

### Clerk 2 (000011)

#### Minimum Qualifications

High school diploma or GED. One year of general clerical experience is required. Completion of college coursework or certified business school may substitute for the required experience on a month-for-month basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work which involves moderately complex work methods and problems.

Employees in this class do varied clerical work requiring the application of independent judgment and clerical knowledges. Work differs from that found in the Clerk 1 class in that these positions require the capacity for considerably more clerical growth, they do more difficult and demanding work and, within a reasonable orientation period, must work with considerably more independence of action and judgment than Clerk 1 incumbents. The variety of work differs among positions, but where the work is more repetitive there is an additional responsibility for finality of action. Work may include the operation of standard office equipment for which no previous training is required. Until the more difficult phases of a job are learned an employee works under relatively close supervision, but thereafter detailed instructions are received only when changes in procedures are made. Supervision may be occasionally be exercised over a small group of employees assisting in routine details. Work is reviewed by a supervisor through observation of operations, periodic audits of work performed, and by advice and assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Posts changes in ownership, exemptions, property improvements, and subdivisions to tax assessment records of an assigned area of the county; assists in preparing tax statements, posts tax payments to tax rolls, assists in checking tax rolls for delinquent taxes, and in balancing tax rolls at close of tax year.

Makes final checks of documents for proper coding, classification, and mathematical accuracy; posts invoices, vouchers, and other accounting, fiscal, and cost data; prices vouchers according to manuals and price books; conducts routine correspondence.

Codes, indexes, and abstracts, or files complex court records; withdraws files for use of judges, attorneys, and the public; prepares certified copies of court records, and performs related clerical work.

Supervises filing, coding, indexing and withdrawal of records, correspondence, and map files in a moderate size filing unit; transfers inactive files to storage.

Interviews persons seeking information which requires interpretation of departmental policies and regulations; receives and adjusts routing complaints; uses departmental records in resolving work problems.

Completes repair orders for various shop equipment; reviews and adjusts invoices for correct total prices; maintains shop production records; answers telephone inquiries on status of shop work; maintains master control work sheets and compiles production reports.

Issues building, electrical, plumbing and other permits; assists public in preparing applications; obtains complete information in accordance with regulations and procedures; issues applications subsequent to final approval and maintains permit files.

Explains to general public procedures on billing for waste collections; furnishes information on new rates; verifies payments with data processing lists; computes waste collection fees on new accounts; furnishes information to attorneys and real estate companies on the status of fees for closing properties.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

## Human Resources Department

---

### Clerk 2 (000011)

Knowledge of business English, spelling and arithmetic.

Knowledge of office practices and procedures.

Ability to understand and carry out moderately complex oral and written instructions.

Ability to make minor decisions in accordance with procedures, laws and regulations and to apply these to work problems.

Ability to make arithmetic computations accurately with reasonable speed.

Ability to meet and deal effectively with the general public, and to use tact and good judgment.

Ability to assign, supervise and review the work of a small group of clerical employees in a manner conducive to full performance and high morale.

REV 10/98

#### **Nature Of Work**

This is advanced clerical work which involves moderately complex work methods and problems.

### Clerk 3 (000012)

#### Minimum Qualifications

High school diploma or GED. Two years of advanced clerical experience are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory clerical work or independent clerical work of comparable responsibility.

Employees in this class usually plan, assign and review the work of a moderate sized clerical staff engaged in complex clerical activities. In the absence of supervisory responsibilities they do more advanced clerical work requiring the application of more varied and involved procedures and the more frequent use of a higher degree of independent judgment in solving work problems than is found in the Clerk 2 class. Situations concerning important departures from standard practices and procedures are referred to a superior for final decision. New assignments usually consist of statements of desired objectives, and work is usually reviewed only for achievement of desired results.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of a moderate sized clerical staff engaged in such activities as making simple interpretations of planning, building, and zoning laws, rules and regulations; in preparing maps for zoning purposes; compiling and auditing payrolls, and in recording minutes of court procedures.

Supervises a small clerical staff engaged in diverse filing, typing and stenographic activities relating to such functions as: park operations, billing and receiving waste collection fees, or scheduling minor hospital purchasing, maintenance and transportation activities.

Supervises the mail room of a large county institution; maintains current roster for purposes of mail distribution; sorts mail and packages; sells stamps and money orders, insures and affixes postage to parcel post; maintains official governmental postal manual containing regulations and directives pertaining to the use of the mails, and answers difficult inquiries.

Answers calls pertaining to right-of-way dedicated to the county; assists abstractor in title search, checks right-of-way and property deeds as to description; prepares deeds for acceptance by the Board of County Commissioners, and after recording enters them in the right-of-way records. Keeps county property books and section tracings up-to-date as to right-of-way and county properties.

Assists superior in planning for and administration of Division activities including budget, personnel, purchasing and work methods and procedures; supervises a group of clerical, duplicating equipment operators, driver-messengers, and custodial services, and a central storeroom of office and stationary supplies for county departments.

Supervises and participates in preparing tax statements, in posting tax payments to rolls, in checking rolls for delinquent taxes, and in balancing the rolls at close of the year; maintains property card files of parcels of land in the county, with particular emphasis on property having delinquent taxes due; prepares interest charts for delinquent sale certificates; conducts tax deed sales; prepares and supervises the preparation of municipal and county delinquent real estate tax bills.

Supervises the complaint section of a department; receives calls and answers questions pertaining to drainage, road construction and repair, sidewalks, canals, debris removal, rock pits and related engineering matters; maintains cross reference file on all projects under construction for purposes of public information.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of business English, spelling and arithmetic.

## Human Resources Department

---

### Clerk 3 (000012)

Considerable knowledge of office practices, procedures and appliances.

Some knowledge of the principles of office management and supervision and ability to apply this knowledge to work problems.

Ability to acquire rapidly considerable knowledge of the legal, administrative and procedural regulations applicable to the organization of assignment.

Ability to keep complex records and prepare periodic reports from such records.

Ability to plan, assign and coordinate the work of a moderate sized clerical staff, and to instruct and train clerical subordinates in a manner conducive to full performance and high morale.

Ability to develop and maintain effective departmental and public relations.

Ability to develop, layout, and install clerical procedures and operations from general instructions.

REV 10/98

### **Nature Of Work**

This is supervisory clerical work or independent clerical work of comparable responsibility.

## Clerk 4 (000013)

### Minimum Qualifications

High school diploma or GED. Three years of advanced clerical experience are required.

### Job Specifications

#### NATURE OF WORK

This is supervisory clerical work involving some administrative responsibility in the management of diversified clerical operations of a major organizational unit.

Employees in this class perform a range of responsible duties including work planning and progression, the assignment and review of other supervisory and operating employees in moderately large units engaged in processing and maintaining a volume of fiscal and operating functions. Work may also involve assisting an administrative superior by relieving him of routine office management functions or performing specialized operational or clerical activities under general supervision. The incumbent is responsible for the proper performance of independent work decisions based on experience and knowledge of departmental operations but refers policy, difficult technical or procedural matters to a superior for resolution. Work is assigned and reviewed through conferences with administrators or technical superiors who review work for general administrative effectiveness by personal observation, review of written reports and by providing assistance in matters of policy interpretation.

#### ILLUSTRATIVE TASKS

Supervises the fiscal and clerical operations of a major departmental unit as an office manager or assistant to the administrator performing departmental functions.

Supervises the duplicating of printed materials for all county departments; supervises the county mail and messenger service and maintains a daily record of mail costs for each department; maintains record control of all office and material supplies for county departments and insures that all charges are correct and the books are properly balanced.

Coordinates the maintenance of a criminal history record file, master name file and entry and retrieval of computerized criminal history data; assigns and supervises the record control of all open metro warrants and corresponding cross indexes and dissemination of information to municipal, state and federal law enforcement agencies; assists in the development of police records systems and coordinates them with data processing personnel.

Plans, assigns and supervises the work of subordinates engaged in waste administration, volume billing and records keeping, reviews procedures, processes delinquent accounts requiring investigation and prosecution, performs periodic balance of accounts.

Plans, assigns and supervises the work of subordinates engaged in phases of property tax collection and assessment including complex property valuations; performs tax receipt audits, computes distribution to tax receipts, conducts tax sales, counsels dissident taxpayers.

Coordinates the preparation of weekly payroll timesheets based on transit route assignments; supervises the recording of route revenues, mileage readings and related cost items of a large transit operation.

Supervises the processing of all real estate exemptions; reviews and approves applications from religious, fraternal, and charitable organizations claiming total exemption from taxes; makes field inspections of properties and consults with county attorney on protested applications.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of modern office practices, procedures and equipment.

## Human Resources Department

---

### Clerk 4 (000013)

Considerable knowledge of the principles of office management, business accounting and the legal procedural requirements of the department assigned.

Considerable knowledge of business English, spelling and accounting.

Ability to plan, assign and supervise the work of a staff of clerical and other subordinates in a manner conducive to full performance and high morale.

Ability to develop effective office and field work procedures and training programs.

Ability to acquire complex knowledge of the legal, administrative and procedural requirements of the department assigned.

Ability to promote and maintain effective departmental and public relations.

Ability to prepare correspondence, operational and statistical tabulations and reports.

Ability to communicate effectively, orally and in writing.

REV 10/98

### **Nature Of Work**

This is supervisory clerical work involving some administrative responsibility in the management of diversified clerical operations of a major organizational unit.

### Data Entry Specialist 1 (000015)

#### Minimum Qualifications

High school diploma or GED. One year of typing or data entry experience is required.

#### Job Specifications

##### NATURE OF WORK

This is data entry and clerical work which involves moderately complex work methods and problems and requires data entry skills. Although the emphasis of the work is on data entry, employees are also responsible for the performance of a wide variety of tasks which require the application of independent judgment and clerical knowledge. The variety of work differs among positions, but where work is more repetitive there is an additional responsibility for finality of action. Work may include the operation of other standard office machines for which no previous training is required. Supervision is occasionally exercised over a small group of employees assisting in routine details. Until the more difficult phases of a job are learned an employee works under relatively close supervision, but thereafter detailed instructions are received only when changes in procedures are made. Work is reviewed by a supervisor through observation of operations, periodic audits of work performed, and by advice and assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Performs data entry including researching, verifying, and correcting information to be entered into a database; creates simple forms and formats or statistical charts; runs and prints reports, and performs disk backups.

Operates standard office equipment such as personal computer, copy or facsimile machine, and calculator; screens telephone calls and refers caller to appropriate party or takes telephone message; opens, sorts, and distributes mail; sorts and files correspondence, reports, or other materials.

Processes documents requiring various procedural knowledge specific to area of assignment; reviews documents for sufficiency, obtains necessary signatures and routes appropriately, maintaining follow-up; provides information to other divisions and the public, applying significant knowledge of departmental rules, regulations and procedures to interpretations made; may supervise a small group of employees engaged in routine clerical duties.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of simple data processing and transmission principles utilized in computerized information systems.

Knowledge of routine office practices and procedures.

Ability to read and decipher data on source documents to be entered.

Ability to enter and verify information with accuracy and a reasonable rate of speed.

Ability to understand and follow oral and written instructions.

Ability to work with considerable independence.

Skill in data entry or typing.

#### NATURE OF WORK

This is routine typing and clerical work which follows well established procedures.

Work requires skilled typewriting in addition to clerical work similar to that of the Clerk 1 class. Duties follow well defined procedures and methods. Work may include the operation of other standard office machines for which no previous training is required. Detailed instructions and close supervision are received at the beginning of work and on new assignments, but regular routine tasks are performed more independently and some initiative and judgment are utilized as experience is gained. Employees may make arithmetical or other checks upon work of other employees for accuracy, but do not exercise direct supervision. Work is subject to close supervision and is reviewed by superior on completion both for content and accuracy.

#### ILLUSTRATIVE TASKS

Types articles, letters, memoranda, reports, statements, tabulation and other materials from copy, rough draft or dictating machine; cuts and proofreads stencils, operates mimeograph and copy machines.

Sorts and files correspondence, reports, vouchers or other materials numerically, alphabetically or by other established classifications.

Meets the public, gives nontechnical information and explains well defined rules; screens and refers office callers; opens, sorts and distributes mail; takes telephone messages.

Completes and mails routine forms or form letters; posts data from forms or form letters on cards or other records based on well established procedure.

Computes data from requisitions, listings, time reports or other records; assembles data in appropriate form for use in completing required reports.

Makes simple arithmetic calculations; prepares and codes billings; verifies cashier tapes and issues receipts for payments.

Enters cases in dockets and files case jackets; types court calendars; sorts and files index cards, and records bonds.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Some knowledge of business English, spelling and arithmetic.

Some knowledge of office practices and procedures.

Ability to understand and follow oral and written instructions.

Ability to learn assigned clerical tasks readily and to adhere to prescribed routines.

Ability to make arithmetic computations and tabulations accurately and with reasonable speed.

Ability to meet and deal courteously with the general public.

##### NATURE OF WORK

This is advanced clerical work which involves moderately complex work methods and problems and requires skilled typewriting.

Although employees in this class perform duties which require skilled typewriting, the principal emphasis is upon the wide variety of clerical tasks performed which require the application of independent judgment and clerical knowledges. Work of these positions other than typewriting is similar in nature and level to that found in the Clerk 2 class. The varied of work differs among positions, but where work is more repetitive there is an additional responsibility for finality of action. Work may include the operation of other standard office machines for which no previous training is required. Supervision is occasionally exercised over a small group of employees assisting in routine details. Until the more difficult phases of a job are learned an employee works under relatively close supervision, but thereafter detailed instructions are received only when changes in procedures are made. Work is reviewed by a supervisor through observation of operations, periodic audits of work performed, review of typewritten material, and by advice and assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Maintains the less complex accounting, financial and cost records where no technical knowledge is required but where frequent procedural problems arise; prepares or checks payrolls, vouchers, requisitions and purchase orders; maintains personnel, financial, court and similar records.

Gives information to other divisions and the public, applying significant knowledge of departmental rules, regulations and procedures to interpretations made.

Supervises a small group of employees engaged in routine clerical and typing duties.

Processes documents requiring various procedural knowledges such as warrants for arrest or insurance claims; reviews documents for sufficiency, obtains necessary signatures and routes appropriately, maintaining follow-up.

Prepares less complex tax statements; computes simple taxes or obtains data for the computation of more involved taxes; replies to correspondence inquiries covering tax procedures.

Composes and types form letters and other routine correspondence based on information from records and files; prepares rough draft reports, narratives and statistical tabulations.

Types from copy, rough draft or general instructions, accounting and financial statements, inventories, court records, letters, payrolls, receipts, medical records and case histories, departmental reports, permits or other materials, frequently requiring independent action and discretion on problems encountered.

Takes and transcribes dictation by dictating machine, including correspondence, reports or other materials; takes dictation from professional personnel requiring knowledge of special terminology.

Performs related work as required.

##### NATURE OF WORK

This is supervisory clerical work or independent clerical work of comparable responsibility requiring skilled typing.

Employees in this class supervise the work of a moderate sized staff engaged in varied clerical duties of a complex nature or perform independent work of a comparable level of difficulty. Primary responsibilities typically include planning, assigning and reviewing work of a subordinate staff performing clerical duties requiring knowledge of established procedures and regulations for a specific county operation. Some employees in this class serve in a secretarial capacity to an executive where skill in stenography is not essential, requiring considerable knowledge of departmental organization, programs, policies and regulations. Incumbents are frequently required to keep informed on changes in basic laws and related regulations pertaining to the work and to train subordinates accordingly. General supervision is received from an executive or other supervisor who assists with unusual and difficult problems.

##### ILLUSTRATIVE TASKS

Serves as secretary to an executive official; receives, screens and routes incoming mail; receives and answers inquiries of office visitors; composes correspondence from brief oral instruction; compiles data for departmental budget, making arithmetical calculations and typing appropriate supporting documents; immediately supervises and trains a small clerical staff assisting with duties of the executive's office.

Plans, assigns and supervises work of a clerical staff engaged in a large volume of hospital personnel record work, including processing documents for new employees, assembling information for and typing various personnel actions according to current regulations, maintaining detailed position control of budgeted positions, processing separations and related work; rotates employees between various assignments; spot checks completed personnel actions and other work for accuracy; coordinates work with central personnel department.

Plans, assigns and supervises work of a sizeable group of clerk typists engaged in issuing tags and effecting title changes and registrations for vehicles and boats; supervises a small related staff who receive and dispose of inquiries and maintain record files; disposes of complaints from the public; trains seasonal employees in heavy workload periods; prepares required workload reports.

Supervises work of a moderate sized group of subordinate office support specialists responsible for a large volume of hospital timekeeping work for a wide variety of positions; supervises the review of division time cards, current maintenance of time and leave cards, preparation of merit increase schedules and personnel reports such as overtime and service award lists; advises subordinates on new and revised time and leave regulations.

Serves in charge of indexing and recording of official County Commission minutes; reads details of Commission agenda and reports of action recorded in official minutes and condenses for incorporation into index records; codes all items using judgment in assigning type and number of appropriate reference codes; supervises a small clerical staff engaged in typing action items on all appropriate pages of the official index record; replies to a heavy volume and wide variety of inquiries from county departments, the public, Commissioners and their secretaries and others relating to various official Commission action in previous years; obtains reference information for Commissioners during meetings.

Assists the Administrative Officer in a tax assessor activity with a variety of general administrative duties; assembles data for annual budget preparation; initiates requests for supplies, equipment and services; prepares personnel actions and maintains leave records for departmental employees; bills various municipalities and receives payments for deed transfers; supervises clerical assistants as assigned.

Performs related work as required.

### Office Support Specialist 3 (000022)

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the clerical procedures used in office management.

Considerable knowledge of the specific governmental operation to which assigned, including its policies, procedures, organization, work flow, regulations, and recordkeeping.

Considerable knowledge of secretarial procedures including correspondence preparation, filing systems, office machine operation, business English and commercial arithmetic.

Ability to plan, assign and coordinate the work of moderate sized clerical staff in a manner conducive to full performance and high morale.

Ability to develop and maintain cooperative and effective relationships with all individuals contacted.

Ability to use good judgment in the application of various procedures and regulations pertinent to the area of assignment.

Ability to search for and compile data from files and other sources applicable to the topic of concern.

Ability to express ideas clearly and to communicate effectively, orally and in writing.

Ability to operate both manual and electric typewriters at an accurate and rapid rate of speed.

#### NATURE OF WORK

This is advanced secretarial and related clerical work for responsible County officials, administrators and managers.

Employees in this class typically perform advanced secretarial duties for a Section Head official who reports to an exempt Division Director or other exempt executive at the divisional level or above. Work includes utilizing the full range of modern secretarial skills to perform secretarial duties, operation of word processing equipment, micro-computers, typewriters and other office equipment, assigning and reviewing the work of lower-level clerical employees and preparing a variety of reports, forms, requisitions and correspondence. Duties may include taking and transcribing dictation which may involve financial, engineering or other technical terminology. Supervision is received from an administrative official who reviews work for the efficient and effective performance of secretarial duties in support of unit operations.

#### ILLUSTRATIVE TASKS

Performs advanced secretarial duties for a County official or administrator who is located organizationally directly underneath an exempt Division Director; makes appointments and maintains calendar; arranges for conferences and meetings; attends meetings and conferences taking minutes or summary notes.

Opens and distributes mail; maintains control of correspondence flow through section and assures that response deadlines are met; composes correspondence or selects standardized formats; prepares a variety of reports, correspondence, documents, forms and requisitions.

Receives visitors and screens telephone callers; acts as receptionist and answers requests for information involving department, division or section activities and established policies and procedures.

Operates word processing, micro-computer or advanced typewriting equipment to prepare and create report, generate correspondence or other documents, and complete forms, requisitions and other similar standardized records.

Assigns and reviews the work of subordinate clerical employees engaged in typing, filing and other clerical activities; provides advice and assistance as questions arise concerning work tasks and section procedures.

Retrieves and assembles material from files; authorizes expenditures from petty cash funds; requisitions office supplies; performs arithmetic calculations as needed.

Takes and transcribes dictation as required, involving technical or specialized terminology.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of secretarial procedures, methods and techniques.

Knowledge of modern office procedures, practices and equipment.

Knowledge of business English, spelling and arithmetic.

Some knowledge of supervisory principles and practices.

Some knowledge of County organization and operations.

## Stenographic Reporter (000035)

### Minimum Qualifications

High school diploma or GED. Two years of advanced clerical experience are required.

### Job Specifications

#### NATURE OF WORK

This is difficult stenographic work taking and transcribing verbatim notes of hearings and interrogations and in performing related clerical work.

A Stenographic Reporter is responsible for taking and transcribing stenographic notes of verbatim testimony at hearings and interrogations involving two or more participants. Dictation is often taken at high rates of speed and under difficult conditions requiring the application of an unusually high degree of stenographic competence. Duties are performed according to specified procedures and completed transcriptions are examined by a superior for accuracy.

#### ILLUSTRATIVE TASKS

Takes and transcribes verbatim notes of statements, confessions, interviews, court hearings, and conferences; edits and assembles final transcripts.

Takes and transcribes dictation of letters, nolle prosequere reports and recommendations and related matters.

Performs other filing, stenographic and typewriting work as assigned.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of English usage, punctuation, and spelling.

Knowledge of hearing procedures and methods of recording verbatim testimony under difficult conditions.

Knowledge of legal and other technical terminology pertaining to subject matter encountered at hearings.

Knowledge of office practices and methods and standard clerical techniques.

Ability to take technical dictation in verbatim testimony at a high rate of speed for sustained periods of time, and to typewrite accurate and complete transcription of stenographic notes.

Skill in the use of stenotype machines or in the rapid use of shorthand and skill in the operation and care of a typewriter.

Good hearing.

### Nature Of Work

This is difficult stenographic work taking and transcribing verbatim notes of hearings and interrogations and in performing related clerical work.

Must take and pass a typing skills test with a score of 60 words per minute. Photo identification is required to take the typing skills test.

Must take and pass a steno skills test, administered by the Miami-Dade Police Department, with a score of 180 words per minute.

#### Job Specifications

#### Nature Of Work

### Word Processing Operator 2 (grandfathered) (000052)

#### Minimum Qualifications

High school diploma or GED. One year of complex word processing experience is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work in the operation of complex word processing equipment.

Employees in this class operate complex word processing equipment to revise, rearrange and duplicate the contents of a variety of documents. Work involves revising the contents of complex and/or lengthy documents by removing or retrieving typed lines, sentences and paragraphs from one location in a document to another location, merging, duplicating or transferring information from one document to another, and entering, revising and duplicating information for records processing. Emphasis of the work is on the accurate and rapid revision and rearrangement of complex or technical documents by operation of an electronic information processor. Duties may be performed for a specialized departmental activity or in support of a central departmental word processing operation. Work is reviewed by a clerical or administrative supervisor, who provides advice and assistance on unusual problems, for satisfactory volume and quality of processed material and for proficiency in operating word processing equipment.

##### ILLUSTRATIVE TASKS

Receives incoming work and determines priorities of material to be processed; inspects documents for routine errors and arranges material prior to entry; refers procedural questions to supervisor; consults with originator or supervisor on subject matter questions.

Inspects handwritten or rough draft material to determine format, spacing, layout and margins; inquires index to locate previously recorded information stored in memory.

Operates complex word processing equipment and printer to perform complex text assignments such as revising the contents of lengthy documents including leases, deeds, reports, departmental operating manuals, and grant applications; removing or retrieving typed lines, sentences and paragraphs from one location in a document to another location such as in reports, resolutions and correspondence; merging, duplicating or transferring information from one document to another in order to create a new document; inserting or deleting words, phrases, sentences, paragraphs or numerical information with a minimum of retyping and printing out an automatically spaced and paginated finished copy.

Operates complex word processing equipment and printer to enter, revise and duplicate information for records processing such as personnel rosters, inventories, mailing lists, periodic status reports and annual budgets; obtains customized reports from previously established procedures; operates word processor to interface with central computer as assigned.

Merges repetitive letters with address files.

Proofreads and corrects final copy of finished work, returns final processed copy to originator or supervisor.

Maintains files containing memorized information in the form of magnetic disks or other electronic storage media; clears files of information as required.

Maintains records of word processing production.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operating characteristics, commands and capabilities of complex word processing equipment.

### Word Processing Operator 2 (grandfathered) (000052)

Knowledge of general office procedures, practices and equipment.

Knowledge of business English, spelling and arithmetic.

Knowledge of the function of the specific governmental operation to which assigned.

Knowledge of office policies, procedures, filing systems and forms utilized in the area of assignment.

Ability to operate complex word processing equipment with a high degree of speed and accuracy.

Ability to enter, revise, remove, retrieve, duplicate, transfer and perform various other operations with text and file information on complex word processing equipment.

Ability to understand and follow oral and written instructions.

Ability to establish priorities for processing a variety of documents in accordance with departmental procedures.

Ability to determine correct format, spacing and layout of a variety of documents, forms, reports and narrative materials.

Ability to proofread finished work for spelling, format and accuracy.

Skill in the operation of complex word processing equipment.

NEW 10-80

#### **Nature Of Work**

This is advanced clerical work in the operation of complex word processing equipment.

### Word Processing Operator 3 (grandfathered) (000053)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in personal computer application operations and advanced clerical functions are required.

#### Job Specifications

##### NATURE OF WORK

This is responsible clerical work in the performance of varied, complex assignments operating complex word processing equipment.

Employees in this class perform complex text processing and records processing duties utilizing advanced capabilities of word processing equipment. Emphasis of the work is on revising the contents of complex and/or lengthy documents by removing or retrieving typed lines, sentences and paragraphs from one location in a document to another location, merging, duplicating or transferring information from one document to another, and performing complex operations to qualify and re-qualify a variety of information records in several different ways to produce a variety of listings or specialized data. Incumbents exercise some independent judgment in designing and constructing record files to produce specialized information. Some incumbents may be responsible for supervising moderately complex departmental word processing operations under the direction of an administrative superior, including frequent consultations with originators of word processing assignments, and providing training and assistance to other word processing operators. Work is reviewed by a clerical or administrative supervisor for satisfactory volume and quality of processed material and for proficiency in operating word processing equipment.

##### ILLUSTRATIVE TASKS

Receives incoming work and determines priorities of material to be processed; inspects documents for routine errors and arranges material prior to entry; refers procedural questions to supervisor; consults with originator on subject-matter questions.

Inspects handwritten or rough draft material to determine format, spacing, layout and margins; inquires index to locate previously recorded information stored in memory.

From specific or general instructions of originator or supervisor, determines layout of information; designs and constructs record files, charts, tables and formats; reformats existing files; consults with originator to determine purpose of word processing requests and best method to accomplish desired results.

Operates complex word processing equipment and printer to perform complex text and record processing assignments such as revising the contents of lengthy documents including leases, deeds, reports, departmental operating manuals and grant applications; removing or retrieving typed lines, sentences and paragraphs from one location in a document to another location; merging, duplicating or transferring information from one document to another in order to create a new document; inserting or deleting words, phrases, sentences, paragraphs or numerical information with a minimum of retyping and printing out an automatically spaced and paginated finished copy, entering revising, deleting, and duplicating information for records processing such as personnel rosters, inventories, mailing lists, periodic status reports and annual budgets.

Performs complex operations to qualify and re-qualify a variety of listings or specialized data such as an inventory listing to produce a report of parts in stock having a quantity less than 50 and print in sequence by part numbers; also performs operations to sequence information from information stored in memory to produce various specialized printouts of qualified information.

Merges repetitive letters with address files; operates word processor to interface with central computer as assigned.

Coordinates a departmental word processing operation under direction of an administrative superior; assigns and reviews work of subordinate word processing operators and trains new operators in word processing techniques and procedures as assigned.

Prepares and updates word processing procedures and procedural manuals.

Proofreads and corrects final copy of finished work; returns final processed copy to originator or supervisor.

### Word Processing Operator 3 (grandfathered) (000053)

Maintains files containing memorized information in the form of magnetic disks or other electronic storage media; clears files of information as required.

Maintains records of word processing production.

Enforces and adheres to established procedures for security of electronically stored information.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operating characteristics, commands and capabilities of complex word processing equipment.

Considerable knowledge of the application of word processing capabilities to departmental requirements for various information processing tasks.

Knowledge of various formats and procedures utilized in the word processing operation to which assigned.

Knowledge of general office procedures, practices and equipment.

Knowledge of business English, spelling and arithmetic.

Knowledge of the function of the specific governmental operation to which assigned.

Some knowledge of supervisory principles and practices.

Ability to operate complex word processing equipment with a high degree of speed and accuracy.

Ability to design and construct a variety of complex electronically stored files.

Ability to enter, revise, merge, remove, retrieve, duplicate, transfer and perform various other operations with text and file information on complex word processing equipment.

Ability to qualify and re-qualify a variety of listings or specialized data to produce customized reports.

Ability to supervise a small group of subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, supervisors and departmental officials.

Ability to establish priorities for processing a variety of documents in accordance with departmental procedures.

Ability to proofread finished work for spelling, format and accuracy.

Skill in the operation of complex word processing equipment.

#### **Job Specifications**

#### **Nature Of Work**

This is supervisory clerical work involving some administrative responsibility in the management of diversified clerical operations of a major organizational unit.

### Micrographics Technician 1 (000075)

#### Minimum Qualifications

High school diploma or GED. Six months of experience operating microfilm equipment and processing film are required.

#### Job Specifications

##### MICROGRAPHICS TECHNICIAN 1

#### NATURE OF WORK

This is limited technical work in the operation of rotary and planetary microfilm cameras, microfilm readers, film processors and related micrographic equipment.

Employees in this class are responsible for photographing various legal documents for record retention. Work involves the preparation of materials to be photographed and the adjustment of the equipment to appropriate settings. Supervision and assistance are received from a technical or administrative superior who periodically checks completed work for legibility of the finished product, adherence to established procedures and the completion of assigned work load.

#### ILLUSTRATIVE TASKS

Operates automatic rotary and planetary microfilm cameras with fixed or adjustable photographic fields for the reproduction of documents and records; loads and unloads camera film; adjusts and makes minor repairs to microfilm equipment; completes appropriate certificates in the course of filming for authentication of filmed documents.

Operates and threads an automatic film processing machine; operates a microfilm reader to verify all photographic reproductions with official records for completeness and legibility of the finished product; supplies record information to departmental personnel by use of a microfilm reader; maintains daily records of microfilming and processing including statistics of daily work output.

Develops microfilm with film processors; mixes chemicals; adjusts water filters and temperature controls; rinses and drains machines; makes minor adjustments to processors.

Prepares legal instruments and records to be copied by removing staples, ironing out wrinkles, repairing torn pages and by inspecting numbering, legal stamps and smudgings.

Makes certified copies of such documents as military discharges, deeds, mortgages, marriage certificates and official court records.

Confers with departmental personnel via telephone on nontechnical microfilming requirements and storage needs.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of microfilm, film processing and photostatic techniques and procedures.

Knowledge of the operating principles and maintenance needs of microfilm machines, readers, film processors and related photocopy equipment.

0075

##### MICROGRAPHICS TECHNICIAN 1 (Cont'd)

#### KNOWLEDGES, ABILITIES AND SKILLS (Cont'd)

Knowledge of developing solutions and techniques used in microfilm, photo-chemical and photostatic reproduction processes.

Some knowledge of various types of governmental records reproduced in a records management program.

Ability to maintain assigned production standards and work flow.

Ability to understand and follow verbal and written instructions.

Ability to make minor adjustments to microfilm equipment and to recognize malfunctions.

Ability to do routine clerical work including filing and records retrieval.

Skill in the operation of basic microfilm equipment.

### Micrographics Technician 1 (000075)

#### MINIMUM QUALIFICATIONS

Some experience in the operation of photostatic and microfilm equipment; graduation from a standard high school or vocational school.

REV 10-78

#### **Nature Of Work**

This is limited technical work in the operation of rotary and planetary microfilm cameras, microfilm readers, film processors and related micrographic equipment.

### Micrographics Technician 2 (000076)

#### Minimum Qualifications

High school. One year of experience operating microfilm equipment and processing film is required.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the operation of advanced rotary and planetary cameras, microfilm duplicators, readers, film processors and related micrographic equipment.

