including statistical and remote equipment and dry-runs programs to assure effectiveness; adjusts both equipment and presentations as necessary.

Operates audio-visual equipment during presentations in the Metro-Dade County Commission Chambers including the use of auxiliary equipment in other locations in the Metro-Dade Center.

Supervises assistants who operate and/or monitor less sophisticated equipment while meetings are in progress.

Assures proper maintenance and repair of all audio-visual equipment belonging to the department.

Coordinates maintenance and repair of highly technical and complex equipment with manufacturer or service agency involved; evaluates contractor's performance and documents deficiencies.

Writes specifications for contracts or purchasing related to equipment used in the common areas of the Metro-Dade Center

Coordinates use of Commission Chambers with the Metro-Dade Center building officials and staff and advises of maintenance or preparatory needs other than audio-visual.

Performs administrative functions including budget preparation; prepares reports, correspondence and requisitions.

Supervises production of documentary and training video tapes for use by department and for records purposes.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of television cinematography and broadcast engineering.

Thorough knowledge of the operating characteristics and maintenance requirements of closed-circuit television and related systems.

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of technical specifications and service contracts for closed-circuit television systems, projectors, microphones, transformers, amplifiers and related broadcasting equipment.

Considerable knowledge of the methods of preparation and presentation of split screen formats of technical and data base information.

Knowledge of supervisory principles and practices.

### Job Specifications

#### NATURE OF WORK

This is administrative work in performing various administrative activities in a central administrative division or special program in a county department or agency.

Employees in this class are responsible for performing various administrative duties in assisting departmental management in carrying out required administrative operations. Duties or combination of duties performed vary, depending on the department to which assigned. Some incumbents in the class perform specialized duties of a staff nature relating to a specific program. Employees are assigned duties such as cost analysis and control, budget preparation and expenditure control, purchasing and inventory work, methods and procedure studies, report or grant proposal preparation and personnel administration. Incumbents exercise some independent judgment in devising and installing new work methods, interpreting rules, regulations and procedures and in making recommendations to superiors. Supervision may be exercised over clerical and technical employees who assist in various phases of administrative operations. Supervision is received from an administrative superior who reviews work for attainment of desired management objectives and conformity with established administrative and departmental policies and procedures through conferences, personal inspections and review of reports.

#### ILLUSTRATIVE TASKS

Assists in planning and preparing divisional or project budgets; insures adherence to budget procedures and guidelines; reviews completed budget documents for format, accuracy of budget codes and computations; monitors budget forecasts and expenditures for departmental projects and activities; prepares periodic budget reports.

Supervises clerical subordinates engaged in preparation of invoices and billings for equipment or services, issuance of purchase orders and requisitions, reconciliation of computer reports and related clerical activities; provides training to employees in new procedures required with automated accounting and reporting systems.

Coordinates the maintenance of various accounting records such as cash and surety bonds; audits departmental financial records to obtain data for management reports relative to budget control, purchasing standards, stores and equipment inventory control or improvements in operational efficiency; recommends procedures for collection and reporting of data on departmental programs in cost analysis and revenue producing activities; accounts for costs and reviews revenue summaries to assure revenues are properly collected.

Analyzes financial, procurement and administrative procedures for simplification and improvement in efficiency; analyzes purchase orders to determine requirements; checks requisitions for completeness and accuracy; writes specifications and requisitions and assists in selection of bids for departmental equipment or supplies.

Interviews applicants for employment to determine qualifications; provides information to applicants regarding career county employment; requests eligible lists and coordinates panel interviews for departmental positions; processes affirmative action complaints from employees through appropriate channels.

Assists in the supervision of clerical subordinates engaged in processing departmental personnel actions; discusses work related problems with employees; coordinates departmental personnel activities with federal funded employment programs as necessary.

Conducts assigned research, procedural or administrative studies and prepares narrative and statistical reports, proposing courses of action; reviews workload reports from operating segments for conformance with department instructions; audits program records reflecting client or patron workloads for conformance with departmental instructions and accuracy of computations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

### Election Procedures Specialist (002403)

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles of general management and their application to governmental administration.

Considerable knowledge of research techniques and the sources and availability of current information applicable to the area of assignment.

Knowledge of budget preparation procedures and reporting requirements.

Knowledge of departmental, legal, administrative and procedural regulations.

Knowledge of the principles and procedures of modern office administration.

Knowledge of basic accounting principles, practices and procedures.

Knowledge of the use of data processing and cost accounting systems.

Knowledge of the principles, practices and procedures of public personnel administration.

Knowledge of supervisory principles and practices.

Ability to analyze administrative problems and make sound recommendations as to their solution.

Ability to supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to understand and carry out complex oral and written instructions.

Ability to establish and maintain effective working relationships with other employees, supervisors, departmental officials and the general public.

Ability to express ideas clearly and concisely, both verbally and in writing.

Ability to supervise preparation of records and reports on a timely and complete basis.

Ability to prepare complete narrative and statistical reports.

Ability to conduct appropriate interviews with prospective employees and obtain pertinent information.

Ability to prepare accurate accounting and budgetary reports.

#### Minimum Qualifications

Bachelor's degree. A minimum of five to nine years of progressively responsible experience in the management of a large and complex data processing organization is required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional and technical managerial work in planning and directing activities of the Elections department's electronic voting and information systems.

An employee in this class is responsible for directing and supervising centralized electronic voting computer center with an extensive network of interconnected distributed processors at the Elections department. Emphasis of the work is on assuring the provision of economical and efficient automated data processing services to the Elections Department, developing plans for the acquisition, installation and operation of electronic voting and data processing equipment and negotiating contractual terms and conditions with vendors. The incumbent exercises an extensive degree of independent judgment and professional managerial knowledge in directing the electronic voting processing activities. Supervision is exercised through subordinate supervisors over a variety of professional, technical and clerical subordinates with assigned responsibilities in various phases of systems operations. General direction is received from an administrative superior who holds the incumbent responsible for the professional management of data processing activities and quality of service to the Elections Department and the public.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews, through subordinate supervisors, the work of technical subordinates engaged in computer programming, systems analysis, computer operations, teleprocessing, electronic voting and other data processing activities.

Directs and supervises the operation of a centralized computer center providing automated data processing services and electronic voting system for the Elections Department.

Establishes policies for the use of automated data processing for the department; attends meetings and conferences with departmental officials to examine data processing needs.

Develops, presents and supports budget estimates and financial plans concerning acquisition of data processing equipment and software acquisition or development costs.

Plans for and assures the acquisition, installation and operation of automated data processing equipment for the Elections Department.

Negotiates with vendors contractual terms and conditions regarding acquisition, installation and maintenance of electronic voting and data processing equipment.

Ensures the efficient and economical disposal of data processing equipment no longer required for departmental needs.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of computer programming, computer systems and electronic voting and data processing equipment.

Extensive knowledge of the organization, operation and management of a Computer processing center.

Thorough knowledge of the principles of public and business administration.

Thorough knowledge of current developments in the field of automated data processing and electronic voting technology.

Thorough knowledge of the data processing needs of the Election Department.

Considerable knowledge of supervisory principles and practices.

Ability to plan and supervise the development of complex informational systems based on Elections Department requirements.

Ability to plan, organize and direct the operation and management of a centralized computer center.

##### NATURE OF WORK

This is highly responsible executive level work assisting in planning and directing activities of the Miami-Dade County Elections Department.

An employee in this class is responsible for assisting the Supervisor of Elections in planning, directing and supervising departmental operations and functions required for local, state and federal elections. Responsibilities include assisting in the establishment of departmental objectives and monitoring progress toward their achievement; directing diversified divisional functions; maintaining contacts with public officials and the media; interpreting state and federal election laws; managing departmental financial and budgetary operations; and organizing work to ensure maximum productivity at minimum cost. The incumbent exercises extensive independent judgement and professional managerial knowledge in formulating departmental policies and directing departmental operations. Supervision is exercised through various levels of subordinate executives and supervisors over a staff of employees which may vary greatly in size depending upon election activities. General direction is received from the Supervisor of Elections who holds the incumbent responsible for attainment of desired goals and objectives and for the professional management of the department.

##### ILLUSTRATIVE TASKS

Provides assistance to the Supervisor of Elections in the establishment of departmental programs, functions and direction; sets goals and objectives and monitors their achievement; evaluates departmental programs and assesses their effectiveness in meeting the needs of the citizens of Miami-Dade County, elected officials and candidates.

Directs the operation of diversified divisional activities through subordinate executives and supervisors; reviews and evaluates operation of all divisions and sections; reviews and approves written procedures for all functions.

Reviews existing organizational patterns, work relationships, space utilization, data reporting systems and staff responsibilities, and structures the organization of the department to effectively achieve organizational goals.

Meets with the public, candidates, public officials and the news media.

Acts in the absence of the Supervisor of Elections.

Prepares reports, ordinances, resolutions and correspondence.

Interprets election statutes; recommends and lobbies for changes in federal and state election laws.

Assist in the preparation of information for lawsuits regarding elections; testifies at court hearings.

Prepares and delivers speeches to governmental and private organizations; makes media appearances.

Convenes meetings with department management to discuss findings, policies procedures and other subjects.

Reviews and approves divisional budgets, disbursements, capital expenditures and departmental charges; prepares departmental budget; analyzes expenditures to ensure maximum productivity at minimal cost.

Makes decisions regarding hiring, discipline and promotion of subordinates; reviews performance reports prepared by subordinates and rates employee performance; exercises authority for departmental personnel actions consistent with collective bargaining agreements, County personnel rules and all other applicable rules and regulations.

Performs related work as required.

### Passenger Transportation Vehicle Inspector (002510)

#### Minimum Qualifications

High school diploma or GED. Two years of experience inspecting and/or maintaining motor vehicles are required.

#### Job Specifications

##### NATURE OF WORK

This is technical and clerical work in the inspection and permitting of For-Hire passenger motor vehicles.

Employees in this class perform detailed inspections of For-Hire passenger motor vehicles and related equipment to assure compliance with legal and safety requirements. Duties include the use of specialized testing equipment, conducting comprehensive visual inspections and re-inspections, completing inspection forms, issuing inspection certificates or rejecting vehicles for deficiencies, and performing a variety of related clerical tasks. Work is performed according to standard inspection procedures but some judgment is required in interpreting inspection regulations and in their application to specific problems encountered in the inspection of vehicular equipment or damage. Supervision is received from an administrative superior who reviews work for conformance with established inspection practices and procedures.

##### ILLUSTRATIVE TASKS

Conducts inspection of taxicabs, non-emergency transportation vehicles, limousines, passenger motor carriers and private school buses following clearly prescribed procedures.

Inspects vehicles and vehicular equipment, visually or using specialized testing equipment such as Front-End machines, Brake machine and Headlight machine.

Inspects operation and/or condition of tires, brake system, steering mechanism, front-end suspension, drive train, exhaust system, and specialized equipment such as used in wheelchair or stretcher vehicles.

Completes inspection forms for all types of vehicles, determines if deficiencies exist, rejects vehicles or issues inspection certificates; verifies insurance coverage and maintains inspection form filing system; performs vehicle re-inspections.

Maintains equipment, materials, supplies and work areas.

Prepares daily reports of inspections; collects fees and issues receipts; prepares cash deposit forms, removes cash and cash register tapes from cash register.

Keeps informed of changes in inspection regulations.

Provides information to private owners, operators and others concerning repairs needed to comply with regulations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of automotive mechanics particularly in automotive safety systems including brakes, steering, front-end suspension, drive train, exhaust system and tires.

Considerable knowledge of the operating characteristics of automotive equipment.

Knowledge of the regulations, policies and procedures applicable to the inspection of For-Hire passenger motor vehicles.

Knowledge of specialized motor vehicle inspection and testing equipment.

### Passenger Transportation Vehicle Inspector (002510)

Knowledge of reports and forms used in the area of assignment.

Knowledge of office practices and procedures.

Some knowledge of public relations techniques.

Ability to detect deficiencies in a variety of automotive vehicles and equipment.

Ability to complete a variety of forms and prepare routine reports.

Ability to follow verbal and written instructions.

Ability to apply the provisions of established regulations to the inspection of passenger motor vehicles and related equipment.

Ability to operate specialized automotive testing and inspection equipment.

Physical strength and agility sufficient to perform assigned duties.

### Manager, For-hire Vehicle Facility Inspection (002511)

#### Minimum Qualifications

Bachelor's degree. One year of experience in code enforcement or inspection is required. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is skilled and supervisory work in the inspection and permitting of for-hire passenger motor vehicles for the Consumer Services Department.

Employees in this class are responsible for supervising all phases of inspection and permitting activities pertaining to for-hire passenger motor vehicles at a vehicle inspection station. Responsibilities include supervising vehicle inspections, collection of fees, issuance of operating permits, vehicle reinspections, resolution of citations for ordinance violations, developing and administering budgets, working with innovative computer systems and inspection equipment, maintaining an inspection facility and training of vehicle inspection station employees. Employees in this class interact with industry representatives, for-hire chauffeurs and license holders, internal staff, and all other parties related to the vehicle inspection process. The incumbent exercises some independent judgment in the interpretation of passenger motor vehicle inspection and permitting regulations and in their application to the vehicle permitting and inspection process. Supervision is exercised over technicians engaged in the inspection of vehicles and clerical employees involved in vehicle permitting. Employees in this class interact with industry representatives, for-hire chauffeurs and license holders, internal staff, and all other parties related to the vehicle inspection process. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for effective supervision of vehicle inspection station activities and conformance with applicable regulations and procedures.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate technicians engaged in conducting inspections of taxicabs, non-emergency transportation vehicles, limousines, passenger motor carriers and private school buses.

Supervises the collection of fees and issuance of operating permits.

Reviews all applicable inspection applications and reviews vehicle inspection reports for compliance with performance standards and departmental policies.

Ensures that customers are treated courteously and receive timely service; receives and resolves complaints from customers in a satisfactory manner.

Oversees proper issuance of vehicle inspection certificates.

Ensures that required reports are prepared accurately and on a timely basis; maintains inspection records; practices efficient budgetary techniques; prepares and submits reports to supervisors.

Provides training to subordinates in vehicle inspection techniques and other areas applicable to passenger motor vehicle inspection station operations.

Makes recommendations regarding hiring, discipline and promotions; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

Thorough knowledge of laws, regulations, policies and procedures pertaining to the inspection and permitting of for-hire passenger motor vehicles.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work in the licensing of For-Hire passenger motor vehicles in a passenger transportation regulation activity.

Employees in this class are responsible for processing applications for renewal of For-Hire vehicle licenses, issuing replacements for vehicle licenses and processing license transfers. Duties include obtaining information to develop recommendations for approval or disapproval of license transfers, screening, correcting and processing renewal applications including assuring adequate insurance information, maintaining a variety of logs, records and reports, and maintaining contacts with state and local officials. Work is performed according to established policies and procedures and requires the use of some independent judgement in interpreting the provisions of applicable regulations and in dealing with state and local officials. Some supervision may be exercised over clerical employees assisting with various phases of work. Supervision is received from an administrative superior who reviews work for conformance with established departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Process renewals of For-Hire vehicle licenses including taxicabs, limousines, passenger motor carriers and non-emergency vehicles; mails forms and receives renewal fees; screens applications for accuracy of vehicle information, adequate insurance coverage and correct signature. Issues replacement decals when vehicle changes are made; verifies information and collects old decals.

Monitors field enforcement reports to identify vehicles suspended from service for major safety for operational violations.

Answers inquiries from the public concerning the provisions of ordinances related to passenger transportation regulations, inspection requirements for vehicles, insurance coverage for vehicles involved in accidents.

Maintains daily logs of activities and files concerning inspection dates, self-insurance funds, vehicle transfers, and other related subjects.

Processes For-Hire license including verifying character references, financial circumstances and operator experience; contacts various state and local agencies and private businesses.

Conducts background investigations of applicants for Chauffeurs License; reviews and approves or disapproves applications; counsels applicants on procedures necessary to obtain approval.

Administers examinations for licenses; grades examinations, takes photograph of applicant and signs license; instructs applicants that do not pass tests when to return for retesting.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the ordinances and regulations pertaining to For-Hire passenger motor vehicle licensing.

Considerable knowledge of departmental policies and procedures concerning the issuance of, renewal and transfer of passenger motor vehicle licenses.

Knowledge of modern office practices and procedures.

Knowledge of state, local and private sources of information used in conducting background investigations required by regulations.

Ability to interpret and apply the provisions of passenger motor vehicle regulations.

Ability to keep accurate records, logs and files.

Ability to screen applications and related documents for accuracy and thoroughness.

Ability to establish and maintain effective working relations with supervisors, state and local officials, and the public.

Ability to communicate clearly and concisely, verbally and in writing.

##### NATURE OF WORK

This is paralegal work in the collection and processing of payments for the Consumer Services Department (CSD).

An employee in this class is responsible for the collection and processing of payments for citations, liens, licensing fees, and worthless checks received from violators and CSD customers. Emphasis of the work is on the collection and processing of payments; maintenance of the Collections Program database; delivery, research and retrieval of required documents necessary for lien files and other collection related activity; and support of the Licensing, Enforcement and Legal sections of CSD. Responsibilities include collecting outstanding citations, liens, worthless checks, unpaid licensing balances and legal fees assessed on Joint Stipulations and Assurance of Voluntary Compliance agreements owed to CSD; working with the Licensing and Enforcement units to ensure that compliance is obtained; maintaining all CSD collections' logs to include inventory control, bad checks, recorded and satisfied liens and certified mail tracking and maintaining various collections file sections throughout the department and the collections database. Incumbents exercise independent judgment in the processing of cases. Supervision is received from an administrative superior who will review work for conformance with established departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Collects and processes payments for citations, liens, licensing fees and non-sufficient funds checks received from violators and Consumer Services Division (CSD) customers.

Delivers payments, lien documents and affidavit of compliance and settlement forms to Code Enforcement and the County Recorder's Office.

Negotiates payment plans with violators in accordance with CSD collections guidelines and monitors payment agreements established for legal/lien cases; ensure violators comply with payment commitments and correcting violations.

Processes all collection letters sent via certified mail; ensures delivery of all certified mail by tracking either return receipt cards or USPS .com; coordinates Sheriff Service when necessary for letters not delivered.

Handles walk-ins to CSD and serves as the initial point of collections contact.

Supervises and maintains collections file inventory and tracking logs.

Researches and locates required documents from other CSD Divisions and other County departments.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the provisions of the County Code pertaining to the collection of enforcement costs.

Knowledge of the records, forms, documents and affidavits used in the processing of enforcement court cases.

Knowledge of the processing of liens, civil violation notices and other documents in the collection of enforcement costs.

Knowledge of public relations principles and techniques.

##### NATURE OF WORK

This is specialized work in the investigation, inspection and enforcement of uniform trade standards ordinances and other statutes pertaining to consumer protection.

Employees in this class are responsible for inspecting, testing and enforcing regulatory provisions for weights and measures, instrument validation, deceptive advertising, accurate labeling of packaged merchandise and other consumer protections. Work involves the investigation of citizen complaints, gathering of evidence and witnesses for use in possible prosecution and periodic inspection and testing of varied types of weighing and measuring equipment used in local commercial activities. Duties require the operation of mechanical calibration equipment in determining the accuracy of a wide variety of scales, meters and measuring devices used for solid, liquid and gaseous substances. Work is performed independently in the field and incumbents must exercise tact and judgment in communicating and explaining ordinance provisions to merchants and consumers. Supervision is received from a technical and administrative superior who reviews work through inspection reports and personal conferences for conformity with departmental practices and assists in difficult and complex cases.

##### ILLUSTRATIVE TASKS

Inspects and tests the accuracy of commercial scales, taximeters, LPG meters and related measuring devices; approves those in compliance with prescribed tolerances or rejects devices from continued use.

Inspects packaged, canned, bottled and other goods for accuracy in quantity, labeling and adherence to prescribed quality and specifications.

Investigates and screens advertisements for false or misleading advertising and deceptive trade practices.

Reviews and investigates a wide variety of consumer complaints of unfair and deceptive trade practices.

Disseminates to the general public information on local, State and Federal laws related to consumer protection such as credit, mail order merchandise, auto repairs and home improvements.

Serves complaints on violators; prepares detailed investigative reports for possible prosecution as required; testified in criminal court against violators and on behalf of litigants when subpoenaed in civil cases, as required.

Assists business owners and managers with explanations and information on the trade standards ordinances, and assures their compliance.

Prepares records and reports of daily activities and maintains appropriate monthly records of activities.

Assists citizens with complaints and requests for information by answering special telephone lines.

Performs related work as required.

### Enterprise Zone Administrator (002537)

#### Minimum Qualifications

Bachelor's degree. A minimum of four years of professional experience in economic development, grant/contract administration, budgeting or community outreach, to include supervisory experience are required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional managerial and administrative work of the Enterprise Zone Program for the Regulatory and Economic Resources Department.

An employee in this class is responsible for managing and administering the Enterprise Zone (EZ) Program. Responsibilities include marketing the EZ program to the business community, processing applications for EZ economic development incentives, preparing quarterly and annual reports as required by the State of Florida, conducting the annual compliance monitoring of companies receiving Enterprise Zone incentives. Responsible for coordinating and preparing documents necessary for the periodic modification of the County's EZ boundaries and reauthorization of the program, and functioning as the administration's Liaison and Secretary to the Enterprise Zone Advisory Council. The incumbent exercises considerable independent judgment. General direction is received from an Executive who holds the incumbent responsible for the professional management of the Enterprise Zone program and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Manages the daily operations of the Enterprise Zone program participating in the identification, formulation and submission of grant applications for economic development projects within the program.

Coordinates, plans, and develops activities with local officials and private developers; and communicates with diverse groups of community shareholders and representative from the private sector.

Administers and promotes the EZ state incentives, prepares quarterly and annual reports, manages property tax abatement programs, performs site visits of program participant, and coordinates economic development workshops for the community.

Assists the Enterprise Zone Advisory Council (EZAC) board with the development of comprehensive plans for economic development in the Enterprise Zone. Generates technical and administrative planning reports, and assists with administrative activities that support the Council's mission.

Serves as the contract officer for economic development research and planning studies that may be commissioned from external consultant and coordinates the presentation of final results to the Enterprise Zone Advisory Council, Social and Economic Development Council, senior administration, and elected officials.

Identifies issues, goals and objectives, and discusses alternative plans for the economic development needs.

Serves as the Liaison to the EZAC, prepares memos and resolutions to be presented to the Board of County Commission (BCC) related to the EZ programs and projects, coordinates the process of the EZ boundary modifications and the preparation of documents needed for the reauthorization of the State EZ program.

Attends agenda briefing and Board of County Commission meetings as needed. Provides staff support, writes reports, and assists in relevant projects of the Economic Analysis and Policy Unit. Reviews cases where contracted agencies are not achieving contract performance goals or not following required procedures.

Performs related work as required.

### Motor Vehicle Repair Enforcement Officer (002545)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in automotive repair or automotive body repair and painting are required. One year of automotive vocational training may substitute for one year of the required experience. Must possess a Driver license. As a condition of continued employment, must obtain two Automotive Services Excellence certificates prior to the completion of the probationary period. Automotive Services Excellence certificates must be obtained at the employee's own time and expense.

#### Job Specifications

##### NATURE OF WORK

This is technical field work in the investigation, inspection and enforcement of the Miami-Dade County Motor Vehicle Repair Ordinance.

Employees in this class are responsible for conducting field inspections to determine potential violations of the Miami-Dade County Motor Vehicle Repair Ordinance. Work involves answering inquiries from representatives of the automotive repair industry and the public concerning provisions of the ordinance, inspecting automotive repair shops for required licensing and equipment, confirming that technicians have been certified, investigating consumer complaints, gathering evidence and witnesses for use in possible prosecution, and testifying at appeal hearings. Work is performed independently in the field and incumbents exercise tact and judgment in communicating and explaining ordinance provisions to facility owners, their employees, and consumers. Supervision is received from a technical and administrative superior who assists in difficult and complex cases, and reviews work through inspection reports and personal conferences for conformity with departmental policies, procedures and practices.

##### ILLUSTRATIVE TASKS

Inspects motor vehicle repair and paint and body shops to ensure that they have the proper equipment for their specialties and that the equipment is operable.

Inspects motor vehicle repair and paint and body shops to confirm signage as required by the ordinance.

Inspects motor vehicle repair and paint and body shops for correct mechanic/technician and apprentice certification/permitting.

Screens and investigates advertisements for false and misleading, and deceptive trade practices, and ensures that repair shops advertise with their license numbers; requests voluntary compliance or orders those in violation to comply.

Reviews and investigates consumer auto repair complaints, mediates resolutions, detects violations of unfair and deceptive practices, and recommends appropriate action.

Disseminates information to auto repair/paint and body shops and the public on the Motor Vehicle Repair Ordinance.

Serves complaints on violators; prepares detailed investigative reports for possible prosecution as required; testifies in criminal court against violators and on behalf of litigants when subpoenaed in civil cases, as required.

Prepares records and reports of daily activities and maintains appropriate monthly records of activities.

Assists citizens with complaints and requests for information by telephone.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the Dade County Motor Vehicle Repair Ordinance.

## Human Resources Department

---

### Motor Vehicle Repair Enforcement Officer (002545)

Considerable knowledge of local, state and federal laws, rules and regulations pertaining to motor vehicle repairs.

Knowledge of various types of equipment used in motor vehicle repairs.

Knowledge of testing standards and manuals related to motor vehicle equipment and motor vehicle repairs.

Knowledge of sales techniques and advertising practices typically used by motor vehicle repair facilities.

Knowledge of the area of operation and authority of other agencies active in the motor vehicle repair field.

Knowledge of public relations principles and techniques.

Ability to comprehend and enforce the Motor Vehicle Repair Ordinance and other motor vehicle repair statutes.

Ability to communicate firmly, tactfully and impartially with auto repair facility owners and employees, and citizens in enforcement of the law.

Ability to perform field assignments independently with a minimum of supervision.

Ability to write detailed reports and submit accurate reports of field inspections.

Ability to investigate complaints and determine if violations of the law have occurred.

Ability to read and understand auto repair advertisements and apply ordinances regarding false and misleading advertising.

Ability to read and understand motor vehicle repair estimates and invoices.

Skill in the use of motor vehicle repair equipment for selected certified categories.

### Consumer Protection Investigative Analyst (002546)

#### Minimum Qualifications

Bachelor's degree in Business Administration, Public Administration, Criminal Justice or related field. One year of complaint investigation and resolution experience is required. Additional investigative experience may substitute for required education on a year-for-year basis. Must possess a State of Florida Mediator certification or be able to obtain certification within one year of employment. Must possess a Driver license.

#### Job Specifications

##### Nature of Work

This is specialized work in the analysis, investigation, and resolution of consumer complaints through mediation and the enforcement of consumer protection related laws.

Employees in this class are responsible for conducting programs involving consumer outreach, dispute mediation and settlement between customers and businesses, and the investigation of uniform trade standards and other statutes pertaining to consumer protection. Responsibilities include handling and closure of consumer complaints, participating in investigations of industries regulated by the Miami-Dade County Consumer Services Department. Incumbents exercise initiative and independent judgment in the performance of these responsibilities. General supervision is received from the Mediation Center Supervisor who reviews work for conformity with established administrative and departmental policies, attainment of desired objectives through conferences and reviews of operational reports.

##### Illustrative Tasks

Analyzes and investigates a wide variety of consumer complaints.

Participates in investigations of industries regulated by the Miami-Dade County Consumer Services Department, Consumer Protection Division.

Screens and investigates advertisements for false or misleading advertising and deceptive trade practices.

Develops and presents consumer education and information speeches and programs.

Coordinates and facilitates mediation sessions between consumers and businesses.

Negotiates with businesses on behalf of consumers to achieve equitable resolutions of consumer/business problems

Disseminates, to the general public, information on local, State, and Federal laws related to consumer protection such as credit, mail order merchandise, and auto repairs.

Drafts written correspondence to consumers from the Division, Department Director, and County Manager.

Issues civil citations to violators, prepares detailed investigative reports for code enforcement hearings and civil court cases, and testifies as required.

Provides business owners and managers with explanations and information on applicable ordinances and assures their compliance.

Prepares records and reports of daily activities and maintains appropriate monthly records of activities.

Assists citizens with complaints and requests for information.

Assists with the preparation of cases for potential legal action by the Miami-Dade County Consumer Advocate.

Performs related work as required.

##### Knowledge, Abilities, and Skills

Considerable knowledge of local, State and Federal laws, rules and regulations pertaining to consumer protection.

Considerable knowledge of investigative techniques and processes.

Considerable knowledge of research and analysis techniques and information sources in the consumer protection field.

Considerable knowledge of mediation policies and procedures.

### Consumer Protection Investigative Analyst (002546)

Considerable knowledge of sales promotion techniques and advertising practices used within the County.  
Knowledge of the area of operation and authority of other agencies active in the field of consumer protection.  
Ability to comprehend and enforce uniform trade standards, ordinances and other statutes pertaining to consumer protection.  
Ability to communicate effectively, tactfully, impartially and firmly with merchants and citizens in enforcement of the law.  
Ability to perform assignments independently with a minimum of supervision.  
Ability to write detailed and accurate investigative reports.  
Ability to investigate complaints and ascertain if a violation of law has occurred.  
Ability to read and understand advertisements and apply ordinances regarding false and misleading advertising.  
Ability to effectively resolve disputes through mediation.  
Ability to communicate effectively while conducting outreach sessions regarding consumer protection related topics to students, community based organizations, and the general public.  
Ability to read and understand business contracts.  
Ability to effectively communicate in writing.  
Skill in the use of personal computers with and research databases.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and supervisory work in the investigation and enforcement of a variety of Miami-Dade County Code Business Regulations.

Employees in this class are responsible for training, planning, assigning, and reviewing the work of Consumer Services Department (CSD) enforcement officers engaged in field and office activities related to the enforcement of County ordinances of various regulated and non-regulated businesses and industries. Responsibilities include training enforcement officers, providing advice on field and office work problems, developing non-judicial solutions to code violations, coordinating enforcement activities with a variety of officials and organizations, overseeing completion of service requests, complaint investigations and various reports, and developing recommendations for improved enforcement activities. Incumbents exercise considerable independent judgment in the coordination and resolution of various County Code enforcement issues. Supervision is exercised over a staff of highly professional CSD enforcement officers engaged in various phases of compliance activities, some of whom are required to hold certifications in their areas of expertise. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory achievement of enforcement objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns, reviews, and provides feedback on the work of CSD enforcement officers engaged in the enforcement of a variety of Miami-Dade County Code regulations related to the Regulated and Non-Regulated Business Community.

Prepares Administrative Hearing calendars; coordinates with police, municipal personnel, complainants and other personnel required to present testimony at Administrative Hearings; assists enforcement officers in preparation of documents and testimony; represents the Department at Administrative Hearings.

Provides advice and assistance to Enforcement Officers as well as other CSD employees concerning office and field work.

Assists in the review of County records necessary to complete investigations and requests for assistance.

Makes recommendations and implements solutions in an effort of finding resolution to code violations without the necessity of exercising more severe courses of actions including cease and desist or stop orders, suspension and revocation of business licenses, citations, injunctive relief in the civil courts and prosecution through the State Attorney in the criminal courts.

Maintains a good working relationship with business owners, managers and representatives, local police agencies, complainants, alleged violators, property owners, Administrative Hearing Officers and attorneys.

Coordinates multi-agency and multi-jurisdictional enforcement operations.

Participates in Department approved media related events including radio and television interviews to educate the public and business community on Consumer Services related issues; attends meetings with the business community and explains County Code regulations; attends meetings with special event coordinators and convention bureau staff regarding enforcement coverage.

Maintains inventory and ensures proper care and readiness of equipment issued to the Enforcement Unit such as vehicles, radios, beepers, cellular phones, scales and other weights and measures related items, computers, and other Miami-Dade County property; requisitions equipment, materials and supplies

Makes recommendations and coordinates the use of private investigators ("shoppers") in undercover and special operations activities; reviews plans submitted by enforcement staff for undercover operations; maintains budget records and approves cash disbursements of "bait money" utilized.

Implements enforcement procedures and methodologies; makes recommendations for changes in existing department rules, policies, and regulations pertaining to enforcement.

Supervises the intake, handling and closure of complaint investigations; reviews complex complaints with consumers and business representatives and develops plans to resolve those complaints; reviews complaint investigations conducted by enforcement officers to determine if the investigations were thoroughly and properly conducted.

Prepares, maintains, and submits a variety of narrative and statistical monthly reports; prepares oral and written program evaluation reports and other sources of supplemental information in order to ensure that departmental and professional program standards have been adhered to in enforcement activities; designs and completes enforcement related forms, schedules, and correspondence.

Assists the Miami-Dade County Consumer Advocate and Assistant County Attorneys in the preparation of administrative hearing and court

## Human Resources Department

### RER Collection Supervisor (002548)

#### Minimum Qualifications

Bachelor's degree in Business Administration, Public Administration or a related field. Two (2) years of experience in credit collections, lien processing, accounts payable or a related field are required. Additional experience in credit collections, lien processing, accounts receivable or a related field may substitute for the required experience on a year for year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and supervisory work in the enforcement of collection for the Consumer Services Department.

An employee in this class is responsible for the placement of liens and collection of fines, penalties and enforcement costs for violations of Chapters 4, 8A, 8AA, 30 and 31 of the County Code and other regulations and laws enforced by the Consumer Services Department. Responsibilities include supervising subordinates engaged in processing payments, billing and collection enforcement costs, developing payment plans and monitoring payment schedules, dealing with public inquiries regarding enforcement costs, developing lien policies and procedures and cross training of legal issues to be submitted to the County Attorney's Office for the Consumer Advocate for filing, such as bankruptcy, foreclosure and knowledge of Florida Statutes as they relate to liens. The incumbent exercises considerable independent judgment in assuring compliance with enforcement costs and procedures. Supervision is exercised over subordinates engaged in processing liens, payments, civil violation notices and other documents related to collection activities. Supervision is received from an administrative superior who reviews work for effective management of enforcement collection and contract monitoring responsibilities and achievement of established goals and procedures.

##### ILLUSTRATIVE TASKS

Supervises subordinates engaged in processing payments, liens, satisfaction of liens, walk-ins, certified mail, filing; maintains logs and databases designed for the CSD Collections Program.

Develops payment plans with violators and monitors payment agreements established for legal/lien cases; ensures violators comply by paying citations and correcting violations.

Approves payment arrangements, account reductions, compromise offers and long-term financial payment schedules.

Coordinates the development of lien policies and procedures; established procedures for collections' functions including collection letters.

Evaluates settlement offers and recommends where appropriate.

Reviews the unpaid citation code enforcement reports to identify customers that are eligible for automatic suspension of their respective licenses; reviews on-demand code enforcement reports for lien opportunities.

Reviews and prepares responses for all correspondence from attorneys, title companies, banks and other individuals; prepares monthly statistical reports.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of the processing of liens, civil violations notices and other documents in the collection of enforcement costs from violators enforced by the Consumer Services Department.

Considerable knowledge of the principles of business and public administration.

Considerable knowledge of provisions of Chapters 4, 8A, 8AA, 30 and 31 of the Code of Miami-Dade County pertaining to the collection of enforcement costs.

Some employees in the class transport clients undergoing rehabilitation treatment to medical facilities. Incumbents must possess an appropriate state driving license and must complete training enabling them to provide first aid to patients being transported in emergencies. Work is performed under a technical or administrative superior who makes trip assignments and spot checks quality of transportation service being provided.

##### ILLUSTRATIVE TASKS

Operates passenger vehicles to transport patients between nursing or private homes and clinics or other medical facilities; transports clients being treated under rehabilitation programs to clinics or other treatment or diagnostic facilities.

Administers first aid in emergencies to patients in transit; transports patients to appropriate facility for further care.

Completes dispatch records showing patient's name, destination, mileage and other related information.

Assures that assigned vehicles are clean and adequately supplied with fuel; reports need for maintenance to supervisor.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of emergency first aid.

Knowledge of the operation of assigned passenger vehicles.

Knowledge of safe driving practices.

Knowledge of roadways and traffic regulations of the area.

Ability to exercise good judgment and skill in the application of emergency first aid.

Ability to react quickly and calmly in emergencies.

Ability to carry out oral and written instructions from nursing and other personnel.

Ability to maintain a sympathetic attitude towards patients and clients of all ages and varying disabilities.

Ability to operate assigned vehicles with skill and care.

REV 10-77

#### Nature Of Work

This is light manual work in the operation of motor vehicles used to transport the ill.

## Human Resources Department

### Driver Attendant Supervisor (002834)

#### Minimum Qualifications

Eighth grade. One year of experience in vehicle operations including fleet dispatching, scheduling, routing or public contact is required. Must possess a CDL/Class B. Applicants qualifying for employment will be subject to a background investigation.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in dispatching vehicles in the transport of the ill.

A Driver Attendant Supervisor is responsible for immediate supervision over a staff of employees engaged in the vehicular transportation of patients or clients. Emphasis of the work is on scheduling and coordinating trip assignments, maintaining appropriate trip and vehicle records, insuring appropriate first aid training for the staff and obtaining maintenance of assigned vehicles. Supervision is received from and administrative or technical superior who reviews work primarily for efficiency of scheduling, utilization of employee time and quality of transportation service being provided.

##### ILLUSTRATIVE TASKS

Schedules transportation service to comply with appointments of patients and clients at medical facilities; observes service in process to insure good utilization of staff time; keeps contact with superiors to plan any changes in transportation schedules.

Insures that employees supervised complete appropriate training in safe driving practices, first aid and techniques of transporting patients who have difficulty in ambulation.

Approves leave schedules for staff and rates employee performance; trains new employees in driving routes and patient pick up procedures.

Maintains transportation logs; compiles workload records and prepares reports as required; requests fuel supplies for assigned vehicles.

Insures that maintenance is requested for assigned vehicles for safe operation; issues maintenance work orders.

Operates passenger vehicles to transport patients as needed.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operation of assigned passenger vehicles.

Considerable knowledge of safe driving practices.

Considerable knowledge of roadways and traffic regulations of the area.

Knowledge of emergency first aid.

Knowledge of established procedures and schedules for patient or client transport in the agency of assignment.

Ability to train and supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish effective working relationships with medical and other personnel in the agency of assignment.

Ability to react quickly and calmly in emergencies.

Ability to keep accurate and complete records.

Ability to prepare accurate and complete reports.

Ability to operate assigned vehicles with skill and care.

REV 10-77

#### Nature Of Work

This is supervisory work in dispatching vehicles in the transport of the ill.

## Human Resources Department

### Forensic Records Technician (002905)

#### Minimum Qualifications

High school diploma or GED. One year of experience using computer terminals and dealing with the legal and/or medical sectors is required.

#### Job Specifications

##### NATURE OF WORK

This is specialized technical work in maintaining control of statistical data for the County Medical Examiner.

An employee in this class operates a computer terminal and printer to organize and maintain statistical data pertinent to the Medical Examiner's Department. Responsibilities include assisting in the supervision of clerical employees, entering and extracting statistical data by various categories using a computer system, collating data entered into system by investigative unit, and monitoring data and correcting errors. Some judgment is required in compiling statistics for various reporting functions and in determining information that can be released to the public. Supervision may be exercised over clerical employees who assist with various phases of work. Supervision is received from an administrative superior who reviews work through personal observations and conferences for accuracy and thoroughness.

##### ILLUSTRATIVE TASKS

Collates data entered into computer system by investigative unit; monitors data and corrects errors; notifies other Medical Examiner units of necessary corrections and monitors case and errors until rectified.

Determines appropriate statistical and research codes for each area according to International Classification of Disease Codes; enters codes into computer system and enters previous cases since inception of Medical Examiner's Department.

Extracts and collates statistical data by categories and/or by specific inquiry; retrieves information on individual cases; assists in compiling statistics for various reporting functions for use in the department and for other governmental agencies, news services and various research projects.

Assists in the supervision of clerk-typists and clerks who are engaged in updating statistical information, providing copies of case record information, filing records, compiling statistical reports and processing telephone and written requests for information.

Assists with the creation of new classification systems in order to capture commonalities of unusual cases; assists in the reclassification of current coding systems.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of basic data processing systems and related equipment used in the Medical Examiner's Department.

Considerable knowledge of forensic classification systems, statistical and research codes.

Knowledge of established procedures for the control, maintenance and correction of computerized information in the area of assignment.

Knowledge of the criteria for determining information that can be released to the public.

Knowledge of supervisory principles and practices.

Ability to examine and correct source documents used in computer processing.

Ability to operate computer terminals and related peripheral equipment.

Ability to extract and collate complex technical statistical data using computer equipment.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to interpret and apply requirements for confidentiality and publication of information concerning medical examiner cases.

Skill in the use of a computer terminal keyboard and related computer equipment.

NEW 10-86

#### Nature Of Work

This is specialized technical work in maintaining control of statistical data for the County Medical Examiner.

### Forensic Evidence Recovery Technician (002916)

#### Minimum Qualifications

High school diploma or GED. Six months experience in handling the chain of custody of physical evidence or completion of college coursework in evidence and criminal procedures. One year experience handling deceased human remains. A valid Class E Florida driver's license with fewer than 4 points. Must maintain a valid Florida driver's license with fewer than 4 points to remain qualified for employment. Must be able to lift 75 pounds Must be willing to submit to periodic drug and alcohol testing. Willingness to comply with immunization requirements and safety procedures.

#### Job Specifications

Considerable knowledge of Chain-of-Evidence requirements under the laws of the State of Florida. Must have knowledge of the Miami-Dade County area in order to respond to scenes in a timely manner. Ability to deal effectively with Medical Examiner staff, law enforcement personnel, families of decedents, and community members. Ability to testify in judicial proceedings concerning medical examiner cases as required. Must be able to operate a motor vehicle properly and safely. Working knowledge of computer to track and verify information. Ability to follow verbal and written instructions. Ability to lift and move cadavers. Should be able to lift 75 pounds. Considerable knowledge of aseptic and decontamination procedures for the morgue area. Considerable knowledge of maintenance of morgue instruments and equipment. Ability to demonstrate a mature and respectful approach to disagreeable phases of medical examiner work. Knowledge of standard written English. Ability to prepare and maintain records and logs. Knowledge of OSHA procedures and participation in regular OSHA safety training.

#### Nature Of Work

This is technical work in the conduct of autopsies and related forensic procedures for the County Medical Examiner.

## Human Resources Department

### Forensic Evidence Recovery Supervisor (002917)

#### Minimum Qualifications

High school diploma or GED. One year supervisory experience. Two years experience in handling the Chain-of-Evidence of physical evidence OR Completion of 60 college credits in evidence and criminal procedures. Must obtain and maintain a valid CDL Class C Florida driver's license with fewer than 4 points to remain qualified for employment. Must be willing to submit to periodic drug and alcohol testing, Willingness to comply with immunization requirements and safety procedures.

#### Job Specifications

Ability to supervise staff working 24 hours a day. Ability to train Evidence Technicians in all aspects of their work, including OSHA safety procedures. Computer literate and familiar with tracking and reporting software, CME preferred. Ability to prepare necessary reports, to oversee the maintenance of records and logs, and to instruct technicians in accurate reporting practices. Ability to prepare necessary reports in standard written English. Thorough knowledge of Miami-Dade County and the ability to schedule and direct others to various locations. Considerable knowledge of management principles and good supervisory practices. Knowledge of administrative procedures and rules pertaining to the Medical Examiner Department. Ability to supervise subordinates in a manner conducive to full performance and high morale. Ability to work with medical staff, investigators, law enforcement personnel, and hospital staff in close working relationships. Ability to deal with families and community members professionally and respectfully. Considerable knowledge of Chain-of-Evidence requirements under the laws of the State of Florida. Ability to testify in judicial proceedings concerning medical examiner cases as required. Knowledge of photography and the ability to operate a digital SLR camera to photograph death scenes. Must be able to operate a motor vehicle properly and safely. Must maintain automobile insurance. Ability to lift and move cadavers. Should be able to lift 120 pounds. Ability to work with cadavers in decomposed, burned or mutilated states. Thorough knowledge of fingerprinting, palm printing, and x-ray procedures. Thorough knowledge of aseptic and decontamination procedures for the morgue, death scenes, and transport processes

#### Nature Of Work

This is technical supervisory work in recovery of bodies and other evidence for Medical Examiner death investigations and in performance of related forensic administrative procedures.

## Human Resources Department

### Public Interment Coordinator Assistant (002919)

#### Minimum Qualifications

High school diploma or GED. Two years' experience using computer terminal and working in a professional office environment are required. Knowledge of funeral home, nursing home industries and investigative experience is preferred. Bilingual (English/Spanish) a must.

#### Job Specifications

##### NATURE OF WORK

This is administrative/investigative work in reviewing applications for county assistance in disposition of indigent remains. The person serving in this position collects and receives information on circumstances surrounding natural deaths, reviews information to determine validity of claim, assists family members in making decisions regarding disposition options, and coordinates the transportation of deceased remains from private residences, hospitals, nursing homes and assisted living facilities to the Medical Examiner Department (ME) and then to the county's designated crematory. Emphasis of the work is on collecting and documenting information clearly and concisely; obtaining pertinent facts from local and non-local sources, including family, hospital and nursing home care givers, law enforcement agencies, and other parties; evaluating case information; and authorizing removals. Supervision is received from a professional superior who reviews work for accuracy and oversees performance of other duties.

##### ILLUSTRATIVE TASKS

Receives telephone calls from hospitals, nursing homes, assisted care givers and law enforcement officers requesting PIP assistance. Documents clear and concise case notes on each inquiry and creates case files. Evaluates case information and makes determination on eligibility for PIP assistance. Dispatches Evidence Recovery to transport remains on approved cases to department. Maintains orderly filing system. Assists nursing homes and care givers in preparing case for pre-approval and enters case information into CME database. Interacts with next of kin both over the phone and in person to collect and provide information and to oversee release of cremains to family members. Coordinates handling of cases with crematory vendor and oversees compliance with contractual obligations. Reviews and approves all invoices from the vendor for timely payment. Transports cremains to county cemetery for scattering. Researches information on PIP cases to identify those who qualify for veterans' assistance. Handles monetary transactions in collecting various PIP fees.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of correct English, including grammar and spelling. Considerable knowledge of records, forms, files and other documents pertaining to the area of assignment. Knowledge of legal, departmental, and administrative rules and procedures. Ability to conduct inquiries and investigations to collect case-related information. Ability to deal compassionately and professionally with grieving family members. Ability to review and process invoices. Ability to multi-task. Ability to maintain confidentiality. Ability to communicate clearly in both oral and written forms. Ability to maintain appointment calendar. Ability to maintain files, records and documents in an orderly fashion. Skill in operating a computer terminal and related computer equipment.

#### Nature Of Work

This is supervisory clerical work involving some administrative responsibility in the management of diversified clerical operations of a major organizational unit.

### Medical Examiner Public Internment Program Coordinator (002920)

**Minimum Qualifications**

Completion of 60 college credits. Three years advanced clerical or administrative experience to include experience in funeral service programs are required. Additional advanced clerical or administrative experience to include experience in funeral service programs may substitute for the required education on a year-for-year basis.

**Job Specifications**

No Job Specification Available

**Nature Of Work**

This is administrative work in the review, evaluation and approval of all requests for public internment assistance.

### Toxicologist 1 (002934)

#### Minimum Qualifications

Bachelor's degree in a natural science such as chemistry, pharmacology, toxicology, forensic science or a related field and at least one year of experience in a forensic laboratory performing analyses of evidence. Applicants should have experience working with the instrumentation and analytical techniques commensurate with the position.

#### Job Specifications

##### DESCRIPTION OF WORK

This is highly technical and beginning level scientific work performing analyses of postmortem and antemortem body tissues and fluids and other related evidence for the presence of toxic materials including drugs and poisons, in specimens received in the laboratory of the county Medical Examiner Department.

Employees in this class spend a minimum of 90% of their time performing quantitative and qualitative chemical, physical chemical and instrumental chemical analyses requiring combined knowledge of basic principles and theory, and the fundamental techniques and methods of analytical chemistry. Work is performed in accordance with recognized theory, principles and techniques of analytical forensic toxicology. Supervision is received from a technical section supervisor at the Toxicologist 3 level who assists in resolving special problems and reviews work for completeness, accuracy and effective court presentations.

##### ILLUSTRATIVE TASKS

Performs qualitative and quantitative chemical analyses of postmortem and antemortem human tissues and fluids and other related evidence for the presence and quantity of drugs, poisons and other various chemicals and their metabolites.

Utilizes such sample preparation techniques as liquid-liquid extraction, solid phase extraction, derivatizations, and related wet chemical techniques involving the use of organic chemical solvents, buffers, acids, bases, and other reactive and toxic chemicals, to prepare samples for analysis.

Utilizes such analytical instruments as immunoassay including E.M.I.T., F.P.I.A. and E.L.I.S.A., auto-analyzers, spectrophotometers, gas chromatographs, liquid chromatographs, gas chromatograph-mass spectrometers, liquid chromatograph-mass spectrometers including MS/MS, ion trap and quadrupole analyzers and chemical ionization, ESI, and APCI techniques, automated liquid samplers, automated headspace samplers, photo-diode array detectors, and various other detectors including electron capture, nitrogen specific, and flame ionization.

Analyzes data and prepares test reports of analytical findings to be reviewed by supervisors; including preparing calibration curves, calculating dilutions and final concentrations for reporting.

Utilizes miscellaneous laboratory instruments including centrifuges, evaporators, vortex mixers, melting point apparatuses, pH meters, hot plates, pipette-dilutors, and automatic pipettes.

Performs other related laboratory duties such as preparing reagents, mixing buffers, preparing standards and controls, and handling and mixing organic solvents; to be used in qualitative and quantitative analyses.

Assists in other functions such as washing and preparing glassware, receiving, handling, storing and disposal of evidence that includes postmortem and antemortem human tissues and fluids, unknown chemicals and other pills, powders, syringes and related evidence from cases accepted by the Medical Examiner Department.

Assists in developing and refining laboratory procedures and special analytical techniques and assists supervisors in the interpretation and evaluation of toxicological requests and results.

Assists in the preparation and development of technical publications and presentations for professional meetings

Provides some expert testimony in depositions and court environments regarding the test performed and the procedures used.

Maintains quality assurance logs, chain of custody documents and analytical data in accordance with laboratory policy and procedures.

Performs simple troubleshooting procedures on analytical instruments

Performs routine and basic instrument preventative maintenance procedures as needed

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of chemistry, analytical principles and techniques, and instrumentation used in the analysis of samples for composition and the identification of unknowns.

Knowledge of the use of computer based data systems for the analysis of complex instrumental data including chromatography data systems,

### Toxicologist 1 (002934)

mass spectral data systems and library searching, and laboratory information management systems

Knowledge of the basic principles and practices of analytical and organic chemistry, toxicology, pharmacology, mathematics, and physics

Knowledge of the laboratory procedures used in the performance of chemical and instrumental analyses utilizing a variety of scientific techniques.

Knowledge of the principles of forensic science including sampling, chain of custody, preservation of evidence, documentation of analytical data and reporting of results.

Ability to effectively communicate complex scientific information clearly and concisely, both verbally and in writing.

Ability to understand and follow verbal and written technical instructions

Ability to simultaneously organize and manage multiple tasks effectively and accurately

REV 08/2012

#### **Nature Of Work**

This is beginning level scientific work performing analyses of body tissues and fluids to determine the presence of toxic materials in specimens received in the laboratory of the county Medical Examiner or other county toxicology laboratory.

### Toxicologist 2 (002935)

#### Minimum Qualifications

Bachelor's degree in a natural science such as chemistry, pharmacology, toxicology, forensic science or a related field and a minimum of three years of experience in an analytical laboratory utilizing the techniques and skills equivalent to this position. Additional education at the graduate level can substitute for years of experience. The applicant should have documented training or experience in forensic applications of analytical toxicology such as participation in continuing education programs or research.

#### Job Specifications

##### NATURE OF WORK

This is highly technical scientific work performing analyses of postmortem and antemortem body tissues and fluids and other related evidence for the presence of toxic materials including drugs and poisons, in specimens received in the laboratory of the county Medical Examiner Department.

Employees in this class spend a minimum of 85% of their time performing quantitative and qualitative chemical, physical chemical and instrumental chemical analyses requiring extensive combined knowledge of basic principles and theory, and the fundamental techniques and methods of analytical chemistry. The remainder of their time is spent performing other related duties and responsibilities and managing projects or training others. Work is performed in accordance with recognized theory, principles and techniques of analytical forensic toxicology. Employees in this position utilize some of their time managing other essential responsibilities related to laboratory operations and are required to perform the more complex non-routine analyses in addition to routine work. In addition they may be required to supervise or manage complex projects. Supervision is received from personnel at the Toxicologist 3 and above levels who assist in resolving special problems and review work for completeness, accuracy and effective court presentations.

##### ILLUSTRATIVE TASKS

Performs qualitative and quantitative chemical analyses of postmortem and antemortem human tissues and fluids and other related evidence for the presence and quantity of drugs, poisons and other various chemicals and their metabolites.

Utilizes such sample preparation techniques as liquid-liquid extraction, solid phase extraction, derivatizations, and related wet chemical techniques involving the use of organic chemical solvents, buffers, acids, bases, and other reactive and toxic chemicals, to prepare samples for analysis.

Utilizes such analytical instruments as immunoassay including E.M.I.T., F.P.I.A. and E.L.I.S.A., auto-analyzers, spectrophotometers, gas chromatographs, liquid chromatographs, gas chromatograph-mass spectrometers, liquid chromatograph-mass spectrometers including MS/MS, ion trap and quadrupole analyzers and chemical ionization, ESI, and APCI techniques, automated liquid samplers, automated headspace samplers, photo-diode array detectors, and various other detectors including electron capture, nitrogen specific, and flame ionization.

Analyzes data and prepares test reports of analytical findings to be reviewed by supervisors; including preparing calibration curves, calculating dilutions and final concentrations for reporting.

Utilizes miscellaneous laboratory instruments including centrifuges, evaporators, vortex mixers, melting point apparatuses, pH meters, hot plates, pipette-dilutors, and automatic pipettes.

Performs additional responsibilities that are essential to laboratory function as required by supervisors

Performs advanced testing procedures that are non-routine and require experience and additional skills

Assists in the supervision and management of special projects and research as required by supervisory personnel

Performs other related laboratory duties such as preparing reagents, mixing buffers, preparing standards and controls, and handling and mixing organic solvents; to be used in qualitative and quantitative analyses.

Assists in other functions such as washing and preparing glassware, receiving, handling, storing and disposal of evidence that includes postmortem and antemortem human tissues and fluids, unknown chemicals and other pills, powders, syringes and related evidence from cases accepted by the Medical Examiner Department.

Develops and refines laboratory procedures and special analytical techniques and assists supervisors in the interpretation and evaluation of toxicological requests and results.

Assists in the preparation and development of technical publications and presentations for professional meetings

Provides some expert testimony in depositions and court environments regarding the test performed and the procedures used.

### Toxicologist 2 (002935)

Maintains quality assurance logs, chain of custody documents and analytical data in accordance with laboratory policy and procedures.  
Performs advanced troubleshooting procedures on analytical instruments and basic repair procedures as necessary  
Performs routine and basic instrument preventative maintenance procedures as needed  
Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of chemistry, analytical principles and techniques, and instrumentation used in the analysis of samples for composition and the identification of unknowns.

Considerable knowledge of the use of computer based data systems for the analysis of complex instrumental data including chromatography data systems, mass spectral data systems and library searching, and laboratory information management systems

Considerable knowledge of the basic principles and practices of analytical and organic chemistry, toxicology, pharmacology, mathematics, and physics

Considerable knowledge of the laboratory procedures used in the performance of chemical and instrumental analyses utilizing a variety of scientific techniques.

Considerable experience with advanced testing techniques and instrumentation with the ability to exercise independent judgment in planning and application

Ability to manage additional responsibilities including planning, documenting and implementing procedures.

Knowledge of the principles of forensic science including sampling, chain of custody, preservation of evidence, documentation of analytical data and reporting of results.

Ability to effectively communicate complex scientific information clearly and concisely, both verbally and in writing.

Ability to understand and follow verbal and written technical instructions

Ability to simultaneously organize and manage multiple tasks effectively and accurately

Ability to manage and lead subordinate personnel at the Toxicologist 1 and lower level in the completion of projects or tasks

REV 08/2012

#### **Nature Of Work**

This is complex scientific work with some supervisory responsibility in performing analyses of body tissues and fluids to determine the presence of toxic materials in specimens received in the laboratory of the county Medical Examiner or other county toxicology laboratory.

### Toxicologist 3 (002936)

#### Minimum Qualifications

Bachelor's degree in a natural science such as chemistry, pharmacology, toxicology, forensic science or a related field and a minimum of five years of experience in an analytical laboratory utilizing the techniques and skills equivalent to this position. Additional education at the graduate level can substitute for years of experience. At least two of these years should be in a supervisory position managing the work of others in a forensic toxicology laboratory. The applicant should have documented training or experience in forensic applications of analytical toxicology such as participation in continuing education programs, publications or research.

### Assistant Laboratory Director, Medical Examiner (002937)

#### Minimum Qualifications

Master's degree in a natural science such as chemistry, pharmacology, toxicology, forensic science or a related field and a minimum of five years of experience as a professional forensic toxicologist in a supervisory position is required. Additional education at the graduate level can substitute for years of experience. At least two of these years should be in a supervisory position managing the work of others in a forensic toxicology laboratory. Alternatively a Bachelor's degree in a natural science with at least seven years of experience in a forensic toxicology laboratory in a supervisory position. The applicant should have documented training or experience in forensic applications of analytical toxicology including court testimony, research, authorship of peer reviewed publications, and participation in continuing education programs.

#### Job Specifications

##### NATURE OF WORK

This is highly technical and responsible scientific and managerial work supervising the operations of the toxicology laboratory of the Miami Dade Medical Examiner Department. An employee in this class is responsible for managing, planning, coordinating the work of subordinate toxicologists engaged in conducting qualitative and quantitative laboratory examinations on biological specimens collected at autopsy, using chemical, physical chemical and instrumental analysis. In addition this employee assists the Director of the laboratory in planning and preparing budgets, planning operational goals, and assessing future needs and progress. Responsibilities include the day to day management and coordination of operations, personnel, technical resources, and other functions essential to the laboratory. Other responsibilities include managing technical projects, training and education, and assessing employee performance. The incumbent exercises extensive independent judgment in managing operations and assisting the Director with planning projects and goals. Direct supervision is exercised over a staff of professional toxicologists at the 1, 2 and 3 levels and support personnel including clerical and technologists, engaged in various laboratory activities. General direction is received from the Laboratory Director who holds the incumbent responsible for the management and coordination of laboratory operations in a professional manner and the achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Directly supervises the daily work of the toxicologists and support personnel engaged in the chemical analysis of biological samples and related evidence for drugs and other toxic materials.

Assists the Laboratory Director in the planning of laboratory operations and goals. Prepares daily work assignments for toxicologists and support personnel, coordinates work product for Director's review and manages Laboratory Information Management system including entering data and reviewing records

Reviews personnel work performance and prepares yearly performance evaluations.

Prepares and conducts disciplinary reports and actions

Manages personnel matters including payroll, attendance, reclassifications, interviewing and discipline.

Supervises the Toxicologist 3 personnel in their duties managing the various sections of the laboratory including work assignments, establishing priorities and goals and managing work flow.

Provides guidance and assistance to toxicologists in the planning of technical projects and research including, reviewing data, critiquing procedures and providing training

Provides expert consultation and guidance to Medical Examiners, law enforcement personnel, attorneys and outside clients, regarding testing and interpretation of results.

Assists the Laboratory Director in preparing long term goals and assessing current operational issues.

Prepares statistical reports and forecasts of work progress including maintaining ASE reports and data, developing and managing statistical measures, and preparing reports of laboratory progress and development.

Prepares and manages operational and capital budgets and oversees procurement for the laboratory

Coordinates and reviews yearly manufacturer's service agreements for instrumentation including evaluating services contracts, and preparing preliminary procurement documents

Manages capital inventory and prepares yearly reports for GSA of capital equipment status

Oversees other functions including evidence security, chemical and biohazardous waste disposal, health and safety procedures, and building functions related to laboratory operations

Assists the Laboratory Director in the preparation and updating of policy and procedure manuals.

#### Minimum Qualifications

Candidate must have a doctoral degree in a physical or natural science, such as chemistry, toxicology or pharmacology. A minimum of 10 years of experience as a professional forensic toxicologist, including at least 5 years in a supervisory capacity managing other toxicologists. Experience must include a working knowledge of analytical forensic toxicology procedures, instrumentation, chain of custody procedures and the management of laboratory operations and resources. Candidate must be knowledgeable of the requirements for laboratory accreditation and personal certification by the American Board of Forensic Toxicology. Candidate must hold and maintain certification by the American Board of Forensic Toxicology at the status of Diplomat.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible scientific and managerial work in directing the toxicology laboratory of the Miami-Dade County Medical Examiner Department.

An employee in this class is responsible for directing and planning the work of a staff of forensic toxicologists engaged in conducting qualitative and quantitative laboratory examinations using chemical, physical chemical and instrumental chemical analyses. Responsibilities include providing expertise in toxicology to the staff of the Medical Examiner Department, and administering laboratory operations in a cost effective and efficient manner consistent with the needs of the department and the public. The incumbent exercises extensive independent judgment in managing and directing laboratory operations for the Medical Examiner Department. Directs a staff of professional toxicologists and support employees engaged in various phases of laboratory activities. General direction is received from the Medical Examiner who holds the incumbent responsible for the professional management of assigned responsibilities and for achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Directs the work of a staff of professional toxicologists engaged in conducting qualitative and quantitative laboratory examinations on biological specimens collected at autopsy. Reviews work product of all toxicologists for accuracy, precision and forensic acceptability. Approves all reported results. Advises and trains toxicologists regarding analytical methodologies and interpretation of results. Provides expert testimony, in depositions and in court, regarding analytical methodologies, quality assurance and interpretation of the toxicological significance of reported laboratory results. Provides expertise in toxicological results and interpretations to Assistant Medical Examiners and the Medical Examiner. Provides expertise in toxicology to District Medical Examiners throughout the State of Florida. Supervises the Assistant Laboratory Director in preparation and administration of annual budget for laboratory operations; reviews and approves requisitions for materials, equipment and supplies; prepares periodic reports concerning the status of Medical Examiner laboratory operations.

Develops long-range plans for the technological development of the Medical Examiner laboratory.

Establishes and approves all methods of qualitative and quantitative analysis that are to be used in the laboratory.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of analytical Chemistry, Toxicology, Pathology, Pharmacology, Physics and mathematics.

Extensive knowledge of modern principles and practices of instruments and methods used in the collection and analysis of toxicological evidence.

Extensive knowledge of the Florida rules and regulations regarding state laboratory and personnel licensure.

Extensive knowledge of the rules of evidence as they apply to the preservation of toxicological specimens.

Extensive knowledge of police practices and procedures applicable to forensic medicine, toxicology and pathology.

Ability to plan, direct and coordinate the work of a staff of professional toxicologists in a manner conducive to maintenance of high technical standards, efficiency and performance.

##### NATURE OF WORK

This is advanced skilled technical work in forensic imaging and processing for the Medical Examiner Department.

An employee in this class is responsible for programming, operating and maintaining computerized graphic equipment to create visual materials used in medical-legal presentations. Duties include operating A.T. based computer systems and related D.O.S. systems, development of Zenographic software programs, operation of video cameras, high resolution television equipment and 35mm cameras. The employee also serves as instructor and consultant to Medical Examiners, police personnel and other criminal justice/medical officials in the use of photographic equipment in a forensic medical setting. Supervision is received from an administrative superior who reviews work for technical quality and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Uses and develops programs for computer graphic equipment that lead to a variety of finished photographic or video tape formats.

Operate computers and other associated equipment related to development, design, lay out, creation and presentation of visual materials in a variety of formats used for medical-legal presentation.

Uses and operates A.T. based computer systems and related D.O.S. systems.

Uses and develops Zenographic and other related slide presentation software programs.

Uses and operates video camera and related equipment in the production of forensic educational/training presentations.

Operates high resolution television equipment to produce video and still photo imaging in the field of medical-legal investigation.

Operates 35mm cameras when needed for medical-legal specimen documentation.

Serves as instructor and consultant to Medical Examiners, police personnel and other criminal justice/medical officials.

Makes minor repairs to equipment, as required, and maintains equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, methods, practices, equipment and materials of modern forensic imaging.

Considerable knowledge of computer graphic equipment and its software programs.

Knowledge of high resolution T.V. equipment and associated V.H.S. taping.

Knowledge of photochemistry and optics.

Ability to perform, operate and maintain sophisticated computerized graphic equipment.

Ability to prepare and present forensic photographic evidence.

Ability to understand and follow verbal and written instructions.

Skill in forensic imaging and processing.

## Forensic Photographer Supervisor (002944)

### Minimum Qualifications

Bachelor's degree. Three years of varied professional experience in photography are required.

### Job Specifications

#### NATURE OF WORK

This is advanced professional work in biomedical and forensic photography for the Medical Examiner Department.

An employee in this class supervises and participates in the photographic and video tape recording, and reproduction, of autopsy and experimental medical and biological subjects to provide illustrations for scientific publications, medical records, research and teaching activities. Responsibilities include making still and video taped reproductions, making copies of X-rays and similar materials using advanced photographic techniques, engaging in research activities, and may include designing special equipment and processing formulas. The incumbent develops long-range plans for the photographic unit, supervises proper operation of photographic and laboratory equipment, assures employees observe safety practices, and insures against harm or damage to photographic subjects. Supervision is exercised over professional photographers engaged in various phases of the work. Supervision is received from an administrative superior who evaluates work for technical quality and for professional operation of the forensic photographic unit.

#### ILLUSTRATIVE TASKS

Makes still and video taped reproductions of autopsies, anatomical structures, gross and microscopic specimens, plant and animal tissues, and physiological and pathological processes.

Creates copies of X-rays and similar materials utilizing photographic techniques such as high-speed photography and ultraviolet or infrared light to produce visible record of normally invisible subjects.

Engages in research activities related to forensic photography and presentation of scientific data, and may design special equipment and processing formulas.

Plans, organizes and directs the production of photographic illustrations of medical, biological, public relations and other subjects and activities.

Makes recommendations for required staffing, supplies, necessary space and equipment; prepares and justifies budget requests.

Develops and modifies forensic photography policies, systems, work methods, procedures and standards.

Supervises proper operation of photographic and laboratory equipment; assures employees observe established safety practices in autopsy, operating rooms and autopsy rooms; assures against harm or damage to anatomical structures, pathological specimens and other subjects; maintains required photographic files.

Supervises photographic production activities related to Medical Examiner, public relations and professional journal publications; takes still photographs or produces video tapes for use in illustrating annual reports, news stories and articles; provides finished photographs for newspapers, scientific journals and other publications.

Develops long and short-term plans involving the needs of the photographic unit.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of modern principles, practices, equipment and materials employed in biomedical and forensic photography.

Thorough knowledge of modern principles, practices, instruments and methods used in the collection and analysis of physical evidence.

Thorough knowledge in the use and maintenance of photographic and photo processing equipment.

Thorough knowledge of rules of evidence as they apply to the presentation of technical analyses of criminal evidence.

Considerable knowledge of producing professional video taping, and editing of programs, as they relate to the Medical Examiner and other elements of the criminal justice system.

Considerable knowledge in the use of Photomacrography and Photomicrography including the use of polarized, contrast, infrared and ultraviolet photomicroscopy.

Considerable knowledge of all types of photographic lighting, including incident, color temperature, polarized, ultraviolet and infrared.

Knowledge of supervisory principles and practices.

Knowledge of law enforcement practices and procedures.

##### NATURE OF WORK

This is technical work in the conduct of autopsies and related forensic procedures for the County Medical Examiner.

Employees in this class are responsible for performing a variety of technical tasks in assisting medical examiners in the conduct of autopsies and related diagnostic analyses to determine cause of death. Emphasis of the work is on completion of a large volume of gross autopsy procedures and related necrodactylographic and cytology-histology techniques. Duties include assisting medical examiners during gross autopsies and in completing forensic procedures including fingerprinting, palm printing, x-ray, photography and may include the embalming of bodies of indigent residents. Employees experience hazardous and difficult working conditions since bodies are received for autopsy where pathogens may be present and not diagnosed, and where cadavers may be in decomposed, mutilated, burned or other conditions due to the nature of the terminal episode. Incumbents must exercise care since medical examiners are legally and medically responsible for determination as to cause of death and employees closely assist the medical staff in these determinations. Supervision is received from medical and technical superiors who review work for quality of results.

##### ILLUSTRATIVE TASKS

Admits and properly registers human and/or nonhuman remains in accordance with established operational policies and procedures; obtains and records information pertinent to the identification and classification of the deceased such as observable markings or scars, height and weight; documents and secures valuables and other personal property belonging to the deceased.

Prepares remains for examination by the pathologist; recognizes and preserves evidence which may be relevant to the cause and manner of death.

Assists pathologists in the performance of autopsies; opens body cavities and removes various tissues, organs and systems such as optic tissue, adrenal glands, brain and spinal column, as directed.

Prepares remains for transportation to funeral homes or other facilities utilizing methods which insure minimal public contact with body excretions and other constituents which may be hazardous.

Participates in various research projects by recording data, preserving specimens and aiding physicians, and personnel of local police agencies.

Assures the proper disposition or disposal of tissues which may contain harmful organisms.

Prepares solutions such as formaldehyde and buffering agents to be used as fixation agents for anatomical specimens.

Collects and preserves specimens for laboratory analyses.

Performs major and minor restorations for identification purposes; restores remains to suitable appearance for public viewing or photography purposes.

Fingerprints all bodies received at appropriate time in correlation with preservation of evidence, for verification of identity.

Takes photographs of remains upon admittance and of specific anatomical sites during postmortem operations.

Under state license or under direct supervision, participates in the embalming of bodies in preparation for burial through the injection of preserving chemicals at prescribed flow rates.

Takes and develops x-rays as necessary to assess the presence, location and number of foreign objects in a body.

Properly retains and labels clothing and other evidence and assures its proper disposition.

Maintains and regulates hygienic conditions through the use of germicidal chemicals and procedures in order to promote a sanitary working environment.

Testifies in judicial proceedings concerning Medical Examiner cases, as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of gross autopsy procedures used in pathological examinations.

Considerable knowledge of normal and abnormal anatomical pathology.

### Forensic Technician (002950)

Considerable knowledge of forensic fingerprinting, palm printing and x-ray procedures.  
Considerable knowledge of aseptic and decontamination procedures for the morgue area.  
Considerable knowledge of maintenance of morgue instruments and equipment.  
Knowledge of cytology, chemical and histology procedures related to autopsy for forensic purposes.  
Some knowledge of modern embalming methods and techniques.  
Ability to demonstrate a mature and respectful approach to disagreeable phases of medical examiner work.  
Ability to complete diagnostic tests accurately.  
Ability to work with cadavers in decomposed, burned or mutilated states.  
Ability to complete autopsies with required speed.  
Ability to deal effectively with the medical staff in a close working relationship.  
Ability to lift and move cadavers.  
Skill in the use of a variety of surgical instruments.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in the conduct of autopsies and related forensic procedures for the Medical Examiner Department.

Employees in this class are responsible for assisting medical examiners in the conduct of autopsies, providing training for Forensic Technicians and assisting in training of new resident pathologists. Responsibilities include assisting in the completion of gross autopsy procedures, completing forensic procedures including fingerprinting and x-rays, maintaining records of receiving and releasing human bodies and their personal effects, assuring proper placement of gross tissue and other evidentiary items, enforcing infection control procedures, and training medical examiner employees in proper procedures and federal safety requirements. Incumbents must exercise care in the performance of autopsy and related forensic procedures as medical examiners are legally and medically responsible for determinations of cause of death. Supervision is received from medical and technical superiors who review work through personal observations and conferences for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Assists pathologists in the performance of autopsies; opens body cavities and removes various tissues, organs and systems such as optic tissue, adrenal glands, brain and spinal column, as directed.

Provides training and orientation to Forensic Technicians in the proper and safe use of x-ray equipment and in gross autopsy procedures; assists in training of new resident pathologists.

Collects and preserves physical evidence removed from human bodies and trains others in proper procedures for the crime laboratory.

Maintains records of receiving and releasing of human bodies, their personal effects and related evidence; utilizes computer equipment and bar-coding system to track cases at points of entry and release.

Maintains inventory of supplies; monitors maintenance schedules of equipment including x-rays, fork lifts, saws and vacuums.

Assures the proper placement of gross tissue, x-rays, human bodies, articles of clothing and other evidentiary items.

Assures that all infection control procedures are utilized and followed, and the proper cleaning of instruments and work stations.

Participates in various research projects by recording data, preserving specimens and aiding physicians and police officials.

Assists pathologists in the examination of physical evidence.

Fingerprints, photographs and prepares bodies for dental examinations; x-rays bodies for anthropological identification purposes.

Releases bodies to funeral homes following required administrative procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of gross autopsy procedures used in pathological examinations.

Considerable knowledge of normal and abnormal anatomical pathology.

Considerable knowledge of forensic fingerprinting, palm printing and x-ray procedures.

Considerable knowledge of Occupational Health and Safety Administration regulations pertaining to medical examiner operations.

Considerable knowledge of aseptic and decontamination procedures for morgue areas.

Considerable knowledge of infection control procedures applicable to medical examiner operations.

Knowledge of the rules of evidence as they apply to the preservation of toxicological specimens.

Knowledge of the rules and regulations pertaining to receiving and releasing of human bodies, personal effects and related evidence.

Knowledge of departmental computer systems used for tracking medical examiner cases and evidence.

Ability to provide effective assistance to pathologists in the conduct of gross autopsies.

Ability to demonstrate a mature and respectful approach to disagreeable phases of medical examiner work.

Ability to train medical examiner staff members in gross autopsy techniques, use of equipment, infection control methods and other related activities.

Ability to work with cadavers in decomposed, burned or mutilated states.

Ability to life and move cadavers.

### Forensic Investigations Assistant (002954)

#### Minimum Qualifications

High school diploma or GED. Two years of investigative clerical experience in police, legal, medical, insurance, mortuary or medical examiner operations are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work with supervisory responsibility assisting in forensic investigations for the Medical Examiner Department.

An employee in this class is responsible for assisting in forensic investigations, assisting in obtaining background and death-related information concerning Medical Examiner cases, and obtaining prompt cremation approvals for funeral homes. Duties include processing all burial transit permits and death certificates, requesting medical records from hospitals and physicians, requesting body removal services for cases, obtaining Fire Rescue reports, and supervising clerical subordinates. The incumbent exercises some judgment in the application of knowledges of Medical Examiner and Bureau of Vital Statistics laws and regulations. Supervision is exercised over a staff of subordinates providing clerical support to the department. Supervision is received from an administrative superior who reviews work for effectiveness in providing support in forensic investigations activities.

##### ILLUSTRATIVE TASKS

Assists Forensic Investigators in obtaining personal data on Medical Examiner cases, including Social Security numbers, dates of birth, fingerprint confirmations, and addresses.

Assists in filing investigator's case file information and retrieving new case files; assists in auditing drugs/medications and preparing audit reports for case files.

Requests body removal services for cases; closes out death certificates from daily caseloads and notifies funeral homes when bodies are ready to be released.

Processes all burial transit permits and death certificates for filing with the State of Florida, Bureau of Vital Statistics; screens all State of Florida Certificates of Death requesting cremation approval before referring the certificate to a medical examiner; enters all data relating to cremation requests into computers and log books.

Requests medical records from hospitals and physicians and follows up cases that relate to medical examiner needs; confirms deceased name, age, and sex with various sources; maintains logs of medical records; requests and obtains antemortem blood from hospitals and when necessary retrieves the specimen; obtains follow up medical information for non-autopsy cases.

Supervises telephone operators and clerical employees; prepares work schedules, and orders supplies.

Requests Fire Rescue reports; mails daily investigative reports to police agencies and the Florida Highway Patrol; enters all fracture cases into the computer system.

Exercises responsibility for maintenance and security of case files in the Investigations Bureau; prepares index cards for each case; transports files to the Records Bureau.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of Medical Examiner law and Rules of the Medical Examiner Commission of the State of Florida.

Considerable knowledge of the Bureau of Vital Statistics laws which impact on determination of next-of-kin, cremation approval and disposition of bodies.

Knowledge of medical terminology.

Knowledge of the principles, techniques, and methods of forensic investigation.

Knowledge of supervisory principles and practices.

Knowledge of State of Florida procedures governing burial, transfer and cremation permits.

Ability to screen death certificates for accuracy.

Ability to prepare and maintain records and logs.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

#### NATURE OF WORK

This is forensic investigative work in completing inquiries for the Medical Examiner Department.

Employees in this class are responsible for seeking information by telephone and personal interview to aid in making determinations regarding cause and manner of reported deaths, or to determine if deaths come under the Medical Examiner Law. Emphasis of the work is on collecting and reporting information clearly and concisely, and obtaining pertinent facts from local and non-local sources, law enforcement agencies, family, physicians, hospitals, funeral homes and other parties. Duties require the use of tact and judgement in selecting sources of information and conducting investigations involving bereaved family members. General supervision is received from an administrative superior who reviews investigative reports and assists with difficult or unusual problems.

#### ILLUSTRATIVE TASKS

Receives telephone calls from hospitals, doctors, police, attorneys, family members and others providing information concerning medical examiner cases; prepares clear and concise reports for all medical examiner case files.

Dispatches service to transport body to the department; creates case files, summarizes information, enters data into Medical Examiner Department tracking system.

Assists in the release of deceased between next-of-kin, funeral home and other facilities.

Coordinates the presence of law enforcement agencies at autopsies and the release of evidence; coordinates release of information and documents between agencies.

Follows up on cases, where brief initial reports by police have been made, to obtain additional information such as in natural or questionable deaths; obtains remote and recent medical history, details or trauma, facts leading to terminal events and related information; continues research until manner of death has been established to the satisfaction of the Medical Examiner or police.

Obtains description of unknown remains by viewing cadaver, noting height, weight, scars, tattoos, outstanding features and other characteristics; sends fingerprints to various sources for comparison; searches missing person reports; requests witnesses to view photographs of the deceased to obtain positive identification, as necessary; completes examination of facts to assist in identifying skeletonized or decomposed remains from missing persons reports, dental charts and other information.

Receives relatives of deceased; provides information on deaths and assists the grieved and distressed; counsels on funeral arrangements as necessary; provides releasable information to the press, attorneys and other parties, as requested.

Prepares State death certificates for signature by a Medical Examiner.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of fact-finding techniques and investigative procedures applicable to forensic investigators.

Considerable knowledge of Florida Statutes and local regulations pertaining to Medical Examiner Department operations.

Considerable knowledge of medical terminology, physiology and anatomy.

Considerable knowledge of modern principles, practices, instruments and methods used in collection and preservation of crime scene and postmortem evidence.

Knowledge of the geography of Dade County and its various police jurisdictions.

Ability to prepare clear, concise, accurate and complete reports of forensic investigations.

Ability to use tact and judgment in obtaining necessary case information from grieved and distressed persons.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to develop and maintain a cooperative relationship with law enforcement personnel, health care providers and the public.

Ability to develop and obtain information needed by pathologists.

Ability to effectively interview citizens for legal fact-finding purposes.

##### NATURE OF WORK

This is technical supervisory work in the conduct of autopsies and performance of related forensic administrative procedures for the County Medical Examiner.

An employee in this class is responsible for the technical and administrative supervision of a staff of technicians engaged in assisting in the performance of a large number of autopsies and investigations on a seven-day week basis. Responsibilities include daily planning and participation in technical assignments to assist medical examiners in completion of a large autopsy and examination caseload. Knowledge is required of autopsy procedures, cytologic and histologic techniques, and techniques of specimen preparation and preservation for both consultative and demonstrative purposes. The incumbent participates in orientation and instructional programs for forensic pathology residents, police recruits and other trainees. The employee must be knowledgeable in techniques for the safe handling of bodies which contain contagious diseases, which may not be diagnosed, bodies that are decomposed, and bodies which have received a variety of injuries. Supervision is exercised over a staff of technical subordinates through assignment of priorities and scheduling of work. General supervision is received from medical and administrative superiors who review work for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of technical employees engaged in assisting medical examiners in the conduct of autopsies and related diagnostic procedures to determine cause of death, and properly obtain and document all forms of evidence; assigns work priorities and trains new employees; assists technicians assigned to night and weekend shifts in resolving work related problems.

Cuts tissue from cadavers, fixes tissue in formaldehyde and injects with colored dyes to highlight veins and arteries.

Reviews police or investigative reports concerning medical or other background information to become familiar with case history and factors which may be related to autopsy information.

Personally participates in the more difficult or sensitive autopsies, including police shootings and disaster deaths; may assist in obtaining fingerprints where corpses are burnt, mummified or partially decomposed by special techniques; completes photographers; may reconstruct facial features on badly mutilated bodies for identification purposes, as required; may complete a skeletonization process in selected cases.

X-rays bodies, distributes radiation badges to all employees taking x-rays and insures that all employees wear badges while in and around the x-ray area; assures radiation badges are sent for monitoring.

In accordance with the department's Disaster Plan makes plans for disaster coverage; may visit disaster scenes with medical examiners and make preparations for extensive autopsies by calling in additional staff, assembling disaster pouches, laying out chemicals and gloves, coordinating with funeral homes for trips to the morgue and assisting with inquires from concerned families, supervises the cleanliness and neatness of the morgue area and oversees its proper maintenance.

Coordinates with police investigators in obtaining emergency autopsies such as in the case of police shootings, suspected sex crimes, assisting pathologists in completing action and related diagnostic tests.

Plans for yearly budgets, inventories and requisitions necessary supplies and equipment; assists in the implementation of research projects and collects and categorizes various specimens for research study; assists residents and visiting physicians in the methods and procedures of the department; serves in the absence of superior when requested; assists consultant physicians (dentists, neuropathologists, anthropologists, etc.), and, under supervision of a medical examiner or the director of operations, assist the news media as needed.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of autopsy procedures.

Thorough knowledge of fingerprinting, palm printing and x-ray procedures.

Thorough knowledge of aseptic and decontamination procedures for the morgue and other medical examiner work areas.

## Human Resources Department

---

### Manager, Morgue Bureau Operations (002964)

This is technical supervisory work in the conduct of autopsies and performance of related forensic administrative procedures for the County Medical Examiner.

## Human Resources Department

---

### Director of Operations, Medical Examiner (002976)

#### Minimum Qualifications

Bachelor's degree. A minimum of five to nine years of responsible supervisory and management experience in varied administrative work is required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional managerial work in planning and directing operations of the Medical Examiner Department (ME). An employee in this class is responsible for planning, supervising and coordinating administrative, technical, investigative, mortuary and clerical operations to assure maximum effectiveness and efficiency of departmental activities. Emphasis of the work is on coordinating and supervising diversified department operations, monitoring activity processing and reporting, developing departmental policies and procedural controls, determining operational efficiency and requirements, and implementing ME policies. The incumbent exercises considerable independent judgment and professional managerial knowledge in the continuous analysis and review of ME operating functions and public services. Direct supervision is exercised over a staff of subordinate professional, technical and clerical employees who are assigned to various phases of work, including scene and case investigations, evidence collection and transportation, mortuary operations, forensic photography, indigent cremations and burials, computer services, records and transcription services, and business and personnel offices. General supervision is received from the County Medical Examiner who reviews work through personal conferences and personal oversight of departmental operations.

##### ILLUSTRATIVE TASKS:

Directs, supervises and coordinates the work of a staff of professional, technical and clerical employees engaged in performing operational and administrative duties.

Coordinates and supervises activity processing and reporting, policy and procedural controls; determines degree of operational efficiency; evaluates operational needs and develops departmental objectives.

Performs a continuous analysis and review of departmental operating functions and measures effectiveness and efficiency through the county's Active Strategies Enterprise (ASE) system; develops new techniques to enhance the quality and quantity of services to the public.

Administers, reviews and analyzes departmental budget; prepares budget documents; develops narrative information for proposed budget; attends departmental and county budget hearings to justify and defend budget requests; approves budget charges and exercises responsibility for keeping divisions within budget allocations.

Coordinates departmental activities with police and court officials and with the state's Medical Examiners Commission; represents the ME in contacts with civic groups and other governmental agencies; disseminates information relative to scope of departmental operations; serves as department's media spokesperson.

Researches and identifies potential sources of fiscal or service support which would serve to increase departmental efficiency and performance.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Serves as department's disaster preparedness liaison; updates disaster procedure manual; conducts annual review and revision of the Continuity of Operations (COOP) Plan; participates with other agencies in mock disaster drills.

Performs related work as required.

##### KNOWLEDGE, ABILITIES AND SKILLS:

## Human Resources Department

---

### Director of Operations, Medical Examiner (002976)

Thorough knowledge of the principles of general management, public and business administration and their application to government administration.

Thorough knowledge of supervisory principles and practices. Thorough knowledge of local, state and federal statutes and regulations pertaining to the county's ME operation.

Considerable knowledge of the policies and procedures used in budget preparation, justification, monitoring and reporting.

Considerable knowledge of the principles of public personnel administration and of county personnel policies and procedures.

Considerable knowledge of the principles and practices of modern office administration.

Considerable knowledge of public relations principles and techniques.

Ability to exercise judgment and discretion in devising, installing, and interpreting department or countywide rules, regulations, policies or procedures.

Ability to supervise a staff of professional, technical, investigative, and clerical subordinates in a manner conducive to full performance and high morale.

Ability to express ideas and information clearly, concisely, verbally and in writing.

Ability to discern and extract pertinent facts from oral and written guidelines, policies and procedures and apply them to a variety of problems.

Ability to evaluate results in achievement of departmental objectives and to redirect efforts and priorities as needed.

Ability to establish and maintain effective working relationships with subordinates, superiors, and officials of other County departments.

### Eligibility Interviewer (003001)

#### Minimum Qualifications

High school diploma or GED. One year of public contact or clerical experience to include interviewing is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical and public interviewing work in determining eligibility for financial, medical or welfare assistance in a county social service program.

Employees in this class are responsible for interviewing applicants and obtaining information necessary to establish eligibility under existing statutes, ordinances, and regulations. Information obtained during interview is clearly prescribed but the manner in which facts are secured requires a degree of tact. Employees are responsible for completing necessary informational forms and recommending proper action to be taken. General supervision is received from an administrative or professional superior who reviews work generally for accuracy and completeness in obtaining the required information and who offers advice and assistance in unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Interviews applicants for public assistance to determine eligibility under existing laws and regulations; verifies information received; determines nature and amount of assistance needed, and resources available.

Interviews applicants for out-patient medical care to determine if income and residence requirements have been satisfied; records and verifies information obtained by contacting employee, landlords, other welfare agencies, and related sources; applies standard policies and procedures to classify patients as to the portion of cost to be assumed by the county; completes applicable forms.

Reviews cases periodically to evaluate continued bases for eligibility in relation to income status.

In less difficult cases, assists persons not eligible for county public assistance benefits to obtain aid from other welfare agencies in the area. Establishes payment plans, makes arrangements for transportation of patients, collects fees for laboratory services and makes emergency referrals to private convalescent homes.

Completes records indicating volume and type of services authorized and referrals to other agencies.

Performs duties at various field clinics and surplus food commodity warehouses when assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of interviewing techniques as applied to obtaining basic personal information.

Some knowledge of the laws, rules and regulations governing eligibility for welfare benefits administered under various governmental assistance programs.

Some knowledge of local public and private assistance agencies and their various eligibility requirements.

Some knowledge of the medical services provided by public health and hospital departments.

Ability to achieve rapport and establish effective relationships with applicants, their relatives, and various organizations in the community.

Ability to obtain and verify required information through interview and personal communication.

Ability to understand and carry out moderately complex oral and written instructions.

##### NATURE OF WORK

This is responsible social casework in providing welfare services to adults and children, and in determining eligibility for varied types of public assistance in a county social service program.

Employees in this class perform field and office investigations relative to requests for financial and medical assistance, psychiatric treatment, social service referral, vocational rehabilitation and child protective care in county welfare or health programs. Work may include responsibility for assisting patients and their relatives with personal or environmental problems which aggravate recovery from illness.

Incumbents exercise independent judgment in evaluating information and initiating program action, preparing complete case records within the general framework of good casework techniques, existing laws, and departmental rules governing public assistance. Supervision may be exercised over assigned clerical personnel. Work is performed under the supervision of professional superiors who review work for adherence to defined standards of social casework through personal conferences and analysis of case records, and provide assistance on unusual or difficult cases.

##### ILLUSTRATIVE TASKS

Interviews applicants for public assistance to determine eligibility under existing laws and departmental regulations; refers unqualified applicants to appropriate public or private welfare agencies; verifies information received through various sources; determines nature and amount of assistance needed and available under regulations; issues food and housing orders or cash grants as indicated.

Plans with families and individual clients the use of state and private agency services; assists applicants in organizing personal resources to work toward a goal of financial independence; visits home of applicants to determine home conditions and clarify responses to interview; records essential facts and social history; prepares case records for departmental files.

Performs required transactions for burial of indigents, the commitment of incompetent or disabled persons to county or state institutions, and acts as a court appointed guardian for dependent minors.

Interviews and inspects home environment of applicants for boarding home licenses for both children and adults and maintains records of all inspections made; maintains lists of approved foster and boarding homes for purposes of placement of children and adults.

Makes home visitations to ascertain the nature of home environments; investigates for fraud; packs and ships personal effects for deceased or disabled persons; arranges for repayment of funds to the county by clients or others.

Interviews hospital patients and their relatives to compile inpatient or outpatient social service case histories for use by physicians in diagnosis and treatment.

Inspects and participates in the placement of convalescent patients in private nursing homes within the county; makes periodic visits to ascertain condition of mental and physical health of patients in homes.

Provides child welfare services such as placement of children in foster homes, county children's home or in arranging for the return of runaway children; assists unmarried mothers in planning for themselves and their children; arranges for housekeeper services in emergency absence of parents.

Acts in a liaison role with medical, police, school and court officers; makes referrals to consultants and specialists as necessary; advises clients on a limited range of personal, social and financial problems.

Participates in staff conferences; confers with professional superiors on difficult assignments; prepares complete reports and correspondence on assigned cases, and maintains related records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles and practices of social welfare interviewing, and standard methods and techniques of social casework.

Knowledge of laws, rules and practices relating to the provision of public assistance and medical care by federal, state and county governments.

Knowledge of environmental and psychological factors resulting in the dependency of children, adults, incompetents and the aged.

## Human Resources Department

##### NATURE OF WORK

This is professional and supervisory social casework in public assistance, child welfare and county housing programs.

Employees in this class provide professional supervision over subordinate social workers engaged in a variety of services for individuals and families including intake services, casework investigations, child protective care, direct services to elderly housing tenants or other functions. Some positions in the class require performance of advanced professional social work involving intensive service in complex client situations and a high degree of skill and mature judgment in evaluating information and arriving at remedial solutions. Work of subordinate social workers is reviewed for adherence to accepted standards of social casework. Supervision is received from a professional superior who evaluates quality of results through personal conferences and analysis of records and activity reports.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of subordinate social workers engaged in preliminary screening for welfare eligibility; authorizes expenditure of public funds after evaluating casework reports and recommendations prepared by the staff; assists and advises on eligibility conditions or the resolution of unusual and difficult cases.

Supervises and participates in social service programs for financial assistance including preliminary eligibility determinations, referrals to appropriate agencies, issuance of emergency financial grants and emergency housing arrangements.

Supervises and participates in casework services for the care and placement of dependent children; participates in the inspection of foster homes to be used for child care; places children in homes and gives supervision throughout the placement period.

Plans, assigns and supervises work of subordinate social workers engaged in community services for elderly residents of low cost housing; visits tenants to determine, analyze and evaluate problems; contacts community agencies to refer cases; follows up on referrals to determine any supplemental service required; interprets services of the agency to the community; performs intensive casework with families or individuals where client problems are complex to assure benefit from support measures in-so-far- as possible.

Performs advanced professional casework services to resolve more complicated cases such as those where intensive service is required to overcome destructive effects of emotional or environmental problems.

Maintains liaison with police, school, medical and court officers; consults with and makes referrals to specialists; attends and participates in technical conferences for cooperative planning and group training; prepares detailed case studies for teaching purposes as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the philosophy, principles and practices of social work including professional casework methods and techniques of counseling.

Considerable knowledge of laws, rules and practices relating to the provision of public assistance administered under various provisions of federal, state and county laws.

Considerable knowledge of agency policies, procedures and regulations relating to the area of assignment.

Considerable knowledge of various public and private community resources available for rehabilitation services.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to conduct interviews with clients effectively and persuasively.

Ability to obtain and analyze case information and reach sound decisions on the basis of such information.

Ability to prepare comprehensive case history reports of data necessary for social diagnosis.

Bachelor's degree in Social Work, Sociology, Psychology, Human Services or related field. Two years of professional case management experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional and supervisory social work in management of a social service activity in an assigned geographical area of a county department or agency.

Employees in this class provide professional supervision and management direction to a group of social workers and a supporting staff in a district or regional office including outlying units. Services supervised typically include intake, casework services, review of financial and medical needs, counseling, and planned delivery of social services to eligible individuals and their families. Additional responsibilities include serving as liaison between the department, the community and other agencies in the area, serving as field instructor for undergraduate and graduate students and providing training for other trainee personnel as assigned. Incumbents may work in welfare or other programs providing social services to special clients in a community services activity. Some incumbents in the class have responsibility for county-wide social service programs of a limited nature. Supervision is received from a professional superior in a central location who confers on difficult cases and evaluates quality of results through personal observation of area operations and analysis of reports and records.

##### ILLUSTRATIVE TASKS

Plans and supervises work of an area staff engaged in intake and financial assistance service, referral to appropriate agencies and related activities for clients with various financial, medical or other needs; makes appropriate case assignments to subordinate social workers; assists subordinates in arriving at decisions in emergency or complex cases or in dealing with difficult clients; interprets departmental policies as needed.

Authorizes expenditures of funds within departmental regulations and guidelines; approves issuance of emergency financial grants and the solicitation of emergency housing arrangements.

Reviews casework reports and recommendations of subordinates; evaluates the quantity and quality of work output to encourage staff professional growth and development as well as maintain adherence to acceptable departmental standards, policies and procedures; visits outlying offices to review and assist in work operation as needed.

Counsels with clients who have particular needs; assists youths in return to school, or referral to jobs; counsels with clients and their family members in an endeavor to resolve behavioral patterns interfering with adjustment to normal social living; refers clients to diagnostic assessment or other assistance as needed.

Serves in a liaison capacity for the department within the area; attends meetings of other county or state agencies such as those dealing with rehabilitation services, housing and urban development or social and economic state services.

Maintains public relations with area community groups; attends meetings such as those of senior citizen organizations or committees planning migrant services; gives speeches on agency functions to schools or community agencies; explains departmental requirements to other groups serving community clients.

Serves as a primary field instructor in the training of assigned undergraduate and graduate social work students; assigns, reviews and evaluates trainee work; completes reports covering nature of assignments, application of skills and summaries of student strengths and limitations; provides orientation and training to various other trainees.

Supervises area office administrative operations including requisitioning of supplies and equipment, preparing budget requests, completing performance evaluations and hiring new personnel; prepares and submits required workload reports and other special reports or data as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the professional principles, techniques and practices of social work.

Considerable knowledge of departmental policies, procedures and regulations relating to intake, casework and other services.

Considerable knowledge of eligibility, financial and medical assistance provisions and regulations in related federal, state and county programs.

Considerable knowledge of various federal, state and local resources available within the community for financial, medical and other

### Eligibility Supervisor (003012)

#### Minimum Qualifications

Bachelor's degree in Social Work, Sociology, Psychology or related field.

#### Job Specifications

##### NATURE OF WORK

This is administrative and supervisory social work in determining eligibility for social service program assistance.

Employees in this class are responsible for planning, assigning and reviewing the work of subordinate paraprofessional employees engaged in interviewing applicants to determine eligibility for social service program assistance. Responsibilities include assuring compliance with eligibility requirements of funding sources, reviewing narrative and statistical reports and application logs, developing training programs for subordinates, keeping abreast of changes in policy or procedural changes, reviewing client information documents prior to submission for approval, and providing assistance to applicants and subordinates on difficult or unusual eligibility problems and issues. Incumbents exercise some independent judgment in assuring valid eligibility determinations in accordance with program guidelines and regulations. Supervision is exercised over paraprofessional and clerical employees engaged in processing applicants or serving in support capacities. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for effective management of eligibility functions.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate paraprofessional employees engaged in obtaining information necessary to determine eligibility under current guidelines and regulations for assistance in a social service program.

Reviews narrative and statistical reports and client application logs; assures eligibility determinations are made in accordance with funding source rules and regulations.

Develops and implements training programs for subordinates; communicate changes in funding source policies, procedures and regulations.

Reviews client information system forms and documents prior to submission for approval.

Provides assistance to subordinates and clients concerning eligibility problems.

Participates in staff conferences and confers with superiors on eligibility issues.

Prepares records, reports and correspondence.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the principles and practices of social service interviewing.

Considerable knowledge of the theories, principles and techniques of social casework.

Considerable knowledge of the rules, regulations, policies and procedures affecting eligibility for social service program assistance.

Knowledge of supervisory principles and practices.

Knowledge of public relations principles and techniques.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to achieve rapport and establish effective working relationships with applicants for social service assistance.

Ability to verify eligibility of applicants for social service assistance.

Ability to keep informed of changes in rules and regulations for eligibility for social service assistance.

Ability to train subordinates in methods of eligibility determination and the rules and regulations promulgated by funding sources.

Ability to communicate clearly and concisely, verbally and in writing.

### Social Services Administrator (003025)

#### Minimum Qualifications

Bachelor's degree in Social Work, Psychology, Sociology, Public Administration, Human Relations or a related field.

Two years of administrative or professional experience in social services are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional social service work with administrative responsibility in carrying out programs within County Department. Employees in this class are responsible for supervising and managing the activities of a staff of professional social workers, para-professional and other supportive personnel in management of a major division of the department. Additional responsibilities include coordinating ongoing service delivery operations with other divisions or program units, monitoring and evaluating division performance relative to both division and departmental objectives, assisting the Director in planning, programming and budgeting, and serving as hearing officers in due process proceedings as assigned. Incumbents must apply advanced professional social treatment and supervisory knowledges and skills. General supervision is received from the Department Director who evaluates work for conformance with departmental policies and for effectiveness in quantity and quality of results.

##### ILLUSTRATIVE TASKS

Plans, assigns, supervises, coordinates, and reviews work of the professional and technical staff assigned to the division through the intermediate supervisors; monitors and evaluates division job performance relative to divisional and departmental objectives; makes recommendations on a continuous basis for service delivery and program improvements.

Coordinates divisional activities with other departmental work to assure maximum effect, minimize duplication, and enhance better utilization of resources.

Formulates and conducts in-service training programs for further professional staff development; provides advisory and consultative services of a specialized nature to professional staff within and outside the department as needed.

Establishes priorities for evaluation or research development and monitors progress; assists in research development and compilation of statistical data for departmental evaluation and programming purposes.

Assists the Director in formulating fiscal policies and practices including preparation of the departmental annual budget; assists in program planning and the development of administrative and operational policies, procedures and regulations; serves on the Director's administrative advisory committee.

Conducts lectures and attends meetings, conferences, and informational workshops in the community as representatives of the department or the county; participates with other community agencies in social welfare planning and the development of new resources.

Assists in the recruitment, selection, orientation and training of new staff and students placed in the department by various educational institutions and training programs.

Assists in the development and preparation of departmental manuals, brochures, pamphlets and other resource materials for informational and public relation uses; prepares special reports requested by the Director.

Prepares or reviews performance evaluations; makes decisions regarding hiring, discipline and promotion of subordinates; discusses work-related problems with employees.

Serves as hearing officer for appeals in due process proceedings as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of social welfare philosophy, practices and principles.

Thorough knowledge of social casework theory, diagnostic and treatment skills.

Thorough knowledge of laws, rules and practices relating to the provision of public assistance and various social service programs by the Federal, State, and county governments.

Thorough knowledge of each service program in the department and its purpose, operational procedures, and philosophy.

Considerable knowledge of available community resources and their eligibility requirements.

Considerable knowledge of supervisory principles, practices and methods.

Ability to plan, supervise and manage the activities of a division of the department staffed by professional, para-professional and supportive personnel.

### Rehabilitative Services Counselor 1 (003049)

#### Minimum Qualifications

Bachelor's degree in Behavioral Science, Social Science or related field. Experience in counseling in an outpatient or other substance abuse treatment program may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is client counseling and related work in providing health and other support services in a county outpatient or other substance abuse treatment program.

Employees in this class typically are responsible for performing counseling work with clients in medication free outpatient clinics, methadone clinics, residential facilities or other substance abuse treatment programs, usually with an assigned caseload. Emphasis of the work is on initial interviewing and initial completion of required psycho-social assessment forms, definition of client problems and participation in treatment planning, counseling of clients on a regular basis, completion of case notes and referral of clients to other sources of assistance as needed. Incumbents work with various clients who have a dependency on drugs or alcohol or have life problems aggravated because of substance abuse and who have volunteered for or are mandated by the courts for treatment. Some incumbents in the class perform duties in programs of a court liaison nature or in specialized intake and treatment referral programs. Duties require ability to apply counseling skills relating to rehabilitation and behavioral changes, conduct individual counseling sessions, achieve rapport with clients and exercise judgment in participation in planning treatment or recommending termination of treatment. Supervision is received from a professional or administrative superior who assists in treatment planning or dealing with clients in emergencies, guides incumbents in the use of counseling techniques and reviews assessment forms and treatment notes.

##### ILLUSTRATIVE TASKS

Holds initial sessions with assigned clients to complete psycho-social assessment and related forms, achieve rapport and identify client problems; sets up preliminary treatment plan for review.

Discusses treatment plans with superior; conducts individual counseling sessions with clients on a regular basis; modifies counseling techniques as needed to assist clients in behavioral change and with various living problems in the home, social or work environment; conducts group counseling sessions as a co-therapist or guides groups in educational discussions using pre-prepared materials; maintains case notes during the treatment process.

Counsels family members as to behavior and other problems of clients and their implications for the family.

Follows up with clients who do not keep counseling appointments; refers them to outside agencies such as vocational, educational, medical or social agencies in order to eliminate problems which may be related to recovery.

Serves in a court liaison program; meets with family members concerning involuntary commitments of clients; counsels on involuntary and voluntary entry into treatment; attends court to inform judges of client progress.

Serves in a jail related program; interviews persons booked on felony charges for possible referral to treatment; recommends a treatment program; appears at bond hearings in order to request custody and release to treatment; monitors client attendance after entry into treatment; gives information as required for probation violation cases.

Meets with individuals volunteering for treatment in a central intake activity; discusses treatment programs; completes psycho-social and other detailed intake forms; evaluates client needs and refers to appropriate treatment programs, following eligibility requirements.

Performs relate work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of regulations, procedures and practices of the substance abuse rehabilitative program to which assigned.

Knowledge of substance abuse habits and practices of clients.

Knowledge of the programs of local public and private substance abuse rehabilitation agencies.

Knowledge of appropriate counseling skills in the rehabilitation of clients.

Knowledge of available public welfare and other resource agencies.

Ability to achieve necessary rapport and maintain effective relationships with clients and their family members.

Ability to utilize counseling techniques effectively in client treatment.

Ability to obtain and verify detailed information through personal interview and telephone communication.

Ability to identify client problems in relation to treatment planning and develop preliminary treatment plans.

##### NATURE OF WORK

This is advanced client counseling work in providing health and other support services to clients in a county outpatient or other substance abuse treatment program.

Employees in this class are responsible for performing counseling work with clients in medication free outpatient clinics, methadone clinics, residential facilities or other substance abuse treatment programs where assigned clients have problems which require more advanced counseling skills. Emphasis of the work is on completion of psycho-social assessment forms, definition of client problems and treatment planning, counseling of clients individually or in groups, evaluation of client progress and assisting Counselors 1 in treatment planning and counseling techniques as needed. Some incumbents in the class supervise Counselors 1 and support personnel as a unit supervisor or as an assistant to the supervisor of an outpatient program. Duties require ability to apply a variety of counseling skills utilized in client rehabilitation, conduct individual and group counseling sessions, achieve rapport with clients and exercise judgment in evaluating client progress and planning treatment. Supervision is received from a professional or administrative superior who evaluates work for quality of results in client treatment and effective management of treatment records and reports.

##### ILLUSTRATIVE TASKS

Holds initial sessions with clients to complete psycho-social assessment and related forms; identifies client problems at initial and subsequent interviews and develops or modifies treatment plans.

Conducts individual counseling sessions with clients on a regular basis utilizing various techniques; modifies techniques as needed to assist in behavior modification and with various living problems in the home or in the social or work environment; refers clients to supervisor or to other sources of assistance if client progress is not made.

Plans and conducts group counseling sessions of an educational discussion, therapeutic or encounter group nature; trains other counselors in group guidance and counseling techniques.

Counsels family members as to behavior and other problems of clients, treatment plans and their implications for the family.

Participates in case consultation with staff personnel relating to rehabilitation of program participants.

Supervises counselors and support personnel in an outpatient alcohol or drug treatment program; supervises the maintenance of treatment progress notes, assessment forms, client status and related records; advises staff on various skills to use for more effective rehabilitation.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of regulations, procedures and practices of the substance abuse rehabilitative program to which assigned.

Considerable knowledge of substance abuse habits and practices of clients.

Considerable knowledge of appropriate individual and group counseling skills in rehabilitation of clients.

Knowledge of the programs of local public and private substance abuse rehabilitation and social service agencies.

Knowledge of supervisory principles and practices.

Ability to achieve necessary rapport and maintain effective relationships with clients and their family members.

Ability to utilize a variety of counseling techniques effectively in client treatment.

Ability to supervise work of subordinates in a manner conducive to full performance and high morale.

Ability to identify clients' problems, including problems of a complex nature.

Ability to develop treatment plans designed to assist clients in rehabilitation and provide supportive services.

Ability to assess client progress and prepare case records in behavioral terms.

Ability to maintain confidentiality of client information.

Ability to communicate clearly and concisely, orally and in writing.

##### NATURE OF WORK

This is professional and supervisory work with some administrative responsibility in the management of a county outpatient clinic offering substance abuse rehabilitation services.

Employees in this class are responsible for supervision of an outpatient drug-free clinic providing in-depth counseling services for clients in substance abuse rehabilitation. Some incumbents supervise the work of methadone dispensing clinics offering services to large numbers of clients undergoing specialized treatment. Emphasis of the work is on supervision of a group of professional counselors and a support staff engaged in treatment planning and counseling for clients with drug abuse histories and problems which affect normal patterns of living. Responsibilities include establishing treatment goals for the clinic, proposing yearly budgets, conducting staff meetings to review client workload, holding case conferences, discussing any revisions in policies and procedures, coordinating client services with staff psychologists and psychiatrists and supervising preparation of treatment records and reports. Incumbents exercise considerable professional judgment in advising staff members on use of individual or group therapeutic techniques and various treatment approaches, and in individual counseling in difficult client cases. Incumbents frequently supervise the work of student interns assigned to the clinic under affiliation agreements with local universities. Supervision is received from an administrative superior who evaluates clinic operations for timely progress in client treatment and quality of professional results in client rehabilitation through visits to the clinic and review of written reports.

##### ILLUSTRATIVE TASKS

Plans, coordinates and supervises the work of a staff of counselors and support personnel engaged in intake, psycho-social assessment of clients, treatment planning and counseling; trains new staff members; advises staff on treatment approaches, therapeutic techniques and after-care plans for clients.

Assists staff in crisis intervention with clinic clients; personally maintains a caseload of clients who evidence more complex rehabilitation needs and counsels with their family members as part of therapy planning; discusses grievances regarding treatment with clients according to established procedures.

Holds case conferences with staff members to discuss assessment of clients and their treatment progress; reviews progress notes and treatment plans prepared by staff counselors; supervises preparation of work activity and client workload reports.

Confers with staff psychologists or psychiatrists on treatment services to clients exhibiting unfavorable response to rehabilitation or behavioral adjustment problems; refers clients for further counseling to psychologists or psychiatrists as needed.

Supervises and evaluates the work of student interns; guides their assignments in client counseling and offers professional assistance in treatment approaches and planning; reviews progress notes prepared by interns.

Informs staff of agency and other workshops in group psychotherapy, reality therapy, psychodrama and other professional and career related subjects; conducts workshops within the agency as assigned.

Supervises the professional, paraprofessional and support staff of a methadone clinic; coordinates services with professional nursing and medical staff associated with the clinic; assists staff with crisis intervention counseling; supervises the monitoring of methadone dosages and conduct of client counseling.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### NATURE OF WORK

This is professional and supervisory clinical social casework in medical, nursing and specialized social services programs within a county department.

Employees in this class provide professional supervision over subordinate social workers engaged in direct inpatient or outpatient clinical casework services. Related responsibilities include providing advanced professional casework service in complex cases requiring a high degree of skill and mature judgment in evaluating social diagnostic information and arriving at appropriate support measures. Some positions in this class participate in the clinical casework training of graduate students in an accredited internship program. Incumbents apply considerable knowledge of disease entities and medical or psychiatric terminology associated with a clinical setting in addition to the philosophy, -principles and practices of professional social work. Work of subordinate social workers is reviewed for adherence to accepted quality standards of social casework. Supervision is received from a professional superior who evaluates quality of results through personal conferences and analysis of case records and activity reports.

#### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of a small group of subordinate social workers engaged in providing direct services to inpatients in an assigned group of medical or surgical specialties; supervises the screening and assignment of cases; assists staff in arriving at solution to client problems; interprets agency regulations and policies for the unit; coordinates with the medical staff on social problems relating to illness, hospitalization, diagnosis and treatment; personally acts on more complex cases such as those where client situations are complicated by conflicting needs difficult to resolve.

Supervises and participates in the placement of convalescent patients in nursing homes or psychiatric facilities within the county; visits clients in convalescent homes for an assigned area and evaluates rehabilitation progress; counsels clients regarding personal and vocational readjustment; assists other social workers in the resolving of difficult cases.

Interviews families of patients admitted to a mental health institute utilizing professional interviewing techniques; compiles extensive social case histories for use

of medical staff in diagnosis and determination of treatment; interviews parents of children referred to a psychiatric outpatient clinic, securing pertinent data regarding reasons for requesting psychiatric services, school and family history; works closely with the clinical psychologist staff in treatment planning and the resolution of social problems.

Participates in discharge planning with institute patients and their families; evaluates suitability of environment to which patient will be returned; coordinates discharge planning with appropriate community agencies and makes recommendations accordingly.

Trains assigned students in the internship phase of a graduate clinical social work program; reviews, evaluates and discusses their progress in completed casework.

Attends and participates in diagnostic and technical conferences for cooperative planning, treatment and group training; prepares detailed case studies for teaching purposes; maintains liaison with police, school and court officials where necessary.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the philosophy, principles and practices of social work including professional casework methods and techniques of counseling.

Considerable knowledge of laws, rules and practices relating to the provisions of public assistance and medical care programs administered under Federal, state and county laws.

Considerable knowledge of various public and private community resources available for rehabilitation services.

Considerable knowledge of the social aspects of mental diseases and abnormalities including psychiatric and medical terminology associated with mental health care.

Considerable knowledge of the social aspects of various disease entities and medical terminology associated with medical and surgical inpatient and outpatient care.

### Clinical Psychologist 1 (003117)

#### Minimum Qualifications

Doctorate's degree in Psychology from an approved APA program. Completion of a one-year internship and possession of a State of Florida Psychologist license are required.

#### Job Specifications

##### NATURE OF WORK

This is professional psychology work in performance of clinical psychology services in a county mental health, youth services or clinic facility.

A Clinical Psychologist 1 is responsible for performing psychological assessment and evaluation of adult and/or child clients, using psychodiagnostic tests and other professional techniques not requiring medical licensure. Related professional responsibilities include provision of individual psychotherapy, as assigned, and participation in training of psychology interns. Emphasis of the work is on assessment and evaluation of personality characteristics and dynamics in contributing to the understanding of client problems and development of treatment plans. Incumbents must apply considerable knowledge of clinical psychology principles, theories, methods and techniques, and a substantial degree of professional judgment in selection and administration of psychodiagnostic techniques used in assessment, in arriving at conclusions drawn from evaluations and in providing therapy. Work is performed with considerable independence of action. Supervision is received from a professional superior who evaluates professional results through written reports and conferences on patient diagnosis and treatment.

##### ILLUSTRATIVE TASKS

Performs diagnostic evaluation of children in a child guidance clinic, youth evaluation and counseling unit or other youth facilities; administers intelligence and personality tests; evaluates examination findings; conducts individual psychotherapy with emotionally disturbed children and/or their parents; conducts treatment interviews with family groups; prepares case summaries and presents evaluations at case conferences; participates in various research activities by collecting, tabulating and interpreting data.

Selects techniques to be used in psychological assessment of assigned adult or child clients in a mental health institute or forensic unit; conducts assessment interviews and observes patient needs; evaluates information to determine further techniques to be used in psychodiagnostic appraisal; administers independently any type of psychological test to resident or outpatient clients in order to assess personality characteristics and dynamics including various personality and behavior characteristic tests.

Scores, evaluates and interprets projective tests in intensive assessment of personality structure and disturbances such as psychotic, psychoneurotic and personality disorders of child clients in a youth facility or mental health institute; completes oral or written reports of findings and interprets related psychological data.

Performs individual therapy by conducting intensive therapeutic interviews as part of a client treatment plan medically directed.

Participates in periodic rounds and staff conferences conducted for teaching and diagnostic purposes; interviews patient families to explain test results or therapy; participates in research projects.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of psychological principles, theories and methods in the field of clinical psychology.

Considerable knowledge of psychodiagnostic tests and their use in assessment and evaluation of personality characteristics and disturbances.

Considerable knowledge of psychodiagnostic treatment techniques used in individual and group psychotherapy.

Considerable knowledge of current literature in clinical psychology, including the functional areas of testing and therapy.

Ability to interpret psychological information and to formulate professionally mature diagnostic and treatment recommendations.

Ability to establish and maintain effective relationships with the medical staff, clients and professional associates.

Ability to participate effectively in team discussions of patient diagnosis and treatment plans.

Ability to administer and interpret a variety of psychological tests.

Ability to administer treatment techniques used in individual and group therapy.

#### NATURE OF WORK

This is professional psychology supervisory work with administrative responsibility in a county mental health or clinic facility. A Clinical Psychologist 3 is responsible for direction of a clinical psychology service in a mental health or clinic facility. Related administrative and professional responsibilities include serving as consultant for the service to community groups, planning of clinical training for psychology interns, planning of training for related disciplines, direction of research and collaboration with other professional services. Emphasis of the work is on administrative and professional supervision of a small staff of clinical psychologists engaged in heavy client caseloads, working in close correlation with the medical staff. Supervision is exercised by means of consultation on more complex cases and review of completed work as needed to assure professional competence. Incumbents must apply extensive knowledge of clinical psychology principles, theories, methods and techniques and a high level of professional skill and maturity in direction of the pertinent service. General supervision is received from a medical superior who evaluates the activity for quality of professional results.

#### ILLUSTRATIVE TASKS

Serves as Chief Psychologist in a mental health service for children; directs the work of a small staff of clinical psychologists engaged in psychology services in various areas; plans and participates in research; plans and conducts training of residents and psychology interns; serves as chairman of assignment committee, family therapy program, diagnostic conferences and staff training seminars in psychotherapy; plans and presents training lectures; teaches clinic staff and interns through treatment case conferences; evaluates professional competence of the staff and progress of interns.

Provides consultation to other community agencies as a clinical consultant or consultant in the development of psychologically oriented programs; serves as consultant in liaison with public school program; acts as clinic director in the absence of medical superior; performs diagnostic examinations and family therapy in complex client cases.

Serves as chief of the psychology service in a mental health institute; coordinates the service with various medical and administrative activities of the facility; plans and initiates changes in administrative procedures; directs the work of a small staff of clinical psychologists engaged in services for outpatient, inpatient and forensic areas; assigns a large volume of adult and child client cases for psychological assessment and evaluation; provides professional guidance by consultation in interpretation of psychodiagnostic tests in more difficult cases; reviews work in progress to assure professional competence.

Participates with medical staff in therapy planning for clients; recommends changes in treatment in collaboration with medical staff and other professional personnel; gives consultant advice to other agencies or community groups.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of psychological principles, theories and methods in the field of clinical psychology.

Extensive knowledge of psychodiagnostic tests and their use in assessment and evaluation of personality characteristics and disturbances.

Extensive knowledge of psychological treatment techniques used in individual and group psychotherapy.

Thorough knowledge of current literature in clinical psychology including the functional areas of psychological tests and therapy.

Considerable knowledge of general administration of a mental health facility serving resident and/or outpatient clients.

Ability to plan and coordinate the work of psychologists and other professional personnel in a manner conducive to full professional performance and high morale.

Ability to establish and maintain effective relationships with the medical staff, patients, professional associates, agency officials and officials of other agencies.

Ability to plan and present formal internship training in clinical psychology principles, theories and techniques.

Ability to provide consultant service in the field of assignment.

Ability to coordinate a psychology service with related medical and administrative functions.

### Community Family Service Worker (003138)

#### Minimum Qualifications

Completion of 60 semester credits to include 12 semester credits in Social Work, Psychology or a related field.

Experience in a social services delivery system may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is responsible field and office work in provision of social services to children and their families in a county youth services agency. Employees in this class assist social workers in determining needs and delivering services to children and their families. Emphasis of the work is on serving as an adult role model for assigned children and assisting them in functioning more effectively in the home, school and community by performing a variety of field contact and related office duties. Work includes personal visits in the home, school, community or place of employment, transportation of clients to assessment, treatment and service activities and preparation of various reports and records. Supervision is received from professional superiors who assign work, discuss individual casework and review completed reports.

##### ILLUSTRATIVE TASKS

- Maintains regular contact with assigned clients by means of personal visits and telephone to the home, school, community or place of employment.
- Contacts schools by visits or telephone to obtain information concerning behavioral and academic performance of assigned children.
- Visits community agencies and schools to coordinate services to children and their families.
- Locates employment and recreational opportunities for clients and transports to these activities as required.
- Transports clients to and from assessment, treatment and service delivery activities as needed.
- Gathers assessment and behavioral data on clients; composes narrative reports for case files on results of field contacts in the home, school, community or place of employment; notes progress of clients in adjustment to home, school and community life.
- Interviews new clients for intake purposes, and completes necessary forms; assists in the preparation, implementation and monitoring of referrals to other community agencies.
- Prepares, distributes and gathers release of information forms or other information sent to other community agencies; contacts families for signature of consent-for-service-forms.
- Compiles, tabulates and submits statistics on client services and workload indicators as assigned.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Knowledge of basic interviewing techniques in determining needs and providing social services.
- Knowledge of departmental policies, regulations and procedures in the community family services program.
- Knowledge of social service assistance programs and community resources.
- Some knowledge of methods of social casework.
- Some knowledge of environmental and psychological factors affecting adjustment of children to home, family, school and community life.
- Some knowledge of normal and abnormal behavior patterns of children in various age groups.
- Ability to observe, identify and report in oral or written form significant problems, needs and behavioral improvements of children.
- Ability to communicate effectively with children, parents and officials in schools and community agencies.
- Ability to work cooperatively with social workers.
- Ability to operate passenger vehicles safely.
- Ability to follow oral and written instructions.
- Ability to gain and retain respect and confidence of children and their families.
- Ability to recommend appropriate resource referrals for social services.
- Ability to search for and compile data from files and other sources.

### Minimum Qualifications

Bachelor's degree in Social Work, Health Management or a related field. One year of professional experience in programs for the elderly is required.

### Job Specifications

#### NATURE OF WORK

This is advanced supervisory work in managing the operation of a county adult day care center for frail elderly and handicapped adults. Employees in this class are responsible for planning, assigning and reviewing the work of a subordinate staff engaged in providing transportation services, meals, and recreational, cultural and educational activities for a group of frail elderly and disabled adults. Responsibilities include developing and promoting center activities to enhance rehabilitation and re-socialization of clients, interviewing individuals to assess social and emotional capabilities, assisting subordinates in resolving client problems and preparing a variety of reports. Incumbents maintain contact with social service officials responsible for referral of clients, and staff nursing personnel who examine and counsel with program participants. Some employees in the class manage centers which maintain activities for the well elderly and outreach community services for the aged. Duties are performed in accordance with established departmental policies and procedures and require skill in coordinating and supervising center activities so as to achieve rehabilitation and re-socialization goals. Supervision is exercised over specialized and volunteer employees. Work is reviewed by an administrative superior through periodic reports and conferences for conformance to established policies and procedures and for attainment of program objectives.

#### ILLUSTRATIVE TASKS

Plans, assigns, schedules and reviews the work of subordinate recreational and transportation personnel as well as volunteer employees engaged in providing a variety of services and activities for clients; establishes center goals and objectives.

Makes determinations of necessity for referral of clients to other social service agencies, entrance of new clients into the center and recommendations for termination of clients who are unable to adjust to the day care setting.

Conducts home visits with new clients to explain program, coordinate transportation arrangements and answer client questions, as needed.

Provides assistance and training to staff members in resolving client problems such as lack of interest in center activities, client absences and physical and emotional difficulties; recommends addition or modification of recreational activity to better meet clients' needs.

Counsels clients and participates in recreational and educational activities with clients and subordinates.

Establishes and maintains working relationships with social service and governmental agencies within the community; refers clients with extensive problems to other agencies; maintains contact with agencies referring clients to the center.

Prepares periodic narrative and statistical reports regarding client progress and center operations for approval of superiors; prepares center correspondence and proposed budgets.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the motivation, interests, attitudes and behavior patterns of frail elderly and handicapped citizens.

Considerable knowledge of departmental policies, procedures and regulations relating to adult day care services.

Considerable knowledge of policies, procedures and regulations of Federal and State funding sources relating to adult day care services.

Considerable knowledge of various public and private community resources available for rehabilitation services.

Knowledge of supervisory methods and practices.

Knowledge of the principles of management and their application to adult day care programs.

Ability to supervise subordinate employees in a manner conducive to full performance and high morale.

Ability to plan center activities so as to meet rehabilitation and socialization needs of clients served.

Ability to conduct interviews with clients effectively and persuasively.

Ability to maintain client records according to departmental requirements.

Ability to counsel clients with behavioral problems effectively.

Ability to develop and maintain effective working relationships with officials in other government social service agencies.

Ability to prepare complete narrative and statistical reports.

### Job Specifications

#### NATURE OF WORK

This is highly responsible administrative work in planning and directing activities of a Human Services Division within the Human Services Department.

Employees in this class are responsible for directing and supervising operations of a division within the Human Services Department, specializing in neighborhood services delivery, services to the elderly, child development services or other specialized programs as established. Emphasis of the work is on direction and coordination of a variety of programs and staff operations within the division, developing, proposing and implementing new or revised policies and plans, developing budget proposals, maintaining liaison with various community, state, Federal or local agencies, drafting grant proposals, and insuring appropriate expenditure of funds and compliance with reporting requirements from various funding and departmental sources. Incumbents exercise a considerable degree of originality, independent judgment and professional managerial knowledge in interpreting division policies, resolving operational problems, evaluating program and fiscal elements of programs directly administered or contracted and researching for applicable funding sources. Supervision is exercised through subordinate supervisors over a varied and dispersed staff of professional, technical, administrative, specialized and clerical employees assigned to various division activities. General direction is received from the assistant office director and office director who review work through personal conferences, inspections and various reports and hold the incumbent responsible for attainment of desired goals and objectives and effective professional and administrative management of division operations.

#### ILLUSTRATIVE TASKS

Directs operations of neighborhood service delivery centers dispersed throughout the county; supervises professional and support staffs engaged in social service case management, administration of the centers, liaison with various service providers resident at the centers and contact with center clients and community groups.

Directs a program of service to the elderly; supervises a professional and support staff engaged in administration of adult day care centers, large scale provision of residential homemaker services, administration of day centers offering various services to the well elderly, transportation, community outreach and related supporting services for the older population.

Directs a program of child development services; supervises a professional and support staff engaged in administration of child care centers operated by the county, monitoring and evaluation of a variety of child care facilities contracted on an annual basis, provision of specialized services such as nutrition and health to the centers and management of fiscal accounting and reporting requirements specified by various funding sources.

Proposes new and revision of existing policies for division operations; proposes division goals and objectives; evaluates division performance in relation to established goals and objectives.

Supervises preparation of budget proposals and presents proposed budget plans; keeps informed on division expenditures and the status of funds; insures preparation of required reports for various funding sources and departmental superiors.

Evaluates program and fiscal elements of division operations directly administered; supervises the monitoring and evaluation of activities contracted by the county from both program and fiscal standpoints; recommends or directs changes to effect improvements as considered necessary.

Assists subordinate personnel in the preparation of grant proposals, resolving of emergencies and operational problems, resolving of fiscal and personnel problems and related management considerations.

Holds staff meetings with key personnel to consider plans, priorities, operational improvements, status of funds, needed legislation and related matters; participates in staff meetings with other key office personnel and the director.

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing activities of the Metro-Miami Action Plan.

An employee in this class is responsible for planning, directing and implementing programs designed to achieve departmental goals and policy objectives as established by the Metro-Miami Action Plan (MMAP). Responsibilities include directing through subordinate levels of professional and clerical employees the development and implementation of policies and procedures that will promote sensitivity and respect between the criminal justice system and minority groups in Miami-Dade County; formulating and directing a community-oriented conflict resolution training curriculum; supervising and coordinating an affordable housing program and an economic development program which are designed to increase homeownership and provide business opportunities for low to moderate income families; developing and coordinating departmental activities such as fundraising events, community meetings and rallies, annuals conferences; functioning as a liaison with public and private sector representatives on social and economic issues affecting the community; and directing and overseeing all departmental public relations functions, media releases, video presentations and brochures publications. The incumbent exercises extensive independent judgment and managerial knowledge in directing numerous activities and formulating departmental policies. Supervision is exercised through subordinate professional and clerical employees engaged in various departmental operations. General direction is received from the Metro-Miami Action Plan Board of Trustees and the County Manager who holds the incumbent responsible for the professional management of departmental functions and activities.

##### ILLUSTRATIVE TASKS

Plans, directs and implements program policies and procedures which will promote dual sensitivity and respect between the criminal justice system and minority groups in the community; develops and supervises the implementation of a non-violent conflict resolution training module for public schools, law enforcement officials and community groups.

Promotes and facilitates new strategies to promote economic development among minority groups in the areas of housing, employment, credit and business opportunities; implements and coordinates a housing program which seeks to assist low to moderate income residents with the acquisition of subsidized and unsubsidized homes by providing advice on such issues as housing selection procedures, financial planning, and home management; directs and monitors economic development programs which seek to increase the number of minority businesses and foster commercial and real estate development by providing instructions on starting and incorporating a business, developing a marketable business plan, preparing a bankable loan package and maintaining accurate financial records.

Defines and formulates department policy, programs, objectives and direction.

Directs the preparation, award, monitoring and evaluation of contracts negotiated between the Metro-Miami Action Plan and various community based organizations.

Conducts research and develops policy recommendations based on community input and feasibility recommendations.

Represents the MMAP Trust before public forums and meetings, community-based organizations in order to articulate MMAP issues.

Meets with business leaders, public officials and members of community organizations on a regular basis and advises and informs them on matters pertinent to the community.

Directs the planning and preparation of special events, public relations functions, departmental publications and video presentations.

Supervises subordinate professional and clerical employees involved in various phases of program administration.

Oversees the preparation of departmental budget; monitors expenditures throughout the year.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### NATURE OF WORK

This is field auditing and related work in Section 8 New Construction and Substantial Housing Programs.

Employees in this class are responsible for performing field audits of Section 8 New Construction and Substantial Rehabilitation projects, and conducting preliminary tenant eligibility interviews. Responsibilities include reviewing projects after execution of the Housing Assistance Payments Contract and on an annual basis, inspection of leased or about to be leased units to determine their condition, and examination of the tenants' records pertaining to eligibility and family contribution to provide assurance of the owners' compliance with applicable U.S. H.U.D. requirements. Supervision is received from an administrative superior who reviews work through reports and personal conferences for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Reviews files of Section 8 New Construction and Substantial Housing Programs; records summary for each family reviewed; determines that owner is in compliance with equal opportunity requirements and regulations relative to security deposits; verifies that owner has correctly determined eligibility of families.

Assures that property manager is in compliance with regulations by conducting audits of first-time application, lease, recertification notice, recertification, income calculation and all required lease provisions.

Assures that the approved form of lease contains all required lease provisions.

Keeps abreast of changes in U.S. H.U.D. regulations concerning affirmative fair housing marketing plan, tenant selection plan, occupancy standard plan, lead-based paint, pet rules, federal preference regulations, and other applicable policies and procedures.

Prepares and submits reports for supervisory review.

Interviews tenants at housing sites and determines eligibility for programs based upon income, bedroom size, and family composition; provides program information for tenants; notifies applicants when they are ineligible.

Provides relocation assistance and resolves problems concerning payments, living conditions of housing units and adherence to program guidelines.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of rules and regulations for Section 8 New Construction and Substantial Housing Programs.

Knowledge of reports, forms, and documents required in the area of assignment.

Knowledge of the content and meaning of items on lease agreements.

Knowledge of departmental policies and procedures pertaining to the field auditing of Section 8 New Construction and Substantial Housing Programs.

Knowledge of public relations principles and techniques.

Ability to interpret and apply rules and regulations pertaining to Section 8 New Construction and Substantial Housing Programs.

Ability to monitor program compliance by owner and tenant to assure that there are no overpayments or underpayments.

Ability to prepare and submit reports.

Ability to keep informed on current rules and regulations in the area of assignment.

Ability to assure that lease agreements are complete and accurate.

Ability to determine eligibility for special housing programs.

##### NATURE OF WORK

This is paraprofessional work determining continued program eligibility in compliance with federal regulations for the Miami-Dade Public Housing Agency.

Employees in this class are responsible for interviewing participants for Private Rental Housing Operations including the Housing Choice Voucher Program (HCVP or Section 8), portability programs, moderate rehabilitation and other subsidized programs such as the Family Self Sufficiency Program and the Homeownership Program. Responsibilities include briefing applicants and landlords on rules and regulations; verifying family income; preparing case records; initiating inspections; scheduling orientation; preparing payment and income statements; conducting annual re-examinations; determining appropriate bedroom size and other occupancy activities for various housing programs. Some independent judgment is exercised in assuring tenants and landlords comply with program requirements. Supervision is received from an administrative superior who reviews work in progress and upon completion and assists with difficult or unusual problems

##### ILLUSTRATIVE TASKS

Schedules and interviews tenants, existing landlords and prospective rental property owners and examines data to ascertain and determine continuing eligibility for housing assistance.

Provides guidance and assistance to all customers regarding federal housing regulations and policies of the Housing Choice Voucher and other housing programs.