Employees in this class perform micrographic work requiring the use of specialized equipment and techniques in the reproduction of official records and legal instruments. Duties require the operation of adjustable cameras, duplicators, densitometers, splicers and other microfilm equipment. This class is distinguished from that of the Micrographic Technician 1 in that employees operate a variety of microfilm equipment including numerous types of planetary and rotary cameras, make copies of original film using a microfilm duplicator and splice microfilm. Supervision may be exercised over equipment operators and supporting clerical staff by assignment of work, periodic review of work in progress and occasional verification of finished copies for quality. Work is reviewed by an administrative superior for satisfactory completion of production schedules and compliance with departmental policy.

##### ILLUSTRATIVE TASKS

Operates a variety of rotary and planetary microfilm cameras; adjusts for photographic areas, reduction ratios and settings; inspects documents and records to be copied for wrinkles, smudgings, rips and legal stamps; operates readers and reader printers to verify microfilm copy with official records for completeness and legibility.

Develops microfilm with film processors; mixes chemicals; adjusts water filters and temperature controls; rinses and drains machines; makes minor adjustments to processors.

Splices microfilm where it is necessary to insert missing frames or delete duplicates; makes copies of original film using a microfilm duplicator and operates advanced photo duplicating equipment.

Researches questions concerning filmed documents and makes copies using reader/printer equipment.

Insures that finished microfilm reels are properly labeled for retrieval of documents.

Determines density of microfilm with a densitometer to control film quality.

Recommends the servicing, repair and replacement of equipment and changes in reproduction methods and techniques.

Coordinates reproduction schedules with other departments requesting service; informs supervisor on scheduling, indexing, filing and ordering necessary supplies.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of microfilm, film processing and photostatic techniques and procedures.

Considerable knowledge of the operating principles and maintenance needs of microfilm machines, readers, duplicators, film processors, and related photo duplicating equipment.

Knowledge of developing solutions and techniques used in microfilm photo-chemical and photostatic reproduction processes.

Knowledge of various types of governmental records reproduced in a records management program.

### Micrographics Technician 2 (000076)

Ability to determine the filming characteristics of a variety of records and legal instruments.

Ability to assign and review work of subordinates, as delegated.

Ability to maintain assigned production standards and schedules.

Ability to make minor adjustments to reproduction equipment and to recognize malfunctions immediately.

Skill in the operation of basic microfilm equipment.

REV 10-78

#### **Nature Of Work**

This is technical work in the operation of advanced rotary and planetary cameras, microfilm duplicators, readers, film processors and related micrographic equipment.

### Micrographics Supervisor (000077)

#### Minimum Qualifications

High school. Three years of experience operating microfilm, photo-chemical, and photostatic equipment are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory and skilled work in the operation of micrographic equipment for the purpose of recording and retrieving legal documents and records in the county courts.

Employees in this class coordinate micrographic work requiring specialized equipment and techniques in the reproduction of official records and legal instruments. Duties involve the supervision of a group of technical employees who perform micrographic duties utilizing microfilm cameras, microfilm readers, microfilm printers, "copy flo's", photostatic machines, densitometers, microfilm developers, document duplicators, electric retrieval devices, and other micrographic equipment. Responsibilities require the exercise of independent judgment on technical matters pertaining to the preparation and miniaturization of documents and the operation and maintenance of related equipment. Supervision is exercised over subordinate personnel by assignment of work, designation of equipment to be operated, review of work in progress, and verification of finished copies for quality. Work is reviewed by an administrative superior for timely completion of work schedules and micrographic service efficiency.

##### ILLUSTRATIVE TASKS

Supervises and participates in the operation of microfilm cameras, readers, printers, and film processors; establishes and implements operating procedures for equipment, recording, processor and recall systems.

Determines method of reproduction; schedules work flow.

Plans and develops new cooperative programs and special microfilm projects with departments; coordinates reproduction schedules with departments requesting service; advises on equipment requirements and related records management matters.

Calculates job costs for various types of reproduction techniques, materials and quantities.

Approves all processes for general compliance with policies, procedures, rules and statutes.

Supervise;s the cleaning, oiling and adjusting of micrographic equipment; recommends the servicing, repair and replacement of equipment; repairs and maintains microfilm equipment; recommends equipment requirements and related records management procedures.

Trains subordinates in the proper utilization of duplicating equipment.

Maintains responsibility for all technical matters pertaining to the field of micrographics.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of microfilm recording, reproduction and retrieval techniques.

Thorough knowledge of the operating principles and maintenance needs of microfilm machines, readers, duplicators, film processors and related photo duplicating equipment.

Considerable knowledge of developing solutions and techniques used in microfilm, photochemical and photostatic reproduction processes.

Considerable knowledge of various types of governmental records reproduced in a records management program.

### Micrographics Supervisor (000077)

Ability to plan, assign and supervise subordinates in a manner conducive to full performance and high morale.

Ability to determine the filming characteristics of a variety of records and legal instruments.

Ability to plan, schedule and organize work to meet fluctuations in work load.

Ability to maintain records and to prepare reports.

Ability to make minor maintenance repairs on equipment used.

Skill in the operation of micrographic equipment.

REV 10-74

#### **Nature Of Work**

This is supervisory and skilled work in the operation of micrographic equipment for the purpose of recording and retrieving legal documents and records in the county courts.

### CADD Technician (000078)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in Computer Science, Cartography, Geography or related field. Additional related experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is entry level technical computer programming, systems analysis, or operating systems programming work.

Employees in this new classification will be responsible for performing a myriad of functions in various platform environments, to include writing code, testing, debugging, writing documentation or performing work for new or existing information systems, assisting with the analysis of recommendations submitted by departments concerning proposed automated systems, assisting with the maintenance and modification of existing applications, and with writing system proposals, assisting with diagnosing and resolving software and hardware problems, and defining users and security levels. Incumbents will be working under the close supervision of an information technology professional.

##### ILLUSTRATIVE TASKS

Designs program logic and code using approved programming languages; creates program code for reporting requirements; participates in the analysis and development of new computer systems; assists in preparing database logical designs; assists in preparing program and system test data to validate programs and systems.

Assists with resolving various hardware and software problems; troubleshoots hardware malfunctions and provides appropriate solutions; designs and creates statistical or graphical applications according to departmental needs; prepares programming status reports; maintains hardware inventory.

Participates in the preliminary analysis of small scale projects; assists in determining the need for information, type of information required, probable cost and preparation of preliminary systems proposals; assists in identifying and correcting errors in program documentation; assists with the installation of new hardware and software and customizing configuring components to the needs of the user and department; conducts problem resolution with users.

Assists in troubleshooting the upgrade and maintenance of local area networks, including hardware/software problems; assists in setting-up users, directories and security systems configuration documentation; maintains system data security tables; assists in analyzing hardware systems to ensure peak performance.

Performs related work as required.

##### MINIMUM QUALIFICATIONS

Completion of 60 semester credits to include 15 semester credits in a computer, cartography, or geography related field is required. Additional related experience may substitute for the required education on a year-for-year basis.

NEW 10/01

### Telephone Console Operator 1 (000084)

#### Minimum Qualifications

High school diploma or GED. Three months of experience in telephone console or switchboard operations or completion of a training program in switchboard or telephone console operations are required.

#### Job Specifications

##### NATURE OF WORK

This is routine work in the operation of a private branch exchange telephone switchboard.

Employees in this class do routine and repetitive work in the operation of a large private branch exchange cord switchboard carrying a heavy traffic load. Work primarily requires alertness and accuracy in placing, answering and transferring calls. Operators must also remember names and location of personnel in the department and be generally familiar with departmental routines. Employees work under general supervision, occasionally of a superior operator, and refer problems to the supervisor.

##### ILLUSTRATIVE TASKS

Operates on an assigned shift, a private branch exchange switchboard having a large number of trunk lines and numerous extensions.

Answers all incoming local and long distance calls and makes proper connection to person requested; places local and long distance outgoing calls; places interoffice calls.

Answers routine and non-technical questions and refers other questions to proper persons.

May keep records of long distance and collect calls, telegrams received, and messages which cannot be delivered at once.

Occasionally does related receptionist work, directing people to proper offices and giving routine information.

Does simple clerical work such as filing, posting simple data, and taking inventories.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operation of standard PBX switchboard with several trunks and numerous extensions.

Ability to speak clearly and distinctly in a well modulated and pleasant voice, and to use correct grammatical construction and choice of words.

Ability to remember accurately, within a reasonable training period, the names and locations of personnel in the organization served, and to understand essential departmental operations.

Ability to react quickly and calmly in placing and receiving calls of an emergency nature.

Ability to operate a large switchboard under conditions of heavy load calmly and efficiently.

Ability to keep simple records accurately.

Ability to understand and follow oral and written instructions.

#### Minimum Qualifications

High school diploma or GED. One year of clerical experience in tax assessment, property appraisal, real estate sales, or abstracting titles to include experience with complex legal descriptions is required. Completion of 30 semester credits in Real Estate and/or Appraisal related coursework may substitute for the required experience.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical, technical and public contact work processing and maintaining the property assessment roll for the Property Appraisal Department.

Employees in this class perform a variety of detailed clerical and computer graphic work involving the use of maps, surveys, aerial photographs and subdivision plats. Emphasis of the work is on reading and interpreting complex legal descriptions and accessing and accurately updating the GIS layers to reflect changes in real property legal descriptions, property assessments, waiver of plats, new subdivision plats, municipal zoning and resolution of GIS overlay. Supervision is received from an administrative superior who reviews work for technical accuracy and conformance to established procedures and regulations.

##### ILLUSTRATIVE TASKS

Prepare and process realty changes and collectors cutouts for separations and groups, right-of-way takings, dedications, street and/or alley closings, new subdivisions' plat, waiver of plats and annexations; maintain and process resolutions/ordinance received from the county and other municipalities; access and update the GIS property layers to accurately reflect changes.

Calculate tax pro-rations involving court cases from the County Attorney's Office and other government agencies' takings and acquisitions such as Everglades National Park, Corps of Engineers, and South Florida Water Management.

Prepare and process exempt government deeds, corrections of tax roll errors-in-fact, delinquent cutouts and property separations requested by the Tax Collector.

Review and take appropriate action on deeds and correspondence received from various outside sources requesting separations and groupings of real property; confer with attorneys and surveyors when discrepancies in legal description and/or chain of title appear; prepare realty change and access and update the GIS property layer to reflect the requested separation or grouping.

Use GIS parcel base map maintenance applications to plot complex metes and bounds to describe a parcel using coordinated geometry (COGO); create, cancel or re-activate folio numbers to update parcel polygons; add or delete annotations, such as lot/block numbers, dimensions and acreage for all parcels over one acre.

Review complex deeds to determine if deed is a straight or fee interest transfer or requires a separation or grouping of the legal description; notifies the district lead worker of type of action required and prepares appropriate realty change documents required to reflect correction of legal description and ownership of parcel on assessment roll and update GIS layers to reflect the change.

Assist various county departments, agencies, attorneys, developers and the public as required; compile necessary records for review with taxpayers and attorneys or agents; request field check through districts as required establishing location and condition of existing buildings; explain established legal provisions and department procedures as necessary, referring questionable problems to supervisor.

Maintain records and compiles necessary data.

Perform other related work as required.

##### NATURE OF WORK

This is specialized technical work in the appraisal of all types of property for Ad Valorem taxation.

Employees in this class are responsible for applying cost, market and income approaches to estimate the value of various kinds of real estate for purposes of Ad Valorem taxation. Duties include compiling necessary records, inspecting property, analyzing sales data, explaining assessment criteria to property owners and calculating real estate values using appropriate data. Work is performed in accordance with generally accepted appraisal methods and techniques, departmental procedures and legal requirements governing tax assessment. Supervision is received from a technical superior who reviews work after completion for accuracy and thoroughness and for effective application of appraisal methods and techniques.

##### ILLUSTRATIVE TASKS

Compiles all records necessary for field appraisals including zoning classification, legislative resolutions, variances, deed restrictions, special permits and folios.

Inspects properties for physical characteristics, area development, accessibility, population trends, transportation, schools, community facilities, and compliance with zoning and other regulations.

Compiles sales data from local government records, title and abstract sources, newspaper reports and real estate listings; determines sales price and equalizes data by comparison with similar transactions.

Analyzes the allocation of sale prices between real estate and personal property.

Derives land and building rates to appropriately reflect market value.

Analyzes special-types market transactions necessitating investigation as to grantor-grantee relationship and type of financing.

Explains assessment criteria to property owners and answers questions relative to property values and appraisal techniques prescribed by state statutes.

Draws buildings to scale on property cards indicating value and depreciation of component parts.

Calculates building values by using applicable data and techniques.

Prepares for and attends Property Appraisal Adjustment Board hearings to explain techniques and criteria used in estimating value.

Performs various duties related to completion of the annual tax roll.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

### Real Estate Evaluator 1 (000110)

Knowledge of real estate appraisal methods and techniques.

Knowledge of the Statutes and Ordinances governing tax assessment of real property.

Knowledge of general land values and land use characteristics of the Dade County Metropolitan area.

Knowledge of the general methods, products and workmanship typically used in residential and commercial construction.

Knowledge of legal descriptions, metes and bounds, and related means of locating property in an atlas.

Ability to understand the relationship between real estate and personal property.

Ability to use various approaches to estimate the value of real estate for Ad Valorem taxation.

Ability to make rapid and accurate mathematical calculations.

Ability to perform simple drafting tasks with clarity.

Ability to tactfully answer questions and provide information to the public.

Ability to perform assignments in the field with a minimum of supervision in all types of neighborhoods.

#### Minimum Qualifications

Bachelor's degree in Business Administration, Real Estate, Accounting, Finance or related field; or a high school diploma or GED and one year of experience as a Real Estate Evaluator 1 with Miami-Dade County; or a high school diploma or GED and a Florida Certified Residential Appraiser License.

#### Job Specifications

##### NATURE OF WORK

This is advanced specialized technical work with some supervisory responsibility in the appraisal of all types of property for Ad Valorem taxation.

Employees in this class are responsible for applying cost, market and income approaches to complex appraisal problems to estimate the value of various kinds of Real Estate for purposes of Ad Valorem taxation. Duties include compiling necessary records, inspecting property, analyzing sales data, explaining assessment criteria to property owners and calculating real estate values using appropriate data. Additional responsibilities include reviewing the work of subordinate evaluators and conducting appraisals of large structures used for various purposes. Responsibility differs from that of the next lower class in that more difficult appraisals are independently performed and incumbents have some supervisory responsibility. Work is performed in accordance with generally accepted appraisal methods and techniques, departmental procedures and legal requirements governing tax assessment. Supervision is exercised over subordinate evaluators through a review of daily work. Supervision is received from an administrative and technical superior who reviews work for the effective application of appraisal methods and techniques to complex appraisal problems.

##### ILLUSTRATIVE TASKS

Review daily work with subordinate evaluators, checks accuracy of computations and examines data collected in the field.

Conducts appraisals of large hotels, office buildings, industrial plants, and similar structures by determining architectural characteristics, size, age of building, mechanical equipment provided, design, type and cost of materials, electrical and plumbing features, depreciation and replacement.

Compiles all records necessary for field appraisals including zoning classification, legislative resolutions, variances, deed restrictions, special permits and folios.

Inspects properties for physical characteristics, area development, accessibility, population trends, transportation, schools, community facilities, and compliance with zoning and other regulations.

Analyzes the allocation of sale prices between real estate and personal property.

Derives land and building rates to appropriately reflect market value.

Analyzes special-type market transactions necessitating investigation as to grantor-grantee relationship and type of financing.

Explains assessment criteria to property owners and answers questions relative to property values and appraisal techniques prescribed by State Statutes.

Draws building outline to scale on property card, indicating fractional value percentage for prescribed structural variations; applies construction material costs from standard data; computes cost and square footage proration using predetermined information; computes assessment.

Prepares reports on property sales, values and economic trends affecting assessments.

Prepares for and attends Property Appraisal Adjustment Board hearings to explain techniques and criteria used in estimating value.

### Real Estate Evaluator 2 (000111)

Performs various duties related to completion of the annual tax roll.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of real estate appraisal methods and techniques.

Considerable knowledge of the statutes and ordinances governing tax assessment of real property.

Knowledge of general land values and land use characteristics of the Dade County Metropolitan area.

Knowledge of the general methods, products and workmanship typically used in residential and commercial construction.

Knowledge of legal descriptions, metes and bounds, and related means of locating property in an atlas.

Some knowledge of supervisory principles and practices.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to understand the relations between real estate and personal property.

Ability to use various approaches to estimate the value of real estate for Ad Valorem taxation.

Ability to determine the accessibility and value of leasehold improvements.

Ability to make rapid and accurate mathematical calculations.

Ability to perform simple drafting tasks with clarity.

Ability to tactfully answers questions and provide information to the public.

Ability to perform simple drafting tasks with clarity.

Ability to perform assignments in the field with a minimum of supervision in all types of neighborhoods.

##### NATURE OF WORK

This is advanced responsible secretarial and related clerical work for a division head or an exempt executive official in the County service.

Employees in this class perform a variety of complex secretarial and clerical duties for division directors or other comparable executive officials within the County organization. Emphasis of the work is on the performance of advanced secretarial duties requiring considerable knowledge of the executive's responsibilities and an understanding of the policies, programs, procedures and regulations in effect in the area of assignment. Duties typically include arranging for and attending conferences, independently answering inquiries where there is established policy or precedent action, taking and transcribing dictation, composing and typing correspondence and performing research to compile data for special reports and other purposes. Incumbents utilize a variety of office skills and considerable judgment in relieving the executive of administrative details. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work for accomplishment of desired objectives. General supervision is received from a division director or an executive official who reviews work for satisfactory performance of executive secretarial duties and for attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Performs secretarial and clerical duties for a division director or other comparable executive official; commits supervisor's time in making appointments and maintains calendar; maintains supervisor's itinerary and makes travel and hotel arrangements as required.

Arranges for and attends various conferences and meetings; informs participants and provides background information; serves as recording secretary at conferences, board meetings and staff consultations; takes official minutes and prepares reports of proceedings; follows through on actions required as a result of conferences.

Takes and transcribes dictation which may vary by subject matter including legal, technical, financial or other specialized terminology; takes verbatim transcript from telephone calls or in conferences as requested.

Opens, screens and distributes mail; marks important parts of instructions, orders and regulations for executive, and organizes mail according to priorities; maintains control of correspondence flow through office; insures that report deadlines are met and that all information distributed is complete.

Composes correspondence from verbal instructions of superior, and independently drafts replies to inquiries; reviews correspondence prepared by others for superior's signature to ensure correct grammar, format and completeness.

Receives and screens telephone calls and visitors; responds to requests for information by answering questions where there are established policies or regulations, or precedent actions taken by supervisor.

Plans, assigns and reviews the work of subordinate clerical employees engaged in typing reports, correspondence and other documents, filing, and performing a variety of other clerical duties; provides training in procedures and methods in the organization of assignment.

Researches and compiles data from a variety of sources in connection with special reports, budget preparation and other matters; assembles material for supervisor's reply to correspondence demanding superior's personal attention.

Keeps various activity and production records; types various activity reports, requisitions, work orders and personnel forms; composes reports on caseloads, workloads or other subjects as delegated; authorizes expenditures from petty cash; requisitions office supplies; performs arithmetic calculations for budget requests and other matters.

### PA Administrative Secretary (000113)

Establishes and maintains office filing systems; reorganizes files as required; establishes subject matter files for superior; purges files of unnecessary items according to established policies and procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of executive secretarial methods, techniques and procedures.

Thorough knowledge of general office procedures, practices and equipment.

Considerable knowledge of the operation to which assigned including its policies, procedures, regulations, organization and workflow.

Considerable knowledge of executive protocol and the proper order of etiquette in conducting secretarial activities with responsible county and other officials.

Considerable knowledge of business English, spelling and arithmetic.

Considerable knowledge of the structure and function of various county departments.

Knowledge of supervisory principles and practices.

Ability to establish and maintain an effective working secretarial relationships with an executive official.

Ability to take and transcribe dictation at a high rate of speed.

Ability to operate typewriters, personal computers and other office machines with accuracy and speed.

Ability to develop and maintain effective working relationships with subordinates, superiors and a variety of county and other officials.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to establish and revise office policies and procedures.

Ability to research and develop information from a variety of sources.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

##### NATURE OF WORK

This is advanced specialized work in the appraisal of tangible personal property for tax assessment purposes.

Employees in this class are responsible for conducting field appraisals of the larger and more specialized commercial establishments, assisting in tax litigation cases and supervising subordinate evaluators in difficult assignments. Work involves the coordination of field evaluators and office clerical staff, carrying out administrative directives on assessment and assisting a superior with the office procedures required in producing a personal property tax roll. Positions allocated to this class differ from the Personal Property Evaluator 1 level in that complex field appraisals are performed independently or responsible supervisory office tasks are required. Duties require the use of tact and independent judgment in conducting discussions with business representatives and in evaluating difficult commercial properties requiring specialized knowledge of furnishings, fixtures and inventory types. Supervision is exercised over subordinate evaluators by assignment and review of work and by providing assistance in difficult or unusual field appraisals. Supervision is received from an assessment administrative superior who reviews work for general effectiveness by review of appraisal data, analysis of operating reports and satisfactory completion of field schedules.

##### ILLUSTRATIVE TASKS

Evaluates the larger and more specialized types of commercial enterprises such as luxury type hotels, cooperative apartment houses, regional shopping centers, manufacturing plants, heavy equipment users, electronics equipment producers and similar business organizations; assists subordinate evaluators in difficult appraisals.

Reviews assessment appeals, compiles necessary records, request field rechecks of property and provides data for Board of Equalization hearings.

Supervises and coordinates the work of the clerical staff in maintaining commercial personal property, assessment records; approves changes to the tax roll, verifies data and investigates discrepancies.

Discusses tax evaluation information with business owners, managers, attorneys, accountants and similar individuals; explains assessment criteria, statutory requirements and the various inventory appraisal formulas and discount schedules.

Assists the Sheriff's Office in foreclosures on personal property tax levies; computes delinquent tax and accrued interest due.

Assists administrative superiors in such areas as selection, training and assignment of staff, methods and procedures studies, forms improvement and similar functions of office management.

Replies to written correspondence and personal inquiries received in the department and presents detailed information in report form as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

##### NATURE OF WORK

This is technical work assisting in handling legal actions for the Property Appraiser.

An employee in this class is responsible for assisting in the preparation of files for litigation for cases filed by the County Attorney or filed against the Property Appraiser by taxpayers. Responsibilities include assembling case files for litigation, providing data for discovery and interrogatories, producing documents for litigants, assisting in preparation of settlement discussions, and reviewing documents for settlement. The incumbent exercises some independent judgment in the application of property appraisal knowledges and techniques to cases involving property appraisal disputes. Supervision is received from an administrative superior who reviews work through personal conferences for effective assistance in preparation of files for litigation and performance of related duties.

##### ILLUSTRATIVE TASKS

Assists in preparing and assembling files for the Property Appraiser and County Attorney on court cases filed by taxpayers against the Property Appraiser and on court cases filed by the Property Appraiser against taxpayers.

Provides responses to complex discovery questions including answering interrogatory requests for production and admissions submitted to the Property Appraiser by the opposing attorney.

Produces documents to opposing attorneys; reviews subject property and selects appropriate documents, files and books.

Assists in the preparation of interrogatories.

Assists in the preparation of settlement discussions.

Reviews documents and proposals submitted by the taxpayer for settlement purposes.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of statutes, ordinances, court rulings and other regulations pertaining to the appraisal of personal property for Ad Valorem taxation.

Considerable knowledge of appraisal methods and techniques used in the assessment of real, tangible and intangible personal property and land for the purposes of tax assessment.

Knowledge of legal procedures related to litigation filed by taxpayers against the Property Appraiser or by the Property Appraiser against taxpayers.

Knowledge of legal descriptions, deeds, contracts and closing statements, pertaining to the purchase and sale of real estate, and related documents used for property appraisal purposes.

Knowledge of public relations principles and techniques.

Ability to provide assistance in the handling of legal actions for the Property Appraiser.

## Human Resources Department

##### NATURE OF WORK

This is advanced technical and supervisory work in planning work activities of a specialized section in the Property Appraisal Department.

Employees in this class are responsible for planning, assigning and reviewing the work of technical and clerical subordinates engaged in varied activities for purposes of estimating the value of real property for Ad Valorem taxation. Responsibilities include planning and scheduling field and office work to meet deadlines, monitoring work progress, assisting subordinates with work-related problems, responding to taxpayer correspondence and telephone calls, performing research and analyzing assessments, and preparing cases for and attending Value Adjustment Board hearings. Some incumbents may be assigned to specialized combinations of responsibilities with emphasis in data processing operations, litigation preparation, or other areas. Independent judgment is exercised in the application of property appraisal methods and techniques, in dealing tactfully with taxpayers, and in ensuring the efficient operation of the unit. Supervision is exercised over a staff of technical and clerical employees engaged in real property assessment activities or in various support capacities. Supervision is received from a technical and administrative superior who reviews work for achievement of unit goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate property appraisal evaluators, specialists and clerks; plans and schedules field and office assignments; conducts meetings to explain instructions and discuss changes; trains employees in methods and procedures, and assists with difficult and unusual problems; prepares regular reports on work progress.

Responds to taxpayer correspondence and telephone calls; interviews taxpayers and agents to explain assessments; conducts research on claims for adjustments and for defense of assessed values.

Supervises subordinates engaged in formulating assessments for income-producing properties, preparing for Value Adjustment Board hearings, verifying and analyzing real estate sales transactions for the commercial sales database, and performing surveys and analyses involving ratio studies related to income and expenses for various property types.

Reviews staff recommendations and negotiates settlements with taxpayers and agents, in lieu of Value Adjustment Board hearings or litigation; explains methods and procedures used and regulations related to assessments.

Assists in preparing cases for litigation; reviews special master's reductions; conducts research to assist case and produce required documents; reviews cases for possible settlement, attends Value Adjustment Board meetings, calculates settlement figures including taxes interest and penalties; assists County Attorney's Office as required.

Coordinates work with other sections of the Property Appraisal Department.

Keeps informed on changes in regulations related to assessments, conditions in the real estate market, and the economy.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

### Property Appraiser (000156)

- b. Preparation of real and personal property tax rolls.
  - c. Delivery of real and personal property tax rolls to the Department of Revenue and taxing authorities within Miami-Dade County;
  - d. Certification of value to all taxing authorities for purposes of preparation of budget[s] and adoption of millage[s].
  - e. Mailing of TRIM ("Truth and Responsibility in Millage") notices to all property owners in Miami-Dade County under the mark, brand or seal of the Property Appraiser of Miami-Dade County.
  - f. Certification of the assessment rolls to the Tax Collector.
  - g. Completion of any pending or unfinished tasks or duties that were originally begun or undertaken by the Miami-Dade County Property Appraisal Department or the predecessor Property Appraiser.
- (2) The Property Appraiser may sue and be sued in his or her name and official capacity in cases involving assessment challenges or related issues. Any suit by or against the Property Appraiser may be settled or compromised by the Property Appraiser and the County Attorney or their designees, if the Property Appraiser and County Attorney determine that said settlement or compromise is in the best interests of Miami-Dade County after considering the legal liability, potential litigation expenses, potential financial exposure of the County and the precedential effect of such litigation. The settlement of all such litigation shall be reported quarterly to the County Commission.
- (3) The Property Appraiser, upon request of the Mayor and/or the County Manager, shall provide the proposed budget for purposes of preparing the budget for the Office which will be considered by the Board of County Commissioners in its adoption of the County's annual budget.
- (4) The Property Appraiser may enter into interdepartmental agreements with other County departments as may be necessary to carry out the purposes and provisions of this ordinance.
- (5) The Property Appraiser may enter into agreements with third parties, subject to approval by the Board of County Commissioners.
- (6) The Property Appraiser may submit proposed resolutions, ordinances or reports related to his or her duties to the Clerk of the Board of County Commissioners and such items shall be placed on the next available agenda of the Board of County Commissioners.
- (7) The Property Appraiser may become associated with The Florida Association of Property Appraisers; The Property Appraisers' Association of Florida and/or such other organizations dedicated to supporting and advocating on behalf of Property Appraisers in the State of Florida.
- (8) The Property Appraiser may perform any other lawful acts which the Property Appraiser may consider necessary or desirable in carrying out the purposes and provisions of this ordinance.

#### **Nature Of Work**

This is advanced responsible administrative and supervisory work in developing Requests for Proposals, Requests for Qualifications and Requests for Information in the central procurement operation of the County.

## Human Resources Department

### Director, Purchasing Division/Competition Advocate (000195)

#### Minimum Qualifications

Bachelor's degree. A minimum of four to eight years of professional or administrative experience in the procurement of goods and services, development of contractual specifications, contract award and management to include procurement negotiations and supervisory experience are required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible and professional level work directing and administering activities within the Strategic Acquisition Planning Division of the Department of Procurement Management.

An employee in this class is responsible for promoting the use of full and open competition in the award of County-wide contracts and challenging procedures that may be impeding the competitive procurement process. Emphasis of the work include directing operational activities involving the development and implementation of performance based contract specifications, determination of appropriate acquisition methods based on product analysis and industry market research, competitive sourcing and supervising and/or personally conducting negotiations with vendors under the County's most sensitive or complex purchases. Supervision is exercised through subordinate managers and supervisors over a staff of professional, technical and clerical subordinates assigned to divisional activities. Direction is received from the Department Director and the Deputy Director who review work through personal conferences and various reports and hold the incumbent responsible for efficient and effective management of divisional operations and attainment of goals and objectives.

##### ILLUSTRATIVE TASKS

Directs and supervises the work of professional, technical and clerical employees through subordinate managers and supervisors the development and implementation of nonrestrictive advanced acquisition planning, the Request for Proposal/Request for Qualification procurement process and the formulation of terms and conditions.

Approves County and service contract processes to include Request for Qualifications, Request for Proposals and the amendment/supplemental agreements process.

Confers regularly with the DPM Director and Deputy Director, County Manager's Office staff and County departments' procurement professional and managerial staff.

Provides County departments with technical assistance, which includes conducting proposal conferences, selection committee meetings, and the evaluation of proposals, in addition to assisting in developing negotiation strategies for the procurement of negotiated commercial and non-commercial contracts and agreements.

Develops procedures for the Department of Procurement Management's Strategic Acquisition Planning Division's procurement activities to include performance standards for optimal quality assurance, automated measurement tracking systems, and effective acquisition strategies.

Develops and implements policies and procedures pertaining to Request for Proposal and Request for Qualification and related procurement, and as required by legislative mandate.

Establishes ethical business procurement practices through the investigation of complaints from vendors, competitors and other entities concerning barriers to full and open competition.

Interacts on behalf of the DPM Director with County Commissioners, the County Manager's Office, the County Attorney's office, vendors on issues and initiatives to increase full and open competition and small and minority business participation in the solicitation and award of County contracts.

Consults, responds and advises County's Senior Managers, County Attorney's Office and elected officials on issues and policies that affect the Strategic Acquisition Planning Division's operations. Coordinates the preparation of legislation designed to strengthen the use of full and open competition to include the writing of amendments and administrative orders.

Makes decisions and recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime, reviews performance reports prepared by subordinates and rates employee's performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

## Human Resources Department

---

### Director, Purchasing Division/Competition Advocate (000195)

- Extensive knowledge of County's procurement process such as Requests for Proposals and Requests for Qualifications.
- Extensive knowledge of departmental procedures pertaining to negotiating and selecting contract award processes; analyzing contracts and awarding contracts.
- Through knowledge of public relations principles and techniques.
- Through knowledge of departmental and County Administrative policies and procedures.
- Through knowledge of supervising principles and practices.
- Considerable knowledge of County's personnel policies, procedures and regulations.
- Ability to supervise subordinates in a manner conducive to full performance and high morale.
- Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of other public and private officials.
- Ability to express ideas clearly and concisely, verbally and in writing.
- Ability to analyze a variety of complex administrative and operational problems and make sound recommendations for their resolution.
- Ability to establish a variety of administrative and operational policies and procedures pertaining to terminal operations management.