Verifies through third parties and through the Enterprise Income Verification (EIV) system and other verification systems, demographic and financial information, including employers, financial institutions, and government agencies, to determine earned and unearned income; assures citizenship, veterans and disability statuses for document completion.

Reviews initial leases, contracts and requests for lease approval including calculation of annual income and adjusted annual income, applicable utility allowances/reimbursements, participants' Total Tenant Payment (TTP) and landlords' Housing Assistance Payment (HAP); prepares and executes the HAP contract by signing the contract on behalf of Miami-Dade County; coordinates inspection between owner, tenant and inspections unit.

Offers initial contract rents with landlords and/or managers for housing units enrolled in rental subsidy and other affordable programs and processes rent increase requests as required.

Enters data in a net-worked, centralized automated housing software system and maintains hard copies of documents, including originals.

Conducts tenant re-examinations and rent adjustments on an annual basis to verify tenant's income in order to adjust tenant rental calculation, housing assistance payments and utility allowances.

Reviews lease continuations including computation of utility allowance, tenant rent and housing assistance payments; coordinates inspections between owner, tenant and inspections unit.

Conducts initial certification into the applicable Section 8 program to verify that applicant information is in compliance with program regulations governing tenant eligibility such as non-citizen rules and income limits.

Performs family move-ins or transfers; conducts change of dwellings to include verification of leases and owner and tenant compliance with

### PHCD Housing Specialist (003440)

the United States Housing and Urban Development (U.S.HUD) housing assistance contracts to include tenant damages, outstanding tenant rents and other U.S.HUD requirements; enters data for tracking of Expedited Payment Process to landlord.

Completes and reviews Request for Tenancy Approval (RFTA) for accuracy and sufficiency and approves the lease in accordance with federal and state rules and regulations and local policies and procedures; submits recommendations for termination for supervisor's review.

Performs Change of Ownership, to include approval of new owner and assignment of the HAP contract to the new owner.

Maintains a permanent caseload of clients.

Conducts fraud prevention and reports any fraud or appearance of misuse to the appropriate authorities.

Requests and checks Housing Quality Standards (HQS) Inspections for initial leasing activities; verifies status of HQS inspections for annual re-examinations and rent increase requests.

Researches property taxes and ownership; maintains copies or originals for filing.

Receives portable certificate and voucher holders from other districts; contacts initial housing agency in order to coordinate the transfer of family work papers and the arrangement of family qualifications under U.S.HUD guidelines.

Conducts public surveys for the Section 8 Housing Certificate Program to determine average rent for units in the area and negotiate accordingly.

Monitors status of outstanding vouchers, and other transactions, such as rent adjustments, change of ownership, annual re-examination and rent increases; generates reminder notices and other notices of established deadlines and takes corrective actions for missed deadlines.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of USHUD rules and regulations as well as MDPHA policies and procedures.

Knowledge of the rules, regulations and procedures of the Housing Choice Voucher Program.

Knowledge of the forms, reports and schedules used in the Housing Choice Voucher Program.

Knowledge of the content and meaning of information on residential leases and contracts.

Knowledge of public relations principles and techniques.

Knowledge of the geography of the local metropolitan area.

Ability to negotiate leases and contracts in accordance with Housing Choice Voucher Program guidelines and regulations.

Ability to perform arithmetic calculations quickly and accurately.

Ability to review complex lease and contract documents and assure their completeness.

Ability to monitor lease agreements for compliance with Housing Choice Voucher Program regulations and guidelines.

Ability to understand and carry out complex oral and written instructions.

##### NATURE OF WORK

This is supervisory work in the provision of housing for families and individuals qualifying under the guidelines of the Housing Choice Voucher Program (HCVP or Section 8).

An employee in this class is responsible for supervising and coordinating the work of staff engaged in eligibility determination and selection of families and individuals for public housing. Emphasis of the work is on coordination of the processes of intake, determination of applicant eligibility, explanation of general leasing requirements and reaching of applicants as vacancies occur in accordance with established procedures and guidelines. Responsibilities include overseeing orientation of first time owners and tenants, and dissemination of information regarding program inquiries; supervision of staff; selection and training of new employees; preparation of reports for management; implementation of new Miami-Dade Public Housing Agency (MDPHA) regulations to meet eligibility requirements; supervision of annual re-inspections; and mediation of informal tenant and owner grievances and reviewing claims for damages/vacancy loss paid for by MDPHA. Duties require the use of considerable independent judgment to assure that regulations and priorities are followed. Supervision is exercised over a staff of paraprofessional and clerical subordinates by the assignment and review of work in progress and upon completion for compliance with regulations and procedures. Supervision is received from an administrative superior who evaluates work through personal inspection, analysis of written reports and conferences for conformity with established policies and procedures.

##### ILLUSTRATIVE TASKS

Supervises and implements all aspects of tenant selection per established eligibility requirements for selection of low income families under the guidelines of the Housing Choice Voucher and Moderate Rehabilitation Programs; oversees the orientation of first time owners and tenants, and the dissemination of information regarding program inquiries.

Supervises and coordinates the work of a group of subordinate paraprofessional and clerical staff to ensure that the work is performed in an accurate and efficient manner to include the review of all Requests for Tenancy Approvals, Housing Certificate/Vouchers and Determination of Family's Income Status; selects and trains new employees and evaluates their performance.

Prepares and submits monthly and quarterly reports to superiors regarding unit activities under the Housing Choice Voucher and Moderate Rehabilitation Programs; reviews monthly reports concerning survey and certification of Section 8 housing tenants.

Implements new MDPHA regulations and monitors their application in order to meet eligibility requirements under the Housing Choice Voucher and Moderate Rehabilitation Programs.

Supervises the coordination of the annual re-inspections in conjunction with the inspections unit.

Mediates informal grievances with owners and tenants; review claims for damages/vacancy loss that are paid by MDPHA.

Recommends changes in tenant selection policies and procedures to increase productivity.

Makes recommendations regarding hiring, discipline or promotion of subordinates; authorizes leave; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

### PHCD Resident Services Coordinator (003534)

#### Minimum Qualifications

Bachelor's degree. Three years of administrative experience in providing housing related assistance is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative work providing support to the Resident Services Division to affectively address the needs of residents of multi-family rental housing complexes.

An employee in this class is responsible for performing a variety of duties in response to the needs of residents of multi-family rental housing complexes. Responsibilities include planning, designing, implementing and enforcing Section 3, minority, women and disadvantaged business enterprise compliance programs and procedures; monitoring agency and contractor compliance with federal equal opportunity requirements in contracts and funding awards; and promoting resident services programs to include community outreach and crime prevention. General supervision is received from an administrative superior who reviews work for conformity with established policies and procedures and attainment of desired objectives.

##### ILLUSTRATIVE TASKS

Provides support to the Resident Services Division to effectively address the needs of public housing residents; maintains referral relationships with local service resource agencies to assist residents; provides referral support to residents identified as being in jeopardy of eviction; establishes contact with new and existing residents to explain resident services programs.

Assists residents to facilitate tenant meetings, community-organizing activities, and social activities; identifies and assesses individual and family needs and informs residents of available resources to assist them; develops supportive professional relationships with residents to enhance their quality of life and promote self-sufficiency; coordinates training to ensure effective implementation of outreach and compliance activities.

Administers the planning, designing, implementation and enforcement of Section 3, minority, women and disadvantaged business enterprise compliance programs and procedures; coordinates with departmental procurement to monitor applicable County contracts with Section 3 requirements; ensures compliance is met by recipients and sub-recipients of United States Department of Housing and Urban Development (USHUD) funding; expands contracting, training and employment opportunities to low income residents of federal housing and to other low income residents of Miami-Dade County.

Coordinates with the PHCD Facilities and Development project team and departmental procurement on all construction projects to meet Section 3 program requirements for economic opportunities for minority and women owned businesses to include training, employment and contracting goals; attends outreach meetings with former Scott Carver residents and all pre-bid meetings; coordinates interagency workshops with residents and contracts and oversees development of agency Section 3 contracting opportunities.

Works in partnership with police departments to assist neighborhood associations and residences with crime prevention techniques and strategies to better organize neighborhood resources against crime; discuss changes within communities with the residential liaison and various police departments.

Acts as the liaison between the MDPHA and police department's community relations officer, Crime Watch programs, Crime Stoppers, Weed & Seed groups and the Family Safety-Net First Responders Service Partnerships.

Makes recommendations to improve crime prevention activities within housing developments; coordinates with police departments and develops crime prevention task forces and emergency response teams; assists police departments in preparing reports related to crime statistics; creates crime tools for residents; coordinates crime prevention meetings and trainings with the neighborhood crime prevention liaison; reviews and screens all referrals received and routes them to the Section 8 program manager or to the PHCD Investigator.

Initiates and conducts special investigations of public housing residents accused of omitting material facts which resulted in the payment of program funds in violation of fund requirements; assists with investigations of alleged fraud or wrong doing by PHCD employees to include interviewing employees and public housing residents; prepares written reports related to crime prevention task force activities for submission

Three years of experience in the building construction field to include experience in cost estimating, construction plans interpretation, job inspection and materials evaluation are required. Completion of coursework in Engineering, Architecture or Construction Technology may substitute for required experience on a year-for-year basis to a maximum of two years. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is field work in the investigation, inspection and cost estimating for housing rehabilitation in a neighborhood renewal program. Employees in this class are responsible for making physical inspections of housing units to determine structural soundness and the extent of work required to meet prescribed housing standards and codes. Work involves the preparation of cost estimates for rehabilitating, remodeling and improving properties as well as assisting in the determination of design and materials to accomplish the work. Duties require the use of judgment and technical knowledge in the inspection of improvements in progress and upon completion to insure that all work meets approved plans and specifications and that materials and workmanship are acceptable as prescribed by contract. Work is performed independently in the field, with assignments and directives received from a superior inspector who reviews progress reports for compliance with local and federal requirements and assists in unusual or difficult rehabilitation projects.

##### ILLUSTRATIVE TASKS

Conducts property surveys to determine the condition of structures and the extent of work required to meet renewal standards.  
Advises on feasibility of bringing properties up to project requirements based on final surveys, modernization costs and livability standards prescribed for neighborhood development programs.  
Develops design proposals, makes cost estimates for remodeling and related property improvements; suggests materials to be used and assists owners in obtaining reasonable bids for the proposed work.  
Examines architectural drawings, improvements plans and specifications, reviews submitted cost estimates and evaluates for property owners.  
Inspects rehabilitation work in progress to insure compliance with plans, specifications and appropriate building codes; determines the acceptability of workmanship and materials; makes final inspection and certifies that job is complete.  
Cooperates closely with other rehabilitation personnel, advising on tentative designs of typical improvements for guidance and informational purposes.  
Maintains inspection records and reports, initiates various notification letters and conducts necessary correspondence.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the various building trades including construction, modification and repair methods and techniques.  
Knowledge of the various property rehabilitation requirements in renewal project areas.  
Knowledge of construction inspection techniques sufficient to detect faulty workmanship, materials and compliance with plans and specifications.  
Knowledge of construction estimating including labor, materials, equipment and design alternatives.  
Knowledge of local building and housing codes.  
Ability to determine the feasibility of property rehabilitation and to calculate accurate cost proposals.  
Ability to explain renewal requirements to contractors, engineers, architects and various tradesmen engaged in rehabilitation work.  
Ability to deal with the public tactfully and to provide information and assistance as requested.  
Ability to perform field assignments with a minimum of supervision in all types of neighborhoods.  
Ability to keep simple records and submit accurate reports of field inspection.

### PHCD Purchasing Specialist (003546)

#### Minimum Qualifications

High school diploma or GED. Three years of large-scale purchasing and contract management experience involving a variety of commodities are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized work administering and managing the procurement process of commodities and services for the Procurement Section of the Miami-Dade Housing Department.

Employees in this classification are responsible for specialized and general commodities contract, scope development and compliance with Administrative Order 3-38, as well as fiscal adherence. Responsibilities typically include managing and administering contracts to include budget administration, RFP scope development, RFQ scope development, RFI information request, contract Bid Waivers, Sole Source contracts and one-time purchase order requisitions/contracts, Emergency Purchase Orders and processing small purchase orders. General supervision is received from an administrative superior who reviews work for conformity with established County administrative orders and departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Develop contract methods and strategies to ensure goods and services are available to facilitate operation of the department.

Coordinate with end users to establish needs, including modifications to existing contract items awarded, contract specifications and annual dollar contract allocation requirements.

Conducts Market Research for items not available on expiring contracts, this including sole source vendors, obtains required documentation and prepares justifications for the Department of Procurement Management (DPM) to pursue contract requirements, meets DPM staff to complete specialized purchasing requirements for the department.

Reviews various other contracts which may be required by end users to meet department needs including reviewing of state contracts, other county contracts as well as the ability of accessing other jurisdictions contracts.

Oversee the overall usage of small purchase orders for a commodity to ensure that commodity usage does not exceed the designated amount for the fiscal year.

Respond to departmental inquiries as to proper methods for purchases and interpretation of contracts; provides a bid summary and award sheet to staff as to contract usage;

Responds to all bid reviews upon contract OTR term; to include preparing a usage trend analysis, request contract term allocations. Issues Release Purchase Orders against Blanket Purchase orders through ADPICS (Advanced Purchasing Inventory Control System); print and mail purchase order releases to the awarded vendor and operational sites.

Maintain on going communication DPM to secure contracts, conduct quarterly review of upcoming expiring contracts and works with DPM to secure a contract extension or emergency BW to ensure that there is no service interruption.

Develop training programs and facilitate the required training for departmental staff related to purchasing procedures to ensure that proper procurement methods are exercised.

Work with DPM on accessing other contracts and establishing emergency purchase orders during critical times such as hurricanes or other types of emergencies.

Perform related work as required.

##### NATURE OF WORK

This is advanced technical field and office work with supervisory responsibility in the acquisition of property and leasehold interests and in the disposition of excess property for the county.

Employees in this class are responsible for complex work assignments in conducting negotiations for the acquisition of real property and leasehold interests and in disposing of surplus county property. Emphasis of the work is on the responsibility for major acquisition projects or leasing functions and includes assuring clear title to acquired properties and appropriately executed lease agreements. Related responsibilities include planning, assigning and reviewing the work of subordinate employees engaged in negotiations for the acquisition of property and leasehold interests for the county and for the leasing of county property to other organizations. Incumbents exercise considerable independent judgment, tact and persuasion in negotiating the acquisition of properties and lease agreements, and in assuring that work is performed in accordance with various departmental, state and Federal requirements. Supervision is exercised over subordinate technical employees through assignment of projects and provision of assistance with difficult or unusual problems. General supervision is received from an administrative and technical superior who establishes work priorities and reviews the status of work progress and upon completion for attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate technical employees engaged in conducting negotiations for the acquisition of land, rights-of-way and other real property; assists with difficult or unusual problems; provides continuous training in work methods, procedures and the application of local, state and Federal rules, regulations and laws.

Prepares parcel files, verifies ownership of real property and interests of other parties and physically inspects property to be acquired; reviews title information, maps, engineering plans and appraisal reports; schedules and attends preliminary meetings with owners to advise them of the proposed purchase of the property and notify owners of their rights to compensation and relocation assistance.

Determines what legal documents are required in order to obtain clear title to property being acquired; prepares documents; conducts tax searches and requests necessary warrants for disbursement at closing.

Provides assistance and advice to businesses, owners or tenants that must be relocated due to complex property acquisitions.

Conducts negotiations on complex acquisitions of real property involving large parcels or property of a large monetary value through personal and telephone contacts and correspondence to achieve the amicable acquisition of property rights.

Schedules, attends and conducts closings with owners, their representatives and other interested parties; assures that clear title is properly conveyed to the county; collects monies due from owners and disburses monies to owners and other persons; obtains required signatures on various documents; attends and supervises closings held by subordinates and assures that clear title to property is acquired.

Processes all legal instruments obtained at closing for recording of transaction and transmits all funds collected to appropriate authorities; notifies department that initiated request for purchase of property that property has been acquired.

Plans, assigns and reviews the work of subordinates engaged in negotiations to lease property for county use or lease county property to other organizations and a variety of related property management activities.

Supervises and conducts field inspections and surveys of properties which may be suitable for leasing by the county.

Schedules, conducts and supervises negotiations for leasehold interests and for the leasing of county property to other organizations; provides assistance to various departments in interpreting provisions of lease agreements and resolves disagreements.

Conducts studies and prepares reports concerning the disposition of surplus county owned properties; prepares necessary legal documents to advertise for bids and transfer title to the highest bidder.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on job related problems; evaluates and rates employee performance.

Performs related work as required.

### Real Estate Officer (003556)

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the legal instruments and documents used to convey property ownership.  
Thorough knowledge of the legal procedures required to convey property ownership.  
Thorough knowledge of Federal, state and local laws effecting the conveyance of property ownership.  
Thorough knowledge of departmental policies and administrative procedures governing the preparation of legal instruments.  
Thorough knowledge of the methods and techniques of conducting real estate negotiations.  
Considerable knowledge of the content and meaning of items on lease agreements.  
Considerable knowledge of land values and land use characteristics.  
Knowledge of supervisory principles and practices.  
Knowledge of public records relating to real estate transactions.  
Knowledge of relocation assistance program plans.  
Ability to use tact and persuasion in the negotiation of complex property acquisitions and leasehold interests.

Bachelor's degree in Real Estate, Business Administration, Public Administration, or a related field. Must possess a State of Florida Real Estate Salesperson license or State of Florida Real Estate Broker's license. Four years of experience in the sale, acquisition, or appraisal of real estate are required. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical and supervisory work with administrative responsibility in the acquisition of property and rights-of-way for the county.

An employee in this class is responsible for planning, assigning and reviewing the work of subordinates engaged in conducting negotiations for the acquisition of real property and rights-of-way. Emphasis of the work is on coordinating the acquisition of a variety of parcels of real property required for local public works projects, coordinating activities with various local and state organizations, and assuring compliance with local, state and Federal laws and regulations. Supervision is exercised over subordinate technical employees through assignment of work projects and provision of assistance with difficult or unusual problems. Supervision is received from an administrative and technical superior who provides engineering data upon which acquisition activities are predicated and who holds the incumbent responsible for the attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of technical subordinates engaged in conducting negotiations for the acquisition of land, rights-of-way and other real property and for the sale of county owned real property; assists with difficult or unusual problems; recommends possible changes in roadway alignments in order to achieve more economical acquisition of rights-of-way.

Provides training and instruction to staff members in techniques of analyzing title information and appraisal reports, applying various local, state and Federal rules, regulations and laws to acquisition activities, conducting negotiations, preparing closing statements, and maintaining proper documentation.

Supervises the preparation of parties of interest information for use in eminent domain proceedings; attends settlement conferences in eminent domain suits.

Supervises and coordinates activities involving relocation assistance for businesses, owners or tenants that must be relocated due to property acquisitions; supervises preparation of relocation plans for residential and business properties, and supervises activities of property management until displaced families are relocated and demolition is

accomplished.

Assists in the selection of sites for various county functions; supervises real estate acquisition activities necessary to fulfill real estate needs of various county departments.

Confers with various departmental officials and other local and state public officials in matters pertaining to property acquisition, dedication and condemnation proceedings; represents the department at various public hearings to explain acquisition policies and procedures involving county projects.

Completes budget requests and prepares periodic project progress reports.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on job related problems; reviews performance evaluations prepared by subordinate supervisors; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of departmental goals and objectives related to the acquisition of real property and rights-of-way.

Thorough knowledge of the legal instruments and documents used to convey property ownership.

Thorough knowledge of the legal procedures required to convey property ownership.

Thorough knowledge of Federal, state and local laws effecting the conveyance of property ownership.

Thorough knowledge of departmental policies and administrative procedures governing the preparation of legal instruments.

Thorough knowledge of the methods and techniques of conducting real estate negotiations.

### CA&HSD Weatherization/Maintenance Supervisor 2 (003728)

#### Minimum Qualifications

High school diploma or GED. Five years of building maintenance, construction or rehabilitation experience including one year in a supervisory capacity are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory work in directing weatherization and maintenance activities for the Community Action Agency.

An employee in this class is responsible for supervising, through subordinate supervisors, the work of subordinates engaged in the weatherization or rehabilitation of dwelling units, and in the repair and maintenance of departmental buildings and equipment. Responsibilities include supervising subordinate supervisors and directing field activities, monitoring the completion of home repairs or maintenance work, ensuring that facilities are properly weatherized, repaired or maintained, estimating material and labor requirements, and enforcing established safety practices and procedures. The incumbent exercises independent judgment in the scheduling and execution of rehabilitation and maintenance projects to achieve program goals. Supervision is exercised through subordinate supervisors over a staff of trades employees, mechanics and laborers performing a variety of weatherization and maintenance tasks. Supervision is received from an administrative superior who reviews work for effectiveness of weatherization, maintenance and rehabilitation activities.

##### ILLUSTRATIVE TASKS

Supervises, through subordinate supervisors, the work of trades employees, mechanics and laborers engaged in weatherization, rehabilitation, and maintenance activities.

Schedules approved homes to be weatherized or rehabilitated in accordance with programmatic goals and established priorities.

Monitors completion of homes to ensure work is performed in accordance with building codes and program guidelines.

Attends meetings and training sessions to enhance knowledge of current weatherization techniques.

Attempts to resolve conflicts between clients and employees concerning work performed at client's home.

Schedules, plans and assigns rehabilitation and maintenance projects according to building maintenance priorities and requirements; directs periodic preventive and corrective maintenance of departmental buildings, machinery and equipment.

Inspects departmental facilities to determine if requested work has been completed and is satisfactory to building occupants; ensures work is in compliance with current construction standards and building codes.

Enforces established safety practices and procedures.

Makes recommendations for building repairs and improvements; estimates labor and material requirements; purchases equipment and supplies.

Expedites emergency building maintenance repairs which interfere with departmental operations or pose a danger to employees or the public. Trains supervisors, crew leaders and employees in work techniques and standards, and in proper completion of reports.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of standard practices, methods, tools and materials of the construction trades.

Considerable knowledge of weatherization techniques applicable to residential housing units.

Considerable knowledge of supervisory principles and practices.

##### NATURE OF WORK

This is job development and related work in finding and creating job opportunities for enrollees and applicants in a job training and employment assistance program.

Employees in this class are primarily responsible for developing job opportunities through personal and telephone contacts with various employers in business, industry and government. Emphasis of the work is on keeping informed on local labor market conditions, maintaining contact with counselors to help assess enrollees' employment needs and provide guidance in making contacts with employers, and finding or developing job opportunities of various occupational types. Some employees in this class may also be assigned responsibility for encouraging employers in the development of subcontracts for job training. Incumbents may be assigned to job training centers or programs. Work is performed under the general supervision of an administrative or professional superior who assigns work, assists with unusual problems and evaluates completed work for effectiveness of results through conferences and written reports.

##### ILLUSTRATIVE TASKS

Develops contacts with business, commercial and industrial firms by personal visit and telephone to obtain job openings in occupational areas that correspond to the occupational training enrollees are receiving.

Keeps informed on labor trends and job openings in the local labor market area through visits, telephone contacts, office reference listings and other sources; refers to office records and makes telephone calls to determine positions that are currently available.

Keeps supervisor informed of local labor market conditions and results of job development efforts.

Discusses employment needs of enrollees with counselors and other staff members to identify occupational areas in which to concentrate job development activities; meets with enrollees to identify employment needs.

Writes orders for jobs found while in the field; completes records of field contacts in developing job openings and other records.

Contacts nonprofit agencies and governmental organizations to explain the job training program and obtain written agreement to use existing job openings for training enrollees; discusses areas of training that would be beneficial to enrollees with possibilities of developing employment that would provide upward career mobility; discusses creation of a training program to run concurrently with enrollee academic training.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of employer locations, government organizations and job openings in the area assigned.

Considerable knowledge of appropriate techniques and methods in the development of job openings.

Knowledge of labor market trends and conditions in the area of assignment.

Knowledge of established job training program procedures in job referral and placement of enrollees and applicants.

Ability to achieve rapport with employers in order to develop job openings and career ladders for enrollees and applicants.

Ability to keep informed on local labor market trends and conditions in the area assigned.

Ability to work effectively with other staff members to assist enrollees and applicants in achieving job placement objectives.

Ability to prepare records and reports on a timely and complete basis.

Ability to express ideas and information clearly and concisely, both orally and in writing.

#### NATURE OF WORK

This is professional assessment, career development work in a job training and employment program.

Employees in this class are responsible for recruiting, interviewing, evaluating and placing participants in training and employment programs both in the private and public labor market sectors. Emphasis of the work is on the recruitment and development of meaningful training and employment opportunities consistent with the needs of the population served and performing administrative and counseling tasks which require the maintenance of program and participant records. Work is performed under the supervision of an administrative superior who assigns and reviews work for adherence to Federal, state and local requirements.

#### ILLUSTRATIVE TASKS

Interviews applicants to determine eligibility for services; reviews applications for completeness; obtains additional information regarding work experience, education, employment and previous training experience(s) as needed.

Administers a variety of occupational and assessment tests to determine applicants' interests, abilities and skills; scores tests, interprets test result to formulate realistic career development plans, discusses test results with applicants; develops Employability Development Plans.

Refers eligible applicants to educational, vocational and/or employment programs; monitors the progress of enrolled participants through on-site visits and conferences; conducts group counseling sessions and provides individual counseling sessions as needed.

Determines enrollees supportive service needs and refers enrollees to appropriate social service agencies.

Develops contacts with private and public training and labor market sectors to secure training and employment opportunities through contractual agreement; implements appropriate sales techniques in recruiting employers to hire and train program enrollees.

Develops employment opportunities which are consistent with the level and type of training opportunities provided; explains program objectives to potential enrollees and service providers.

Actively recruits potential enrollees through a variety of public relations activities and campaigns.

Prepares various programmatic and statistical reports.

Maintains current documentation of daily activities, counseling forms and available placement opportunities.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of federal, state and local regulations which govern the recruitment, selection, evaluation and placement of targeted groups in training and employment programs.

Knowledge of established policies and procedures which govern the maintenance of program and participant records.

Knowledge of counseling techniques utilized in identifying and analyzing educational, supportive services and employment needs.

Knowledge of a variety of occupational inventories and tests, scoring methods and interpretation of results.

Knowledge of social service referral agencies in Dade County.

Ability to evaluate the current labor market and training trends in Dade County.

Ability to achieve rapport with participants, targeted groups and a variety of professional members of the labor market industry to facilitate program objectives.

Ability to deal effectively with instructors, supervisors and employers in assigned areas.

Ability to assist participants exhibiting social or emotional problems and make appropriate referrals.

Ability to administer a variety of occupational inventories and tests and communicate results in a clear and concise manner.

Ability to express ideas and information in a clear and concise manner, verbally and in writing.

Ability to instruct a small to moderate size group in a variety of personal and self-development subject matter.

### Contracts Officer (003820)

#### Minimum Qualifications

Bachelor's degree. One year of experience in the preparation and administration of contracts is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional work in the preparation, award, monitoring and evaluation of contracts negotiated with various public or private agencies by county departments.

Employees in this class are responsible for performing various duties in the preparation, award, monitoring, evaluation and reporting of contracts negotiated between the county and private or other governmental agencies. Duties or combination of duties vary, depending on the department to which assigned. Contracts are typically those of a community service or community improvement nature funded by federal, state and local sources. Emphasis of the work is on assisting grant recipients in the preparation of applications, defining of program objectives and preparation of budget proposals, and on monitoring ongoing contracts from the fiscal and/or programmatic standpoints including preparation of required evaluation reports. Incumbents frequently visit agencies under contract, work closely with their personnel and coordinate monitoring assignments with departmental accounting officials responsible for the processing of reimbursement requests and maintenance of expenditure controls. Employees operate with considerable independence of action and exercise professional judgment in the advice and assistance furnished to grant recipients and in the evaluation of their performance. General supervision is received from a professional or administrative superior who assists in the resolution of difficult problems and reviews and evaluates completed work for timely service to agencies and conformance with departmental and funding source policies and objectives.

##### ILLUSTRATIVE TASKS

Keeps informed on the preparation of requests for proposals issued for potential grant recipients; assists in preparing specifications for proposals as assigned; reviews completed proposals and discusses projects being considered; makes recommendations for award of contracts to committees responsible.

Assists personnel in agencies under contract in establishing budgets, including staffing patterns, capital improvement, supply and other costs; advises on allowability of items and expenditures and requirements in presenting modifications of budgets during the contract year; works with grant recipients to establish or redefine goals and objectives in their programs.

Plans, schedules of monitoring visits to assigned offices on a systematized basis; reviews program and fiscal performance, following established monitoring policies and procedures; reviews percentage of client load in relation to goals, status of budget expenditures and other information, and completes required monitoring reports.

Reviews reimbursement requests from agencies under contract and authorizes or disapproves expenditures within established limits; authorizes transfer of budget expenditures from one object class to another within established procedures; forwards expenditure requests which require higher level approval; authorizes budget revisions within delegated authority.

Discusses with supervisors cases where agencies are not achieving contract performance goals, or are not following required procedures so that corrective action can be taken; identifies deficiencies and advises project directors of need for corrections.

Advises on provisions of various federal and state funding guidelines and program directives as well as departmental policies and procedures during the contract term; completes required evaluation reports before termination of contract; assists internal or external auditors as needed subsequent to contract completion.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of principles and practices of contract preparation and administration in federally funded programs.

Considerable knowledge of provisions of federal and state funding source guidelines relating to the application for, preparation and

Considerable knowledge of departmental policies, procedures and techniques in fiscal and program monitoring and evaluation of ongoing contracts.

Considerable knowledge of the detailed program and fiscal provisions of specific contracts assigned.

Knowledge of official county position classification specifications and the relationship between classes of positions.

Ability to furnish effective technical assistance to the public and agencies in the preparation of contract proposals.

Ability to plan appropriate staffing levels for grant recipients to achieve program objectives.

Ability to exercise sound judgment and apply departmental and funding source guidelines accurately in the preparation of budgets and monitoring of fiscal activities of grant recipients.

Ability to plan and schedule work so as to monitor assigned contracts as required by departmental and federal procedures.

Ability to evaluate programmatic activities of agencies under contract effectively and to readily discern ineffective performance.

Ability to deal effectively with departmental staff members, committee personnel, project directors and officials in agencies under contract.

Ability to communicate effectively, both verbally and in writing.

## Courts Auditor (004019)

### Minimum Qualifications

Bachelor's degree in Accounting. One year of professional experience in accounting or auditing of financial records for the judiciary is required. Must be eligible to take the State of Florida Certified Internal Auditor examination.

### Job Specifications

#### NATURE OF WORK

This is advanced professional auditing work with some supervisory responsibility for the Clerk of the Circuit and County Courts.

Employees in this class audit financial records of guardianship accounts and other financial records for the judiciary and the Clerk of the Circuit and County Courts. Responsibilities include performing complex auditing assignments, serving as a team leader in the conduct of small-scale routine audits of guardianship accounts, and reviewing verified inventories and annual financial returns as required by Florida Statute. Duties include reviewing and endorsing all accounting transactions filed in guardianship cases, and accounting transactions of a more complex nature in other divisions as required. Supervision is exercised over a staff of subordinate employees engaged in auditing and verifying the annual accounting of guardianship cases for compliance with court orders and generally accepted accounting principles. Supervision is received from a professional superior who reviews work for achievement of desired goals and objectives.

#### ILLUSTRATIVE TASKS

Supervises subordinate personnel engaged in conducting audits of financial records of guardianship accounts.

Reviews inventories of initial or annual guardianship reports and returns; verifies mathematical computations; reviews and conducts periodic audits of itemized listings of all personal and real property and values, physical location, encumbrances, liens and other secured claims, cash assets, income and safety deposit box inventory sheet; verifies that annual financial returns are procedurally and financially correct.

Assists in the interpretation of court orders regarding guardianship cases; monitors reports, inventories and plans for compliance with State law.

Monitors the filing of initial or annual guardianship reports and returns for compliance with filing schedules.

Provides financial statements and reports of all reviews to the Courts; requests court orders to secure documents and records of accounts for further review or use by a general or special master appointed by the Court.

Monitors filing and processing of bonds filed by guardians pursuant to Court Order; provides reports to the judiciary as required.

Assures that reports and substantiating documents and/or records obtained through Court Order are returned to guardian upon approval of the Court.

Determines direction and thrust of audit efforts and in planning the scope of audits.

Makes verbal and written presentations to the judiciary; discusses deficiencies and weaknesses in recordkeeping procedures.

Reviews procedures governing receipt and distribution of filing fees, statutory fees and other fee collections as authorized by law.

Prepares summarizes, schedules and supporting information for presentation to Administrative Judge as requested.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of generally accepted accounting principles and internal control systems applicable to the audit of governmental accounting systems.

### Courts Auditor (004019)

Considerable knowledge of the special principles, practices and procedures if auditing applicable to public finance and governmental accounting.

Considerable knowledge of the laws and regulations pertaining to accounting for guardianship cases in the judiciary.

Considerable knowledge of departmental rules and regulations of the Clerk of the Circuit and County Courts.

Knowledge of supervisory principles and practices.

Ability to plan, organize and direct efforts to achieve audit objectives.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to perform complex auditing assignments concerning guardianship accounts and other financial operations of the Clerk of the Circuit and County Courts.

Ability to exercise judgment and discretion in making sound auditing decisions.

Ability to prepare more complex accounting reports and statements.

Ability to make arithmetic calculations rapidly and accurately.

Ability to communicate clearly and concisely, verbally and in writing.

## Human Resources Department

### Courts Administrative Secretary (004053)

#### Minimum Qualifications

High school diploma or GED. Three years of secretarial or related word processing experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible secretarial and related clerical work for a division head or an exempt executive official in the County service.

Employees in this class perform a variety of complex secretarial and clerical duties for division directors or other comparable executive officials within the County organization. Emphasis of the work is on the performance of advanced secretarial duties requiring considerable knowledge of the executive's responsibilities and an understanding of the policies, programs, procedures and regulations in effect in the area of assignment. Duties typically include arranging for and attending conferences, independently answering inquiries where there is established policy or precedent action, taking and transcribing dictation, composing and typing correspondence and performing research to compile data for special reports and other purposes. Incumbents utilize a variety of office skills and considerable judgment in relieving the executive of administrative details. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work for accomplishment of desired objectives. General supervision is received from a division director or an executive official who reviews work for satisfactory performance of executive secretarial duties and for attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Performs secretarial and clerical duties for a division director or other comparable executive official; commits supervisor's time in making appointments and maintains calendar; maintains supervisor's itinerary and makes travel and hotel arrangements as required.

Arranges for and attends various conferences and meetings; informs participants and provides background information; serves as recording secretary at conferences, board meetings and staff consultations; takes official minutes and prepares reports of proceedings; follows through on actions required as a result of conferences.

Takes and transcribes dictation which may vary by subject matter including legal, technical, financial or other specialized terminology; takes verbatim transcript from telephone calls or in conferences as requested.

Opens, screens and distributes mail; marks important parts of instructions, orders and regulations for executive, and organizes mail according to priorities; maintains control of correspondence flow through office; insures that report deadlines are met and that all information distributed is complete.

Composes correspondence from verbal instructions of superior, and independently drafts replies to inquiries; reviews correspondence prepared by others for superior's signature to ensure correct grammar, format and completeness.

Receives and screens telephone calls and visitors; responds to requests for information by answering questions where there are established policies or regulations, or precedent actions taken by supervisor.

Plans, assigns and reviews the work of subordinate clerical employees engaged in typing reports, correspondence and other documents, filing, and performing a variety of other clerical duties; provides training in procedures and methods in the organization of assignment.

Researches and compiles data from a variety of sources in connection with special reports, budget preparation and other matters; assembles material for supervisor's reply to correspondence demanding superior's personal attention.

Keeps various activity and production records; types various activity reports, requisitions, work orders and personnel forms; composes reports on caseloads, workloads or other subjects as delegated; authorizes expenditures from petty cash; requisitions office supplies; performs arithmetic calculations for budget requests and other matters.

Assignments may include combat or rescue duty, staff training, fire prevention, inspection and enforcement activities, fire safety education, arson investigation and other fire safety functions. Work involves an element of personal danger and incumbents must be able to exercise leadership and independent judgment in combat and medical rescue situations under adverse circumstances. Supervision is exercised over subordinate firefighters assigned to a fire/rescue shift or to a fire support activity. Supervision is received from a senior fire officer who reviews work through personal conferences, inspections and conferences for adherence to departmental procedures and orders and for effectiveness in meeting assigned responsibilities.

##### ILLUSTRATIVE TASKS

Supervises, participates and supports a unit of firefighters in responding to various types of alarms in order to contain, suppress and/or extinguish fires, preserve life and property and to structure the nature of the department's response.

Participates in and oversees various types of rescue activities to assure the delivery of emergency medical services and establish and maintain control of an emergency scene.

Writes, compiles and reviews various narrative and statistical reports, logs and investigative studies in order to present findings, provide information, document work activities and equipment utilization, and justify and project needs.

Assigns and assists subordinates in cleaning and checking the condition of equipment, materials, supplies and property assigned to an operational unit to maintain appropriate inventory levels and operational readiness.

Inspects commercial, industrial, residential and public properties and structures, and fire hydrants in order to assure compliance with applicable fire codes, become familiar with lay-out of existing structures, write notices of violations and issue citations where necessary.

Conducts classroom and field training sessions concerning fire safety, fire suppression and emergency medical rescue activities.

Attends various meetings, conferences and training sessions to keep abreast of developments in the firefighting field.

Reviews plans and building permit applications to assure compliance with applicable laws, codes and ordinances.

Investigates undetermined, suspicious and incendiary fire scenes to determine point of origin, causes of the fire and to gather data relevant to preventing recurrences.

### Fire Lieutenant (004105)

Disseminates fire and emergency medical rescue information through public speaking engagements, media presentations and tours of fire facilities to promote awareness of fire hazards, fire prevention practices and departmental operations.

Counsels subordinates on work related problems; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of modern firefighting and fire prevention techniques, practices and methods.

Considerable knowledge of modern emergency medical rescue techniques, practices and methods learned through training.

Considerable knowledge of the operation and general maintenance of the various types of apparatus and equipment used in firefighting and emergency medical rescue work.

Considerable knowledge of fire safety regulations, codes and ordinances.

Knowledge of the geography of the Miami-Dade County geographical area.

Knowledge of supervisory principles and practices.

Knowledge of the fundamental principles of hydraulics.

Knowledge of departmental regulations and procedures.

Knowledge of the various methods and styles of leadership.

Ability to lead a group of firefighters in combat situations or emergency medical rescue activities under adverse conditions.

Ability to supervise subordinate firefighters in a manner conducive to full performance and high morale.

Ability to react promptly and correctly in emergency situations.

Ability to assess a situation; draw valid conclusions and take appropriate action.

Ability to read, retain and apply guidelines, regulations and policies to a variety of situations.

Ability to understand and carry out verbal and written instructions.

Ability to work together with others as part of a team.

Ability to use basic hand and power tools.

Ability to read, interpret and comprehend diagrams, charts and gauges.

Ability to train subordinates in various specialized techniques of firefighting and fire prevention.

Ability to explain pertinent provisions of laws, codes and regulations to citizens, businessmen and other officials and enforce fire safety laws with firmness, tact and impartiality.

Ability to maintain records and prepare clear and concise reports of activities.

Physical strength and agility sufficient to perform assigned duties including physical tasks requiring sustained effort.

REV 12/98

#### **Nature Of Work**

This is supervisory work in the protection of life and property through the provision of firefighting and emergency medical rescue services or in specialized fire service functions.

The written examination will evaluate knowledge in fire science, apparatus and equipment, emergency medical techniques, policies and procedures, basic management and supervisory practices, and labor relations. Copies of the 2008 Reading List and study materials are available at the Miami-Dade Fire Rescue Department, Training and Safety Division, Monday through Friday, 8:00 (0800) a.m. to 4:00 (1600) p.m., excluding holidays, from Monday, September 8, 2008 through Tuesday, November 18, 2008. In order to sit for the promotional examination, all applicants must apply on-line at [www.miamidade.gov/jobs](http://www.miamidade.gov/jobs) from Monday, September 8, 2008 through Thursday, November 6, 2008. Only those individuals deemed unqualified to take the examination will be notified in writing by the Miami-Dade County Human Resources. Applicants deemed qualified will receive no further notification and are to proceed to the examination as scheduled. Preference will be given to veterans and spouses of veterans, when applicable. Seniority points will be added to the scores of Miami-Dade County employees qualifying on the competitive examination at the rate of .02308 per pay period of continuous, satisfactory, full-time service in the class indicated on this announcement to a maximum credit of ten years or six points. Location of examination: Florida International University, Roz and Cal Kovens Conference Center, Room 214, 3000 NE 151 Street, Miami, Florida. Date of examination: Wednesday, November 19, 2008. Registration time: 8:30 a.m. to 9:15 a.m. Doors to the test facility will be closed promptly at 9:15 a.m. No one will be admitted for registration after the doors to the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination. Make-up requests must be submitted in writing through the applicant's chain of command to the Miami-Dade County Human Resources, Testing and Validation Section, prior to the written examination.

## Human Resources Department

### Fire Captain (004110)

#### Minimum Qualifications

Currently employed by Miami-Dade County as a Fire Lieutenant with permanent status and three years of continuous full-time service as a Fire Lieutenant with Miami-Dade County immediately preceding the examination date. Must be certified by the State of Florida as a firefighter in accordance with F.S. 633.35. Time served in an equal or higher uniformed Miami-Dade Fire Rescue Department exempt classification since beginning probation as a Fire Lieutenant will be counted towards the three continuous years minimum requirement and will be considered as continuous full-time service as a Fire Lieutenant. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period to be eligible for the examination.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in the protection of life and property through command of a fire/rescue battalion or in specialized fire service functions.

Employees in this class are responsible for supervising the operation of firefighting and emergency medical rescue services in an assigned geographical area or performing specialized fire service activities such as fire prevention, fire alarm and logistical functions. Duties include traveling among fire/rescue stations to monitor operations, deploying firefighters, apparatus and materials at major fire scenes, commanding firefighters in the combat of fires and performing a variety of tasks to assist in the administration of a metropolitan fire department. Work involves an element of personal danger and incumbents must be able to exercise leadership and considerable independent judgment in combat and medical rescue situations under adverse circumstances. Supervision is exercised over Fire Lieutenants and Firefighters assigned to a group of fire/rescue stations or to subordinates assigned to a fire support activity. General supervision is received from a senior fire officer who reviews work through personal conferences, analysis of activity reports and inspection of personnel and equipment for the efficient and effective accomplishment of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Coordinates and supervises the operations of a battalion's firefighting and emergency medical rescue services or a specialized staff to deliver fire and emergency medical services or support field operations.

Deploys firefighters, apparatus and materials at major fire scenes and participates in firefighting activities in order to contain, suppress and extinguish fires and preserve life and property.

Assists in supervising emergency medical rescue services to assure efficiency in operations, adherence to legal and medical restraints and to provide effective procedural guidance for daily operations.

Consolidates, examines and composes narrative and statistical reports, logs, budget recommendations, correspondence and research summaries to present findings, provide information and substantiate needs.

Provides testimony as an expert witness to establish the chain of evidence, explain departmental objectives, directives and actions, and assist in the judicial and investigative process.

Attends various meetings and conferences to exchange, obtain and update information, establish or reestablish contacts and to explain departmental operations and policies.

Reviews plans, building permit applications, plats and water main extension plans to assure compliance with county fire codes, fire flow ordinance and other applicable rules and regulations.

Develops, directs and evaluates firefighting and emergency medical rescue training programs.

Makes recommendations regarding training and discipline of subordinates; reviews performance reports prepared by subordinates and rates

### Fire Captain (004110)

employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of modern firefighting and fire prevention techniques, practices and methods.

Thorough knowledge of modern emergency medical rescue techniques, practices and methods.

Thorough knowledge of the operation and maintenance of the various types of apparatus and equipment used in firefighting and emergency medical rescue work.

Thorough knowledge of fire safety regulations, codes and ordinances.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of departmental rules, regulations, procedures and operations.

Considerable knowledge of the geography of the metropolitan area.

Knowledge of departmental standards, policies and objectives.

Knowledge of the fundamental principles of hydraulics.

Knowledge of the various methods and styles of leadership.

Ability to lead a group of firefighters and lieutenants in combat situations or emergency medical rescue activities under adverse conditions.

Ability to supervise groups of firefighters and lieutenants in geographically dispersed locations in a manner conducive to full performance and high morale.

Ability to react promptly and correctly in emergency situations.

Ability to assess a situation, draw valid conclusions and take appropriate action.

Ability to read, retain and apply guidelines, regulations and policies to a variety of situations.

Ability to read, interpret and comprehend diagrams, charts and gauges.

Ability to train subordinates in various specialized techniques of firefighting and fire prevention.

##### NATURE OF WORK

This is responsible supervisory work with administrative responsibility in the coordination of large scale combatant or supportive fire protection services.

Employees in this class are responsible for the command and deployment of personnel, apparatus, and equipment for on-scene firefighting activities. Employees in the class will serve as Battalion Chiefs and respond to alarms, assume on-scene command, and direct operations for fire suppression to include ensuring the operational readiness of all apparatus, equipment, and personnel. Employees in this class are also responsible for administering and directing major activities in fire suppression, fire prevention, arson investigation, communications, logistics, fire code enforcement, training and related functions. Work involves the application of nationally accepted principles and techniques of fire service administration, as well as local ordinances and departmental policies. An additional responsibility includes assisting with research and planning activities necessary for expansion of services and coordination of functions with local governmental fire fighting agencies. Supervision is exercised over subordinate line and staff officers by review of activity reports, personal conferences and inspection of operations for effectiveness and compliance with policy and directives. General supervision is received from a superior officer who reviews assigned responsibilities for efficiency and successful accomplishment of the mission.

##### ILLUSTRATIVE TASKS

Administers technical staff services carried out through the fire safety and fire alarm bureaus; supervises the periodic inspection of fire hazard areas; enforces fire safety codes; insures that communications control center is providing complaint and dispatch services according to a coordinated operations plan.

Administers combat support services including equipment for emergency and rescue activities; maintains fire hydrants and adaptors for use in interagency operations.

Supervises administrative functions of the department; coordinates departmental training and personnel administration; develops annual budget request and recommends equipment needed.

Coordinates and administers all fire suppression and rescue operations for the department; provides for continuity of services on all shifts in all districts protected by the metropolitan fire department.

Conducts assigned special research projects in areas such as hydrant and water pressure requirements for specified geographical areas including pumping equipment and electrical controls.

Provides for systematic inspection of all fire stations to determine compliance with directives and policies.

Assists department head with planning and feasibility studies on expansion of services, assistance to municipalities and combined effort with law enforcement agencies in disaster planning.

Prepares reports and recommendations on varied phases of departmental activities; cooperates with other governmental agencies as requested.

#### Job Specifications

##### NATURE OF WORK

This is emergency rescue work in the operation of rotary-wing aircraft in the Miami-Dade Fire Rescue Department.

An employee in this class is responsible for assisting the Fire Department Helicopter Pilot in pre-flight, in-flight, post-flight and emergency rescue mission operations on a twenty-four hour per day basis. Emphasis of the work is on assisting the Pilot in piloting, navigation, radio communications and emergency rescue activities. Responsibilities include responding to a variety of emergency rescue missions requiring air-ambulance service, hoist and sling-load operations, extrication of victims and patients from disastrous or threatening environments, and the transportation of patients and victims to appropriate trauma network facilities. Additional responsibilities include responding to firefighting missions and transporting authorized personnel, materials and supplies to aid in recovery or rescue efforts. Supervision is received from the Fire Department Helicopter Pilot who reviews work for efficiency and successful accomplishment of assigned missions.

##### ILLUSTRATIVE TASKS

Responds to alarms and assists the Fire Department Helicopter Pilot in the operation of rotary-wing aircraft in accordance with FAA Rules where applicable and in accordance with the type of situation found; assists in all pre-flight, in-flight and post-flight checks; and assists in the operation of rotary-wing aircraft in Instrument Meteorological Conditions (IMC) and in over-water situations.

Assists the Fire Department Helicopter Pilot in the operation of an Airborne Command Post (ACP); observes and reports conditions not visible from the ground at emergency incidents such as structural fires, grass fires and natural disasters.

Assists in the performance of a variety of emergency rescue operations; on-scene fighting and suppression of fires; provides emergency medical care; extricates victims from rooftops and inaccessible areas for transport to designated care facilities; uses water drop capability to hold fast moving fires or fires in inaccessible areas until ground units arrive; protects exposures; extinguishes fires; protects personnel and equipment trapped by fire; lays hose lines to inaccessible areas; and utilizes the night-sun for take-off and landing from confined areas, personnel safety and search purposes.

Assists in the performance of sling-load and hoist work operations.

Assists in transporting victims from incident sites to designated locations as determined by appropriate authority and patients from hospital-to-hospital and to specialized facilities such as decompression chamber, burn unit and spinal cord center on a case-by-case basis.

Assists in transporting blood and organs for critical recipients, high teams to attack fires in high rise buildings, triage teams and medical supplies and equipment to mass casualty situations, special agents such as METAL-X and SODA-ASH to hazardous materials incidents and delivers equipment and personnel to incident locations.

Assists in the maintenance of flight logs, maintenance records and the technical orders relative to the aircraft.

### Fire Department Helicopter Co-Pilot (004113)

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of piloting rotary-wing aircraft and the capabilities and performance characteristics of rotary-wing aircraft.

Knowledge of the requirements for flying under instrument flight conditions in adverse weather, at night and in off-site landing situations.

Knowledge of the operation and maintenance of the various types of apparatus and equipment used in firefighting and emergency medical rescue work.

Knowledge of modern firefighting and fire prevention techniques, practices and methods, departmental regulations, policies and procedures and fire codes and safety regulations.

Knowledge of first-aid principles and their application.

Ability to assist in the operation of rotary-wing aircraft in firefighting and rescue missions, under instrument flight conditions, in adverse weather conditions, at night and in off-site landing situations.

Ability to react promptly and correctly in emergency situations.

Ability to identify fire spread potential in buildings, open areas and conflagrations.

Ability to train in specialized techniques of firefighting and fire prevention.

Ability to maintain records and prepare clear and concise reports of activities.

Skill in piloting rotary-wing aircraft.

Physical strength, agility and ability to meet the high physical requirements necessary to become a firefighter and perform physical tasks requiring sustained effort.

##### NATURE OF WORK

This is highly responsible professional managerial work in planning and directing a variety of fire suppression, fire prevention, emergency and rescue activities, and administrative functions for the Miami-Dade Fire Rescue Department.

An employee in this class is responsible for directing, coordinating and supervising diversified divisional activities providing a variety of departmental fire-rescue services. Responsibilities include supervising and managing fire suppression, rescue and emergency medical services; air and water rescue operations; 911 dispatch center operations; telecommunications and information systems; public information and education; facility construction and maintenance; fire prevention; inspection and construction plan reviews; and county-wide emergency service operations. The incumbent exercises considerable independent judgment and professional managerial knowledge in directing divisional activities and assisting in formulating divisional policies. Supervision is exercised through subordinate levels of uniformed staff, managers and supervisors over subordinates with assigned responsibilities in various phases of operations. General direction is received from an Assistant Fire Chief who holds the incumbent responsible for the professional management of divisional operations and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Supervises and coordinates the management of fire suppression and rescue incident operations; takes command on major emergency incidents, provides mutual aid to other fire departments on building inspections issues, provision of air rescue support, and other specialized rescue services.

Directs the provision of fire rescue services for local airports and the management of the county's emergency medical service operations.

Plans and coordinates, through subordinate supervisors, dispatching activities of emergency fire suppression and medical rescue personnel via computer-aided dispatch system.

Supervises the investigation of fire incidents to determine the causes.

Administers fire prevention activities through the review of engineering building plans and systems, safety inspections and fire investigations.

Oversees and supervises the maintenance and purchasing of medical supplies and fire suppression equipment including fire trucks, uniforms and fire apparatus.

Supervises and manages the development and implementation of all training programs for all uniform personnel.

Directs the management of all facilities, including construction and building renovation.

Manages through subordinate supervisors, logistical services including procurement practices, fleet management and warehouse activities.

Directs the development of public safety education programs; acts as liaison to the Board of County Commissioners.

Meets with line and staff officers, managers and supervisors to discuss and resolve budgetary issues, reviews fire and rescue operations, evaluates legislative proposals, reviews policies and procedures, establishes or redirects priorities, and implements enhancements in departmental activities.

Directs and coordinates the development of divisional policies and procedures and the management of disaster preparedness and response

## Human Resources Department

activities at the local, national and international levels.

Ensures that goals and objectives for divisions are compatible with County policies and the needs of the citizens of Miami-Dade County.

Ensures compliance with all required local, state and federal regulations and standards for the management of a fire rescue system.

Maintains working relationships with other local, state and national emergency Fire-Rescue services and affiliated organizations.

Meets with governmental, business, professional, civic and community groups to discuss, interpret and explain departmental policies, operations and objectives; represents the department at local, state and national conferences.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the management and administration of emergency medical rescue and modern firefighting and fire prevention activities.

Thorough knowledge of modern firefighting, emergency medical rescue and fire prevention principles, practices and techniques.

Thorough knowledge of the mission, goals and objectives of the department in providing the highest level of firefighting, fire prevention and emergency medical rescue services.

Thorough knowledge of local, state and national fire codes, regulations and standards.

Considerable knowledge of the principles and practices of general management and public administration.

Considerable knowledge of supervisory principles and practices.

Ability to apply advanced professional knowledge of the principles of management, public administration and fire administration in directing, supervising and coordinating the activities of operational or administrative divisional activities.

Ability to plan, organize, direct and coordinate, through various levels of line and staff officers, managers and supervisors, the work of subordinates in a manner conducive to maximum performance and high morale.

Bachelor's degree. Two years of progressively responsible experience in the operation of a large commodity warehouse to include supervisory and purchasing experience are required. Additional work related experience may substitute for the education on a year for year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced supply work with administrative responsibility supervising warehousing activities for the Miami-Dade Fire Rescue Department. An employee in this class is responsible for supervising the purchasing, receipt, storage and issue of supplies and materials for a large fire rescue warehousing and distribution center. Emphasis of the work is on planning the work of subordinates, reviewing methods and procedures for handling large quantities of supplies and materials, evaluating the effectiveness of specialized supplies and equipment, and reviewing purchase contracts or bids to determine product acceptability and cost effectiveness. The incumbent exercises independent judgment in the development of bureau policies and procedures and in determining warehousing methods and procedures. Supervision is exercised over a staff of supervisory, specialized and clerical employees with assigned responsibilities in various phases of supply activities. General supervision is received from a senior uniformed fire officer who holds the incumbent responsible for efficient and effective warehousing and related operations.

##### ILLUSTRATIVE TASKS

Plans, assigns and review the work of subordinate supervisors and warehouse employees engaged in purchasing, receiving, storing, distributing and inventorying a large and varied stock of technical fire equipment, standard and specialized supplies, and other materials required for Miami-Dade Fire Rescue Department operations.

Analyzes and reviews inventory data to determine usage factors, resupply time, cost effectiveness and to assure required supplies of critical medical materials and other commodities are available for distribution to field units.

Prepares and administers bureau budget; prepares budget narratives; monitors commodity, capital and bureau expenditures and adheres to budgetary procedures and guidelines.

Analyzes quality control reports to determine effectiveness of products and commodities and makes decisions on product acceptance or rejection; evaluates purchase contracts and bids.

Reviews purchase orders and requisitions to assure compliance with inventory management procedures and policies; monitors perpetual inventory management system.

Analyzes and reviews bureau policies and objectives and formulates recommendations to improve operations; supervises warehousing program for stocking, storage, rotation, shelf-life requirements and new products; attends various conferences and meetings and represents the bureau in logistical matters.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of warehousing operations, policies and procedures of a fire supply bureau.

Thorough knowledge of the various kinds, grades, types and use of a large variety of fire equipment, supplies and materials.

Considerable knowledge of inventory control techniques and county purchasing and requisitioning procedures.

### Fire Rescue Dispatcher (004121)

#### Minimum Qualifications

High school diploma or GED. At least 18 years of age. Must be able to work rotating shifts including weekends and holidays and be available to work 24/7 during emergency activations.

Must obtain a 911 Public Safety Telecommunication Certification within the one year probationary period and maintain it throughout the employee's career.

\* Preferences: Associates or Bachelor's degree in Applied Science in Emergency Communications or related degree and Computer Aided Dispatch experience are preferred.

#### Job Specifications

##### NATURE OF WORK

This is fire dispatch work of fire and rescue personnel to emergency and routine calls from citizens and requiring the operation of two-way radio transmitting equipment in a central communications network.

Employees in this class are responsible for working rotating shift schedules and operating two-way radio transmitting equipment and state-of-the-art computer aided dispatch system to dispatch and communicate with fire rescue and emergency personnel. Duties include relaying orders and information to and from fire rescue personnel in the field, managing radio traffic, and operating computer and telecommunications equipment. Work is performed in accordance with prescribed dispatch procedures and within the scope of Federal Communications Commission regulations and departmental orders. Supervision is received from a shift supervisor who confers on difficult or unusual problems and reviews work for conformance with established departmental procedures.

##### ILLUSTRATIVE TASKS

Serves on a rotating shift schedule and operates two-way radio and computer-aided dispatch equipment to fire and emergency medical personnel to a variety of critical situations involving preservation of life and property.

Determines the appropriate dispatch of firefighting and rescue personnel to various requests from the public to correct locations.

Receives and relays requests for assistance, instructions and information from the public and fire rescue personnel in the field.

Responds to inquiries or requests information by telephone or computer to and from various police agencies, fire agencies, ambulance companies, hospitals, utility companies, alarm companies, and other agencies as well as the general public.

Monitors fire rescue scene interaction with field personnel; dispatches other services as needed.

Maintains computerized records of the locations and availability of on-duty fire rescue units.

Operates computer equipment including the accessing of local, state, and national networks; connects rescue personnel to hospital emergency room personnel as requested.

Coordinates the movements of multiple fire rescue units engaged in responding to life and death situations.

Records information received from fire rescue personnel concerning life safety incidents.

Assists in the training of new employees as requested.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

### Fire Rescue Dispatcher (004121)

Knowledge of the operating characteristics of computer-aided dispatch systems.

Knowledge of radio transmitting techniques and procedures pertaining to the dispatch of fire rescue units.

Knowledge of departmental regulations pertaining to the dispatch of fire rescue personnel.

Knowledge of the roadways and municipal boundaries of Miami-Dade County.

Ability to make swift, logical decisions and judgments in accordance with prior fire rescue dispatch knowledge or experiences.

Ability to understand and follow verbal and written instructions.

Ability to react quickly and calmly for the duration of stressful emergency radio communications.

Ability to communicate effectively, verbally and in writing, to maintain effective working relations with other employees, agencies, and the general public.

Ability to effectively prioritize duties when dealing with multiple tasks.

Ability to maintain written and computerized records.

Ability to speak clearly on police radios, using proper grammar.

Ability to understand, retain, and apply detailed written, verbal and demonstrated procedures, information and regulations to a variety of situations.

Ability to analyze information from a variety of sources, assess a situation and use sound judgment and take appropriate action in stressful situations or crises.

Skill in the operation of a computer keyboard.

NEW 03/12

### **Nature Of Work**

This is fire dispatch work of fire and rescue personnel to emergency and routine calls from citizens and requiring the operation of two-way radio transmitting equipment in a central communications network.

Must take and pass a typing test with a score of 35 net WPM, and take and pass a computer-based skills test which will evaluate the ability to follow verbal and written instructions, decision making, data entry (audio), character comparison, map reading, reading comprehension, sentence clarity, and multi-tasking. Applicants must apply online at [www.miamidade.gov](http://www.miamidade.gov) from Monday, \_\_\_\_\_, 2012 through Monday, \_\_\_\_\_, 2012. Applications must be completed and submitted by 11:59 p.m. on the closing date of this job posting.

Applicants will be screened for eligibility, and those who meet the minimum qualifications will be notified of the test date, time and location via the email address provided in your online employment application. Photo identification, such as a driver's license, is required and must be presented to take the computer skills test. **NO CELLULAR PHONES OR ANY OTHER ELECTRONIC DEVICES ARE PERMITTED IN THE TEST FACILITY.** Applicants will be subject to an extensive background check. As a condition of continued employment, the ability to handle stressful emergency communications will be assessed during the training and probationary period.

High school diploma or GED. Three years of experience as a Fire Rescue Dispatcher with the Miami-Dade Fire Rescue Department are required. Employees must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period.

#### Job Specifications

##### NATURE OF WORK

This is specialized communications work supervising an assigned shift of dispatchers in the Miami-Dade Fire Rescue Department.

Employees in this class are responsible for planning, scheduling and reviewing the work of a group of Fire Rescue Dispatchers engaged in dispatching fire and emergency medical personnel to a variety of critical situations involving preservation of life and property.

Responsibilities include adjusting dispatch assignments, analyzing dispatch procedures, providing training to subordinates, preparing a variety of reports and studies and assisting an administrative superior in planning and implementing bureau projects. Incumbents exercise independent judgment in resolving operational problems in accordance with established departmental rules and regulations. Supervision is exercised over a group of Fire Rescue Dispatchers by assignment of work and review of completed tasks for compliance with established procedures. Supervision is received from an administrative superior through reports, personal conferences and personal observations for satisfactory shift operations and attainment of departmental goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, schedules and reviews the work of a staff of subordinate Fire Rescue Dispatchers operating keyboard equipment and entering standardized source information following predefined job formats in the automated radio dispatching of fire and emergency medical personnel to locations of critical situations; schedules relief assignments and assigns work stations.

Trains dispatchers in basic dispatch techniques and in revised operational procedures; develops and recommends teaching aids and materials for classroom instruction of new employees; assists in classroom training.

Reorganizes and adjusts various dispatch assignments to incorporate special equipment, available units, notification table requirements, orders from senior uniform field personnel and other factors; analyzes and recommends improvements in dispatch procedures, assignments, and radio and data terminal usage; assists in analyzing dispatching system requirements.

Assists an administrative superior in analyzing and revising operational policies and procedures; compiles information and prepares status reports and studies to improve bureau operations; assists in the planning and implementation of bureau projects.

Coordinates the periodic and emergency utilization of the manual card dispatch system and the transfer to the civil defense radio center; updates necessary resource materials and maintains appropriate supplies to accomplish transfers; provides operators with training on manual and civil defense system equipment.

Receives and reviews requests for information and classification of alarm activities; verifies previously entered information by operating appropriate key combination and controls for retrieving, inserting and correcting data.

Maintains necessary documentation to update ambulance log, burning permits, station equipment deployment and other records; revises hydrant book, zone maps, and notification tables.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on work related problems; evaluates and rates employee performance.

Performs related work as required.

Four years of professional experience in occupational health and safety administration including evaluating, treating and/or referring occupational illnesses and injuries and management of health records are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional occupational health and safety work for the Miami-Dade Fire Rescue Department.

An employee in this class is responsible for performing advanced specialized work in the investigation and prevention of job-related injuries and exposures. Responsibilities include planning and scheduling immunization programs and annual physical examinations, developing a comprehensive infection control program, maintaining medical records, responding to inquiries concerning infection control and infectious diseases, providing pre-counseling and post-counseling to exposed employees, and serving in a liaison capacity to hospitals, health departments and other facilities. The incumbent exercises considerable independent judgment and technical expertise in developing programs to minimize or eliminate job-related disease exposures and injuries by providing departmental employees with necessary information and equipment. General supervision is received from an administrative superior who reviews work through personal conferences and written reports for effective development and implementation of occupational health and safety programs.

##### ILLUSTRATIVE TASKS

Develops and maintains a comprehensive infection control program; investigates all significant exposures and on-the-job-injuries for compliance with established safety procedures and follow-up treatment.

Publishes a synopsis of all on-the-job-injuries and significant exposures together with possible preventive measures.

Formulates short and long-term goals for the overall health and welfare of departmental employees.

Maintains current information on local, state and federal laws and regulations related to infectious disease.

Maintains current records on all employees concerning annual physicals and status of vaccinations.

Responds to inquiries from employees and serves as an authority on infection control and infectious diseases.

Produces occupational health information; maintains a library of materials pertaining to medical and legal issues concerning emergency response and emergency medical services and infection control.

Coordinates work with other infection control officials at other fire departments, hospitals, clinics, health departments and other facilities.

Reviews the rehabilitation and therapeutic progress of employees; recommends changes in field unit operations in engineering controls and work practices.

Provides pre- and post-counseling to exposed employees.

Serves as chair of the Infection Control Committee; reviews pre- and post-infectious disease exposure reports and makes recommendations for changes in policies.

## Human Resources Department

### Occupational Health Specialist (004151)

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of infection control methods, practices, procedures and technology.

Thorough knowledge of investigative techniques and methods used to identify causes of exposure to communicable disease.

Considerable knowledge of local, state and federal regulations pertaining to emergency response employers concerning threatening infectious diseases.

Considerable knowledge of employee physical examination records and related medical records.

Considerable knowledge of the management of a comprehensive infection control program.

Ability to effectively utilize infection control knowledges to determine and report on the risk of infection and communicable disease.

Ability to develop and maintain a comprehensive and effective infection control program.

Ability to counsel employees who have sustained job-related disease exposures and/or injuries.

Ability to coordinate work with infection control officials at hospitals, clinics, health departments and other organizations.

Ability to communicate clearly and concisely, verbally and in writing.