### Stores Clerk (000201)

#### Minimum Qualifications

High school diploma or GED. One year of warehousing, stockroom, or inventory experience is required. Must possess a Driver license. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is routine manual and clerical work in the receipt, storage and issue of various commodities in a county supply area.

Employees in this class perform both manual and clerical tasks in the receipt, storage and issuance of maintenance supplies, hospital goods, foodstuffs, clothing or related items in central warehouses, outlying storerooms or supply sections of various departments. Duties typically combine warehousing manual labor tasks, related clerical duties and general knowledge of supply procedures. Supervision is received from a storekeeper or other supply official who inspects work for rate of progress and accuracy.

##### ILLUSTRATIVE TASKS

Receives, unloads and counts stores such as groceries, spare parts, medical supplies, clothing or other stock delivered in a receiving area; locates packing ticket or invoice and posts to show kind and number of items received; assists in checking incoming materials against invoices or purchase orders.

Posts appropriate shipping receipts or other documents to show if delivery is a full or partial shipment; packages various items for shipment out for repair, or repackages stock for return of defective goods as assigned; labels items with proper stock numbers for movement to storage area.

Places goods on appropriate shelves or in various bins; calls supervisor's attention to any defective items; issues supplies in response to authorized requisitions based on knowledge of goods in storage; disburses materials or issues tools to workmen as required by work orders; marks stock or perpetual inventory records as items are issued; refers to supervisor if supplies required are in short supply.

Assembles, packs and transports or arranges for transporting stored goods or materials to floors or other storage areas; assists in moving supplies from one area to another as stock is reclassified to different numbers or codes; rearranges stock in bulk storage area as assigned, lifting heavy weights such as large boxes of linen manually, by means of mechanical stock moving equipment or by means of motor driven vehicle within a confined area when the occasion demands; climbs ladders as needed to arrange materials on shelves.

Cleans storeroom area and keeps stock in order; maintains proper security precautions by locking cabinets and doors; monitors storage equipment such as refrigerators.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of established procedures in the receipt, shelving and storage of supplies.

Knowledge of types of supplies in the area of assignment.

Knowledge of established record keeping procedures.

Ability to count incoming stock and post records accurately.

Ability to issue stock and post records accurately.

## Human Resources Department

### **Nature Of Work**

This is routine manual and clerical work in the receipt, storage and issue of various commodities in a county supply area.

## Inventory Clerk (000202)

### Minimum Qualifications

High school diploma or GED. Two years of experience in the receipt, storage, and inventory of materials to include the operation of materials handling equipment or delivery vehicles are required. Must possess a CDL/Class B. Must have and maintain a good driving record.

### Job Specifications

#### NATURE OF WORK

This is inventory work in the receipt, storage and issue of various commodities and the maintenance of control records in a county supply area.

Employees in this class are responsible for operating a departmental storeroom or assisting in the operation of a large warehouse facility. Duties involve receiving, coding, storing and issuing items and posting, balancing and auditing inventory records. Some incumbents receive and transmit purchase requests and maintain status of purchase requisitions. Work may require familiarity with a specialized commodity grouping such as electronic components, pharmaceuticals or hospital supplies. Supervision may be exercised over Stores Clerks or other clerical personnel assigned to the supply unit. Supervision is received from a supply official who inspects work for the timely and accurate filling of supply requisitions and proper maintenance of inventory records.

#### ILLUSTRATIVE TASKS

Operates a central storeroom for supplies and materials used in a building maintenance division including plumbing, electrical, carpentry, refrigeration and related supplies.

Receives meats, produce, frozen foods and related goods; checks goods for quality and quantity; selects proper procedure for storage, placing items in refrigerated rooms and deep freezers where temperatures are daily monitored and logged; supervises rotating of stock and issues foods and supplies to kitchens, cafeterias and other designated area manually, by means of mechanical stock moving equipment or by means of motor driven vehicle within a confined area when the occasion demands.

Checks deliveries by vendors against requisitions for correctness and completeness; answers telephone inquiries concerning materials in stock.

Maintains varied stock records such as inventory cards, invoices, purchase requests received, and the status of requisitions; verifies input and output records for computer; identifies and codes stock items.

Supervises a small crew of subordinate personnel in stockroom or warehouse storage and inventory operations and housekeeping of storage areas.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of storeroom or warehouse receipt, storage and inventory practices and procedures.

Knowledge of detailed inventory record keeping practices and procedures.

Knowledge of computerized inventory record system applicable in the area of assignment.

Knowledge of characteristics and use of items in the commodity grouping to which assigned.

Some knowledge of centralized purchasing procedures used by the county.

## Human Resources Department

High school diploma or GED. Four years of inventory management and procurement experience with electronic parts and components are required.

### Job Specifications

#### NATURE OF WORK

This is specialized and supervisory supply work in the receipt, storage and issuance of materials and equipment required for the installation and maintenance of countywide telecommunications systems.

The incumbent in this class is responsible for planning, coordinating and implementing procedures of requisitioning, receiving, storing, issuing, and recording all materials utilized. Work requires initiative and independent judgment in cooperation with various technical and administrative superiors to provide for the timely flow of proper supplies according to demand. Supervision is exercised over a staff of Inventory Clerks or clerical personnel by assignment and review of work and by assisting in difficult or unusual work situations. Supervision is received from an administrative superior who reviews work for conformity with departmental policy and for efficient operation of the facility through personal inspections and conferences.

#### ILLUSTRATIVE TASKS

Plans, assigns and supervises all employees engaged in receiving, checking, storing and issuing a large volume of specialized telecommunications supplies.

Develops, implements, and evaluates methods and procedures for the storage and issuance of telecommunications stock items.

Supervises and participates in the maintenance of perpetual inventory records; checks for uniformity and accuracy of postings; determines optimum stock levels.

Initiates and reviews requisitions for supplies; questions unusual requisitions; coordinates requisitioning with central purchasing agency; advises on commodity specifications, bid quotations, vendor selection and billing transactions.

Reviews reports of supplies received and inspects merchandise to verify conformance to purchase order specifications.

Contacts vendors on certain telecommunications items to discuss deliveries, shortages, improper goods, charges, discounts, and to arrange for demonstrations of equipment.

Supervises or participates in physical inventory of all stock items; balances with control records, and reconciles differences.

Arranges for testing of competitive products; prepares reports of findings covering comparative costs, relative efficiency, labor savings and other areas.

Prepares reports on current and projected usage of telecommunications supplies.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the receipt, storage and issuance of telecommunications materials and equipment and the proper procedures for supply and inventory operations.

Thorough knowledge of perpetual inventory record keeping.

## Human Resources Department

---

### Electronic Parts Specialist (000206)

Considerable knowledge of centralized purchasing procedures.

## Mail Center Clerk 1 (000209)

### Minimum Qualifications

High school diploma or GED. One year of clerical experience is required. Must possess a CDL/Class C. Must be able to lift 50 pounds.

### Job Specifications

#### NATURE OF WORK

This is specialized clerical work in a centralized county mailroom facility.

Employees in this class perform a variety of duties in the collection, processing and distribution of interoffice and U.S. Mail in a centralized county mailroom operation. Emphasis of the work is on the accurate and rapid processing of mail, operation of motor vehicles, the use of lightweight conveyance equipment such as dollies and hand trucks, and the use of mail processing equipment. Some employees may be required to receive and dispatch mail using an automatic conveyor distribution system. Duties occasionally involve physical exertion and exposure to adverse weather conditions. Supervision is received from an administrative or clerical supervisor who provides advice and assistance on difficult problems and reviews work for satisfactory performance in accordance with U.S. Postal regulations.

#### ILLUSTRATIVE TASKS

Operates automobiles, vans, trucks and lightweight conveyance equipment to collect and distribute interoffice and U.S. Postal Service mail on established county routes; transports registered, insured, express and other forms of signature service mail to U.S. Postal facilities and obtains documented receipt; transports office supplies and materials to interoffice facilities and obtains documented receipt; conducts route service to nearby locations by walking; delivers items requiring hand-to-hand service upon request of an approved county official inclusive of after-hours deliveries.

Operates standard and/or computerized mail processing equipment; determines proper class and zone for U.S. Postal Service mail on standard or computerized mail scales to determine correct rate; measures letters and packages to determine applicable U.S. mail requirements and/or surcharges; enters correct budget codes into computerized accounting terminal or records correct budget code and transactions on daily logs; inserts mail into computerized mail machine, removes mail from conveyor tray, places mail in marked bins.

Wraps packages for parcel post processing; consolidates multiple packages into a single unit for shipment or delivery to common destination.

Sorts and places interoffice mail into customer destination boxes both in a central mailroom facility and on delivery routes; sorts U.S. mail prior to processing; separates items suitable for interoffice delivery; pre-sorts, bulk-rate or other forms of reduced rate mailing; separates certified, registered, insured and express mail for special mail processing; sorts metered pre-sort mail by zip codes at pre-sort station; packages and labels pre-sorted mail in accordance with U.S. Postal service requirements.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of U.S. Postal Service rules, regulations, rates and documentation mandatory for processing U.S. mail.

Knowledge of the operation of standard and computerized mail processing equipment.

Knowledge of the geographical locations of county and U.S. Postal Service facilities.

Knowledge of the geography of Dade County and its road numbering system.

Knowledge of County budget codes and transactions.

Knowledge of office practices and procedures.

### Mail Center Clerk 1 (000209)

Ability to read and comprehend instructional manuals, regulations and other official U.S. Postal Service materials.

Ability to operate a variety of motor vehicles in a safe manner.

Ability to lift heavy items, use hand trucks and similar equipment to transport heavy loads.

Ability to operate equipment with speed and accuracy while standing.

Ability to follow verbal and written instructions.

Ability to deal effectively with mailroom users.

Physical agility and strength sufficient to perform assigned duties.

NEW 1-85

#### **Nature Of Work**

### Surplus Property Clerk (000224)

#### Minimum Qualifications

High school diploma or GED. Three years of warehousing experience to include surplus furniture and equipment reissue and disposal are required. Must obtain a CDL/Class B within the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is warehousing and retail sales work in a large surplus property facility.

An employee in this class is responsible for the receipt, storage, issuance, sale and safeguarding of surplus county furniture and equipment. Duties include making determinations of the most cost effective means for disposition of excess and surplus county property issued and received, inventory control, warehousing and the showing of furniture and equipment available for reallocation to county departments and the public. Work requires the use of judgment in determining the fair market value for surplus and salvage items and in complying with accountability requirements issued by the State of Florida. Supervision is exercised over clerical and semi-skilled employees engaged in the receipt, storage, issue and sale of furniture and equipment. Supervision is received from an administrative superior who reviews work for conformity with county policies and procedures and for the efficient operation of the facility.

##### ILLUSTRATIVE TASKS

Receives, issues and stores surplus furniture and equipment designated for reallocation, sale or disposal; provides techniques and procedures for the proper loading, unloading, turn-in and issuance of county owned personal property.

Posts appropriate property action form receipts and inventory transfer forms to accurately reflect the on-hand balance of furniture and equipment resulting from the issue or turn-in of property; maintains detailed records for all furniture and equipment in storage; surveys personal property to determine the most effective means of disposition.

Supervises a staff of clerical and semi-skilled employees engaged in the receipt, storage, issue, sale and safeguarding of a variety of surplus county furniture and equipment.

Plans and implements efficient storage methods and allocations of storage space; makes recommendations for improvements in warehousing and distribution activities; assures security of warehouse stock by taking precautionary measures to protect property from loss, damage and deterioration.

Assures proper placement of furniture and equipment for effective viewing and shows to prospective purchasers; labels items, calculates charges and prepares required forms.

Establishes prices for items to be sold to the public; collects cash payments and issues official receipts for items sold.

Participates in public auctions and sealed bid sales by preparing flyers announcing sales, preparing bid documents and placing legal ads for the disposal of surplus property.

Takes periodic inventories and maintains detailed files on all items in storage.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### **Nature Of Work**

This is warehousing and retail sales work in a large surplus property facility.

### ISD Surplus Property Supervisor (000225)

#### Minimum Qualifications

High school diploma or GED. Four years of combined experience in large-scale warehousing, capital inventory control work and retail sales management are required.

#### Job Specifications

##### NATURE OF WORK

This is a supervisory work in the operation of a countywide warehouse and retail surplus sales facility, and property disposal yard.

An employee in this class is responsible for supervising the disposition of excess and surplus County property. Emphasis of the work is on planning, coordinating and implementing procedures for the receipt, storage, issue, display, sale and safeguarding of a large variety of property including police confiscated property. Duties include determining cost effective means for disposition of excess and surplus County property, issuing and receiving property, maintenance of a computerized inventory control system and bar-coded point-of-sale system, warehousing and displaying of property for resale, cash control and report generation. Work requires the use of judgment in arriving at the fair market value for surplus and salvage items and in complying with accountability requirements and procedures issued by the State of Florida for all Federal Surplus Property Program transactions. Supervision is exercised over subordinate employees through assignment and review of work and provision of assistance on difficult problems. Supervision is received from an administrative superior who reviews work for conformity with County policies and procedures and for the efficient operation of the facilities.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of warehousing and distribution employees engaged in the receipt, storage, display, issue, sale and safeguarding of a large variety of surplus County and U.S. Government furniture, equipment and property, including that obtained through the MDPD Seized and Found Property Program.

Develops, implements and evaluates efficient storage methods and allocations of storage space; makes recommendations for improvements in warehousing and distribution activities; assures security of warehouse stock by implementing precautionary measures to protect from loss, damage and deterioration; develops and enforces appropriate safety practices for employees and public.

Provides techniques and procedures for the proper loading, unloading, turn-in, and issuance of County owned personal property; receives, issues, inventories, displays and stores surplus furniture and equipment designated for reallocation, sale or disposal.

Establishes prices for items to be sold to the public; calculates charges and prepares required forms; collects cash payments and issues official receipts for items sold.

Maintains computerized inventory system with bar-code scanning to accurately reflect on-hand balance of furniture and equipment; accurately records property receipts, disbursements and price changes; maintains detailed records for all furniture and equipment in storage; utilizes basic programming skills for troubleshooting computer problems; surveys personal property to determine the most effective means of disposition.

Performs physical inventories and maintains files on all items in storage.

Balances revenue from County Store and sales revenues from Sealed Bid and Auction Sales; prepares corresponding deposit reports.

Resolves customer complaints in store or auction operations.

Supervises operation of Heavy Equipment Disposal Yard, including maintenance, repair and security of facilities; and equipment storage and placement.

Participates in public auctions and sealed bid sales; establishes and reviews descriptions and technical designations in bid specifications; reviews terms of bid documents; advises on bidder awards, contacts bidders to discuss property removals, payments, performance bond requirements and title transfers; prepares and maintains documentation.

### ISD Surplus Property Supervisor (000225)

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of Administrative Orders and departmental policies and procedures concerning the receipt, storage and issuance of furniture, equipment and property to various County agencies and the public.

Considerable knowledge of warehousing and warehousing practices and procedures.

Considerable knowledge of inventory control techniques and practices.

Knowledge of computerized inventory and bar-code control systems.

Knowledge of retail security procedures.

Knowledge of the retail market for used equipment, furniture and various property items.

Knowledge of supervisory principles and practices.

Ability to supervise a complex warehousing and retail store facility, and a disposal yard in an efficient and effective manner.

Ability to plan, assign and supervise the work of subordinate in a manner conducive to full performance and high morale.

Ability to maintain effective working relationships with officials of County departments and the public.

Ability to accurately handle large quantities of cash and make routine arithmetic calculations.

Ability to follow complex verbal and written instructions.

Physical strength and agility sufficient to perform assigned duties.

#### **Nature Of Work**

This is supervisory work in the operation of a countywide warehouse and retail surplus sales facility, and property disposal yard.

## Records Center Clerk 1 (000228)

### Minimum Qualifications

High school diploma or GED. Six months of experience in the receipt, storage, issuance and filing of records are required. Must possess a Driver license. Must be able to lift and handle items weighing up to 50 pounds.

### Job Specifications

#### NATURE OF WORK

This is routine clerical and related manual work in the receipt, storage and filing of documents and records in a departmental or centralized records depository.

Employees in this class perform various duties in obtaining, shelving and repacking record containers in a departmental or central records depository. Work includes interfiling of returned documents in appropriate folders in stored record cartons and maintaining accurate records of all transactions. Employees use ladders and lifts in the shelving and movement of records, utilize hand carts, and operate light duty trucks in the transfer of records among various locations. Duties also require the loading and unloading of cartons on and off light duty vehicles. Supervision is received from a technical superior who reviews work for adherence to established policies, procedures and departmental regulations.

#### ILLUSTRATIVE TASKS

Obtains record containers from various County departments and agencies for transfer to the County's central records depository; loads cartons onto light duty vehicles; transports records to the County central records depository and unloads cartons.

Obtains record containers from departmental offices and transports them to departmental records center; transfers record containers from departmental records center to the County's central records depository.

Checks records in containers against transfer lists to assure completeness; notifies superior of missing records; notes on transfer lists the numerical location of each carton on shelves in the records center including aisle and box numbers.

Places containers in correct shelf space using ladders and lists; moves containers between shelves and re-marks as required.

Moves cartons to lower levels as needed to repack contents; repacks boxes by addition of documents to folders or addition of folders.

Retrieves documents or folders from cartons in response to authorized requests.

Refiles returned documents into correct containers and filing positions through references to charge-out tickets; corrects misfiled documents as noted.

Assists superior in the confidential destruction of records in accordance with authorized retention schedules.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the records storage system in a departmental or central records depository.

Knowledge of established procedures in the receipt, shelving, storage and retrieval of record containers.

Knowledge of refiling procedures for records in storage.

Knowledge of established safety practices in the area of assignment.

Some knowledge of the content of records in a records storage facility.

### Records Center Clerk 1 (000228)

Ability to shelve and file records accurately.

Ability to operate lifts and ladders at heights up to sixteen feet.

Ability to understand and follow verbal and written instructions.

Ability to safely operate a light duty vehicle.

Sufficient strength to permit the lifting and moving of record containers weighing up to fifty pounds.

High school diploma or GED. Two years of experience in the receipt, storage, issuance and filing of records are required. Must possess a Driver license. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical and public contact work in the retrieval and furnishing of information from document records in a departmental or centralized records depository.

Employees in this class are primarily responsible for the retrieval of information, documents or complete records from various files in storage in response to requests from sources within and outside the County. Incumbents are responsible for exercising care in releasing information and files only to authorized persons and for withholding release in instances where court order or other action is required. Supervision is received from a technical superior who assists as problems arise in the locating and furnishing of information from records in storage.

##### ILLUSTRATIVE TASKS

Receives requests for records by fax, mail, telephone and the visiting public including County, state and federal officials, attorneys, abstract company executives, insurance companies and others; screens requests to assure persons are authorized to receive information and that confidential files can be released without court order.

Retrieves folders or loose documents from record cartons based on file number and nature of documents; refers to automated or manual records center listings as needed; prepares and inserts charge-out tickets and dispatches records or carries them to a reference room.

Assists attorneys and other members of the public with more difficult record searches; retrieves various folders to trace sequence of documents; locates misplaced or missing material; locates and groups related documents on particular cases or subject matter.

Provides information from medical, legal and other documents over the telephone; answers general telephone inquiries concerning the nature of semi-active and active records maintained in the depository or established procedures in use of the facility.

Assists superior in the preparation of inactive records for microfilming by arranging documents in appropriate sequence according to court proceedings or dates; assists in preparation of records for systematic destruction.

Refiles loose documents into cartons and assists in reshelving of records by moving cartons using lifts and ladders as needed.

Supervises operation of the records center in the absence of the immediate supervisor, as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of rules and regulations pertaining to the release of public records.

Knowledge of records center records management system, policies and procedures.

Knowledge of the content of records center active and semi-active records.

Knowledge of the sequence of material in legal, medical or other records in storage.

Knowledge of retention schedules for depository records.

Knowledge of public relations principles and techniques.

#### Minimum Qualifications

High school diploma or GED. Two years of experience in storing, indexing, filing and other records management processes are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory clerical and public contact work in a large departmental or centralized records depository.

Employees in this class are responsible for supervising a large departmental or central records depository storing official departmental records or records from various County departments and agencies. Emphasis of the work is on planning, coordinating and supervising work of a group of clerical employees engaged in receiving, shelving, retrieving, refiling, and disposing of records in accordance with established records management regulations and procedures. Additional duties include assisting various officials with inquiries on the retirement and storage of records, recommending changes in record retention schedules, and reviewing records for special purposes such as sequencing inactive records prior to microfilming or initial incorporation into the depository. Supervision is exercised over a staff of clerical subordinates engaged in various phases of records center operations. Supervision is received from an administrative superior who reviews work for effective customer service activities and supervision of the records center.

##### ILLUSTRATIVE TASKS

Plans, coordinates and supervises the work of clerical employees in a large departmental or central records depository engaged in receiving records for storage, shelving record containers, retrieving and refiling documents and records, and destroying records in accordance with retention schedules; reviews work in progress to assure prompt service to the public; assists employees in locating files as necessary.

Supervises employees engaged in microfilming permits, plans, records, reports and other documents.

Assists members of the public and various officials with more difficult record searches; issues copies of documents to authorized personnel.

Plans efficient utilization of storage space and supervises reshelving and repacking of containers; revises index listings of records as needed; updates filing systems and revises records center procedures; supervises the systematic destruction of records and signs destruction schedules.

Assists departmental employees or employees in other departments and agencies with inquiries concerning the records management system or related procedures; reviews retrieval requests to determine which records can be transferred to semi-active areas; recommends changes in retention schedules.

Assures that subpoenas for records are processed in a timely manner; testifies in court proceedings as records custodian.

Prepares report of center activities including number of customers assisted, records received, photocopies made, and fees collected.

Reviews and reorganizes records from County departments and agencies whose documents are initially entering the central records depository, as needed.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the organization and operation of a large departmental or central records depository.

### Materials Management Supervisor (000233)

#### Minimum Qualifications

Bachelor's degree. Two years of experience supervising inventory control and analysis, property warehousing and disposal, fixed asset management, or marketing and sales of merchandise or two years of experience supervising a quick-copy reproduction center or a large volume mailroom that provides administrative support for the preparation and printing of documents are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and supervisory work assisting a superior in coordinating, planning and directing centralized materials management functions for Miami-Dade County.

An employee in this class is responsible for assisting in the supervision of subordinates engaged in a variety of materials management activities, analyzing operational problems, reviewing policies and procedures, and developing and recommending changes to improve efficiency in the delivery of services. Responsibilities include preparation and monitoring of billing procedures, analysis of expenditures in relation to the budget, and the development and application of automated systems. The incumbent exercises independent judgment in the analysis of policies and procedures and in the development of recommendations to improve operations. Supervision is exercised over a staff of specialized, administrative and clerical employees engaged in various phases of materials management activities. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for the attainment of desired objectives.

##### ILLUSTRATIVE TASKS

Assists a superior in supervising a staff of subordinate supervisors engaged in providing specialized support services such as central office supply, warehousing and distribution, graphics services, and mailroom activities.

Supervises accounting and charge-back billing functions; reviews and approves invoices from outside vendors for sub-contracted work; approves invoices and journal entries to charge county departments for provided services.

Prepares and monitors division budget and expenditures; projects and monitors annual revenues; analyzes the relationship between expenditures and revenues to assure proper charges are being made to cover expenses.

Reviews and analyzes policies and procedures to measure and improve operational effectiveness; conducts management analysis studies to discover problems and recommend solutions or changes; provides information to superiors.

Plans, directs and coordinates modernization and expansion of services in response to changing technology and County requirements.

Develops and coordinates manual and computerized management information systems, automated warehouse inventory controls, and other automated functions within the area of assignment.

Develops, implements and monitors an effective automated order entry system; assures that inventory status is maintained at a sufficient level.

Develops and implements systems to monitor and meet the County's changing supply needs.

Develops inspection and evaluation programs relating to office furnishings and supplies to assure compliance with specifications.

Prepares comprehensive material specifications and bid documents.

Maintains a working knowledge of new products developed for the office environment.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled graphic design work for the General Services Administration.

Employees in this class are responsible for performing a variety of complex duties in the design and development of graphic materials. Responsibilities include conferring with customers to identify design requirements, developing designs which reflect the theme of the project, producing designs rapidly to minimize production costs, maintaining accurate records on design and production services, and operating an advanced computer design workstation and related peripheral equipment. Incumbents exercise considerable independent judgment in the interpretation of customer requirements and in the production of complex graphic design materials from concept to final execution. Supervision is received from a technical and administrative superior who reviews work for achievement of desired results and customer expectations.

##### ILLUSTRATIVE TASKS

Meets with supervisor and customers on graphic design specifications, design alterations and production schedules.

Designs and builds complex design documents including brochures, books, advertising campaigns, special event support materials, 3-D exhibits, special publications, logo design, forms and letterheads on advanced computer design equipment.

Maintains accurate records on job status, production time and component services provided to ensure revenue generation to cover all cost elements of design.

Performs image scanning, image manipulation, photo compositing, photo retouching and special effects on desktop scanning system.

Performs Color Prepress on digital files for reproduction on a lithographic press including setting traps, imposition, replacing FPO art with hi-res images, and troubleshooting output.

Prepares accurate files and documentation for external vendors; visits service bureaus to consult with vendor representatives when graphic design work requires explanation, alterations or proofing.

Maintains, supports and troubleshoots computer design system including dual platform LAN environment and peripherals (scanner, optical drives, Syquest drives and printers); lifts and moves equipment; bends and kneels to access confined spaces to configure, troubleshoot and connect equipment, cables and devices.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, practices and methods of advanced graphic design work.

Considerable knowledge of the operating characteristics and maintenance requirements of advanced computer design systems.

Considerable knowledge of the design of various publications, documents, forms, brochures and other printed materials.

Knowledge of public relations principles and techniques.

##### NATURE OF WORK

This is skilled technical work in the operation of offset press or offset print equipment.

Employees in this class operate offset press equipment or complex offset print equipment to reproduce a variety of forms, brochures, posters, bulletins, contracts, manuals, booklets and other documents requiring mass production. Duties include operating, adjusting and maintaining offset process printing presses, operating single and double pass offset press equipment, production of paper and film plates, and operation of a variety of related duplicating and finishing equipment. Assignments are generally in the form of job specifications provided on individual work orders or by reference to mechanical art layouts and production dummys. Work is distinguished from the next higher class in that offset duplicating equipment is less complex procedurally and has limited color reproduction capability. Supervision is received from a technical or administrative superior who assigns job priorities and reviews work in progress and finished production for technical quality, timeliness and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Operates offset press and offset print equipment to reproduce a variety of forms, brochures, posters, bulletins, newsletters, manuals, catalogs and other documents.

Reviews work orders, production folders, mechanical art layouts and dummys to determine nature of printing job; selects correct paper stock, cutting to required press size as necessary; mixes specified ink colors through reference to Pantone Mixing System guide, or other system.

Sets all press operating controls including cylinder pressure, ink fountain, air blowers, guides, delivery system, paper feeder and spray attachment to produce completed products with minimal waste of stock or supplies.

Clamps printing plates onto plate cylinder and adjusts plate position for proper registration; operates automatic plate cameras to produce replacement plates when necessary due to plate breakdown.

Operates offset printing presses including blanket-to-blanket perfecting equipment in a safe manner and at production speeds appropriate for paper weight and for the individual jobs being produced.

Maintains press equipment by proper oil and grease lubrication; cleans, performs preventive maintenance and makes minor repairs as required.

Operates camera and film plate instruments to produce film plates, spaces and measures work for accuracy and centers work on camera bed; adjusts camera controls, adds equipment solution and film and produces finished product.

Assists or performs duties in finishing and binding including collating, stapling, stacking, jogging, wrapping and cutting.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of offset press and offset print equipment operation, adjustment and maintenance.

### Offset Lithographer 1 (000245)

Considerable knowledge of the papers, inks, chemicals and films used in offset press and print and in camera reproduction operations.

Knowledge of the operating characteristics and maintenance requirements of offset press and offset print equipment.

Knowledge of finishing and binding activities in a print shop.

Knowledge of printing job specifications.

Ability to operate complex offset press and print equipment and related reproduction equipment in a safe and efficient manner.

Ability to follow verbal and written instructions.

Ability to make required press adjustments to correct operating difficulties.

Ability to maintain routine records of printing production.

Physical strength and agility sufficient to lift heavy loads, stand for long periods of time and adjust equipment.

Skill in the operation of offset press, offset print and camera reproduction equipment.

Skill in printing.

#### Minimum Qualifications

High school. Three years of experience in the operation, adjustment and maintenance of offset press machinery to include advanced 4-color process printing experience are required. Must be able to lift and handle items and equipment weighing up to 50 pounds. OR A minimum of seven years of experience in the operation, adjustment and maintenance of offset press machinery to include advanced 4-color process printing experience are required. Must be able to lift and handle items and equipment weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is highly advanced skilled technical work in the operation of large offset lithographic printing presses.

Employees in this class adjust, maintain and operate offset printing presses capable of printing sheet sizes up to 19 inches by 26 inches with multiple printing units. Incumbents use advanced press electronics and perfecting capabilities to reproduce a variety of printed matter requiring mass production. Duties involve the production of flawless four-color process printing with pinpoint registration, over-printing of inks and varnishes, and the mixing of inks according to the Pantone Matching System. Works requires an advance skill level and technical knowledge of computer press controls for producing high quality lithography. Employees control a digitized press control system and an electronically controlled and speed compensated dampening system, and produce work utilizing a stream feeder system requiring precise-register sheet transfer. Duties include making micro-adjustments for register correction, utilizing and controlling infrared radiators for optimum drying, and use of transmission densitometers and conductivity meters. Production instructions are received through written instructions, review of layouts, mechanical art impositions, production dummies, and participation in pre-press conferences with customers and design staff. Supervision is received from a technical and administrative superior who reviews work in progress and upon completion for quality and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Operates large offset multiple unit printing presses to produce complex and high quality lithography.

Installs printing plate(s) onto press and makes all adjustments necessary to achieve pinpoint accuracy.

Operates platemaking and camera equipment as required.

Performs stripping functions conducive to job specifications.

Selects raw material and cuts to size using computerized equipment.

Mixes specific inks according to Pantone Matching Systems.

Produces printed matter utilizing a wide variety of paper stocks, metallic and fluorescent inks, and varnishes.

In absence of supervisor, advises press operators on matters of press operation and provides assistance in emergency problem solving.

Maintains press equipment by proper preventive maintenance; makes minor repairs; assists in ordering replacement press parts and in coordinating major overhauls and rebuilding of press equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the operation, adjustment and maintenance of large offset lithographic printing presses.

### Offset Lithographer 3 (000249)

Thorough knowledge of inks, papers, chemicals and plate materials used in offset printing.

Considerable knowledge of printing job specifications.

Knowledge of ultraviolet and aqueous coatings.

Ability to utilize infrared drying radiators to control ink drying.

Ability to strip negative flats for multi-color and process color printing.

Ability to burn negative flats to metal plates accurately for press production.

Ability to utilize densitometers for ink control.

Ability to utilize electronic and computerized in-line press controls to monitor equipment for mechanical malfunctions and quality control.

Ability to utilize conductivity meters to precisely gauge dampening system.

Skill in printing.

Skill in the operation of large offset lithographic printing presses.

NEW 6-91

#### **Nature Of Work**

This is highly advanced skilled technical work in the operation of large offset lithographic printing presses.

### Lithographic Imaging Technician (000251)

#### Minimum Qualifications

High school diploma or GED. Four years of experience in the production of high-quality color process negatives and plates are required.

#### Job Specifications

##### NATURE OF WORK

This is skilled photolithographic work in the stripping and production of four-color photographic materials and metal plates for large-scale press operations.