#### MINIMUM QUALIFICATIONS

Graduation from an accredited college or university with a Bachelor's degree in Nursing, Health Administration, Industrial Hygiene, Industrial Engineering, or related field. Possession of a State of Florida Registered Nurse license. Two years of professional experience in occupational health and safety administration including evaluating, treating and/or referring occupational illnesses and injuries and management of health records; or Possession of a State of Florida Registered Nurse license. Four years of professional experience in occupational health and safety administration including evaluating, treating and/or referring occupational illnesses and injuries and management of health records are required.

Must possess and maintain certifications in Adult, Infant/Child and Two-person CPR, First Aid, DOT First Responder and Lifeguarding provided by the Red Cross, YMCA or other nationally recognized aquatic training program. Must qualify and be certified by the State of Florida as an Emergency Medical Technician (EMT) within the probationary period and maintain EMT certification for continued employment. Must successfully complete an annual performance and physical examination, including vision standards for continued employment. Must possess a Driver license. Qualified applicants will be scheduled for a performance test prior to interview which will include a distance swim and run, simulated rescue, first aid, and artificial respiration practices and procedures. Vision standards are 20/40 for each eye uncorrected.

#### Job Specifications

##### NATURE OF WORK

This is skilled and supervisory water safety enforcement work at a large county public beach swimming area.

Employees in this class are responsible for assigning and supervising the work of subordinate lifeguards and providing assistance in difficult or unusual water safety problems. Incumbents make work assignments, review work of subordinate lifeguards by routine inspection of guard posts, and assure the maintenance of skills and physical endurance of lifeguards through regular swimming, lifesaving exercises, and tests. Supervision is received from a Lifeguard Captain or administrative superior who reviews work for adherence to established departmental and public safety policies and procedures.

##### ILLUSTRATIVE TASKS

Responds to and oversees various types of beach oriented emergencies; assures delivery of advanced first aid and/or emergency life-support systems; establishes and maintains control of an emergency scene.

Prepares a variety of incident, accident, and activity reports; provides statistical summaries; documents actions taken, and informs superiors of daily operations.

Performs inspection of surf conditions; inspects emergency life-support equipment; identifies and corrects substandard operating conditions; ensures operational efficiency.

Enforces local ordinances and general rules regarding water safety and public beach usage; maintains beach cleanliness and promotes the general welfare of beach patrons.

Substitutes for superiors or subordinates as conditions warrant; determines staffing requirements.

Reports incidents of a fire, police or medical nature to the appropriate service agency; assists in the expeditious delivery of the required service.

Supervises subordinate lifeguards through work assignment, inspection and performance evaluation; maintains employee discipline; obtains optimal utilization of manpower; meets day-to-day work priorities.

Analyzes surf conditions and crowd gatherings; warns patrons of hazards; prohibits bathing in specified areas; effectuates proper crowd control.

Conducts daily physical fitness program; ensures the maintenance of required skills and physical endurance for job assignment; trains subordinate lifeguards in new or existing lifesaving techniques and first aid methods; promotes operational effectiveness.

Answers inquiries from beach patrons and gives assistance when needed.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of established procedures for providing advanced first aid and approved emergency life-support systems for various individual emergency cases.

Considerable knowledge of various water current characteristics.

Knowledge of the use and purpose of approved life-support equipment.

Knowledge of emergency plans and procedures.

Knowledge of supervisory methods.

### MDFR Lifeguard 2 (004159)

knowledge of training principles and methods.  
knowledge of public relations practices.  
knowledge of the physical layout of the assigned facility.  
Knowledge of effective manpower utilization procedures.  
Knowledge of the nature and symptoms of various injuries, illnesses, and diseases which commonly occur to patrons.  
Knowledge of international marine distress signals.  
Knowledge of a limited variety of marine animal life indigenous to the coastal waters of South Florida.  
Ability to react promptly and correctly in emergency situations.  
Ability to perform a variety of physical tasks requiring sustained effort.  
Ability to swim in adverse surf or weather conditions.  
Ability to apply advanced first aid techniques including cardio-vascular pulmonary resuscitation.  
Ability to assume direction of personnel during surf rescue and other emergency activities.  
Ability to make visual inspections.  
Ability to determine manpower needs and requirements.  
Ability to work independently.  
Ability to work under stress.  
Ability to recognize international marine distress signals, hazardous water conditions, and hazardous animal or plant life.  
Ability to successfully complete the necessary training and state certification for emergency medical technician personnel.  
Skill in the application of advanced first aid services including cardio-pulmonary resuscitation.  
Skill in surf rescue techniques.

##### NATURE OF WORK

This is highly responsible executive level work in planning, directing and coordinating emergency management activities, utilizing an all-hazardous approach, for Miami-Dade County.

An employee in this class is responsible for managing, directing and coordinating natural or man-made disaster planning and preparedness. Responsibilities include directing the development, implementation, and the administration of the County's Comprehensive Emergency Management Plan (CEMP) and Domestic Preparedness Strategy; coordinating the County's all-hazardous disaster planning, preparedness, response, mitigation and recovery programs; maintaining working relationships and dialogue with county agencies, as well as local, state and federal government agencies engaged in emergency management coordination activities; and conducting public presentations, education and community outreach activities. The incumbent exercises an extensive degree of independent judgment in directing and coordinating administration and improvement of emergency management planning. Supervision is exercised through subordinate executives and supervisors over professional, technical and clerical employees engaged in various phases of operations. General direction is received from the Fire Chief and the County Manager who hold the incumbent responsible for professional management of emergency management functions and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Directs, plans and coordinates, through subordinate supervisors, the development, administration and revision of the County's emergency management and domestic preparedness programs.

Creates strategic plan for all-hazardous disaster preparedness and remediation; establishes measurable initiatives and performance criteria.

Directs and coordinates, through subordinate supervisors, the activities of professional employees in the planning, mitigation, response and recovery efforts in natural or manmade disaster situations such as evacuation, sheltering, mass feeding, accommodation of people with special needs, distribution of emergency supplies, sanitation methods and disease control.

Administers and directs development, maintenance and revision of the County's Comprehensive Emergency Management Plan.

Ensures compliance and training of County agencies and staff in the National Incident Management System.

Administers and directs development, maintenance and revision of the County's Domestic Preparedness Strategy to continually assess threat, risk and capabilities in order to develop projects and organize local resources to increase preparedness for catastrophic incidents.

Administers and directs development, maintenance and revision of the Caribbean Mass Migration Plan.

Confers with governmental, civic and health officials, volunteer agencies, and other providers to ensure development, improvement, coordination and readiness of the various planning, mitigation, response and recovery efforts in natural or manmade disaster situations.

Oversees the development of informational and educational materials; plans, supervises and makes public presentations and conducts community outreach activities related to emergency management services system.

Plans, develops, trains and implements Community Emergency Response Teams (CERT) to enhance disaster assistance and response.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates

#### Job Specifications

##### NATURE OF WORK

This is general law enforcement and public safety work in the protection of life and property and in the execution of orders issued through the authority of the Miami-Dade Police Department.

An employee in this classification may perform varied assignments in motorized patrol, traffic control and enforcement, accident investigation, preliminary and follow-up investigation at crime scenes, serving writs in criminal proceedings, and assisting in public safety education programs. Work involves an element of personal danger and high levels of physical, emotional, and mental stress to deal with people in various situations. Incumbents must be able to act without direct supervision and exercise independent judgment in meeting emergencies. Situations often arise where incumbents will have the responsibility for making decisions regarding the use of deadly force in protecting citizens and themselves without the opportunity for prior supervisory advice or assistance. Routine assignments are received from superior officers who review work methods and results through reports, inspections, and discussions. Police Officers generally work one eight-hour shift per 24-hour period, but will be subject to recall to on-duty status as the department warrants. In addition, Police Officers are required to respond to any emergency and/or criminal situation that they observe while off duty and function as a Police Officer until relieved by regular on-duty units.

##### ILLUSTRATIVE TASKS

Patrols the unincorporated area of Miami-Dade County in a radio equipped car or motorcycle to preserve law and order.

Responds to a variety of calls that require several intervention approaches ranging from personal counselling techniques to the use of physical or deadly force. Police Officers respond to accidents, domestic disturbances, various misdemeanors and felonies, traffic and crowd problems, etc.

At crime scenes or accidents, Police Officers administer first aid, conduct preliminary investigations, locate evidence, obtain information from witnesses, complete reports, make arrests and escort prisoners to jail.

Testifies in court concerning work activities.

Serves Criminal and Metropolitan writs; conducts search and surveillance to determine whereabouts of person to be served; arrests fugitives and returns person to proper authority.

Serves as instructor in the teaching of traffic safety to civic and school groups; broadcasts traffic information through commercial radio

### Police Officer (004201)

stations.

Assists in departmental programs and cooperates with other agencies in dealing with social, medical, and psychological problems such as domestic crises, alcoholism, attempted suicides, and other emotional disturbances.

On assignment, participates in underwater search and recovery missions, mobile crime laboratory investigations, undercover surveillance, civil defense exercises, rescue operations, marine patrol, and vice raids.

Assists in the presentation of departmental training programs.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of state statutes, local ordinances, and departmental regulations governing search and seizure of property, arrest, and admissibility of evidence.

Knowledge of Miami-Dade County geography and its road network.

Knowledge of law enforcement methods and procedures.

Knowledge of first aid principles and skill in their application.

Knowledge of basic human relations techniques.

Ability to understand and carry out oral and written instructions.

Ability to develop skill in the use and care of firearms.

Ability to work independently with minimal direct supervision.

Ability to enforce the law firmly, impartially, and with respect for individual rights.

Ability to prepare accurate reports of work activities.

Ability to assess an emergency or criminal situation and respond promptly and appropriately, often without direct supervision.

Ability to deal effectively and equitably with all people under various circumstances.

Ability to adapt to changing social conditions.

Ability to respond to training programs designed to develop proficiencies in work areas.

Physical strength and agility, and ability to meet physical requirements.

Emotional stability and the necessary capacity to cope with a wide range of inter-personal situations.

Personal character necessary to withstand frequent assaults on ethical and legal integrity.

#### Job Specifications

##### NATURE OF WORK

This is supervisory law enforcement work directing a squad of police officers in the protection of life and property or in specialized staff activities for the Miami-Dade Police Department.

Employees in this class are responsible for supervising a squad of police officers engaged in various law enforcement activities, or serving in various capacities in specialized crime prevention and public safety functions. Responsibilities include reviewing reports prepared by subordinates, assisting in motorized patrols, traffic control and enforcement and accident investigations, investigating accidents, crimes and alleged criminal activities, testifying in court, making arrests, and providing information to the public concerning police activities. Work involves an element of personal danger and high levels of physical, emotional and mental stress in dealing with people under various circumstances. Incumbents must be able to exercise considerable independent judgment in meeting emergencies and in making decisions regarding the use of deadly force in protecting citizens and themselves without the benefit of immediate supervisory advice or assistance. Supervision may be exercised over a squad of police officers or a group of other employees depending upon the unit of assignment. Supervision is received from a superior who reviews work through personal conferences, written reports and personal inspections for adherence to departmental regulations and established law enforcement practices and for satisfactory provision of police services to the public.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a squad of subordinate Police Officers engaged in a variety of law enforcement activities such as motorized patrol, traffic control and enforcement, accident investigation and crime scene investigation; determines proper course of action to be taken in day-to-day activities, emergencies or complex law enforcement situations.

Conducts roll call, inspects personal appearance and equipment of personnel, makes work and equipment assignments, conducts informal training sessions, discusses activities in area of assignment, and provides advice to subordinates.

Accounts for all equipment, materials, supplies and vehicles assigned to the specific operating unit to ensure proper inventory levels and operational readiness.

Performs duties of subordinates in order to supplement staff during personnel shortages to enforce laws and ordinances and make arrests; acts in the absence of superiors as required to provide continuity of operations.

## Human Resources Department

---

### Police Sergeant (004202)

Reviews a variety of reports prepared by subordinates and other departmental personnel for adequacy and completeness, in order to comply with departmental directives, ascertain trends, detect unusual cases and identify problem areas.

Prepares various narrative and statistical reports to present findings, recommend solutions, provide information and document work activities, equipment utilization and operations.

Receives verbal and written complaints and inquiries from the public and other government agencies and provides information on departmental regulations and procedures, explains courses of action that will or have taken place, and refers complaints to other departmental authorities.

Investigates individuals, accidents, crimes and alleged criminal activities; gathers information and evidence, makes arrests, provides police protection and determines if criminal activities are or have taken place.

Serves and/or enforces a variety of writs in order to carry out specific court orders or provisions of local ordinances.

Provides security services for an assigned facility to protect officials, the public, case evidence and the designated building.

Interviews or interrogates witnesses, informants, suspects, prisoners and others to obtain and gather information and to determine the nature and extent of individual involvement with specific criminal activities.

Testifies in court, before grand juries and hearings concerning police activities, to provide information from evidence gained through investigations and assist in case prosecutions.

Attends various training courses and reads materials pertinent to the law enforcement field to keep abreast of current developments; identifies training needs, prepares lesson plans and conducts formal training sessions.

Makes verbal presentations to schools, the media, community groups and other organizations to improve the public awareness of police activities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of state and local laws, codes and ordinances governing search and seizure of property, arrest, admissibility of evidence and law enforcement activities.

Considerable knowledge of departmental rules, regulations and procedures.

Considerable knowledge of law enforcement methods, practices and techniques.

Considerable knowledge of the geography of the Miami-Dade County.

Knowledge of basic human behavioral characteristics and human relations techniques.

Knowledge of supervisory principles and practices.

Knowledge of first aid principles and skill in their application.

REV 3/11

### **Nature Of Work**

This is supervisory law enforcement work directing a squad of police officers in the protection of life and property or in specialized staff activities for the Miami-Dade Police Department.

The promotional process will consist of two parts:

**PART I:** (53%) The written examination will evaluate technical job knowledge and will be based on the sources designated on the reading list. Copies of the reading list are available at the Miami-Dade Police Department, Personnel Management Bureau, Employee Relations Section, Monday through Friday, from 8:30 a.m. to 4:00 p.m., from Monday, February 9, 2009 until Tuesday, June 9, 2009. Only those applicants qualifying on the written examination will be scheduled for Part II.

**PART II:** (47%) The assessment portion of the process will evaluate the following performance dimensions: leadership, decision making, interpersonal, decisiveness, perception and analysis, organizing and planning, adaptability, oral and written communication. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of .02308 per pay period of continuous, satisfactory, full-time service in the class indicated on this announcement to a maximum credit of ten years of service or six points. Time served as a Corporal will be calculated at the rate of .07846 per pay period to a maximum credit of five years of service or ten points. The maximum points given to an employee who served in combination of Police Officer and Corporal is ten points. Only those individuals deemed unqualified to take the examination will be notified in writing by the Miami-Dade County, Human Resources Department. Applicants deemed qualified will receive no further notification and are to proceed to the examination as scheduled.

Applicants must apply in person at the Miami-Dade Police Department, Personnel Management Bureau, using the online application process from Monday, February 9, 2009 to Monday, May 11, 2009 from 8:30 a.m. to 4:00 p.m. Photo identification is required at the time of application. Applicants requesting Veterans' Preference must submit Veterans' Preference documents and complete a Veterans' Preference Claim Form at the time of application.

## Human Resources Department

For Police Sergeants hired on or after March 2, 2010:

Currently employed as a Police Sergeant by Miami-Dade County with permanent status and five years of continuous sworn full-time employment, two of which must be as a Police Sergeant immediately preceding the examination date. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period to be eligible for the examination.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory law enforcement work directing a shift of police personnel in the protection of life and property or in specialized staff activities for the Miami-Dade Police Department.

Employees in this class are responsible for supervising a shift of police officers and sergeants engaged in a variety of law enforcement and crime prevention activities, or serving in various capacities such as special criminal investigative units or in specialized support activities. Responsibilities include supervising and coordinating a specific functional police activity, reviewing a variety of reports and written materials, preparing reports and studies, providing information to the public and other government agencies, testifying in court, making arrests, and performing other duties to assist in the administration and operation of the department. Incumbents are required to perform at an advanced level of proficiency and are responsible for demonstrating specialized police techniques in the area of assignment. Work involves an element of personal danger and employees must be able to exercise considerable independent judgment and professional knowledge in making decisions regarding the use of deadly force in protecting citizens and themselves without the benefit of immediate supervisory assistance or advice. Supervision may be exercised over a shift of police officers and sergeants or a group of other employees depending upon the unit of assignment. Supervision is received from a superior who reviews work through personal conferences, written reports and personal inspections for adherence to departmental regulations and established law enforcement practices and for satisfactory provision of police services to the public.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a shift of police officers and sergeants, organized into groups of squads, and engaged in various law enforcement and crime prevention activities, such as motorized patrols, traffic control and enforcement, accident and crime scene investigations, and other investigations of alleged criminal activities.

Supervises and participates in a variety of special criminal investigative units or specialized support activities including staff training, vice, narcotics and criminal intelligence investigations, internal review functions, court service and licensing activities, communications operations, investigations of robberies, homicides and other crimes, and other similar duties.

Conducts roll call and inspects personal appearance and equipment of personnel; determines courses of action to be taken during shift, emergencies or complex law enforcement situations; discusses activities in area of assignment with subordinate supervisors and provides assistance and advice to subordinates.

Reviews a variety of reports, correspondence, memoranda and files prepared by subordinates and other departmental personnel for adequacy and completeness, to comply with departmental directives, ascertain trends, detect unusual cases, determine cases to be investigated and

### Police Lieutenant (004203)

identify problem areas.

Prepares various narrative and statistical reports, studies and budgets to present findings, provide information, justify and project needs, recommend solutions and document work activities, equipment utilization and operations.

Receives verbal and written complaints and inquiries from the public, media, other government agencies and department personnel and provides information on departmental regulations and procedures, explains courses of action that will or have taken place, and refers complaints to other departmental authorities.

Accounts for all equipment, materials, supplies and vehicles assigned to the specific operating unit to ensure proper inventory levels and operational readiness.

Performs duties of superior in order to provide continuity of operations, as necessary.

Attends various departmental and non-departmental meetings and training courses; reads materials pertinent to the law enforcement field to keep abreast of current developments; identifies training needs, prepares lesson plans and conducts formal training sessions.

Testifies in court, before grand juries and hearings concerning police activities, to provide information from evidence gained through investigations and assist in case prosecutions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of state and local laws, codes and ordinances governing search and seizure of property, arrest, admissibility of evidence and law enforcement activities.

Thorough knowledge of law enforcement methods, practices and techniques.

Considerable knowledge of traffic and criminal investigation procedures, techniques and problems.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of departmental rules, regulations and procedures.

Considerable knowledge of the geography of the metropolitan area.

Considerable knowledge of basic human behavioral characteristics and human relations techniques.

Considerable knowledge of the structure and function of various law enforcement and government agencies.

Knowledge of first aid principles and skill in their application.

Knowledge of care and use of firearms.

Ability to plan, assign and review the work of subordinate police officers, sergeants and other employees in a manner conducive to full performance and high morale.

Ability to enforce laws with firmness, impartiality and respect for individual rights.

### Police Lieutenant (004203)

Ability to react promptly and correctly in emergency or complex law enforcement situations.

Ability to utilize subordinates, equipment and materials to effectively provide police services or the public in the area of assignment.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to deal persuasively and effectively with a variety of people in a variety of circumstances.

Ability to obtain information through interview, interrogation and observation.

Ability to review reports prepared by subordinates and to prepare clear and concise reports.

Ability to establish and maintain effective working relationships with subordinates, superiors, department officials, officials of other government agencies and the public.

Ability to read, retain and apply various state and local laws, codes and ordinances to a variety of law enforcement activities.

Skill in the care and use of firearms.

Physical strength and agility sufficient to perform assigned duties.

REV 3/11

#### **Nature Of Work**

This is responsible supervisory law enforcement work directing a shift of police personnel in the protection of life and property or in specialized staff activities for the Miami-Dade Police Department.

The promotional process will consist of two parts:

Part I: (39%) The written examination will evaluate technical job knowledge and will be based on the sources designated on the reading list, which is as follows:

Florida Law Enforcement Handbook-2009 (Legal Guidelines, State Procedural Laws)

Miami-Dade Police Department Manual (as per the changes indicated in Revisions 1 through 14)

Legal Bulletins: 2008-1 through 4

Legal Notes: 2008-1 through 14, and 2009-1 through 4

PBA Rank and File Unit Collective Bargaining Agreement -Effective 10/01/05 through 9/30/08

PBA Supervisory Unit Collective Bargaining Agreement-Effective 10/01/05 through 9/30/08

AFSCME 199 General Employees Collective Bargaining Agreement-Effective 10/01/05 through 9/30/08

<http://www.miamidade.gov/hr/cba.asp>

Miami-Dade County Leave Manual (selected sections as follows):

<http://www.miamidade.gov/hr/leave.asp>

Administrative Leave, Annual Leave, Bereavement Leave, Compensatory Leave, Court Witness Leave, Disability Leave, Domestic Leave,

## Human Resources Department

### Police Lieutenant (004203)

Educational Leave, Emergency Sick Leave, Holiday Leave, Jury Duty Leave, Leave Without Pay, Military Active Duty Leave, Military Reserve Leave, and Sick Leave.

Note: The Collective Bargaining Agreements and selected sections of the Leave Manual may be accessed through the web sites as indicated above.

Only those applicants qualifying on the written examination will be scheduled for Part II. PART II: (61%) The assessment portion of the process will evaluate the following performance dimensions: leadership, decision making, interpersonal, decisiveness, perception and analysis, organizing and planning, adaptability, oral and written communication. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of .02308 per pay period of continuous, satisfactory, full-time service in the class indicated on this announcement to a maximum credit of ten years of service or six points. Time served as a Master Sergeant will be calculated at the rate of .07846 per pay period to a maximum credit of five years of service or ten points. The maximum points given to an employee who served in combination of Sergeant and Master Sergeant is ten points.

Only those individuals deemed unqualified to take the examination will be notified in writing by the Miami-Dade County, Human Resources Department. Applicants deemed qualified will receive no further notification and are to proceed to the examination as scheduled.

If you are claiming veterans' preference, you must provide the required information in the Veterans' Preference section of the employment application, prove eligibility, and request the preference within the specified time period. In accordance with Florida Statutes, Veterans' Preference documents must be submitted on time and will not be accepted on the day of the written examination. Copies of your documents must be received by the Human Resources Department no later than Monday, July 20, 2009. Copies should be marked to show the job posting number and classification for which you are claiming preference. Veterans' Preference documents may be submitted in one of the following ways: Email to [vets@miamidade.gov](mailto:vets@miamidade.gov), fax to (305) 679-VETS (7545), or mail or hand-deliver to Miami-Dade County, Human Resources Department, Personnel Services Division, 111 N.W. 1st Street, Suite 2020, Miami, FL 33128-1906.

Applicants no longer have to report to Miami-Dade Police Department Personnel Management Bureau (PMB) to register. Applicants must apply using the Online Employment Application process. TO APPLY, visit [www.miamidade.gov](http://www.miamidade.gov); go to "Find County Jobs"; then go to "Current County Employees"; it will bring you to "Welcome to Miami-Dade County e-jobs", then follow the prompts. If you are unable to properly register online, please report in person to PMB, Monday-Friday, 8 a.m.-4:30 p.m. prior to the closing of the recruitment, for assistance. Applications for the examination will be accepted from Monday, April 6, 2009 until Monday, June 1, 2009 and Friday, June 12, 2009 until Friday, July 17, 2009.

To obtain information regarding the promotional process, applicants must access

[http://www.miamidade.gov/MDPD/forms/notice\\_of\\_info\\_promo\\_process.pdf](http://www.miamidade.gov/MDPD/forms/notice_of_info_promo_process.pdf)

This information is designed to advise you of the procedures regarding both the testing component and the assessment component of your promotional process. You will be required to comply fully with these procedures.

**LOCATION OF EXAMINATION:** Florida International University, Roz and Cal Kovens Conference Center, Bayview Room 214, 3000 NE 151 Street, Miami, Florida. Date of examination: Wednesday, August 5, 2009. Registration time: 9:00 a.m. to 9:30 a.m. Doors to the test facility will be closed promptly at 9:30 a.m. No one will be admitted for registration after the doors to the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination. Make-up test requests must be submitted in writing through the applicant's chain of command to the Miami-Dade County, Human Resources Department, Testing and Validation Section, prior to the examination date.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory police work with administrative responsibility in directing a principle law enforcement function for the Miami-Dade Police Department.

Employees in this class are responsible for administering and coordinating department activities in command level positions within police districts, supervising a primary section of the detective bureau, commanding major investigative units, and performing specialized staff level assignments or commanding comprehensive police support activities. Work involves the direct application of management policy in the administration of complex law enforcement activities. Additional responsibilities include the continuous inspection and review of law enforcement methods and procedures to recommend improvements and increase efficiency. Supervision is exercised over subordinate police and support personnel by review of activity reports, personal conferences and the successful accomplishment of the assigned law enforcement objective. General supervision is received from a law enforcement superior who reviews work by analysis of criminal activity data, satisfactory conclusion of investigations and effectiveness of the assigned departmental element.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of uniformed police activities which include criminal investigations, traffic accident investigations, patrol functions, special police situations, underwater recoveries, traffic enforcement and crime prevention and the element which impounds property and logs and releases impounded automobiles; responds to letters from the public, and traffic complaints; reviews reports prepared by subordinates; issues special orders and procedures for district-level, bureau or specialized operations.

Commands major offense sections of the Headquarters Detective Bureau, which include investigations of homicide, robbery, sexual battery, auto theft, arson, economic crimes as well as unattended natural deaths and suspicious deaths; responsible for major crimes investigations which occur within numerous municipalities.

Cooperates with municipal law enforcement agencies in suppressing criminal activities and apprehending suspected offenders.

Conducts operational inspections of all organizational units; reviews compliance with departmental regulations and policies; submits recommendations for the modification of existing orders, operational plans and the development of new procedures for all phases of public safety.

Supervises the Civil Process Bureau in the service and execution of civil writs and similar papers of the courts; reviews papers for proper legal form, assigns subordinates to the attachment and removal of persons and the impounding of property, the collection of funds and the delivery of legal instruments such as the subpoena, jury summons, arrest warrant and similar civil writs.

Reviews reports prepared by subordinate officers; recommends techniques for special investigations; makes recommendations for changes in procedures or policies to increase effectiveness.

Prepares and submits preliminary budget estimates; reviews requisitions for supplies and equipment; evaluates subordinate staff and recommends promotion, reassignment, training and disciplinary actions; involved in labor relations activities within unit of assignment; work consistent with organizational placement is performed as required.

## Human Resources Department

---

### Police Captain (004204)

Serves as Executive Officer of a police district; coordinates the activities of uniform and general investigations lieutenants; ensures district administrative functions are carried out consistent with policy and procedure.

Coordinates the activities of elements involved in the training function such as in-service, out-service, firearms, specialized and others.

Supervises a major element involved in investigation of organized criminal activity, intelligence, or narcotics use and sale.

Responsible for investigation of employee misconduct or investigation of criminal offenses by departmental members.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of state statutes, local ordinances, and departmental regulations governing search and seizure, arrest and admissibility of evidence.

Extensive knowledge of practices and methods employed in crime detection, criminal and accident investigation, the techniques of interrogation and of the identification and preservation of physical evidence.

Considerable knowledge of criminal prosecution techniques as related to the presentation of evidence.

Considerable knowledge of recent developments, current literature and sources of information in public safety administration and law enforcement.

Ability to plan, assign and supervise the work of others in a manner conducive to full performance and high morale.

Ability to analyze complex police problems and to exercise independent judgment in arriving at conclusions.

Ability to train and supervise subordinates in the various specialized techniques used to solve crimes and apprehend offenders.

Ability to present court testimony clearly and concisely and impartially, with respect for individual rights.

Ability to write and speak effectively.

Ability to logically prepare detailed reports and correspondence.

Ability to construct and deliver training programs in all facets of public safety administration.

Ability to react quickly and calmly in emergencies.

Skill in the use and care of firearms.

Physical strength and agility, and ability to meet high physical requirements.

##### NATURE OF WORK

This is highly responsible professional managerial and supervisory police work with administrative responsibility in directing a law enforcement function for the Miami-Dade Police Department.

Employees in this class are responsible for the direction, operation and control of a major organizational law enforcement function within the Miami-Dade Police Department. Work involves establishing and implementing task directed policies and procedures and ensuring that departmental goals and objectives are met. Additional responsibilities include coordinating the activities of a specialized bureau, establishing goals and objectives, monitoring achievements, planning and directing investigations through review of administrative and special reports, directing police staff in the preparation of budget requests to support bureau operations, establishing procedures that ensure bureau budgetary compliance, and ensuring police bureau mission is responsive to overall departmental direction. Supervision is exercised over subordinate police and support personnel by review of activity reports, conferences, in-the-field-command, and the successful accomplishment of assigned law enforcement objectives. General supervision is received from a Division Chief, Assistant Director or the Director who reviews work for adherence to departmental policies and attainment of desired goals and objectives through personal conferences and review of reports of operations.

##### ILLUSTRATIVE TASKS

Directs through subordinates the work of uniform and non-uniform police activities which include robbery, narcotics, special patrol, investigative support, public corruption, professional compliance, economic crimes, criminal intelligence, police operations, domestic crimes, and police district operations including the pursuit, apprehension and arrest of law violators.

Reviews and evaluates reports prepared by subordinates and issues special orders and procedures for district-level, bureau or specialized operations.

Directs and coordinates the activities of police bureaus or specialized operations through the use of enforcement and administrative processes; reviews established goals and objectives and monitors achievements.

Reviews and evaluates the development of divisional policies and procedures and ensures the department is operated in full compliance with all applicable laws and statutory mandates for Miami-Dade County and State of Florida.

Prepares and submits preliminary budget estimates; reviews requisitions for supplies and equipment; evaluates subordinate staff and recommends reassignment, training and disciplinary actions; participates in labor relations activities within unit of assignment.

Presents oral reports on crime statistics and deploys resources of the department to impact reductions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of law enforcement statutes, local ordinances, and departmental regulations.

Thorough knowledge of practices and methods employed in crime detection, criminal and accident investigation, arrests, interrogation and identification and preservation of physical evidence.

Thorough knowledge of criminal prosecution techniques as related to the presentation of evidence.

Considerable knowledge of recent developments, current literature and sources of information in public safety administration and law enforcement.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of department rules, regulations, procedures and operations.

### Police Major (004205)

Knowledge of departmental standards, policies and objectives.

Ability to plan, assign and supervise the work of others in a manner conducive to full performance and high morale.

Ability to analyze complex police problems and to exercise independent judgment in arriving at conclusions.

Ability to react promptly and correctly in emergency situations.

Ability to read, retain and apply guidelines, regulations and policies to a variety of situations.

Ability to train and supervise subordinates in the various specialized techniques used to solve crimes and apprehend offenders.

Ability to establish and maintain effective working relationships with subordinates, superiors, and a variety of other public and private officials.

Ability to present court testimony clearly, concisely and impartially with respect for individual rights.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to logically prepare detailed reports and correspondence.

Ability to construct and deliver training programs in all facets of public safety administration.

Ability to use and care for firearms.

Ability to perform assigned duties including physical tasks requiring sustained physical strength and ability.

### Nature Of Work

### Fingerprint Analyst 1 (004220)

#### Minimum Qualifications

##### NATURE OF WORK

This is supervisory and advanced technical work in the classification, evaluation, and identification of latent fingerprints.

An employee in this class is responsible for supervising a staff of fingerprint technicians engaged in classifying fingerprints, entering fingerprint records into an automated system, preparing court exhibits, providing testimony in courts-of-law, and performing a variety of related duties. Responsibilities include supervising operation of a fingerprint computer, developing work schedules, preparing a variety of reports, presenting testimony in court, and evaluating new techniques and procedures for the development of latent fingerprint evidence. Supervision is exercised over a staff of subordinate technical employees engaged in various phases of fingerprinting operations. Supervision is received from a technical and administrative superior who reviews work through personal conferences and written reports for achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of subordinate fingerprint technicians engaged in classifying fingerprints and performing related duties.

Prepares monthly and annual statistical reports, commendations, record storage documents, and other reports as required.

Supervises operation of fingerprint computers and develops recommendations for future expansion and upgrades.

Establishes and maintains working relationships with staff of other divisions, other law enforcement officers, State prosecutors, and court officials.

Presents testimony in courts-of-law, as required.

Examines, evaluates, and recommends techniques and procedures for the development of latent fingerprints on evidence.

Schedules training programs for staff members.

Provides tours of fingerprint operations for visitors.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of modern principles and methods of fingerprint classification, searching, and identification.

Thorough knowledge of equipment, materials, and techniques used in lifting and preserving latent fingerprints and palmprints.

Thorough knowledge of departmental and bureau rules, procedures, and policies.

Thorough knowledge of computer technology as related to fingerprint identification, and personal computers.

Considerable knowledge of the rules of evidence as applied to fingerprints and the identification process.

Considerable knowledge of various chemicals and equipment used in developing latent fingerprints.

Knowledge of supervisory principles and practices.

Ability to conduct inspections and accurately compare fingerprints, and identification data.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to supervise technical subordinates and provide expertise in an operational environment.

Ability to effectively present court testimony.

Ability to prepare reports, forms, and other documents.

Ability to learn the legal, administrative, and procedural regulations applicable to the area of assignment.

### Fingerprint Superintendent (004225)

This is supervisory and advanced technical work in the classification, evaluation, and identification of latent fingerprints.

### MDPD Polygraph Examiner (004242)

#### Minimum Qualifications

High school diploma or GED. Two years of experience as a polygraph examiner and/or interrogating subjects are required.

#### Job Specifications

##### NATURE OF WORK

This is technical work in operating a Polygraph.

An employee in this class operates a Polygraph which records physiological disturbances accompanying fear while the subject is being interrogated. The operator must exercise considerable skill in interrogating persons undergoing examinations, noting changes in blood pressure, pulse, respiration, or electrodermal response. The employee works with considerable independence in preparing his interrogations. Work is performed under the administrative supervision of the police investigation supervisor who reviews reports of examinations and reviews work for results obtained.

##### ILLUSTRATIVE TASKS

Reviews suspect's case with investigators to determine pertinent information to question about during examination; attaches indicators to specific areas of the body of suspects such as palms, arm, and chest; interrogates suspect following a prearranged plan of questioning.

Analyzes and interprets reactions to questions recorded on tracing paper; prepares report on each subject examined.

Testifies in court pertaining to the results of Polygraph examinations given.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operation, adjustment, and care of a Polygraph.

Considerable knowledge of the practices and procedures of analyzing and interpreting Polygraph charts.

Considerable knowledge of the methods or procedures used in criminal investigation and interrogation.

Some knowledge of court procedures in criminal trials.

Ability to prepare accurate and complete reports of information obtained through Polygraph examination.

Ability to obtain information through interviews, interrogation, and observation of suspects undergoing Polygraph examination.

Ability to express one's self clearly and concisely, orally and in writing.

NEW 4-57

#### Nature Of Work

This is technical work in operating a Polygraph.

### Criminalist 1 (004245)

#### Minimum Qualifications

Bachelor's degree in Chemistry, Forensic Science, Biology or related field. Applicants will be subject to an extensive screening process to include background investigation, fingerprint check and polygraph examination.

#### Job Specifications

##### NATURE OF WORK

This is technical laboratory and analytical work in criminal identification and investigation for the Miami-Dade Police Department.

Work involves the application of laboratory techniques, materials, equipment and instrument operation in making physical and chemical analyses of evidence obtained at crime scenes or elsewhere and the presentation of findings for investigative and prosecution uses. Work is performed in accordance with standardized laboratory methods and controls to insure accurate and verifiable analyses of specimens. Duties occasionally require contact with contaminated, corrosive or explosive materials. Work is performed under the supervision of a technical superior who delineates work assignments, aids in resolving special problems and reviews work for completeness, technical quality and court presentability. Positions allocated to this class are primarily used to develop incumbents in all phases of crime laboratory analytical work.

##### ILLUSTRATIVE TASKS

Test fires weapons involved in criminal activities and identifies projectiles and cartridge cases using a comparison microscope; makes chemical and infrared photographic studies of suspect areas of skin, flesh or clothing in gunpowder residue studies.

Identifies unknown substances by qualitative and quantitative, chemical and physical analyses.

Performs chemical microscopy, spectrography and other scientific examinations of various evidential materials for identification purposes and evaluates their significance.

Performs document and handwriting examinations; evaluates documents as to their authenticity.

Prepares written reports of laboratory examinations and results.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of laboratory techniques in the performance of chemical, microscope, spectrographic, X-ray, diffraction and photographic examinations.

Knowledge of methods used in collecting and preserving physical evidence and presentation of such evidence in court.

Knowledge of ballistics and the related identification of firearms, bullets and fired cartridge cases.

Some knowledge of standard fingerprint classification practices, records and equipment.

Ability to testify effectively in court as an expert witness.

Normal color perception and eyesight sufficient to perform extended microscope work.

##### NATURE OF WORK

This is advanced technical laboratory and analytical work in criminal identification and investigation for the Miami-Dade Police Department.

Work involves the application of advanced laboratory techniques, materials, equipment and instrument operation in making physical and chemical analyses of evidence obtained at crime scenes or elsewhere and the presentation of findings for investigative and prosecution uses. Work is performed at the full performance level of difficulty and is differentiated from the lower class by independent action and analytical complexity of the duties. Duties occasionally require contact with contaminated, corrosive, or explosive materials. Employees may be required to supervise the work of subordinate technicians in the laboratory or at crime scenes, and the development of new techniques and procedures is sometimes necessary. Supervision is received by the professional laboratory supervisor who reviews work through conferences, written reports and observation of laboratory examinations.

##### ILLUSTRATIVE TASKS

Trains and supervises mobile crime laboratory technicians in the collection and preservation of evidence at the scene of a crime; reviews the activities of technicians and examines materials collected for adherence to procedures of collection and identification; maintains records of activities performed.

Analyzes and prepares reports of evidence for use in court testimony; testifies in court as an expert witness concerning narcotics, stained materials, firearms, documents, soils, inflammables, vestiges of human tissue and similar analyses of chemical and physical substances.

Performs complex laboratory examinations in chemical, microscopic, spectrographic, x-ray diffraction, photographic, ballistic, document examination, tissue analysis and related analyses and procedures.

Directs and supervises the dismantling, removal and disposal of bombs and similar explosives throughout the metropolitan area; personally handles most explosive materials and instructs subordinates in all phases of anti-demolition work.

Designs new equipment and initiates new procedures to meet the technical evolution of criminal investigation and evidence analysis.

Qualitates and quantitates unknown substances by means of chemical, physical and instrumental analyses such as gas or liquid chromatography, spectrography, chemical microscopy, and microscopic examination.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of principles, practices, instruments and methods used in the collection and analysis of criminal evidence.

Considerable knowledge of the rules of evidence as they relate to the presentation of technical analyses of criminal evidence.

Considerable knowledge of the specialities of criminal identification, current developments and trends in crime detection.

Knowledge of the handling and analysis of corrosive agents, explosives, contaminated and diseased evidence.

Considerable knowledge of investigative techniques including ballistics, toxicology, micrography, photomicrography, forensic chemistry, spectroscopy and diffractometry and stoichiometry.

Knowledge of law enforcement practices and procedures.

### **Criminalist 2 (004246)**

Ability to plan, assign and supervise the work of technicians in a manner conducive to maintenance of high technical standards, full performance and high morale.

Ability to detect research requirements and to plan and execute a scientific research effort.

Ability to perform extremely hazardous bomb disposal work.

#### Minimum Qualifications

Bachelor's degree in Criminology, Business Administration, Public Administration or a related field. One year of experience in research and analytical work in an investigative capacity is required.

#### Job Specifications

##### NATURE OF WORK

This is specialized analytical work in the review, extraction, analysis and compilation of data to provide intelligence information for organized crime investigations in the Miami-Dade Police Department.

An employee in this class is responsible for performing a variety of analytical duties in processing data into intelligence information to be used in both planning and investigative law enforcement work. Emphasis of the work is on use of various analytical methods including investigative report analysis, graphic presentation of data, charting of events in chronological sequence or collection and consolidation of intelligence data from other agencies. The incumbent must be familiar with standard departmental operating regulations and procedures as well as provisions of state criminal and civil statutes applicable to investigations of organized crime activity. Skill in deducting trends, patterns and relationships in a variety of data which has significance in investigative work is required. Supervision is received from an administrative superior who discusses progress of assignments, assists with advice on completion of analytical projects and evaluates completed work for quality and resourcefulness of results for investigative use.

##### ILLUSTRATIVE TASKS

Reviews, extracts and analyzes reports and other information and compiles data into logical form to provide general or specific intelligence for use in investigative and planning decisions.

Reviews data from various reports and graphically links specific intelligence information relating to association of individuals and establishments by developing charts and graphs; graphically charts specific events obtained from data to provide chronological presentations.

Analyzes financial data from various reports to provide specific accounting information to be used in conducting investigations.

Collects intelligence information from other agencies needed in projects assigned; obtains pertinent information from agency files in responding to similar requests from other agencies; assists investigative personnel in special projects by research in agency files, obtaining corporate records or other information.

Keeps abreast of significant organized crime activity within the jurisdiction of the department and bureau and nearby areas by means of review of reports and media articles.

Attends scheduled departmental meetings as assigned to present briefings or obtain pertinent information relating to investigations and planning.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of operating procedures and regulations of the Organized Crime Bureau.

Considerable knowledge of Florida criminal and civil statutes applicable to organized crime investigations.

Considerable knowledge of significant organized crime activity in the area.

Considerable knowledge of research and analytical techniques in the assimilation, extraction and presentation of significant data for use by investigative and supervisory personnel.

### MDPD Intelligence Analyst (004252)

Knowledge of the organization and functions of other law enforcement agencies in the area.

Knowledge of appropriate techniques in the statistical and graphic presentation of data.

Ability to select data from a variety of source materials which has investigative significance.

Ability to deduct trends, patterns and relationships which have investigative significance in data reviewed.

Ability to analyze and compare significant data and present it in logical form.

Ability to maintain effective relationships with law enforcement personnel within and outside the department.

Ability to express ideas and present factual material effectively both verbally and in writing.

Ability to complete assignments on a timely basis.

Ability to collect significant information from and furnish information to other law enforcement agencies promptly.

Ability to keep currently informed regarding significant organized crime activity in the area.

## MDPD Forensic Artist (004269)

### Minimum Qualifications

High school. Three years of experience in portrait or forensic art are required. Related education may substitute for the required experience on a year-for-year basis to a maximum of two years.

### Job Specifications

#### NATURE OF WORK

This is a technologically advanced, innovative, and skilled position in the field of law enforcement and forensic art for the Miami-Dade Police Department (MDPD).

An incumbent in this specialized classification is responsible for interviewing victims and witnesses, and interacting with investigative entities within the MDPD as well as local, state, and federal law enforcement agencies. An incumbent is also responsible for interacting with the Medical Examiner Department and Forensic Anthropologists to facilitate the creation of hand-drawn, computer-assisted facial composite sketches and three-dimensional facial reconstruction of human remains. The position requires that the forensic artist possess a high degree of artistic skill and knowledge of the human body with particular emphasis on facial anatomy. The work is performed under the supervision of an administrative or professional supervisor who is responsible for reviewing work for conformity with departmental policies and efficiency of work performance.

#### ILLUSTRATIVE TASKS

Interacts with and interview witnesses and victims under emotionally charged conditions relative to a criminal act in order to create freehand or computer-assisted composites of criminal suspects.

Prepares freehand two-dimensional drawing or computer-assisted likeness of criminal suspects.

### Police Property Evidence Specialist 1 (004306)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the warehousing of stored goods or merchandise or related work such as inventory control or issuing, receiving and auditing supplies are required.

#### Job Specifications

##### NATURE OF WORK

This is responsible work in a large, diversified police property storage facility.

Employees in this class are responsible for the receipt, storage, issuance and safeguarding of a variety of property and evidence confiscated through law enforcement activities. Work involves the keeping of detailed records for all property and evidence issued and received. Duties may require the familiarity with a variety of specialized items which are confiscated and received for storage. Incumbents are expected to perform at a high level of accuracy and integrity due to the value and legal importance of all items handled. Supervision is received from a superior who reviews work for conformity with departmental policy and the efficient operation of the storage facility.

##### ILLUSTRATIVE TASKS

Receives, labels and stores varied goods confiscated through law enforcement investigations and held as evidence for court prosecution.

Maintains detailed records for all property and evidence in storage.

Provides techniques and equipment for the proper receipt and issuance of all property items.

Provides security and precautionary measures to protect all property from loss, damage and deterioration.

Participates in public auctions held for the disposal of abandoned property.

May testify in court as to the history and identity of items used as physical evidence.

Takes periodic inventories and maintains files on all items in storage.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of storekeeping and supply methods and procedures.

Considerable knowledge of inventory records keeping, including use of data processing and accounting systems.

Knowledge of police and court procedures as they pertain to rules of evidence.

Ability to maintain varied inventory and stores records.

Ability to carry out daily activities with a minimum of supervision.

Ability to carry out oral and written instructions and to manage storage operations.

Ability to develop skills in the use and care of firearms.

Sufficient physical strength and agility to permit the lifting and moving of heavy objects.

#### Minimum Qualifications

High school diploma or GED. Two years of experience in public contact work are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is field work in the serving of writs, subpoenas, jury summons, and other court process actions.

Employees in this class serve various legal documents issued by a proper authority, typically working within an assigned field area. Work involves locating persons named in the legal instrument, serving the document, or contacting attorneys or plaintiffs to obtain additional information or to advise on the status of process serving. Duties require the use of judgment in completing service actions where there are erroneous addresses on documents or where individuals evade being served, and knowledge of current court rules governing civil, criminal and juvenile process. Employees are required to work after-hours and on non-work days as the need demands to complete emergency or rush service. Assignments are carried out independently in the field. Supervision is received from a technical superior who evaluates work, primarily through satisfactory service of assigned papers within time schedules and from periodic field supervision.

##### ILLUSTRATIVE TASKS

Serves and accounts for all civil, criminal, and juvenile writs, criminal witness subpoenas, jury summons and other process actions within the area of assignment; enters the appropriate statistics on the daily report sheet; keeps office staff advised on process served in assigned zone.

Attempts to locate inaccessible persons based on information received as to whereabouts of individuals; attempts to obtain correct addresses where address information is in error so as to complete the serving of documents.

Maintains frequent telephone contact with attorneys and plaintiffs to advise on status of process or obtain additional information to assist in making service.

Assembles papers in proper order for service and makes counter services when required.

Accounts for all assigned equipment, material, supplies, and vehicles.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of state statutes, local ordinances, and departmental regulations as they pertain to the service of process.

Knowledge of the current rules of the court governing civil, criminal, and juvenile process.

Knowledge of the geography of the metropolitan area and its road network.

Ability to understand and carry out verbal and written instructions.

Ability to clearly and effectively communicate with the public, both verbally and in writing.

Ability to react promptly and correctly in emergency situations.

Ability to elicit information on the location of persons sought, from interviews and record searches.

Ability to perform basic math.

### MDPD Court Support Specialist 2 (004309)

#### Minimum Qualifications

Currently employed by Miami-Dade County as a MDPD Court Support Specialist 1 with permanent status and one year of continuous full-time service as a MDPD Court Support Specialist 1 immediately preceding the examination date. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period to be eligible for the examination.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the serving of civil, criminal, and juvenile non-enforceable writs, subpoenas, jury summons, and other court process directed to the Sheriff of Dade County from world-wide courts and entities as well as process for violations of Dade County Metropolitan Code to be served in Dade County.

Employees in this class supervise Court Support Specialists 1 who serve various legal documents issued by civil criminal, and juvenile authorities. Work involves assigning the various civil, criminal, and juvenile process to subordinates, coordinating their field schedules, and providing the necessary instructions to carry out the required service. Work is performed in accordance with established statutory and departmental provisions, but incumbents must exercise independence and discretion in accomplishing the assigned workload within the prescribed schedule. Supervision is exercised over subordinate Court Support Specialists 1 by assignment and review of work and by providing advice and assistance on unusual or difficult tasks. Supervision is received from an office superior who reviews and evaluates work primarily through satisfactory service of assigned papers within time schedules in compliance with legal directives and periodic field supervision.

##### ILLUSTRATIVE TASKS

Plans, assigns, supervises, and evaluates Court Support Specialists 1 in the serving of civil, criminal, and juvenile non-enforceable writs process.

Prepares periodic control reports and maintains statistical data to equalize workloads by properly forming zones or work areas by volume of work received.

Maintains continual contact with all field personnel for daily control of routine and emergency service assignments.

Receives and examines for correctness all process directed to the Sheriff of Dade County.

Maintains frequent personal contact with the public, attorneys, and plaintiffs concerning all process directed to the Sheriff of Dade County.

Examines no-service returns and jury summonses which have been returned for possible further action.

Trains Court Support Specialists 1; recommends improvements in work techniques and procedures to superiors; advises superiors on training needs and assignment transfers.

Prepares and conducts roll calls.

Inspects personal appearances for conformance to departmental standards.

Investigates and prepares supervisory reports concerning injuries and vehicle crashes.

Supervises the assembly of papers in proper order for service and makes counter services when required.

Makes recommendations regarding hiring and discipline of Court Support Specialists 1.

Accounts for all equipment, materials, supplies, and vehicles assigned to the unit to assure proper inventory levels and operational readiness.

## Human Resources Department

### MDPD Court Support Specialist 2 (004309)

Substitutes for section supervisor when required.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of state statutes, local ordinances, and departmental rules and regulations as they pertain to court process and personnel actions.

Considerable knowledge of the geography of the metropolitan area and its roadway network.

Considerable knowledge of the various techniques used to trace and locate evasive individuals.

Considerable knowledge of the current rules of the court governing civil, criminal, and juvenile process.

Ability to communicate clearly and effectively both verbally and in writing.

Ability to plan, assign, and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain an effective working relationship with the public, attorneys, fellow employees, and superiors.

Ability to exercise judgment and discretion in interpreting rules, regulations, policies, and procedures.

Ability to give verbal explanations such as guidelines, regulations, and policies.

Ability to understand and carry out written and verbal instructions.

Ability to prepare statistical reports and maintain records.

Ability to carry out assignments with firmness, tact and diplomacy.

Ability to solicit information on the whereabouts of persons sought from interviews and record searches.

##### NATURE OF WORK

This is advanced technical work in the analysis of crime data and trends in the Metro-Dade Police Department.

Employees in this class are responsible for analyzing crime reports and statistics, and developing predictive and projective trends of criminal offenders and of crimes in targeted geographical areas. Responsibilities include reviewing a variety of police reports, coding data for computer entry, preparing informational and statistical reports for use by departmental personnel, attending meetings to exchange information, and monitoring the disposition of cases regarding habitual or career criminals. Supervision is received from a police or civilian supervisor who evaluates work for efficient and effective completion of assigned responsibilities and for conformance with departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Reviews daily police reports concerning targeted crimes including robbery, burglary, sexual battery, carrying concealed firearm, loitering and prowling, and suspicious persons, vehicle, incident and information reports; identifies ad hoc and specific data elements and codes data for entry into automated files or for manual review; verifies entered data for accuracy.

Prepares information reports from automated, manual or feedback sources in an attempt to identify known criminal offenders who are active outside the geographical boundaries in which they live or work; responds to specific requests for assistance from investigative elements by searching for subject and/or vehicle descriptions, preparing association matrices, or charts, and appropriate investigative lead reports.

Tracks targeted crimes such as burglaries, robberies and sex offenses on pin/spot/overlay maps to accurately portray current geographical locations and time frames.

Reviews daily field interview reports and identifies data elements; extracts report data and ensures entry into the district automated files using standardized formats and assures sufficient detail to permit collation and extrapolation of information pertinent to the users' needs.

Prepares and disseminates bulletins to the appropriate user groups concerning each district's targeted crimes; provides interpretive information or notes special concerns as needs are identified or requested.

Meets regularly with uniformed, investigative and other analytical personnel for the purpose of exchanging information or developing ad hoc reports; attends scheduled meetings with municipal investigative units for the dissemination and exchange of information.

Monitors and ensures appropriate action is taken regarding habitual or career criminals as defined in Florida State Statutes through personal feedback or formalized follow-up mechanisms.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of research and analytical techniques in the extraction and presentation of crime data.

Considerable knowledge of techniques used in the statistical and graphic presentation of data.

Knowledge of criminal recordkeeping systems.

Knowledge of departmental policies and procedures.

Knowledge of police and legal testimony as applied to criminal charges.

Ability to organize information and develop predictive and projective analyses of crime statistics.

Ability to select significant crime data from a variety of source documents.

Ability to deduce trends, patterns and relationships from a variety of sources which would have significance to field police officers.

Ability to analyze and compare significant data from a variety of sources and present it in logical written, graphic or verbal form.

Ability to maintain effective relationships with law enforcement personnel within and outside the department for effective exchange of criminal activity information.

Ability to express ideas and present factual material effectively, verbally and in writing.

Ability to complete assignments on a timely basis.

##### NATURE OF WORK

This is administrative and supervisory physical fitness work for the Miami-Dade Police Department.

An employee in this class is responsible for planning, developing, and coordinating a specialized physical fitness activity of wide participation for the Miami-Dade Police Department Wellness Program. Responsibilities include assisting program coordinators in developing and administering the specialized physical fitness activity as a complement to the overall program. Work includes analysis of physical fitness center facilities, as well as, smaller fitness workrooms at substations and major entities. The employee exercises considerable independent judgment and technical expertise in promoting and organizing physical fitness operations. Supervision is exercised over a staff of subordinate specialized employees engaged in various phases of the program. General supervision is received from an administrative superior who reviews work for attainment of Wellness Program goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, organizes, and directs the promotion and administration of a specialized phase of the Wellness Program, including prescription of a physical fitness program, special events, women's and men's activities, aquatics, and related special activities.

Confers with program coordinators and instructional personnel in planning the effective use and future development of nutritional guidance and physical fitness activity; prepares program procedures and conducts classes for instructional personnel on program methods; provides advice and assistance on unusual or difficult problems.

Assists in the preparation of budgetary documents and provides special statistical and narrative reports as necessary.

Conducts continuing research and studies in the physical fitness area and recommends actions to meet departmental needs.

Demonstrates and explores techniques, procedures, materials, and equipment associated with the Wellness Program.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related works as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices, and techniques of physical fitness and nutritional health.

Thorough knowledge of the physical fitness needs of participating departmental employees.

Thorough knowledge of the principles, practices, and techniques of instruction in the health fitness area.

Knowledge of supervisory principles and practices.

Knowledge of modern physical fitness equipment.

Knowledge of departmental administrative policies and procedures.

Ability to supervise a staff of subordinates in a manner conducive to full performance and high morale.

Ability to plan and organize an effective physical fitness and nutritional guidance program.

## Human Resources Department

### Police Dispatch Supervisor 1 (004381)

#### Minimum Qualifications

High school diploma or GED. Three years of experience as a Police Dispatcher for Miami-Dade County are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized supervisory work supervising an assigned shift of Police Dispatchers in a central communications network.

Employees in this class are responsible for supervising a shift of Police Dispatchers operating two-way radio transmitting equipment to dispatch and communicate with law enforcement employees. Responsibilities include scheduling of shift assignments, assisting in ensuring that bureau objectives are met, conducting roll calls, and receiving and handling complaints or questions from citizens and police personnel concerning dispatch operations. Related duties include maintaining compliance with departmental and bureau policies and procedures, ensuring that telephone, computer systems and radio equipment are functioning properly, and reporting equipment malfunctions. Supervision is exercised over an assigned shift of Police Dispatchers. Supervision is received from a shift commander who reviews work for compliance with departmental policies and procedures, and efficient and effective shift operations.

##### ILLUSTRATIVE TASKS

Plans, schedules, supervises and reviews the work of subordinate Police Dispatchers operating two-way radio transmitting equipment to dispatch and communicate with police personnel in the field.

Supervises and monitors the on-the-job training of Police Dispatchers in radio techniques and operational procedures; develops and recommends training aids and materials for classroom instruction of new employees; assists in classroom training.

Assists the shift commander in analyzing and revising operational policies and procedures; compiles information and prepares status reports and studies to improve bureau operations; assists in the planning and implementation of bureau projects.

Coordinates the periodic and emergency utilization of the manual card dispatch system and the activation of the back up dispatch facility; updates necessary resource materials and maintains appropriate supplies to accomplish bureau functions.

Maintains necessary documentation to update shift commander's log, on-call and key personnel rosters; monitors and documents the NAWAS system.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on work-related problems; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operating characteristics of computer-aided dispatch systems.

Considerable knowledge of radio transmitting techniques and procedures pertaining to the dispatch of mobile law enforcement units.

Considerable knowledge of departmental regulations pertaining to the dispatch of law enforcement personnel.

Considerable knowledge of the roadways and municipal boundaries of Dade County.

Knowledge of supervisory principles and practices.

Knowledge of the principles of management and public administration.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to react promptly and correctly in emergency situations.

Ability to adjust Police Dispatcher assignments in response to a variety of changing circumstances.

Ability to train subordinates in current telecommunications techniques and in new and revised operational procedures.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to analyze a variety of administrative problems and make sound recommendations for their resolution.

##### NATURE OF WORK

This is advanced professional and supervisory social work in management of a social service activity in an assigned geographical area of a county department or agency.

Employees in this class provide professional supervision and management direction to a group of social workers and a supporting staff in a district or regional office including outlying units. Services supervised typically include intake, casework services, review of financial and medical needs, counseling, and planned delivery of social services to eligible individuals and their families. Additional responsibilities include serving as liaison between the department, the community and other agencies in the area, serving as field instructor for undergraduate and graduate students and providing training for other trainee personnel as assigned. Incumbents may work in welfare or other programs providing social services to special clients in a community services activity. Some incumbents in the class have responsibility for county-wide social service programs of a limited nature. Supervision is received from a professional superior in a central location who confers on difficult cases and evaluates quality of results through personal observation of area operations and analysis of reports and records.

##### ILLUSTRATIVE TASKS

Plans and supervises work of an area staff engaged in intake and financial assistance service, referral to appropriate agencies and related activities for clients with various financial, medical or other needs; makes appropriate case assignments to subordinate social workers; assists subordinates in arriving at decisions in emergency or complex cases or in dealing with difficult clients; interprets departmental policies as needed.

Authorizes expenditures of funds within departmental regulations and guidelines; approves issuance of emergency financial grants and the solicitation of emergency housing arrangements.

Reviews casework reports and recommendations of subordinates; evaluates the quantity and quality of work output to encourage staff professional growth and development as well as maintain adherence to acceptable departmental standards, policies and procedures; visits outlying offices to review and assist in work operation as needed.

Counsels with clients who have particular needs; assists youths in return to school, or referral to jobs; counsels with clients and their family members in an endeavor to resolve behavioral patterns interfering with adjustment to normal social living; refers clients to diagnostic assessment or other assistance as needed.

Serves in a liaison capacity for the department within the area; attends meetings of other county or state agencies such as those dealing with rehabilitation services, housing and urban development or social and economic state services.

Maintains public relations with area community groups; attends meetings such as those of senior citizen organizations or committees planning migrant services; gives speeches on agency functions to schools or community agencies; explains departmental requirements to other groups serving community clients.

Serves as a primary field instructor in the training of assigned undergraduate and graduate social work students; assigns, reviews and evaluates trainee work; completes reports covering nature of assignments, application of skills and summaries of student strengths and limitations; provides orientation and training to various other trainees.

Supervises area office administrative operations including requisitioning of supplies and equipment, preparing budget requests, completing performance evaluations and hiring new personnel; prepares and submits required workload reports and other special reports or data as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the professional principles, techniques and practices of social work.

Considerable knowledge of departmental policies, procedures and regulations relating to intake, casework and other services.

## Human Resources Department

---

### Juvenile Assessment Counselor Supervisor 1 (004397)

Considerable knowledge of eligibility, financial and medical assistance provisions and regulations in related federal, state and county programs.

Considerable knowledge of various federal, state and local resources available within the community for financial, medical and other rehabilitation services.

Considerable knowledge of socio-economic and client characteristics in the area of assignment.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of public relations techniques.

Knowledge of normal and abnormal psychology and human behavioral patterns.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to train and guide personnel in the proper interpretation and implementation of departmental policies and procedures.

Ability to arrive at appropriate decisions in the provision of casework services for clients and the expenditure of funds.

Ability to conduct interviews with clients in various age groups tactfully, objectively and persuasively.

Ability to counsel clients with behavioral problems effectively.

Ability to develop and maintain effective working relationships with officials in other governmental and community agencies.

Ability to motivate, train and evaluate interns and graduate social work students.

Ability to express ideas clearly and concisely, orally and in writing.

Ability to supervise accurate maintenance of workload, expenditure and other records.

Supervision is received from a professional superior who evaluates quality of results through personal conferences and analysis of records and activity reports.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of subordinate social workers engaged in preliminary screening for welfare eligibility; authorizes expenditure of public funds after evaluating casework reports and recommendations prepared by the staff; assists and advises on eligibility conditions or the resolution of unusual and difficult cases.

Supervises and participates in social service programs for financial assistance including preliminary eligibility determinations, referrals to appropriate agencies, issuance of emergency financial grants and emergency housing arrangements.

Supervises and participates in casework services for the care and placement of dependent children; participates in the inspection of foster homes to be used for child care; places children in homes and gives supervision throughout the placement period.

Plans, assigns and supervises work of subordinate social workers engaged in community services for elderly residents of low cost housing; visits tenants to determine, analyze and evaluate problems; contacts community agencies to refer cases; follows up on referrals to determine any supplemental service required; interprets services of the agency to the community; performs intensive casework with families or individuals where client problems are complex to assure benefit from support measures in-so-far- as possible.

Performs advanced professional casework services to resolve more complicated cases such as those where intensive service is required to overcome destructive effects of emotional or environmental problems.

Maintains liaison with police, school, medical and court officers; consults with and makes referrals to specialists; attends and participates in technical conferences for cooperative planning and group training; prepares detailed case studies for teaching purposes as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the philosophy, principles and practices of social work including professional casework methods and techniques of counseling.

Considerable knowledge of laws, rules and practices relating to the provision of public assistance administered under various provisions of federal, state and county laws.

Considerable knowledge of agency policies, procedures and regulations relating to the area of assignment.

Considerable knowledge of various public and private community resources available for rehabilitation services.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to conduct interviews with clients effectively and persuasively.

Ability to obtain and analyze case information and reach sound decisions on the basis of such information.

Ability to prepare comprehensive case history reports of data necessary for social diagnosis.

#### Job Specifications

##### NATURE OF WORK

This is routine security work in maintaining order and discipline among inmates held in County correctional facilities.

Employees in this class are responsible for receiving and controlling inmates, preventing escapes and enforcing departmental rules and regulations on an assigned shift at a County correctional facility. Duties include maintaining various records on inmates, supervising work details, transporting inmates to a variety of medical or correctional institutions, and ensuring the proper discharge of inmates. Work occasionally involves an element of personal danger during emergencies and in controlling potentially violent inmates. Duties are performed in accordance with established departmental regulations and security procedures. Supervision is received from a superior officer who reviews work for compliance with established rules and regulations.

##### ILLUSTRATIVE TASKS

Receives and processes newly arrested individuals through the initial phases of jail operations including booking, explaining procedures, personal search and property surrender, computer background investigation, photo and fingerprints and affidavit verification. Maintains order and constant vigilance over inmates during all phases of jail operations, emergency situations, courtroom proceedings, medical treatment at a hospital facility, and transportation. Patrols assigned areas of the facility and reports unusual circumstances and incidents; screens visitors, applies leg and arm constraints to inmates, issues passes, makes daily head counts, and operates electrical and manual gate controls to maintain security. Maintains records on inmates by keeping an accurate jail card, recording major developments during the course of the inmate's trial, and incarceration, to document the duration of an inmates time in the correctional facility. Supervises inmate work details and participates in various work detail activities such as cleaning, painting, insect spraying, serving meals and other meal-serving and maintenance responsibilities to ensure the cleanliness of the correctional facility and proper food service for inmates. Releases inmates from the correctional facility by interpreting the inmate jail card, providing information on trial dates and legal procedures, and issuing personal property. Transports inmates committed to a medical facility or to another correctional institution via a motor vehicle; carries firearms and adheres to proper security practices and procedures to insure the security of transported individuals and the safety of the public. Escorts inmates to court proceedings and serves as bailiff, as required. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the rules, regulations and procedures concerning the receiving, confinement and release of inmates.

Knowledge of correctional facility operations.

Knowledge of modern security practices and procedures.

Knowledge of codes and abbreviations used in computer terminal operations relating to booking inmates.

Knowledge of personal and cell search techniques.

## Correctional Officer (004502)

Knowledge of legal procedures pertaining to inmate court appearance, basic court terminology and bonding process.

Knowledge of inmate release procedures.

Knowledge of the geography of the correctional facility to which assigned.

Knowledge of arithmetic.

Some knowledge of the behavioral characteristics of incarcerated individuals.

Ability to enforce department regulations and procedures.

Ability to react promptly and correctly in emergency situations.

Ability to understand and follow verbal and written instructions.

Ability to prepare reports and maintain records.

Ability to perform simple arithmetic calculations.

Ability to assign and supervise inmates in various correctional facility maintenance and operational duties.

Ability to operate a firearm. Skill in the care and use of firearms.

Ability to anticipate and recognize unacceptable behavior by inmates.

Physical strength and agility sufficient to perform assigned duties.

REV 02/2012

### **Nature Of Work**

This is security and limited rehabilitation work in the care, custody, and control of inmates held in Miami-Dade County Corrections and Rehabilitation Department facilities which operate on a 24-hour, 7 days per week basis. Applicants must be able to work any assigned shifts such as day, afternoon, and midnight to include weekdays, weekends, and holidays, as needed.

Applicants are required to attend one of the orientation sessions that will be scheduled on a first-apply, first-scheduled basis. The orientation sessions will be scheduled between March 13 and April 6, 2012. Applicants will be contacted by the email address and phone number listed on their online application, and given an orientation date and time. Orientation will be held at the Miami-Dade Corrections and Rehabilitation Department (MDCR), Personnel Management Bureau, Dr. Martin Luther King, Jr., Office Plaza, 2525 NW 62nd Street, Suite 2000, Miami, FL 33147.

Applicants must bring the following original documents to their orientation session:

- Completed Applicant Personal History Questionnaire (APHQ)
  - Birth Certificate, or U.S. Passport, or Naturalization Certificate (United States citizenship is required for employment)
  - Social Security Card (with current legal name and signature)
  - Valid Driver License (if you are not a Florida resident, a valid Florida driver's license must be obtained prior to employment)
  - Name change document(s); e.g., marriage certificate, divorce decree, court document for name change, etc.
  - DD214 - Member 4 form (for each enlistment period, if applicable)
  - Court disposition(s) for all arrests, including juvenile and traffic arrests, and copies of arrest affidavits
  - Documents for each year of self employment; e.g., corporate papers, business license, etc.
  - A copy of your work history (Social Security Earnings Information) for the past 10 years (if applicable depending on years in the workforce) from the Social Security Administration (SSA) or proof of submitting a request to the SSA for the certified work history.
- Because of the cost associated with obtaining this information, applicants will be allowed to defer requesting the certified work history until

### Correctional Officer (004502)

they have passed the polygraph and phase 1 of the psychological examination.

- One (1) passport photo
- Passing score from Florida Basic Abilities Test (FBAT) or Criminal Justice Basic Abilities Test (CJBAT) for Correctional Officers
- An official high school or General Education Diploma (GED) transcript, or official transcript from an accredited college/university verifying completion of one of the following:
  - 1) at least 30 semester hours
  - 2) at least 45 quarter hours
  - 3) an Associate Degree or higher

Official transcripts must be in a sealed envelope sent directly by the institution. Transcripts from outside of the United States or its territories shall be validated by Miami Dade College or another authorized institution.

In accordance with established policies and procedures, MDCR may discontinue processing any applicant who fails to respond to any phase of the selection process in a timely manner.

After submitting the online application, applicants must log onto [www.miamidade.gov/corrections/recruitment.asp](http://www.miamidade.gov/corrections/recruitment.asp) to obtain the Applicant Personal History Questionnaire.

Applicants will be subject to an extensive screening process to include background investigation; fingerprint check; polygraph, psychological and medical examinations.

### Correctional Corporal (004503)

#### Minimum Qualifications

For Correctional Officers hired prior to March 2, 2010:

Currently employed by Miami-Dade County as a Correctional Officer with permanent status and two years of continuous full-time service as a Correctional Officer with Miami-Dade County immediately preceding the examination date. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering their most recent rating period to be eligible for the examination. Must possess a State of Florida Correctional Officer certification.

For Correctional Officers hired on or after March 2, 2010:

Currently employed by Miami-Dade County as a Correctional Officer with permanent status and five years of continuous sworn full-time employment immediately preceding the examination date. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering their most recent rating period to be eligible for the examination. Must possess a State of Florida Correctional Officer certification.

#### Job Specifications

##### NATURE OF WORK

This is advanced security work with supervisory responsibility in maintaining order and discipline among inmates held in County correctional facilities.

Employees in this class are responsible for supervising subordinate correctional officers on an assigned shift and in a specific area or function of a County correctional facility. Duties include performing more difficult and responsible tasks in the processing of bookings and releasing of inmates, serving in various training capacities to assist in developing subordinates' skills, testifying in court and at hearings, and reviewing and preparing a variety of reports. Work occasionally involves an element of personal danger during emergencies and in controlling and directing the control of potentially violent inmates. Duties are performed in accordance with established departmental regulations and security procedures, however employees must exercise some discretion in various phases of work. Supervision is exercised over subordinate correctional officers or other specialized clerical employees depending upon the area of assignment. Supervision is received from a superior officer who reviews work for compliance with established rules and regulations and for effectiveness in carrying out assigned responsibilities.

##### ILLUSTRATIVE TASKS

Supervises a staff of subordinate correctional officers assigned to a specific shift, engaged in receiving and controlling inmates, preventing escapes and enforcing departmental rules and regulations within a specific area or in a specific function of a County correctional facility.

Maintains order and discipline among inmates during all phases of correction operations and judicial processes to ensure the security of the correctional facility or government offices.

Provides training to new employees in correctional facility policies, procedures and operations; instructs training classes; coordinates scheduling and instruction of required training courses.

Supervises the receipt, storage and issue of inmate property and money by subordinate specialized employees; ensures property transfers occur within established departmental rules, regulations, and procedures.

Supervises inmate work details and performs various maintenance tasks to ensure cleanliness of facility.

Supervises control booths, key control and general entry and exit areas; assigns new inmates to cells; books arrested individuals in order to officially assume custody of inmates and directs recently booked individuals through initial phases of jailing operations.

Ensures proper discharge of inmates upon receipt of correct authorization; receives and reviews cash and surety bail bonds for correctness and legality.

Coordinates the transportation of inmates committed to medical facilities or to another correctional institution via motor vehicles; ensures conformance with established regulations and procedures to insure the security of transported individuals and the safety of the public.

Testifies in court and at hearings and provides depositions concerning various corrections related activities.

## Human Resources Department

### Correctional Corporal (004503)

Serves in the capacity of a superior as required, to provide continuity of operations or to supplement staff during personnel shortages. Reviews reports prepared by subordinates and prepares reports, forms and logs concerning inmate incidents, legal decisions and work activities.

Coordinates the examination of incoming and outgoing mail to control contraband.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the rules, regulations and procedures concerning the receiving, confinement and release of inmates.

Considerable knowledge of correctional facility operations.

Considerable knowledge of modern security practices and procedures.

Considerable knowledge of legal procedures pertaining to inmates' court appearances, basic court terminology and the bonding process.

Considerable knowledge of inmate release procedures.

Knowledge of supervisory principles and practices.

Knowledge of codes and abbreviations used in computer terminal operations relating to booking inmates.

Knowledge of personal and cell search techniques.

Knowledge of the geography of the correctional facility to which assigned.

Knowledge of arithmetic.

Knowledge of the behavioral characteristics of incarcerated individuals.

Ability to enforce departmental regulations and procedures.

Ability to react promptly and correctly in emergency situations.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to understand and follow verbal and written instructions.

Ability to prepare reports and maintain records.

Ability to perform simple arithmetic calculations.

Ability to assign and supervise inmates in various correctional facility maintenance and operational duties.

Ability to operate a firearm.

Ability to train subordinates in effective corrections techniques.

Ability to anticipate and recognize unacceptable behavior by inmates.

Skill in the care and use of firearms.

Physical strength and agility sufficient to perform assigned duties.

REV 3/11

#### Nature Of Work

This is advanced security work with supervisory responsibility in maintaining order and discipline among inmates held in County correctional facilities.

**WRITTEN EXAMINATION:** The written examination will evaluate knowledge of departmental rules and regulations, corrections and rehabilitation practices, supervisory principles and practices, labor relations, and emergency medical response. The Reading List authorized for the 2007 Correctional Corporal promotional examination should be followed in the preparation for this examination. Copies of the Reading List and relevant DSOP revisions must be picked up at the Corrections and Rehabilitation Department, Personnel Bureau, Monday through Friday, 8:30 a.m. to 4:30 p.m., from June 4, 2007 until October 9, 2007. Photo identification must be presented in order to receive the aforementioned materials and to apply for the examination. Employees who qualify on this examination will be on a certified list for a period of two years. Seniority points will be added to the score of employees qualifying on the competitive examination at the rate of .02308 per pay period of continuous, full-time service as a Correctional Officer to a maximum credit of ten years of service or six points. Only those individuals unqualified to take the examination will be notified in writing by Miami-Dade County, Employee Relations Department. Applicants deemed qualified will receive no further notification and are to proceed to the examination as scheduled. Applicants requesting Veterans' Preference must submit Veterans' Preference documents and complete a Veterans' Preference Claim Form at the time of application. Applications accepted on-line from Monday, June 4, 2007 through Tuesday, September 4, 2007. Location of Examination:

### Job Specifications

#### NATURE OF WORK

This is advanced and supervisory security work in a County correctional facility.

Employees in this class are responsible for supervising subordinate correctional officers on an assigned shift in a large area of a correctional facility or serving in various capacities as the supervisor of a support service function. Responsibilities include making decisions concerning emergency circumstances, making duty assignments for subordinates, investigating inmate complaints, reviewing and preparing reports, inspecting facility security and serving in various operational and correctional support activities. Duties occasionally involve an element of personal danger during emergencies and in controlling and directing the control of potentially violent inmates and incumbents must exercise independent judgment in responding to problems of inmate control and in enforcing established security rules and regulations. Supervision is exercised over subordinate correctional officers, specialized and clerical employees depending upon the function supervised, who assist with various phases of correctional activities. General supervision is received from a superior officer who reviews work through personal conferences and observations, inspections and review of reports for completion of assigned responsibilities.

#### ILLUSTRATIVE TASKS

Serves as an assistant officer in command of a shift of subordinate correctional officers assigned to a large area of a correctional facility; assigns officers to various activities, inspects security operations, oversees food service activities and participates in subduing disturbances in all cell areas.

Investigates inmate complaints and unusual incidents to determine causes and identify problems.

Supervises and participates in activities concerning receiving and processing inmates, inmate bookings, attorney and bondsmen contacts, inmate release, food delivery, cell assignment and security of correctional facility operations.

Reviews reports prepared by subordinates and prepares reports concerning security problems, incidents and work activities; makes recommendations regarding changes in security and operational policies and procedures.

Supervises a work unit involved in the transporting of inmates to court appearances, ensuring the security of the courtroom, and ensuring the secure return of inmates to correctional facilities.

Maintains order and discipline among inmates during all phases of correction operations and judicial processes to assure the security of the correctional facility or government offices.

Supervises operations and enforcement of departmental regulations for a complete shift at a minimum security facility; makes duty assignments and inspects inmate activities.

Supervises support services such as contraband control, facility maintenance, and warehousing and distribution of supplies, materials and equipment.

Serves in the capacity of a superior as required, or performs duties ordinarily associated with subordinates to supplement staff during personnel shortages and during crucial situations.

Testifies in court and at hearings and provides depositions concerning various corrections related activities.

Coordinates transportation and plans itineraries for inmates committed to medical facilities or to other correctional institutions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the rules, regulations and procedures concerning the receiving, confinement and release of inmates.

## Human Resources Department

Must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period to be eligible for the examination. Must possess a State of Florida Correctional Officer certification.

### Job Specifications

#### NATURE OF WORK

This is responsible supervisory security enforcement work in the Miami-Dade County Department of Corrections and Rehabilitation. Employees in this class serve as the commander for an entire shift at a large correctional institution or as a section supervisor for a major staff service. Work involves responsibility for coordinating and enforcing security regulations and inmate disciplinary control throughout the correctional institution. Duties require the exercise of command authority in directing all shift operations of the facility. Supervision is exercised over subordinate correctional and support services personnel by assignment and inspection of work for adherence to departmental policy and regulation. Work is reviewed by a superior officer who reviews performance through report analysis, personal conferences and periodic inspections of the entire correctional institution.

#### ILLUSTRATIVE TASKS

Commands an entire shift at a large correctional institution; coordinates all operations of inmate booking, searching, bonding, cell assignment, court appearance, feeding and work details.

Supervises the business management section including personal property control, training and personnel administration unit, commissary and supply services.

Coordinates and supervises all support services of the operations division including facility maintenance, laundry operation, medical care, food preparation and contraband control.

Instructs subordinate staff on security measures and disciplinary control measures.

Assigns correctional officers to work locations, develops work schedule projections for the entire shift.

Evaluates performance of assigned supervisory staff, recommends promotions, transfers and training programs.

Ensures that all required supplies are available as needed and that all equipment, machinery and buildings are in proper working order.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the policies, regulations and procedures for the confinement and security of inmates.

Thorough knowledge of correctional facility operations including supply management, contraband control, plant maintenance, health services and laundry operations.

Considerable knowledge of the regulations pertaining to inmate bookings, bonding, release, court processing and behavior evaluation.

Considerable knowledge of the various rehabilitation techniques and programs utilized in the field of corrections.

Knowledge of the typical behavior patterns of incarcerated individuals and emotionally disturbed inmates.

Ability to plan and supervise the work of line and staff subordinates in a manner conducive to full performance and high morale.

Ability to train subordinates in all phases of security and correctional work.

Ability to react promptly and correctly in emergency situations.

Ability to provide accurate information flow on diversified operations to assist in management decision making.

Skill in the care and use of firearms.

Physical strength and agility to control unruly inmate behavior.

#### Job Specifications

##### NATURE OF WORK:

This is administrative security enforcement work in the Miami-Dade County Department of Corrections and Rehabilitation. Employees in this class administer and coordinate all activities of a principle organizational segment such as a maximum security correctional facility or a minimum security detention facility, or serve in an administrative capacity. Work involves responsibility for the interpretation of management policy in the daily operation of correctional facilities and in the administration of essential staff and support services. Duties require the exercise of independent judgment and discretion in analyzing operations and recommending solutions to problems and improvements in efficiency and economy. An additional responsibility requires the continuous inspection and review of correctional and security procedures to insure the proper application of directives. Supervision is exercised over subordinate ranking correctional and support services personnel by review of activity reports, personal conferences and the successful operation of the assigned activity. General supervision is provided by a correctional superior who reviews work by conference and management analysis techniques for the successful accomplishment of departmental goals and objectives.

##### ILLUSTRATIVE TASKS:

Plans, assigns, and inspects all operations of a large correctional facility; provides for proper security enforcement, inmate booking and release, support services and recordkeeping. Plans, assigns, and inspects all operations of a minimum security detention facility; provides for proper security enforcement, administration, work detail activities and all support services. Administers a departmental support function such as internal affairs, legal/discipline issues, affirmative action, management analysis. Investigates living conditions in the jail facility, evaluates complaints of inmates, attorneys, bonds persons and others; recommends appropriate action to superiors and reviews for effectiveness. Coordinates correctional facility operations with the various courts, law enforcement agencies, prosecuting authorities, defense counselors, bonds persons and probation staff. Conducts assigned research in the field of corrections and rehabilitation; analyzes various studies and reports; submits proposals for new approaches to superiors. Prepares and submits preliminary budgetary request for personnel, equipment and supplies; recommends program changes and capital expenditures. Represents the department in conferences with other governmental agencies, private organizations, news media and public officials. Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS:

Extensive knowledge of the policies, regulations, and procedures for the confinement and security of inmates. Extensive knowledge of correctional facility operations including supply management, commissary and food services, contraband control, plant maintenance, health services and laundry operations. #### NATURE OF WORK

This is skilled cooking and limited supervisory work in a Metro-Dade County correctional institution.

Employees in this class are responsible for the performance of skilled cooking tasks and related supervision in the large-scale production of meals in a County correctional institution kitchen. Emphasis of the work is on the performance of a variety of skilled cooking tasks, directing inmate labor assisting in various food service activities to meet serving deadlines, ensuring proper portioning of food items, providing continuous training to kitchen trustees, operating standard cooking equipment, and supervising cleaning tasks to meet established sanitary requirements. Supervision is exercised over kitchen trustees assisting in various phases of food service operations. Supervision is received from a supervisory cook who supervises food preparation, serving functions and cleaning activities.

#### ILLUSTRATIVE TASKS

Directs inmate labor in tray make-up, loading food carts, use of steam trays and rethermalization units; ensures proper handling, packaging and storage of food items; meets serving deadlines.

Operates standard cooking utensils and equipment including mixing machines, food choppers, wrapping machines, tray conveyors, and slicing machines.

Trains cooks and inmates working as kitchen trustees on preparation of meals to meet deadlines for tray line and cafeteria; ensures proper portioning of food items to avoid conflicts among inmates over uneven portions.

Discusses menu changes or utilization of leftovers with immediate supervisor.

Exercises caution and control in supervising inmates working as kitchen trustees to avoid injuries, inmate escapes, theft of food items, and prevent contraband from entering the area.

Prepares salads and sandwiches, and slices meats; assists in the preparation of meats, various gravies, sauces, and baking; prepares special dishes for inmates with special dietary considerations.

Requisitions food items and supplies for cooking operations.

Participates in portioning and distribution of soups, starches and vegetables for a variety of breakfast, lunch and dinner menus.

Supervises inmates in cleaning kitchen items including utensils, food trays and rethermalization units to meet American Correctional Association sanitation standards.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of modern methods and equipment used in a large-scale food service operation.

Knowledge of standard and fancy recipes and cooking methods for various types of breakfast, luncheon and supper menus.

Knowledge of supervisory principles and practices.

Knowledge of American Correctional Association food regulations.

Knowledge of sanitary requirements and the potential hazards in food preparation.

Knowledge of food menus, general nutrition and modified diets, and portion control.

Ability to follow written instructions in menus and recipes and perform skilled cooking.

Ability to supervise a group of inmates working as kitchen trustees in accordance with correctional policies and regulations.

Ability to follow and transmit precise verbal and written instructions.

Ability to use and operate a variety of institutional food service utensils and equipment.

Ability to work under conditions of high temperature and stress.

Ability to meet serving deadlines in a large-scale food service operation.

Skill in cooking.

##### NATURE OF WORK

This is skilled supervisory cooking work in a Metro-Dade County correctional institution.

Employees in this class are responsible for the supervision of skilled cooks and unskilled inmates serving as kitchen trustees in the large-scale production of meals in a County correctional institution kitchen. Responsibilities include supervising the cooking portion of meal preparation, meeting serving deadlines, ensuring equal portions and the quality of food servings, employing precautionary measures to ensure compliance with proper sanitary requirements, estimating food needs, requisitioning food supplies and related equipment, planning a variety of standard menus, and coordinating work with cooks on subsequent shifts. Supervision is exercised over skilled cooks and kitchen trustees engaged in various phases of food service operations. Supervision is received from a food service supervisor who reviews work for effectiveness in food preparation, serving functions and cleaning activities.

##### ILLUSTRATIVE TASKS

Plans, schedules and arranges work flow for a large number of skilled cooks and inmates serving as unskilled kitchen trustees in a County correctional institution kitchen; schedules operations to meet serving deadlines.

Supervises the cooking portion of food preparation; roasts meats or prepares special dishes as required; ensures recipes are followed to avoid under/over cooking and/or food loss through improper preparation.

Employees precautionary measures to guard against health hazards and ensures compliance with proper sanitary requirements.

Provides continuous training for new inmates working in a kitchen trustee capacity; exercises caution and control in supervising inmates to avoid injuries, inmate escapes, theft of food items, and prevent contraband from entering the area.

Estimates food needs for standard menus; requisitions food supplies and equipment and maintains related records; streamlines grand-scale food preparations for an economical and efficient operation.

Coordinates planning with cooks on subsequent shifts; discusses preparation of special menus with food service supervisors.

Provides advice and assistance to skilled cooks in food preparations.

Supervises kitchen trustees in cleaning food service areas associated with cooking to maintain standard American Correctional Association sanitary requirements.

Ensures the use of proper fire safety procedures for a large correctional facility kitchen and precautionary measures governing inmates during emergency situations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

##### NATURE OF WORK

This is specialized clerical work in the receipt, storage and release of prisoner property and money during incarceration in a county detention facility.

Employees in this class are responsible for receiving all money and personal property from inmates upon being booked into a county detention facility, accurately listing personal property and money received on the appropriate forms and in automated record systems, and issuing receipts to inmates. Duties include returning money and personal property to inmates upon release by identifying the inmate and assuring return of the correct property. Incumbents are responsible for assuring the accuracy of transactions involving inmate money and personal property and may be assigned to work various shifts. Duties involve working around incarcerated individuals in a county detention facility and incumbents follow prescribed security procedures and departmental regulations in the performance of assigned duties.

Supervision is received from a correctional superior who reviews work for conformance with established departmental rules and regulations and assists as questions arise during operations.

##### ILLUSTRATIVE TASKS

Receives all money, personal property and contraband items from prisoners who are booked into a county detention facility; accurately counts and lists money received on the appropriate form or using a computer terminal; accurately lists and describes all prisoner personal property on the appropriate form or in a computer system; issues receipts for money and for personal property to prisoners; attaches inmate picture to inmate property and money records.

Issues all money and personal property to prisoners upon release from the facility; verifies the identity of the prisoner and assures the return of the right property and money to the right inmate; accurately counts and issues prisoner money both in cash and checks.

Issues items of personal property to prisoners such as clothing or reading material to be taken by the prisoner to the cell; issues personal property or money to inmate friends or relatives as authorized; deletes property items issued from the property record; date stamps records and obtains inmate's signature to prevent claims by prisoners for the property upon release.

Receives clothing or money from inmate friends or relatives on behalf of prisoner for use during incarceration; correctly identifies the inmate for which the clothing or money is intended and issues receipts to delivering party.

Counts all money in the property room at the beginning of the shift; operates a computer terminal and adding machine to record money transactions and maintain a control total of money received; prepares computerized records at end of shift, showing total money received, payouts in cash and check, and correct cash balance on hand.

Prepares prisoner property for transfer with prisoners to other detention facilities; obtains signatures of prisoners and transporting officer.

Reviews daily release list and compares to property records; places property records of released inmates who did not claim property in released card file with release date.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of departmental practices and procedures in the receipt, storage and issue of prisoner money and personal property.

Knowledge of the rules and regulations pertaining to prisoner property accountability.

Knowledge of detailed inventory recordkeeping practices and procedures.

Knowledge of business arithmetic.

Knowledge of the operation of computer terminals, adding machines and other office equipment.

Some knowledge of the typical behavior patterns of incarcerated individuals.

Some knowledge of the rules, regulations and procedures governing confinement and release of prisoners.

Ability to perform cash, checkbook and property transfer transactions with speed and accuracy.

Ability to make rapid and accurate mathematical computations.

##### NATURE OF WORK

This is professional prisoner counseling and casework in providing inmates with increased awareness of developmental opportunities and reorienting inmates to a community living and working environment.

Employees in this class are responsible for assisting inmates within a correctional facility in various matters which they are unable to resolve due to incarceration. Duties include arranging for legal assistance and medical attention, providing religious counseling and any social service need that may arise. Responsibilities include counseling and guiding inmates toward a rehabilitative program best suited to their needs. Incumbents participate on various committees as assigned, and prepare incident reports concerning inmate offenses. Incumbents also exercise independence in evaluating information and in setting priorities for various needs and requests of prisoners. Supervision is received from professional and administrative superiors who review and evaluate counseling and guidance activity for conformity with established policies and regulations and for quality of results.

##### ILLUSTRATIVE TASKS

Establishes rapport with inmates to mitigate tensions within the facility; refers their requests to the proper authority for appropriate action; keeps inmates aware of the various rehabilitative programs available to them.

Provides for the availability or the means of obtaining legal assistance, religious counseling or social services; recommends inmates to vocational, academic and job placement programs.

Obtains information concerning court dates, release dates and court actions taken on an inmate's case.

Investigates inmate offenses and prepares incident reports.

##### NATURE OF WORK

This is professional and supervisory prisoner casework in providing rehabilitative programs to an assigned group of inmates within a correctional facility.

Employees in this class are typically responsible for conducting a major rehabilitative program such as work furlough, training and treatment, basic skills or social service referral. Responsibilities include counseling inmates on academic, vocational or employment programs, explaining rules, regulations, requirements and procedures of a particular program to participants, and may include assisting inmates and their families with personal or environmental problems requiring various kinds of social service assistance. Supervision is exercised over subordinate counselors, correctional officers and a clerical staff, or in the absence of supervisory responsibility, involves managing a more complex rehabilitative program including a large number of participants and requiring a high degree of coordination. This class differs from Prisoner Counselor 1 in that incumbents are generally in charge of a rehabilitative program as opposed to basic counseling in connection with rehabilitation. Supervision is received from professional superiors who review and evaluate program activity for conformity with established policies and regulations and for quality of results.

##### ILLUSTRATIVE TASKS

Coordinates an academic, vocational or employment program for an assigned group of prisoners, utilizing community resources; reviews and evaluates applications made by inmates for participation in a program; serves as a participant on committees responsible for placement of inmates in rehabilitative programs.

Counsels inmates in more difficult cases relating to academic, vocational and social service needs; guides counselors in their activities of obtaining assistance for and counseling with various prisoners.

Develops job opportunities and maintains contact with employers and educational instructors; insures the availability of materials required by various academic and vocational schools.

Investigates inmate offenses and program rule violations and prepares incident reports.

Serves on disciplinary and extra gain time committees and makes recommendations for extra gain time rewards.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of departmental policies and operational procedures.

Considerable knowledge of legal requirements pertaining to incarcerated individuals.

Considerable knowledge of rehabilitative and social service programs available for inmates.

Considerable knowledge of established procedures in recommending inmates for participation in rehabilitative programs.

Considerable knowledge of behavior patterns of incarcerated individuals.

Considerable knowledge of interviewing and counseling techniques in identifying and analyzing problems and providing assistance in the rehabilitation of prisoners.

Knowledge of vocational training, academic education or job placement needs and opportunities.

Ability to supervise and guide a professional staff in a manner conducive to full performance and high morale.

Ability to coordinate and manage a rehabilitative program.

Ability to achieve rapport with inmates so as to motivate and assist them in difficult counseling cases.

Ability to maintain effective working relationships with personnel in community resource agencies and educational establishments.

Ability to counsel and guide inmates in academic education, vocational training, job placement and social service needs.

Ability to recognize unusual behavior patterns on the part of inmates.

Ability to supervise the preparation of or prepare correspondence, case histories and comprehensive reports.

##### NATURE OF WORK

This is professional rehabilitation and counseling work in a program of religious guidance and spiritual welfare for patients or inmates in a county facility.

An incumbent of this class is responsible for counseling and ministering to patients, prisoners, and members of their families, for conducting worship services and planning devotional activities. Emphasis of the work is on assisting patients distraught due to illness, family members who are bereaved or prisoners who need guidance in achieving a successful return to normal activity. Duties require the exercise of considerable knowledge of human behavior, and personality deviations which precipitate criminal acts. Work is performed under an administrative superior who provides guidance in departmental procedures and policies, and provisions of state statutes or local laws affecting the program of the facility.

##### ILLUSTRATIVE TASKS

Schedules and conducts institution worship services; conducts individual or group religion instructional services of a rehabilitative nature. Interviews and counsels inmates and patients and encourages participation in religious activities; advises on personal and family problems and offers spiritual guidance; calls on and cooperates with social assistance agencies to extend services to inmates, patients or their families as needed; offers advice on religious reading materials for inmates and patients.

Visits bedside of patients to offer spiritual guidance in recovery; comforts those who are terminally ill and gives assistance to distraught families; cooperates with physicians to assist patients in maintaining mental and physical health; administers baptisms, communion and other sacraments.

Participates in rehabilitation programs in the facility; counsels institution staff when requested; plans religious programs and may enlist the support of community church groups in providing appropriate music or sermons for religious programs and worship.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of sacred theology and the religious doctrine of the denomination represented.

Considerable knowledge of religious instructional material of the faith represented.

Considerable knowledge of those phases of ecclesiastical dogma relevant to spiritual guidance of a rehabilitative nature for the ill or imprisoned.

Knowledge of methods and techniques used in pastoral care.

Some knowledge of basic principles and concepts of behavioral science.

Ability to counsel and guide individuals in a hospital.

Ability to design and implement a program of religious worship and to encourage spiritual development.

Ability to recognize abnormal attitudes and behavior patterns and to recommend appropriate remedial action.

Ability to meet with community groups to obtain cooperation in religious activities.

Ability to comfort the seriously ill and members of their families.

Ability to respond appropriately to the needs and feelings of clients.

##### NATURE OF WORK

This is skilled supervisory food service work in a Metro-Dade County correctional institution.

Employees in this class are responsible for supervising a staff of skilled cooks, food service workers and inmates serving as kitchen trustees in the large-scale production of meals in a County correctional institution kitchen. Emphasis of the work is on supervising cooking and meal preparation, instructing subordinates in food processing methods and procedures, coordinating cooking activities to assure food is served at scheduled times, supervising the service of meals in the employee cafeteria and distribution of meals to inmates at various facilities, planning work schedules, recommending changes in procedures for food preparation and service, and enforcing compliance with proper sanitary requirements. Supervision is exercised over skilled cooks, food service workers and trustees engaged in various phases of food service operations. Supervision is received from a food service supervisor who reviews work for effectiveness in carrying out food service responsibilities.

##### ILLUSTRATIVE TASKS

Supervises a staff of skilled cooks, food service workers and inmate trustees engaged in cooking and preparing meals in a County correctional institution; instructs subordinates in quality and quantity of supplies to be used; assures that recipes are followed; coordinates cooking activities to meet serving deadlines.

Supervises the service of meals in employee cafeteria and the distribution of meals to inmates at various facilities; assures appropriate temperature and portion control of food; oversees delivery of special diets to inmate areas.

Plans and revises work schedules for a seven-day period; trains new employees in food preparation and service tasks; assures that subordinates are properly uniformed and that standards of personal hygiene and sanitation are met including compliance to Florida Statutes and American Correctional Association standards of cleanliness and sanitation in all food service areas.

Attends meetings with departmental officials; recommends changes in procedures for food preparation or service; informs officials of food service situations which could impact facility security inmate morale; discusses therapeutic and cyclic menus.

Reports equipment failures or malfunctions; maintains security of all utensils, equipment, supplies and stored food in a correctional setting.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of modern methods and equipment used in large-scale food service operations.

Considerable knowledge of standard and fancy recipes and cooking methods for various types of breakfast, luncheon and supper menus.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of State of Florida and American Correctional Association food regulations.

Considerable knowledge of sanitary requirements and the potential hazards in food preparation.

Knowledge of the preparation of special therapeutic diets.

Ability to supervise skilled cooks, food service workers and kitchen trustees in accordance with correctional policies and regulations.

Ability to plan and schedule personnel and material requirements to achieve goals in food service preparation and in meeting serving deadlines.

## Human Resources Department

### C & R Food Services Supervisor 2 (004530)

#### Minimum Qualifications

Bachelor's degree. One year of experience in institutional food service management is required. Additional experience may substitute for required education on a year-for-year basis. Applicants will be subject to an extensive screening process to include background investigation, fingerprint check and polygraph examination.

#### Job Specifications

##### NATURE OF WORK

This is advanced management and supervisory work assisting in directing food management services in County correctional facilities. An employee in this class assists a superior in supervising large-scale preparation, distribution and storage of food commodities in various County correctional facilities. Emphasis of the work is on direct supervision of a staff of subordinates engaged in food preparation and storage, and assuring the preparation of an extensive number of daily meals, including those requiring special diets. Duties include scheduling work, making unannounced inspections, training subordinates, developing quality menus, analyzing costs and resolving operational problems. Supervision is exercised through food service supervisors over a staff of cooks, bakers and food storage employees. Supervision is received from an administrative superior who reviews work through reports, personal conferences and observations, for satisfactory completion of food service responsibilities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a large staff of cooks, food service supervisors and food storage employees; plans and schedules daily work assignments.

Supervises and assures the preparation of an extensive volume of daily meals, including preparation of special dietary meals.

Makes unannounced inspections at various times to assure adherence to food preparation standards, sanitation, and to enforce cost control policies.

Coordinates training of cooks and trustys to enhance productivity and efficiency, while assuring cost control.

Consults with inmates and chaplains to develop special religious diets.

Works with food service supervisors and food service, specialists to develop quality menus and recipes for use by the department and other agencies using the catering service.

Analyzes costs and quality of menus in order to provide nutritional meals at lowest possible cost.

Analyzes problems and makes professionally sound decisions concerning kitchen operations.

Prepares dietary records and various reports.

Researches cost factors to determine where costs can be reduced.

Coordinates all menu variations with food service supervisors, cooks, and warehouse personnel.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorized leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of management principles, practices and procedures used in large-scale food production and applicable laws, rules and regulations pertaining to food management operations.

Considerable knowledge of current materials, equipment and methods used in large-scale food preparation and service.

Considerable knowledge of cost, purchase methods and economic planning practices in food service planning and established nutritional standards.

Considerable knowledge of the operation of all standard equipment typical of a large institutional kitchen.

Considerable knowledge of health precautions necessary in large-scale food preparation and service and sanitation requirements.

Knowledge of supervisory practices and procedures.

Ability to plan and supervise large-scale food production, distribution and service.

Ability to plan work operations so as to distribute and serve food efficiently to large numbers in various locations.

Ability to maintain cost, supply and other records accurately and completely.

Ability to prepare required records and other reports accurately and completely.

### Bailiff (004790)

#### Minimum Qualifications

High school. Two years of public contact experience are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized public contact, security and related work in the conduct of official judicial proceedings in the civil and criminal courts. Employees in this class are responsible for a variety of duties in connection with official proceedings in courtrooms and chambers and in assisting Judges, jurors, witnesses and attorneys previous to, during or upon the conclusion of court sessions. Emphasis of the work is on preparing courtrooms and chambers for official use, maintaining order during proceedings, providing security for Judges, assisting Judges and jurors in their official responsibilities and providing assistance to both witnesses and attorneys as the need requires. Incumbents are also called upon to perform various duties in the processing of court cases and in assisting the secretarial staff as the occasion demands. Incumbents are typically assigned to one Judge and are subject to transfer between courts as Judges are transferred. Employees follow instructions from individual Judges, the Administrative and Chief Judges, the Chief Bailiff and the provisions of established court procedures and local rules of practice. Work is performed under the immediate direction of the Judge of assignment who directs incumbents as to proper action in courtroom emergencies, and reviews work generally for adherence to established judicial procedures and quality of performance.

##### ILLUSTRATIVE TASKS

Insures that courtrooms, chambers and jury rooms are ready for use; makes certain that all parties and clerical support personnel are in attendance; notifies Chief Bailiff when larger courtrooms are needed; brings Judge's equipment to the courtroom; announces Judge and calls court to order.

Maintains order during court sessions and remains alert to possible disturbances; provides security for the Judge in attendance; obtains materials needed by the Judge during proceedings; restrains persons and escorts them out of court upon Judge's directive and places persons held in contempt of court under arrest, escorting them to proper authorities; closes court and advises Chief Bailiff when courtroom is not needed further.

Calls jury pool to have panels ready to be brought to court; contacts pool for additional jurors as needed; escorts jurors to jury room during recesses and insures their presence after such recesses; answers questions of jurors as to court procedures.

Remains with impaneled juries outside the jury room; escorts them to lunch or supper as the Judge dictates; orders food when jury is deliberating at length or at night; arranges hotel accommodations for jurors in event the jury is sequestered and returns juries to court after verdicts are reached.

Escorts jurors to their transportation during evening hours or when travel outside the courtroom is necessary for any reason during trials. Calls witnesses into court for testifying and sees that they remain outside hearing of court during trial; conducts witnesses to the stand; excludes witnesses when rule is invoked.

Orders needed files for motion hearings and places in proper sequence; insures that all necessary files are on hand; obtains files for ensuing days's calendar; photostats papers in evidence, letters and documents and conforms copies of orders; cancels motions and hearings as necessary.

Telephones attorneys as to the time to report for trial, as needed; calls attorneys into chambers at hearing time; assists the secretarial staff when necessary by answering telephones, opening mail or maintaining case records or forms.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of established procedures for the conduct of judicial proceedings in courtroom and chambers.

Considerable knowledge of established procedures in the flow of official documents between the Office of the Clerk of the Courts and courtrooms.

Knowledge of local instructions and rules of practice issued by Judges and the Chief Bailiff.

Some knowledge of the use of legal instruments and records pertinent to the court of assignment.

Ability to establish rapport with Judges, law enforcement personnel, employees of the court system and the Clerk of the Courts.

Ability to deal with jurors, witnesses, attorneys and the general public with necessary tact and courtesy.

Ability to remain alert and observant with attention to necessary detail during the conduct of court sessions.

### **Bailiff (004790)**

Ability to maintain composure in the event of courtroom disturbances and to restrain persons creating such disturbances effectively.

Ability to react quickly in following Judge's directives in emergencies which arise during court sessions.

Ability to follow all established procedures previous to, during and following the conclusion of court sessions.

Willingness to work extended hours as the occasion demands.

Willingness to follow requirements of official conduct as a representative of the court system.

#### NATURE OF WORK

This is professional library work with supervisory responsibility in a variety of library operations.

Employees in this class may be responsible for supervising the operations of a department at a regional or sub-regional branch library, or serving as assistant to the branch manager of a medium branch library, or functioning as the assistant to the department manager at the main library. Responsibilities include supervising library staff, analyzing collection development needs, assisting the public, and continuous familiarization with the library's collection. Supervision may be exercised over a staff of professional, paraprofessional, technical or clerical employees engaged in various phases of library operations. Supervision is received from a higher level librarian who assigns responsibilities and reviews work for satisfactory performance of professional librarian duties.

#### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of subordinate library staff engaged in a variety of library operations.

Serves as librarian-in-charge of a medium branch library in the absence of the branch manager.

Analyzes collection development needs, oversees the selection of materials, provides reader's advisory and reference services for assigned areas of responsibility.

Provides for staff development and training of subordinate professional, paraprofessional, clerical and technical staff members.

Exercises responsibility for the proper maintenance of library materials and equipment in an assigned library area.

Maintains an awareness of current library issues and trends by reading professional and related literature, and attending workshops, conferences and courses.

Resolves personnel and patron problems concerning library or County policies.

Exercises responsibility for special subject cataloging.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of professional library principles, methods, materials, and practices.

Considerable knowledge of library reference materials and tools of research.

Considerable knowledge of a variety of books, authors and reader interest levels.

Knowledge of supervisory principles and practices.

Knowledge of public relations principles and techniques.

Ability to analyze administrative problems and make recommendations for their solution.

Ability to plan, organize, and direct the work of professional, paraprofessional and support staff.

Ability to interpret library policies, objectives and services to the public and library staff.

Ability to establish and maintain effective working relationships with library patrons, subordinates, and supervisors.

Ability to maintain fiscal and administrative records.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to prepare reports.

### Senior Economic Analyst (004970)

#### Minimum Qualifications

Bachelor's degree in Economics or related field. Three years of professional experience in applied research and analysis of urban economic development issues or macroeconomic fluctuations is required. A Master's degree in Economics is preferred and may substitute for the required work experience. Experience with quantitative analytical methods, excellent written communication skills, and proficiency in Microsoft Excel, Word, and PowerPoint are highly desirable.

#### Job Specifications

##### NATURE OF WORK

This is advance professional work in conducting economic analysis, preparing economic reports, and presentations. Employees in this class are expected to conduct both qualitative and quantitative applied economic research and analyses that often involve basic statistical methods, gathering, processing and presenting economic data and information from secondary sources. Employees in this class exercise considerable independent judgment in the analysis of complex economic issues and the local impacts of changing macroeconomic conditions. Supervision is received from a professional superior who holds the incumbent responsible for maintaining economic databases, conducting data analysis and preparing reports and presentations as directed.

##### ILLUSTRATIVE TASKS

- Maintains economic databases and analyzes economic information using descriptive and econometric statistical methods.

- Generates graphs and maps that convey economic information in ways that are accessible to non-economists.

- Prepares economic reports and assist the chief economist in the preparations of reports, studies, presentations and the evaluation of alternative economic policy options.

- Provides staff support to county appointed advisory boards on economic matters and makes oral presentations to county administration, local community groups.

- Performs related work as required.

##### KNOWLEDGE, ABILITIES AND SKILLS

- Considerable knowledge of the principles, methods and practices of economic development

- Considerable knowledge of research techniques and statistical methods

- Considerable knowledge of those elements of the County's Strategic Plan and Comprehensive Development Master Plan that address economic development

- Considerable knowledge of computer applications pertaining to economic analysis including statistical, spreadsheet, database, and economic impact models

- Considerable knowledge of socioeconomic characteristics of Miami-Dade County

- Ability to research, develop, organize and analyze information, and prepare finished reports or work products

- Ability to express ideas and information clearly and concisely, verbally and in writing

- Ability to establish and maintain effective working relations with supervisors, fellow employees, officials of other agencies, and local business and economic development organizations

#### Nature Of Work

This is advance professional work in conducting economic analysis, preparing economic reports, and presentations.

The security clearance required by Federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is an advanced professional administrative position managing the development and implementation of the environmental rehabilitation programs to support the Miami-Dade Aviation Department.

An employee in this class is responsible for the day to day operations of the Airport Environmental Engineering Section. Responsibilities include managing the implementation of the requirements of a Consent Agreement with Miami-Dade Environmental Resources Management Department (DERM), a Consent Order and a separate Settlement Agreement with the Florida Department of Environmental Protection (FDEP); implementing a Cost Recovery Program to recover the costs of environmental cleanups from responsible parties and State Programs; managing the pollution prevention program, recycling programs and the ISO 14001 Program for the Department; and developing a Brownsfield Development Order with FEDP, alternative fuel programs and low emission vehicles replacement program. The incumbent serves as the prime contact for environmental regulatory agencies including the Department of Environmental Resources Management (DERM), the Florida Department of Environmental Protection, the South Florida Water Management District (SFWMD), and the United States Environmental Protection Agency (USEPA). Supervision is exercised over a section of professional engineers, project managers and paraprofessionals which directs the application of manpower, equipment and materials necessary to recommend and carry out Departmental policy related to the management of environmental engineering programs and projects. General direction is received from an administrative superior who reviews work through personal conferences and reports for satisfactory attainment of goals and objectives.

##### ILLUSTRATIVE TASKS

Supervises, assigns and reviews the work of the Environmental Engineering Section engaged in managing, reviewing and monitoring the work of Professional Engineering Consultants and Environmental Contractors under contract to Miami-Dade Aviation Department (MDAD).

Establishes, implements and directs programs, and sets priorities for the Environmental Engineering Section; proposes procedures and policies to the Division Manager, assigns projects to staff, monitors staff workloads and assists with problems in relations with contractor, consultants and testing labs; hold regular staff meetings, briefs supervisors and meets with senior staff to keep them advised of work progress and/or problems; assists staff in the management and coordination of their workload on a daily basis.

Reviews Professional Services Agreements of environmental consultants and contractors, and sits on consultants selection committees as required; meets with contractors and consultants regarding site analysis, completion dates, delays or related activities; reviews and recommends additional services to consultants, change orders, etc.; reviews and approves Pay Estimates, Work Orders and Service Orders issued to consultants and contractors.

Assigns staff and resources to support other divisions of the MDAD by monitoring their operations to ensure environmental compliance with ever changing regulations; assigns staff and engages professional consultants to develop programs and train MDAD staff to support the Departments efforts to maintain environmental compliance.

Supervises, assigns and monitors all work related to the development of programs for the environmental restoration of all six airports in the Miami Dade County Airports System. Programs include the assessment, remediation and compliance of pollution control systems.

Directs and coordinates with the Miami-Dade Department of Environmental Resources Management (DERM) and the Florida Department of Environmental Protection (FDEP) all activities related to the compliance with two Consent Orders and a Settlement Agreement with the

## Human Resources Department

---

### Section Chief, Environmental Engineering Systems (005018)

regulatory agencies.

Supervises, assigns and reviews work related to the implementation of the Cost Recovery Program.

Supervises, assigns, and reviews the work of MDAD's Asbestos Abatement Program.

Assigns staff and resources to develop wild life control programs.

Supervises the implementation and maintenance of the ISO 14001 Certification of the Environmental Engineering Division.

Coordinates with other Divisions of the Department, the Airlines, Tenants, the FAA and contractors so that construction activities through contaminated areas do not spread the contamination.

Reviews and recommends the environmental language of all leases prepared by the Properties Division before issuance to tenants.

#### KNOWLEDGES, SKILLS AND ABILITIES

Extensive knowledge of the theories, principles and practices of environmental engineering.

Extensive knowledge of local, State and Federal regulations pertaining to environmental protection, water quality, hazardous waste and related fields.

Extensive knowledge of the aviation industry's operations and environmental issues.

Considerable knowledge of supervisory principles and practices.

Ability to supervise through subordinate engineers, the work of professional engineering consultants and contractors under contract to the Miami-Dade Aviation Department.

Ability to plan, direct and coordinate the design of complex aviation environmental engineering projects on a multi-year basis.

Ability to understand complex engineering concepts and ensure the sound design of aviation environmental engineering projects.

Ability to understand complex engineering drawings, specifications and documents and make changes, additions and corrections.

Ability to negotiate service agreements, service orders and change orders.

Ability to communicate clearly and concisely, verbally and in writing.

#### Nature Of Work

The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional work assisting in a governmental affairs program for the Aviation Department.

Employees in this class are responsible for assisting in the development and administration of a complex governmental affairs program. Responsibilities include reviewing current regulations and proposed legislative changes impacting aviation operations, preparing analytical reports, serving as a liaison on local, state and federal policy issues, reviewing agenda items which may impact County airport operations, and disseminating information related to complex international airport operations and development. Incumbents exercise independent judgment in analyzing legislative developments to determine the effect on airport activities. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for effective assistance in administration of a governmental affairs program.

##### ILLUSTRATIVE TASKS

Assists in administration of an aviation governmental affairs program by serving in a liaison capacity between the Aviation Department and the Office of the County Manager, Office of the Mayor, Board of County Commissioners, State of Florida and agencies of the federal government.

Maintains current regulations and reviews proposed state and federal legislation for impact on operation of Dade County airport facilities.

Reviews agenda items presented to the Board of County Commissioners and identifies items which may impact County airport operations.

Assists in the review of contracts, agreements, leases and other documents to ensure compliance with local, state and federal regulations.

Prepares aviation-related analytical reports dealing with a variety of specialized projects; prepares computerized statistical reports as required and prepares periodic narrative progress reports.

Reviews various documents to ensure they conform with departmental goals and objectives.

Coordinates and disseminates information relating to complex international airport operations and development which is required for policy decisions by departmental management.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of local, state and federal legislative processes affecting local airport operations.

Considerable knowledge of local, state and national aviation policy issues.

Considerable knowledge of the organization and operations of Miami International Airport and County auxiliary airports.

## Human Resources Department

#### NATURE OF WORK

This is advanced responsible professional work assisting the director of the Aviation Department with a variety of governmental affairs activities.

An employee in this class is responsible for liaison activities between the Aviation Department and the Office of the County Manager, Board of County Commissioners, State of Florida, and the federal government. Duties include coordinating and disseminating information related to complex international airport operations and development required for policy decisions, participating in the formulation of department policies, procedures and strategic planning for the improvement and expansion of county airports, reviewing submissions to the Board of County Commissioners and their committees, and representing the department before commission committees and BCC meetings. Related duties include reviewing and monitoring legislative actions at the state and federal level which pertain to aviation interests and assisting in preparation of proposed legislation. Supervision is exercised over a staff of professional subordinates with assigned responsibilities in various governmental affairs areas. General supervision is received from the department director who holds the incumbent responsible for achievement of desired goals and objectives.

#### ILLUSTRATIVE TASKS

Serves in a liaison capacity between the Aviation Department and the Office of the County Manager, Board of County Commissioners, State of Florida and federal government; coordinates issues affecting the department with departmental staff.

Directs, plans, and coordinates departmental agenda item submissions to the Board of County Commissioners and Commission committees; reviews contracts, agreements, leases, and permits to ensure they are in the best interests of the county, conform with pertinent policies and objectives, and meet legal and administrative requirements.

Reviews BCC agenda for items that may impact county airports and reviews with departmental staff; coordinates revisions as required; monitors state and federal legislation.

Assists in developing departmental legislative goals and objectives; coordinates work with state agencies, legislative committees and legislators to obtain additional aviation funding.

Represents the department at meetings with airlines, DCAD management companies, state and federal officials, and local, national and international trade, civic, and business groups.

Reviews and recommends approval or disapproval of department procurement matters which require approval by the Board of County Commissioners.

Reviews incoming correspondence to the department director and assigns responsibility for developing responses; reviews completed correspondence for conformity with departmental requirements.

Supervises subordinate administrative and clerical employees; prepares and monitors office budget, and evaluates periodic budget reports.

Performs related work as required.

##### NATURE OF WORK

This is highly responsible executive level work assisting in the planning and direction of the complex and diversified operations and activities of the Miami-Dade County Aviation Department.

An employee in this class is responsible for assisting in planning, directing and coordinating extensive and complex airport system operations at Miami International Airport and at geographically dispersed general aviation airports. Responsibilities include directing, through subordinate levels of executives and managers, the management of terminal and landside operations, aviation engineering and facilities development, business and financial activities, airside operations, safety and security activities, and a variety of other administrative and operational support functions. The incumbent exercises extensive independent judgment and professional managerial knowledge in providing assistance in the direction of daily operations of a large and complex airport system. Supervision is exercised through subordinate levels of executives, managers and supervisors over a large staff of professional, operational, technical, administrative and clerical employees at Miami International Airport and at auxiliary airport facilities. General direction is received from the Department Director who holds the incumbent responsible for effective assistance in the professional management of departmental operations.

##### ILLUSTRATIVE TASKS

Assists in planning, directing and coordinating, through subordinate executives, managers and supervisors, a complex airport system including terminal facilities management, landside facilities management, administrative services, management information systems, finance and business management functions, properties management, marketing and trade development, route development, facilities planning and engineering, contract administration, environmental engineering, facilities maintenance, airside operations, and operations of general aviation airports.

Assists in the formulation of department policy, programs, objectives and direction; coordinates aviation policy with the Mayor's Office, Board of County Commissioners and other County departments as required.

Maintains thorough knowledge of current aviation regulations and assists in ensuring compliance with all required Federal Aviation Administration, state and County standards, policies and programs in the management, operation and development of the County's airport system.

Directs the effective promotion of the airport system to achieve first class national and international air service and to meet the needs of the County.

Assists in the negotiation of multi-million dollar agreements and contracts for the department.

Encourages the maximum use of airport facilities to provide a range of high quality aviation-related services for the communities served by the airport system, and to generate revenues adequate to operate and develop the airport system as a self-sustaining financial enterprise.

Establishes and maintains effective working relationships with senior management of airlines, concessionaires, airport tenants and users, and federal, state and local agencies; exercises responsibility for departmental activities in the absence of the Department Director.

## Human Resources Department

##### NATURE OF WORK

This is administrative and supervisory work coordinating operations and service activities in the airfield operating area at Miami International Airport.

An employee in this class is responsible for planning, assigning and reviewing the work of a staff of specialized supervisory and clerical employees engaged in a variety of activities in support of airfield operations. Emphasis of the work is on assuring the safe and efficient movement of aircraft and vehicular traffic in the airfield operating area, inspecting various areas of the airfield to ensure compliance of airport tenants and others with a variety of regulations, rules and procedures, and reviewing a variety of reports prepared by subordinates to identify deficiencies and initiate corrective action. Independent judgment is exercised in making immediate decisions regarding airfield hazards and problems, and in the development and implementation of procedures to ensure safe and efficient ground traffic movement in the aircraft operating area. Supervision is exercised through subordinate supervisors over specialized and clerical employees who assist with various phases of work. General supervision is received from an administrative superior who reviews work through personal conferences and written reports for efficiency of airfield operations activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisory, specialized and clerical employees engaged in supervising operations activities, conducting airfield safety inspections, collecting landing fees, conducting aircraft location field checks, assigning gates and cargo loading positions to various aircraft, compiling information for daily reports for U.S. Customs on passenger arrivals, monitoring closed circuit television cameras to observe airfield operations and performing a variety of other duties in support of airfield operations.

Reviews a variety of reports prepared by subordinates on assigned shifts concerning field inspections, non-routine incidents, accidents and other significant events to determine the effect upon aircraft operations; assures that corrective actions have been taken or will be taken to provide for safe airfield operations; assures that reports are completed properly and in accordance with established procedures.

Conducts daily physical inspections of the airfield and the airfield operating area; observes conditions of runways, taxiways, aprons, aircraft parking areas, airfield lighting and construction areas for hazardous situations that may affect the safety of aircraft movement; takes necessary actions to eliminate hazards.

Assists in the development and implementation of divisional policies and in planning improvements; prepares recommendations for new or revised rules, regulations and procedures to improve efficiency; assists in coordinating airfield construction activities.

Coordinates airfield operations activities with various other department divisions, fire and police agencies, airlines, airport tenants and a variety of Federal organizations.

Investigates operational problems and hazards which could interfere with aircraft and vehicle safety in the airfield operating area; exercises independent judgment in making immediate decisions concerning airfield hazards which pose a threat of loss of life or property.

Assists police and fire agencies in providing routine and emergency services in the airfield operating area; participates in planning for emergencies such as for storms and aircraft crashes.

## Human Resources Department

---

### Airport Operations Supervisor (005202)

Prepares periodic reports summarizing airfield operations activities.

Prepares or directs the preparation of Notices to Airmen in the event of circumstances which affect aircraft operations such as closed runways, closed taxiways, changes in airfield markings or other situations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews employee performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of airfield operating procedures and departmental rules and regulations related to security, safety, aircraft operations and emergencies in the airfield operating area.

Thorough knowledge of airline, tenant and leasehold operations at Miami International Airport.

Thorough knowledge of the geography of Miami International Airport including road network, building locations, public and private facilities and aircraft operating area.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of federal and local regulations governing the control of air traffic at a large airport facility.

Knowledge of the principles and practices of modern office administration.

Knowledge of the principles and practices of public and business administration.

Knowledge of public relations principles and techniques.

Ability to supervise a large staff of subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, superiors and officials of other government agencies, airlines and airport tenants.

Ability to analyze a variety of administrative and operational problems and make sound recommendations for their solution.

Ability to exercise judgment and discretion in devising, installing and interpreting departmental rules, regulations and procedures.

Ability to express ideas clearly and concisely, both verbally and in writing.

Ability to initiate and install administrative and operational programs and procedures and to evaluate their effectiveness.

Ability to react promptly and correctly in emergency situations.

#### Job Specifications

##### NATURE OF WORK

This is specialized supervisory work coordinating operations and service activities in the terminal, airfield and safety and security operations areas, monitoring the operations and maintenance of terminal facilities, performing operational and service functions in the airfield operating areas, and involving a considerable amount of public contact for the terminal, airfield and safety and security operations areas on assigned shifts (most shifts rotating) at Miami International Airport.

Employees in this class are responsible for planning, assigning, reviewing and implementing work procedures for Airport Operations Specialists and Agents, and clerical employees on an assigned shift engaged in a variety of activities in support of terminal facilities, airfield, and safety and security operations areas. Emphasis of the work involves securing a safe, well-managed and maintained and efficient environment of a County-owned airport which includes ensuring staffing requirements are met for all shifts; compiling and preparing a variety of reports; performing thorough inspections; providing assistance, directions and information to passengers, tenants and visitors to the airport; maintaining operational safety and security of the airfield; ensuring the timely process of ID requests and ID issuance, assisting with SIDA training classes and monitoring various private contracts to ensure compliance with departmental rules, regulations and procedures. Supervision is received from an administrative superior through personal conferences and review of a variety of shift reports for efficiency of operations activities and for fulfillment of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Exercises supervisory responsibility of subordinate employees engaged in the day-to day routine specialized functional areas of the airport including terminal, airfield and safety and security operations, to ensure compliance with the FAA/TSA-approved Security Program and other established departmental rules, regulations, policies and procedures and contractual requirements.

Reviews a variety of reports prepared by subordinates concerning field inspections, non-routine incidents, accidents, and other significant events; oversees a fleet of vehicles and ensures they are kept maintained and running.

Monitors use of airfield by airlines, general aviation aircraft, fixed base operators and tenants to ensure compliance with operating rules and regulations, and with lease agreements; issues safety and security violations as necessary; directs subordinates to escort aircraft having no radio contact, aircraft unfamiliar with the airfield or other aircraft as required; personally provides aircraft escorts as necessary.

Continuously monitors ground and local government radio frequencies; receives calls from control tower and subordinates concerning debris on runways or taxiways, safety and security violations, aircraft movements, unauthorized persons on airfield, and other problems.

Responds to accidents involving aircraft, vehicles, or persons and emergency alerts; escorts or directs the escort of emergency vehicles to and from the airfield operating area; participates in emergency, storm, crash, and rescue exercises.

Reviews sales tickets for landing fees, cargo fees, parking fees, and other charges for accuracy; corrects or returns to originator for correction if required; physically places liens on aircraft delinquent in charges as assigned.

Provides training to airline personnel in the proper use and operation of jetways.

Coordinates, maintains and supervises security inspection activities.

Evaluates operational conditions and responds to the needs of the airport users to ensure the expeditious transition of public movement.

Ensures the proper control of persons and vehicles in restricted access areas of the airport.

Coordinates and supervises the initial response to airport emergencies involving aircraft or vehicular accidents, security breaches or other security concern issues on the Airport.

Interacts with command level personnel of responding police, fire and federal agencies to ensure proper handling of emergency, storm, crash and rescue situations, and Airport security violations.

This is specialized supervisory work coordinating operations and service activities in the terminal, airfield and safety and security operations areas, monitoring the operations and maintenance of terminal facilities, performing operational and service functions in the airfield operating areas, and involving a considerable amount of public contact for the terminal, airfield and safety and security operations areas on assigned shifts (most shifts rotating) at Miami International Airport.

## Human Resources Department

### Airport Operations Agent (005204)

#### Minimum Qualifications

High school diploma or GED. Must be currently employed by Miami-Dade County with permanent status as a Airport Operations Specialist, Airport Attendant, Airport Noise Abatement Officer or Airport Public Service Assistant and one year of continuous acceptable full-time service in one of the above job classifications. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is specialized independent operational and service work monitoring the operations and maintenance of terminal and airfield facilities, performing operational and service functions in the airfield and terminal operating areas, and involving a considerable amount of public contact for the terminal, airfield and safety and security operations areas on an assigned rotating shift at Miami International Airport.

Employees in this class are responsible for performing a variety of tasks at Miami International Airport (MIA) on the airfield, in the airport terminal building, and international facilities, and administrative areas. This is in order to assist in the safe, secure, well-managed and well-maintained operation of MIA, for the convenience of passengers, the public and MIA's tenants.

Duties include conducting periodic inspections of all common-use areas of the terminal, the runways, taxiways and ramp areas to detect hazardous conditions; inspection of aircraft parking areas to determine fees and charges; monitoring usage of airport facilities to ensure compliance with operating rules, regulations, lease agreements and MIA's Standards;

planning and assigning gates for arriving international and domestic flights, and entering gate assignment information into the Flight Information Display System (FIDS). Other duties may include monitoring janitorial, skycap and other service contracts for contract compliance.;

checking and reporting maintenance conditions within the terminal facility, assisting the public and tenants in solving problems and providing customer service.; patrolling the terminal facility to detect equipment malfunctions, assisting in crowd control, enforcing departmental regulations and Standards;

providing assistance, directions and information to passengers, visitors and tenants; and preparing a variety of reports of operational and administrative activities; inspecting aircraft parking areas to determine fees and charges;; monitoring contractual agreements, preparing reports of operational activities,

conducting SIDA training classes, assisting with the timely processing of ID requests and ID issuance, and monitoring the work of subordinates as it relates to security doors, baggage claim areas and various other security breaches or safety hazards. Supervision is received from a specialized superior who makes daily assignments and reviews work for satisfactory performance of assigned responsibilities.

#### ILLUSTRATIVE TASKS

Troubleshoots problems for tenants to resolve unsatisfactory situations.

Patrols public and restricted areas of the terminal building and reports malfunctions of elevators, escalators, lights, carousels, and other equipment.

Assists in crowd control at airline ticket counters, Customs' exits and other areas as necessary.

Responds to accidents throughout the terminal facility.

## Human Resources Department

### Airport Operations Agent (005204)

Provides assistance, information and customer assistance to passengers and visitors in various areas of the airport.

Accepts lost items and issues found items to rightful owners.

Serves as gate controller by exercising the responsibility for domestic and international flights

Monitors janitorial service contract and performance by making numerous walk-throughs of the airport facility and checking for acceptable conditions and follow up response to problems. Assures that employees are working in areas as assigned; prepares reports detailing observations of janitorial service employees' performance and compliance with prescribed regulations; observes condition of terminal and directs janitorial service employees to clean up trash or spills as required.

Monitors skycaps service contract (in the same manner as described above for janitorial contract)

Monitors the performance of subordinates in the carrying out of all "Illustrative Tasks" contained herein.

Operates a motor vehicle and conducts periodic inspections of the airfield operating areas.

Periodically inspects aircraft parking areas to determine new arrivals, departure and changes in aircraft locations

Assists in the arrival, departure and storage of aircraft; assigns parking to arriving aircraft as required and escort aircraft to parking areas.

Monitors subordinates in the performance of their duties as it relates to terminal and airfield operations, and Airport ID badge processing and issuance, employment background checks audits and fingerprinting referrals.

Monitors and conducts SIDA training classes and ensures compliance with FAA and or TSA requirements.

Assists in disseminating information to companies requesting Airport identification badges and responds to inquiries accordingly.

Prepares a variety of reports of operational and administrative activities, surveys, work orders and work assignment logs.

Monitors various private contractor work activities to ensure compliance with FAA /TSA or other Federal mandates, departmental rules, regulations and procedures.

### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the specialized rules, regulations and procedures applicable to terminal operations at Miami International Airport.

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of airline, tenant, concessionaire, and leasehold operations at Miami International Airport.

Considerable knowledge of the geography of Miami International Airport including public access road network, building locations, and locations of public and private facilities.

Considerable knowledge of departmental records, forms, and reports required for terminal operations.

Knowledge of departmental rules, regulations, and procedures.

Knowledge of crowd control methods and techniques.

Knowledge of contractual agreements between the Aviation Department and private contractors performing various service functions in the terminal complex at Miami International Airport.

Some knowledge of security practices and procedures.

Ability to establish and maintain effective working relations with superiors, subordinates, departmental officials, employees of private contractors, public and government agencies, tenants and the traveling public.

Ability to exercise judgment and discretion in the application of departmental policies, procedures and Standards - in a variety of terminal, airfield and security and safety operations circumstances, problems and conditions.

Ability to enforce established rules, regulations and Standards with firmness, tact, and impartiality.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to understand and follow verbal and written instructions.

Ability to prepare a variety of reports, surveys, and maintain logs.

Ability to react promptly and correctly to emergency situations.

Ability to perform basic math.

Ability to oversee the work of subordinates.

### Job Specifications

#### NATURE OF WORK

This is specialized property management work for the Miami-Dade Aviation Department.

Employees in this class are responsible for performing a variety of property management duties in the leasing, inspection and maintenance of airport facilities and properties. Responsibilities include inspection of airport properties, assisting in the administration of airport leases, contracts and permits, preparing less complex leases and amendments, attending airport planning and construction meetings, preparing recommendations for new airport facilities and reviewing construction plans. Duties require the application of real estate knowledges in the interpretation of airport contracts and leases. Supervision is received from an administrative superior who reviews work for conformity to departmental procedures and achievement of desired goals and objectives.

#### ILLUSTRATIVE TASKS

Inspects airport properties including office buildings, fueling facilities, commissaries, warehouses, terminals, hangers and aircraft ramp areas; recommends repairs or removal of unsafe or economically unsound structures.

Assists in administration of airport leases, contracts and permits by inspecting, evaluating and monitoring leased airport property for compliance with terms and conditions contained in the agreements.

Prepares less complex leases and amendments concerning property and facilities at general aviation airports.

Conducts or attends various meetings concerning planning, construction and implementation of a wide range of projects including airport roads and buildings.

Assists in preparing recommendations for new facilities at Miami International Airport and the general aviation airports, including additions or modification to warehousing and other buildings, aircraft washing racks, pavement stripping, taxiways, fueling facilities, aircraft and auto parking.

Reviews a variety of construction plans submitted by airport tenants for airport staff review and recommends approval and coordinates efforts to assure compliance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of real estate practices, terminology, contracts and lease agreements.

Considerable knowledge of the design, construction and operation of airport roads, utilities, aircraft runways, taxiways, aircraft ramps, and other aviation facilities.

Knowledge of applicable federal, state and local laws pertaining to lease agreements and airport property management.

Knowledge of real property management, contract management and commercial and industrial property leasing.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of building, grounds and equipment maintenance.

Knowledge of the occupational hazards and appropriate safety rules and regulations applicable to maintenance work.

Knowledge of preventive maintenance procedures and techniques.

Knowledge of the tools, equipment, materials and practices of several of the building and mechanical trades.

Ability to follow oral and written instructions and work with a minimum of technical supervision.

Ability to establish and maintain effective working relationships with subordinates and superiors.

Ability to keep records and prepare reports.

Ability to make estimates of needs in terms of labor, material and equipment.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

#### **Nature Of Work**

This is skilled maintenance and supervisory work in planning and directing all phases of Airport Facilities Maintenance operations for Miami International Airport and satellite Airports.

This is skilled work with supervisory responsibility in the installation, maintenance, and repair of a variety of pumps and related mechanical equipment.

### Airport Loading Bridges Maintenance Supervisor 1 (005267)

#### Minimum Qualifications

High school diploma or GED. Three years of skilled trades experience in hydraulic, mechanical, electrical, or electronic maintenance and repair work to include experience in the inspection, repair and maintenance of airport loading bridges and ground power systems are required. Must be able to work a permanent or rotating shift schedule to include nights, weekends and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work with supervisory responsibility in the maintenance, repair and adjustment of airport loading bridges and related equipment.