An employee in this class produces line photography, halftones, reverses, duo tones, knockouts, produces bluelines, uses screens and special effect screens, works with spreads and chokes, separates negatives for various proofing methods, produces four-color negatives with the use of electronic scanners, and develops negatives and/or positives from a camera-ready mechanicals. Work involves responsibilities for all offset stripping and platemaking and related photolithographic procedures necessary to perform printing services for County departments. Duties require the production of the more complex stripping techniques and platemaking procedures conducive to the production of high quality four-color flawless printing. Supervision is received from a technical and administrative superior who reviews work in progress and examines upon completion for quality and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Operates camera by focusing lens, adjusting lighting, implementing color filters, determining and adjusting camera exposures.

Develops film conventionally or by using film processor.

Prepares film positives by contact method from negatives; duplicates film negatives; opaques film.

Mixes chemicals for development of lithographic film.

Prepares negative (multiple) flats using pin register system for excellent registration.

Prepares negatives flats for color key proofing or other pre-press proofing procedures.

Prepares layout and stripping of flats; scribes negatives, cuts windows and silhouettes; steps and repeats negatives for multiple burns.

Develops and transfers image on plate to retain specified surface; washes and applies lacquers, desensitizing etches, gum and asphaltum preservatives.

Exposes plate to a positive or negative image color-arc lamp to transfer image to plate using vacuum frame or plate processing equipment.

Prepares chemistry and solutions for platemaking production.

Performs maintenance and minor repair tasks on all photochemical platemaking equipment.

Advises other employees in pre-press photolithographic and platemaking procedures.

Performs related works as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of platemaking by positive and negative image transfer.

Knowledge of photographic lithography including layout and developing procedures.

### Lithographic Imaging Technician (000251)

Knowledge of pre-press photolithographic proofing techniques.

Knowledge of stripping techniques requiring pin-point register for process color printing.

Knowledge of process cameras and darkroom procedures.

Knowledge of electronic scanning equipment.

Knowledge of transmission and reflective densitometry.

Knowledge of color separations.

Ability to mix photographic chemistry and solutions.

Ability to hand cut film and hand cut windows.

Ability to strip flats for process color.

Ability to layout for proper pagination and impositioning.

Ability to perform work requiring a pin register system for proper stripping of flats and platemaking.

Ability to produce a variety of metal plates.

Ability to work in the absence of technical supervision.

Ability to detect equipment malfunctions and make necessary adjustments.

Skill in photographic camera and platemaking techniques.

##### NATURE OF WORK

This is advanced administrative and supervisory work in management of a large centralized county graphics creation and reproduction operation.

Employees in this class are responsible for planning, organizing, directing and coordinating the work of skilled employees engaged in providing original creative art design services, typesetting, lithographic presswork, digital printing, digital imaging and graphic production finishing activities for various county departments. Emphasis of the work is on establishing production schedules and priorities for daily operations, managing personnel and equipment resources to provide high quality graphics and printing services, analyzing operational problems, reviewing policies and procedures and developing and recommending changes to improve efficiency in the delivery of departmental services. Duties involve consulting with clients to determine needs, developing artistic and creative proposals to meet identified needs, supervising the completion of artwork ready for press, managing digital workflow including variable printing from supplied data, managing job completion from imagesetter, presswork and bindery, preparing technical specifications for the specific production component supervised estimating job orders prior to completion to determine costs of production, establishing unit costs and work measurements, scheduling of work to meet delivery deadlines and establishing quality control in each area of production under the incumbent. Incumbents exercise considerable technical knowledge and independence in resolving production problems and in the management of graphics services to meet customer demands. Supervision is exercised over a staff of technical, supervisory and specialized personnel who assist with various phases of work. General supervision is received from an administrative superior through personal conferences and observation of work activities for satisfactory provision of graphics services to county departments and for efficiency of operations.

##### ILLUSTRATIVE TASKS

Confers with departmental officials regarding individual departmental graphics needs. Delineates scope of creative arts projects based on budgeted funds and time available for production. Creates artistic, creative, and original designs to meet marketing, administrative, and informational requirements of the project. Refines concepts and reaches agreement with clients on work to be produced. Supervises skilled employees in the production of art projects from concept to final design utilizing advanced electronic equipment, high resolution scanners, page layouts workstation, film and proof output devices, specialized software packages that enable employees to maximize creativity and artistic talent in design project creation and production.

Plans, assigns and reviews the work of subordinate digital imaging personnel, press operators, foremen, subordinate supervisors and skilled employees engaged in the preparation and operation of offset lithographic printing presses, digital printing devices and related equipment used in printing, digital duplication and finishing a wide variety of forms, brochures, posters, letterheads and other materials in both single and multiple colors; inspects printing and duplication work to assure conformity and multiple colors; inspects printing and duplication work to assure conformity with job order specifications and attainment of desired quality levels.

Confers with departmental officials regarding reproduction jobs, priorities, variable data digital printing (notices and statements) costs, methods and techniques. Planning to achieve postage economies by meeting postal requirements is emphasized. Recommends layouts, design, colors, grades and types of paper to be used. Establishes and revises daily production priorities in response to varying departmental demands.

Develops unit cost measurements for all elements of production based on analysis of labor, materials and overhead involved. Estimate individual jobs for departments based on proposed job specifications. Monitors work-in progress to ensure compliance with standard cost elements and estimates provided to client.

Confers with subordinates regarding workload, production problems and proper utilization of computerized composition and design

## Human Resources Department

---

### Graphics Manager (000254)

equipment, scanners, printers, typesetters, presses and bindery equipment, trains subordinates in proper and safe use of equipment; implements new methods procedures to effectively utilize and improve capacity; enforces established safety measures and regulations.

Plans, organizes, directs and coordinates modernization of expansion of services in response to changing technology and county requirements.

Provides managerial oversight of subordinate supervisory personnel engaged in the operation of the Quick Copy Digital Reproduction Center. Ensures adequate resources are in place to meet County priority quick copy production including County Commission Agenda requirements. Adjusts manpower between production facilities as needed to meet workload.

Prepares and monitors section budget expenditures; projects and monitors annual revenues; analyzes relationship between expenditures and revenues to assure proper charges are being made to cover expenses.

Reviews and analyzes policies and procedures in order to measure and improve operational effectiveness and efficiencies.

Conducts management analysis studies or supervises their preparation by subordinates to discover problems, recommends solutions and changes in current policies or procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of reproduction methods and techniques applicable to the operation of offset lithographic printing, high speed digital printing and digital prepress.

Thorough knowledge of graphic design from conception, creative design and illustration, preparation of artistic layouts ready for press, typesetting, selection of papers, ink colors, finishing options such as die cutting, embossing and foil stamping to enhance effect.

Thorough knowledge of servers, computer workstation equipment, scanners, and output devices used in a modern print environment. Advanced knowledge of software packages used to produce high quality graphic design, digital printing and digital pre-press.

Considerable knowledge of the principles of management and their application to the administration of government activities.

Considerable knowledge of the principles and practices of public and business administrations.

Considerable ability to teach and instruct subordinates in effective operation of equipment used in the particular production area under incumbent's managerial responsibility.

Knowledge of supervisory principles and practices.

Ability to plan, organize, direct and control the work of subordinate administrative, technical and supervisory personnel in a manner conducive to full performance and high morale.

Ability to exercise sound judgment and discretion in interpreting and apply policies and procedures affecting other county organizations.

Ability to initiate and install administrative programs and procedures and to evaluate their effectiveness.

Ability to establish and maintain effective working relationships with subordinates, supervisors and officials of user agencies.

## Human Resources Department

#### Minimum Qualifications

Bachelor's degree in Fine Arts with coursework concentrated in graphic design or graphic arts, Business Administration, Public Administration, or a related field. Three years of professional experience as a graphics production manager, lithographic plant manager, or a similar position requiring experience in the commercial printing field are required. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

**NATURE OF WORK** This is advanced professional and technical work managing the county's outgoing mail and graphic production services.

An employee in this class is responsible for the management of the county's main printing plant, creative design, digital print facilities and mail service center. Responsibilities include developing and administering highly specialized contracts for the purchase of paper, commercial graphics services, mail services, oversized display prints, sheet fed and web press pressroom production, business forms production, bindery and finishing services. Supervision is exercised over all elements of production through a staff of subordinate operational managers and by direct coordination with multiple commercial contractors and mail houses to assure timely delivery of finished products and for adherence to job specifications, contract terms, and required quality level of finished products. Considerable independent judgment is exercised in evaluating creativity, artistic aesthetics, and presswork quality. General supervision is received from an administrative superior who holds the incumbent responsible for the attainment of desired objectives.

#### ILLUSTRATIVE TASKS

Develops both long and short term planning goals for management of the county's main printing plant, creative design, digital print facility and mail service center.

Evaluates benefits of technology acquisition; formulates bid specifications for graphic arts equipment and software including graphic design computers, peripherals and software, prepress imaging equipment, printing presses and production digital printers, finishing equipment and mail center systems and equipment.

Develops and administers highly specialized procurement contracts for the purchase of mail services, printing papers, commercial graphics services including specialized sheet fed and web press pressroom production, business forms production, bindery and, finishing services; reviews and evaluates recommendations.

Develops highly complex variable data projects such as the printing and mailing of tax bills, polling place registers, voter cards, tax delinquency e-certified mail and Animal Services citations, collaborates extensively with clients, Information Technology Department (ITD) to provide electronic records for reference or uploading to various systems.

Consults with division clients and advises on proposed project's design specifications; manages all elements of production through a staff of subordinate operational managers and by direct coordination with multiple commercial contractors.

Recommends specifications and production alternatives to reduce production times and costs; monitors actual production schedules to ensure timely delivery of finished product; and serves as primary contact for customers on all purchased printing.

Manages the collection and reporting of facility performance information; monitors and periodically adjusts service rates and charges; directs programming and utilization of computerized job tracking, history, specification and billing system.

Educates subordinates regarding new industry production methods and materials; selects and reviews training seminars for employee attendance, attends professional conferences, trade shows and industry meetings; reviews a variety of technical and trade publications and communicates with trade associations.

Performs regular inspections of work areas to monitor work in progress, housekeeping, safe work practices, and the proper use of equipment.

Formulates complete and thorough job production specifications; selects production source (in-house offset, in-house digital or vendor)

### ISD Graphics Services Manager (000255)

based on analysis of various considerations including price, ability to meet delivery timeframes, individual job complexity and skill level of contractors; conducts spot market price inquiries for large jobs and awards job by preparing written service order with complete production specifications.

Provides critical analysis of digital color proofs for color intensity, positioning, pigmentation and specifies required color corrections.

Provides essential direction for mail piece design; selects the postage class based on knowledge of postal regulations and the client's objectives assuring the lowest available postage rates are obtained.

Conducts executive level relations with the US Postal Service and awarded vendors; exercises critical independent judgment in determining the best industry accepted production methods for each job in consultation with vendor production supervisors. Inspects quality of production at all stages; during on-site visits, stops work found to be inferior, substantiates the problem to vendor executives and develops method of restitution; employs considerable judgment and negotiating skills to avoid acrimony or protests and maintain a productive working relationship between the county and vendors.

Provides crucial managerial support to senior County officials in the production of printed materials during highly sensitive or emergency situations.

Reviews vendor invoices for services received, verifies charges, and approves payments.

Supervises the proper maintenance and storage of returned artwork, dyes, and job samples.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates, authorizes leave and overtime, reviews employee performance report prepared by subordinates, and rates performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of all aspects of creative design services including art design; page layout, illustration and image manipulation software, and the preparation of electronic files required for lithographic or digital reproduction.

Thorough knowledge of US Postal regulation, mail piece design and acceptable data formats required to achieve the client's objectives for the lowest postage rates.

Thorough knowledge of papers and inks/toners used in lithographic or digital reproduction and the technical understanding of the press/bindery running characteristics of each.

Thorough knowledge of the operating requirements of large lithographic printing presses and the ability to prepare printing order specifications to maximize press running economies.

Thorough knowledge of job finishing and the ability to supervise the preparation of designs that facilitates economical finishing.

Knowledge of technology associated with digital printing, mail room technology, electronic "pre-press" systems including page make-up, typesetting, document scanning, laser and ink jet output.

Knowledge of trade terminology used in graphics industry.

Ability to direct and understand web based print ordering systems, creating an integrated workflow of data submitted, color management practice including the development of custom software for automation, data driven production line, and database design.

Ability to establish and maintain effective working relationships with subordinates, senior County officials and other public and private

##### NATURE OF WORK

This is supervisory work in the operation of a countywide office supply storage and distribution warehouse.

An employee in this class is responsible for supervision of a delivery network and centralized supply operation stocking a wide variety of office supplies and support materials for distribution to county departments and agencies. Emphasis of the work is on planning, coordinating and implementing procedures for the requisitioning, receiving, storing, issuing and recording of a large variety of commodities. Duties include maintenance of a computerized inventory control system, monitoring stock levels of assigned facilities, reviewing bid specifications, making necessary changes to accommodate supply requirements and updating an annual merchandise catalog. Supervision is exercised over subordinate employees through assignment and review of work and provision of assistance with difficult problems. Supervision is received from an administrative superior who reviews work for conformity with departmental policies and procedures and for efficient operation of a centralized supply facility.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of warehousing and distribution employees engaged in the receipt, storage, issuance and delivery of a large variety of office, printing materials and supplies.

Develops, implements and evaluates methods and procedures for requisitioning, receiving, storing, issuing and recording supply items and materials.

Analyzes multiple routines within computer programs for inventory management and order generation; evaluates computerized subsystems of all operations; updates and modifies variables within formulas and operating routines; evaluates accuracy of functions and validity of data unit operations.

Initiates purchase requisitions; contacts vendors for competitive bid quotations; determines best method of purchase and lowest bidders.

Verifies receipt and issuance of supplies; approves invoices for payments, prepares reports concerning distribution activities and related matters; assures that merchandise is supported by billing documents, and balances revenues and expenditures.

Contacts vendors to discuss deliveries, shortages, improper goods and charges; returns merchandise and maintains documentation.

Establishes and reviews descriptions and technical designations in bid specifications; reviews terms of bid, advises on bid quotations and vendor selection.

Researches changes in office supply requirements, evaluates new products and requests from customers regarding additions or reports of unsatisfactory stock items.

Develops and enforces appropriate safety practices; implements storage and precautionary methods to protect stock from loss, damage or deterioration.

Reviews and updates merchandise catalog, acquires artwork and other descriptive materials from manufacturers.

Manages delivery network for office supplies and printing materials to multiple locations; investigates and resolves disputes or claims resulting from deliveries.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates

High school diploma or GED. One year of experience in automotive parts supply and inventory control is required.

Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is specialized work in the receipt, storage, inventory and issuance of parts, supplies and equipment in a large county fleet equipment operation.

Employees in this class are responsible for implementing procedures for the efficient and economical requisitioning, receiving, storage, issuing and recording of parts and materials for a large county fleet of heterogeneous vehicles and equipment. Duties require some independent judgment in providing timely acquisition of parts and supplies according to demand, and considerable knowledge of a wide variety of auto parts. Incumbents use manual and computerized inventory control systems for processing inventory transactions. Supervision is received from a technical supervisor who reviews work for satisfactory performance of assigned duties and adherence to operating policies and procedures.

##### ILLUSTRATIVE TASKS

Participates in the operation of a stockroom engaged in receiving, checking, storing, issuing and posting a large volume of parts and supplies necessary for support requirements of a large county fleet management operation.

Maintains perpetual and computerized inventory records; monitors stock consumption and adjusts stock levels accordingly to maintain optimum on hand availability consistent with fleet demands.

Conducts physical inventories of all stock balances with control records and reconciles differences.

Initiates requisitions for parts and supplies; directs contacts between stockroom and maintenance activities.

Arranges emergency and timely purchase of all special parts or supplies which are not normally stocked.

Checks deliveries against requisitions and purchase orders to verify that proper count and product, as specified, are received.

Maintains records of outside labor performed on County equipment by outside contractors.

Maintains a limited library of catalogs to provide stock numbers of those parts which can be most readily and accurately ordered by number rather than by noun.

Physical strength and agility sufficient to perform assigned duties.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the receipt, storage, issuance and inventory practices of a large volume auto parts supply warehouse.

Considerable knowledge of computerized inventory recordkeeping.

Knowledge of central purchasing procedures applicable to auto parts and supply requisitioning.

Knowledge of basic accounting principles and practices.

### **Auto Parts Specialist 1 (000261)**

Knowledge of the source and availability of auto parts and supplies, supply catalogs and stock nomenclature systems.

Ability to evaluate the merits of competitive auto part and supply products.

Ability to apply supply and inventory management procedures and practices effectively in the storage and issuance of materials and parts.

Ability to plan and maintain the supply of parts and material that will assure timely and effective support of maintenance requirements.

Ability to carry out required activities and duties with minimal supervision.

Ability to carry out oral or written instructions and maintain accurate and legible inventory and stock records.

Physical strength and agility sufficient for lifting and handling of heavy auto parts and supply stock.

NEW 10-87

#### **Nature Of Work**

This is specialized work in the receipt, storage, inventory and issuance of parts, supplies and equipment in a large county fleet equipment operation.

### Auto Parts Specialist 2 (000262)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in automotive parts supply and inventory control work to include cost recordkeeping are required. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is specialized work in the receipt, storage and issuance of auto, truck, motorcycle and heavy equipment parts for a large mobile equipment operation.

Employees in this class are responsible for the operation of an auto parts departmental supply room including the proper maintenance of inventory control records. Work involves dispensing parts for diversified equipment and auditing perpetual records of requisitions, invoices and goods distributed. Duties require considerable knowledge of auto parts and related supplies. Limited supervision may be exercised over clerical or storeroom assistants assigned to the supply unit. Supervision is received from an Auto Parts Supervisor who establishes operating procedures, policies and inspects work primarily for the timely and accurate filings of supply requisitions.

##### ILLUSTRATIVE TASKS

Operates storeroom for automotive parts, supplies and related commodities used in auto, truck, motorcycle and heavy equipment repair.

Receives and issues automotive and heavy equipment parts; checks catalogues and numbers; matches part descriptions to catalogue and initiates orders; maintains stocks and inventory records for all parts used in a larger maintenance shop.

Checks deliveries by vendors against requisitions for correctness, completeness and superficial quality.

Supervises a small crew of clerks engaged in receiving and shipping supplies or maintaining inventory records.

Responsible for maintaining the correct perpetual inventory level consistent with auto part demands.

Directs the emergency purchase of all parts not in stock to the proper vendor who can supply items meeting the department's requirements.

Directs contacts between stockroom and the Public Works Accounting Office and the Purchasing Division of the General Services Administration.

Maintains records and reports for outside labor performed on county equipment by other than county personnel.

Maintains an up-to-date file on Florida State Motor Vehicle Inspection stickers and applications.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of auto parts supply and inventory practices and procedures.

Considerable knowledge of record keeping procedures used for auto parts control including some basic electronic data processing and cost accounting techniques.

Knowledge of centralized purchasing procedures used in large government or nongovernment operations.

Ability to carry out daily activities with a minimum of supervision.

Ability to make mathematical calculations with speed and accuracy.

### Graphics Technician 1 (000267)

#### Minimum Qualifications

High school diploma or GED, and one year of experience in graphic arts are required; or Completion of 30 semester credits to include six semester credits in Architecture, Landscape Architecture, or Urban Design is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is moderately skilled graphic technical work in the illustration and presentation of data.

Employees in this class perform a variety of graphic technical duties in assisting professional staffs in the illustration and presentation of data in surveys, planning proposals and other studies. Responsibilities typically include use of various graphic arts techniques including map preparation and revision, preparation of special graphs and charts to illustrate narrative material, preparation of exhibits, taking and mounting of photographs and related work. Incumbents must have knowledge of the use of various media such as ziptone, ink, oils, acrylic paints, leroy pens, paint brushes, standard drafting and other tools such as xacto knives. Incumbents must also exercise creative ability in interpreting data and abstract ideas in graphic and illustrative forms. Work is performed under a technical superior who assists in completion of projects and reviews completed assignments for technical quality and completeness.

##### ILLUSTRATIVE TASKS

Completes various illustrations for use in brochures or pamphlets such as maps to appropriate scale from rough sketches, or statistical charts or graphs to explain textual material; uses appropriate colors and legend symbols; discusses completed work with planners or other staff personnel concerned.

Prepares book brochure cover designs from rough sketches or outlines; draws designs and inserts appropriate lettering or printing for reproduction.

Photographs buildings, parks, recreational areas, street scenes and other material relevant to planning, housing or other studies by use of black and white and color 35 millimeter cameras; develops film by darkroom techniques; enlarges film; indexes slide files; mounts enlarged photos and performs related photographic tasks.

Prepares exhibits for annexation, zoning changes, zoning waiver requests or other studies, such as maps to refined scale; shows streets by free hand lettering and property by use of color; matches maps with aerial photos for exhibits.

Uses standard drafting techniques in preparing drawings, plates and maps to refined scale in pen and ink or other media; shows lot lines, structures, streets or other data as needed for urban renewal or other uses.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of various graphic art techniques pertinent to the area of assignment.

Knowledge of the use of standard drafting and commercial art tools.

Knowledge of basic principles and techniques of drafting and layout.

Some knowledge of the basic principles and concepts of public planning and development.

Ability to present data in graphic, pictorial, tabular and cartographic form.

Ability to interpret abstract ideas in pictorial, graphic and related illustrative forms.

Completion of coursework in Computer Graphics Design, Commercial Art, or related field may substitute for the required experience to a maximum of one year.

#### Job Specifications

##### NATURE OF WORK

This is skilled and advanced graphic technical work in the illustration and presentation of data.

Employees in this class perform a variety of advanced graphic technical duties in assisting professional staffs in the illustration and presentation of data in surveys, planning proposals and other studies. Responsibilities typically include layout of complete brochures, construction of original maps, series preparation of complicated illustrative maps, or design of enlarged displays and exhibits. Incumbents frequently confer with members of the professional staff in the layout and development of graphics arts projects or the completion of illustrations required on an emergency basis. Work of this class differs from that of Graphics Technician 1 in that employees utilize advanced techniques such as use of scribing tools, color separation methods, air brushes for lettering, stripping and related skills, and possess considerable knowledge of graphic design and methods used in the printing industry. Work is performed under a technical superior who reviews completed assignments for timeliness in meeting design requests.

##### ILLUSTRATIVE TASKS

Designs and lays out complete brochures of book or folding type; discusses with professional staff use of graphics which would best illustrate narrative material; decides on type, size and color of illustrations; completes maps, graphs and charts as appropriate; lays out pages; inserts graphic designs and completes project accompanied by instructions for printing.

Prepares layout drawings for the construction of large exhibits and displays for public presentation; designs and letters large signs and showcards using air brush technique; drafts large scale maps for further enlargement; uses ziptone, or other media to illustrate and contrast map portions, such as population densities, original and current zoning districts and other data.

Artistically depicts proposed park developments and recreation facilities; draws buildings, athletic areas and landscaping characteristics to scale.

Discusses with professional personnel illustrations to accompany various long range studies such as mobility studies of traffic statistics and patterns; designs a series of maps illustrating traffic movements, trends of movement, auto accessibility and other information; decides on color to be used for each map; uses overlays for completion, and sets up material for reproduction by county service duplicating or outside printing firms.

Constructs original maps as needed, using cartographic skills; completes difficult modifications or extensions of base maps such as those for transportation, drawing enlargements to scale as necessary; uses color separation techniques for title and legend.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of basic principles of drafting.

Considerable knowledge of the use of standard drafting and a variety of commercial art tools.

Considerable knowledge of advanced graphic art techniques pertinent to the area of assignment.

Considerable knowledge of graphic arts design.

### Graphics Technician 2 (000268)

Knowledge of methods, practices and materials used in layout for reproduction and printing.

Knowledge of the basic principles and concepts of public planning and development.

Ability to advise professional personnel on appropriate graphic design to illustrate material.

Ability to present data in complete graphic, pictorial, tabular and cartographic form.

Ability to interpret abstract ideas in pictorial, graphic and related illustrative forms.

Ability to utilize various graphic arts media effectively and creatively.

Ability to maintain effective intradepartmental relationships.

This is skilled and advanced graphic technical work in the illustration and presentation of data.

## Graphics Supervisor (000269)

### Minimum Qualifications

High school. Two years of advanced graphic design experience to include one year at a supervisory level are required.

### Job Specifications

#### NATURE OF WORK

This is supervisory graphic technical work in the illustration and presentation of data.

Graphics Supervisors are responsible for the administrative and technical supervision of a small group of graphic technicians engaged in the presentation and illustration of data for various county departments. Related responsibilities include participation in more difficult graphic designs such as layout of complete brochures, as the need demands. Emphasis of the work is on receiving requests for graphic designs, setting up priorities, assisting employees in completion of maps, illustrations and other projects, coordinating work with the county central duplicating service, and evaluating competitive bids for purchase of printing and reproduction. One incumbent in the class supervises the preparation of various site development studies which illustrate graphically housing densities and related information for redevelopment purposes. Incumbents frequently give technical advice to professional staff personnel in the appropriate graphic design suitable for the presentation and illustration of special data. Work is performed under an administrative superior who evaluates work for quality of results.

#### ILLUSTRATIVE TASKS

Reviews and coordinates requests for graphic arts technical work from various county departments; distributes work to staff and assists employees as necessary in preparation of pictorial, cartographic and technical drawings and other work; explains the purpose and quality of projects, layout design, color choices, special maps for urban renewal use and other phases of work; reviews completed projects for technical quality of results.

Trains new employees in various graphic arts technical skills; approves leave requests; evaluates employee performance and counsels with employees as work related problems arise.

Plans schedules so that emergency requests are met, relative priorities are established and work for public presentation and display or public conference is completed on a timely basis.

Confers with the professional staff and superiors on appropriate graphic art designs which will best illustrate textual or other material; discusses long range projects requiring more extensive preparation.

Personally participates in or completes projects such as layout of folding brochures, completing color separation for maps or preparing complicated maps for reproduction.

Prepares purchase requests for outside printing, typesetting and photography; evaluates bids and makes recommendations; consults with printers on specifications outlined in bids.

Coordinates with personnel in the county central service duplicating unit on graphics work referred for completion.

Orders various commercial art and drafting supplies for the work of the section.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of basic principles of drafting.

Thorough knowledge of the use of standard drafting and a variety of commercial tools.

Thorough knowledge of advanced graphic art techniques pertinent to the area of assignment.

Thorough knowledge of graphic arts design.

Considerable knowledge of methods, practices and materials used in layout for reproduction and printing.

Considerable knowledge of the basic principles and concepts of public planning and development.

Ability to supervise subordinate staff in a manner conducive to full performance and high morale.

Ability to advise professional personnel on a variety of appropriate graphic designs.

Ability to present data in complete graphic, pictorial, tabular and cartographic form.

Ability to utilize various graphic arts media effectively and creatively.

Ability to interpret abstract ideas in pictorial, graphic and related illustrative forms.

Ability to maintain effective inter and intra departmental relationships.

Ability to prepare appropriate specifications for bids and deal effectively with personnel of printing companies.

### Graphics Supervisor (000269)

NEW 10-70

#### **Nature Of Work**

This is supervisory graphic technical work in the illustration and presentation of data.

### Buyer (000270)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in large-scale purchasing to include purchasing commodities and services through a bidding process are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized work in the purchase of assigned commodities in a central procurement operation of the county.

Employees in this class are responsible for purchasing various items in assigned commodity groups for one or more departments. Emphasis of the work is on review of requisitions, preparation of bid invitations, analysis of bids, recommendation of awards and preparation of purchase orders. Duties include communication with vendors and departmental officials on purchasing, shipping, receiving and invoicing problems and processes. Some employees in this class perform procurement work in a hospital facility and may be assigned to purchase of certain groups of commodities, such as hospital drugs. Incumbents must apply knowledge of specifications of frequently purchased commodities, sources of supply, current prices and market trends in the timely purchasing of a large volume of goods. Supervision is received from a technical or administrative superior who reviews work progress and completed work to assure conformance with established policies and procedures.

##### ILLUSTRATIVE TASKS

Reviews purchase requests; contacts departmental officials to clarify amounts or nature of items requested; refers to current supply catalogues and other references for sources of supply.

Reviews specifications used as the basis for bids on all commodities within an assigned commodity group.

Obtains competitive bid quotations from vendors; maintains mailing lists of vendors; tabulates and analyzes bids to determine lowest and best bidders; prepares purchase orders; maintains files of vendors to whom bids have been sent.

Makes studies and collects data on current market conditions to keep informed on market trends; interviews salesmen regarding ordering of supplies.

Schedules delivery dates and follows-up on delayed deliveries.

Selects and purchases a limited variety of merchandise items for resale.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of large scale purchasing methods and procedures in an assigned commodity grouping.

Knowledge of federal, state and local laws, rules, regulations and ordinances effective in governing the purchase of commodities and services.

Knowledge of specifications, grades, qualities, supply sources and market factors of commodity categories frequently required by departments in the area of assignment.

Knowledge of departmental policies, rules and regulations regarding the purchase of assigned commodity groupings.

Knowledge of methods used in maintaining accurate and systematic procurement records.

Ability to analyze and process a large volume of procurement records and to perform a variety of related clerical work.

## Human Resources Department

### Minimum Qualifications

Bachelor's degree. A minimum of seven to ten years of progressively responsible managerial experience in a large scale, diversified operational environment to include property management, facilities maintenance, fleet procurement and maintenance or real estate acquisition is required.

### Job Specifications

#### NATURE OF WORK

This is highly responsible, executive level work in planning and directing the complex facilities management, fleet management and real estate activities of the Internal Services Department.

An employee in this class is responsible for supervising, directing and coordinating diversified operations in the provision of a variety of services to County departments and agencies. Responsibilities include directing centralized warehousing and distribution of commodities and merchandise, management of large multi-agency buildings and fleet management activities and real estate acquisition and maintenance of county properties. Responsibilities include ensuring the provision of a variety of services to County departments and in an economical and efficient manner, monitoring divisional operations to ensure maximum productivity at minimum cost, and establishing objectives for departmental operations and measuring results. The incumbent exercises an extensive degree of independent judgment and professional managerial knowledge in organizing and directing Countywide service functions. Supervision is exercised through subordinate levels of managers and supervisors over a large staff of professional, technical, administrative and clerical employees engaged in various divisional operations. General direction is received from the Department Director who holds the incumbent responsible for the professional management of departmental operations and achievement of desired goals and objectives.

#### ILLUSTRATIVE TASKS

Directs and coordinates, through subordinate managers and supervisors, the management of large multi-agency buildings including, security management, elevator engineering services, parking operations, utilities operation and maintenance and other building management services.

Directs and coordinates, through executives and supervisors, materials management functions including central supply warehousing and distribution, capital inventory management, retail sale and disposal of surplus County property, auction of surplus County vehicular equipment, moving/relocation services for County departments, and other related services.

Directs, through subordinate executives, managers and supervisors, fleet management operations including the purchasing of vehicles, repair and maintenance of a large fleet of automotive and heavy equipment, management of contracts for fuel and leased vehicles, and cost analysis of equipment acquisition, maintenance and retirement.

Directs and coordinates, through subordinate managers and supervisors, the assessment and master planning of land, facilities and capital assets, administration of site review and zoning approval processes, acquisition of public and private property by purchase or lease, out-leasing of County property for office and retail uses, and related facilities development activities.

Establishes departmental programs, functions and direction; sets goals and objectives and monitors their achievement; evaluates departmental activities and services and assesses their effectiveness in meeting the needs of County departments and agencies and various municipalities.

Reviews organizational patterns, work relationships and staff responsibilities; structures the organization of the department to effectively achieve organizational goals.

Meets with executive, supervisory and administrative employees to discuss and resolve budgetary issues, review projects and programs, establish or redirect priorities, review policies and procedures, and implement improvements in operations.

Makes decisions regarding hiring, discipline and promotion of subordinates; exercises authority for departmental personnel actions consistent with collective bargaining agreements, County personnel rules, and all other applicable rules and regulations.

Performs related work as required

#### KNOWLEDGES, ABILITIES, AND SKILLS

Extensive knowledge of the organization, interrelationships and operations of the Internal Services Department.

Extensive knowledge of the mission, goals and objectives of the department in providing effective services to County departments and agencies.

Extensive knowledge of the principles of general management, business and public administration.