Employees in this class are responsible for supervising subordinate technicians engaged in the maintenance and repair of electrical, electronic, mechanical and hydraulic systems which control loading bridge functions. Responsibilities include directing the preventive maintenance of passenger loading bridges, supervising repair tasks required on out-of-service equipment, coordinating work with planner/schedulers to provide a schedule of service for equipment, requisitioning required parts and supplies, and maintaining records of service intervals and completed repair work. Incumbents exercise some independent judgment in assuring the safe and proper functioning of systems and equipment. Supervision is exercised over skilled technicians, mechanics and repairers engaged in the maintenance and repair of airport loading bridges and related equipment. Supervision is received from a technical superior who reviews work through personal conferences and written reports for effectiveness of maintenance and repair activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of technicians, mechanics and repairers engaged in performing preventive maintenance on passenger loading bridges in accordance with manufacturers specifications and recommendations.

Plans and directs required repair tasks on out-of-service equipment to maintain the safe operation of airport passenger loading bridges.

Coordinates work with maintenance scheduling officials to provide service schedules for airport loading bridges and assure maximum utilization and reduce equipment out-of-service downtime.

Obtains parts and supplies required for scheduled passenger loading bridge repair and maintenance.

Maintains records of service intervals; documents loading bridge repair work.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operational characteristics and maintenance requirements of airport loading bridges and related airport equipment.

Considerable knowledge of the principles and theories of electricity, hydraulics and mechanics.

Considerable knowledge of airside operations and procedures pertaining to gate assignments.

Considerable knowledge of blueprints, diagrams and schematics.

Knowledge of supervisory principles and practices.

Ability to supervise technical subordinates in a manner conducive to full performance and high morale.

Ability to direct the preventive maintenance, repair and adjustment of complex electrical, mechanical and hydraulic equipment.

Ability to read and interpret electrical blueprints, diagrams and schematics.

Ability to detect and locate defects in complex electrical and electronic equipment and systems.

Skill in the diagnosis and repair of malfunctions in complex electrical and electronic systems.

#### Job Specifications

##### NATURE OF WORK

This is professional maintenance contract supervision in the planning and coordinating of the installation, repair and service of airport facilities under contract.

An employee in this class performs work involving comprehensive maintenance planning, development of maintenance programs and efficient operations as related to maintenance at several airports. Work involves the supervision of all contract services performed at Miami International Airport, a general aviation and industrial complex, and smaller satellite airports operated by the Port Authority. Work includes contracting services for the structural and mechanical trades as well as engineering and administrative functions. Work requires the use of considerable independent judgment in planning and implementing maintenance programs, contract preparation and analysis, and contract performance and review. Supervision is exercised over subordinate inspectors, maintenance and utilities specialists and clerical staff by assignment of work, inspection of tasks in progress and administrative review. Supervision is received from a professional engineer who assigns work in the form of written orders, drawings or verbal instructions and reviews effectiveness by inspection of facilities for satisfactory operation.

##### ILLUSTRATIVE TASKS

Plans, develops, coordinates and directs all phases of airport maintenance service and repair contracts through a staff of craftsmen, inspectors, foremen, design engineers, consultants and the Airport Facilities Superintendent.

Makes periodic facility inspections; recommends maintenance methods and procedures; estimates time, labor and materials required; maintains records, prepares and submits reports, reviews contract proposals and makes recommendations.

Consults with Port Authority administrators, contractors, maintenance engineers, airport tenants and lessees on operating and service conditions; inspects maintenance and construction projects under contract; advises superiors and contractors of faulty workmanship or materials during construction or warranty periods.

Corresponds with equipment and product manufacturers; maintains architectural and engineering records of buildings and equipment; maintains individual equipment repair and service contract records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of modern maintenance planning and contract services as related to airport buildings and equipment.

Considerable knowledge of modern methods, practices and techniques used in the maintenance and repair of airports and related buildings and equipment.

Considerable knowledge of the principles, practices, methods and techniques of mechanical engineering and the building trades.

Knowledge of local building codes as related to airport facilities.

Knowledge of common contractual agreements as related to equipment warranties and service agreements.

Ability to delegate authority and to plan, assign, coordinate and direct the work of a staff of technical, trades and clerical personnel engaged in a variety of tasks in a manner conducive to full performance and high morale.

Ability to communicate verbally and in writing; to review, analyze and interpret service contracts and warranties of moderate complexity.

Ability to plan work schedules for maintenance and service effecting maximum utilization of time, labor and materials.

Ability to prepare estimates of time, material and equipment costs of specific projects.

### Airport Loading Bridges Maintenance Supervisor 2 (005268)

#### **Nature Of Work**

This is professional maintenance contract supervision in the planning and coordinating of the installation, repair and service of airport facilities under contract.

#### **Minimum Qualifications**

High school diploma or GED. Four years of experience in grounds and landscape maintenance, tree trimming and/or construction to include two years of supervisory experience or four years experience overseeing grounds/landscape maintenance, tree trimming and/or construction contracts. Must possess a Driver's license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in the maintenance of Miami International Airport.

An employee in this class coordinates workers, equipment and materials used in the repair and maintenance performed on buildings, runways, taxiways, roads, canals, and drainage facilities located at Miami International Airport, a general aviation and industrial complex. Work includes contracting services for the structural and mechanical trades as well as mobile equipment operation and repair, earth moving and road building. Work requires thorough independent judgment in planning and assigning work by utilizing labor, materials and equipment efficiently. Supervision is exercised over subordinate foremen, tradesmen and clerical staff by assignment and inspection of work in progress and upon completion for required objectives. Supervision is received from a professional engineer who assigns work in the form of written orders, drawings or verbal instructions and reviews completed work by the occasional inspection of facilities for satisfactory operation.

##### ILLUSTRATIVE TASKS

Supervises, assigns, coordinates and directs all phases of airport facilities maintenance through a large staff of foremen, tradesmen, equipment operators, laborers and clerical personnel engaged in maintenance activities and the clerical recording of such activities. Makes periodic maintenance inspection; recommends building repairs and improvements; estimates time, labor, equipment and materials required; maintains records; prepares and submits reports; and selects equipment for purchase. Consults with superiors, contractors, engineers, airport tenants and lessees for modifications to existing facilities and equipment; schedules and implements regular and preventive maintenance programs according to manufacturers' recommendations. Corresponds with equipment and product manufacturers; requisitions, inspects and approves materials and supplies; maintains architectural and engineering records of buildings and equipment; and prepares annual maintenance budget for Miami International Airport. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of methods, practices and techniques used in the maintenance and repair of a general aviation and industrial complex and related buildings, grounds and equipment.  
Thorough knowledge of the principles, practices, methods and techniques of the building, groundskeeping and mechanical trades.  
Thorough knowledge of the principles and practices of engineering, excavation, grading and utilization of related heavy equipment.  
Considerable knowledge of local building codes as related to airport facilities.  
Considerable knowledge of FAA regulations and requirements pertaining to maintenance of airport facilities.  
Ability to plan, assign, coordinate and direct the work of a large staff of technical, trades, labor and clerical personnel engaged in a variety of tasks in a manner conducive to full performance and high morale.  
Ability to prepare requisitions and specifications for various types of building materials and motor equipment and to devise modifications to equipment to meet specific work problems.  
Ability to read and interpret engineering plans and specifications.  
Ability to plan work schedules for maintenance and minor construction projects at a complex airport and industrial facility in a manner conducive to full performance.  
Ability to prepare comprehensive reports.  
Ability to estimate time, labor, equipment and material costs for specific projects.

### Airport Facilities Superintendent (005272)

This is responsible supervisory work in the maintenance of Miami International Airport.

### Airport Lighting Supervisor (005274)

#### Minimum Qualifications

High school diploma or GED. Two years of journeyman level experience as an electrician and/or lighting technician are required. Must possess a Miami-Dade County Certificate of Competency as a Journeyman Electrician. Must be able to lift and handle equipment weighing 50 pounds. Must be able to work a permanent or rotating shift schedule to include nights, weekends and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in directing the installation, maintenance and repair of lighting systems for taxiways and peripheral operating areas of Miami International Airport and auxiliary airports.

Employees in this class supervise, assign and participate in the work of subordinate Airport Lighting Technicians, Electricians, semi-skilled and unskilled helpers. Emphasis of the work is on providing technical advice to professional engineers as requested regarding modifications, repairs and construction, and independent assignment and technical direction of subordinates in a variety of airport lighting and electrical projects. Assignments are received in the form of oral or written work orders from the responsibility of the incumbent. Large scale and complex jobs are normally accompanied by electrical blueprints and diagrams, and engineering and airport maintenance supervisors may take considerable part in the work. All work is performed under supervision of engineering and airport maintenance superiors who inspect work in progress and upon completion for conformance to specifications and adherence to established codes and regulations.

##### ILLUSTRATIVE TASKS

Plans, assigns and directs the work of subordinates engaged in installation, maintenance and repair of airfield lighting systems, transformer vault units, current regulators, emergency power generators, automatic power transfer units, taxiway regulators, lighting control consoles, rotating airport beacons, flashing hazard beacons, lighted wind indicators, obstruction lighting and associated electrical control equipment. Provides technical advice to professional engineers as needed regarding electrical phases of proposed work in planning new construction, major modifications and repairs.

Performs technical inspection and review of electrical work done under contract.

Prepares airfield lighting schematic diagrams to conform to special conditions; consults with engineering and maintenance personnel regarding new construction and advises on installation from technical and performance standpoints; analyzes electrical load factors and modifies them to prevent faults.

Develops, schedules and supervises the operation of an airfield lighting preventative maintenance program; insures that all units are maintained on a regular basis.

Responds to emergencies and failures of airfield lighting systems requiring immediate repairs and replacements.

Estimates time and materials required for proposed jobs, keeps records and submits reports; submits requisitions for supplies and equipment; interprets electrical blueprints and diagrams to accomplish installation or repair of airport lighting systems and equipment.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes laws and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electronic equipment as applied to the installation, maintenance and repair of airport lighting systems.

Considerable knowledge of the practices, methods, tools, equipment and materials used in the installation, maintenance and repair of airport lighting systems.

Considerable knowledge of the principles and theory of electricity.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work with high voltages.

Considerable knowledge of the rules and regulations effective in the county regarding electrical installation and repair.

Considerable knowledge of the rules and regulations regarding installation of aviation lighting equipment in accordance with recognized

### Airport Lighting Supervisor (005274)

electrical practices and Federal Aviation Administration construction specifications.

Knowledge of supervisory methods and practices.

Ability to plan, assign, review and supervise the work of subordinate technicians and helpers in a manner conducive to full performance and high morale.

Ability to interpret and work from technical schematics, blueprints, and electronic circuitry diagrams.

Ability to install, alter, repair, maintain and locate

defects in a variety of airfield lighting systems and electrical equipment.

Skill in the use of standard maintenance tools, equipment and precision testing devices of the electrical-electronic trade.

NEW 10-77

#### **Nature Of Work**

### Airport Fire Suppression Systems Supervisor (005276)

#### Minimum Qualifications

High school diploma or GED. Must possess a State of Florida Fire Equipment Permit, Type 9, Classes 1 and 4. Must possess Fire Equipment Dealer licenses, Classes C and D, Type 07 Class 3 and 4. Must possess a Driver license. Three years of experience in fire protection field maintaining fire alarm systems and fire suppression systems are required. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is technical and supervisory work in the inspection, testing, servicing and repair of fire suppression equipment and systems at Miami International Airport and auxiliary locations.

An employee in this class is responsible for planning, assigning, and reviewing the work of subordinate technicians engaged in inspecting, testing, repairing, servicing, and recharging fire suppression equipment and systems to ensure compliance with regulatory codes and requirements. Responsibilities include verifying contractor repairs and approving invoices, reviewing plans for new installations, renovations and upgrades to existing systems, inspection and acceptance of new system installations, and attending meetings concerning fire suppression systems on new and existing construction. The incumbent exercises considerable independent judgment in the application of knowledge of fire codes and fire suppression equipment and system technology to the resolution of fire protection problems. Supervision is exercised over a staff of technicians engaged in the inspection, testing, and servicing of fire suppression equipment and systems. Supervision is received from a technical and administrative superior who reviews work for technical sufficiency and satisfactory inspection and servicing activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate technicians engaged in the inspection, testing, repairing, servicing, and recharging of fire suppression equipment and systems at Miami International Airport and auxiliary locations.

Supervises and coordinates field testing of fire alarms, sprinkler systems, halon systems, fire pumps, contractor and engineer water shut downs; schedules inspections and call-back assignments.

Verifies contractor repairs to fire suppression equipment and systems, and reviews and approves invoices.

Attends meetings concerning fire suppression systems on new and existing construction.

Troubleshoots fire alarm and sprinkler system impairments.

Reviews plans for new fire suppression installations, renovations, and upgrades to existing systems.

Inspects new system installations during construction, conducts acceptance inspections and testing.

Reviews inspection reports and repair records; prepares budget documents.

Implements and supervises terminal zoning procedures on new construction.

Assists with smoke removal acceptance testing per NFPA requirements.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the design and operating characteristics of fire suppression equipment and systems.

Considerable knowledge of modern technological developments in fire suppression equipment and systems.

Considerable knowledge of the practices, methods and equipment used to inspect, service, repair, test, and recharge fire suppression equipment and systems.

Considerable knowledge of current fire codes, laws, ordinances, and regulations pertaining to fire suppression equipment and systems.

Knowledge of the fundamental principles of hydraulics.

#### Job Specifications

##### NATURE OF WORK

This is technical and administrative work in the management of an airport telecommunications system.

An employee in this class is responsible for supervising and coordinating telephone service for the Aviation Department, airport tenants, and other airport agencies utilizing the Aviation Department switching system. Responsibilities include development and management of communications policies and procedures concerning installation, system design, moves, changes, additions and deletions, trouble reporting, billing and cost containment, traffic analysis, user training, recordkeeping, and maintaining contacts with vendors and public utility providing telephone service. The incumbent exercises independent judgment in the application of technical knowledges pertaining to interconnect switching equipment and configuration, user requirements, and costs. Supervision is exercised over subordinate service representatives assisting in various phases of operations. Supervision is received from a professional and technical superior who reviews work for effective development and maintenance of standard levels of telephone service to the Aviation Department and other system users.

##### ILLUSTRATIVE TASKS

Reviews, evaluates, designs or adopts, individual telephone systems to meet the needs of the Aviation Department and airport tenants at Miami International Airport and general aviation airports.

Develops recommendations for appropriate service levels based on surveys, traffic studies, systems configuration and cost factors.

Supervises subordinate service representatives engaged in system maintenance and service support activities.

Analyzes invoices for telecommunications services and contacts vendors to resolve discrepancies.

Initiates and develops contacts with independent vendors and the public utility providing telephone service, regarding operational requirements for installation and modification of system, and inspects completed work for adherence to requirements.

Maintains records on system configuration, equipment, traffic analysis, service orders, maintenance contracts and billing.

Evaluates complaints from system users and initiates corrective action; provides training to system users.

Attends project review meetings to discuss the design, expansion, operation and other facets of communications network; advises on system capacities, availability, scheduling, and costs when expanding service into new or renovated facilities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of Aviation Department electronic telephone switching equipment, installations and operations.

## Human Resources Department

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional managerial work in planning and directing the development and implementation of airport telecommunications systems.

An employee in this class is responsible for planning, designing, acquisitions, evaluating, implementation and maintenance of Miami-Dade Aviation Department telecommunications systems. The incumbent exercises considerable independent professional judgment in the development and implementation of various projects and in making complex technical decisions. Supervision is exercised over subordinate professional, technical and clerical employees with assigned responsibilities in various phases of telecommunication operations. Supervision is received from an administrative superior, who holds the incumbent responsible for the attainment of department objectives and the professional management and development of airport telecommunication systems for the Aviation Department.

##### ILLUSTRATIVE TASKS

Determines future requirements by strategic planning; analyzes current and emerging technologies for establishing goals and objectives for telecommunications expansion.

Reviews and makes recommendations on requests and/or design proposals for additions, deletions, and modifications to the telecommunications systems.

Manages all aspects of outsource telecommunications management contracts.

Conducts meetings with aviation staff, consultants, and out source vendors for the purpose of directing these entities in the matters of providing and managing telecommunications and data network services.

Directs the development and testing of communications assurance, preventive and planned maintenance, and disaster recovery plans.

Develops, reviews, analyzes, and implements operating procedures.

Forecasts and administers an annual budget for divisional expenditures and an annual non-departmental utility budget for both telephone and electrical consumption.

Conducts meetings with technical staff to provide alternate technical recommendations, discuss assignments, and review status of projects.

Interfaces with other county and external agencies; acts as division/department technical representative on issues affecting county-wide services such as pay phones, 800 MHZ local government radio, and cellular phone services.

Creates performance measures for both departmental and contracted employees.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave; evaluates and rates employee performance evaluations; reviews payroll issues and safety/accidents reviews.

Performs related work as required.

## Human Resources Department

### Airport Engineer (005282)

#### Minimum Qualifications

Bachelor's degree in Civil Engineering or related field. Five years of experience in roadway and transportation system planning and designing are required. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is supervisory professional civil engineering work with administrative responsibility in the planning, design, construction, operation and maintenance of airport facilities.

Employees in this class perform studies or supervise planning studies in a variety of areas such as redevelopment and expansion of existing airport facilities, public parking facilities, airport roadway systems, ground transportation systems, video information and surveillance systems, computerized energy management and operational procedures. Responsibilities include coordination of engineering activities with Federal, State and local agencies, preparation of Federal and State grant applications, obtaining State and local government agency approvals and funding for airport projects, examination of land use controls and development of appropriate ordinances, and maintenance of engineering records of department facilities. Assignments are broad in scope with considerable opportunity for exercising independent professional judgment and making complex technical decisions. Supervision may be exercised over professional, technical and clerical assistants by delegation of assigned projects and review of completed work for professional quality. Supervision is received from an administrative or professional superior who reviews work for conformity with departmental policies, practices and regulations and for attainment of desired objectives.

##### ILLUSTRATIVE TASKS

Prepares design specifications, supervises installation and implementation of electronic revenue control entry and exit system for public parking facilities; monitors parking operations and maintenance activities.

Prepares and supervises initial planning studies, preliminary layouts, final designs and traffic surveys of public parking facilities airport roadway systems and ground transportation activities.

Assists in design and coordinates development of automated ground transportation, traffic management systems and video information and surveillance systems including equipment selection, operational layout, acquisition and installation; participates as member of the design team responsible for development of centralized airfield and terminal control center.

Supervises and assists in the implementation of coordinated terminal building automation including electronic security, computerized energy management and video surveillance systems for aircraft gate assignments.

Provides technical and managerial assistance to airport operations staff in interpretation and application of airport operating policies and procedures.

Represents the department at the Federal Aviation Administration, the State Department of Transportation and other outside agencies on aeronautical matters; provides technical information and insures maximum participation in airport construction by Federal Airport Development Aid Program and Airport Certification Program; prepares Federal and State grant applications.

Determines if proposed off-airport construction will obstruct or interfere with aircraft operations, and coordinates efforts with other government agencies to develop ordinances concerning land uses, building heights, subdivision regulations and buildings uses that reduce the impact of aircraft noise on the community.

Assists national agencies and organizations in formulating and presenting positions on aeronautical standards at international conferences.

Develops a uniform code of standards which meets or exceeds Federal Aviation Administration airport certification standards for the operation of aeronautical areas, including condition of visual aids and obstruction lighting, efficiency of ground control function and elimination of potentially dangerous conditions.

Assists in evaluating existing and potential aeronautical capacity and the need for land areas for continuing aeronautical activities.

As professional Engineering or Professional Land Surveyor, certifies property and other plans used in leases and court actions.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

### Airport Engineer (005282)

Thorough knowledge of the principles and practices of civil and airport engineering.

Thorough knowledge of the principles and practices of airport management.

Thorough knowledge of design, construction, operation and maintenance of airport facilities including terminals, building, drainage structures, lighting, water systems, sewerage, payments, airport roadway systems, ground transportation and traffic control systems.

Thorough knowledge of traffic engineering principles and practices and of laws and regulations pertaining to traffic and motor vehicles.

Thorough knowledge of modern developments, current literature, and other sources of information in the field of airport engineering.

Thorough knowledge of departmental regulations, policies and practices.

Thorough knowledge of airline operating procedures, aircraft operating characteristics, terminal building operation and passenger flow characteristics, airport vehicular access and parking operations.

Knowledge of Federal, State and local regulations effecting airport operations.

Knowledge of the principles and procedures of modern office administration.

Ability to plan, schedule, coordinate and review the work of other professional, technical and clerical assistants in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with associates, subordinates, public officials and government agencies.

Ability to apply professional engineering knowledge to the resolution of difficult technical, administrative and planning problems.

Ability to express ideas clearly, concisely and persuasively, orally and in writing.

Skill in the use of civil engineering instruments and equipment.

### **Nature Of Work**

This is supervisory professional civil engineering work with administrative responsibility in the planning, design, construction, operation and maintenance of airport facilities.

### Aviation Planner (005284)

#### Minimum Qualifications

Bachelor's degree. Three years of professional planning experience including administrative and technical experience in the aviation industry with emphasis on airport planning and development programs; or three years of professional experience in the planning and design of airport building facilities are required. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional technical work in aviation facility planning and development.

Employees in this class are responsible for performing advanced planning duties in airport facility planning and development or in the planning of aviation needs and development alternatives. Responsibilities vary by area of assignment and may include monitoring the work of consultants in the development of facility plans, coordinating work with a variety of federal agencies and private organizations, evaluating alternative layouts of airport facilities, developing and reviewing airport system layout plans, forecasting future aeronautical activity and needs for expanded airport facilities, and participating in design reviews of airport-related development projects. Incumbents exercise considerable independent judgment in the application of knowledges of airport system master planning and airport facility planning techniques to the formulation of aviation development projects. General supervision is received from an administrative superior who reviews work through personal conferences and written reports for professional and technical quality of planning activities.

##### ILLUSTRATIVE TASKS

Monitors professional consultants in the development of facility plans, documentation, and programs for airport building construction, maintenance, modification, repair, and alteration.

Delineates project planning into facility requirements defined by drawings and written documentation; maintains progress records on each project.

Prepares reports and performs reviews for various projects through the planning and design process.

Prepares or supervises project formulation planning studies and analyses, and develops and evaluates alternative layouts of airport facilities.

Develops and reviews airport system plans, airport master plans, and airport layout plans; participates in meetings and reviews by state and federal aviation system authorities; evaluates conformance with and impacts on proposed development projects.

Analyzes and evaluates existing aeronautical activity and forecasts future activity; identifies needs for new or expanded airport facilities.

Participates in design reviews of airport-related development projects by departmental and outside transportation and planning agencies.

Researches, collects, and maintains aviation technical data on airline schedules, service patterns, passenger and cargo flows, and other activities; organizes and conducts surveys to collect needed information.

Provides technical assistance to airport operations staff in the interpretation and application of airport policies, standards, and criteria.

Responds to and participates with various national agencies and organizations in formulating and presenting positions on aeronautical and airport development related issues.

Performs related work as required.

### Aviation Planner (005284)

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of airports and airport operational design characteristics, including dimensional and operational criteria, operational functions and processes of various airport and heliport facilities, and air traffic control procedures and techniques.

Thorough knowledge of the principles and practices of airport facility planning and related architectural and engineering knowledges.

Thorough knowledge of aviation forecasting/projection techniques, aviation research and sources of current aviation industry information.

Thorough knowledge of modern developments, current literature, and sources of information regarding planning, design, and construction of airport buildings.

Thorough knowledge of the fabric of U.S. domestic and international civil aviation including airline perspectives and economics.

Thorough knowledge of federal regulations pertaining to the development of facilities at airports.

Thorough knowledge of criteria for objects affecting navigable airspace and terminal instrument procedures.

Ability to plan, design, and prepare complete plans and documentation for various types of airport development projects.

Ability to apply professional architectural and engineering knowledges to the design and development of airport buildings.

Ability to review and coordinate the work of professional consultants engaged in the development of airport planning projects.

Ability to coordinate advanced airport planning work with officials of a variety of public and private agencies.

Ability to apply advanced aviation planning knowledges to the development and review of airport system plans, master plans, and layouts.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to prepare complex narrative and statistical reports.

#### Job Specifications

##### NATURE OF WORK

This is administrative and supervisory work in the management of a signage design and production facility for the Metro-Dade County Aviation Department.

An employee in this class is responsible for planning, supervising and coordinating the work of skilled employees engaged in the design and production of all airport signage systems for Miami International Airport and five auxiliary airport facilities. Responsibilities include establishing production schedules and priorities for daily operations and long-range programs, providing design and production guidance, estimating job work orders prior to production, determining costs of production, monitoring commercial contracts, preparing budgets, and monitoring billing procedures. The incumbent utilizes considerable technical expertise in managing airport signage design and production activities. Supervision is exercised over a staff of supervisors and skilled technicians engaged in various phases of signage operations. Supervision is received from an administrative superior who reviews work through personal conferences and observations for effective management of airport signage design and production activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisory and technical employees engaged in the design and fabrication of a wide variety of custom made signage for all Dade County airports including signage for building interiors and exteriors, all static and illuminated roadway signage, airfield and multi-lingual terminal signage, and advertising and directories.

Supervises technicians in the design, layout and drafting of drawings for proposed signage; supervises the use of computer-driven vinyl cutting equipment and engraving equipment, and other specialized signage equipment.

Confers with departmental officials regarding priorities, costs, methods and techniques; makes recommendations regarding design, layout, colors and types of materials; determines if projects should be performed by the County or contracted to commercial vendors; coordinates projects with outside vendors for scheduling, compliance, quality and completion.

Writes specifications and prepares work orders; coordinates installation of large signage projects.

Assures compliance with Federal Aviation Administration (FAA), Americans With Disabilities Act (ADA), Florida Department of Transportation (FDOT), Department of Transportation (DOT), and International Civil Aviation Association (ICAA) signage design regulations and standards.

Reviews and approves invoices from outside vendors for materials, supplies, equipment and sub-contracted work.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of local, state, federal and international signage design standards, regulations and symbols.

Thorough knowledge of commercial art and graph arts design principles, practices and techniques.

Thorough knowledge of signage systems in use at Miami International Airport and auxiliary airport facilities.

Considerable knowledge of the organization, operation and management of a large-scale signage design and production facility.

Considerable knowledge of the principles and techniques of architectural and engineering drafting.

Considerable knowledge of supervisory principles and practices.

Ability to manage and coordinate the activities of a large-scale signage design and production facility to achieve departmental objectives.

##### NATURE OF WORK

This is technical and supervisory work in the operation of a Facilities Information and Retrieval System (FIRS) for the Aviation Department. An employee in this class is responsible for management of computerized operations in the processing of a large volume of complex design and construction information. Emphasis of the work is on supervising computer system operations, researching and resolving problems, reviewing documents for compliance with terms of construction contracts and professional service agreements, verifying contractors pay estimates and construction invoices, reconciling FIRS to FAMIS, and making recommendations for required changes in system operations. The incumbent exercises some independent judgment in authorizing significant expenditures under terms of construction contracts and professional service agreements. Supervision is exercised over a staff of technicians responsible for computer system operation. Supervision is received from an administrative superior who reviews work for effectiveness of data processing activities and conformance to departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Supervises subordinates engaged in operation of the Facilities Information and Retrieval System to enter data, correct errors, verify information, produce payment vouchers, and obtain information concerning aviation construction contracts and professional service agreements.

Assists system users in research of processing problems and correction of errors; provides information on FIRS uses and capabilities.

Maintains records of FIRS computer operations.

Monitors construction project balances and remaining authorized amounts available; advises superiors as required.

Reviews computer generated reports and verifies accuracy of information.

Makes recommendations for FIRS changes, including alternate processing methods and rearrangements of information.

Establishes new account index codes, project identification numbers, names, and categories of accounts for use by departmental personnel in processing computer entry forms to ensure appropriate organization of computerized information.

Coordinates scheduling for processing of departmental construction contract and professional service agreement data processing jobs.

Assists internal and external auditors in the periodic examination of fiscal records and reports.

Reconciles FIRS with FAMIS as required.

Resolves differences in construction or design costs with departmental accounting personnel, architectural and engineering consultants, and other vendors and outside agencies.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the content of information contained in Aviation Department construction contracts and professional service agreements.

Considerable knowledge of the operating characteristics of the Facilities Information and Retrieval System.

Knowledge of FIRS computer uses and system capabilities.

Knowledge of rules, regulations and procedures governing the processing of data on construction contracts and Professional Service

### **PGTS Coordinator (005292)**

Agreements using the FIRS.

Knowledge of FAMIS computer reports and methodology of reconciliation with FIRS.

Knowledge of information contained on a variety of source documents used for FIRS computer entry.

Knowledge of the causes of data rejection or errors pertaining to the FIRS and action required for correction.

Ability to effectively manage operations of a Facilities Information and Retrieval System.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to make effective recommendations to improve FIRS operations.

Ability to reconcile FIRS and FAMIS transactions.

Ability to establish and maintain effective working relationships with subordinates, superiors and officials of other public and private agencies.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional and administrative work in the Contracts Administration Division of the Miami Dade Aviation Department, which is responsible for developing Requests for Proposals (RFP's), Requests for Qualifications (RFQ's), Requests for Information (RFI's) and Invitations to Bid (ITB's), construction manager-at-risk, as well as coordinating the acquisition of the Department's architects and engineers, and Requests for Acquisition for Design/Build services as established by Section 2-10.4 of the Miami-Dade County Code.

Employees in this class are responsible for working in conjunction with Aviation Department staff to develop and evaluate Requests for Proposals and Requests for Qualifications for a wide range of services. Responsibilities include developing and evaluating multi-million dollar RFP's and RFQ's for such services including but not limited to: airport signage fabrication and installation, airport demand ground transportation, miscellaneous construction contracts, asbestos removal contracts, offset printing, airport property appraisal, and partnering consulting. Responsibilities also include developing and evaluating Invitations to Bid and the like for such services as the airport car rental concession, as well as developing other concession agreements including specialty retail at Miami International Airport; permit agreements; franchise agreements; management consulting services, professional agreements, and others. Responsibilities also include coordinating the acquisition of the Department's architects and engineers and Requests for Acquisition for Design/Build services. Incumbent exercises considerable independent judgment and technical expertise in developing vendor requirements, contract specific language for construction contracts, and evaluation criteria for each RFP/RFQ/RFI/RFA. Also, negotiates contracts, management agreements, concession agreements, and professional services agreements. General supervision is received from an administrative superior who reviews work through personal conferences and written reports for professional management of contract evaluation and development activities and achievement of desired goals and objectives. Supervision is exercised over subordinate staff through assignment of work.

##### ILLUSTRATIVE TASKS

Develops Requests for Proposals (RFP's), Requests for Qualifications (RFQ's), (RFA's) and Requests for Information (RFI's).

Coordinates scope of services with various Aviation Department divisions.

Develops the necessary contract specific language necessary to meet the needs of each RFP/RFQ; prepares the documents and any related addenda; develops evaluation criteria including qualitative appraisal, mathematical formula and weighting of criteria based on scope of work and department needs.

Prepares advertising and selection committee requests; coordinates with the Department's Minority Affairs Division and the Department of Business Development for consideration by the Review Committee on contract measures; coordinates with County Manager's Office on the approval to advertise pursuant to the Aviation Department's Expedite Ordinance and Countywide Expedite Ordinance.

Conducts the entire competitive selection process, including the solicitation, project briefings, attends hearing examiner protests, review of proposals, coordinates and conducts industry workshops if necessary, participates as a committee member and coordinates the evaluation/selection committee meeting process including the prescreening and public hearings.

Maintains detailed records of meetings with all parties involved in contracting processes and provides assistance to the committee on procurement or procedural matters.

Coordinates with the Department of Procurement Management (DPM) on the acquisition of the Department's architects and engineers and

### Aviation Senior Procurement Contract Officer (005297)

Requests for Acquisition for Design/Build services.

Prepares professional engagement agreements, project specific services agreements, amendments, construction contracts and change orders, consents to assignment, and interdepartmental agreements.

Coordinates complex negotiations including the deliberation, discussion and conference to agree upon the terms of a proposed settlement or agreement including the evaluation of fee proposal. Develops and prepares Contracts and Amendments to incorporate the agreed upon terms and conditions as necessary.

Assists the County Attorney's Office in preparing bid appeal cases and responses to bid protests including presentations, and attending hearing examiner protests.

Exercises supervision over subordinate staff through assignment of work.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of documentation requirements pertaining to County contracting processes.

Considerable knowledge of large-scale procurement methods, practices and procedures.

Thorough knowledge of the principles of general management, public and business administration and their application to governmental administration.

Thorough knowledge of the County Administrative Order governing Requests for Proposals and Requests for Qualifications.

Thorough knowledge of applicable Federal, State and County laws, rules and regulations relating to the procurement of supplies and services for the department.

Knowledge of contract negotiation strategies and techniques.

Ability to develop and evaluate Requests for Proposals, Requests for Qualifications, Requests for Information, and Requests for Acquisition and Invitations to Bid to meet the needs of the department.

Ability to determine if the RFP/RFQ/RFI/RFA is an appropriate procurement method and make recommendations for alternate procurement methods as necessary.

Ability to gather, analyze, interpret, summarize and present complex data in a logical format.

Ability to develop contract specific language to meet the needs of RFP's, RFQ's, RFA's and construction contracts.

Ability to express ideas and information clearly and concisely, verbally and in writing to groups and individuals.

Ability to establish and maintain effective working relationships with a variety of public and private officials.

Ability to analyze a complex scope of work and devise appropriate evaluation criteria.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work which involves moderately complex work methods and problems and requires skilled typewriting.

Although employees in this class perform duties which require skilled typewriting, the principal emphasis is upon the wide variety of clerical tasks performed which require the application of independent judgment and clerical knowledges. Work of these positions other than typewriting is similar in nature and level to that found in the Clerk 2 class. The varied of work differs among positions, but where work is more repetitive there is an additional responsibility for finality of action. Work may include the operation of other standard office machines for which no previous training is required. Supervision is occasionally exercised over a small group of employees assisting in routine details. Until the more difficult phases of a job are learned an employee works under relatively close supervision, but thereafter detailed instructions are received only when changes in procedures are made. Work is reviewed by a supervisor through observation of operations, periodic audits of work performed, review of typewritten material, and by advice and assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Maintains the less complex accounting, financial and cost records where no technical knowledge is required but where frequent procedural problems arise; prepares or checks payrolls, vouchers, requisitions and purchase orders; maintains personnel, financial, court and similar records.

Gives information to other divisions and the public, applying significant knowledge of departmental rules, regulations and procedures to interpretations made.

Supervises a small group of employees engaged in routine clerical and typing duties.

Processes documents requiring various procedural knowledges such as warrants for arrest or insurance claims; reviews documents for sufficiency, obtains necessary signatures and routes appropriately, maintaining follow-up.

Prepares less complex tax statements; computes simple taxes or obtains data for the computation of more involved taxes; replies to correspondence inquiries covering tax procedures.

Composes and types form letters and other routine correspondence based on information from records and files; prepares rough draft reports, narratives and statistical tabulations.

Types from copy, rough draft or general instructions, accounting and financial statements, inventories, court records, letters, payrolls, receipts, medical records and case histories, departmental reports, permits or other materials, frequently requiring independent action and discretion on problems encountered.

Takes and transcribes dictation by dictating machine, including correspondence, reports or other materials; takes dictation from professional personnel requiring knowledge of special terminology.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

## Human Resources Department

#### Job Specifications

##### NATURE OF WORK

This is advanced secretarial and related clerical work for the Aviation Department.

Employees in this class are responsible for performing advanced secretarial duties for airport officials, administrators and managers generally at the section-head level. Work includes utilizing the full range of modern secretarial skills to perform secretarial duties, operation of word processing equipment, personal computers, typewriters and other office equipment, assigning and reviewing the work of lower-level clerical employees, and preparing a variety of reports, forms, requisitions and correspondence. Duties may include taking and transcribing dictation which may involve financial, engineering or technical terminology. Supervision is received from an administrative official who reviews work for the efficient and effective performance of secretarial duties in support of unit operations.

##### ILLUSTRATIVE TASKS

Performs advanced secretarial duties for officials, administrators and managers of the Aviation Department; makes appointments and maintains calendar; arranges for conferences and meetings; attends meetings and conferences taking minutes or summary notes.

Opens and distributes mail; maintains control of correspondence flow through work unit and assures that response deadlines are met; composes correspondence or selects standardized formats; prepares a variety of reports, correspondence, documents, forms and requisitions.

Receives visitors and screens telephone callers; acts as receptionist and answers requests for information involving department, division or work unit activities and established policies and procedures.

Operates word processing, personal computer or advanced typewriting equipment to prepare and create reports, generate correspondence or other documents, and complete forms, requisitions and other similar standardized records.

Assigns and reviews the work of lower-level clerical employees engaged in typing, filing and other clerical activities; provides advice and assistance as questions arise concerning work tasks and work unit procedures.

Retrieves and assembles material from files; authorizes expenditures from petty cash funds; requisitions office supplies; performs arithmetic calculations as needed.

Takes and transcribes dictation as required, involving technical or specialized terminology.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of secretarial procedures, methods and techniques.

Knowledge of modern office procedures, practices and equipment.

Knowledge of business English, spelling and arithmetic.

Knowledge of the records, reports and forms utilized in the area of assignment.

Knowledge of the policies, procedures and regulations of the Aviation Department.

Some knowledge of County organization and operations.

Some knowledge of supervisory principles and practices.

Ability to establish and maintain an effective working relationship with a government official.

Ability to operate modern office equipment.

Ability to search for and compile information from files and other sources.

Ability to make minor decisions in accordance with office procedures and departmental regulations.

##### NATURE OF WORK

This is specialized clerical work in the accountability of County-owned tangible personal property and capital equipment for the Aviation Department.

Employees in this class are responsible for maintaining necessary records to ensure accountability and control of all County-owned tangible personal property and capital equipment within the department. Responsibilities include identifying and recording tangible property acquisitions, assigning asset numbers, monitoring location changes, recording the disposal or transfer of capital assets, and maintaining computerized capital inventory records. Duties include conducting periodic physical inventories of departmental property and reporting on the custody, condition and use of such items. Incumbent perform assigned duties in accordance with County and state regulations for property accountability. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for compliance with established capital inventory regulations, policies and procedures.

##### ILLUSTRATIVE TASKS

Conducts annual physical inventories of tangible personal property and capital equipment located within departmental locations and at contracted management companies doing business with the Aviation Department.

Reviews, verifies and enters information concerning the acquisition of new fixed assets into computerized master files; attaches identifying numbers to new fixed assets.

Conducts special physical inventories of fixed assets which require additional monitoring.

Prepares documents for the disposal and transfer of excess and surplus property in compliance with established County and state regulations.

Attends auction sales and assists with the disposal of surplus County-owned property as required.

Maintains and updates fixed asset information for the transfer, replacement or deletion of tangible personal property and capital equipment.

Provides information to departmental supervisors concerning procedures pertaining to fixed asset acquisitions and recordkeeping requirements.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of County and state regulations pertaining to tangible personal property accountability.

Knowledge of departmental regulations and procedures for tangible personal property accountability.

Knowledge of property inventory control recordkeeping practices and procedures.

Knowledge of physical property inventory procedures.

Knowledge of computerized property inventory control system operations.

Knowledge of the geographical locations of departmental facilities.

Ability to conduct physical property inventories with accuracy and thoroughness.

Ability to apply current regulations and procedures to tangible personal property accountability.

Ability to create, update and maintain computerized property control inventory records.

Ability to provide assistance to departmental employees concerning property custody and reporting procedures.

Physical strength and agility sufficient to perform assigned duties.

### Airport Records Center Clerk 2 (005322)

#### Minimum Qualifications

High school. Two years of experience in the receipt, storage, issuance and filing of records are required. Must possess a Driver license. Must be able to lift and move containers weighing up to 50 pounds. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical and public contact work in the retrieval and furnishing of information from document records in the records center of the Aviation Department.

Employees in this class are primarily responsible for the retrieval of information, documents or complete records from various files in storage in response to requests from sources within and outside the County. Incumbents are responsible for exercising care in releasing information and files only to authorized persons and for withholding release in instances where court order or other action is required. Supervision is received from a technical superior who assists as problems arise in the locating and furnishing of information from records in storage.

##### ILLUSTRATIVE TASKS

Receives requests for records by fax, mail, telephone and the visiting public including County, state and federal officials, attorneys, aviation management companies, airport contractors, departmental officials and others; screens requests to assure persons are authorized to receive information and that confidential files can be released without court order.

Retrieves folders or loose documents from record cartons based on file number and nature of documents; refers to automated or manual records center listings as needed; prepares and inserts charge-out tickets and dispatches records or carries them to a reference room.

Assists attorneys, internal auditors, accountants and others with more difficult record searches; retrieves various folders to trace sequence of documents needed for audit or legal proceedings; locates misplaced or missing material; locates and groups related documents of a particular type such as for an airport construction project or for all construction done over a long period of time on a specific site.

Provides information from construction, legal and other documents over the telephone; answers general telephone inquiries concerning the nature of semi-active and active records maintained in the center, or established procedures in use of the facility.

Assists superior in the selection and preparation of records to be transferred to the centralized County records depository; completes record destruction requests for records eligible for destruction; carries out destruction of eligible records in accordance with established regulations.

Refiles loose documents into cartons and assists in reshelving of records by moving records containers as needed.

Supervises operation of the records center in the absence of the immediate supervisor, as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of rules and regulations pertaining to the release of public records.

Knowledge of the State of Florida Public Records Law and regulations pertaining to the destruction of public records.

Knowledge of records center records management system, policies and procedures.

Knowledge of the content of records center active and semi-active records.

Knowledge of the sequence of material in legal, construction or other records in storage.

Knowledge of retention schedules for depository records.

Knowledge of public relations principles and techniques.

Ability to retrieve records from storage promptly and accurately.

Ability to retrieve appropriate documents in difficult record searches.

Ability to establish and maintain effective working relationships with fellow employees, superiors and the public.

Ability to deal courteously, tactfully and effectively with the public and officials of various public and private organizations.

Ability to exercise care in the release of information from records in storage in accordance with established regulations.

## Human Resources Department

### Airport Account Clerk (005338)

#### Minimum Qualifications

High school diploma or GED and one year of bookkeeping experience; completion of a one year business school program in computer accounting and bookkeeping; or completion of six semester credits in Accounting are required. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical work in the application of elementary bookkeeping principles to the maintenance of accounting or fiscal records for the Aviation Department.

Employees in this class maintain accounting records involving varied but routine bookkeeping operations in posting and balancing journals, ledgers and other records. Work may involve the operation of standard office equipment such as calculators and computer terminals for which no previous training is required. Incumbents may provide guidance and assistance to subordinate clerical personnel. Supervision is received from a superior through verification of financial records and statements, and review through audit by internal or external auditors.

##### ILLUSTRATIVE TASKS

Maintains cash, invoice, disbursement or control accounts; balances accounts and prepares routine reports; takes trial balances.  
Checks and codes invoices; prepares vouchers for payment and maintains voucher register.  
Compiles figures for use in preparation of preliminary budgets.  
Charges cost items to cost journals; extends, proves and assembles cost records; posts monthly cost records to ledgers.  
Counts, proves, records and prepares reports on daily cash receipts; posts to cash ledgers; prepares daily bank deposit; reimburses concession managers for cash disbursements; prepares reports on daily cash disbursements and posts to disbursement journal.  
Pre-audits fiscal documents for completeness, accuracy and compliance with well defined departmental accounting procedures.  
Classifies receipts and expenditures according to standard accounting classifications.  
Maintains time, material and equipment rental cost account records for capital improvement and maintenance projects.  
Schedules preparation of warrants in order to take advantage of discounts for prompt payment.  
Operates calculators, computer terminals and other standard office equipment.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of bookkeeping principles and practices.  
Some knowledge of standard office practices, methods and equipment.  
Some knowledge of fiscal policies and procedures applicable to the area of assignment.

Ability to make arithmetic computations rapidly and accurately.  
Ability to apply bookkeeping principles to the maintenance of routine fiscal and accounting records.  
Ability to maintain detailed records of inventory and accounting transactions.  
Ability to understand and follow verbal and written instructions.  
Ability to learn the operation of calculators, computer terminals and other standard office and accounting machines for which no significant previous training is needed.

### Job Specifications

#### NATURE OF WORK

This is professional accounting work for the Aviation Department.

Employees in this class are responsible for applying established accounting principles and methods in the preparation, maintenance, analysis and control of financial records for the Aviation Department. Responsibilities include preparing various financial statements and schedules, analyzing statistical and fiscal records, determining projected expenditures, assisting in budget preparation and modification, and maintaining controls and balances of fiscal records through standard relationships of subsidiary ledgers to general ledgers or other accounting controls. Some independent judgment is exercised in the application of professional accounting principles to the control and maintenance of departmental financial records, and some incumbents may assign and review the work of clerical employees assisting in various phases of accounting activities. Supervision is received from a professional superior who reviews work through personal conferences and examinations of completed financial records and reports for adherence to professional accounting standards and departmental policies and procedures.

#### ILLUSTRATIVE TASKS

Assists in the maintenance of departmental accounting records including account classifications, subsidiary journals and general ledgers in accordance with established accounting procedures.

Prepares various financial statements and schedules, income and expenditure reports, statistical summaries and special reports from accounting records; assists in the preparation of complete periodic financial statements, schedules and reports.

Assists in budget preparation and modification; monitors budgetary expenditures and advises on potential problems such as accelerating expense categories; examines cost codes for expenditures to determine if budget codes have been properly charged and encumbered; initiates requests for transfers of funds and budgetary amendments.

Assigns and reviews the work of clerical employees engaged in routine bookkeeping operations, processing and posting invoices and other accounting-related activities, as required.

Compiles information for use by internal and external auditors.

Reviews expenditures for reimbursement for conformance with contractual requirements, proper documentation, and availability of funds.

Audits petty cash expenditures and ensures procedures are being followed correctly.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of professional accounting principles, practices and procedures.

Knowledge of general principles of public financial administration including budget processes, reporting requirements and cost accounting techniques.

Knowledge of accounting systems, operating activities and financial programs pertaining to the Aviation Department.

Knowledge of sources of information and accounting techniques used in the preparation of financial reports, statements, schedules and summaries.

Knowledge of local, state and federal regulations pertaining to departmental financial records.

Knowledge of modern office practices and procedures.

Ability to prepare complete and accurate accounting statements, schedules, reports and summaries.

Ability to perform detailed work involving written and numerical data.

High school diploma or GED. Must possess a Driver license. Must maintain a safe driving record and may be required to lift and handle items weighing up to 50 pounds. Must be able to work a permanent or rotating shift schedule to include nights, weekends, and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is routine vehicle operation and minor clerical work in an Aviation Department messenger service.

Employees in this class are responsible for operating an automobile, van or similar vehicle to pick up and deliver mail, records, materials, equipment or other items. Responsibilities include operating motor vehicles between various County and vendor locations, performing minor vehicular maintenance and servicing, and performing routine clerical tasks. Work requires some manipulative skill and dexterity in operating mobile equipment safely while driving under varying road and weather conditions. Supervision is received from an administrative superior who reviews work for prompt and efficient delivery and pick up of various items and safe operation of the motor vehicle.

##### ILLUSTRATIVE TASKS

Operates a passenger vehicle, van, light truck or similar vehicle to deliver and pick up mail, packages, records, materials, equipment, documents and other supplies at various County and vendor locations.

Performs minor routine maintenance and service to vehicle including checking fluid levels, tire pressures and fuel levels; cleans interior of vehicle on a regular basis.

Performs routine clerical tasks including alphabetizing, sorting and filing materials, and answering the telephone in accordance with standard procedures.

Picks up requisitioned supplies and materials from vendors; purchases items using petty cash funds as required.

Acts as courier for the delivery or pick up of special, priority or confidential mail.

Provides transportation for County employees and officials for local work-related travel as required.

Completes route sheets and mileage reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the road network and geography of Dade County.

Knowledge of local traffic regulations.

Knowledge of defensive driving methods and techniques.

Knowledge of the location of County and vendor facilities.

Knowledge of the records, forms and reports required in the area of assignment.

Some knowledge of office practices and procedures.

Ability to operate an automobile, van or similar vehicle safely and efficiently.

Ability to understand and follow verbal and written instructions.

Ability to perform minor clerical tasks according to standardized procedures.

Skill in the operation of automotive equipment.

Physical strength and agility sufficient to perform assigned duties.

### Airport Data Entry Specialist 1 (005345)

#### Minimum Qualifications

High school diploma or GED. One year of typing or data entry experience is required. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is data entry and clerical work which involves moderately complex work methods and problems and requires data entry skills. Although the emphasis of the work is on data entry, employees are also responsible for the performance of a wide variety of tasks which require the application of independent judgment and clerical knowledge. The variety of work differs among positions, but where work is more repetitive there is an additional responsibility for finality of action. Work may include the operation of other standard office machines for which no previous training is required. Supervision is occasionally exercised over a small group of employees assisting in routine details. Until the more difficult phases of a job are learned an employee works under relatively close supervision, but thereafter detailed instructions are received only when changes in procedures are made. Work is reviewed by a supervisor through observation of operations, periodic audits of work performed, and by advice and assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Performs data entry including researching, verifying, and correcting information to be entered into a database; creates simple forms and formats or statistical charts; runs and prints reports, and performs disk backups.

Operates standard office equipment such as personal computer, copy or facsimile machine, and calculator; screens telephone calls and refers caller to appropriate party or takes telephone message; opens, sorts, and distributes mail; sorts and files correspondence, reports, or other materials.

Processes documents requiring various procedural knowledge specific to area of assignment; reviews documents for sufficiency, obtains necessary signatures and routes appropriately, maintaining follow-up; provides information to other divisions and the public, applying significant knowledge of departmental rules, regulations and procedures to interpretations made; may supervise a small group of employees engaged in routine clerical duties.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of simple data processing and transmission principles utilized in computerized information systems.

Knowledge of routine office practices and procedures.

Ability to read and decipher data on source documents to be entered.

Ability to enter and verify information with accuracy and a reasonable rate of speed.

Ability to understand and follow oral and written instructions.

Ability to work with considerable independence.

Skill in data entry or typing.

### Aviation Senior Infrastructure Systems Engineer (005349)

#### Minimum Qualifications

Bachelor's degree in Electrical Engineering, Computer Engineering, Telecommunications Engineering, Network Engineering or related field. Five years of engineering experience in the telecommunications field to include voice, network and cable infrastructure are required. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### Nature of Work

This is highly advanced professional technical work in planning, designing, implementing, maintaining and operating various large scale infrastructure telecommunications, computer systems and facilities.

Employees in this class are responsible for managing very large and technically complex diversified projects including, but not limited to major telephone switching and multiplexing systems, wide area radio transmission systems, digital and analog microwave systems, fiber optic wide area networks, integration of computer networks with telecommunication networks and providing project management for multi-million dollar projects. Responsibilities include acting as project leaders to other technical professionals to provide the most cost effective and technically superior solutions to the County's telecommunication and computer network infrastructure and integrating different technologies. The incumbent exercises considerable independent judgment making difficult and complex technical decisions. Work differs from that found in the Infrastructure Systems Engineer classification in that assignments are very broad in scope and incumbents provide project management for very large and technically complex diversified multi-million dollar projects. General direction is received from an administrative superior who reviews work for conformity with departmental policies, practices and regulations and for the attainment of desired objectives.

##### Illustrative Tasks

Performs as a lead project manager for complex telecommunications and/or computer networking systems.

Plans, designs, implements and directs turnkey large and complex telecommunications and/or computer networking systems.

Acts as an integrator of several different telecommunication and computer networking technologies to provide a technical solution to the business needs of a County Department.

Performs economic studies, prepares cost estimates, reviews construction plans, engineers traffic studies and implements major complex telecommunications and/or computer networking projects of multi-million dollar magnitude.

Prepares correspondence and technical reports pertaining to engineering studies and projects.

Provides options and recommendations to upper management for decision making on diverse information technology directions and strategies.

Performs related work as required.

##### Knowledge, Skills and Abilities

Thorough knowledge of the principals and practices of telecommunications and computer network systems.

Thorough knowledge of the design, implementation, and operation of public telecommunication systems and computer networks, including radio, video, data and telephone.

### Aviation Senior Infrastructure Systems Engineer (005349)

Thorough knowledge of diverse technologies for integration of telecommunication and computer networks, and their working relationship to each other.

Thorough knowledge of different types of transmission systems, including but not limited to fiber optic technology, digital and analog microwave technologies, coaxial and twisted pair technologies, wireless technology and satellite transmission technology.

Thorough knowledge of applicable International, Federal, State, and local laws pertaining to telecommunications and computer networking and applicable County and industry standards and international and national codes pertaining to design, implementation and operation of telecommunication and/or computer networking systems.

Ability to design, implement and integrate complex and highly difficult telecommunication and computer networking systems.

Ability to use PC based project management systems developing PERT networks/GANTT charts, critical paths and other project management tools such as spreadsheets and data base programs.

Ability to plan, schedule, coordinate and review the work of other professional team members for conformance with budget, schedule and desired results.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to prepare comprehensive reports on technical strategies and solutions.

Ability to use applicable electronic and diagnostic instruments and equipment.

Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of other public and private officials.

NEW 8/17/2005

#### **Nature Of Work**

This is highly advanced professional technical work in planning, designing, implementing, maintaining and operating various large scale infrastructure telecommunications, computer systems and facilities.

### Airport Communication Service Representative 2 (005351)

#### Minimum Qualifications

High school. Three years of experience providing and planning telephone services in a telephone company, governmental agency or similar structured large organization.

#### Job Specifications

##### NATURE OF WORK

This is advanced specialized clerical and technical work in providing, modifying and coordinating telephone and network services for Miami-Dade County's Aviation Department.

The Communication Service Representative 2 is responsible for receiving requests from Aviation staff for telephone and network service, advising on appropriate telephone instrument equipment, location and cost, and maintaining contact with the public utility providing telephone service countywide. Emphasis of the work is on assisting staff in initial installation or modification of telephone service and investigating user complaints. The incumbent must apply knowledge of telephone equipment characteristics, system planning, user requirements, cost factors and billing procedures for service. Supervision is received from an administrative or technical superior who confers on unusual problems, inspects telephone systems in use as required, and reviews written reports to evaluate attainment of management objectives and conformity with established procedures and policies.

##### ILLUSTRATIVE TASKS

Performs administrative work in providing, modifying, and coordinating telecommunications services for Miami-International Airport, Miami-Dade County Aviation Department, and the General Aviation Airports.

Responsible for processing work order requests from MDAD and Business Partners and Shared Tenant Service (STS customers) for voice and data services. These include day-to-day MAC activity, projects, new facilities, ordering of T-1's, DID lines and special circuits.

Reviews monthly bills from telecommunications service providers and vendors for accuracy.

Coordinates and tracks new systems implementation.

Procures cellular telephone equipment and accessories from vendors; programs telephones for cellular users.

Processes work orders for the installation, relocation and removal of payphones; conducts walk-throughs to identify locations for telephone service installations; reports and follows-up on service calls.

Prepares monthly reports on open and completed telecommunications work orders.

Maintains database records for pay phone service at MIA and other MDAD airports; maintains database records of telecommunications user equipment and services and checks for need and appropriate usage of services.

Performs administrative tasks such as investigating the loss or damage to the Department's Telecommunications equipment as mandated by Administrative Order 8-2 use, care, control and disposal of County Personal Property.

Assists customers with equipment, new systems' usage, service issues, and miscellaneous billing questions.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of various telephone instruments including cellular phones, payphones, call directors, speakerphones and related equipment.

## Human Resources Department

---

### **Airport Communication Service Representative 2 (005351)**

Considerable knowledge of the types of telephone installations commonly used in operational activities of various county offices.

Knowledge of large-scale procurement methods, practices and procedures.

Knowledge of established procedures of the telephone utility company in providing services to the county.

Knowledge of current costs of various telephone equipment and associated modules.

Ability to assist county operational activities in their telephone equipment requirements.

Ability to keep abreast of current telephone communication systems and equipment by coordinating with technical engineering personnel.

Ability to process requests for initial telephone service and modifications promptly.

Ability to furnish accurate cost data to county departments and billing personnel.

Ability to maintain effective relationships with supervisory personnel in various county departments, vendors, and telephone company officials.

#### **Nature Of Work**

This is advanced specialized clerical and technical work in providing, modifying and coordinating telephone and network services for Miami-Dade County's Aviation Department.

### Airport Systems Analyst/Programmer 1 (005352)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field or completion of an information technology certification program (Novel, UNIX, Microsoft, or ORACLE). One year of programming and systems analysis experience is required. Additional programming and systems analysis experience may substitute for the required education on a year-for-year basis. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is technical work in systems analysis in a centralized data processing operation.

Employees in this class are responsible for assisting in the analysis, design and implementation of less complex or smaller scale projects utilizing computer systems. Responsibilities include participation in the completion of new or revised projects of a less difficult nature under the guidance of a superior, and participation in less complex phases of projects including preliminary analysis of feasibility, systems proposals, system design, program documentation, systems implementation and follow up. Employees utilize knowledge of computer capabilities, subject matter of programs in user agencies, and current techniques and methods of systems design in the performance of assigned duties. Supervision is received from a technical superior who serves as a project team leader and provides guidance during work in progress and reviews completed work for quality of results and achievement of objectives.

##### ILLUSTRATIVE TASKS

Participates with other staff members and a technical supervisor in the preliminary analysis of large scale projects; performs tasks including determining the need for information, type of information required, probable cost, and preparation of preliminary systems proposals.

Completes assigned phases in the design of system specifications and completion of program documentation; studies and analyzes existing procedures and prepares system flow charts to describe present and proposed operations.

Participates in documentation for new systems and in the test plan; assists in identifying and correcting errors in program documentation.

Tests, checks and analyzes program instruction for improvements as needed.

Completes less difficult projects not requiring extensive systems analysis and team participation; completes all phases of design and documentation and explains program to users.

Revises program instructions or alters flow charts into coded machine instructions to improve existing programs as assigned.

Performs related work as required.

##### KNOWLEDGE AND SKILLS

Considerable knowledge of the principles and practices of systems analysis and design.

Considerable knowledge of computer programming.

Knowledge of capabilities of computer hardware and software.

Knowledge of the cost of hardware and software systems.

Knowledge of specific computer systems within the area of assignment.

Ability to evaluate user informational requirements.

Ability to determine the feasibility of the application of computer systems to the problem of user informational requirements.

#### Nature Of Work

This is technical work in systems analysis in a centralized data processing operation.

## Human Resources Department

#### Job Specifications

##### NATURE OF WORK

This is advanced and supervisory work in systems analysis in a centralized data processing operation.

Employees in this class are responsible for the analysis, design and implementation of large scale projects utilizing computer systems. Responsibilities include conducting feasibility studies, developing systems proposals, designing and developing systems projects and coordinating systems development with management officials in user departments. Additional duties include coordinating the work of a team of systems analysis and participating programmers assigned to the development of systems projects, conducting or supervising user training as required, and supervising the design of any necessary system revisions. Employees utilize advance knowledge of computer capabilities and subject matter of programs in user agencies in the design of complete systems of a complex nature. General supervision is received from a technical superior who evaluates completed systems work for quality of results and achievement of objectives.

##### ILLUSTRATIVE TASKS

Meets with agency management and supervisory personnel to discuss various operating problems and goals susceptible to computer systems solutions; discusses and evaluates management needs, objectives and goals.

Supervises team preparation of feasibility studies including information required, probable costs, details of systems proposals and related factors.

Meets with management personnel and potential users to present and explain systems proposals.

Assigns phases of systems design work to systems analysts and participating programmers; arrives at design objectives and decisions and develops systems specifications; supervises documentation stages and coordinates work with programming staff; analyzes systems logic difficulties; assures final results of test plan.

Plans all phases of implementation of new systems; formulates user training and supervisory and clerical staff; supervises the conduct of user training and participates as necessary; compiles, composes and assembles total documentation.

Supervises the transfer of documentation into production stages in initial use of the system; meets with management and other personnel in follow-up usage and supervises the design of any necessary revisions.

Supervises or participates in the revision of user agency organizational or procedural studies of a manual systems nature, as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of system analysis and design.

Thorough knowledge of computer programming.

Considerable knowledge of the capabilities of computer hardware and software.

Considerable knowledge of specific computer systems within the areas of assignments.

Some knowledge of supervisory principles and practices.

Ability to evaluate complex user informational requirements.

Ability to determine the feasibility of the application of computer systems to the problem of user informational requirements.

Ability to design complex systems requiring extensive analysis.

Ability to analyze complex systems problems and develop effective solutions.

Ability to develop systems to meet management needs on a timely basis.

Ability to express ideas clearly and concisely, verbally and in writing.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in the operation of mainframe data processing and teleprocessing equipment for the Aviation Department. Employees in this class are responsible for the operation of non-homogeneous decentralized, distributed, mainframe data processing and teleprocessing equipment on rotating shifts at the Aviation Department. Duties include operating complex central control consoles and peripheral monitoring equipment which monitors and controls data and teleprocessing equipment. Work involves maintaining computer programs and Local Area Networks for efficient and effective processing in order to provide satisfactory resources to end users. Responsibilities include the manipulation of controls and observance of visual indicators in accordance with standard procedure and rearranging sequences of program steps for correcting of errors, or to continue operations when individual components of the system malfunction. The operator works with considerable independence on routine operations but on more complex assignments, supervision is received from a supervisor who checks work for accuracy and conformance with instructions.

##### ILLUSTRATIVE TASKS

- Prepares computer based systems for user availability using standard operating instructions and procedures; keeps abreast of the status of all systems.
- Prepares all peripheral equipment with the required forms and tapes; verifies that all necessary files and data have been submitted to the computer section.
- Operates computer consoles and makes program and input data revisions to expedite the correction of error conditions.
- Verifies that all computer output is complete and accurate before release from the section.
- Maintains records of operator time and equipment utilization.
- Assists supervisors in various phases of operation; maintains work area in a neat and orderly manner.
- Notifies superiors or company representative of program or equipment malfunctions.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Considerable knowledge of the operating characteristics of various peripheral equipment used in data and teleprocessing.
- Considerable knowledge of off-line devices and auxiliary input-output equipment.
- Considerable knowledge of computer operations including the mathematical and logical information accepted by electronic devices.
- Knowledge of the various job applications processed by the Aviation Department.
- Ability to assemble, organize and implement work flow procedures used in electronic data processing.
- Ability to detect equipment and program malfunctions.
- Ability to communicate effectively with the users of departmental computer services.
- Ability to operate data and teleprocessing central control consoles and peripheral equipment.
- Ability to understand and follow verbal and written instructions.

### **Airport Computer Operator (005354)**

### Airport Operating Systems Programmer (005355)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field and three years of advanced programming experience to include system maintenance and problem determination are required; or completion of an information technology certification program (Novel, UNIX, Microsoft, or ORACLE) and five years of advanced programming experience to include system maintenance and problem determination are required. Advanced programming experience to include system maintenance and problem determination may substitute for the required education on a year-for-year basis. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work planning, designing and implementing operational procedures utilizing various computer hardware and software systems in a centralized data processing operation.

Employees in this class are responsible for reviewing and analyzing software supplied by manufacturers and utilized in conjunction with centralized data processing hardware configurations. Responsibilities include working with other technical data processing personnel to determine optimum configurations required for installation, and analyzing changes and enhancements to software issued by manufacturers and determining impact on existing production systems, systems design and programming standards, and operating procedures. Related responsibilities include guiding systems designers and programmers in the use of systems software and linkage to application programs. Supervision is received from a technical supervisor who confers on application and operational problems and other technical support functions and evaluated work for quality of results.

##### ILLUSTRATIVE TASKS

Keeps abreast of technological developments concerning systems software supplied by data processing manufacturers.

Analyzes new and modified software for impact on installation problems, standards and procedures.

Selects new software or modifications that will enhance operating and development activities.

Implements new systems software and modifications in an optimal manner and assures minimal adverse effects on current production and testing, and minimal impact on development activities.

Assists other data processing technical employees in establishing standards for use of installation software.

Prepares instructional materials for systems designers, programmers, and operators that describe effects and new requirements resulting from changes to systems software.

Designs, codes, tests and implements special software required by the installation.

Identifies and documents standards for use and operation of systems software.

Analyzes production and testing problems to determine causes of systems software malfunctions and makes corrections, as required.

Performs related work as required.

##### KNOWLEDGE, ABILITIES AND SKILLS

Thorough knowledge of the design and capabilities of computer hardware and software.

Thorough knowledge of computer programming, including IBM Assembler.

Considerable knowledge of symbolic logic, mathematics and business statistics.

Considerable knowledge of systems analysis and design.

Considerable knowledge of current technical developments in systems software.

Ability to define application and operational problems and develop effective solutions.

Ability to detect malfunctions in vendor hardware and software.

Ability to work effectively with vendor representatives in the solution of equipment related problems.

Ability to establish and maintain effective working relations with data processing officials and officials of user departments and agencies.

Ability to furnish competent technical advice on systems capability in the design of complex systems.

##### NATURE OF WORK

This is advanced specialized supervisory communications work in the field of protocol, foreign relations and diplomacy for the Aviation Department.

Employees in this class are responsible for coordinating the activities of a staff of Airport Protocol Officers and assisting in the development of procedures for the handling of protocol at Miami International Airport. Responsibilities include coordinating seminars for foreign trade delegations, supervising the research and development of reports on economic and political conditions in foreign nations, assisting in developing protocol procedures for receiving VIPs at Miami International Airport, providing protocol training for foreign and domestic airport officials, administering the Visitor Service Funding Contract, and arranging for special handling of diplomatic pouches. Incumbents must be fluent in at least two major foreign languages and must have a thorough knowledge of the regulations of U.S. Federal inspection agencies. Supervision is exercised over a staff of Airport Protocol Officers engaged in various program activities. General supervision is received from an administrative superior who reviews work for effectiveness in meeting assigned responsibilities and in achieving objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of Airport Protocol Officers engaged in researching and compiling reports on economic and political conditions of foreign nations, coordinating official visits, translating written materials, and other protocol duties.