Thorough knowledge of local, state and federal regulations pertaining to various departmental operations.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of public relations principles and techniques.

### Division Director 2, ISD (Risk Management) (000297)

#### Minimum Qualifications

Bachelor's degree and a minimum of five to nine years experience in directing, planning, and managing risk management activities including tort liability, workers' compensation, property casualty program, or industrial safety programs are required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional managerial work in planning and directing the activities of the Risk Management Division of Internal Services Department.

An employee in this class is responsible for directing and supervising operations of the Risk Management Division, including claims administration and management of the county health insurance and industrial safety programs. Emphasis of the work is on advising county officials on comprehensive workers' compensation, liability claims and industrial safety programs for the county and a large number of municipalities, and administration of the county health and group insurance program. The incumbent exercises considerable independent judgment and professional managerial knowledge in the application of the principles and practices of insurance and risk management, determination of insurance requirements for contracts, leases and agreements, analysis of insurance policies and requirements necessitated by bond issues and various statutes, coordination of a variety of related financial and administrative services and resolving operational problems. Supervision is exercised through subordinate executives and supervisors over a staff of professional, administrative and clerical employees assigned to various division operations. General direction is received from an Assistant Department Director who reviews work through personal conferences and various reports and holds the incumbent responsible for efficient professional and administrative management of divisional operations and attainment of goals and objectives.

##### ILLUSTRATIVE TASKS

Directs, supervises, and administers the Risk Management Division's six units to include workers' compensation, tort/liability, property casualty, safety and data management; meets with subordinate managerial staff to reviews discuss, formulate and implement policies and procedures consistent with statutory requirements and the mission of Miami-Dade County; directs, monitors and assures county policies and management directives are implemented in compliance with state statutes, federal regulations and mandates and county policies.

Reviews issues arising from the administration of the county's workers' compensation, tort/liability, property/casualty and safety/loss prevention programs to insure adherence to applicable laws, guidelines and policies; reviews exception cases and issues requiring overall interpretation and special handling of potentially significant issues.

Provides direction and advice to other areas of county government regarding workers' compensation, tort/liability, safety/loss prevention and property/casualty; represents the division in a variety of forums with management personnel from within county government as well as outside the county in discussion of risk management and employee benefit issues.

Develops Request for Proposals (RFPs) for all medical, dental, life and vision coverages, short term and long term disability benefits and prepaid legal products; participates in evaluation of proposals, negotiates contracts, presents recommendations to the Board of County Commissioners (BCC), and monitors contracts for compliance with terms; administers the county's Section 125 programs, executive benefits program, and deferred compensation (457) program.

Administers the county's self insured, self-administered workers' compensation program; ensures compliance with Florida Statute 440 governing provision of workers' compensation benefits; administers workers' compensation program provided to four municipalities to include communication with municipalities concerning financial accounting, premium billings, proposed settlements and other matters related to workers' compensation; serves as a voting member of the Service Connected Disability Panel established by Section 2-56 of the Miami-Dade County Code; authorizes settlement of workers' compensation claims.

Administers the county's self-insured, self-administered tort/liability program in compliance with Florida Statute 768.28 to include investigation and resolution of all claims against Miami-Dade County for issues of negligence resulting in bodily injury or property damage;

### **Division Director 2, ISD (Risk Management) (000297)**

administers the county's subrogation unit to seek recoveries on behalf of the county for damages to county property caused by others; authorizes settlement of claims up to \$25,000 as established by Administrative Order 2-4; recommends settlements in excess of \$25,000 to the County Manager.

Administers the countywide safety program as outlined in Administrative Order 7-14; insures compliance with governmental regulations, laws and rulings.

Oversees the development of specifications of coverage and underwriting data for countywide property and casualty programs; evaluates and determines adequate limits, retentions, terms and conditions; develops and analyzes Request for Proposals, recommendations, contract negotiations and presentations to the Board of County Commissioners.

Reviews all contracts, professional service agreements, lease agreements and various other agreements entered into by the Board of County Commissioners for the purpose of determining indemnification and insurance requirements; monitors procurement of required coverage by the vendor and maintenance of coverage during the term of the contract.

Analyzes incurred and paid losses and projects future payments; recommends to the Office of Management and Budget Countywide funding levels for all self-funded programs which includes workers' compensation, general and auto liability, police, professional and health insurance Point of Service (POS) plans; supervises input and output of computerized risk management information used for claims record keeping, check writing and financial data including electronic reporting of claims to the state pursuant to statutory requirements for self-insured programs.

Supervises the preparation of the division's operating budget, attends budget hearings and negotiates with the Office of Management and Budget regarding operational needs; oversees the Internal Service Fund administration.

Makes decisions and recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

#### Nature Of Work

This is highly responsible professional managerial work in planning and directing the activities of the Risk Management Division of General Services Administration.

### Cashier 1 (000301)

#### Minimum Qualifications

High school diploma or GED. One year of experience as a bank teller or a cashier responsible for cash sums of money is required.

#### Job Specifications

##### NATURE OF WORK

This is clerical work in the receipt, deposit and recording of cash transactions and performance of related clerical duties.

Employees in this class are responsible for receiving and maintaining records for a large volume of cash receipts in payment of bills, taxes, fees or fines. Work may vary depending on the department to which assigned but typically includes making of change, issuance of receipts for monies collected, maintenance of records of work transactions, deposit of cash, and validation of cash and negotiable instruments. Incumbents usually operate cash registers, check endorsers, validating machines or other standard office equipment such as adding machines. Supervision is received from a clerical or accounting superior who audits receipts, prepares reconciliation reports, and reviews work in progress as necessary.

##### ILLUSTRATIVE TASKS

Receives from members of the public or through the mail monies for payment of traffic fines, court costs or posting of cash bail bonds; answers inquiries of the public on amount of fines due; operates cash register to record transactions according to current procedure; validates cash transactions on appropriate validating machines; prepares bond receipts; completes various form letters for return of money where appropriate.

Receives cash and negotiable instruments for payment of inpatient or outpatient hospital bills; makes change by operating cash registers; receipts bills on validating machines or issues vouchers; explains charges to those making payments; answers telephone inquiries relating to standard charges; assists in preparation of bank deposits.

Receives payments for real estate taxes; detects errors on negotiable instruments such as omission of signature, erroneous amounts or dates; balances daily cash and check receipts to register totals; operates validating registers.

Compiles reconciliation of monies received; checks and balances cash and negotiable instruments against receipted copies of bills, register tapes or charge vouchers; posts receipts by totals, or various distributions which coincide with general ledger accounts.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of business arithmetic.

Knowledge of departmental procedures in the receipt and recording of cash transactions.

Knowledge of the operation of cash registers, validating machines and other office equipment.

Knowledge of standard fines, fees and other charges in the departmental activity to which assigned.

Ability to deal with the public courteously and patiently.

Ability to perform repetitive cash transactions accurately and with speed.

Ability to make rapid and accurate arithmetic computations.

Skill in the operation of cash registers, validating machines and other office equipment.

Bachelor's degree in Business Administration, Public Administration, Finance, Accounting or a related field.

Advanced clerical or paralegal experience in bankruptcy proceedings, tax collection, real estate or property appraisal may substitute for required education on a year-for-year basis. A Paralegal Certificate may substitute for two years of the required education.

#### Job Specifications

##### NATURE OF WORK

This is responsible paralegal work in the collection of unpaid taxes from taxpayers in bankruptcy and related paralegal tax collection activities.

The Paralegal Collection Specialist is responsible for performing various duties in processing, follow-up and attending court in cases of unpaid taxes in assessment protest, bankruptcy, tax lien and other types of tax collection cases. Emphasis of the work is primarily on keeping informed on taxpayer bankruptcy filings, attending bankruptcy hearings to present information and keep informed on proceedings and to advise when action by the County Attorney's office would be required. Additional responsibilities include processing of tax payments in protest of assessment cases, filing probate claims, attending sheriff sales for the collection of tax liens and related work. Supervision is received from an administrative superior who discusses cases in process as well as action to be taken by departmental officials or the County Attorney's staff and reviews work for results in tax collection.

##### ILLUSTRATIVE TASKS

Maintains contact with the County Attorney's office in cases of unpaid taxes where legal action is involved; furnishes pertinent information from departmental files for use in litigation.

Assists in filing of claims for unpaid personal property taxes in Bankruptcy Court; attends first meeting of creditors and hears objections to claims for unpaid taxes; attends and monitors bankruptcy proceedings and keeps superiors advised of the status of county tax claims and whether action by the County Attorney will be needed; advises the County Attorney of negotiations which have taken place in the Court.

Completes necessary documents subsequent to Bankruptcy Court action in finalizing county claims and maintains related records.

Follows the directions of the Court in receiving payment of taxes in protest of assessment cases; answers inquiries on such assessments and payments.

Assembles necessary information in instances where the Tax Collector is either a plaintiff or defendant; maintains contact with the County Attorney to assemble information and prepare preliminary documents; answers subpoenas served on the Tax Collector's Office.

Prepares and files various claims for the Tax Collector, including claims in probate cases or claims with the Secretary of State in the liquidation of insurance companies.

Attends sheriff sales for the collection of tax liens and processes any follow-up documents; pursues collection of delinquent possessory interest assessments.

Advises taxpayers and staff members on tax collection cases in litigation including amounts of delinquency status of claims, awards by the Court and related information; advises staff on established litigation processes which relate to tax collection work.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the functions, regulations and procedures relating to the work of the division.

### Paralegal Collection Specialist (000305)

Considerable knowledge of legal functions and procedures relating to bankruptcy proceedings.

Considerable knowledge of legal procedures in the filing of claims in bankruptcy, probate and other proceedings.

### Job Specifications

#### NATURE OF WORK

This is advanced paralegal work with supervisory responsibility in the collection of unpaid taxes in bankruptcy proceedings.

An employee in this class is responsible for supervising staff of paralegal collection specialists performing duties in the collection of unpaid real estate and personal property taxes in various types of tax collection cases. Responsibilities include negotiating settlements with the public and their legal representatives, attending court and testifying on behalf of the County concerning the status of County claims, evaluating methods and procedures for the collection of County funds and recommending improvements, and reviewing various legal document for the County Attorney's Office. The incumbent exercises considerable independent judgment in coordinating bankruptcy case activities with the County Attorney's Office and in assuring that the County's interests are represented in court. Supervision is exercised over a staff of clerical and paralegal specialists assigned to paralegal or clerical activities. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for effective paralegal collection management and the collection and processing of unpaid taxes.

#### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of paralegal collection specialists engaged in preparing and completing various documents, assembling information, attending court, and performing related duties in the complex collection of unpaid real estate and personal property taxes.

Plans and coordinates the work of clerical employees engaged in data entry of bankruptcy case information, accessing court and state records and processing a large volume of payments.

Briefs departmental and interdepartmental representatives concerning bankruptcy matters and makes recommendations for implementing procedures for the transfer of information.

Attends meetings and negotiates settlements with the public and their legal representatives, attends bankruptcy court hearings as a representative of Miami Dade County and testifies concerning the status of Miami-Dade County claims.

Evaluates methods and procedures for collection of County funds through bankruptcy court and recommends new approaches.

Prepares and/or reviews motions, affidavits, and various other legal documents for the County Attorney's Office.

Attends bankruptcy seminars and conferences and review publications to keep abreast of new regulations and procedures pursuant to federal bankruptcy laws and County tax collection procedures.

Prepares unit budget and reviews monthly revenue and expenditures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### NATURE OF WORK

This is professional accounting work in the application of established accounting principles and methods in the preparation, maintenance, analysis and control of financial records.

Employees in this class are responsible for preparation, maintenance, analysis and control of fiscal records and statements in a departmental or central fiscal operation, or for assisting superiors with more complex accounting activities and the resolution of problems, applying professional accounting principles and methods to a variety of accounting procedures and problems. Emphasis of the work is on the maintenance of controls and balances of fiscal records through standard relationships of subsidiary ledgers to general ledgers or other accounting control methods. Duties require independent judgment in resolving technical accounting problems. Account classifications and operational standards are determined by established county and departmental regulations or statutory requirements. Supervision may be exercised over subordinate clerical personnel who assist in accounting, collection and related activities. Supervision is received from an administrative or professional superior who reviews progress and completed work for adherence to professional accounting standards and program guidelines, and completed work is also subject to periodic internal or external audit.

##### ILLUSTRATIVE TASKS

Participates in the maintenance of accounting records in a departmental fiscal operation according to established account classifications, subsidiary journals, general ledgers and departmental or statutory accounting procedures; advises on or makes adjusting entries.

Supervises subordinate Account Clerks, Cashiers and other clerical personnel engaged in routine bookkeeping operations in posting and balancing of journals, ledgers and working papers.

Prepares various financial statements and schedules, income and expenditure reports, statistical summaries and special reports from accounting records; assists superiors in the preparation of complete periodic financial statements of departmental or program operations.

Assists superiors in budget preparation and modification as assigned; monitors budget expenditures and advises on potential problems such as accelerating expense categories; initiates requests for transfers of funds and budgetary amendments.

Provides direct assistance to agencies funded under federal grants by assisting in the establishment of accounting records, preparation of accruals and reimbursement packages, submission of periodic reports, and preparation of budgets; assures that accounting records and documentation are in accordance with departmental requirements; conducts pre-audit tests, analyses and evaluations of agency accounting records such as payrolls, accounts payable, and inventories to assure conformance with established guidelines; prepares reports of findings for superior.

Reviews and approves expenditures for reimbursement by verifying propriety of expense, assuring proper documentation, verifying availability of funds and compliance with local, State and Federal laws, rules and regulations.

Analyzes statistical and fiscal records and reports to determine projected expenditures, deficits or surpluses, budget modifications and costs of operations of various activities; examines cost codes for expenditures, encumbrances and balances to determine if codes have been properly charged and encumbered.

Prepares monthly cost statements and working papers; distributes overhead expenses according to established formulae; compiles costs for incorporation into operating and special reports; prepares journal entries for the general ledger and subsidiary ledgers.

Prepares analysis of sales; calculates gross profits and gross profit percentages from sales and cost of sales figures; prepares profit and loss

### Accountant 1 (000315)

statements for revenue producing organizations.

Reconciles bank statements, and reconciles departmental reports with computer generated reports.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of professional accounting principles and procedures.

Knowledge of the general principles of public financial administration including the budgetary process, reporting requirements and cost accounting techniques.

Knowledge of computerized accounting systems, operating activities and fiscal programs of the department or agency of assignment.

Knowledge of sources of information and accounting techniques used in the preparation of fiscal reports, statements, schedules and summaries.

Knowledge of federal, state and local laws, rules, regulations and guidelines relating to financial records of county departments and agencies funded by federal grants.

Some knowledge of management principles and supervisory practices and procedures.

Knowledge of office methods and procedures and familiarity with the use of standard office equipment.

Ability to prepare complete and accurate accounting reports and statements.

Ability to perform detailed work involving written and numerical data.

Ability to make arithmetic calculations rapidly and accurately.

Ability to interpret and apply accounting procedures and guidelines to a variety of accounting operations and problems.

Ability to supervise a small group of clerical subordinates in a manner conducive to full performance and high morale.

Ability to communicate effectively, both verbally and in writing.

Bachelor's degree in Accounting and one year of professional accounting experience; or a Bachelor's degree to include 21 semester credits in Accounting and one year of professional accounting experience; or one year of satisfactory performance as an Accountant 1 in the County service is required. Data Processing coursework may substitute for Accounting coursework to a maximum of six semester credits. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional or supervisory accounting work in the application of established accounting principles and methods in the preparation, maintenance, analysis and control of financial records.

Employees in this class are responsible for planning, assigning and reviewing the work of subordinate accountants and clerical employees engaged in the preparation and analysis of financial statements and reports, classifying, balancing and maintaining journals and ledgers and performance of related accounting duties. Some incumbents in the class exercise significant responsibility as the reviewing authority for reimbursement by State and Federal agencies for locally expended funds. Work differs from that found in the Accountant 1 class in that these positions require more advanced knowledge of accounting theories, principles and practices as well as governmental accounting procedures, and involve supervisory responsibility of a more advanced nature. Incumbents exercise considerable independent professional judgment in solving problems that arise within their assigned areas, and are called on to develop and design new and revised accounting procedures or systems as the need demands. Supervision is typically exercised over a group of subordinate accountants and clerical employees who assist in various accounting, collection and related activities. Supervision is received from a professional or administrative superior who reviews accounting records, statements and reports for attainment of desired quality of results and adherence to professional accounting standards and program guidelines. Completed work is also subject to periodic internal or external audit.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of subordinate professional and clerical employees engaged in recording and classifying accounting transactions, maintaining and reconciling journals, ledgers and other fiscal records, preparing and analyzing periodic financial statements, reports, summaries, schedules and tabulations.

Analyzes out-of-balance conditions, financial reports, budget documents and related accounting papers, and identifies causes or problems; advises superiors on adequacy of financial controls and solutions to complex accounting problems.

Studies, develops, refines and recommends new or revised accounting procedures; examines accounting problems and recommends revisions in forms, account classifications and statements to improve productivity and clarity.

Assists internal and external auditors in the periodic examination of fiscal records by providing reports and information; initiates corrective action as the result of audit to improve financial operations and controls.

Assists in the preparation of budget estimates and writes narrative justifications; provides budgetary information to departmental officials; compiles individual operating budgets into complete department documents; approves proposed encumbrances as to availability of funds; assists in the preparation of monthly allotments of appropriations and operating revenues; initiates budget amendments and changes in allocations between expense categories.

Prepares or supervises the preparation of a variety of complex financial statements, budgetary or cost studies, and special studies which relate to computerized accounting systems and departmental operations.

Coordinates accounting activities with other departmental financial operations; advises and trains subordinates in new and revised accounting

### Accountant 2 (000316)

procedures; attends conferences and meetings and provides information for making decisions on the development and implementation of new policies and procedures.

Reviews and approves expenditures for reimbursement by federal and state agencies by verifying propriety of expense, assuring proper documentation, verifying availability of funds and compliance with local, state and federal laws, rules and regulations; acts as reviewing authority for expenditures under federal or state reimbursement contracts where consequence of error would result in county liability for substantial amounts of funds expended by these government agencies; prepares final requisition requests to local, State and Federal agencies for reimbursement according to established procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on job related problems; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of professional accounting principles and practices and the development, installation and maintenance of government accounting systems.

Considerable knowledge of the sources of information, accounting techniques and organization of information used in the preparation of fiscal reports, statements, schedules and summaries.

Considerable knowledge of Federal, State and local laws, rules, regulations and guidelines relating to financial records of county departments and agencies funded by federal grants.

Considerable knowledge of computer accounting systems, operating activities and fiscal programs of the department or agency of assignment.

Considerable knowledge of the general principles of public financial administration including the budgetary process, reporting requirements and cost accounting techniques.

Knowledge of management principles and supervisory practices and procedures.

Knowledge of office methods and procedures and familiarity with the use of standard office equipment.

Ability to supervise a staff of professional and clerical employees in a manner conducive to full performance and high morale.

Ability to analyze complex accounting processes and problems and make effective recommendations for their resolution.

Ability to design, develop and implement revised and new accounting procedures and techniques.

Ability to analyze and interpret complex accounting data, statements and tabulations.

Ability to prepare and supervise preparation of complete and accurate accounting reports and statements.

Ability to understand and interpret complex governmental procedures and regulations related to accounting requirements applicable to the organization to which assigned.

Ability to communicate effectively, both verbally and in writing.

Ability to perform detailed work involving written and numerical data.

##### NATURE OF WORK

This is advanced professional accounting and supervisory work in the application of accounting principles and methods in the preparation, maintenance, analysis and control of financial records.

Employees in this class are responsible for supervising a large staff of subordinate professional accountants and clerical employees engaged in accounting work for complex fiscal activities. Emphasis of the work is on supervision of major fiscal operations for a department including developing procedures and techniques necessary to carry out financial activities, preparation of budgets, accounting for revenues and disbursements, and preparation of complex fiscal reports. Responsibilities include coordinating accounting activities with other governmental accounting units and implementation of specialized accounting systems and reports. Incumbents exercise considerable independent judgment and professional knowledge of accounting principles, theories and practices as well as knowledge of governmental accounting procedures. Supervision is exercised over professional and clerical personnel through review of records and reports for adherence to established accounting principles, practices and procedures. General supervision is received from an administrative or professional superior who reviews work for attainment of desired results, adherence to professional accounting standards and program effectiveness. Completed work is also subject to periodic internal and external audit.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate professional and clerical employees in a large accounting operation engaged in recording and classifying accounting transactions, maintaining and reconciling journals, ledgers and other fiscal records, preparing and analyzing periodic financial statements, reports, summaries, schedules and tabulations, revenue and expenditure reporting, budgetary calculations, recording accounts receivable and accounts payable, and bank account reconciliations.

Develops and supervises the installation of new and revised accounting systems and procedures in order to improve efficiency in financial reporting; coordinates efforts with other departmental officials.

Assists internal auditors and outside auditors in the examination of departmental accounting activities and preparation of audit working papers; initiates corrective action as the result of audit findings to improve financial operations, statements and controls.

Assists agencies funded under Federal grants with preparation of audit responses to reports generated by internal and external auditors; visits agencies and reviews exceptions noted by auditors and reviews agency responses for completeness and advises on additional required information.

Prepares and coordinates department budget requests; reviews preparation of specialized budget documents; supervises the preparation of a variety of complex financial statements requiring considerable knowledge of computerized accounting systems and departmental operations; assists subordinates with difficult or unusual problems.

Assigns and supervises pre-audits of all invoices submitted as direct payment bills in order to determine validity, purpose of expenditure and proper appropriation coding.

Provides for and supervises the maintenance of the general ledger including the posting of journal entries from subsidiary ledger accounts and preparation of the balance sheet.

#### NATURE OF WORK

This is advanced technical computer programming and systems analysis works in the development of complex data processing functions for the Finance Department.

An employee in this class is responsible for the design, implementation and automation of a large number of reporting entities in the financial system including documentation and support. Duties include development and operation of automated applications on a network of micro-computers, providing technical assistance to all departmental PC users, and assessing reporting needs of staff accountants and auditors. The incumbent exercises independent judgment in analyzing computer needs, developing new accounting systems and financial statements, and instituting modifications to existing systems. Supervision may be exercised over subordinates engaged in development of less complex computer applications. Supervision is received from a professional superior who reviews work for quality of results and attainment of objectives.

#### ILLUSTRATIVE TASKS

Oversees micro-computer financial system network during annual audit process; maintains and updates all reporting entities by instituting proposed financial adjustments; presents current financial statements to accounting and audit managers for review or further modifications; reviews financial statement adjustments to assure integrity of reports according to acceptable accounting methods; consults with accounting professionals when financial adjustments appear inappropriate or incorrectly defined.

Supervises subordinates in development of less complex financial spreadsheets and smaller databases.

Provides assistance, problem resolution and technical support to PC users in the design and development of micro-computer applications; studies requirements of applications, determines feasibility of proposed programs, and makes recommendations to supervisor; coordinates meetings with users to assure that automated needs are fully analyzed and met.

Designs and develops financial reporting programs; continually analyzes changing needs in report formats and accounting programs, and institutes modifications.

Assists staff accountants in budget preparation and preparation of financial statements to begin fiscal year.

Maintains contacts with external auditors and provides financial reports and documentation to expedite audits; develops specialized reports to meet procedural needs; assists in correction of erroneous statements.

Organizes files and documentation for back-up to adjustments in financial statements; exercises responsibility for inventory of hardware and software; provides for maintenance and upkeep of micro-computer network and accessories.

Produces final format of financial statements used in publication of County records; produces financial statements for the Metro-Dade Annual Report, the State and Federal Single Audit of Granting Agencies, and the Controller's Report to the State Comptroller.

Performs related work as required

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and practices of systems analysis and design.

Considerable knowledge of the operating characteristics and maintenance requirements of a micro-computer network.

Considerable knowledge of the purpose, operation and function of Finance Department information systems.

Considerable knowledge of the content, structure and information pertaining to Metro-Dade County financial statements.

Ability to analyze and evaluate complex fiscal, accounting and auditing programs.

Ability to design, develop and implement complex computer systems related to Countywide financial reporting.

Ability to evaluate user information requirements.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to work independently with a minimum of instruction and supervision.

### Assistant Portfolio Manager (000330)

#### Minimum Qualifications

Bachelor's degree in Finance, Accounting, Economics, Public Administration, Business Administration or a related field. A minimum of two to four years of experience in the management of a large-scale public portfolio is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible professional work with supervisory responsibility in the financial management of a public investment portfolio.

An employee in this class is responsible for investing surplus public money in various securities to obtain maximum financial return consistent with future money requirements. Emphasis of the work is on evaluating prices, maturities, and yields of U.S. securities, comparing maturities against expected future money needs, determining which prices and maturities are best for the County, and adjusting investment strategy by balancing maturities and expenditures with the investment yield curve. Responsibilities include supervising computer processing of all security transactions, initiating bond service payments on County bond issues, and assisting auditors in their examination of investment portfolio transactions. The incumbent exercises considerable independent judgment in the application of technical expertise to making investment management decisions. Supervision is exercised over subordinates performing accounting duties related to the management of the investment portfolio and assisting in other phases of the work. General direction is received from a professional superior who reviews work through personal conferences and reports for the effective management of the County's investment portfolio.

##### ILLUSTRATIVE TASKS

Prepares investment recommendation forms for available funds; receives calls and contacts bond dealers, brokerage houses, and major banks to obtain quotations on repurchase agreements and U.S. Treasury securities of various maturities; compares yields and then compares maturities against future money needs for both purchases and sales; determines which prices and maturities are best for County needs.

Purchases and sells securities to ensure that surplus money is fully invested at maximum rates obtainable to fit estimated future money needs; ensures that various securities offered as collateral for repurchase agreements are adequate by computing their current resale value; notifies safekeeping bank of the purchase and sale of securities, description of securities and the amount that will be debited or credited to the County's account.

Administers procedures for the County's wire transferring of funds; audits all transfers daily to ensure they are processed correctly.

Administers cash flow procedures and coordinates the transfer of information on expenditures and revenues by banks and County departments; forecasts short and long-term cash needs of the County.

Maintains working relationships with officials of banking institutions, brokerage houses and bond dealers.

Supervises computer processing of all security transactions and preparation of periodic reports and summaries.

Administers the Excise Utility Tax.

Transfers bond service payments as they become due in County bonds outstanding.

Assists auditors in the supervision of accounting functions associated with investments such as checking costs, interest, and selling prices.

Assists auditors in the examination of investment operations, records and reports.

Prepares requests for proposals on banking services as required; prepares and administers division budget.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the principles of finance and accounting.

Thorough knowledge of money market characteristics and dynamics.

Thorough knowledge of U.S. Treasury securities, interest rates and yields.

Thorough knowledge of the rules, regulations, and statutes pertaining to the investment of municipal public funds.

Considerable knowledge of the financial operations of County departments.

Considerable knowledge of the principles and practices of public financial administration.

Knowledge of departmental cash management policies.

Knowledge of supervisory principles and practices.

##### NATURE OF WORK

This is paraprofessional work in the financial management of a public investment portfolio for the County.

An employee in this class is responsible for performing advanced clerical and technical work supporting the investment of surplus public money in various securities to obtain maximum financial return. Duties include operation of the Moneymax investment computer system, reconciling Moneymax reports with County records, maintaining responsible contacts with banks, investment dealers and brokers, and processing bank advices, investment letters, transfer letters and other correspondence. The incumbent exercises some independent judgment in the application of knowledges of applicable laws pertaining to legal investments of Miami Dade County. Supervision may be exercised over subordinate clerical employees engaged in various investment related activities. Supervision is received from a professional superior who reviews work for timeliness, accuracy, efficiency and conformance to established policies and procedures.

##### ILLUSTRATIVE TASKS

Creates, enters, deletes and updates account files on the Moneymax investment system; receives monthly reports from Moneymax and assures that reports balance with County FAMIS transactions; distributes to applicable departments.

Establishes and maintains effective communication with banks, concerning balances, transfers, debt service and investments, and with investments dealers and brokers concerning investments and bids and offers.

Verifies that advices received from brokers and investment dealers balance; contacts brokers or dealers in event of discrepancies.

Supervises subordinate clerical employees engaged in typing and filing investment and debt service letters and performing other related work.

Calculates monthly, quarterly and annual average price rates for Treasury Bills based upon details of Treasury Bill auctions.

Prepares or supervises the preparation of transfer letters, investment letters for the purchase or sale of investments, time deposit letters.

Verifies time deposit interest using formula and compares amounts against Time Deposit Agreements.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of rules, regulations and laws governing general County and County department investments.

Considerable knowledge of departmental cash management policies.

Considerable knowledge of the operating characteristics of the Moneymax investment system.

Knowledge of the provisions of the Excise Utility Tax.

Knowledge of money market instruments including trends, terms and maturities.

Knowledge of arithmetic.

Knowledge of supervisory principles and practices.

Ability to operate the Moneymax investment system to create files and obtain timely reports.

Ability to communicate clearly, precisely and concisely with banks, investment dealers and brokers.

Ability to work with speed and accuracy under pressure of deadlines.

Ability to keep current on money market trends and the current economic and finance climate.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

### Convention/Tourist Tax Examiner 1 (000337)

#### Minimum Qualifications

Bachelor's degree in Accounting or Bachelor's degree in Public Administration, Business Administration, Finance or related field to include a minimum of six semester credits in Accounting. One year of auditing experience is required.

#### Job Specifications

##### NATURE OF WORK

This is professional office and field work in the examination of records pertaining to Convention and Tourist Development taxes.

Employees in this class are responsible for the examination of hotel, motel and roominghouse records to determine that laws relating to the collection of Convention and Tourist Development taxes are followed. Responsibilities include determining that correct tax returns have been filed and that monies collected have been remitted to the Metro-Dade County Tax Collector. Incumbents exercise considerable independent judgement and apply professional knowledge of accounting in recognizing understated tax returns, accounting and bookkeeping errors, irregularities and control problems, which require correction. General supervision is received from a professional superior who reviews work for technical accuracy and for achieving a high degree of voluntary compliance with local hospitality industry tax laws.

##### ILLUSTRATIVE TASKS

Analyzes varied hotel and motel records, systems and controls, and prepares reports based on findings; studies and measures the degree of voluntary compliance as reflected on filed tax returns.

Reduces noncompliance by identifying and allocating resources to those establishments whose returns indicate the most need for examination.

Conducts preliminary and in-depth field examinations of hotel, motel and roominghouse records to determine if the correct tax liability has been reported.

Institutes appropriate legal action for noncompliance within applicable provisions of Florida Statutes, Department of Revenue Rules and Metro-Dade County Ordinances.

Examines books, records, leases and other documentation of facilities claiming exemption, to determine that exemption rules are correctly followed.

Re-evaluates active and exempt accounts annually to confirm their status.

Serves and enforces tax warrants where required.

Testifies in Court actions resulting from enforcement of convention and tourist taxes.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of generally accepted accounting principles and practices as they pertain to hotel and motel accounting systems. Considerable knowledge of the statutory requirements pertaining to the levying, collection and enforcement of Convention and Tourist Development taxes.

Knowledge of the principles of accounting.

Knowledge of the special practices and procedures of auditing.

Knowledge of public relations principles and techniques.

Ability to conduct detailed and comprehensive audits of the bookkeeping and accounting systems of businesses in the hospitality industry.

Ability to work with a high degree of independence.

Ability to exercise judgement and direction in dealing with employees and managers of private firms.

Ability to make arithmetic calculations rapidly and accurately.

Ability to maintain objectivity in the conduct of field examinations of bookkeeping and accounting records.

##### NATURE OF WORK

This is advanced professional office and field work in the examination of records pertaining to state and county tax collection laws.