Develops, updates and manages protocol procedures for receiving VIPs at Miami International Airport.

Provides assistance in the development of all courtesies of port programs and initiatives offered to the Miami Consular Corps.

Coordinates with Miami Dade County elected officials the reception of their guests and official guests of Miami at Miami International Airport.

Provides training on protocol procedures at Miami International Airport to all new Protocol Officers.

Arranges for special handling of diplomatic pouches; checks passport and credentials of courier and accompanies through customs and immigration services.

Represents the Miami-Dade Aviation Department at meetings of the Consular Corps, U.S. State Department, U.S. Secret Service, and others to develop and update procedures for protocol projects at Miami International Airport.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Plans protocol arrangements with local, state and federal aviation-related agencies or other governmental agencies for visits by high ranking officials to examine customs and immigration operations at Miami International Airport, or to attend inaugural activities, openings of public projects, unveiling of exhibitions and dedications.

Plans and coordinates the preparation and coordination of detailed itineraries, essential instructions, supplementary materials and pertinent correspondence to inform local, state and federal public and private organizations of necessary protocol support activities required for official visits.

Plans and organizes activities and other protocol arrangements for spouses and/or family members of dignitaries attending events and conferences hosted by Miami-Dade County.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

### Aviation Protocol Specialist (005361)

- Considerable knowledge of public relations principles and techniques.
- Considerable knowledge of the rules and regulations of U.S. federal inspection agencies.
- Considerable knowledge of the principles and practices of diplomatic protocol.
- Considerable knowledge of a variety of cultural characteristics, foreign nationals and national customs.
- Considerable knowledge of U.S. Federal Law Enforcement Agency rules, policies and procedures pertaining to the handling of foreign nationals at airports.
- Knowledge of supervisory principles and practices.
- Knowledge of international laws pertaining to visa requirements and diplomatic immunity.
- Ability to supervise a staff of Airport Protocol Officers in a manner conducive to full performance and high morale.
- Ability to provide effective assistance in the development and implementation of protocol arrangements for dignitaries arriving through the Miami-Dade County aviation system and visiting the local area.
- Ability to read, speak and interpret two major foreign languages.
- Ability to deal tactfully and diplomatically with a variety of high ranking government officials, foreign nationals and dignitaries.
- Ability to express ideas and information clearly and concisely, verbally and in writing.
- Ability to establish and maintain effective working relationships with officials of a variety of local, state and national organizations and government agencies.

##### NATURE OF WORK

This is specialized public relations and informational work at Miami International Airport.

Employees in this class schedule and conduct tours of airport facilities for interested groups and visit civic and school organizations to present information on airport operations. Work involves contacting a variety of local organizations to increase awareness of tour programs, arranging and conducting tours of airfield operating areas and related facilities and preparing tour schedules. Incumbents exercise some judgment and tact in the presentation of information to the public and in projecting a positive image of the department. Supervision is received from an administrative superior who reviews work through personal conferences and meetings for attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Receives telephone calls requesting information on airport tours and schedules; arranges tours for civic groups and other organizations; prepares letters and mails information to various organizations on the nature and availability of airport tour programs; arranges for specialized tours as necessary and coordinates schedules with airlines, government agencies and other airport tenants.

Conducts tours of Miami International Airport facilities; arranges for necessary bus transportation, security and operations clearances and support of participating airlines; provides informative and interesting information to participants as tour progresses through various areas of the airport such as Fire Rescue station, hanger areas, aircraft operating areas, terminal buildings and in boarding an airplane.

Instructs and describes to tour participants, flight operations, baggage delivery, security procedures, boarding and deplaning procedures, passengers' safety requirements, in-flight operations, organization and use of terminal facilities and other interesting activities and points of interest at the airport; responds to individual questions on airport operations.

Visits schools, civic groups and other interested organizations; narrates slide presentations and explain activities, functions and services available at the airport facility; invites groups to use facilities and participate in scheduled tours.

Keeps informed on changes in equipment, structures, regulations, aircraft, airline services and activities, in-flight practices, emergency procedures and other subjects in order to maintain timely tour information for participants.

Prepares periodic activity reports as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of public relations principles and practices.

Knowledge of tenant, airline, departmental and governmental operations at Miami International Airport.

Knowledge of the geography of Miami International Airport.

Knowledge of departmental security and safety regulations, operational policies and the goals and objectives of the tour program.

Ability to organize and present information and interesting programs to the public.

Ability to vary the content of informational programs presented to various organizations depending upon the nature of the participants in a tour.

Ability to keep informed on current developments in the airline industry and at the Miami International Airport.

Ability to establish and maintain effective working relationships with the public, airline officials, departmental officials and representatives of civic and educational organizations.

#### Job Specifications

##### NATURE OF WORK

This is public relations work serving passengers and visitors in a public service program on an assigned shift at Miami International Airport. Employees in this class are responsible for providing assistance to travelers and visitors to Miami International Airport by providing directions and a variety of information. Duties include the operation of a passenger-paging system and the provision of bi-lingual or multi-lingual translation assistance. Some incumbents in this class are responsible for assisting arriving international passengers in customs and immigrations areas, and in controlling passenger flow. Other incumbents may monitor and operate an automated people mover system between the main terminal and the satellite building. Supervision may be exercised over a staff of student assistants who assist with work in the international passenger area. Supervision is received from an administrative superior who reviews work through personal observations, conferences and reports for satisfactory performance of public service duties.

##### ILLUSTRATIVE TASKS

Provides assistance, information and directions for travelers and visitors to Miami International Airport concerning airport services and facilities, ground transportation, local restaurants and entertainment, flight information, airline ticket counter locations, lodging, tours and other traveler and visitor needs.

Operates a passenger-paging system for local area or terminal-wide paging of passengers, airport personnel, airline employees and members of the general public.

Provides translation assistance for airlines, airport tenants, passengers, visitors and officials of Federal organizations.

Receives complaints from the public regarding airport services and facilities or experiences with local business concerns; attempts to resolve complaints or refers complaints to appropriate authorities.

Greets and directs arriving international passengers to correct customs and immigration lines; checks passenger documents, inspecting for legibility and proper completion; provides assistance to passengers in locating luggage and porters, completing forms and in explaining various procedures.

Controls the flow of passengers into immigrations and customs areas to assure speedy passenger processing; observes number of passengers in processing area and instructs other department personnel to hold new arrivals as required; informs Federal processing supervisor of passenger volume.

Provides training, guidance and assistance to a staff of airport receptionists on an assigned shift, engaged in assisting international passengers in processing through U.S. Customs and Immigration; assigns to various work areas and reports absences and tardiness.

Monitors and operates an automated airport people mover system between main terminal and satellite building; observes closed circuit television to monitor passenger volume and movements into and out of people mover cars, and conditions around people mover operating area.

Operates console controls to change people mover door assignments, hold cars for arriving or departing passengers, change door dwell times, execute emergency stops and reset system in the event of system alarms.

Monitors the satellite facility refrigeration system; recognizes and responds to critical alarms by contacting maintenance personnel as required; operates key board to recall address points in assisting maintenance employees.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of Metropolitan Dade County geography including road network and transportation system.

Considerable knowledge of the location restaurants, lodging, entertainment and recreational facilities.

## Human Resources Department

Currently employed by Miami-Dade County with permanent status as a Airport Operations Specialist, Airport Public Service Assistant, Airport Automotive Equipment Operator 1, Auxiliary Airport Specialist, Airport Automotive Equipment Operator 2 or Landside Operations Equipment Specialist and one year of continuous full-time service in one of the above job classifications. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period. Must possess a CDL/Class B with Passenger (P) Endorsement and Air-brake Testing.

Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is specialized operational and clerical work on an assigned shift at Miami International Airport or a smaller airfield operated by the county.

Employees in this class perform a variety of specialized airport service functions in support of airfield operations. Duties include operation of a large passenger service vehicle for use in transporting passengers from various areas of the airfield to the terminal, collecting and compiling information concerning projected passenger arrivals on international flights, and operating closed circuit television monitors to assist in maintaining passenger safety and airport security. Some incumbents in this class are responsible for performing a variety of operational duties at an auxiliary airport or smaller airfield including conducting airfield safety inspections, collecting landing fees, providing airport security and assuring compliance of airport tenants with established rules and regulations. Some judgment is required in meeting emergency situations and in enforcing established rules and regulations. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for conformity with departmental rules, regulations and procedures.

##### ILLUSTRATIVE TASKS

Operates a large passenger service to transfer passengers from remote aircraft parking areas or from sites of aircraft breakdowns to terminal, to transport international passengers to U.S. Customs, and to provide transportation for scheduled tours of airport facilities.

Receive telephone calls from a variety of airlines concerning estimated projected number of passengers arriving on international flights; compiles information on appropriate forms and reorganizes in chronological order for use by various airport operations such as U.S.

Customs, in planning their related work activities.

Operates closed circuit television monitors and observes various areas of the satellite terminal to assist in maintaining passenger safety and airport security.

Receives and records airport usage fees from airfield agent; prepares deposits; assigns cargo parking spaces as required; prepares cargo parking tickets as necessary; photocopies, assembles and distributes written material to various airport operations.

Participates in emergency storm, crash and rescue exercises as required.

Performs a variety of operational duties at an auxiliary airport or smaller airfield facility such as operating a motor vehicle to inspect conditions of runways, taxiways, lighting, fences and gates, enforcing departmental rules and regulations, providing airfield security, operating an emergency fire/rescue vehicle in response to an airfield emergency, and assisting airport users and the public by providing directions and general information regarding airport operations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of safe driving techniques and safety practices used in the operation of a passenger service vehicle.

Considerable knowledge of the geography of the airport or airfield of assignment including road network, building locations, public and private facilities and aircraft operating area.

## Human Resources Department

---

### Airport Attendant (005374)

Considerable knowledge of established departmental clerical and operational procedures applicable to the area of assignment.  
Knowledge of emergency notification procedures applicable at auxiliary airports and smaller airfields.  
Knowledge of tenant and leasehold operations at auxiliary airports and smaller airfields.  
Knowledge of departmental records, forms and reports required for airfield operations.  
Some knowledge of public relations principles and techniques.  
Some knowledge of office practices and procedures.  
Ability to safely operate large passenger service vehicular equipment.  
Ability to understand and follow verbal and written instructions.  
Ability to prepare reports and maintain logs.  
Ability to react promptly and correctly in emergency situations.  
Ability to complete assigned responsibilities at auxiliary airports or smaller airfields in the frequent absence of immediate supervision.  
Ability to enforce departmental rules and regulations at auxiliary airports or smaller airfields with firmness, tact and impartiality.

REV 2-81

### **Nature Of Work**

This is specialized operational and clerical work on an assigned shift at Miami International Airport or a smaller airfield operated by the county.

The written examination will evaluate knowledge of airfield operations at Miami International Airport and auxiliary airports to include Departmental rules and regulations, emergency procedures and driver safety. Copies of the reading list and study materials are available at the Miami-Dade Aviation Department, Administrative Services Division, Building 5A, First Floor, Monday through Friday, 8:30 a.m. to 4:00 p.m., from Monday, December 10, 2007 until Tuesday, January 15, 2008. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of .02308 per pay period of continuous, satisfactory, full-time service in the class(es) indicated on this announcement to a maximum credit of ten years of service or six points. Apply on line at [www.miamidade.gov/jobs](http://www.miamidade.gov/jobs) from Monday, December 10, 2007 to Monday, December 24, 2007. Location of examination: Miami International Airport Concourse A 3rd Floor Auditorium, Miami, Florida 33159. Date of Examination: Wednesday, January 16, 2008. Registration time: 8:45 a.m. to 9:00 a.m. Doors to the test facility will be closed promptly at 9:00 a.m. No one will be admitted for registration after the doors of the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination. Make-up test requests must be submitted in writing through the applicant's chain of command to the Miami-Dade County Employee Relations Department, Testing and Validation Section, prior to the written examination.

### Airport APM Technician (005377)

#### **Minimum Qualifications**

High school diploma or GED. Two years of experience in the maintenance and repair of electrical, electronic hydraulic and pneumatic support systems are required. Applicants will be subject to an extensive screening process to include background investigation, fingerprint check and polygraph examination. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal law requirements. The security clearance required by federal law is a continuing condition of employment. Must be able to work a permanent or rotating shift to include nights, weekends and holidays.

#### **Job Specifications**

#### **Nature Of Work**

### Airport Cadastral Technician (005379)

#### Minimum Qualifications

High school diploma or GED. Three years of drafting and/or surveying experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in cadastral engineering.

Employees in this classification act as principal assistants to professional engineers in performing a variety of the more responsible and technical cadastral engineering tasks. Work requires a considerable knowledge of engineering surveying, land surveying and real property interests. Cadastral Technicians frequently supervise subordinate technical personnel. All work is subject to check in progress and upon completion by professional engineers.

##### ILLUSTRATIVE TASKS

Checks and verifies plats of subdivisions which have been prepared by land surveyors for official recording.

Reviews title search information prepared by abstractors to determine ownerships and other property interests.

Prepares and checks legal descriptions of property to be acquired for road right-of-way or other public purposes.

Performs difficult surveying computations to determine bearings and distances included in legal descriptions and area of tracts of land.

Checks executed instruments of conveyance and related documents for proper form, accuracy and completeness.

Supervises the preparation of exhibits, maps and sketches as needed in connection with acquisition functions and condemnation proceedings.

Makes routine field trips to obtain information concerning property descriptions and property values.

Trains lower level technical personnel by informal on-the-job instruction.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of principles, techniques and instruments of engineering drafting.

Considerable knowledge of mathematics through trigonometry and its application to sub-professional engineering and surveying computations.

Considerable knowledge of the basic principles of civil engineering and land surveying.

Considerable knowledge of interests in real property and instruments of conveyance and documents related thereto.

Ability to perform difficult surveying computations.

Ability to read and interpret a wide variety of maps, plans, aerial photographs, survey notes and other cartographic records.

Ability to understand and follow complex oral and written instructions.

Skill in the use of engineering drafting instruments and equipment.

#### Job Specifications

##### NATURE OF WORK

This is specialized operational work monitoring the operations and maintenance of ground transportation facilities on an assigned rotating shift at Miami International Airport.

Employees in this class are responsible for performing a variety of tasks in the ground transportation area to assist in the safe and convenient arrival and departure of passengers and the public. Duties include patrolling upper and lower levels of the exterior of the terminal complex, assuring adequate contractor staffing in parking garages, performing periodic checks of the airport access road network, monitoring taxi starters and taxi operations and enforcing departmental rules, regulations, and procedures. Independent judgment is exercised in the application of public relations principles when dealing with travelers, the public, and employees of private transportation contractors. Incumbents may assign subordinate operations employees to work stations, schedule work, and provide assistance and direction in the performance of their assigned duties. Supervision is received from an administrative superior who reviews work through personal observations, written reports, and personal conferences for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Patrols upper and lower levels of the exterior of the terminal complex which provides vehicle approach and departure routes; enforces departmental rules and regulations, and assures prompt and courteous ground transportation services.

Monitors parking garages to assure proper equipment operations, adequate contractor staffing, and acceptable traffic flow.

Performs periodic checks of the airport access road network to identify potential safety hazards, signage and lighting deficiencies and to monitor construction activities; reports deficiencies to supervisor and follows-up to assure that problems are corrected.

Monitors taxi starters to assure proper station coverage and performance of required duties; maintains current starter work schedule.

Monitors taxicab operations, observing supply and movement and requests adjustments when required to meet demand; checks taxicabs for proper display of permit decals, licenses, and information decals.

Monitors operations of commercial vehicles providing various ground transportation and other expedite services at the airport; checks for decals and documentation where required such as permit cards or letters of authorization; maintains awareness of advance notices of approved pickups by non-permit holders.

Observes taxi storage lot and bus handling area to assure proper usage; reports unauthorized vehicles or personnel; inspects cafeteria and restroom facilities and reports deficiencies to contracted janitorial service supervisors or to departmental maintenance.

Monitors parking enforcement operations to assure proper coverage of areas and renders assistance as required.

Authorizes and initiates the process for towing illegally parked vehicles in various areas of the airport.

Conducts random emission testing on commercial vehicles according to established procedures.

Coordinates special projects such as V.I.P. arrivals and parking with police authorities or other agencies.

Exercises responsibility for operation of surveillance room, including radio net and closed circuit television network.

Arranges preventive maintenance or repairs of ground transportation vehicles and other equipment as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the specialized rules, regulations, and procedures applicable to landside operations at Miami International Airport.

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of the operations and activities of a variety of private contractors providing a variety of ground transportation services at Miami International Airport.

### Landside Operations Officer 2 (005388)

Knowledge of the geography of Miami International Airport including public access road network, building locations, and locations of public and private facilities.

Knowledge of departmental rules, regulations, and procedures.

Knowledge of crowd control methods and techniques.

Knowledge of departmental records, forms, and reports required for ground transportation operations.

Knowledge of taxicab and commercial carrier agreements with the department.

Some knowledge of security practices and procedures.

Ability to establish and maintain effective working relations with superiors, departmental officials, employees of private contractors and the traveling public.

Ability to exercise judgment and discretion in the application of departmental policies and procedures to a variety of landside operations circumstances, problems, and conditions.

Ability to enforce established rules and regulations with firmness, tact, and impartiality.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to understand and follow verbal and written instructions.

Ability to prepare a variety of reports, surveys, and maintain logs.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in the performance of a variety of maintenance and repair tasks in one or more trades areas for the Aviation Department.

Employees in this class perform a variety of general maintenance work which approaches the journeyman level but does not require as high a degree of skill. Employees are frequently called upon to perform rough maintenance and repair work covering several building and mechanical trades areas. Assignments are usually received verbally, may be accompanied by sketches or diagrams, and are generally specific as to the nature of the work. Employees may devise their own methods of accomplishing assigned tasks and may work with some independence. All work is subject to inspection in process and upon completion by a skilled trades employee or technical supervisor.

##### ILLUSTRATIVE TASKS

Replaces defective light bulbs and fluorescent lights; assists in reballasting and relamping hi-mast lighting, tracing short circuits and replacing fuses, repairing lighted roadway signs and street lights, troubleshooting electric motor problems, checking motor starters, and installing and removing electric motors and components; cuts, threads and bends conduit pipe to sizes and lengths required by electricians.

Assists in the inspection, repair, maintenance and overhaul of baggage handling systems and moving sidewalks including replacing or splicing belts, changing pillow blocks and flange bearings on conveyor shafts, and aligning or adjusting photo cells.

Assists in the inspection, repair, maintenance and overhaul of passenger loading bridges including lubricating equipment, checking for leaks, replacing hydraulic hoses and bumpers, replacing tires and lights, removing hydraulic cylinders for repacking, and replacing gear boxes and bearings.

Makes general minor repairs to wood fixtures; assists in the installation of interior and exterior doors, door jams, doorknobs and deadbolts, window frames and sashes, cabinets and counter tops, and other hardware fixtures.

Feeds lumber into power saws, planers and joiners; operates power and manual tools to assist carpenters in cutting, fitting, assembling and erecting wooden objects and structures.

Mixes plaster, mortar and cement; assists journeymen engaged in building or repairing brick, stone or tile walls and structures.

Does rough painting, independently or under direction of a supervisor; erects scaffolding; sands furniture or other items to be painted; applies primer and finished coat using brush or spray gun.

Assists in repair and overhaul of air conditioning and refrigeration equipment; performs preventive maintenance, washes or replaces filters, changes belts, oils motors, greases bearings and cleans coils.

Installs and repairs street signs and asphalt channelization.

Assists plumbers by unstopping sinks, toilets, sewer lines and similar facilities; assists in the repair and replacement of toilets, flush valves and supply lines; assists in the repair and installation of irrigation systems.

Makes minor repairs to riding lawnmowers, pushmowers, weed eaters and edgers; changes oil, adjusts and cleans equipment.

Loads and unloads materials; cleans tools and work area upon completion of projects.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the standard tools, materials, methods and practices of a variety of trades areas.

### **Airport Maintenance Repairer (005403)**

Knowledge of the occupational hazards and safety precautions applicable to the area of assignment.  
Ability to understand and follow verbal and written instructions.  
Ability to understand and work from rough sketches and diagrams.  
Ability to make rough estimates of time and material requirements for maintenance and repair assignments.  
Skill in the care and use of tools, materials and equipment of various trades areas.  
Skill in the operation of power tools and equipment.  
Physical strength and agility sufficient to perform assigned duties.

NEW 12-96

The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the maintenance and repair of buildings, machinery and mechanical equipment.

An employee in this class performs specialized mechanical work in a manual trade or as a skilled journeyman in more than one craft. Work involves the maintenance and repair of machinery and mechanical equipment such as pumps, engines, motors, pneumatic tubes and electrical apparatus used in a wide variety of public building structures. Employees work independently using handtools, power tools and various precision-measuring and testing instruments. Assignments may be given in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning machinery. Work is reviewed by a maintenance foreman who inspects work occasionally in progress and upon completion for compliance with instructions and serviceability of the equipment repaired.

##### ILLUSTRATIVE TASKS

Overhauls and maintains power mowing, sawing and pumping equipment; rebuilds fractional horsepower gasoline engines; uses special tools such as valve facers, reamers, cylinder hones, drills and grinders, gauges, micrometers, taps and dies.

Repairs short circuits and broken wires; installs or replaces electrical fixtures; repairs and replaces electric motors; repairs and replaces switches, relays, transformers and other electro-mechanical components in paging systems, pneumatic tube systems and other electrical communications systems.

Repairs the less complex hospital equipment; repairs blood pressure apparatus, chart racks, operating tables and similar medical apparatus. Does electric and acetylene welding, brazing and silver soldering; repairs, modifies and makes new installations of pipe fittings; performs skilled plumbing work on steam and water lines and related plumbing equipment.

Repairs and maintains a variety of laundry machinery and equipment such as washers, extractors, tumblers, dryers, flatwork ironers and related apparatus.

Repairs and opens defective locks, changes lock combinations, disassembles doorlocks, padlocks, combination locks, handcuffs; replaces worn or broken parts, changes tumblers for new combinations; fabricates new and duplicate keys, using key cutting machine; installs master lock system for an entire building center; makes repairs to jail electrical lock system, adjusts timers, line brushes selenoids, capacitors, resistors, rectifiers and related parts of transit tube system.

Examines form and texture of parts to detect imperfections; inspects worn parts to determine changes in dimensional requirements, uses rules, calipers, micrometers and similar measuring instruments.

Adjusts functional parts of devices and control instruments; uses hand tools, levels, plumb bobs and straightedges.

Occasionally sets up and operates lathe, drill press, threading machine, grinder and similar metalworking power tools.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods, materials, tools and practices used in a specialized trade or in the building, electrical or mechanical crafts.

Considerable knowledge of the occupational hazards and safety precautions of the building, electrical or mechanical trades.

Knowledge of the principles of mechanics.

Knowledge of the repair and maintenance characteristics of a wide variety of governmental building structures, mechanical equipment and powered machinery.

Ability to detect defects in machinery and equipment and to make the necessary repairs or adjustments.

Ability to work from oral or written instructions, from simple diagrams and sketches.

### Airport Maintenance Mechanic (005404)

Ability to make simple time and materials estimates.

Skill in using a variety of standard hand tools, machines and power equipment used in a craft or in building and machinery repair work.

REV 11-66

#### **Nature Of Work**

This is skilled work at the journeyman level in the maintenance and repair of buildings, machinery and mechanical equipment.

### Airport Service Equipment Maintenance Mechanic (005406)

#### Minimum Qualifications

High school diploma or GED. One year of skilled maintenance experience in the troubleshooting and repair of baggage handling systems is required. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the maintenance and repair of a variety of mechanical, electrical and computerized airport transport service equipment at the Miami International Airport. Employees in this class are responsible for inspecting, diagnosing, adjusting, repairing, replacing and calibrating airport electro/mechanic equipment including baggage handling systems, conveyor systems and automated security doors. Work involves the use of specialized precision test instruments and specialized hand tools of the electronic mechanical and electrical trade in the maintenance and repair of a variety of airport transport service equipment. Employees work independently using hand tools, power tools and various precision-measuring and testing instruments. Assignments may be in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning equipment. Work is reviewed by a technical supervisor who inspects work occasionally in progress and upon completion for compliance with instructions and satisfactory operation of equipment repaired and maintained.

##### ILLUSTRATIVE TASKS

Troubleshoots, analyzes, repairs and performs preventive maintenance on a variety of computerized transport service equipment used at the Aviation Department, Miami International Airport, with special emphasis on multi-type baggage handling systems; overhauls conveyor systems; work involves performing tasks in close, confined spaces in low lighting and dusty conditions.

Supervision of Airport Maintenance Repairers as necessary for maintenance and repair projects.

Inspects and maintains motor reducers and automated security doors; overhauls multi-stage gear reducers requiring the replacement of precision parts, seals and miscellaneous hardware; works with three-phase high voltage electric motors and motor brakes; performs basic three-phase wiring and troubleshooting.

Monitors the operation of baggage conveyors, and baggage scales and makes necessary adjustments as required; makes continual safety and operational inspections while passenger baggage equipment is in use.

Replaces major components of electromechanical, photocells, power-turns, computerized systems, electrical and mechanical parts of various designs.

Performs related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of the maintenance and repair of baggage handling systems.

Considerable knowledge of ASME B20.1 safety standards necessary to operate and make repairs on baggage handling systems.

Considerable knowledge of the methods, materials, tools and practices used in a specialized trade or in the electrical or mechanical trades.

Considerable knowledge of the occupational hazards and safety precautions of the electrical and mechanical trades.

Knowledge of the principles of mechanics and electronics.

### **Airport Service Equipment Maintenance Mechanic (005406)**

Knowledge of the operating, repair and maintenance characteristics of a wide variety of specialized mechanical and electrical equipment used in a major aviation complex.

Knowledge of computerized systems used in baggage handling systems, conveyor systems and automated security doors.

Knowledge of blueprints, schematics and electronic diagrams.

Ability to inspect, diagnose, repair and maintain varied and complex airport service equipment.

Ability to read, interpret and work from blueprints, schematics, electronic diagrams and manufacturer's manuals.

Ability to make simple time and material estimates.

Ability to work in confined spaces in low lighting and dusty conditions.

Skill in the use of a wide variety of precision test equipment, hand tools, machinery and power tools of the mechanical, electrical and electronic trades.

Physical strength and agility sufficient to perform assigned duties.

NEW 11/01/2004

.

#### **Nature Of Work**

This is skilled technical work in the maintenance and repair of a variety of mechanical, electrical and computerized airport transport service equipment at the Miami International Airport.

### Airport Heavy Truck Tire Repairer (005407)

#### Minimum Qualifications

Eighth grade. Six months of experience servicing or maintaining truck equipment relating to heavy tire repair are required. Must obtain a CDL/Class A prior to the completion of the six-month probationary period. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in the routine and emergency road-call servicing of a variety of truck tires.

Employees in this class are responsible for various tasks in the standardized tire and wheel maintenance of County vehicular equipment. Duties include tire repair, wheel repair or refurbishment, removal and replacement of tire and wheel assemblies, maintaining routine records of servicing activities and rebuilding of tire and wheel assemblies. Work occasionally requires making minor mechanical adjustments to County vehicles which are typically not at the journeyman mechanic level. Supervision is received from a technical superior who periodically reviews work in progress and upon completion for satisfactory accomplishment of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Dismounts, breaks-down, repairs, builds-up and remounts tires and wheels.

Operates wheel/tire rebuild machines.

Services vehicle wheel and tire requirements.

Changes and repairs tires, wheels and tubes; checks and adjusts air pressure.

Cleans garage and work areas, and buildings, as required.

Keeps routine records of servicing activities, as needed.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of basic recapping technology.

Knowledge of the location, nomenclature and function of less complex parts of County mobile equipment.

Knowledge of single and double-ring wheels.

Knowledge of recordkeeping procedures in the area of assignment.

Ability to operate computerized tire/wheel balancing equipment.

Ability to operate heavy duty truck equipment.

Ability to follow verbal and written instructions.

Ability to adhere to established safety practices and procedures.

Skill in the operation of heavy pneumatic wrenches.

Skill in the operation of automated tire/wheel rebuild equipment.

NEW 6-91

#### Nature Of Work

This is semi-skilled work in the routine and emergency road-call servicing of a variety of truck tires.

### Airport Light Equipment Technician (005416)

#### Minimum Qualifications

Eighth grade. Two years of skilled experience in the diagnoses, testing, replacement, repair, overhaul, and maintenance of diversified automotive and passenger vehicle equipment such as engines, transmissions, air-conditioning systems, ignitions, differentials, brakes, electrical systems, and other vehicular systems are required. Must possess a Driver license. Must possess or obtain an Automotive Service Excellence (ASE) certificate for servicing motor vehicle air-conditioners prior to the completion of the probationary period. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is technical work at the journeyman level in the diagnosis, repair and preventive maintenance of diversified automotive and passenger vehicle equipment.

Employees in this class perform skilled work in the repair and overhaul of mobile equipment, including automobiles, vans and trucks up to 10,000 pounds Gross Vehicle Weight. Work involves repairing and overhauling engines, transmissions, air-conditioning systems, ignitions, differentials, brakes, electrical systems and other vehicular systems. Related duties may include maintaining customer relations, entering information pertaining to work orders into a computer terminal, inspecting vehicles after commercial repair, and maintaining parts inventories. Supervision is received from a shop supervisor or other superior who reviews work for satisfactory performance of equipment repaired or maintained.

##### ILLUSTRATIVE TASKS

- Tests, inspects, and repairs vehicle emission equipment to comply with vehicle emission legislation.

- Diagnoses and repairs complete electrical systems, including electric drive motors and regenerative electric systems.

- Employs onboard computer systems and other external computerized diagnostic systems in the performance of repair and maintenance work.

- Inspects, diagnoses, repairs and overhauls brake systems, including Anti-lock Brake Systems (ABS).

- Diagnoses and repairs suspension and steering systems.

- Debriefs vehicle operators to understand driveability concerns and affect appropriate repairs.

- Performs some minor body work including removal and replacement of body parts; inspects vehicles after commercial repair; adjusts and aligns body parts and hardware, as required.

- Diagnoses and repairs automotive transmissions/transaxles.

- Orders repair parts and maintains adequate parts inventory.

- Diagnoses and repairs air-conditioning systems in compliance with current environmental regulations.

- Prepares and completes work orders; operates a computer terminal to enter information and research vehicle repair history in the automated Equipment Management System.

- Performs preventive maintenance, including complete unit inspections, changing fluids/filters, and adjustments; performs lubrications and repairs all defects, as required.

- Road tests and certifies equipment before returning to in-service status.

- Repairs flat tires and performs wait-jobs, as required.

- Cleans and maintains shop, tools, and shop equipment.

- Observes established safety practices and procedures.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Considerable knowledge of design characteristics of a wide variety of mobile equipment.

- Considerable knowledge of the operating characteristics and maintenance requirements of a variety of automotive equipment, vans, passenger vehicles and trucks.

### Airport Light Equipment Technician (005416)

Considerable knowledge of modern diagnostic techniques used to detect defects in automotive equipment operation.  
Considerable knowledge of the repair and adjustment of mobile equipment parts, assemblies, components and operating systems.  
Knowledge of automotive tools, equipment and materials.  
Knowledge of occupational hazards and safety precautions of automotive repair and maintenance work.  
Ability to use modern devices and techniques to diagnose malfunctions in automotive equipment.  
Ability to use automotive repair tools and equipment to perform preventive maintenance and effect difficult repairs.  
Ability to perform complete preventive maintenance procedures.  
Ability to diagnose, repair and overhaul engines, transmissions, air-conditioning systems, electrical systems, and other vehicular systems and subsystems.  
Skill in automotive mechanics.  
Skill in the diagnosis and testing of mobile equipment malfunctions.  
Skill in the care and use of automotive tools and equipment.

REV 11-94

#### **Nature Of Work**

This is technical work at the journeyman level in the diagnosis, repair and preventive maintenance of diversified automotive and passenger vehicle equipment.

### Airport Motorcycle Mechanic (005417)

#### **Minimum Qualifications**

Eighth grade. Three years of experience in the maintenance, repair and overhaul of motorcycles and three-wheeled scooter vehicles are required; or A combination of two years of experience in the maintenance, repair and overhaul of motorcycles AND one year of experience in the maintenance, repair and overhaul of automotive passenger vehicles are required. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### **Job Specifications**

#### **Nature Of Work**

### Airport Hydraulics Mechanic (005418)

#### Minimum Qualifications

High school diploma or GED. Two years of skilled experience troubleshooting and repairing fluid power systems and components such as hydraulic pumps, motors, directional valves and various actuators are required. Must be able to read and evaluate complex hydraulic schematics. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment. Must be able to work a permanent or rotating shift to include nights, weekends and holidays.

#### Job Specifications

##### NATURE OF WORK

This is skilled mechanical work at the Journeyman level in the repair and maintenance of airport hydraulic systems.

Employees in this class perform skilled work in the repair and maintenance of fluid power systems which activate and control passenger loading bridges, trash compactors and incinerators. Work involves diagnosing, repairing, overhauling and adjusting a variety of hydraulic equipment and hydraulic systems. Supervision is occasionally exercised over subordinate employees who assists with various phases of work. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory repair and maintenance of hydraulic systems.

##### ILLUSTRATIVE TASKS

Repairs and maintains a variety of hydraulically controlled and operated equipment with emphasis on passenger loading bridges, trash compactors and incinerators; makes adjustments on pressure relief valves and flow control valves to bring components into proper operating range; removes and replaces major components on passenger loading bridge auto level systems.

Overhauls, rebuilds and services hydraulic component parts such as motors, cylinders, directional control valves, piston type and swash plate type pumps, accumulators and conductors; fabricates hydraulic hoses, fittings and piping; certifies rebuilt components for required operating pressure.

Troubleshoots hydraulic components and systems to locate and correct problems; makes bench tests to locate leaks and defects in equipment; recommends solutions to correct operating problems.

Assigns tasks to skilled and unskilled helpers assisting in hydraulic work.

Makes occasional repairs in the field utilizing available tools and equipment; tests and checks components and equipment before returning to service.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the construction, design, repair and adjustment of hydraulic components and equipment.

Considerable knowledge of tools and equipment needed for major and minor repairs of hydraulic systems,

Considerable knowledge of the operation of passenger loading bridges, trash compactors and incinerators.

Considerable knowledge of hydraulic principles and theory.

Considerable knowledge of the mechanics of hydraulic components.

Knowledge of the occupational hazards and safety precautions of hydraulic work.

Ability to diagnose defects and failures of hydraulic systems and make repairs.

Ability to read hydraulic schematics.

Ability to make field repairs on equipment utilizing mobile repair tools.

Ability to follow verbal and written instructions.

Skill in the care and use of tools, equipment and materials used in industrial hydraulics.

Skill in the diagnosis of hydraulic malfunctions.

### Airport Hydraulics Mechanic (005418)

NEW 1-85

#### **Nature Of Work**

This is skilled mechanical work at the Journeyman level in the repair and maintenance of airport hydraulic systems.

### Airport Waste Plant Electrician (005420)

#### Minimum Qualifications

Must possess a Dade County Certificate of Competency as a Journeyman Electrician. Two years of experience at the journeyman level in the maintenance and repair of electronic and electrical systems or equipment are required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled journeyman work in the maintenance, repair and installation of both high and low voltage electrical and electronic systems and equipment in a modern solid waste disposal facility.

Employees in this class perform skilled electrical and electronic repair tasks in accordance with standard practices of the electrical and electronic trade, including responsibility for performing special work required for high voltage electrical equipment and controls. Work requires a knowledge of the mechanical and operational aspects of equipment and its installation. Incumbents use special electrical tools such as voltmeters, ammeters, insulation testing meters, industrial analyzers, ground testers and also use special equipment necessary for the maintenance of large electrical motors. Assignments are made either orally or through written orders and may be accompanied by diagrams and blueprints. Technical supervision is received from a superior on unusual or difficult operational problems and work is evaluated by satisfactory performance of equipment repaired or maintained.

##### ILLUSTRATIVE TASKS

Installs, maintains and repairs a variety of electronic controls such as current/voltage scale indicators and controllers, computer set stations, solid state modular controls, single case recorders, servo drive systems, servo amplifiers, temperature indicator panels and sending units; inspects and monitors all components for leakage and impending breakdown.

Installs, maintains and repairs electronic controls for electrostatic precipitators, including primary and secondary live voltage and amperage, printed circuit modules, transformers, collector plates and discharge wires.

Installs, maintains and repairs bridge crane components including control contractors, rectifier panels, continuity sensing units, signal converters, tachometer continuity and limit panels, pneumatic and hydraulic timing controls; removes, reclines and adjusts holding and closing of bridge and trolley brakes.

Installs, maintains and repairs both high and low voltage electric motors, motor starters, contractors and all types of industrial wiring and lighting.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of standard practices, methods, tools and materials of the electrical and electronic trade.

Considerable knowledge of the installation, alteration, repair and maintenance of both high and low voltage electrical and electronic systems and equipment in modern solid waste disposal facilities.

Knowledge of local and national electrical codes.

Knowledge of the hazards of the trade and of appropriate precautionary measures, particularly as they pertain to work on high voltage electrical systems and equipment.

Knowledge of the operating principles and repair techniques applicable to electronic equipment.

Ability to locate and adjust defects in electrical and electronic systems and equipment.

Ability to work from electrical diagrams and blueprints, and to understand and effectively carry out oral and written instructions.

Ability to make appropriate estimates of time and materials.

Ability to follow electrical wiring diagrams on low and medium voltage motor controllers and circuit breakers.

Skill in the care and use of standard and special electrical tools and testing equipment.

NEW 10-78

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of trucks and similar types of automotive equipment for the Aviation Department.

Employees in this class are responsible for operating dump and stake body trucks, water carriers, light tractors, vans, motorized sweepers, wreckers, pick up trucks, fork lifts and other vehicles used in varied operations throughout airport facilities. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operation checks and routine preventive maintenance. Work requires some manipulative skill and dexterity in operating vehicles safely while driving under varying road and weather conditions. Supervision is received from a supervisor who reviews work in progress and upon completion for proper equipment operation and thoroughness in carrying out assigned tasks.

##### ILLUSTRATIVE TASKS

Drives dump truck, flatbed truck or other vehicle and transports labor crew, materials, supplies, tools and equipment to work sites; supervises laboring tasks in roadway patching, road shoulder and median maintenance, and weed cutting.

Operates light tractor with mower attachment and riding mower to mow areas along taxiways, runways, fencing, signs and lights at airport facilities.

Operates tank truck and oil distributor in roadway resurfacing and related maintenance; operates a roller to prepare parking lot, roadway or bicycle path surfaces.

Drives passenger bus to transport students and others; drives van and stake body vehicle to deliver building supplies, laundry and various materials.

Operates a sweeper tractor to remove refuse from roadways, parking lots and other areas.

Operates heavy duty wrecker equipped with crane and winch; hoists and tows disabled vehicle to repair shop.

May assist labor crew with assigned tasks or direct work of labor crew on landscape, roadway or other maintenance jobs.

Performs routine pre-operational checks and routine preventive maintenance of equipment; makes minor adjustments to equipment in the field.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the operational characteristics of medium-sized trucks and similar types of automotive equipment.

Knowledge of safe driving techniques and the occupational hazards of motorized equipment operation.

Knowledge of local traffic rules and regulations.

Some knowledge of the geography and road network of the metropolitan area.

Ability to operate an assigned vehicle in the prescribed manner.

Ability to detect improper functioning mechanical systems on an assigned vehicle.

Ability to make minor adjustments and to perform minor servicing of automotive equipment.

Skill in driving medium-sized trucks and similar automotive equipment.

### Airport Automotive Equipment Operator 1 (005427)

NEW 10-94

#### **Nature Of Work**

This is skilled work in the operation of trucks and similar types of automotive equipment for the Aviation Department.

### Airport Automotive Equipment Operator 2 (005428)

#### Minimum Qualifications

Eighth grade. One year of experience in operating medium and/or heavy-duty automotive or medium and/or heavy-duty construction equipment such as 5,000 to 10,000 pound tractor trailers, light tractors, truck-mounted sweepers, tractor-mounted scrubbers, water tank trucks, backhoes, front loaders or similar equipment is required. Must possess a CDL/Class A with Air-Brakes testing. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment. Must be able to work a permanent or rotating shift schedule to include nights, weekends and holidays.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled work in the operation of large vehicles and similar types of public works equipment for the Aviation Department.

Employees in this class are responsible for operating tractor trailers, heavy duty road rollers, front end loaders, small bulldozers and other vehicles used principally for maintenance and construction purposes. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operational checks and routine preventive maintenance. Work requires skill and dexterity in using simultaneous control mechanisms on assigned vehicles. Supervision is received from a maintenance or construction supervisor who reviews work in progress and upon completion for proper equipment operation and thoroughness in carrying out assigned tasks.

##### ILLUSTRATIVE TASKS

Transports construction equipment using a low bed trailer; operates tractor trailer in local hauling tasks; loads and unloads vehicles as required.

- Operates heavy duty road roller in resurfacing and roadway construction.

- Operates front end loader or small tractor rigged with hydraulic loading lift and back hoe digging shovel.

- Operates amphibious vehicles used in spraying and removing vegetation from canals and waterways.

- Drives truck and operates hydraulic aerial hoists used in tree maintenance; uses crane and winch attachments for loading and placing various equipment and materials.

- May operate smaller earth-moving equipment such as bulldozers, graders and mobile hydrocranes.

- Operates mowtrim or boom-mounted saw to trim roadside vegetation and canal banks.

- Operates large dump truck to haul construction materials or debris.

- Operates large street sweeper for road maintenance.

- Operates a single bed trash truck with chipper attachment to cut back visual obstructions and hazardous roadside vegetation.

- Performs routine pre-operational checks and routine preventive maintenance of equipment; makes minor adjustments to equipment in the field.

- May assist labor crew with assigned tasks or direct labor crew on landscape or construction jobs.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Knowledge of the operational characteristics of large vehicles and larger types of automotive equipment.

- Knowledge of large vehicles and public works equipment used for maintenance and construction purposes.

- Knowledge of safe driving techniques and the occupational hazards of motorized equipment operation.

- Knowledge of local traffic rules and regulations.

- Some knowledge of the geography and road network of the metropolitan area.

- Ability to operate an assigned vehicle in the prescribed manner.

- Ability to detect malfunctions while operating heavy equipment.

- Ability to make minor adjustments and to perform minor servicing of assigned automotive equipment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of heavy duty earth-moving equipment for the Aviation Department.

Employees in this class operate large diesel-powered vehicles used in varied maintenance and construction tasks. Duties include the operation of equipment with complex control systems requiring a high degree of manipulative skill and dexterity. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operational checks and routine preventive maintenance. Supervision is received from a field supervisor who inspects work in progress and upon completion for effective equipment operation and compliance with engineering standards.

##### ILLUSTRATIVE TASKS

Operates heavy equipment such as motor graders, backhoes, front end loaders and hydraulic bulldozers in the maintenance and construction of airport interior roadways, parking lots, runways, drainage ditches, field lighting trenches and other facilities.

Operates road grader in roadway construction and maintenance work; builds road crown, slopes shoulders, spreads materials, blades drainage ditch; finishes work to grade.

Rigs and operates crane, dragline, backhoe, pile driver and similar power shovel equipment; drags, hoists, swings and dumps materials using clamshell and bucket attachments for digging, widening and cleaning waterways and drainage ditches.

Operates large hydraulic bulldozer to clear land for roadways, parking areas and other facilities.

Operates a large grade-all to clean and maintain ditches, provide uniform grade to canal banks and for excavation in canal construction and maintenance.

Operates truck-mounted and crawler type excavating machines in the performance of a variety of construction and maintenance tasks.

Inspects equipment before starting; checks lubricants, cooling system, hydraulic and electrical systems; makes necessary minor adjustments; reports malfunctions to supervisor; field tests equipment after servicing.

May serve as a crew leader over a small field crew of equipment operators and laborers.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operating characteristics of heavy duty earth-moving equipment.

Considerable knowledge of the occupational hazards and safety precautions applicable to the operation of construction equipment.

Knowledge of basic maintenance requirements of heavy construction equipment.

Ability to detect malfunctions while operating heavy construction equipment.

Ability to make adjustments and to perform minor maintenance to heavy equipment.

Ability to perform earth work according to engineering specifications.

Skill in the operation of large earth-moving equipment.

##### NATURE OF WORK

This is skilled carpentry and roofing work for the Metro-Dade County Aviation Department.

Employees in this class perform skilled carpentry tasks in accordance with standard trade practices, and are responsible for performing skilled work in patching, repair and replacement of roof structures. Duties include performing preventive maintenance to roof surfaces and related structures, conducting routine inspections and recommending repairs, and performing other duties associated with roof repair or replacement. Supervision may be exercised over trades helpers who assist in various phases of carpentry or roofing work. Supervision is received from a technical or administrative superior who reviews work in progress and upon completion for satisfactory completion of assignments.

##### ILLUSTRATIVE TASKS

Performs skilled carpentry tasks in the construction, maintenance and repair of wooden articles, equipment and structures; applies carpentry skills to patching, repair and replacement of roofing systems and associated roof structures.

Supervises one or more trades helpers in construction, repair and maintenance of wooden structures or roofing systems.

Repairs roof on main Miami Airport terminal and other buildings at Miami International Airport and at auxiliary airports, including single-ply, built-up, foam overlay and vinyl systems.

Replaces ceiling tiles damaged due to roof leaks.

Performs rough framing, sheathing and other duties associated with the repair or replacement of roof system or framing.

Performs preventive maintenance to roof surfaces, including drain clearing, removing miscellaneous trash; maps with roof fiber coating.

Conducts routine inspections of buildings and recommends repairs.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the carpentry trade.

Considerable knowledge of roofing structures, materials and methods of repair and replacement.

Knowledge of the occupational hazards and safety precautions of the carpentry trade and roofing work.

Knowledge of the methods of roofing preventive maintenance.

Ability to perform skilled carpentry tasks in the repair, maintenance and replacement of roof structures, and in standard carpentry work.

Ability to work at considerable height.

Ability to perform carpentry work under adverse weather conditions.

Ability to conduct inspections of roof structures and recognize conditions which require repair or maintenance.

Skill in the operation of carpentry tools and equipment.

Skill in carpentry.

#### NATURE OF WORK

This is skilled work at the journeyman level in the construction, maintenance and repair of wooden articles, equipment and structures for the Aviation Department

Employees in this class are responsible for performing skilled carpentry tasks in accordance with standard trade practices. Work involves skilled hand and bench carpentry duties including the operation of power-driven wood-working machinery. Assignments may be made verbally or consist of written instructions, sketches, diagrams or blueprints. Supervision may occasionally be exercised over various trades helpers who assist in various phases of carpentry work. Supervision is received from a technical or administrative superior who periodically inspects work in progress and upon completion for satisfactory application of carpentry skills and adherence to job specifications.

#### ILLUSTRATIVE TASKS

Performs general carpentry work in the construction, remodeling, alteration and maintenance of buildings, floors, roofs, stairways, partitions, doors, windows, screens, wood fixtures and furniture.

Repairs tables, shelves, benches and cabinets; builds concrete forms; lays sub-flooring and does sheathing.

Performs skilled bench work in a carpenter shop operating power saws, joiners, wood lathes, planers, and boring, sanding and mortising machines; uses and maintains hand carpentry tools.

Patches boat hulls; makes ribs and braces; repairs fenders, bulkheads, piers and moorings.

Prepares estimates of time and material requirements for assigned tasks; keeps simple records.

Reads and interprets blueprints, diagrams, sketches and other written instructions.

Observes established safety practices and procedures.

Supervises various semi-skilled and unskilled trades helpers assigned to assist with various phases of carpentry work.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the carpentry trade.

Considerable knowledge of the types, qualities and uses of various woods.

Considerable knowledge of the occupational hazards and safety precautions of the carpentry trade.

Knowledge of blueprints and construction plans.

Ability to prepare estimates of time and materials required for carpentry assignments.

Ability to operate a variety of power-driven wood-working machinery.

Ability to inspect lumber for grade and quality.

Ability to follow verbal and written instructions.

Ability to read and interpret blueprints, sketches and diagrams.

Ability to instruct and direct various semi-skilled and unskilled helpers in the performance of carpentry assignments.

Skill in the operation of carpentry tools and equipment.

Skill in carpentry.

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, alteration, maintenance and repair of electrical systems, equipment and fixtures at the Aviation Department.

Employees in this class are responsible for performing skilled electrical tasks in accordance with standard electrical trade practices. Duties include working independently with considerable latitude in determining methods of work and using specialized tools and testing instruments of the electrical trade. Assignments may be verbal or consist of sketches, blueprints and electrical diagrams. Employees are frequently assisted by various skilled and unskilled trades helpers who assist in various phases of electrical work. Supervision is received from a technical or administrative superior who inspects work upon completion for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Installs, repairs, modifies and maintains various electrical fixtures in airport facilities; performs relamping and reballasting of interior and exterior fixtures; repairs lights, illuminated signage and security doors; responds to and corrects electrical outages, hazards and emergencies.

Installs, repairs and replaces electrical conduit, electrical wire, transformers, switches, electrical panels, fixtures and other electrical equipment for buildings, security and area lighting.

Repairs motors, flasher units, time clocks, relays, switches, control boxes and fuse boxes.

Locates and corrects power failures and motor trouble on electrically operated machinery, apparatus and systems.

Occasionally performs electrical work on refrigeration equipment; repairs, reconditions, modifies, replaces and installs equipment to refrigerate air and water.

Performs electrical work on moveable bridges such as repairing electrical motors and controllers, installing traffic warning and gate lights, installing and repairing switch panels, lights and electrical circuits, and replacing worn-out conduit and wire.

Reads and interprets sketches, blueprints and electrical diagrams.

Observes established safety practices and procedures applicable to the electrical trade.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the electrical trade.

Considerable knowledge of the principles and theory of electricity.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work on high voltage electrical systems and equipment.

Knowledge of blueprints and electrical diagrams.

Knowledge of local electrical codes effective in the County.

Ability to install, repair, maintain and alter a variety of electrical equipment and systems.

Ability to follow verbal and written instructions.

Ability to read and interpret blueprints, sketches and electrical diagrams.

Skill in the care and use of standard tools, equipment and testing instruments of the electrical trade.

Skill in the diagnosis of electrical malfunctions.

Skill in the electrical trade.

### Airport Electrician (005444)

NEW 10-94

#### **Nature Of Work**

This is skilled work at the journeyman level in the installation, alteration, maintenance and repair of electrical systems, equipment and fixtures at the Aviation Department.

### Airport Locksmith (005446)

#### Minimum Qualifications

Eighth grade. One year of experience as a locksmith is required. Must possess a Driver license. Completion of vocational or trade school locksmith training coursework may substitute for three months of the required experience. Must be able to work permanent or rotating shifts schedule to include nights, weekends and holidays, respond to emergency shifts, weekends, weekends and holidays, and respond to emergency call backs. Successful candidates must be bonded and possess own hand tools. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation and repair of locks and in making keys.

Employees in this class are responsible for the installation, alteration, servicing and repair of a variety of locks. Duties include the repair and opening of mechanical and electrical locks, making keys and changing lock combinations using a variety of handtools and special equipment. An additional responsibility includes the fabrication of parts for the repair of obsolete locks. Assignments may be received in the form of verbal or written instructions. Supervision is received from a maintenance superior who reviews work for the satisfactory performance of equipment installed or repaired.

##### ILLUSTRATIVE TASKS

Repairs and opens defective locks; changes lock combinations; disassembles door locks, padlocks, combination locks and handcuffs; replaces worn or broken parts; changes tumblers for new combinations.

Uses lockpick to open locks where no key is available.

Makes repairs to jail electrical lock system; adjusts timers, line brushes, solenoids, capacitors, resistors, rectifiers and related parts of lock system.

Fabricates parts for repair of obsolete locks using drill press, lathe, grinders and special handtools.

Installs master key floor and building lock systems; works with journeyman trades employees in the installation of locks in wood and metal doors.

Makes new and duplicate keys using key cutting machine.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the practices, methods, materials and tools of the locksmith trade.

Considerable knowledge of the occupational hazards and safety precautions of the locksmith trade.

Knowledge of the repair and maintenance characteristics of a wide variety of mechanical and electrical locks.

Knowledge of the necessary equipment for the fabrication or repair of locks and other locking devices.

Ability to install, alter, repair and maintain a variety of mechanical and electrical locks.

Ability to work from sketches, diagrams and plans.

Ability to understand and follow verbal and written instructions.

Ability to make simple estimates of time and materials.

Skill in the use and care of the tools, machinery and equipment of the locksmith trade.

### Airport Painter (005448)

#### Minimum Qualifications

Eighth grade. Two years of experience painting building structures, fixtures, and equipment are required. Must obtain a CDL/Class B within the one-year probationary period. Duties require working from bucket trucks, lifts and scaffolding at heights. Must be able to work a permanent or rotating shift schedule to include nights, weekends, and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to, fingerprint checks, employment verification, and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the painting of airport buildings, fixtures and equipment.

Employees in this class are responsible for performing skilled painting tasks in accordance with standard trade practices. Work involves the preparation of surfaces and materials for painting, occasional hazardous assignments requiring the use of scaffolding, and application of paint to a variety of surfaces using a brush or spray gun. Duties require individual skilled performance in accordance with established trade practices and assignments may be verbal or consist of written job orders. Supervision is received from a technical or maintenance supervisor who periodically inspects work in progress and upon completion for satisfactory application of painting skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Prepares surfaces to be painted by removing dirt, scales, rust, old paint, grease, and other materials; scrapes, sands and applies sizing.

Mixes and matches paints and stains using the proper proportions of pigment, base and thinner.

Applies paint to interiors and exteriors of buildings and to special institutional, general building or other furniture and equipment; operates spray gun and uses brushes.

Occasionally does staining; uses brushes or rags, or dips objects into various stains; stains shelving, benches, tables and cabinets prior to lacquering or varnishing.

Rigs and erects scaffolding; hauls and erects ladders.

Occasionally performs a variety of other tasks closely related to painting assignments; applies water-proofing to building walls; cuts old caulking compounds and inserts new; cuts glass for windows, doors and picture frames, and removes and replaces broken glass.

Repairs bad spots in furniture; applies paint remover; neutralizes spots with alcohol, sands and makes minor repairs to equipment and apparatus.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the painting trade.

Considerable knowledge of the types, qualities and uses of various paints and stains.

Considerable knowledge of the occupational hazards and safety precautions of the painting trade.

Ability to work at considerable heights on scaffolding.

Ability to understand and follow verbal and written instructions.

Ability to mix paints and stains in the proper proportions.

Skill in the use and operation of spray guns, paint brushes and other equipment of the painting trade.

Skill in mixing paints and matching and blending colors.

Skill in painting.

### Airport Machinist (005450)

#### Minimum Qualifications

Eighth grade. Three years of experience as a skilled machinist are required. Completion of a certified training program in the machinist trade may substitute for up to two years of the required experience. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the operation of machine tools for the repair, fabricating and machining of machinery and equipment for the Aviation Department.

Employees in this class perform skilled metal work in fabricating and repairing tools, machinery and equipment requiring adherence to very close tolerances. Assignments may be received verbally or in the form of diagrams, sketches or blueprints. Incumbents determine their own work methods and practices on particular assignments although special features may be outlined more specifically by a supervisor. Supervision is received from a technical superior who reviews work for satisfactory repair, fabrication and machining of machinery and equipment.

##### ILLUSTRATIVE TASKS

Shapes metal objects using lathes, shapers, power-saws, milling machines, drill presses and similar metal-working power equipment; uses taps, dies, reamers, files and similar tools; gauges work carefully using micrometers and other precision measuring instruments.

Makes bushings on lathes for dragline, bulldozers, graders and rollers; turns shafts and fits shafts in bushings; turns steel, bronze and other shaftings to required dimensions; makes extension for drill bits; fills up worn out shafts and turns down for original sizes; cuts key ways in shaftings.

Fashions bearings, gears, fiber insulators, valve stems, carburetor parts and a wide variety of other items of machinery and equipment; refaces valves and fly wheels; cuts threads; bores brake drums and cylinder blocks.

Sharpens tools and equipment; inspects machinery in the field for repair needs and makes minor repairs and adjustments.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of machine shop practices and procedures.

Considerable knowledge of the methods, materials, tools and practices of the machinist trade.

Considerable knowledge of the occupational hazards and safety precautions of machinist work.

Knowledge of the operating characteristics and repair needs of a wide variety of machine and hand tools, and equipment.

Ability to read and interpret diagrams, sketches and blueprints.

Ability to fabricate parts from general descriptions or verbal instructions.

Skill in the use and operation of a wide variety of metal-working hand tools and power-driven machinery.

Skill in the machinist trade.

#### Nature Of Work

This is skilled work at the journeyman level in the operation of machine tools for the repair, fabricating and machining of machinery and equipment for the Aviation Department.

### Airport Plumber (005452)

#### Minimum Qualifications

Eighth grade. Must possess a Miami-Dade County Certificate of Competency as a Journeyman Plumber. Must possess a Driver license. Must obtain a CDL/Class B within the probationary period. Must possess own hand tools. Must be able to work a permanent or rotating shift schedule to include nights, weekends, and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, maintenance and repair of plumbing systems, fixtures and accessories for the Aviation Department.

Employees in this class are responsible for performing skilled plumbing tasks in accordance with standard trade practices. Duties include determining work methods and required materials, cutting and installing pipes, performing a variety of plumbing repair and maintenance tasks, and utilizing specialized tools and testing instruments of the plumbing trade. Assignments may be verbal or consist of blueprints, sketches or diagrams. Employees are frequently assisted by various skilled and unskilled trades helpers who assist in various phases of plumbing work. Supervision is received from a technical or administrative superior who periodically inspects work in progress and upon completion for satisfactory performance of equipment, compliance with job specifications and adherence to applicable codes and regulations.

##### ILLUSTRATIVE TASKS

Cuts openings in walls for pipes; bends pipes to needed contours; cuts, reams and threads pipe; cuts and installs PVC pipe and polyethylene tubing to specifications.

Installs, maintains and repairs valves, faucets, bathtubs, sinks, lavatories, sewers, vents, drinking fountains, water heaters and other fixtures.

Installs irrigation systems including pumps, pressure tanks, sprinklers, sprinkler controls and connectors.

Pours molten solder over joints and spreads and tapers solder.

Maintains piping systems by opening clogged drains with plungers or other devices; snakes out pipes and fixtures; replaces washers on leaky faucets; tests for leaks by filling pipe with water under pressure and checking fall pressure with gauges.

Installs pipe and hoses on fire trucks, spray trucks and other specialized equipment and apparatus.

Repairs, replaces and checks high and low pressure steam boilers; blows down and flushes boilers; checks, repairs and replaces safety devices and controls as necessary; flushes and cleans boilers, storage and return tanks, hot water heaters and similar equipment.

Reads and interprets blueprints, sketches and diagrams.

Prepares estimates of time and materials required for plumbing assignments.

Observes established safety practices and procedures.

Operates and uses specialized plumbing tools and equipment such as ratchet cutters, reamers, electric and gasoline-powered sewer snakes, pipe wrenches, chain wrenches and pipe vices.

Assigns tasks to various skilled and unskilled helpers assisting in various phases of plumbing work.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the plumbing trade.

Considerable knowledge of the flows, pressures and capacities of water tanks and lines.

Considerable knowledge of applicable local plumbing codes effective in the county.

Considerable knowledge of the occupational hazards and safety precautions of the plumbing trade.

Knowledge of blueprints and plumbing diagrams.

Ability to install, repair and maintain plumbing systems, fixtures and accessories.

Ability to locate defects in plumbing fixtures, systems and equipment.

Ability to follow verbal and written instructions.

### Airport Plumber (005452)

Ability to read and interpret blueprints, sketches and diagrams.  
Ability to prepare time and material estimates for plumbing assignments.  
Skill in the care and use of standard tools, equipment and testing devices of the plumbing trade.  
Skill in the diagnosis of plumbing malfunctions.  
Skill in the plumbing trade.

NEW 10-94

#### **Nature Of Work**

This is skilled work at the journeyman level in the installation, maintenance and repair of plumbing systems, fixtures and accessories for the Aviation Department.

### Airport Mason (005454)

#### Minimum Qualifications

Eighth grade. One year of skilled experience in general masonry work to include cement finishing, concrete or drywall finishing, plastering, block laying, and tile setting is required. Must be able to read, interpret and work from blueprints and drawings. Must have own hand tools and must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the construction, repair and maintenance of masonry buildings, structures and facilities for the Aviation Department.

Employees in this class are responsible for performing skilled masonry tasks in accordance with standard trade practices. Work involves constructing and testing forms for pouring of concrete, laying bricks and concrete blocks, and applying and trimming mortar. Duties are performed with considerable independence in accordance with job specifications and work orders, and assignments are generally accompanied by sketches and diagrams. Employees may be assisted by various skilled and unskilled trades helpers who assist in various phases of masonry work. Supervision is received from a technical or administrative superior who periodically inspects work in progress and upon completion for satisfactory application of masonry skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Measures distance from reference points and marks guidelines on working surface to lay out work; determines the vertical and horizontal alignment of course using specialized masonry tools and equipment.

Constructs and tests forms in preparation for pouring cement; assists in pouring quantities of concrete for foundations and reinforcements; operates a concrete pump device to apply spray as required.

Applies cement grout to patch surfaces; mixes mortar and points bricks; manipulates trowel, floats and screeds on poured concrete to secure a specified finish; operates vibrators or rotary finishers.

Lays bricks, stone and concrete blocks and applies and trims mortar according to prepared drawings and plans.

Constructs, repairs and maintains manholes, junction boxes, vault structures, pumping station wetwells, concrete spillways and barbeque pits.

Prepares surfaces for plastering; replaces broken metal or wooden lathes, chips out broken plaster, concrete or tile; mixes plaster according to standard formula.

Applies tile to walls, floors and ceilings according to specified designs; sprinkles dry cement on fresh concrete sub-floor and sets tile; replaces dislodged tile blocks; fills spaces between tiles by troweling grout over surface of set tile and cleans surface of finished tile; applies plaster coat and layer of cement to walls and taps tile blocks with trowel handle into mortar.

Prepares estimates of time and materials required for masonry assignments.

Performs a variety of unskilled and semi-skilled tasks in allied building trades.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the masonry trade including stone work, plastering, cement finishing and tile setting.

Considerable knowledge of the occupational hazards and safety precautions of the masonry trade.

Considerable knowledge of the various types of mortar.

Knowledge of masonry construction standards.

Ability to prepare estimates of time and materials required for masonry assignments.

Ability to follow verbal and written instructions.

### Airport Refrigeration/Air-Conditioning Mechanic (005456)

#### Minimum Qualifications

Eighth grade. Must possess a Miami-Dade County Certificate of Competency as a Journeyman in Refrigeration/Air-Conditioning Maintenance and Installation. Must possess a Driver license. Must possess a Type II or Universal Certificate from an EPA recognized certification program in refrigerant transition and recovery service practices in accordance with EPA 40 CFR, Part 82 regulations. Must be able to work a permanent or rotating shift schedule to include nights, weekends, and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal requirements. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, maintenance and repair of refrigeration equipment for the Aviation Department.

Employees in this class are responsible for servicing air conditioning systems and units, cold storage plants, refrigerators, water cooling systems and related equipment utilized in a wide variety of airport facilities and buildings. Employees work independently using handtools, power tools and various precision measuring and testing instruments. Assignments may be in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning equipment. Work is reviewed by a maintenance supervisor who inspects work occasionally in progress and upon completion for compliance with instructions and for satisfactory operation of equipment repaired, installed or maintained.

##### ILLUSTRATIVE TASKS

Overhauls and services refrigeration units by repairing, replacing or adjusting worn or broken parts on condensers, compressors and water and vacuum pumps; tests refrigeration equipment for refrigerant leaks.

Repairs or adjusts valves, piping connections, fittings and couplings by bolting, riveting, welding, soldering and brazing, using hand tools, acetylene torch, prestolite torch and drill press.

Removes motors and pumps, replaces shafts and bearings, repacks and reinstalls; replaces, repairs and recalibrates thermostats and humidistats; adjusts expansion valves; adjusts or changes belts; replaces gaskets, hinges and hardware.

Sets airflow controls to suit occupants by adjusting splitters, dampers, diffusers and fan speeds; removes, cleans and replaces strainers and filters; rebuilds, repairs and paints wood and metal cooling towers and fans; adds appropriate chemicals to water towers to prevent rust and corrosion.

Starts equipment, observes operation and reads gauges and instruments such as volt-ohm meters; determines temperature, velocity and humidity factors using air and water temperature gauges; adjusts mechanisms such as valves, controls and pumps to control level of fluid, pressure and temperature; bleeds contaminants from system and charges with specified amount and type of refrigerant; checks gauges and makes periodic preventive maintenance inspections.

Assists supervisor in planning modifications and new installation projects, preparation of specifications, and in major overhauling and reconditioning jobs utilizing blueprints, engineering specifications and knowledge of refrigerant systems.

Maintains simple job records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the practices, methods, materials, test instruments and tools commonly utilized in the repair and service of various types of refrigeration equipment.

Considerable knowledge of the mechanical operation and repair characteristics of various kinds of refrigeration equipment.