An employee in this class is responsible for the examination of transient rental facility, branch auto tag agency, and food and beverage facility records to determine that laws relating to the collection of state and county taxes are followed. Responsibilities include determining compliance of transient rental facilities and food and beverage establishments with Florida Statutes and Dade County Ordinances, preparing documented determinations of findings, submitting additional tax assessments, presenting findings to branch auto tag agency owners to discuss remedies and prevent future infractions, preparing a variety of complex statistical reports, providing technical assistance to other field employees involved in the enforcement of tax collection laws, and attending meeting to explain and clarify assessments and regulatory requirements. The incumbent exercises considerable independent judgment in the examination of the more complex transient rental and food and beverage accounts for compliance with state and local regulations. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for effective tax assessment determinations and related field and office duties.

##### ILLUSTRATIVE TASKS

Examines all room-related records, books, registration cards, and other documents of the more complicated hotel and motel facilities to determine their compliance with Florida Statutes and Dade County Ordinances governing convention/tourist transient rental tax; prepares, reviews, and submits documented determinations and/or additional tax assessments.

Examines all food and beverage-related records, books, restaurant and bar cash register receipts, food and beverage purchase orders, and other documents of the more complex food and beverage establishments to determine their compliance with Florida Statutes and Dade County Ordinances governing convention/tourist food and beverage tax; prepares, reviews, and submits documented determinations and/or additional tax assessments.

Audits and inspects all branch auto tag agency fees, procedures, storage areas, records, books, and other documents to ensure compliance with Florida Statutes, Dade County Ordinances, and Florida Department of Highway Safety & Motor Vehicle rules and regulations which govern branch auto tag agencies; prepares, reviews, and submits determinations, and identifies infractions and remedies; attends conferences with superiors and branch auto tag agency owners to discuss prevention of future infractions.

Prepares complex reports, statistics, and projections to meet demands from County finance and budget officials, municipalities and agencies receiving tax revenue, legislators, the media, and citizen groups; prepares regular month-end reports; designs and upgrades computer programs; prepares estimated tax returns based on statistical analyses.

Provides technical assistance to field auditing employees; reviews work for accuracy, technique and statutory correctness, including assessments and their determinations, field of branch auto tag agency collection and inspection agents, and calculations on impending tax action notices, bank freezes, recorded liens, and sheriff warrants.

Attends meetings and conferences with business owners and managers, accountants, controllers, attorneys and others to explain and clarify assessments, statutes and ordinances, and provide information and instruction on regulatory requirements and procedures; assists in the mediation of tax and assessment disputes and protests.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of generally accepted accounting principles and practices pertaining to hotel and motel, and food and beverage facility accounting systems.

Thorough knowledge of the accounting systems and statutory requirements pertaining to the operation of private branch auto tag agencies licensed by Dade County.

Thorough knowledge of the statutory requirements pertaining to the levying, collection and enforcement of convention and tourist development taxes.

Considerable knowledge of the principles of accounting.

Considerable knowledge of the special principles and techniques of auditing.

### Finance Section Assistant Manager (000353)

#### Minimum Qualifications

Bachelor's degree in Accounting or Bachelor's degree to include 21 semester credits in Accounting. Three years of professional accounting, financial reporting or auditing experience to include supervisory experience is required.

CPA is preferred.

#### Job Specifications

##### NATURE OF WORK

This is advanced and responsible professional work with supervisory responsibility managing a major program or function in a county department or agency.

Employees in this class are responsible for managing the planning, research, design, development and evaluation of a major departmental program or function. Some incumbents in the class perform advanced and responsible administrative work of comparable scope in a specialized staff capacity. Incumbents are typically located at the division head level or as full assistants to an assistant director of a department. Employees are typically engaged in formulating, developing, implementing, conducting, supervising and monitoring programs, procedures, and operational initiatives; formulating departmental policies and procedures; and establishing organizational goals and performance measures. Assignments are broad in scope with considerable latitude for the exercise of independent judgment and application of management and/or technical knowledge and skills. General direction is received from an administrative superior who evaluates work for adherence to departmental policies and attainment of desired goals and objectives through personal conferences and review of reports of operations.

##### ILLUSTRATIVE TASKS

Coordinates complex administrative duties with department-wide responsibility; serves as project manager over specialized projects and program coordinator; develops and negotiates large contracts, grant proposals and budgets; develops and implements departmental and program policies, procedures and revisions; administers various research and feasibility studies.

Assists in the development of a department's operating budget including production of actual budget documents; conducts monthly analysis of budgetary expenditures and prepares complex financial reports for the department director and assistant directors; plans, assigns and review the work of subordinate staff engaged in various accounting activities; conducts meetings with assistant directors to ensure financial viability of the department; acts as the budget liaison between the department and the Office of Strategic Business Management (OSBM); ensures that all procurement expenses are charged to correct line-items and expenditure authority is granted for those purchases; coordinates accounting activities with the Finance Department and OSBM; develops and implements new and revised financial policies and procedures to include training of accounting staff and other departmental staff on new procedures.

Plans, assigns and reviews the work of professional and clerical subordinates engaged in the preparation, monitoring and processing of the department's agenda items; coordinates orientation workshops concerning the agenda process for departmental staff; coordinates the agenda process among departmental units; reviews committee meeting results to ensure agenda items are placed on the appropriate agenda; proofreads each agenda item and official agendas to ensure completeness and accuracy; supervises the distribution of agenda packages; reviews results concerning agenda items and prepares follow up report.

Plans, assigns and reviews the work of subordinate professional staff engaged in researching government, corporate and foundation grant opportunities and developing relationships within the grant making community and writing and compiling grant applications to secure funding; administers grant funds by overseeing relationships with funders and all grant reports, ensuring matching-fund and other grant requirements are met.

Performs quality control reviews of audit reports to ensure compliance with departmental and county standards; develops statistical audit plans and analyses; evaluates a system's effectiveness and identifies the key control plans of a particular system; performs audit assignments of moderate difficulty and limited in scope such as review of incurred costs, review of annual overhead costs and routine forward pricing of bid proposals of moderate dollar impact or risk; prepares audit reports of moderate complexity assuring that they are responsive to specific audit requests.

### Finance Section Assistant Manager (000353)

Determines the information system needs of a department; coordinates and implements overall departmental data processing systems program; prepares and implements departmental information technology plan; makes recommendations for hardware and software systems to meet departmental requirements; develops, presents and supports budget estimates and financial plans concerning the acquisition of data processing equipment and software acquisition or development costs.

Plans, assigns and reviews the work of subordinate professional staff engaged in the analysis of proposed contracts, federal and state grants, professional service agreements and leases for compliance with federal, state and county rules and regulations; provides technical advice and assistance to department personnel on appropriate contract and grant preparation methods and procedures; prepares grant approval resolutions for action by the County Commission; examines sources of fiscal support, generates applications for grant funds and administers grants upon award to the department.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates, authorizes leave and overtime; reviews employee performance reports prepared by subordinates, and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles of general management, public and business administration and their application to governmental administration.

Thorough knowledge of the policies and procedures used in large scale budget preparation, justification, monitoring and reporting.

Thorough knowledge of applicable state, federal and county laws, rules and regulations pertaining to departmental operations.

Thorough knowledge of the principles of public personnel administration and of county personnel policies and procedures.

Thorough knowledge of state, federal and county laws, rules and regulations relating to financial records of county departments and agencies funded by grants.

Considerable knowledge of basic accounting principles, practices and procedures and their application to governmental computerized accounting systems.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of research techniques and the sources and availability of current information in the area of assignment.

Considerable knowledge of the principles and practices of modern office administration.

Considerable knowledge of the use of data processing and cost accounting systems.

Knowledge of public relations principles and techniques.

##### NATURE OF WORK

This is highly responsible professional management work in planning and directing tax collection activities of Miami-Dade County.

An employee in this class is responsible for directing and supervising, through various levels of subordinate supervisors, complex and varied tax collection activities, and formulating, directing and administering tax collection policies and methods within the framework of applicable state and local laws. Responsibilities include divisional budget preparation and monitoring, continuous analysis of tax collection administrative procedures, coordinating data system installation and modification, analysis and interpretation of applicable Florida Statutes, and planning divisional goals and objectives. The incumbent exercises extensive independent judgment, initiative and professional tax collection knowledge in coordinating the collection, distribution and disbursement of funds derived from local, state and municipal taxes and fees levied on real property, personal property, special taxing districts, improvement liens, motor vehicles, vessels, occupational licenses, hunting and fishing licenses, transient taxes on tourist facilities, food and beverages, utility taxes and other taxes that may be levied by taxing authorities. Supervision is exercised through various levels of subordinate supervisors over a large staff of professional, technical and clerical employees with assigned responsibilities in specific tax collection operations. General direction is received from the Finance Director who holds the incumbent responsible for the attainment of departmental tax collection objectives and the professional management of County tax collection activities.

##### ILLUSTRATIVE TASKS

Directs, formulates, and coordinates the development of tax collection systems and methods pertaining to Ad Valorem, non-Ad Valorem, auto tag, occupational license and convention/tourist development taxes.

Conducts and participates in meetings and conferences with state, County, municipal, and School Board officials to ensure adherence to legislative provisions related to tax collections.

Ensures accurate and timely distribution of funds to taxing authorities for whom collections are effected.

Analyzes and interprets Florida Statutes related to tax collections and instructs subordinate supervisory staff accordingly.

Plans, coordinates and directs preparation and justification of annual budget for tax collection operations.

Reviews, analyzes and implements changes in office policies and procedures to control and record tax payments; coordinates data processing needs for tax collection activities.

Directs, examines and reviews the balancing of tax rolls for real and personal property, improvement liens, special taxing districts and delinquent accounts.

Conducts and supervises the annual tax sale, including related notices and advertising.

Ensures timely reporting and submission of state revenues collected on motor vehicles, vessels, and hunting and fishing licenses.

Consults with County Attorney's Office concerning proper representations in Bankruptcy Court and other litigations.

Corresponds with state departments, municipal and School Board taxing authorities; responds to complex tax inquiries from taxpayers or their legal representatives.

Bachelor's degree in Accounting, Finance, Business Administration, Public Administration or related field. A minimum of five to nine years of financial accounting experience to include supervisory experience is required.

#### Job Specifications

##### NATURE OF WORK:

This is highly responsible professional and supervisory work assisting in planning and directing activities of the Controller Division of the central Finance Department. An employee in this class is responsible for managing and supervising staff functions including accounts payable, credit and collections, payroll accounting, bank reconciliations and tourist tax accounting. Responsibilities include participating in accounting and administrative activities of the division, assuring compliance with various regulations and procedures, compiling financial and statistical information for various reports, assisting County officials and the public in resolving problems, and coordinating external audit and management consulting services. The incumbent exercises considerable independent judgment and technical expertise in assisting in the achievement of divisional goals and in the enhancement of internal controls. Supervision is exercised through subordinate supervisors over professional, paraprofessional and clerical employees engaged in various phases of divisional activities. General direction is received from the Controller who holds the incumbent responsible for effective assistance in supervising and administering divisional activities and in achieving divisional goals and objectives.

##### ILLUSTRATIVE TASKS:

Coordinates accounts payable activities including the timely payment of County obligations in accordance with legal and procedural requirements, maintenance of accurate records, and establishment of proper controls to account for the expenditure of public funds.

Directs credit and collection activities to collect outstanding amounts owed to the County or its affiliated agencies, and outstanding County claims from individuals or businesses that have filed for protection under bankruptcy laws.

Supervises the processing and distribution of County paychecks, distribution of payroll deductions, and preparation of various monthly, quarterly and annual reports required by state and federal agencies. Directs the timely monthly reconciliation of all County bank accounts and the investigation and resolution of all differences between bank and County records.

Supervises administration of tourism-related activities including reviewing applications for tourism development grants, coordinating and monitoring grant awards, assisting in resolving audit findings, and monitoring the receipt and distribution of tourist taxes assessed by the County.

Compiles financial and statistical information for various reports; assists County officials and the public with inquiries and with resolving problems; reviews and updates administrative orders, resolutions and contracts to enhance internal controls and respond to audit inquiries and findings.

Coordinates external audit and management consulting services; reviews financial information and prepares reports for industrial revenue bond assistance, concessions and grants.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS:

Extensive knowledge of the principles of accounting, business, and public administration.

Extensive knowledge of financial internal control systems and their application to the development and installation of complex accounting systems.

### Minimum Qualifications

Bachelor's degree in Accounting, Business Administration, Public Administration, or a related field. Five supervisory and administrative experience in auto tag administration are required.

### Job Specifications

#### NATURE OF WORK

This is advanced supervisory and administrative work in planning and directing county license and tag operations within the tax collector's office.

An employee in this class is responsible for directing operations of county and private tag agencies, and public service collection activities pertaining to Ad Valorem taxes, waste and other fees or licenses. Responsibilities include supervising the central collection, disbursement and recording of a variety of license taxes and fees pertaining to the issuance and renewal of automobile and boat license plates, automobile and boat registrations, sports licenses, animal licenses, real and personal property taxes and waste fees. Duties include developing and revising operating procedures and monitoring internal controls for compliance with state and county regulations. The employee exercises considerable independent judgment in interpreting and applying local and state laws and ordinances pertaining to tag operations. Supervision is exercised over subordinate clerical, specialized and professional employees who assist with various phases of the work. General supervision is received from an administrative superior who holds the incumbent responsible for the efficient operation of the license and tag operations.

#### ILLUSTRATIVE TASKS

Plans, assigns, reviews and coordinates the work of subordinate clerical, specialized and professional personnel engaged in direct service to the general public in processing auto and boat title applications and registrations, collecting sales taxes, accounting for revenues, maintaining financial records, and preparing and submitting a variety of reports to county and state departments.

Monitors and controls the operations of private tag agencies doing business under county ordinance to assure compliance with state policies and procedures, proper collection of license fees and taxes and timely submission of various reports to appropriate state agencies; monitors county operated branch tag agencies.

Studies rules and regulations of pertinent state departments regarding various accounting and reporting requirements and implements policies and procedures to assure compliance; reviews periodic changes in legislation affecting fee schedules, conditions under which transactions can occur, types of decals, credit allowances and other changes.

Supervises the development of office operation procedures, manuals, forms, brochures and publications; approves new and revised procedures.

Prepares agency budget and develops narrative information; monitors budget expenditures and develops agency performance objectives. Evaluates financial controls used in the collection of license taxes and fees; investigates major discrepancies in collections and deposits; initiates appropriate corrective action as needed.

Reviews a variety of reports prepared by subordinates for accuracy and timely submission to appropriate state agencies.

Assists county, state and independent auditors in the examination of accounting operations; initiates corrective action as a result of audit findings.

Keeps abreast of new regulatory directives pursuant to tag administration and tax collection.

Attends meetings with departmental, county and state government officials; makes recommendations concerning legislative action to revise or implement changes in current laws and regulations pertaining to tag operations such as fee revisions or procedural modifications; testifies in court on tag agency regulations and procedures.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews employee performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

Develops and monitors divisional budget, performance measures, strategic business plans, ECC plans, procurement, personnel issues, records management and business processes. Serves as business analyst on all automation projects related to the division

Performs related work as required.

#### Nature Of Work

This is advanced professional work in the development of a countywide adult training and development program, overseeing a physical examination and medical records program or assisting with the business operations of the Human Resources Department (HRD), Personnel Services Division.

## Human Resources Department

---

### HR Coordinator (000455)

#### **Minimum Qualifications**

Bachelor's Degree. A minimum of five to nine years of professional personnel management experience to include supervisory experience is required.

#### **Job Specifications**

#### **Nature Of Work**

This is highly responsible professional managerial work in planning and directing activities of the Career Development Division of the Human Resources Department.

### HR Records Technician (000458)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the receipt, storage, issuance and filing of records are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory clerical work or independent clerical work of comparable responsibility.

Employees in this class usually plan, assign and review the work of a moderate sized clerical staff engaged in complex clerical activities. In the absence of supervisory responsibilities they do more advanced clerical work requiring the application of more varied and involved procedures and the more frequent use of a higher degree of independent judgment in solving work problems than is found in the Clerk 2 class. Situations concerning important departures from standard practices and procedures are referred to a superior for final decision. Supervision is received from a professional superior who reviews work for conformance with standards provided to departments.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of a moderate sized clerical staff engaged in such activities as maintaining, sorting and alphabetizing of incoming documents for County employee files as well as terminated files.

Retrieves information documents, or completed records from various files on site in response to requests from sources within and outside the County. Releases information and files to authorized person per terms of state law and bargaining unit contracts and for withholding release in instances where court order or other action is required.

Cross trains staff, and ensure all unit goals and objectives are met for the County's Personnel File Room.

Ensures medical packages, received from vendors are correct. Input social security numbers, cross reference medical dates, apply appropriate charges and input medical dates to cross reference with PERM screens; ensures new hires and pre-employment medical packages are filed in appropriate area and recheck monthly for status.

Provides information from medical, legal and other documents over the telephone; answers general telephone inquiries concerning the nature of semi-active and active records maintained in the depository or established procedures in use of the facility.

Ensures the daily retrieval of an average of 500 files per month and lifts up to 50lb boxes.

Receives requests for records by fax, mail, telephone and the visiting public including County, State and Federal officials, Attorneys, mortgage companies and others.

Prepares new hire paper work to determine social security number, names and rehire status for accuracy utilizing a personal computer. Process reinstated employees from PCD generated from Position Control of employees terms in error. Ensures name changes are processed correctly.

Maintains police finger print log of new hires and has direct contact with MDPD background investigators for accuracy and updates. Contacts Miami-Dade County Departmental Personnel Representatives (DPR's) with report.

Advises all Miami-Dade County DPR's on issues related to public records as per Florida Statutes and Personnel File Room procedures.

Serves as liaison between Personnel File room and Medical Records to the County Attorney's Office, Labor Management Division in all requests and inquiries.

Assists attorneys and other members of the public with more difficult record searches, retrieves various folders to trace sequence of documents; locates misplaced or missing material; locates and groups related documents on particular files or subject matter.

Assists with completing subpoenas and written Verification of Employment requests.

## Human Resources Department

---

### **HR Records Technician (000458)**

Serves as liaison between Personnel File Room and DPR's for all County department requests.

Assists in maintaining inventory system for all microfiche and microfilm records.

Assists with all duties in the receptionist/front desk unit of the Administrative Services Division including sorting and distribution of mail and reports, answering phones in a high volume area, assisting the public with assorted problems and inquiries.

Supervises operation of the records center in the absence of the immediate supervisor. Provides training and supervision for Student Interns and Account Clerks during their employment.

Performs related work as required.

#### **Nature Of Work**

This is supervisory clerical work or independent clerical work of comparable responsibility.

## Human Resources Department

---

### HR Records Supervisor (000460)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in storing, indexing, filing and other records management activities are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative work performing, planning and coordinating various supervisory and technical activities of the Personnel Records Unit, of the Employee Relations Department (ERD).

An employee in this classification is responsible for maintenance and quality assurance of personnel documents for all current and terminated County employees. Emphasis of the work is on planning, coordinating and supervising work of a group of clerical employees engaged in receiving, shelving, retrieving, refiling, and disposing of records in accordance with established records management regulations and procedures. Duties and responsibilities include cross training staff and ensuring all unit goals and objectives are met for the Employee Relations Department's Electronic Document Management System (EDMS) backfilling project; supervising the daily retrieval of requested personnel files; providing assistance and direct contact with departmental representatives and members of the public requesting to view files. Considerable independent judgment and tact are required in dealing confidentially with County employees, senior executives and departmental staff. Supervision is exercised over a staff of clerical subordinates engaged in various phases of records center operations. Supervision is received from an administrative superior who reviews work for effective customer service activities and supervision of the records center.

Bachelor's degree. One year of human resources, payroll, or business analysis experience to include working with human resources software packages or applications is required. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### ILLUSTRATIVE TASKS

Members of the Shared Services Team will perform various duties involving the PeopleSoft Recruiting Solution & HR 8.9. The following are Identified tasks to date:

Identify through various reports where data corrections need to be made due to corrupt or incorrect data prior to the conversion process; correct data so that conversion process bring valid data during conversion program to ensure correct data has been converted.

Review all screens prior to programming phase of project to ensure that data elements required are present for that functional aspect of system; instruct programming staff where data elements should be placed; utilize dynamic mapping training to design, develop, and test screen mapping.

Load all tables initially with data for test environment system to operate, identify, design, and implement table's modification, prepare auto update table procedures, test data tables.

Provides detailed functional specifications for design of base system.

Performs exhaustive test during parallel testing phase of project to ensure all checks and associated reporting are correct and system tables are performing correctly.

Answer questions concerning new system for all users or system for all Depts. County wide.

Talk to all users of system and make them aware of system capabilities and limitations.

Update security tables for user access or denial to the system; process user's requests to set up appropriate inquiry and updating capabilities.

Analyze system to ensure all modules are working properly together and that correct results are generated by the system; prepares service requests for any system error.

Take direction from Executive Steering Committee for new system enhancements; meet with appropriate ETSD staff to formulate system changes.

Prepares well documented, maintained test scripts and scenarios for testing the system; defines the business functions being tested, the data values to be entered and the procedures and documentation, the correct results should occur.

Tests system after shared services member or PeopleSoft vendor makes a fix to the system; test extensively after a new release of the system has been made by PeopleSoft.

Handles requests from system users and internal and external requestors to prepare various reports from data maintained by PeopleSoft system; discusses report with user to ensure proper reports is created; prepares ad hoc reports using Report Smith, SAS or other reporting tools; reviews report for accuracy and distributes to requestor.

Documents procedures as well as the addition of new codes to tables; makes necessary changes after new software releases and when new screens or auto updates are made, updates training materials and procedures manuals.

Assist and supervise staff assigned to data input for all human resource & payroll, data entry screens, provide assistance to departments for their data entry screens, ensure all data is processed during designated time frames.

Acts as business analyst to all functional areas to plan future enhancements to system provides ETSD representatives with necessary information to program enhancements.

Designs or redesigns system forms when necessary.

Trains all employees utilizing the system for input or inquiry, keeps training materials up-to-date on various changes affecting the system.

Provides suggestions on the strategic direction of the system, assists with prioritizing requests and determining enhancements for systems.

Coordinates usage of department personal computer networks and other computer systems, effectively communicates software/hardware problems to enable technical support to solve system issues.

Attends daily meetings with ERD implementation team to assess Business Requirements & testing needs.

Makes contact with other companies using software so that networking is established to handle common business events.

Maintains system change list for future development, maintains current issues list for day-to-day operational problems.

Attends various workshops and classes provided by integrator and software vender.

Researches problems that are reported by users of system, recreates transaction in test environment and determines cause of error (if any).

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

## Human Resources Department

---

### Shared Services Analyst (000462)

Considerable knowledge of Peoplesoft software package obtained from on-site training and working with integrator and software vendor.

Considerable knowledge of existing system data elements, associated formulas, and how data is utilized to handle day-to-day business activities.

Considerable knowledge of tables structures and their relationships between all systems modules.

Considerable knowledge of business processes in the human resource and payroll area.

Knowledge of personal computer networks, how they function, and ability to communicate software\hardware problems to enable technical support to sole system issues.

Knowledge of testing procedures (test scripts) to ensure work product is satisfactory and will perform as designed.

Knowledge of Peoplesoft Query and other report writing tools to extract data from system and produce ad hoc report for users of the system.

Ability to work as a team and cross-train in various functional areas of large complex operating system.

Ability to review reports to ascertain invalid data.

Ability to communicate problems and needs to technical ETSD staff.

Ability to determine business requirement in functional work areas after interviewing individuals that do that work or have a specific need automated.

Ability to prepare various documents including training and procedures manuals, newsletters, service requests, and memoranda for a wide audience of users.

Ability to update tables for security and processing requirements.

Ability to direct a group of employees in high volume data processing of human resource and payroll information.

Ability to design and redesign forms utilized with system.

Ability to train groups of employees that will systems.

Ability to offer suggestions on system enhancements.

Ability to research and troubleshoot problems and issues.

Ability to comprehend, analyze, and interpret organizational and procedural problems and make recommendations on how to handle these issues.

Ability to establish and maintain effective working relationships with departmental and other County employees.

### Personnel-Payroll Technician (000465)

#### Minimum Qualifications

High school diploma or GED. One year of experience in maintaining fiscal, payroll or related personnel records is required. Completion of 30 credits of college coursework will substitute for the required experience.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical and clerical work in the county centralized personnel-payroll operation.

Employees in this class are responsible for performing a variety of complex tasks in the processing of personnel and payroll information in a centralized personnel-payroll system. Duties include determining employee pay under various circumstances in accordance with established rules and procedures, calculating and posting money adjustments to the payroll and attendance record, reviewing and auditing payroll calculations and leave entries prepared by other employees, totaling payroll calculations, transcribing and entering information into a computer terminal, and performing other duties in support of a centralized personnel-payroll system. Supervision is received from a technical superior who periodically reviews work in progress and upon completion for accuracy and thoroughness in completing assigned responsibilities.

##### ILLUSTRATIVE TASKS

Reviews all entries on the payroll and attendance record to determine employee pay eligibility; totals all hours worked for each employee based upon daily recorded entries; determines overtime and straight hours and the method of payment of each.

Determines employee pay based upon disability, worker's compensation, call-back, out-of-class, night shift, on-call, leave without pay, holidays, and various collective bargaining agreements and leave manual provisions.

Calculates and posts all necessary money adjustments to payroll and attendance records.

Operates a computer terminal to inquire, post and verify a variety of personnel-payroll information; posts straight-time, overtime and leave entries submitted on payroll and attendance records, and payroll and attendance change forms.

Adjusts entries on payroll and attendance record when employees are ineligible for leave usage; adjusts employee leave files due to system problems or errors.

Contacts various department supervisors if payroll and attendance records are illegible or if entries are missing.

Verifies approval of disability leave before entries are made; prorates leave for injured employees; changes leave entry to non-disability leave usage if required.

Adjusts file information for leave without pay or leave of absence.

Reviews and audits payroll calculations and leave entries prepared by other employees to assure accuracy, and makes corrections as necessary; reviews computer generated reports to assure entries are accepted by system; adjusts as necessary.

Calculates and transcribes all payroll calculations for on-line input for paycheck preparation.

Provides regular, overtime and money adjustment totals by locator for balancing payroll; reviews computer generated totals and compares with manual totals to determine that final payroll is correct and balanced; makes necessary adjustments.

Initiates and calculates payroll vouchers as required; processes tool and uniform allowance payments, and vacation advance requests; calculates termination payoffs.

Receives and answers questions from various county offices concerning payroll calculations and leave entries; notifies departments of errors on payroll and attendance record forms.

Performs specialized duties in the computerized maintenance of the Table of Organization and in the control of personnel changes including merit increases, promotions, and newly hired employees.

Performs specialized duties in the initiation, changes and cancellation of a variety of payroll deductions.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the content of personnel-payroll information on source documents for computer entry.

Considerable knowledge of various pay provisions specified in the county Pay Plan and Leave Manual.

Considerable knowledge of the provisions of current collective bargaining agreements with respect to personnel actions and payroll

### Personnel-Payroll Technician (000465)

requirements.

Considerable knowledge of personnel-payroll policies and procedures.

Knowledge of business arithmetic.

Knowledge of the operating characteristics of computer terminals used for processing personnel-payroll information.

Ability to examine and correct source documents used for personnel-payroll processing.

Ability to examine and reconcile computer printouts with source information.

Ability to apply pay provisions in the county Pay Plan and in applicable collective bargaining agreements to a variety of personnel-payroll processing activities.

Ability to perform arithmetic calculations quickly and accurately.

Ability to operate a computer terminal.

Skill in the operation of a computer terminal and calculator.

## Human Resources Department

### Senior Compensation Specialist (000553)

#### Minimum Qualifications

Bachelor's degree. One year of professional job analysis experience is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional work with some supervisory responsibilities in the classification of positions and related compensation administration in the central Employee Relations Department.

Employees in this class are responsible for performing a variety of more difficult and complex assignments in various phases of position classification and compensation administration. Incumbents serve as team leaders in the conduct of special occupational or job analysis studies, and may be assigned to serve in a supervisory capacity over specialists for groups of departments. Responsibilities include analysis and classification of a wide variety of positions, development of recommendations for new or revised classification titles, series of positions and development of new or revised minimum qualification standards for various classifications. Assignments involve working with the more complex and dynamic departments in terms of frequent and major positions, frequent need for new classes, and the need to classify positions where there is little classification and pay precedent. Duties require the exercise of considerable judgment in the application of classification theories, principles and methods and the ability to deal tactfully and persuasively with officials in departments and agencies. Incumbents are responsible for making final classification actions. Supervision is exercised over professional and clerical staff for specific assignments and functions. General supervision is received from a professional or administrative superior who reviews recommendations and reports and evaluates completed work for quality of results in the application of theories, principles, procedures and regulations.

##### ILLUSTRATIVE TASKS

Receives and reviews a variety of the more complex and difficult classification requests; discusses duties and responsibilities of positions under review by field audit; advises departmental officials of alignment effects of given classification requests on other positions, overlapping functions or organizational relationship problems; prepares audit reports with recommendations for appropriate action.

Works with departmental personnel officials from the more complex and dynamic departments involved in frequent and major reorganizations, frequent need for new classes, and the need to classify positions where there is little classification and pay precedent.

Confers with departmental supervisors on appropriate minimum qualification standards for new classes of positions or revisions in existing standards; prepares final recommendations for standards to be used in merit examination and recruitment for selection of applicants.

Exercises immediate supervision over professional and/or clerical support personnel as assigned in carrying out compensation activities such as preparation of specifications for new occupational classes, conduct of local and national pay surveys, or special occupational studies of newly developing classes.

Reviews audit reports and classification findings, and selective pay adjustment recommendations prepared by subordinate specialists, with final recommendations for action, as assigned.

Performs a variety of special assignments such as preparation of grant applications for funding of compensation studies of a comprehensive nature relating to classification, pay or fringe benefits; also performs detailed studies and analyses of executive pay salaries or complete occupational studies of a more complex nature with responsibility for recommendation for final action and verbal presentation of findings to departmental officials.

Supervises the activities of the Section in the absence of the supervisor with delegated responsibility for making decisions and leading conferences with departmental personnel; represents superior in various meetings and conferences, as assigned.

### Chief, Capital Improvement Professional Contract Services (000714)

#### Minimum Qualifications

Bachelor's degree. A minimum of five to nine years of professional experience in the solicitation, evaluation or award of architectural/engineering contracts, procurement, contracts administration, or contracts compliance are required.

#### Job Specifications

##### NATURE OF WORK

The incumbent in this position performs at a highly responsible, professional level directing, planning and administering the Professional, Technical & Expert Services Division of the Office of Capital Improvements.

The employee in this class is responsible for managing the solicitation and award of the County's professional and consulting services contracts; ensuring compliance with contractual and legal requirements including local, state and federal policies, rules and regulations; supervising and improving the effectiveness of the County's centralized negotiated procurement process such as Requests for Proposals/Requests for Qualifications, including pre-proposal conferences, selection committee meetings, and the evaluation of proposals, administering and improving effective acquisition planning and market research; supervising or conducting personally negotiations with offerors under the County's most sensitive or complex purchases, and managing the preparation and presentation of professional and consulting service contract documents. In addition, the employee in this class is responsible for overseeing the administration and improvement of the County's architectural and engineering selection process pursuant to Florida Statute Section 287.055, as well as the Value Engineering Analysis Program wherein data is collected, reported and distributed concerning the County's use of 'value engineering initiatives. Responsibilities also include directing and managing operational activities involving the development and implementation of standardized terms and conditions for use in the County's decentralized procurement of construction and public works contracts to establish uniformity in the terms, format and procedures utilized by the various County departments. Emphasis is on building and monitoring a centralized system for the collection of construction and design contract award administration information, and providing professional and technical assistance to departments for improved construction contracting and project management. Supervision is exercised through subordinate levels of managers and supervisors over a staff of professional, technical and clerical subordinates with assigned responsibilities in various phases of procurement operations to ensure the proper solicitation, evaluation, selection, award, cost savings, delivery, efficiency, effectiveness and strict adherence to all legal requirements. Direction is received from the Department Director and the Assistant Department Director who review work through personal conferences and various reports and hold the incumbent responsible for efficient and effective management of divisional operations and attainment of goals and objectives.

#### ILLUSTRATIVE TASKS

Plans, directs and coordinates the work of professional, technical and clerical employees through subordinate levels of supervisors and managers engaged in a variety of procurement processes including development and implementation of standardized terms and conditions for the county's complex multi-million dollar construction and maintenance contracts and agreements for design, the RFP/RFQ procurement process and the architectural and engineering selection and award process, and ensuring compliance with contractual and legal requirements plus local, state and federal policies, rules and regulations. Directs County construction and service contracts, to include Professional Service Agreements. Request for Qualifications/Proposals processes, and the amendment/supplemental agreements process; provides County departments with technical assistance, which includes conducting pre-proposal conferences, selection committee meetings, and the evaluation of proposal; responding to marketplace inquiries on procurement and contractual matters, negotiating and selecting contract award processes; analyzing contracts and agreements to ensure their legality, reviewing policy and procedural requirements while achieving cost effective goals, performing contract administration during the performance of agreements; and professional services agreements. Oversees the administration and coordination of the County's process for acquisition of professional engineering and architectural selection process pursuant to Florida Statute 287.055. Maintains the collection of data and distributes reports pertaining to the County's use of Value Engineering analysis. Confers regularly with the Office of Capital Improvements' Director and Assistant Director, County Manager staff, and County departments' procurement professionals and managerial staff. Develops procedures for the Office of Capital Improvements professional, technical & expert division's procurement activities to include performance standards for optimal quality assurance; automated measurement tracking systems; and effective acquisition strategies. Reviews processes and procedures, and implements re-engineering practices as needed. Responsible for developing and implementing policies and procedures pertaining to construction, RFP/RFQ and A&E related procurements, and as required by legislative mandate and communicating same to County departments. Directs the work of all Division personnel, and monitors and evaluates their performances.

Establishes ethical business procurement practices and assists subordinates and County departments in developing negotiation strategies for

### **Chief, Capital Improvement Professional Contract Services (000714)**

the procurement of negotiated commercial and non-commercial contracts and agreements. Analyzes, initiates, approves and authorizes purchases of products, services and technology through Raps and FRS programs.

Evaluates, implements, and utilizes the most effective technology and business processes to solicit proposals and recommends contract canards.

Resolves complex problems with contract compliance, invoice payments and other issues to ensure vendor reliability and customer satisfaction. Assists the DPM Director and Assistant Director in presentation of technical, Architecture/engineering, and construction issues to the Board of County Commissioners. Consults with, responds to, and advises County's senior management, County Attorney's Office and elected officials on issues and policies that affect the Division's operations.

Performs related duties as required.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work with administrative responsibility in the improvement of the energy efficiency of Miami-Dade County.

An employee in this class is responsible for analyzing current energy usage and developing the County's energy management plan in order to provide proper environmental conditions with cost effective energy utilization. Emphasis of the work is to act as an agent of change within the County organization, coordinating all aspects of energy management, from energy efficiency and reduction of carbon dioxide emissions to waste management and sustainable development by encouraging the use of renewable/sustainable energy resources within Miami-Dade; deriving solutions for carbon management; and raising the profile of energy conservation. Supervision is received from an administrative and technical superior who holds the incumbent responsible for the attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Develops coordinates, and implements the aims and objectives of strategies and policies to reduce energy consumption, i.e., federal, state and local directives on energy performance and emissions, and monitors and reviews the effectiveness of these policies and strategies, including coordinating progress reports.

Devises policies and systems for buying energy and assists with contract negotiations.

Provides technical and practical advice and offers training on energy efficiency.

Contributes to sustainable development initiatives.

Liaises and negotiates with contractors, the building supply industry, council services and other relevant organizations.

Ensures accurate records are maintained and energy monitoring data is collected regularly; compiles reports to conform to strict deadlines.

Prepares specifications, drawings and tenders documents for building services, improvement or plant replacement work, including obtaining statutory approvals; liaises with and provides technical support to mechanical/electrical design engineers on new and refurbishment projects regarding sustainability, energy and water conservation.

Carries out site inspections and energy surveys.

Prepares detailed schedules of work/feasibility studies and cost estimates.

Benchmarks county energy consumption against best practice guidelines.

Keeps abreast of federal and state legislation.

Organizes events and workshops.

Performs other related work.

### Energy Management Specialist (000782)

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of energy management program development.

Considerable knowledge of conservation methods, practices and techniques.

Considerable knowledge of contract and agreement language for the procurement of goods and services that complies with desired sustainable practices.

Considerable knowledge of local, state and federal legislative processes.

Considerable knowledge of the general provisions of local, state and federal laws and regulations applicable to energy resource utilization.

Working knowledge of the Florida Building Code, Mechanical and Chapter 13 (Energy Efficiency) of the Florida Building Code.

Knowledge of HVAC and lighting systems.

Ability to keep informed on current developments and legislative issues pertaining to sustainability initiatives.

Ability to review, evaluate, modify and improve existing sustainability methods and practices and explore new and emerging sustainability technology and practices.

Ability to evaluate the language of contracts and agreements used to procure commodities and services to ensure compliance with desired sustainability practices and the County's Master Plan.

Ability to represent the County at a variety of conferences, meetings, and gatherings.

Ability to establish and maintain effective working relationships with subordinates, superiors and officials of other public and private organizations.

Ability to communicate clearly and concisely, both verbally and in writing.

##### NATURE OF WORK

This is advanced and responsible professional work with supervisory responsibility managing a county-wide program or a major program or function in a county department or agency.

Employees in this class are responsible for managing the planning, research, design, development and evaluation of a county-wide or major departmental program or function. Some incumbents in the class perform advanced and responsible administrative work of comparable scope in a specialized staff capacity. Incumbents are typically located at the division head level or as full assistants to deputy or department director. Employees are typically engaged in formulating, developing, implementing, conducting, supervising and monitoring programs, procedures, and operational initiatives; formulating departmental policies and procedures; and establishing organizational goals and performance measures. Work differs from that found in the Special Projects Administrator 1 classification in that incumbents are responsible for directing the implementation of a county-wide program or implementing a departmental program without established guidelines. General direction is received from an administrative superior who evaluates work for adherence to departmental policies and attainment of desired goals and objectives through personal conferences and review of reports of operations.

##### ILLUSTRATIVE TASKS

Researches, designs and develops comprehensive programs to systematically achieve departmental or county goals; ensures that program results are consistent with the policies and objectives of the county, state or federal agencies; oversees and participates in the development of project and program budgets; forecasts necessary funds for staffing, materials and supplies; negotiates and oversees contracts; writes and administers grants.

Manages the operations, services and activities of a county or departmental program; supervises the training and evaluation of staff; manages the work of consultants.

Conducts and supervises the collection, analysis and interpretation of information; develops and implements projects in accordance with established guidelines; evaluates the outcome and effectiveness of programs; develops status reports to detail program outcomes; presents reports to upper management, the County Executive Office and the Board of County Commissioners and other agencies.

Plans and organizes workshops and meetings with various shareholders including county departments, representatives from affected private sectors, municipalities and regulatory agencies; reviews and discusses specific initiatives and develops consensus on measures to be incorporated into the program.

Manages the implementation of program saving measures; assists county departments and agencies in the implementation of program measures in their specific areas.

Prepares policy and legislation related to programs in collaboration with the County Attorney's Office; prepares technical and administrative reports; prepares written correspondence.

Identifies opportunities for specific program initiatives and pilot projects; encourages participation by county departments and agencies.

Secures funding and resources for the implementation of program initiatives or pilot projects; monitors and pursues grant opportunities on behalf of Miami-Dade County.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates, authorizes leave and overtime; reviews employee performance reports prepared by subordinates, and rates employee performance.

### Special Projects Administrator 2 (000832)

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles of general management, public and business administration and their application to governmental administration.

Thorough knowledge of the policies and procedures used in large scale budget preparation, justification, monitoring and reporting.

Thorough knowledge of applicable state, federal and county laws, rules and regulations pertaining to departmental operations.

Thorough knowledge of state, federal and county laws, rules and regulations relating to financial records of county departments and agencies funded by grants.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of research techniques and the sources and availability of current information in the area of assignment.

Knowledge of public relations principles and techniques.

Knowledge of inventory control and county procurement and requisitioning procedures.

Ability to perform statistical analysis to develop and implement management reporting processes that support systematic program evaluation and workload forecasting.

Ability to evaluate and predict trends and to advise management of appropriate actions and policies to ensure successful program implementation and management.

Ability to develop and administer county-wide or departmental programs.

Ability to analyze, explain and apply applicable policies, procedures, laws, codes and regulations pertain to specific programs or initiatives.

Ability to supervise a large staff of subordinate employees in a manner conducive to full performance and high morale.

Ability to exercise judgment and discretion in devising, installing and interpreting department or county-wide rules, regulations, policies or procedures.

Ability to initiate and install administrative programs and procedures and to evaluate their effectiveness.

Ability to delegate authority to subordinates necessary to complete responsibilities in various management functions.

Ability to establish and maintain effective working relationships with other employees, supervisors, departmental officials, officials of other agencies and the general public.

Ability to express ideas and information clearly and concisely, both verbally and in writing.

Ability to train employees and subordinates in the area of assignment.

Ability to discern and extract pertinent facts from oral and written guidelines, policies and procedures and apply them to a variety of problems.

Ability to evaluate administrative operations to determine if departmental goals and objectives have been met.

### **Nature Of Work**

This is advanced and highly responsible professional budget analysis work for the Miami-Dade County Office of Strategic Business Management (OSBM).

## Human Resources Department

### Program Coordinator, OMB (000865)

#### Minimum Qualifications

Miami-Dade County Office of Strategic Business Management (OSBM) is seeking a highly skilled professional to manage the Incorporation, Annexation and Municipal Services Division. The individual selected is responsible for compiling and analyzing the impact of incorporation and/or annexation of unincorporated areas to all County departments that provide service in the Unincorporated Municipal Service Area (UMSA). This unit also promotes contracting possibilities to all municipalities. The incumbent will partner with the County Manager's Office and elected officials in refining the County incorporation/annexation policy; and serve as the liaison to the Municipal Advisory Committees (MACs). The chosen candidate will supervise both professional and clerical staff assigned to this division within OSBM.

The Office of Strategic Business Management is a dynamic department that ensures the effective allocation of resources for Miami-Dade County government. The department also works to align County operations to achieve results driven by policy and customer needs by "Delivering Excellence Every Day". OSBM staff work in cross-cutting teams to deliver the OSBM and County mission.

A bachelor's degree in Public Administration, Business Administration, or related field is required. A minimum of five to nine years professional experience to include supervision of both professional and clerical positions and developing, monitoring, or reviewing financial budgets or performing related fiscal and/or management analyses is also required. Applicants should have some knowledge of or experience in both long-term and short-term planning in a large county government. A Master's degree in Business Administration, Public Administration or a related field may substitute for one year of the required experience.

##### NATURE OF WORK

This is highly responsible professional analysis and research work in determining future community needs through planning, coordination, and directing research and reviews for the Miami-Dade County Office of Strategic Business Management.

An employee in this class is responsible for planning, coordinating, analyzing and reporting, and coordination of work completed by supervised staff, assigned County employees and outside contractors/consultants. Emphasis of work is on the economic and effective use of public resources, efficiency improvements, minimizing waste, and providing departments with recommendations to foster good business practices and assisting in building effective management skills. Responsibilities include developing scope of services for consultant engagements, reviewing progress, and assessing quality of work completed by external contractors/consultants. Responsibilities also include oversight of internal engagements, preparing work plans, conducting complex financial studies, legislative and benchmark research, and fiscal impact analysis; reviewing the work of other professional staff and evaluating their performance, generating recommendations and presenting deliverables to the County Manager's Office and the Director of the Office of Strategic Business Management. The incumbent exercises considerable independent judgment in coordinating activities and acting as liaison among the County Manager's Office, the Office of Strategic Business Management, and department directors to develop and implement business strategies. General direction is received from a professional superior who holds the incumbent responsible for the achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Develops scope of work for external contractors/consultants, evaluates progress, quality of services rendered, and processes payment invoices.

Plans and determines the focus and direction of assignments, establishes objectives, approach, methodology, and work program to complete assignments within time constraints.

## Human Resources Department

---

### Program Coordinator, OMB (000865)

Coordinates the work of subordinate staff and assigned County employees from other departments, provides direction on proper data gathering, analytical methods, documentation techniques and preparation of recommendations and deliverables.

Coordinates and oversees completion of highly sensitive and complex financial studies, forecasts and trend analysis, legislative and benchmark research, and fiscal impact analysis.

Reviews work completed and distinguishes critical and non-critical matters when assessing the significance of deficiencies in County operations and making recommendations for improvement, changes in legislation, or new business policies and strategies.

Informs management of work progress and/or technical problems and conducts periodic project status meetings with staff.

Conducts special assignments and serves on committees as needed.

Serves as liaison and works with the County Manager's Office, the Office of Strategic Business Management, and department directors to develop and implement countywide and departmental strategies.

Makes recommendations and presentation of final deliverables to County leadership.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime and rates employee performance.

Performs related work as required

#### KNOWLEDGE, ABILITIES AND SKILLS

Extensive knowledge of the organization and operation of County departments, external companies, contractors and other agencies having a contractual relationship with Miami-Dade County.

Thorough knowledge of the principles of governmental accounting, business and public administration.

Thorough knowledge of local, state, and federal laws, ordinances and regulations pertaining to fiscal management of government agencies.

Ability to exercise judgment and discretion in evaluating the adequacy and effectiveness of management controls over operational activities, propose changes as needed and/or develop new strategies to improve performance.

Knowledge of the standard principles and practices in the field of financial analysis, legislative research, and fiscal impact analysis.

Knowledge of the organization and operations of departments and agencies assigned for review.

Ability to plan the objectives, approach, and work plan to accomplish goals in accordance with professional and departmental standards.

Ability to analyze data and conduct comprehensive research, develop recommendations and produce final deliverables.

Ability to supervise personnel in a manner conducive to effective performance and fostering high morale.

Ability to communicate clearly and concisely, verbally, and in writing.

Ability to direct and coordinate the work of professional staff and outside consultants to achieve objectives within projected time constraints.

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing the activities of the Miami-Dade County Office of Management and Budget.

An employee in this class is responsible for planning, directing and coordinating the work of professional staff involved in the development and implementation of Miami-Dade County's annual operating budget and in the provision of management analysis, guidance and assistance to the County Manager and the various County departments. Responsibilities include the preparation and implementation of a programmatically valid and fiscally sound operating budget for the County, review of financial and economic data in order to recommend an overall County fiscal and taxing policy with its corresponding impact on levels and effectiveness of services. Duties also include the review and analysis of a variety of departmental operations in order to improve work methods, set standards, and increase the cost/value relationship of certain County operations. The incumbent exercises an extensive degree of independent judgment and professional managerial knowledge and expertise in fiscal, budgetary and general management analysis. Work is performed with considerable independence of action under the general policy direction and administrative guidance of the County Manager and within applicable federal, state and local laws. Supervision is exercised over a staff of professional subordinates who assist in the design and implementation of various budgetary and operational policies and procedures.

##### ILLUSTRATIVE TASKS

Directs and supervises a staff of professional analysts in the preparation of the annual County operating budget; monitors and evaluates the revenues, expenditures, and programmatic performance of County departments and agencies.

Directs and supervises managerial and financial analyses; provides assistance to the County Manager, Board of County Commissioners and various County departments.

Assists operating departments in establishing desired budgetary and programmatic goals and objectives; coordinates and integrates these individual departmental objectives into the County budget so that they coincide with and support the County's overall goals.

Performs special budgetary, financial and taxation analysis for Board of County Commissioners and the County Manager's Office as required.

Performs productivity and management analysis for departments in order to improve work methods, establish standards, and improve the cost/value relationship of various Miami-Dade County operations; develops solutions and recommendations for improvement and assists departments in implementing systems and/or changes which will achieve operational objectives at minimal cost and within the timeframe required.

Performs a variety of special analytical studies within the Miami-Dade County organization.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of current theories, literature, resources and methodologies in the field of fiscal analysis and budget planning.

Extensive knowledge of theories and methods of management by objectives.

## Human Resources Department

---

### Director, OMB (000869)

Extensive knowledge of theories, principles, and practices of management and organizational analysis.

### Assistant Auditor (000902)

#### Minimum Qualifications

Bachelor's degree in Accounting, Business Administration, Public Administration, or related field.

#### Job Specifications

##### NATURE OF WORK

This is professional auditing work in the audit of various management and financial operations in county departments, external government organizations having contractual relationships with the county, and audit assignments of commercial firms doing business with Miami-Dade County.

Employees in this class are typically located in the Department of Audit and Management Services and examine, analyze and verify financial records in staff and operating agencies and departments as well as in companies having contracts, leases and franchises with Miami-Dade County. Emphasis of the work is on the analysis of varied accounting records, systems and controls, and preparation of reports based on audit findings. Assignments are usually determined in scope and coverage by departmental regulations and statutory requirements, and incumbents utilize audit program guides and apply professional auditing standards in internal or external audits. Employees frequently work as a team member in the conduct of systematic audit programs or in special auditing assignments, but may be assigned to small-scale less complex audits or phases of audit programs independently. Some employees in the class are assigned full time to audits in federally funded programs. Incumbents must exercise professional knowledge and independent judgment in the audit of income and expenditures and recognition of accounting errors, irregularities and system or control problems which require correction. Supervision is received from a professional superior who reviews work progress and completed work for adherence to professional auditing standards and program guidelines.

##### ILLUSTRATIVE TASKS

Performs audit assignments of moderate difficulty and limited in scope such as review of incurred costs, review of annual overhead costs, and routine forward pricing or bid proposals of moderate dollar impact or risk; reviews for compliance and conformance to cost accounting standards.

Conducts routine audit assignments by examining, analyzing and verifying accounting records and fiscal data; checks and verifies entries, footings and extensions for accuracy; audits accounts, bank reconciliations, payrolls, invoices and expenditures for mathematical correctness and legal compliance; discusses unusual findings with superior during audit progress.

Assists in the design and development of accounting control systems and procedures for more effective and efficient operations within various departments, as assigned.

Assists in the auditing of outside firms that have a franchise with Miami-Dade County or outside agencies that are funded through federal grants; checks on compliance with federal, state and local laws, rules, regulations and guidelines.

Assists in the auditing of outside firms that have a franchise with Miami-Dade County or outside agencies that are funded through federal grants; checks on compliance with federal, state and local laws, rules, regulations and guidelines.

Prepares tentative reports and summaries and supporting information at completion of auditing projects.

Determines whether county organizational units and applicable external organizations are performing their planning, custodial, accounting or control activities in compliance with policies, procedures, standards, laws and regulations, and in a manner consistent with objectives and standards of administrative practices and applicable federal, state and local laws and ordinances.

Assists in determining records or activities to be analyzed, the extent of tests to be applied, and the working papers to be prepared.

Participates in surveys of auditable areas to develop programs for performance of annual overhead and direct cost reviews.

Performs reconciliations of contractor's proposed overhead pools and bases to financial statements and books of records.

### Assistant Auditor (000902)

Evaluates bid proposals with little in-process supervision after gaining familiarity with the offeror's operations.

Performs tests and examinations of contractor's records and actions, policies and procedures, contacts contractor personnel as necessary to obtain information; resolve accounting questions and obtain access to records essential to the conduct of the audit.

Drafts audit reports of moderate complexity assuring that they are responsive to specific audit requests, is objective, timely and accurate, and meets reporting standards and user needs.

Performs follow-up examinations to determine whether organizational units have implemented audit recommendations or corrective actions.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of generally accepted accounting principles, public finance administration and internal control systems and their methods and application to the development, installation and audit of governmental accounting systems.

Knowledge of the special principles, practices and procedures of auditing with reference to public finance and governmental accounting.

Knowledge of established audit program guidelines applicable to audits assigned.

Knowledge of federal, state and local laws, rules, regulations and guidelines relating to financial records of Miami-Dade County departments and agencies assigned for audit.

Ability to independently plan and accomplish a variety of contract audits assignments of moderate difficulty.

Ability to exercise judgment and discretion in making sound auditing decisions.

Ability to understand, interpret and implement auditing policies, goals and programs.

Ability to prepare complete and accurate accounting reports and statement.

Ability to promote and maintain effective departmental and public relations.

Ability to maintain an objective attitude in the conduct of audits.

Ability to perform detailed work involving written and numerical data.

Ability to make arithmetic calculations rapidly and accurately.

Ability to apply policies and procedures specified in audit program guidelines.

Ability to communicate effectively, both verbally and in writing.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional auditing work with some supervisory responsibility in the audit of various financial operations in county departments, external government organizations having contractual relationships with the county, and audit assignments of commercial firms doing business with Miami-Dade County.

Employees in this class perform more complex auditing assignments in various staff and operating agencies, departments and in external organizations, or serve as team leaders in the conduct of small-scale routine audits. Incumbents may also be assigned to assist professional superiors in the conduct of special auditing assignments of considerable complexity. Work differs from that found in the Assistant Auditor class in that the positions require more advanced professional knowledge of auditing theory and practices and the application of a greater degree of professional judgment in the disposition of accounting problems which arise. Emphasis may be assigned to a variety of departments and agencies or may specialize in audits of specifically assigned federally funded programs. Some incumbents are engaged in audits of firms that have contracts or franchises with the county. Supervision is received from a professional superior who reviews statements and reports and evaluates work for quality of results and adherence to professional auditing standards and program guidelines.

##### ILLUSTRATIVE TASKS

Supervises subordinate personnel in conducting audits of fiscal records of county departments; personally audits more difficult fiscal records; reviews and corrects records of audits for subordinate personnel; prepares or supervises preparation of final reports, summaries and supporting information together with analytical statements.

Conducts and supervises audits of outside firms that have franchises with the county, as assigned; conducts and supervises audits of outside agencies that are funded by federal grants; reviews compliance of firms and agencies with federal, state and local laws, rules, regulations and guidelines.

Determines whether county organizational units and applicable external organizations are performing their planning, custodial, accounting or control activities in compliance with policies, procedures, standards, laws and regulations, and in a manner consistent with objectives and standards of administrative practices and applicable federal, state and local laws and ordinances.

Performs audit assignments typically involving complete segments of audit programs involving manual accounting systems or generally automated systems.

Reviews incurred costs, forward pricing or bid proposals, progress payment requests, reimbursement claims, overhead costs, price redeterminations; termination claims, defective pricing reviews, purchasing, estimating and accounting surveys, and other miscellaneous audits and contract administration assignments.

Develops audit programs and contacts contractor/ subcontractor personnel to explain purpose of the audit and to obtain audit information.

Determines or assists in determining the direction and thrust of audit effort and in planning the theory and scope of audit.

Obtains, analyzes, and appraises evidential data as a basis for an informed and objective opinion on the adequacy and effectiveness of the system and the efficiency of performance of the activities being reviewed and on the adequacy of outside commercial firms, franchisers, or concessioners representations.

Makes, or assists in making, oral or written presentations to management during and at the conclusion of the examinations, after approval by

### Associate Auditor (000904)

the supervising auditor, discussing deficiencies and recommending corrective actions.

Prepares formal written reports, as requested, expressing opinions on the adequacy and effectiveness of the system and the efficiency with which activities are carried out.

Appraises, or assists in appraising, the adequacy of corrective actions taken to improve deficient conditions.

Assists superior in the conduct of more complex assignments such as those of an investigative nature.

Prepares summaries, schedules and supporting information for phases of audits assigned.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of generally accepted accounting principles, public finance administration and internal control systems and their methods and application to the development, installation and audit of governmental accounting systems.

Considerable knowledge of the special principles, practices and procedures of auditing with reference to public finance and governmental accounting.

Considerable knowledge of established audit program guidelines applicable to audits assigned.

Considerable knowledge of established audit program guidelines applicable to audits assigned.

Considerable knowledge of federal, state and local laws, rules, regulations and guidelines relating to financial records of county departments and agencies funded by federal grants.

Knowledge of the organization and operating activities of departments and agencies funded by federal grants.

Knowledge of supervisory practices and procedures.

Ability to plan organize and direct efforts to achieve audit objectives.

Ability to understand, interpret and implement auditing policies, goals and programs.

Ability to exercise judgment and discretion in making sound auditing decisions.

Ability to apply policies and procedures specified in audit program guidelines for various departments and agencies.

Ability to prepare more complex accounting reports and statements.

Ability to promote and maintain effective departmental and public relations.

Ability to maintain and objective attitude in the conduct of audits.

Ability to perform detailed work involving written and numerical data.

Ability to make arithmetic calculations rapidly and accurately.

Ability to communicate effectively, both verbally and in writing.

### Job Specifications

#### NATURE OF WORK

This is advanced and supervisory professional auditing work in the audit of various financial operations in county departments, external governmental organizations having contractual relationships with the county, and commercial firms doing business with Miami-Dade County.

Employees in this class are responsible for the supervision of the conduct of various moderately difficult and complex audit program including major auditing assignments. Incumbents must exercise professional and independent judgement in the audit of various management and financial operations.

#### ILLUSTRATIVE TASKS

Supervises and participates in continuous post audits of financial records of assigned county administrative and revenue-producing departments, including records of revenue, expenditures, assets and liabilities; supervises and participates in audits of concessionaires and operators of facilities leased, franchised or regulated by Miami-Dade County; prepares interim and annual reports of audits performed.

Assigns and supervises subordinate employees in the preparation of detailed financial reports, projections and analyses; reviews final reports and statements for adherence to program guidelines and auditing standards.

Participates in preparation of lease agreements and contracts undertaken by Miami-Dade County; conducts pre-audits preliminary to contract preparation; conducts subsequent post audits of facilities operating under lease agreements and contracts.

Assists in the setting of bid specifications for the engagement of external auditors and evaluates proposals submitted; confers with external auditors regarding audit findings as assigned.

Assists the Miami-Dade Police Department, State Attorney and Grand Jury as assigned by obtaining information in investigative audits; qualifies as an expert witness and testifies in court proceedings as required.

Audits and reviews applications for rate increases from water and sewer utilities; audits records of fixed assets, depreciation reserve and contributions in aid of construction to determine major rate base items; audits operating income statements of the utility; analyzes rate structure to verify effect of new rates; prepares staff reports and recommendations.

Determines whether county organizational units and applicable external organizations are performing their planning, custodial, accounting or control activities in compliance with policies, procedures, standards, laws and regulations, and in a manner consistent with objectives and standards of administrative practices and applicable federal, state and local laws and ordinances.

Evaluates effectiveness of internal controls, procurement and estimating procedures and costs systems of more than average complexity.

Prepares entire audit programs and audit reports when serving as auditor-in-charge; when serving as a lead auditor, prepares portions thereof on segments of complex audit assignments.

Prepares correspondence to contractors/subcontractors on costs questioned/ suspended, credits, reinstatements, amounts withheld, audit conversations and other related matters.

### Senior Auditor (000906)

Determines audit procedures to be used, including statistical sampling and the use of electronic data processing equipment.

Recommends necessary staff required to complete audits and modifications of audit programs for supervisory approval.

Obtains, analyzes, and appraises evidentiary data or a base for an informed and objective opinion in the adequacy and effectiveness of the system and efficiency of performance of the activities being reviewed and on the adequacy of outside commercial firms, franchisers, or concessioners representations.

Makes oral or written presentations to management during and at the conclusion of the examination, after approval by the supervising auditor, discussing deficiencies and recommending corrective actions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of governmental accounting, office management and the principles of public and business administration in their application to governmental accounting.

Thorough knowledge of all federal, state and local laws, ordinances, rules, regulations and guidelines pertaining to fiscal management of government agencies.

Considerable knowledge of generally accepted accounting principles, public finance administration and internal control systems and their methods and application to the development, installation and audit of governmental accounting systems.

Considerable knowledge of the special principles, practices, and procedures of auditing with reference to public finance and governmental accounting.

Considerable knowledge of federal, state and local laws, rules, regulations and guidelines relating to financial records of county departments and agencies funded by federal grants.

Considerable knowledge of the organization and operating activities of departments and agencies assigned for audit.

Knowledge of supervisory practices and procedures.

Ability to coordinate and supervise the work of an auditing staff in a manner conducive to full performance and high morale.

Ability to analyze and interpret accounting data, devise audit procedures and techniques or specialized and general accounting systems.

Ability to supervise the preparation of or prepare complete and accurate accounting reports and statements, including those of a complex nature.

Ability to promote and maintain effective departmental and public relations.

Ability to communicate effectively, both verbally and in writing.

Ability to exercise sound judgment in the application of audit standards and principles to complex auditing problems.

Ability to plan an audit program and organize and audit staff for a major audit assignment.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible supervisory and administrative professional auditing work in the audit of various financial operations in County departments, external government organizations having contractual relationship with the County and commercial firms doing business with Miami-Dade County.

Employees in this class are responsible for planning, directing and conducting reviews of assigned organizational and functional activities in accordance with professional auditing principles and departmental standards. Primary responsibilities include directing the conduct of operational, compliance, performance and financial audits of external companies, contractors and grantees having a contractual relationship with Miami-Dade County. Duties include assessing the adequacy of internal controls, appraising the management of resources, and determining compliance with procedures, contract terms, laws and regulations. Incumbents exercise considerable independent judgment and technical expertise in the application of advanced auditing knowledges to the management of complex auditing programs. Supervision is exercised through subordinate supervisors over a staff of professional auditors engaged in conducting auditing assignments. General direction is received from an administrative superior who holds the incumbent responsible for the effective management of multiple auditing assignments, quality of professional results, and accomplishment of audit objectives.

##### ILLUSTRATIVE TASKS

Plans, directs and coordinates the work of subordinate supervisors and professional auditors engaged in the auditing of assigned organizational and functional activities.

Plans and determines the focus and direction of specific audits; assists in formulating an annual audit plan; plans the objectives, approach, scope and work program to accomplish audit objectives in accordance with professional and departmental standards and within time constraints.

Monitors activities of subordinates and work progress; provides direction on proper documentation techniques, data gathering, analysis methods, and quality and quantity of audit documentation.

Reviews and evaluates completed work, findings and recommendations for accuracy, adequacy and presence of sufficient supporting documentation; assures that working papers support findings and conclusions and are in accordance with professional and departmental standards.

Obtains, analyzes and appraises evidentiary data in support of audit objectives, conclusions and findings.

Participates in audits of highly technical or complex areas to determine the adequacy and effectiveness of management controls, effectiveness and efficiency of activities under review, and compliance with policies, procedures, laws and regulations.

Evaluates audit findings for inclusion in audit reports; distinguishes critical and non-critical matters when assessing the significance of deficiencies and making recommendations for improvement.

Regularly informs management of auditing progress and/or technical problems; conducts periodic project status meetings with staff; prepares administrative reports regarding job scheduling and assigned activities.

Reviews audit reports and analyzes for thoroughness and conformance with audit program guidelines and professional auditing standards; participates in exit conferences with operating department employees; evaluates responses to reports to determine reasonableness and

### Audit Manager (000910)

suggests follow-up actions.

Performs special reviews and serves on special committees; coordinates auditing work with other departmental divisions; coordinates audit work with auditees and external auditors.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Extensive knowledge of the special principles, practices and procedures of auditing pertaining to financial operations of County departments, and external companies, contractors and grantees having contractual relationship with Miami-Dade County.

Thorough knowledge of the principles of governmental accounting, business and public administration.

Thorough knowledge of local, state and federal laws, ordinances and regulations pertaining to fiscal management of government agencies.

Thorough knowledge of the organization and operations of departments and agencies assigned for audit.

Thorough knowledge of professional and departmental standards for the conduct of comprehensive auditing programs.

Thorough knowledge of the provisions of various contracts between Miami-Dade County and external companies, contractors and grantees.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of public relations principles and techniques.

Ability to plan the objectives, approach, scope and work plan to accomplish audit objectives in accordance with professional and departmental standards.

Ability to direct and coordinate the work of an auditing staff to achieve audit objectives within projected time constraints.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to analyze and interpret accounting data, devise audit procedures and techniques, and evaluate completed audit reports.

Ability to determine the adequacy and effectiveness of management controls over operational activities.

Ability to exercise judgment and discretion in evaluating audit findings for critical and non-critical matters.

Ability to communicate clearly and concisely, verbally and in writing.