Considerable knowledge of the occupational hazards and safety precautions of the work.

Knowledge of the principles of mechanics.

Ability to detect defects in machinery and to make the necessary repairs or adjustments.

## Human Resources Department

### Airport Sign Painter (005458)

#### Minimum Qualifications

Eighth grade. One year of experience as a skilled sign painter to include experience with computerized sign making and silk screen procedures is required. Must possess a Driver license. Job requires working at heights. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled manual work at the journeyman level in the design and lettering of signs, posters, show cards and various pictorial displays. Employees in this class are responsible for a variety of sign painting and lettering. Work involves the use of freehand lettering, stencils, silk screens and other painting processes. Additional work includes the cutting of mitre boards for use in silk screen frames, sanding and preparing surfaces for painting. Work assignments are received in the form of sketches, oral or written instruction from a maintenance supervisor who reviews work upon completion for satisfactory appearance and conformance with specifications.

##### ILLUSTRATIVE TASKS

Hand letters a variety of signs, laying out and cutting film for silk screen processing; cutting mitre boards for silk screen frames.  
Makes original drawings, cutting paper stencils for hand lettering used in gold leaf lettering, signs for building and parking signs, desk plates and special signs and posters.  
Prepares signs for advertising displays for resale merchandise, murals, cartoon work, cut-outs for displays and other related painting work.  
Letters and numbers automobile equipment, boats, concession trailers, using striping brush and masking tape.  
Makes a variety of informational and directional signs; letters office doors and signs for affixing to buildings and equipment.  
Does some commercial art work in designing special signs and posters.  
Mixes, matches and blends paints, enamels and other materials used in sign painting.  
Maintains records of supplies used in daily work; requisitions materials and supplies as needed.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods and materials used in the sign painting trade.  
Considerable knowledge of the proper methods of preparing surfaces for painting.  
Considerable knowledge of the equipment and techniques used in sign painting such as silk screen, air brush, spray gun, sanding machine and vacuum applicators.  
Ability to design signs and do hand lettering.  
Ability to interpret request work from sketches; cut special stencils for a variety of signs, posters and pictorial displays.  
Ability to design and build frames to be used in silk screen processing.  
Ability to arrange opaque letters for desired design of photographic stencils.  
Skill in the blending and mixing of paints for desired colors.  
Skill in the use of hand tools and other equipment used in sign painting.

REV 10-69

#### Nature Of Work

This is skilled manual work at the journeyman level in the design and lettering of signs, posters, show cards and various pictorial displays.

### Airport Welder (005460)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in gas, electric and tungsten inert gas welding in the horizontal, vertical, overhead and flat positions including layout and fabrication are required. Must possess a certificate issued by affiliates of and/or by the American Welding Society and must have own hand tools. Applicants applying for employment with the Miami-Dade Aviation Department will be subject to extensive screening to include, but not limited to, fingerprint checks, employment verification, and other such procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the cutting and welding of metallic articles, parts, structures and equipment for the Aviation Department.

Employees in this class are responsible for the application of trade skills to a variety of welding, brazing and metal cutting tasks on ferrous and non-ferrous metals. Duties include the fabrication of some metallic items, maintaining and performing minor repairs to welding equipment, and occasionally operating a motor vehicle to perform field work. Assignments may be received verbally or through written instructions, blueprints or diagrams. Incumbents exercise considerable independent judgment in the selection of methods and procedures to produce desired results. Supervision is received from a technical or administrative superior who reviews work in progress and upon completion for satisfactory application of welding skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Performs skilled welding tasks on airport waste plant equipment, baggage conveyor systems, passenger loading bridges, moving sidewalks and other airport equipment.

Preheats and cleans metals; lays out, cuts and fits materials for welding; selects proper welding heat and proper types and sizes of electrodes for correct penetration and strength of welded metals.

Operates acetylene or electric arc welding equipment in the performance of cutting and welding tasks on machinery and equipment such as truck and automotive bodies, steam and plumbing systems, pump and engine parts, dragline buckets, dozer blades and tracks, loader buckets and other similar machinery and apparatus; performs horizontal, vertical, overhead and flat welding.

Operates various tools and equipment used in welding repair procedures including air wrenches, sheet metal shears and brakes, hoist, drill presses and lift trucks.

Participates in the manufacture of specialized machinery and apparatus for various construction and repair activities.

Brazes, solders and coats non-ferrous metals; performs silver and lead soldering.

Assists in the design of a variety of specialized equipment and builds equipment according to job specifications.

Occasionally does blacksmithing including the manufacturing of eye bolts, braces, angle brackets and similar items.

Occasionally operates a motor vehicle to transport portable welders and acetylene burning-welding equipment to field construction sites.

Cleans, stores, maintains and makes minor repairs to welding equipment.

Adheres to established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of methods, practices and techniques of welding.

Considerable knowledge of the care and use of the tools of the welding trade.

Considerable knowledge of the occupational hazards and safety precautions required in the operation of acetylene or electric arc welding equipment.

Considerable knowledge of the properties of ferrous and non-ferrous metals used in welding work.

Ability to understand and follow verbal and written instructions.

Ability to read simple sketches, diagrams and blueprints.

Ability to operate welding equipment and to perform a variety of welding assignments.

### Airport Sprayer (005461)

#### Minimum Qualifications

Eighth grade. Six months of experience in the use of pesticides or herbicides are required. Must possess a current State of Florida Restricted-Use Pesticide Applicator's license. Must obtain certifications in Aquatic and Right-of-Way categories, and a CDL/Class B within the trainee period.

#### Job Specifications

##### NATURE OF WORK

This is specialized work in the spraying and mechanical removal of hyacinths, weeds and related vegetation from canals, ditches and canal banks.

Employees in this classification are responsible for the spraying and removal of underwater weeds and related noxious water vegetation. Employees are required to operate boats, spray pumps and other equipment in controlling aquatic weeds. Work requires the mixing of chemicals to be used and placing of chemicals to obtain maximum weed control. Supervision is exercised over a helper who assists in the placing of chemicals in canals, ditches and other designated locations. Work is reviewed by a superior for achievement of desired results and completion of work assigned.

##### ILLUSTRATIVE TASKS

- Sprays and removes weeds, hyacinths and other noxious water vegetation from canals, ditches and canal banks.
- Mixes chemicals to be used in spraying operation; places emulsified chemicals on or near the bottom of the canal.
- Operates spray boat and other equipment used in the controlling of aquatic weeds.
- Prepares and maintains reports of activities and crew operations; maintains records of equipment and spray used.
- Contacts property owner and other persons in reference to spraying and treating noxious aquatic plant life.
- Conducts on the job training of new employees assigned to spray crew; instructs in the use of spray equipment and the proper handling of chemicals.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Considerable knowledge of the various types of chemicals used in the spraying of aquatic weeds and other noxious water vegetation.
- Knowledge of the equipment used in the spraying of aquatic weeds and other related vegetation.
- Knowledge of the occupational hazards and necessary safety precautions applicable to spray work.
- Some knowledge of effective supervisory techniques.
- Ability to operate spraying equipment, spray boat, pole truck and spray trailer.
- Ability to perform field assignments with a minimum of supervision.
- Ability to keep simple records and make reports.
- Ability to understand and transmit oral and written instructions.
- Physical strength and agility sufficient to work long hours out-of-doors and occasionally under adverse weather conditions.

### Airport Waste Plant Operator (005462)

#### Minimum Qualifications

High school. Two years of experience assisting in the operation of fixed waste disposal or refuse incinerators and related equipment are required. Must possess a CDL/Class A. Must be able to work a permanent or rotating shift schedule to include nights, weekends, and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the operation of a refuse, incineration and waste heat recovery facility at Miami International Airport. Employees in this class are responsible for the operation of waste disposal processing equipment and for overall plant operation on an assigned shift. Emphasis of the work is on the safe and efficient operation of equipment, monitoring of a variety of panel controls and coordination of work on the facility floor. Related responsibilities include preparing and maintaining various records and schedules, and performing minor repairs and adjustments to equipment as required. Supervision is received from a technical superior who reviews work for compliance with facility operational procedures through observations, personal conferences, records and reports.

##### ILLUSTRATIVE TASKS

Schedules and assigns work to facility employees engaged in the loading, unloading and dumping of burnable and non-burnable materials and residue.

Operates waste processing equipment using panel controls and coordinates mobile equipment activity with waste processing equipment activities.

Monitors control panels for overloading of equipment; monitors boiler temperature, steam and chiller pressure, condition of water pumps, conveyor belts and compactors; responds to alarm conditions and makes necessary adjustments; reports unusual conditions or problems; monitors operation of all equipment including steam pressure boilers, pumps, turbines, gauges, air conditioning chillers and conveyor belts.

Oversees the loading and unloading of materials; enforces safety practices and regulations; adheres to established maintenance schedules. Oversees the replacement of parts, lubrication and preventive maintenance work performed by repairers; assists in locating the causes of malfunctioning or inoperable equipment; performs minor repairs and makes adjustments to belts and other movable parts.

Maintains records of facility equipment, work schedules, incoming and outgoing trash schedules; records weight of processed materials, production of steam and chilled water.

Makes recommendations regarding plant improvements; develops preliminary estimates of plant needs.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operation of refuse, incineration and waste heat recovery facilities.

Considerable knowledge of controls and instrumentation used in monitoring steam pressure boilers, pumps, turbines and gauges in the operation of an incinerator and absorption chiller.

Knowledge of safety practices and procedures applicable to waste processing disposal equipment.

Knowledge of the materials and tools used in the maintenance of waste processing disposal equipment.

Knowledge of the records and reports required in the area of assignment.

Knowledge of departmental policies and procedures.

Ability to operate waste processing disposal equipment.

Ability to recognize abnormalities in the operation of waste processing disposal equipment.

Ability to detect faulty operating characteristics in waste processing disposal equipment and implement corrective action.

Ability to plan and schedule the work of facility employees in a manner conducive to full performance and high morale.

Ability to keep records and prepare routine reports.

Ability to communicate effectively, verbally and in writing.

### Airport Waste Plant Operator (005462)

NEW 1-85

#### **Nature Of Work**

This is skilled technical work in the operation of a refuse, incineration and waste heat recovery facility at Miami International Airport.

### Airport Lighting Technician (005463)

#### Minimum Qualifications

Must possess a Miami-Dade County Certificate of Competency as a Journeyman Electrician. Must have own tools and the ability to lift and handle equipment weighing up to 50 pounds. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment. Must be able to work a permanent or rotating shift to include nights, weekends and holidays.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the installation, maintenance, and repair of the lighting system for the taxiways and peripheral operating areas of a major airport facility.

Employees in this class perform a variety of maintenance and support functions including the testing, inspection, replacement, and location of weak points in the airport lighting system. Employees follow set procedures in the isolation of problem areas and replacement of defective or burned out bulbs. Work is assigned orally or by work orders from a technical superior who periodically evaluates work in process and checks for satisfactory performance upon completion.

##### ILLUSTRATIVE TASKS

Isolates malfunctions by readings from a volt ohm meter connected to an energized circuit.

Replaces bulbs, transformers, fixtures, or leads found to be defective.

Periodically tests large amounts of cable for weakness and replacement.

Replaces bulbs and system components as they exceed manufacturers expected life.

Operates and maintains a service truck assigned to his use.

Makes recommendations on expected component, materials, and tools needs from review of completed work orders.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard tools, materials, and practices of the electrical trade.

Considerable knowledge of the principles and theory of electricity.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work with high voltages.

Knowledge of electrical codes effective in the county.

Ability to install, alter, repair, maintain, and locate defects in a variety of electrical equipment and systems.

Ability to interpret and work from technical sketches, blueprints, or work orders.

Skill in the care and use of standard tools, equipment,

and testing devices of the electrical trade.

#### Nature Of Work

This is skilled work in the installation, maintenance, and repair of the lighting system for the taxiways and peripheral operating areas of a major airport facility.

### Airport Heavy Equipment Technician (005464)

**Minimum Qualifications**

High school diploma or GED. Two years of skilled experience troubleshooting and repairing fluid power systems and components such as hydraulic pumps, motors, directional valves and various actuators are required. Must be able to read and evaluate complex hydraulic schematics. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment. Must be able to work a permanent or rotating shift to include nights, weekends and holidays.

**Job Specifications**

No Job Specification Available

**Nature Of Work**

This is skilled mechanical work at the Journeyman level in the repair and maintenance of airport hydraulic systems.

## Human Resources Department

### Airport Environmental Inspector (005466)

#### Minimum Qualifications

High school. Two years of experience installing, operating, monitoring and maintaining pollution control equipment within an airport or liquid waste environment are required. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the installation, operation, repair and maintenance of equipment used in a pollution control program at Miami International Airport and other County airports.

The employee in this class is responsible for performing a variety of technical duties related to assuring the effective operation of environmental control monitoring and surveillance equipment at County airports. Emphasis of the work is on installing, operating, inspecting and maintaining various pollution control and monitoring devices and equipment at Miami International Airport and conducting periodic follow-up inspections to assure their proper operation. The incumbent also collects data from monitoring devices to be analyzed and used by various professionals responsible for developing policies or courses of action designed to alleviate potential environmental problems. Work requires coordination with airport operational divisions and maintenance personnel, and environmental officials in carrying out assigned responsibilities. Supervision is received from a technical superior who evaluates results in operation of equipment and effectiveness of the programs.

##### ILLUSTRATIVE TASKS

Installs, operates and maintains pollution control equipment including hydrocarbon monitoring wells, hydrocarbon recovery wells pumping and metering equipment, biodegradation system for hydrocarbons, and groundwater elevation wells.

Performs sampling and elementary testing, and methane evacuation.

Monitors and regulates the established hydrocarbon recovery system for the airport; collects data from surveillance systems to be used as basis for improvement in control and operation of recovery system.

Conducts regular field inspections to view condition and functioning of monitoring devices; determines courses of action to be taken to eliminate or alleviate problems found during inspection; performs corrective action for repair and adjustment of monitoring devices, as needed.

Maintains inspection, maintenance and repair records; prepares reports; develops recommendations on methods to improve the system.

Coordinates installation and maintenance work with other department divisions and other activities, as needed, with environmental officials.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the chemical properties of hydrocarbons and related substances.

Knowledge of the methods, techniques and equipment used in the monitoring, collection, sampling and testing of geo-hydrological data.

Knowledge of the operating, repair and maintenance characteristics of environmental control monitoring and surveillance equipment.

Knowledge of departmental rules, regulations and procedures.

Knowledge of the principles of mechanics.

Ability to install, repair, operate and maintain a variety of environmental control monitoring and surveillance equipment.

Ability to detect defects in equipment and make necessary adjustments or repairs.

Ability to use a variety of hand tools.

Ability to maintain records and prepare reports.

Skill in the use of a variety of standard hand tools.

### Airport Environmental Inspector (005466)

NEW 10-87

#### **Nature Of Work**

This is technical work in the installation, operation, repair and maintenance of equipment used in a pollution control program at Miami International Airport and other County airports.

### Airport Electronic-Electrical Equipment Technician 1 (Communications) (005472)

#### Minimum Qualifications

Eighth grade. One year of experience in the installation, troubleshooting, maintenance and repair of electronic equipment or systems such as CATV, CCTV and VHF and UHF radio communications, public address, intercommunications, aircraft ground control radios, and synchronized clocks is required. Must possess a Driver license. Must be able to work a permanent or rotating shift schedule to include nights, weekends, and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive screening to include, but not limited to, fingerprint checks, employment verification, and other such procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the installation, adjustment and repair of electronic components at Miami International Airport. Employees in this class are responsible for inspecting, diagnosing, adjusting, repairing, replacing and calibrating airport electronic equipment including security doors, airhandler unit controls, baggage conveyor systems, moving walkway systems, passenger loading bridges, HVAC systems, and other building management and control systems. Work involves the use of precision test instruments and specialized hand tools of the electronic trade in the maintenance and repair of airport electronic systems and equipment. Incumbents exercise independent judgment in the diagnosis and repair of complex electronic equipment in accordance with technical specifications. Supervision is received from a technical superior who assists with difficult or unusual problems and inspects work in progress and upon completion for satisfactory functioning of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Performs technical work in the installation, adjustment and repair of electronic components pertaining to airport building automation systems, security doors, 400 HZ ground power systems, baggage conveyor systems, moving walkway systems and other airport electronic management and control systems.

- Uses a variety of electronic testers and other specialized tools of the electrical-electronic trade.

- Performs scheduled maintenance inspections, and adjusts, cleans and calibrates various systems to assure proper system operations.

- Repairs wiring and electronic components associated with automated building management systems; repairs electronic components associated with remote field processors, translators, and data gathering panels; repairs wiring and electronic components which interface to remote sensing devices, motor starters, other data gathering panels and the central processing unit.

- Repairs, replaces and calibrates field electronic temperature and flow sensing devices including duct, wall and chilled water pipe mounted sensors.

- Repairs and replaces electronic components associated with central processing units including logic power supplies, TTY boards and RAM boards.

- Repairs, maintains and troubleshoots electronic switches, photo-cells and motors associated with baggage conveying and moving sidewalk systems.

- Reads and interprets schematics, electronic diagrams, blueprints and manufacturers' manuals.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Considerable knowledge of the theories, principles, techniques and practices of the electrical and electronics trades.

- Considerable knowledge of automated systems for the control of HVAC, fire alarm, security access, baggage conveying, moving sidewalk, and other airport mechanical systems.

- Considerable knowledge of computer software programming for building management systems and security systems.

- Knowledge of blueprints, schematics and electronic diagrams.

- Knowledge of the geographical layout of Miami International Airport and the locations of various electrical and electronic systems.

- Ability to inspect, diagnose, repair and maintain varied and complex electronic systems used at Miami International Airport.

- Ability to use precision electronic testing devices and hand tools of the electrical and electronic trades.

### **Airport Electronic-Electrical Equipment Technician 1 (Communications) (005472)**

Ability to read, interpret and work from blueprints, schematics, electronic diagrams and manufacturers' manuals.

Skill in the care and use of precision test equipment and hand tools of the electrical and electronic trades.

Skill in the diagnosis of electrical and electronic malfunctions.

NEW 10-95

#### **Nature Of Work**

This is skilled technical work in the installation, adjustment and repair of electronic components at Miami International Airport.

### Airport Electronic-Electrical Equipment Technician 2 (005474)

#### Minimum Qualifications

Eighth grade. Two years of experience in the installation, troubleshooting, maintenance and repair of electronic equipment and systems such as CATV, CCTV, UHF/VHF radio communications, and public address systems are required. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal law requirements. The security clearance required by federal law is a continuing condition of employment. Must be able to work a permanent or rotating shift to include nights, weekends and holidays.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work with supervisory responsibility in the installation, adjustment and repair of electronic components at Miami International Airport. Employees in this class are responsible for supervising and participating in inspecting, diagnosing, adjusting, repairing, replacing and calibrating airport electronic equipment including security doors, airhandler unit controls, baggage conveyor systems, moving walkway systems, passenger loading bridges, HVAC systems, and other building management and control systems. Work involves the use of precision test instruments and specialized hand tools of the electronic trade in the maintenance and repair of airport electronic systems and equipment. Incumbents exercise independent judgment in the more difficult phases of installation, adjustment and repair of complex airport electronic systems. Supervision is exercised over a staff of electrical-electronic technicians with assigned responsibilities in various phases of operations. Supervision is received from a technical superior who occasionally reviews work in progress and assists with difficult or unusual problems.

##### ILLUSTRATIVE TASKS

Supervises technical work in the installation, adjustment and repair of electronic components pertaining to airport building automation systems, security doors, 400 HZ ground power systems, baggage conveyor systems, moving walkway systems and other airport electronic management and control systems.

Participates in more difficult phases of installation, adjustment, repair and maintenance of airport electrical-electronic systems; responds to emergency calls as necessary and restores malfunctioning equipment to operating status.

Uses a variety of electronic testers and other specialized tools of the electrical-electronic trade.

Makes recommendations concerning improvement of radio and sound communications systems; estimates time and materials required for proposed jobs.

Maintains records and prepares various reports describing procedures, actions taken and recommended solutions; prepares and submits requisitions for supplies and equipment.

Performs scheduled maintenance inspections, and adjusts, cleans and calibrates various systems to assure proper system operations.

Repairs wiring and electronic components associated with automated building management systems.

Reads and interprets schematics, electronic diagrams, blueprints and manufacturers' manuals.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the theories, principles, techniques and practices of the electrical and electronics trades.

Considerable knowledge of automated systems for the control of HVAC, fire alarm, security access, baggage conveying, moving sidewalk, and other airport mechanical systems.

Considerable knowledge of computer software programming for building management systems and security systems.

Knowledge of supervisory principles and practices.

Knowledge of blueprints, schematics and electronic diagrams.

Knowledge of the geographical layout of Miami International Airport and the locations of various electrical and electronic systems.

Ability to inspect, diagnose, repair and maintain varied and complex electronic systems used at Miami International Airport.

Ability to use precision electronic testing devices and hand tools of the electrical and electronic trades.

Ability to read, interpret and work from blueprints, schematics, electronic diagrams and manufacturers' manuals.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

This is skilled technical work with supervisory responsibility in the installation, adjustment and repair of electronic components at Miami International Airport.

### Airport Fire Suppression Systems Technician (005479)

#### Minimum Qualifications

High school diploma or GED. Two years of technical experience in the fire protection field troubleshooting, repairing, and testing fire alarm systems or installing, troubleshooting, repairing, and testing fire suppression systems are required. Must possess (or have possessed) a State of Florida Fire Equipment Permits, Type 9, Classes 1 and 4, and must recertify and possess both permits under Miami-Dade County within the one-year probationary period. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening including, but not limited to, fingerprint checks, employment verification, and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the servicing and testing of fire suppression equipment and systems at Miami International Airport and auxiliary locations.

Employees in this class are responsible for inspecting, testing, and recharging fire suppression equipment and systems to ensure compliance with regulatory codes and requirements. Duties include inspecting and servicing of standpipe hose cabinets, inspecting and servicing of fire extinguishers, assisting with inspection and testing of fire alarm panels, initiating devices, sprinkler systems and halon systems, and preparing inspection reports. The incumbent exercises some independent judgment in determining service requirements necessary to ensure the efficient operation of fire suppression equipment and systems. Supervision is received from a technical and administrative superior who periodically reviews work for compliance with established departmental policies and procedures.

##### ILLUSTRATIVE TASKS

- Inspects and services standpipe hose cabinets, hose, and control valves, for all properties at Miami International Airport and auxiliary airports.

- Inspects and services portable and wheeled fire extinguishers; detects malfunctions in fire suppression equipment.

- Performs water flow tests for wet-pipe sprinklers, deluge systems, fire hydrants and booster pumps; checks pounds per square inch and gallons per minute of booster pumps.

- Operates nitrogen recharge equipment, hydrostatic testing pumps, and cylinder extinguisher dryers to test and service fire suppression equipment and systems.

- Inspects equipment and systems for corrosion, rust, cracks, clogs, and leaks.

- Assists with inspection and testing of fire alarm panels and initiating devices, halon systems, and deluge, pre-action and wet- pipe sprinkler systems.

- Prepares inspection reports and maintains records of fire suppression equipment and systems located at Miami International Airport and auxiliary locations.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Considerable knowledge of fire suppression equipment and systems.

- Considerable knowledge of the practices, methods, and equipment used to inspect, test and recharge fire suppression equipment and systems.

- Knowledge of the fundamental principles of hydraulics.

- Knowledge of current laws, codes, ordinances, and regulations pertaining to fire suppression equipment and systems.

- Knowledge of the occupational hazards and safety precautions applicable to the servicing, inspecting, and testing of fire suppression equipment and systems.

- Knowledge of the location of fire suppression equipment and systems and Miami International Airport and auxiliary locations.

- Ability to inspect and service standpipe hose cabinets and hose and control valves in fire suppression systems.

- Ability to assist in the testing and inspection of complex fire suppression systems and equipment.

- Ability to operate equipment used for testing and recharging fire suppression equipment and systems.

## Human Resources Department

---

### Airport Fire Suppression Systems Technician (005479)

Ability to prepare inspection reports and maintain records pertaining to the inspection, testing, and servicing of fire suppression systems and equipment.

Ability to use basic hand tools and testing devices.

NEW 10-93

#### **Nature Of Work**

This is technical work in the servicing and testing of fire suppression equipment and systems at Miami International Airport and auxiliary locations.

### Airport Architectural Drafter 2 (005489)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in technical drafting to include one year of AutoCADD experience are required. Coursework in Architecture, Engineering or related field may substitute for two years of technical drafting experience. Coursework will not substitute for AutoCADD experience. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in architectural drafting for the Aviation Department.

Employees in this class are responsible for performing a variety of advanced responsible and technical drafting tasks for varied airport projects and programs. Duties include preparing detailed design development drawings for proposed airport architectural projects, preparing detailed as-built floor plans for interiors of airport facilities, creation of complex architectural working drawings, digitizing existing drawings, operating computer-aided design and drafting software, and preparing detailed architectural drawings and design layouts of airport signage projects. Work requires a considerable knowledge of the basic principles and practices of architecture. Supervision is received from a professional or technical superior who reviews work for quality and adherence to established architectural drafting standards.

##### ILLUSTRATIVE TASKS

Prepares detailed design development drawings for proposed airport architectural projects utilizing computer-aided design and drafting software.

Prepares detailed as-built floor plans for interiors of airport facilities utilizing computer-aided design and drafting software.

Prepares complex architectural working drawings including site plans, foundation plans, elevations, sections, details, diagrams, and plumbing, electrical and air conditioning plans.

Digitizes existing drawings utilizing digitizing tablet and/or scanning equipment.

Prepares architectural and technical presentation drawings utilizing standard architectural drafting equipment.

Operates computer-aided design and drafting support equipment including pen plotters, ink jet and color electrostatic plotters.

Prepares architectural detail drawings and design layouts for a wide range of airport signage projects required for the expansion and improvement of public facilities at Miami International Airport.

Lays-out and produces public informational signs, directional interior and exterior static and internally illuminated signage for Miami International Airport.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the principles, practices, techniques and instruments of architectural drafting.

Considerable knowledge of mathematics through trigonometry and its application to architectural drafting computations.

Considerable knowledge of blueprints, construction plans and specifications related to airport architectural projects.

Considerable knowledge of computer-aided design and drafting software.

Ability to perform architectural computations quickly and accurately and compile architectural data and statistics.

Ability to draft complex airport architectural, structural, mechanical, electrical and air conditioning plans for a variety of airport architectural projects.

Ability to read, understand and interpret a wide variety of architectural plans and documents.

Ability to understand and follow technical verbal and written instructions.

Skill in the use of architectural drafting instruments and equipment.

### Airport Architectural Drafter 2 (005489)

#### **Nature Of Work**

This is advanced technical work in architectural drafting for the Aviation Department.

### W & S Structural Maintenance Supervisor (005526)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in finish carpentry, carpentry, industrial painting and/or masonry are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the construction, repair, and maintenance of water and sewer structures, fixtures, and equipment. Employees in this class are responsible for supervising structural maintenance workers performing skilled carpentry, industrial painting, masonry tasks, and general building maintenance in accordance with standard trade practices. Duties include scheduling pending work according to priorities, ordering materials for respective jobs, supervising daily work of crews, preparing written reports of work accomplished, and enforcing established safety practices, and procedures. Employees exercise some independent judgment in completing normal or routine work assignments. Supervision is exercised over structural maintenance workers performing skilled tasks in various phases of operations. Supervision is received from a technical and administrative superior who periodically reviews work progress for adherence to schedules and conformance with project specifications.

##### ILLUSTRATIVE TASKS

Plans, assigns, reviews, and coordinates the work of structural maintenance workers assigned to a variety of structural-related projects. Prepares work schedules according to priorities and supervises daily work of crew; prepares written progress reports or informs superiors orally of progress; reviews daily written work reports from subordinate crew.

Assists in preparation of capital and expense budget.

Enforces established departmental policy for handling hazardous waste and maintains records of compliance.

Assures subordinate employees have necessary safety equipment and enforces established safety practices and procedures.

Orders materials and supplies for respective jobs and assures delivery on schedule.

Schedules preventive maintenance of structural-related items and assures timely completion.

Responds to graffiti at lift stations and assures compliance with county ordinance.

Meets with vendors to secure accurate price estimates for structural tasks.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates, and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the methods, techniques and practices of the repair, alteration, and maintenance of water and sewer structures.

Considerable knowledge of the tools, equipment, and materials used in masonry, industrial painting, and carpentry.

Considerable knowledge of construction plans, sketches, and drawings.

Knowledge of supervisory principles and practices.

Knowledge of the occupational hazards and safety precautions applicable to structural repair, alteration, and maintenance work.

Knowledge of special safety requirements for handling hazardous waste.

Knowledge of the provisions of the South Florida Building Code applicable to water and sewer structural work.

Ability to plan, schedule, lay-out, and coordinate the work of skilled tradesmen.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to estimate costs in terms of labor, supplies, and equipment.

Ability to keep accurate records and prepare reports.

Ability to understand blueprints, construction drawings, and plans.

### W & S Structural Maintenance Supervisor (005526)

NEW 7-92

#### **Nature Of Work**

This is skilled supervisory work in the construction, repair, and maintenance of water and sewer structures, fixtures, and equipment.

### W & S Engineering Cost and Scheduling Specialist (005536)

#### Minimum Qualifications

Bachelor's degree in Civil Engineering or related field. One year of engineering or construction management experience to include the use of software spreadsheet systems such as Lotus 1-2-3 or Microsoft Excel is required.

#### Job Specifications

##### NATURE OF WORK

This is specialized engineering work in the Engineering Design Section of the WASD Engineering Division.

An employee in this classification is responsible for establishing and maintaining a cost data base. Responsibilities include collecting information from the authorized requestor of the project, developing and maintaining a project database, projecting expenses, scheduling the distribution of budgeted funds and tracking/monitoring the progress of projects. The incumbent exercises independent judgment in the performance of assigned duties. Supervision is received from a professional superior who reviews work for effective management of capital projects and satisfactory performance of related duties.

##### ILLUSTRATIVE TASKS

Develops, tests, modifies and implements Engineering Design Project status network reports for upper management staff and other divisions; installs Project Status programs linking database to external tables on the network; develops Standard Operating Procedures manual and trains engineering personnel in use of system.

Reviews, seeks funding and processes Engineering Service Requests and Expenditure Requests for engineering projects; opens, closes and transfers project funding accounts; works with project managers to develop project funding and fiscal expenditure scheduling on all capital improvement projects.

Develops, tests, modifies and implements WASD Design and Construction Standards inventory database in Access; tracks purchases and distribution of department standards to developers, private citizens and other agencies; produces and distributes sales reports.

Manages Engineering Design drawings library which includes creating file folders on the network and checking and transferring drawing files as they are completed.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the principles and techniques of the Engineering Design Project network.

Considerable knowledge of the operation of project management software.

Knowledge of project funding development and fiscal expenditure scheduling.

Ability to manage the Engineering Design Project status network and install Project Status programs.

Ability to utilize project management software to track and monitor the status of capital projects.

Ability to process Engineering Service Requests and Expenditure Requests for Engineering projects.

Ability to establish and maintain effective working relationships with budget, capital planning, engineering and accounting staff.

Ability to use Access to develop, test, modify and implement databases.

Ability to communicate clearly and concisely, verbally and in writing.

This is specialized engineering work in the Engineering Design Section of the WASD Engineering Division.

### W & S Sewer Collection Systems Supervisor (005539)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the inspection, evaluation and/or maintenance of the water and sewer systems infrastructure to include televising lines, smoke testing, flow monitoring, inspecting manholes and/or grout repair are required. Must possess a CDL/Class B. Must obtain a tanker endorsement during the probationary period.

#### Job Specifications

##### Nature of Work

This is skilled supervisory work supervising the activities of the Sewage Collection Division's work crews located throughout Miami-Dade County.

Work in this class involves responsibility for supervising a group of skilled and unskilled workers engaged in installation, repair and maintenance work on the county sewage collection system. Supervision is received from an administrative superior in the form of general oral instructions, or designs and specifications for new installations. Difficult maintenance or construction assignments are subject to frequent inspection while work is in process, but employee is allowed considerable latitude in carrying out normal work assignments.

##### Illustrative Tasks

Supervises crews engaged in the inspection and minor maintenance of main lines to include operating closed circuit TV systems to identify defects and or infiltration in the sanitary lines, inserting smoke bombs in the manholes to identify leaks in the sewer collection system, installing flow meters inside manholes to register the amount of sewage flowing through the collection system, isolating specific segments of pipe to check for infiltration or exfiltration, injecting chemical grout into the manhole structure to seal cracks, and operating sewer cleaning machines.

Directs safety measures for the protection of the labor force and the public while work is in progress; ensures compliance with applicable confined space entry rules and regulations, including but not limited to documentation of all confined space entries, and monitoring safety equipment during man-entry inspections; directs the monthly calibration and inspection of safety equipment such as gas detectors and breathing boxes.

Plans and executes assigned inspections to include the scheduling of off-duty police, ordering traffic barricades, traffic control, scheduling de-watering pumps and de-watering tanks as needed.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### Knowledge, Skills and Abilities

Considerable knowledge of methods, practices, techniques, materials, tools and equipment used to identify defects and infiltration in the sewage collection system.

Considerable knowledge of hazards to workers and the public involved in servicing a sewage collection system, and of necessary precautionary measures.

Ability to plan and direct the work of subordinates in a manner conducive to full performance and high morale.

Ability to read and interpret blueprints and other system designs, and to prepare rough sketches of work to be done.

Ability to estimate labor, equipment and materials required for repair or installation work.

## Human Resources Department

#### Minimum Qualifications

High school diploma or GED. Two years of skilled pipefitting experience in installing, repairing, and maintaining water/sewer systems infrastructure are required. Must possess a CDL/Class B. Must obtain a State of Florida Level 3 Water Distribution System license during the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory pipefitting work in the installation and maintenance of all lines of the county water distribution system.

Work in this class involves responsibility for supervising a group of skilled and unskilled workers engaged in installation, repair and maintenance work on the county water distribution system. Assignments are usually received from a technical superior in the form of general oral instructions, or designs and specifications for new installations. Difficult maintenance or construction assignments are subject to frequent inspection while work is in process, but employee is allowed considerable latitude in carrying out normal work assignments.

##### ILLUSTRATIVE TASKS

Supervises and assists in making repairs to water mains, valves and fire hydrants; connects mains and service lines; installs meters and boxes; makes estimates of materials, equipment and labor force required.

Directs ditching operations as to location and depth, taking into consideration existing water mains, gas mains, sewers and telephone or electrical cables; lays out and closely supervises pipefitting and pipe repairing operations, and directs backfill work.

Directs the closing and opening of proper mains and valves when tie-ins or repairs are to be made.

Instructs caulkers where to start, and the type of material to use.

Directs flushing and chlorination of mains and service lines following installation and repair; makes complete inspection and operating tests of repair or installation work before service is begun.

Supervises safe and proper use of tools, compressors, trucks and other equipment; lists abandoned or retired materials and charges them to the appropriate account.

Directs safety measures for the protection of the labor force and the public while work is in progress; notifies the Fire Department of fire hydrants temporarily deprived of water, and sees to the notification of customers in areas temporarily without service; keeps records and prepares reports of labor, time, accidents and service interruptions.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of methods, practices, techniques, materials, tools and equipment used in pipefitting, and in installing and repairing water distribution lines, meters, valves and hydrants.

Considerable knowledge of hazards to workers and the public involved in servicing a water distribution system, and of necessary precautionary measures.

Considerable knowledge of the qualities of various types of pipe and their reaction under pressure.

Ability to plan, lay-outs and direct the work of pipefitters, equipment operators and laborers in a manner conducive to full performance and high morale.

Ability to read and interpret blueprints and other system designs, and to prepare rough sketches of work to be done.

Ability to estimate labor, equipment and materials required for repair or installation work.

Ability to keep time, work, and accident records, and to prepare reports.

Skill in the use of tools, and in the application of techniques of the trade.

### W & S Instrument Technician Supervisor (005546)

#### Minimum Qualifications

High school. Three years of experience in the installation, maintenance and repair of electronic, electric, hydraulic or pneumatic instrumentation and telemetry control equipment are required. Must present a Driver license during the interview selection process.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the installation, repair and maintenance of water and sewer treatment plant system instrumentation.

Employees in this class are responsible for coordinating and supervising the installation, maintenance and repair of electronic, pneumatic, mechanical and electrical types of metering, control, telemetry and recording equipment used in large water and sewer treatment plant systems. Responsibilities include coordinating installation and maintenance projects with public and private officials, reviewing project plans, providing technical direction in instrumentation installation and maintenance, assisting in special circuitry designs, interpreting blueprints, and estimating time and material requirements for instrumentation projects. The incumbent exercises considerable independent judgment and technical expertise in directing instrumentation installation, modification, repair and maintenance projects. Supervision is exercised over a staff of skilled and semi-skilled employees engaged in various phases of operations. Supervision is received from an administrative superior who reviews work personal conferences, written reports and personal observations for achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Supervises skilled and semi-skilled employees engaged in the installation, maintenance, modification and repair of electronic components for flow meters, pressure recorders, switches, and programmable logic controllers. Supervises the installation, maintenance, modification and repair of pressure, flow, level and electrical current indicators for the Supervisory Control Data Acquisition System at local, regional and large booster wastewater pumping stations.

Coordinates priorities for repairs, maintenance and new installation of sewer meters with public utility companies, state and local officials, and contractors.

Reviews detailed planning and project completion; interprets blueprints for changes in or planning of special circuitry.

Plans and provides technical direction and assistance concerning instrumentation installation, modification, maintenance and repairs.

Estimates time and materials required for proposed jobs; reviews time and work reports, trouble reports and service calls.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the methods, techniques and tools used in the repair, modification, maintenance and installation of treatment plant instrumentation.

Thorough knowledge of mechanical and electrical equipment used in large water and sewer treatment plants and related facilities.

Thorough knowledge of the occupational hazards and safety precautions required when working on controls for high voltage electrical systems and equipment.

Considerable knowledge of blueprints, schematics and construction diagrams.

Knowledge of public relations principles and techniques.

Knowledge of supervisory principles and practices.

Ability to provide technical direction in the repair, installation, modification and maintenance of treatment plant instrumentation.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to read, interpret and work from blueprints and construction drawings.

Ability to establish priorities for the repair, maintenance and installation of treatment plant instrumentation.

Ability to use precision test equipment to repair, maintain and install water and sewer treatment plant instrumentation.

Ability to estimate time and material requirements for proposed instrumentation jobs.

Ability to establish and maintain effective working relationships with subordinates, superiors and the public.

### W & S Instrument Technician Supervisor (005546)

Skill in the care and use of standard and specialized electrical tools and precision test equipment.

NEW 10-95

#### **Nature Of Work**

This is skilled supervisory work in the installation, repair and maintenance of water and sewer treatment plant system instrumentation.

### Treatment Plant Supervisor (005555)

#### Minimum Qualifications

Must possess a State of Florida Class "A" Drinking Water Treatment Plant Operator license. Must present a Driver license during the interview selection process. Shift work is required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work requiring a technical understanding of the operation of all phases of a sewage or lime plant.

Work in this class involves general responsibility for the 24-hour operation of a lime plant, or for the shift operation of a large sewage treatment plant and related pumping and lift stations. Work involves establishment of specific standards of plant operation, and the review of routine procedures to maintain established standards on the part of subordinates. General supervision is received from a Plant Superintendent or administrative superior who establishes general operating objectives, and reviews work through frequent conferences and analysis of reports. Supervision is exercised over all plant operating and unskilled maintenance personnel.

##### ILLUSTRATIVE TASKS

Assigns and supervises a large group of personnel in the operation of a sewage treatment plant; keeps a complete set of records of chemicals used, air and gas produced and sewage treated.

Interprets operating data and institutes minor modifications in operation procedures to assure continuous and efficient treatment; in the event of emergencies, places into effect the established corrective procedures to restore operating conditions; distributes, interprets and insures compliance on his shift with policies and orders instituted by the superintendent.

Directs the thickening, pumping, dewatering and feeding into the rotary kiln of calcium carbonate sludge, and calcining of the sludge into calcium oxide (quick lime), and the storage and delivery of this lime to the chemical house of a water treatment plant.

Supervises the installation of new equipment, and the repair and maintenance of all existing mechanical equipment including the relining of the rotary kiln at regular intervals.

Assists the engineering staff of the department in determining the nature of needed improvements; reviews the keeping of a daily log of the operation of the plant.

Requisition personnel, material, equipment and tools for proper plant operations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the theory and principles governing the operation and modification of the type of plant to which assigned.

Considerable knowledge of the repair and maintenance practices and needs of assigned plants.

Considerable knowledge of the safety hazards and necessary safety precautions connected with plant operation.

Knowledge of plant records, maintenance principles and practices.

Knowledge of the principles and practices of personnel management.

Ability to supervise a large number of subordinates in widely separate plant locations in a manner conducive to full performance and high morale.

Ability to establish standard plant operating and safety procedures.

Ability to supervise the maintenance of, and to review, comprehensive plant operating reports.

Ability to plan and schedule preventive maintenance programs.

### Chief W&S Plant Operator (005557)

#### Minimum Qualifications

High school. Six years of operational experience in a water treatment plant to include two years of supervisory experience are required. Must possess a valid State of Florida Water Treatment Operators Class A license. Must present a valid Driver license during the interview selection process.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical and supervisory work in the operation of a regional water treatment facility for the Miami-Dade Water and Sewer Department.

An employee in this class is responsible for planning, coordinating and scheduling the work of subordinates in all phases of large and complex water treatment plant operations on a twenty-four hour, seven-day week basis. Responsibilities include making work-site inspections, establishing chemical dosages required for water treatment, correcting abnormal operating conditions, preparing technical reports on plant operations, requisitioning supplies and equipment, and consulting with engineers concerning plant improvements and modifications. The incumbent exercises considerable independent judgment in meeting all treatment parameters required by various regulatory agencies. Supervision is exercised over subordinate treatment plant operators, power plant operators and maintenance employees engaged in operating and maintaining plant facilities. Supervision is received from a professional superior who reviews work through personal observations, written reports and personal conferences for effective supervision of water treatment plant operations and compliance with applicable regulations.

##### ILLUSTRATIVE TASKS

- Plans and coordinates the work of treatment plant operators and maintenance employees in all phases of water treatment plant operations.

- Makes work-site inspections and provides advice and assistance on unusual or difficult work problems; conducts on-the-job training; conducts meetings with operational and maintenance employees to explain new and revised policies and procedures.

- Establishes chemical dosages required for water treatment based on laboratory analysis of water samples; monitors inventories of bulk chemicals.

- Corrects abnormal operating conditions revealed in daily treatment plant operator reports.

- Directs and audits reporting on required monthly state board reports; prepares technical reports on plant operations.

- Prepares requisitions for supplies, repair parts and new equipment; meets with vendors to discuss problems and conditions.

- Consults with and assists engineers regarding plant improvements, modifications and replacement of electrical and mechanical equipment used in treatment plants.

- Develops budget proposals and prepares cost reports on plant operations.

- Enforces established safety requirements and security measures pertaining to water treatment facilities.

- Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Thorough knowledge of the operating characteristics and maintenance requirements of a regional water treatment facility.

- Considerable knowledge of local, state and federal regulations pertaining to the the operation and maintenance of regional water treatment facilities.

- Considerable knowledge of supervisory principles and practices.

- Considerable knowledge of the occupational hazards, safety precautions and security requirements of a water treatment facility.

- Knowledge of County procurement practices and procedures.

- Ability to plan, coordinate and schedule work in all phases of water treatment plant operations.

- Ability to foresee potential problems concerning water plant operations and take appropriate corrective or preventive action.

- Ability to ensure compliance of water treatment plant operations with applicable local, state and federal regulations.

- Ability to supervise subordinates in a manner conducive to full performance and high morale.

- Ability to prepare a variety of technical and administrative reports concerning water treatment plant operations.

### Lime Production Plant Supervisor (005559)

#### Minimum Qualifications

High school. Three years of experience in the operation of a lime plant are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the operation of a recalcination plant.

A Lime Production Plant Supervisor is responsible for 24-hour operation of a recalcination plant. Duties include establishment of specific standards of plant operations and the review of procedures to maintain established standards on the part of subordinates. Incumbent is on 24-hour call in the event of emergency, mechanical breakdown of plant, or need for personnel. Supervision is exercised over all skilled and unskilled plant operators and maintenance personnel. General supervision is received from an administrative superior who establishes general operating objectives and reviews work through frequent conferences and detailed reports.

##### ILLUSTRATIVE TASKS

Decides on and reviews the assignment, utilization and replacement of all supplies and equipment used in the operation and maintenance of the plant.

Establishes maintenance schedules for all electrical and mechanical components of the system; evaluates and recommends new equipment to improve efficiency; studies alternative methods to improve production and increased quality of calcium oxide and recommends appropriate action.

Prepares and submits comprehensive reports on all phases of the operation; prepares yearly budget estimate for plant; recommends specialized purchasing needs and conducts required correspondence.

Supervises installation of new equipment, and repair and maintenance of all existing mechanical equipment including relining of the rotary kiln at regular intervals.

Directs the thickening, pumping, dewatering and feeding into the rotary kiln of calcium carbonate sludge, the calcining of the sludge into calcium oxide and the storage and delivery of this lime to various water plants.

Assists the departmental engineering staff in determining the nature of needed improvements; reviews the daily log on operation of the plant, and reviews results from laboratory on testing of lime.

Interprets operating data and institutes modifications in operation procedures to assure continuous and efficient production; effects established corrective procedures to restore full production in the event of emergencies.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of supervisory techniques and procedures applicable to effective and efficient operational management of a recalcination plant.

Thorough knowledge of local and state pollution control codes, requirements and regulations.

Thorough knowledge of the theory and principles governing the operation and modification of a recalcination plant.

Considerable knowledge of safety hazards and necessary safety precautions connected with plant operations.

Knowledge of recent developments, current research and literature available on recalcination plants.

Knowledge of plant records, maintenance principles and practices.

Knowledge of the principles and practices of personnel management.

Ability to plan and supervise the work of a large number of subordinates in a manner conducive to full performance and high morale.

Ability to correlate work so as not to interfere with interdepartmental and contractor schedules.

Ability to establish standard plant operating and safety procedures.

Ability to plan and schedule preventive maintenance programs.

Ability to express ideas clearly and concisely, orally and in writing.

Ability to discuss and give knowledgeable tours to visiting engineers or personnel from other municipalities.

### W & S Service Technician Supervisor (005574)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in locating underground utilities, detecting leaks, and pressure testing and chlorinating water lines are required. Must possess a Driver license. Must obtain a State of Florida Level 3 Water Distribution System license during the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the electronic location of underground water main leaks and in water main line flushings.

An employee in this class is responsible for planning, assigning, and reviewing the work of technical and semi-skilled subordinates engaged in the electronic location of underground water main leaks in water lines of all sizes. Responsibilities include establishing priorities and assignments for crews, arranging for the repair of located leaks, meeting with contractors, maintaining records and preparing reports, and ensuring safe operation of equipment. A related responsibility is supervision of water main line flushings as required. Supervision is exercised over a staff of service technicians and semi-skilled employees assigned to various geographical locations. Supervision is received from an administrative superior who reviews work for efficient and effective completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Supervises and coordinates the work of geographically dispersed leak detection crews conducting a continuous survey of the County's underground water mains, services, valves, and fire hydrants in order to locate underground leaks and identify unrecorded installations.

Meets with contractors and water and sewer inspectors or supervisors to coordinate the flushing of water mains or proposed shutdowns of the system.

Maintains records and prepares reports of labor, materials, time and work performed; ensures crews adhere to established safety practices and procedures.

Reads and interprets distribution water line atlases, valve atlases, blueprints, and other system designs; assists in detection of difficult to locate water line leaks.

Prepares work orders and requests proper equipment to handle water line leaks; arranges for barricades and citizen notification that water will be turned off.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the grid pattern of water mains and services throughout the metropolitan area.

Thorough knowledge of the methods, tools, and equipment used in locating leaks in a variety of underground water pipes.

Thorough knowledge of the practices and techniques of locating underground leaks in water pipes.

Considerable knowledge of underground water pipes and their differences from electrical, telephone, gas, cable television, and sewer lines.

Considerable knowledge of supervisory principles and practices.

Knowledge of the maintenance characteristics of a water distribution system.

Ability to plan, assign, and review the work of service technicians and semi-skilled employees in a manner conducive to full performance and high morale.

Ability to direct the work of geographically dispersed work crews.

Ability to read and interpret distribution water line atlases, valve atlases, blueprints, and other system designs.

Ability to prepare detailed reports and records of work performed.

Ability to establish and maintain good working relationships with subordinates, superiors, contractors, utility company representatives, and the public.

Ability to maintain records of "unaccounted for" water.

Skill in the electronic detection of underground water main leaks.

##### NATURE OF WORK

This is advanced professional, administrative and supervisory work planning and directing activities of the Pump Station Section for the Miami-Dade Water and Sewer Department.

An employee in this class is responsible for coordinating and supervising the construction of large and complex water and/or wastewater pump stations and lift stations. Responsibilities include providing assistance in the preparation of construction plans and specifications, attending pre-construction meetings, coordinating field inspections, preparing and reviewing payment estimates, preparing Change Orders, resolving conflicts with consultants and contractors, preparing progress reports, monitoring compliance with plans and specifications, and supervising the correction of defects during the warranty period. The incumbent exercises considerable independent judgment in the application of the principles and practices of architectural and engineering planning, design and construction to the management of several projects simultaneously in various phases of development. Supervision is exercised over a staff of construction managers, construction inspectors, professional and clerical employees engaged in construction management activities or serving in support capacities. Supervision is received from a professional superior who reviews work through personal conferences and written reports for the effective management of assigned construction projects.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate construction managers and construction field inspectors engaged in supervising construction of large and complex water and/or wastewater pump stations and lift stations including electrical work involving high voltage electrical equipment, installation of large booster pump units, and structural construction work involving load bearing and test pile installation, structural concrete, and reinforced cast-in-place and pre-cast systems.

Supervises all phases of pump station and lift station construction projects to completion and conducts periodic personal inspections of construction projects to monitor compliance with contract plans and specifications.

Coordinates the work of engineering consultants and contractors; approves contract invoices and oversees quality control measures; originates Notices-to-Proceed and Work Orders to consultants; attends pre-construction meetings; provides assistance in the preparation of construction plans and specifications; assists in resolving conflicts with consultants and contractors; prepares correspondence and progress reports; approves lists of deficiencies and supervises correction of defects during the warranty period.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the principles, practices and methods of engineering and architectural design and construction work.

Thorough knowledge of the design characteristics of large and complex water and wastewater pump stations and lift stations.

Thorough knowledge of construction plans and specifications pertaining to the construction of pump stations and lift stations.

Thorough knowledge of building materials, methods and construction systems.

Considerable knowledge of the content, provisions and meaning of information in complex construction contracts.

Considerable knowledge of the records, forms and reports required in the construction of pump stations and lift stations.

Ability to manage and coordinate the administration and inspection of pump station and lift station construction projects to ensure conformance with construction plans and specifications.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to understand complex architectural and engineering drawings and specifications related to pump station and lift station construction projects.

Bachelor's degree in Construction Management, Engineering or related field. Three years of experience in the design, construction or management of construction projects to include one year managing water and/or wastewater utility construction projects are required. A license in any of the following may substitute for the required education: State of Florida Professional Engineer license, State of Florida Registered Architect license, State of Florida or Miami-Dade County General Contractor's certificate, General Building Contractor or General Engineering Contractor's certificate or Certificate of Eligibility in General Engineering or General Building.

#### Job Specifications

##### NATURE OF WORK

This is professional and administrative work in the management of building construction projects for the Water and Sewer Department.

Employees in this class are responsible for authorizing and monitoring the work of architectural and engineering consultants and contractors engaged in the design and construction of a variety of water and wastewater plant equipment and facilities, pipelines, sewer mains, pump stations, lift stations, and related Water and Sewer infrastructure. Emphasis of the work is on the management of various projects through all phases of development including planning, consultant selection, design management, selection of contractor, construction management, inspection and warranty administration. Incumbents exercise independent judgment in the application of the principles and practices of architectural planning, design, construction and related engineering knowledge. Supervision is received from a professional and administrative superior who reviews work through personal conferences and reports for satisfactory attainment of goals and objectives during all phases of the building construction process.

##### ILLUSTRATIVE TASKS

Assists consultants and county agency officials in the development of building construction projects; issues work orders to consultants, surveyors and testing labs; verifies consultant's invoices and recommends payment; reviews consultant's plans and specifications at various stages of development for conformance to program and design standards, completeness and accuracy; suggests changes, additions and corrections; monitors consultant's cost estimates; schedules, attends and writes reports of meetings with consultants and county agency representatives.

Coordinates bid advertisements, printing and distribution of plans and specifications to bidders; schedules and assists in conducting pre-bid conferences; assists in evaluating bids and making recommendations for award of contract.

Assists in coordinating the signing of contracts with contractors; schedules and assists in conducting pre-construction meetings with consultants, contractors and sub-contractors.

Originates Notices to Proceed to contractors and work orders to consultants and testing labs; reviews and recommends approval of periodic requisitions, invoices and supporting data from contractors, consultants and testing labs; reviews field inspection reports.

Assists in the preparation of schedules and monitors construction progress; keeps user agencies informed; assists in the preparation of change orders to contract; keeps records of contingency allowance and consultant's payments.

Assists in the inspection of projects for substantial completion and prepares list of any deficiencies; prepares performance reports on contractors and consultants; arranges for correction of defects by contractor during warranty period; schedules and conducts inspection at end of warranty period and assures correction of defects.

Qualifies the department as general contractor and obtains building permits

Maintains project administrative records and files.

Performs related work as required.

##### NATURE OF WORK

This is advanced specialized supervisory work in the protection of public and private property belonging to the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for planning, assigning and reviewing the work of contract security guards engaged in providing security activities at Water and Sewer facilities and properties. Responsibilities include directing security actions to assure the safety of persons while on county property, protect county facilities, and prevent unauthorized access to restricted areas. Work occasionally involves an element of personal danger and is performed with considerable independence in accordance with established security and safety practices. Supervision is exercised over contract guards through personal observation either on foot or by vehicle. Supervision is received from an administrative superior who reviews work for effective supervision of security operations and adherence to established security policies, procedures and regulations.

##### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of contract security guards engaged in protecting and patrolling public and private property belonging to the Water & Sewer Department.

Responds to burglar alarm calls to admit police to search Water & Sewer Department premises and prepares reports.

Assures that departmental security policies and procedures are appropriately implemented

Prepares and reviews incident reports, memoranda, and logs of activities prepared by security guards and supervisors to assure that they are properly written in accordance with departmental, rules, regulations and procedures.

Recommends changes to departmental security policies, procedures and operations to correct deficiencies and improve operations; keeps abreast of new procedures and developments in the security field.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of policies, procedures, and regulations pertaining to patrolling and protecting persons and property at Water & Sewer facilities.

Considerable knowledge of Water & Sewer emergency and contingency plans.

Considerable knowledge of Water & Sewer facilities and operations, including buildings, roadways, and geographical layout.

Knowledge of modern security practices, techniques and methods of law enforcement.

Knowledge of supervisory principles and practices.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Completion of coursework in Engineering, Engineering Technology, Construction Management, Security Systems or related field may substitute for required experience on a month-for-month basis to a maximum of one year.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the inspection management of all security related construction projects within the Miami-Dade Water & Sewer Department.

An employee in this class is responsible for planning, assigning and reviewing the work of assigned contractors and tradesmen. Emphasis of the work is on providing technical direction to subordinates and contracted employees engaged in the installation, alteration, maintenance and repair of the department's security access control, intrusion alarms, and closed circuit television (CCTV) systems. The employee designs blueprints and specifications as the nature of the job-site requires, recommends working procedures and instructs contractors and subordinates in new techniques. Supervision is exercised over skilled tradesmen, unskilled helpers and contracted employees through inspection of work in progress and upon completion, for proper installation and functions. Supervision is received from an administrative superior who reviews work through personal inspections, systems' effectiveness to prevent burglaries, cost, and project completion time.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of assigned contractors, tradesmen and private contract assistants engaged in the installation, alteration, maintenance and repair of departmental security access control, intrusion alarms and CCTV systems; lays out and explains job to be done; recommends working procedures and instructs contractors and subordinates in new techniques; provides on site supervision and inspects completed work for proper installation and function.

Advises administrative superiors in planning new security systems both in existing and facilities under construction; provides technical advice and inspects system construction under contract.

Supervises and participates in the installation and maintenance of a large variety of specialized security equipment including card-reader locks, vehicle barriers, perimeter gates, electronic door releases, CCTV and biometric readers.

Provides technical direction to subordinates; participates in review of security system requirements; advises administrative superiors on the most effective type of security system and devices to meet site requirements.

Provides advanced technical assistance for construction inspections; reviews and confirms completion of work on submitted payment estimates; reviews reports provided by contractors and construction inspectors.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of construction inspection methods and techniques used in the inspection of large and complex security construction projects.

Thorough knowledge of security access controls, intrusion alarms, CCTV systems, card-reader locks, vehicle barriers, perimeter gates, electronic door releases and biometric readers.

Thorough knowledge of standard practices, methods, tools and materials used in the installation and maintenance of a large variety of

##### NATURE OF WORK

This is responsible supervisory security work in protecting public property at Miami-Dade County Water and Sewer facilities.

An employee in this class is responsible for the development and operation of a security program at the Miami-Dade Water & Sewer Department. Emphasis of the work is on planning, organizing and reviewing the work of a subordinate staff of supervisors maintaining security on specific shifts, coordinating work with various local and Federal law enforcement agencies and continuously reviewing security policies and practices to recommend improvements and increase efficiency. Responsibilities include the development, installation and maintenance of a Water & Sewer Department identification system, planning for future security requirements at water & sewer facilities, budget preparation, and development of on-the-job and formal training programs for subordinates. Work involves the use of considerable independent judgment in the application of established security practices and procedures at water & sewer facilities. Supervision is exercised over subordinate clerical and specialized security employees by review of a variety of reports, and personal conferences to insure efficiency of security operations. General supervision is received from the an administrative superior who holds the incumbent responsible for the Water & Sewer Department security program through personal conferences, reports and observation of security operations.

##### ILLUSTRATIVE TASKS

Plans, organizes and reviews work of a subordinate staff of supervisors responsible for maintaining security on specific shifts; establishes work schedules and revises as required.

Directs the establishment of surveillance activities as required; establishes and assures the maintenance of a security records system containing all accident, theft and incident reports prepared by security personnel and local and Federal law enforcement agencies.

Evaluates long range security requirements in response to expansion of facilities such as manpower needs, changes in assigned duties of subordinates, locations of gate houses and security policies and procedures.

Devises and implements new and revised departmental security procedures; recommends changes in operations to correct deficiencies and improve efficiency.

Evaluates the application of electronic security systems for departmental facilities and properties, including the use of closed circuit television, sound detection equipment, smoke detectors, intrusion alarms and other related facility devices.

Assists building management personnel with security problems and the proper assignment of guard service personnel.

Designs and administers a Miami-Dade Water and Sewer identification system including issuing, recording and filing of identification cards.

Supervises an on-the-job training program for supervisors and security guards; assists in developing formal training programs by identifying training needs and coordinate efforts with other law enforcement agencies; writes operating manuals for supervisors and security guards.

Prepares budget requests for security program; reviews and approves requisitions for supplies and equipment.

Makes recommendations and decisions regarding hiring and discipline of subordinates; authorizes leave and overtime; reviews employee performance reports prepared by subordinates and rates employee performance.

Performs related work duties as required.

### W & S Security Chief (005592)

Additional related experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is professional and supervisory work managing the GIS Data Maintenance Unit for the Miami-Dade Water & Sewer Department.

An employee in this class is responsible for managing the accuracy of data for mission critical GIS layers. Duties include the management, training and supervision of staff; management of work quality and productivity; extensive research, problem solving and recommendations for adequate layer maintenance; testing all GIS applications before implementation and as needed; assisting all GIS users and clarifying connectivity rules for WASD GIS Atlas Maintenance and geodatabases, mapping and reporting. Supervision is exercised over a staff of Cadastral Technicians and W&S GIS Quality Assurance Specialists engaged in various phases of the unit's work. Supervision is received from an administrative superior who reviews work for operational effectiveness and adherence to departmental standards and policies.

##### ILLUSTRATIVE TASKS

Supervises the GIS Data Maintenance unit responsible for maintaining and updating records of as-built information in an electronic format (GIS), mapping network system (intranet) and hard copy system (atlases).

Manages multiple GIS quality improvement projects; organizes the distribution of worked based on priority areas or received date; ensures that all applications are properly running on staff's work stations.

Manages the data accuracy for WASD GIS layers to include Water, Sewer, Fire Hydrants, Service Point Connection, Service Area Layer and Sewer Private System.

Establishes and maintains quality assurance/quality control procedures for WASD infrastructure GIS layers.

Validates and places in production data quality checked by subordinates; validates and places in production data quality checked and digitized by consultants; validates as-built quality to ensure data is accurate; validates quality of scanned as-builts.

Researches missing documentation necessary to correct GIS layers and ensures all corrections are reported using the Active As-Built Supplementary Information System (AASIS) layer.

Coordinates with Plans Review the removal of Donation projects from the system and notifies them when a Donation project has been placed spatially incorrect.

Validates WASD GIS data that has been updated on all local WASD GIS servers and on the Enterprise Geodatabase at ITD; validates that all Atlases are updated on a weekly basis.

Pushes and synchronizes GIS and EAMS data weekly; researches and corrects those assets in GIS that were not created or synchronized in EAMS.

Provides support and hands-on training to all staff on properly interpreting as-built information, data editing, quality assurance/quality control rules and techniques to include interpreting as-built drawings, properly transferring as-built data to the GIS WASD layers, and properly interpreting and digitizing complex as-builts.

Manages application testing of all modifications and enhancement upgrades to the GIS Atlas Maintenance System.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Assigns and monitors work progress using the WASD Work and Time Tracking System (WATTS)

Generate Active Strategy Enterprise (ASE) performance management reports on a quarterly basis

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the Geographic Information System (GIS) utilized within the Miami-Dade Water & Sewer Department

Considerable knowledge of Environmental Systems Research Institute (ESRI) GIS geometric network rules and maintenance for water/wastewater utility networks

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the principles, practices, techniques and instruments of engineering drafting.

### W&S GIS Quality Assurance Supervisor (005596)

Knowledge of the basic principles of civil engineering as they relate to topographic surveying and engineering drafting.  
Knowledge of all above-ground and below-ground water and sewer field facilities.  
Knowledge of research techniques and the sources and availability of pertinent information concerning water and sewer systems.  
Ability to manage multiple projects simultaneously  
Ability to reprioritize tasks to meet deadlines  
Ability to implement quality control/quality assurance procedures.  
Ability to interpret as-built information and transfer as-built data to a GIS.  
Ability to conduct research to correctly update GIS WASD layers.  
Ability to supervise subordinates in a manner conducive to full performance and high morale.  
Ability to establish and maintain effective working relationships with subordinates, superiors, and a variety of other public and private individuals.  
Ability to incorporate field survey findings into the Geographical Information System database.  
Skill in the use of GAMS and ArcGIS software.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory and administrative work in the installation, repair and maintenance of pipelines in the County water distribution system.

Employees in this class are responsible for planning and coordinating the work of employees engaged in the construction and maintenance of water distribution pipelines. Emphasis is on the large scale supervision and coordination of the work of subordinate supervisors, equipment operators, technical employees and laborers, utilizing materials and equipment to install, repair and maintain pipelines, repair water mains, valves and fire hydrants, connect mains, install meters and boxes and perform excavating and backfill tasks. Responsibilities include coordinating geographically separated work crews, assisting with difficult or unusual problems and inspecting work in progress and upon completion. Supervision is exercised over subordinate supervisors, skilled journeymen, semi-skilled and unskilled employees. Supervision is received from an administrative superior through personal conferences and inspection of projects in progress and upon completion for satisfactory attainment of objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisors, skilled journeymen, semi-skilled and unskilled employees engaged in the installation, repair and maintenance of water distribution pipelines, water mains, valves, fire hydrants, connections of main lines and service lines, water meters and boxes, and related excavation and backfill work.

Prepares diagrams and sketches for new installations; inspects work in progress and upon completion and assists with difficult or unusual problems.

Requisitions equipment, supplies and materials necessary for completion of work projects; examines blueprints and estimates cost of materials and labor necessary to complete work.

Keeps records of time and materials required for projects and submits reports.

Arranges for the closing and opening of appropriate mains and valves when tie-in or repairs are to begin.

Communications and enforces established safety measures and regulations, instructs employees in occupational hazard and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance evaluations prepared by subordinate supervisors; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Through knowledge of methods, practices, techniques, tools and equipment used in pipefitting, and in the installation and repair of water distribution lines, meters, valves and hydrants.

Through knowledge of the hazards to the public and necessary precautionary measures involved in servicing a water distribution system.

Considerable knowledge of the qualities of various types of pipe and their reaction under pressure.

Considerable knowledge of supervisory principles and practices and operations.

Considerable knowledge of occupational hazards and safety precautions required in pipeline construction and repair projects.

Ability to supervise a large staff of subordinate supervisors, skilled journeymen, semi-skilled and unskilled employees in a manner conducive to full performance and high morale.

Ability to coordinate the use of work crews, equipment and materials in geographically separated locations. Ability to delegate necessary authority to subordinates for completion of assigned responsibilities.

Ability to read and interpret blueprints and prepare diagrams and sketches of work projects.

Ability to accurately estimate labor, equipment and materials required for repair or installation work.