REV 7/00

#### Nature Of Work

This is highly responsible supervisory and administrative professional auditing work in the audit of various financial operations in County departments, external government organizations having contractual relationships with the County and commercial firms doing business with Miami-Dade County.

##### NATURE OF WORK

This is highly responsible executive level work in planning, managing and supervising activities of the Audit and Management Services Department.

An employee in this class is responsible for assisting the Department Director in the management of departmental functions and for directing the various management advisory services provided by the department. Responsibilities include assisting in defining the scope of departmental activities and methods to achieve objectives, maintaining working relationships with County officials and private-sector organizations, assisting in long-range planning, directing and reviewing financial and compliance audits of County departments and external organizations having a contractual relationship with the County, and providing advisory support on technology issues. The incumbent exercises an extensive degree of independent judgment and professional managerial knowledge in assisting in directing departmental operations and in supervising management advisory services. Supervision is exercised over a staff of professional and clerical employees engaged in diversified divisional operations. General direction is received from the Department Director who holds the incumbent responsible for the professional management of division functions and for effective assistance in the achievement of departmental goals and objectives.

##### ILLUSTRATIVE TASKS

Provides assistance to the Department Director in planning departmental activities and defining goals and objectives; reviews and evaluates department operations and devises new policies and procedures to improve effectiveness.

Plans, assigns and reviews the work of staff engaged in providing management advisory services including special projects and the review of administrative orders; determines scope and direction of management advisory services through interaction with Department Director and various departments' management.

Assists the Department Director in the selection of management consulting firms.

Acts in the absence of the Department Director as required.

Directs and supervises, through subordinate managers, professional auditors engaged in regular, systematic and special audits in departments or agencies, auditing of contractors, utility and franchise taxes, and concessions.

Reviews completed audit reports and analyses for completeness, preparation and conformance with various professional auditing standards.

Convenes meetings with department management to discuss audit findings, policies, procedures, and other subjects.

Provides information to subordinates concerning changes in ordinances, rulings, guidelines, legal opinions, standards and related information pertaining to the internal audit of County departments or audit of external agencies.

Assists in evaluating divisional performance in relation to departmental goals and objectives.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinate supervisors and rates employee performance.

Performs related work as required.

## Human Resources Department

---

### Deputy Director, Audit and Management Services (000938)

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of governmental accounting, office management and the principles of public and business administration in their application to governmental accounting.

Extensive knowledge of all federal, state, and local laws, ordinances, rules, regulations, and guidelines pertaining to fiscal management of government agencies, including those funded by federal grants.

Thorough knowledge of generally accepted accounting principles, public finance administration, and internal control systems and their methods and application to the development, installation and audit of governmental accounting systems.

Thorough knowledge of the special principles, practices and procedures of auditing with reference to public finance and governmental accounting.

Thorough knowledge of supervisory principles and practices.

Considerable knowledge of the organization and operating activities of departments and agencies assigned for audit.

Ability to use advanced professional knowledge of the principles of auditing and public administration to assist in formulating departmental policy and controlling departmental activities.

Ability to plan, organize, and supervise, through various levels of executives and supervisors, the work of subordinates in a manner conducive to full performance and high morale.

Ability to exercise judgment and discretion in devising, installing, and interpreting departmental and County policies, rules, and regulations.

Ability to establish and maintain effective working relationships with senior County management, officials of other public and private organizations, and officials of County departments.

Ability to communicate clearly and concisely, verbally and in writing, to groups and individuals.

Ability to analyze and interpret accounting data, devise audit procedures and techniques or specialized and general accounting systems.

Ability to supervise the preparation of complete and accurate accounting reports and statements, including those of a complex nature.

Ability to exercise sound judgment in the application of audit standards and principles to complex auditing problems.

Ability to keep informed on laws, legal opinions, regulations and standards relating to the conduct of audits in County departments and external agencies.

### Director, Audit and Management Services (000939)

#### Minimum Qualifications

Bachelor's degree. A minimum of six to ten of progressively responsible managerial and/or administrative experience in public or private accounting or auditing work to include supervisory experience are required. Must possess a State of Florida Certified Public Accountant or State of Florida Certified Internal Auditor license.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing activities of the management of the Miami-Dade County Audit and Management Services Department.

An employee in this class is responsible for planning, directing and coordinating internal auditing of County operations, providing management consulting assistance to County departments, and providing a variety of Countywide management services. Responsibilities include directing, through subordinate levels of executives and supervisors, the conduct of audits of County operations and external companies having contractual relationships with the County, determining compliance with regulations and contract terms, providing management consulting assistance to County departments to improve operations, and providing assistance in the formulation of Countywide policies and ordinances. The incumbent exercises extensive independent judgment and professional managerial knowledge in establishing auditing priorities and the scope of audit and management assignments. Supervision is exercised through subordinate executives and managers over a staff of professional, administrative and clerical employees. General direction is received from the County Manager who holds the incumbent responsible for the professional management of the department and achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, directs and coordinates, through subordinate executives and supervisors, internal auditing functions including conducting operational, compliance, performance and financial audits of County operations and external companies, contractors and grantees; assessing the adequacy of internal controls, appraising the management of resources, determining compliance with procedures, contract terms, laws and regulations; performing special examinations and reviews at the request of the Board of County Commissioners; providing guidance to operating departments in selecting external auditors, establishing internal controls and other audit-related matters; and furnishing staff support to external auditors.

Directs and coordinates, through subordinate executives and supervisors, management consulting activities including conducting consulting projects, providing management consulting assistance to County departments, preparing recommendations to improve operations and management, providing support to departments in implementing recommendations, and assisting in the selection and monitoring of external consultants.

Supervises a variety of management services including providing assistance in the formulation of the uniform application of Countywide policies and ordinances, reviewing and assisting in the development of administrative orders and procedures, implementing Economic Impact and Sunset Review of County Boards, and providing organizational studies and operational reviews.

Directs preparation and administration of department annual budget; supervises subordinates responsible for personnel administration, purchasing, cost accounting, safety programs and other administrative services.

Defines and formulates department policy, programs, objectives and direction; establishes priorities and the focus for audit management projects; Coordinates auditing and management activities with the Mayor's Office, Board of County Commissioners and other County departments as required.

Reviews organizational patterns, work relationships and staff responsibilities; structures the organization of the department to effectively achieve departmental goals.

Meets with executive, administrative and supervisory employees to discuss and resolve budgetary issues, audit findings and recommendations, administrative problems and other subjects.

## Human Resources Department

---

### Director, Audit and Management Services (000939)

Makes decisions regarding hiring, discipline and promotion of subordinates; exercises authority for departmental personnel actions consistent with collective bargaining agreements, County personnel rules, and all other applicable rules and regulations.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the principles of general management, public and business administration and governmental accounting.

Extensive knowledge of local, state and federal laws, ordinances, rules, regulations and guidelines pertaining to the fiscal management of government agencies, including those funded by federal grants.

Extensive knowledge of generally accepted accounting principles, public finance administration, and internal control systems, and their methods and application to the development, installation and audit of governmental accounting systems.

Thorough knowledge of the special principles, practices and procedures of auditing with reference to public finance and governmental accounting.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of the organization and operating activities of County departments and agencies.

Thorough knowledge of public relations principles and techniques.

Ability to apply advanced professional knowledge of the principles of management, business administration and accounting in directing, supervising and coordinating complex audit and management services.

Ability to plan, organize, direct and coordinate, through subordinate executives and managers, the work of subordinates in a manner conducive to full performance and high morale.

Ability to delegate the authority to subordinates necessary to complete responsibilities in varied departmental activities.

Ability to establish and maintain effective working relationships with subordinates, senior County management, elected officials, and other public and private officials.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to exercise judgment and discretion in devising, installing and interpreting departmental and County policies, rules and regulations.

Ability to determine if departmental standards, objectives and goals are being met and to redirect priorities as necessary.

### Revenue Development Coordinator (000944)

#### Minimum Qualifications

Bachelor's degree. A minimum of five to ten years of professional experience to include generating revenue activities, business development, grant writing and/or marketing experience is required. Supervisory experience and knowledge of establishing policies and procedures that support successful sponsorship, trust fund, and donation activities within a non-profit or governmental setting is high desired. Master's degree is preferred.

#### Job Specifications

#### Nature Of Work

## Engineering Drafter 1 (001002)

### Minimum Qualifications

High school diploma or GED. One year of experience in drafting, rendering sketches from blueprints, or making drawings of simple parts, equipment or facilities from materials such as sketches, marked-up prints or models is required. Completion of six semester credits in Engineering Drafting, Architectural Drafting or Computer-Aided Design Drawing (CADD) may substitute for the required experience.

### Job Specifications

#### NATURE OF WORK

This is sub-professional engineering work with emphasis upon drafting and related skills.

Employees in the Engineering Drafter 1 classification prepare clear, complete, and accurate working plans and detailed drawings from rough or detailed sketches or notes for varied engineering purposes. Work requires utilizing knowledge of engineering practices and mathematics, as well as knowledge of various machines and structural materials. Employees occasionally supervise others on specific projects and, less formally, as part of routine check, verification, and review. All work is performed subject to technical or professional review.

#### ILLUSTRATIVE TASKS

Performs detailed drafting on electrical, mechanical, and structural layouts; computes and drafts work involved in checking and reducing field survey notes, calculating distances, ties, angles, areas, traverses, and closures; inks in all lines and letters on pencil drawings as required.

Prepares grading plans and estimates; shows proposed contour lines, elevations, and drainage of surface waters; estimates the amount of rock fill and paving required and its cost.

Makes or corrects topographic maps from aerial photo; plots contour lines; transfers parts or entire topographic drawing to the same or different scale.

Prepares various drawings from field notes; reduces field notes; plots and checks center lines and cross sections; uses planimeter to make engineering measurements, and makes less technical computations.

Prepares a variety of hydrographic drawings; plots hydrographs from gauge readings; computes and illustrates a variety of hydrographic information related to water control and canal and dam operation.

Draws and computes dimensions for minor bridge construction; shows general lay out in in plane and elevation views; the location of test borings data; draws foundations and pile cap; shows superstructure including framing plan and detail; shows handrail plan and detail.

Makes field trips in order to obtain or verify dimensions and data.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, practices, techniques and instruments of engineering drawing.

Knowledge of surveying instruments and all major cartographic survey procedures.

Knowledge of mathematics through trigonometry.

Knowledge of general construction specifications and blueprints.

Ability to make the less complex engineering computations quickly and accurately.

### Engineering Drafter 1 (001002)

Skill in the use of engineering drafting instruments and equipment.

REV 03/99

#### **Nature Of Work**

This is sub-professional engineering work with emphasis upon drafting and related skills.

## Engineering Drafter 2 (001003)

### Minimum Qualifications

High school diploma or GED. Three years of experience in technical engineering surveying and/or drafting are required. Completion of coursework in Engineering, Architecture, Geography or related field may substitute for the required experience on a year-for-year basis to a maximum of two years.

### Job Specifications

#### NATURE OF WORK

This is advanced technical work in engineering drafting.

Employees in this class act as principal assistants to professional engineers in performing a variety of the more responsible and technical drafting and office engineering tasks. Work requires a considerable knowledge of certain phases of civil engineering, but engineering registration is not necessary. Engineering Drafter 2 incumbents frequently supervise subordinate technical personnel. Where supervision is not direct, they provide a point of technical reference and review for junior personnel of the office. All work is subject to check in progress and upon completion by professional engineers.

#### ILLUSTRATIVE TASKS

Checks and verifies plats of subdivisions which have been prepared by land surveyors for official recording; writes and checks legal descriptions for parcels of land required for road right-of-way; examines and studies related property abstracts; prepares maps as necessary, identifying and numbering parcels.

Lays out and traces plan-profile sheets for street improvements; searches for and collates sources of information such as: field survey notes for elevations and land occupation, utilities for construction plans, and proposed construction from county and state road department plans.

Plots road and channel cross sections; computes earth work.

Lays out and designs alterations for bridge structures under professional supervision; does pencil or ink drafting of plans for both alterations and new bridges; reviews and checks the computations of others for bridge designs.

Checks a considerable variety and volume of plans and specifications related to parks activities; work area includes topographic, and limited hydrographic work; prepares cost estimates on structural plans and checks cost estimates of others; writes original specifications or those for plans drawn by others; draws detailed plans of proposed structures, or delegates detailed drafting to subordinates; maintains a detailed check upon contract performance on projects not done on force account.

Prepares plans and does detailed lay outs for county canals and drainage system; investigates for right-of-way and easement for canal widening, improvements, and general maintenance; reduces field notes and computes excavation areas for fill; draws topographic, and other maps showing contours, roads, canals, and other physical features; utilizes aerial photos, plats, and survey notes; makes drawings or sketches, for storm sewers and trenches; supplies subdivision developers with a variety of flood control information; supplies engineers and survey parties with information regarding bench marks; supervises and assists subordinates in various subprofessional engineering assignments.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices, techniques and instruments of engineering drafting.

Considerable knowledge of mathematics through trigonometry and its application to subprofessional engineering computations.

Considerable knowledge of construction specifications and plans, and of applicable regulations relating to public works construction by contract.

### Engineering Drafter 2 (001003)

Considerable knowledge of the basic principles of civil engineering as they relate to topographic surveying and engineering drafting.

Ability to plan and supervise the work of technical assistants in a manner conducive to full performance and high morale.

Ability to perform difficult technical computations, to make estimates and tests, and to compile simple engineering data and statistics.

Ability to make difficult and technical engineering drawings.

Ability to read and interpret a wide variety of maps, plans, aerial photographs, survey notes, and other cartographic records.

Ability to understand, follow and transmit complex oral and written instructions.

Skill in the use of engineering drafting instruments and equipment.

REV 03/99

#### **Nature Of Work**

This is advanced technical work in engineering drafting.

## Human Resources Department

---

### CADD and Survey Manager (001006)

#### **Minimum Qualifications**

Bachelor's degree in Architecture, Engineering, Computer Science or related field. A minimum of two to three years of experience in AutoCADD or related systems is required.

#### **Job Specifications**

#### **Nature Of Work**

### Engineering Survey Technician 1 (001010)

#### Minimum Qualifications

High school diploma or GED. One year of land surveying field experience is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled technical work assisting on surveying and engineering field projects.

Employees in this class are responsible for utilizing simple engineering and surveying practices in the performance of sub-professional work on engineering field projects. While little independent judgement or action is required, employees are assigned progressively more difficult tasks as experience is gained. Assignments are generally accompanied by specific instructions until routines are thoroughly mastered. Supervision is received from a technical superior who reviews work for compliance with instructions and established procedures.

##### ILLUSTRATIVE TASKS

Serves as rod-person on a topographic survey crew; serves as a relief instrument-person on simple survey assignments; measures with chain, clears brush, drives stakes, holds rod; cleans and cares for trucks and surveying equipment.

Serves as a rod-person and general aide in hydrographic surveys; runs levels in connection with extending benchmarks and determining ground or water elevations; performs measuring/soundings in the cross sections of canals and waterways, occasionally operating motor boat when taking soundings.

Paints aerial control targets and control lines.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Some knowledge of simple surveying and engineering instruments, equipment and practices.

Ability to understand and follow verbal and written instructions.

Ability to obtain a State of Florida Driver License.

Physical strength and agility sufficient to perform assigned duties.

REV 12-93

#### Nature Of Work

This is semi-skilled technical work assisting on surveying and engineering field projects.

### Engineering Survey Technician 2 (001011)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in survey work to include one year of experience as rod person or instrument person are required. Must possess a valid Driver's license.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work assisting on surveying and engineering field projects.

Employees in this class are responsible for performing the duties of an instrument person using surveying instruments in topographic or hydrographic field surveys. Work assignments are received accompanied by detailed written or verbal instructions. Incumbents have more responsibility for work methods and greater opportunity to use independent judgment than in the next lower class. Work may include directing Engineering Surveying Technician 1 in the performance of their duties. Supervision is received from a technical superior who reviews work for satisfactory application of surveying skills and compliance with instructions and procedures.

##### ILLUSTRATIVE TASKS

Sets up, adjusts and operates a transit/theodolite and electronic measuring device to locate and establish lines, points and angles, and establish the correlation of surface features with each other by angles, elevations and distances.

Sets up, adjusts and operates a level and electronic device to obtain or establish elevations of surface features and waterways.

Directs Engineering Surveying Tech 1's in the performance of surveying duties, as required.

Prepares drawings from field notes, reduces field notes, and makes simple computations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the techniques and practices of field surveying.

Knowledge of the use of modern surveying instruments.

Knowledge of mathematics through trigonometry.

Some knowledge of general construction principles and practices.

Ability to understand and follow verbal and written instructions.

Ability to make simple surveying computations quickly and accurately.

Ability to read and interpret specifications, maps and technical drawings.

Ability to obtain a State of Florida Driver's License.

Ability to prepare drawings from field work neatly and accurately.

Skill in the use of surveying instruments.

Physical strength and agility sufficient to perform assigned duties.

## Human Resources Department

### Engineering Survey Technician 2 (001011)

REV 08-02

#### **Nature Of Work**

This is skilled technical work assisting on surveying and engineering field projects.

The written examination will evaluate techniques and practices of field surveying, use of modern surveying instruments, mathematics through trigonometry, simple surveying computations, specification, maps, and technical drawings, and the ability to follow written instructions.

Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of 1/2 point per year of continuous, full-time service in the County service to a maximum credit of ten years of service or five points.

Applicants requesting Veterans' Preference must submit Veterans' Preference documents at the time of application. Preference will be given to veterans and spouses of veterans, when applicable. Those claiming Veterans' Preference must submit documentation of eligibility for preference, such as a copy of a DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility from the armed force(s) (Army, Navy, Air Force, Marine Corps, and/or Coast Guard of the United States). The DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility documents must include wartime dates of service and an "honorable" discharge. In addition to the DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility, those who are claiming preference as a disabled veteran must provide a recent letter (within one year) from the Department of Veteran's Affairs or Department of Defense stating the percentage of their service-connected disability. All veterans are required to complete a Veteran's Preference Claim Form at the time of application.

Photo identification is required at the time of application. Applicants must apply in person. Employment applications accepted at: Center for Employment Application, 140 West Flagler Street, Suite 105, Miami, Florida from Monday, February 6, 2005 through Tuesday, February 22, 2005 8:30 a.m. to 4:00 p.m., Monday through Friday. Location of examination: Stephen P. Clark Center, 111 NW 1st Street, 18th Floor, Room 18-A, Miami, Florida, 33128-1996. Date of examination: Wednesday, March 30, 2005. Registration time: 1:45 p.m. until 2:00 p.m. Doors to the test facility will be closed promptly at 2:00 p.m. No one will be admitted for registration after the doors to the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination.

### Engineering Survey Technician Supervisor (001012)

#### Minimum Qualifications

High school diploma or GED. Three years of experience as an instrument person or party chief in general land surveying to include experience in highway design and layout are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical and supervisory work on surveying and engineering field projects.

Employees in this class are responsible for performing the duties of a party chief in topographic and hydrographic land surveys. Responsibilities include supervising the more technical assignments in field surveying, making and checking engineering computations, and inspecting construction work. Assignments may be received verbally or in writing and incumbents exercise independent judgment in carrying out assigned responsibilities. Supervision is exercised over subordinate engineering aides engaged in various field survey activities. Work is subject to review in process and upon completion by professional surveying and engineering superiors.

##### ILLUSTRATIVE TASKS

Serves as chief of field party in topographic and hydrographic land surveys; supervises field work, takes field notes and makes sketches; contacts interested public and exercises responsibility for work results and progress of project.

Supervises and participates in the review of construction plans.

Investigates subdivisions; makes engineering field inspections of drainage problems; checks proposed street grades and drainage plans.

Prepares drawings from field notes, reduces field notes, and makes survey computations as needed.

Prepares a variety of preliminary estimates for engineering and surveying projects; receives records, maps and statistical information of a technical surveying and engineering nature; analyzes data as it comes from the field; prepares detailed information for superiors; does calculations for the layout and control of construction and land title projects.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, techniques, and practices of all types of field surveying.

Considerable knowledge of the use of modern surveying instruments.

Considerable knowledge of mathematics through trigonometry and its application to field surveying and engineering computations.

Knowledge of civil engineering principles and practices related to surveying.

Knowledge of construction specifications and plans and of public works regulations relating to projects.

Knowledge of supervisory principles and practices.

Ability to perform technical computations related to surveying and to compile related data.

Ability to prepare accurate and neat minor technical drawings from field notes.

## Human Resources Department

---

### Engineering Survey Technician Supervisor (001012)

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to read and interpret specifications, maps and technical drawings.

Skill in the use of surveying instruments.

Physical strength and agility sufficient to perform assigned duties.

REV 12-93

#### **Nature Of Work**

This is advanced technical and supervisory work on surveying and engineering field projects.

### Public Works Hydraulics Mechanic (001013)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the maintenance of electrical and hydraulics equipment are required. Must be able to swim. Must possess or obtain a CDL/Class B with Tanker Endorsement during the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is skilled mechanical work at the journeyman level in the repair and maintenance of hydraulic and electrical equipment related to Public Works.

Employees in this class perform skilled work in the repair and maintenance of fluid power and electrical systems which activate and control bascule and swing bridges; and other hydraulic systems within Public Works. Work involves diagnosing, repairing, overhauling and adjusting a variety of hydraulic equipment and systems. Supervision is occasionally exercised over subordinate employees who assist with various phases of work. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory repair and maintenance of hydraulic systems.

##### ILLUSTRATIVE TASKS

Repairs and maintains a variety of hydraulically controlled and operated equipment with emphasis on movable bridges; makes adjustments on pressure relief valves and flow control valves to bring components into proper operating range.

Troubleshoots hydraulic and electrical systems to locate and correct problems; makes bench tests to locate leaks and defects in equipment; recommends solutions to correct operating problems.

Overhauls, rebuilds and services hydraulic component parts such as cylinders, directional control valves, and pumps.

Installs and/or adjusts and maintains limit switches, proximity sensors, permissive system and other electrical bridge movement controls.

Makes repairs in the field; tests and checks components and equipment before returning to service.

Completes all necessary paperwork associated with the maintenance and repair of moveable bridges, computerized work order charge sheets and equipment vehicle check lists on a daily basis.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the construction, design, repair and adjustment of hydraulic and electrical components and equipment.

Considerable knowledge of the operation of movable bridges.

Considerable knowledge of tools and equipment needed for major and minor repairs of hydraulic and electrical systems associated with moveable bridges.

Considerable knowledge of hydraulic and electrical principles and theory.

Considerable knowledge of the mechanics of hydraulic and electrical components.

Knowledge of the occupational hazards and safety precautions of hydraulic and electrical work.

## Human Resources Department

---

### Public Works Hydraulics Mechanic (001013)

Ability to diagnose and detect failures in hydraulic systems.

Ability to make bench tests to locate leaks and defects in equipment and recommend solutions to correct the problem.

Ability to adjust and maintain electric bridge movement controls such as limit switches, proximity sensors and permissive systems.

Ability to overhaul, rebuild and service a variety of hydraulic components.

Ability to read hydraulic and electrical schematics.

Ability to follow verbal and written instructions.

Ability to complete all necessary paperwork associated with the maintenance and repair of moveable bridges, computerized work order change sheets, equipment vehicle check lists and other written documents as required.

Skill in the care and use of tools, equipment and materials used in industrial hydraulics.

Skill in the diagnosis of hydraulic and electrical malfunctions.

NEW/09/13/2007

#### **Nature Of Work**

This is skilled mechanical work at the journeyman level in the repair and maintenance of hydraulic and electrical equipment related to Public Works.

### Engineering Permit Clerk 2 (001014)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in the examination of engineering plans or issuance of engineering permits are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in the examination of plans and in the issuance of engineering permits.

Employees in this class are responsible for reviewing engineering plans submitted for work within the public right-of-way, reviewing progress reports of public works projects under construction, and advising contractors when work being performed is unsatisfactory. Duties include reviewing reports of unusual conditions within the public right-of-way, enforcing engineering requirements, and maintaining contacts with inspectors and project engineers. Work requires current knowledge of engineering permit regulations and the ability to read standard details on engineering plans. Supervision is received from a technical supervisor who reviews work for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Provides advice and assistance in the examination of engineering plans submitted for construction, repair or alteration of streets, drainage systems, water and sewer utilities, telephone or electrical pole lines, underground installations, and other work to be performed in the public right-of-way.

Reviews progress reports with supervisors or inspectors concerning progress of public projects under construction.

Informs contractors when work being performed is unsatisfactory.

Reviews reports of unusual conditions within the public right-of-way and channels information for necessary action.

Enforces the requirements of the standard details of the Public Works Manual.

Maintains daily verbal communication with inspectors and project engineers.

Verifies eligibility of permit applicants.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the content and meaning of information on engineering plans submitted for construction in the public right-of-way.

Considerable knowledge of regulations and rules pertaining to public works construction in the public right-of-way.

Knowledge of mathematics through trigonometry.

Knowledge of survey and construction principles and practices.

Knowledge of public relations principles and techniques.

Ability to read, understand, and interpret information contained on engineering plans for construction in the public right-of-way.

Ability to explain regulations and engineering requirements to contractors and the public.

## Human Resources Department

---

### Engineering Permit Clerk 2 (001014)

Ability to determine if engineering plans are in conformance with current rules and regulations.

Ability to understand and follow verbal and written instructions.

Ability to review progress reports of public works projects under construction with inspectors and supervisors.

REV 12-93

#### **Nature Of Work**

This is advanced technical work in the examination of plans and in the issuance of engineering permits.

### PWD Engineering Permit Coordinator (001016)

#### Minimum Qualifications

High school diploma or GED. Six years of experience in the examination of engineering plans and issuing permits to include one year at a supervisory level are required. Completion of coursework in Engineering, Architecture, Building Construction or Real Estate may substitute for the required experience on a year-for-year basis up to a maximum of two years.

#### Job Specifications

##### NATURE OF WORK

This is technical and supervisory work in the examination of engineering plans and in the issuance of engineering permits.

An employee in this class is responsible for supervising subordinates engaged in reviewing engineering plans submitted for work within the public right-of-way. Responsibilities include managing the issuance of Uniform Civil Violation Notices, monitoring collections of paid citations, investigating proposed locations of bus shelters and monitoring wells, maintaining files of engineering drawings of proposed public works construction, and approving all utility construction requests prior to the issuance of a permit. Duties require a considerable knowledge of the engineering plans permits process for work within the public right-of-way. Supervision is exercised over a staff of engineering permit clerks engaged in various phases of the engineering permit process. Supervision is received from a professional superior who reviews work for effective engineering permitting operations.

##### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of engineering permit clerks engaged in reviewing engineering plans submitted for work within the public right-of-way, issuing engineering permits, reviewing progress of public works projects under construction, and advising contractors when work being performed is unsatisfactory.

Manages the issuance of construction permits and Oversize/Overweight Movement Permits.

Manages the issuance of Uniform Civil Violation Notices as issued by public works inspectors; maintains log of all citations issued and monitors collections of paid citations.

Physically investigates the proposed locations of bus shelters, and monitoring wells.

Maintains a running log of "dry run" engineering drawings of proposed construction of water, sewer, and sanitary force mains to ascertain that they conform to the Public Works manual in terms of location, depth, and other factors.

Approves all utility construction requests prior to permit being issued.

Receives complaints and requests concerning construction within right-of-ways and utility easements.

Reviews and approves plans for commercial properties regarding the paving and drainage of the property.

Assists in issuing engineering permits, as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of engineering permit office methods, operations, and filing systems.

Considerable knowledge of the content and meaning of information on engineering plans submitted for construction in the public right-of-way.

### **PWD Engineering Permit Coordinator (001016)**

Considerable knowledge of regulations and rules pertaining to public works construction in the public right-of-way, Oversize/Overweight Movement Permits, and plans for commercial properties regarding paving and drainage.

Knowledge of supervisory principles and practices.

Knowledge of mathematics through trigonometry.

Knowledge of survey and construction principles and practices.

Knowledge of public relations principles and practices.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to manage and coordinate engineering plans office permitting operations.

Ability to read, understand, and interpret information contained on engineering plans for construction in the public right-of-way.

Ability to enforce engineering permit regulations with firmness, tact, and impartiality.

Ability to establish and maintain effective working relations with contractors, the public, and a variety of other public and private officials.

NEW 7-92

#### **Nature Of Work**

This is technical and supervisory work in the examination of engineering plans and in the issuance of engineering permits.

### Cadastral Technician (001017)

#### Minimum Qualifications

High school diploma or GED. Three years of drafting and/or surveying experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in cadastral engineering.

Employees in this classification act as principal assistants to professional engineers in performing a variety of the more responsible and technical cadastral engineering tasks. Work requires a considerable knowledge of engineering surveying, land surveying and real property interests. Cadastral Technicians frequently supervise subordinate technical personnel. All work is subject to check in progress and upon completion by professional engineers.

##### ILLUSTRATIVE TASKS

Checks and verifies plats of subdivisions which have been prepared by land surveyors for official recording.

Reviews title search information prepared by abstractors to determine ownerships and other property interests.

Prepares and checks legal descriptions of property to be acquired for road right-of-way or other public purposes.

Performs difficult surveying computations to determine bearings and distances included in legal descriptions and area of tracts of land.

Checks executed instruments of conveyance and related documents for proper form, accuracy and completeness.

Supervises the preparation of exhibits, maps and sketches as needed in connection with acquisition functions and condemnation proceedings.

Makes routine field trips to obtain information concerning property descriptions and property values.

Trains lower level technical personnel by informal on-the-job instruction.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of principles, techniques and instruments of engineering drafting.

Considerable knowledge of mathematics through trigonometry and its application to sub-professional engineering and surveying computations.

Considerable knowledge of the basic principles of civil engineering and land surveying.

Considerable knowledge of interests in real property and instruments of conveyance and documents related thereto.

Ability to perform difficult surveying computations.

Ability to read and interpret a wide variety of maps, plans, aerial photographs, survey notes and other cartographic records.

Ability to understand and follow complex oral and written instructions.

Skill in the use of engineering drafting instruments and equipment.

### Cadastral Technician (001017)

NEW 10-73

#### **Nature Of Work**

This is advanced technical work in cadastral engineering.

## Human Resources Department

---

### Senior Cadastral Technician (001018)

#### Minimum Qualifications

Bachelor's degree in Engineering, Land Surveying or related field. Four years of experience in cadastral engineering or land surveying to include experience in computerized surveying, design calculation and mapping systems are required. Additional experience in cadastral engineering or land surveying to include experience in computerized surveying, design calculation and mapping systems may substitute for the required education on a year-for-year basis up to two years.

#### Job Specifications

#### Nature Of Work

This is highly advanced technical work in cadastral engineering.

### Engineer 1 (001020)

#### Minimum Qualifications

Bachelor's degree in Engineering. A State of Florida Professional Engineer license or Bachelor's degree in Engineering Technology awarded or having been enrolled prior to July 1, 1979 and proof of having passed the fundamentals test for the State of Florida Professional Engineer license may substitute for the required education.

#### Job Specifications

##### NATURE OF WORK

This is professional civil engineering work in the planning, design, inspection of construction, and maintenance of a variety of public works facilities.

An employee in this class performs work involving the application of professional engineering skills to moderately difficult engineering projects. Incumbents may supervise several field survey parties, act as inspector for a single construction project or several minor projects or perform technical work in research, roadway and bridge design, cadastral surveys, hydrology, hydraulic engineering, coastal engineering, water supply and sewer engineering, subdivision control or engineering surveys. Work in this class may also include research and participation in engineering feasibility studies for public works construction projects. Work may involve supervision of technical and clerical personnel. Assignments are received with general instructions, however employees in this class apply knowledge of engineering principles, exercise professional judgment and initiative in performing the assigned duties. Work is reviewed in progress and upon completion by professional superiors for technical adequacy, economy, and conformance to departmental practices, policies and regulations.

##### ILLUSTRATIVE TASKS

Lays out and supervises the work of a large number of survey field crews performing land surveys, topographic surveys, location surveys, and layout work for construction of public works facilities.

Serves as a subordinate highway engineer under professional direction; plans and designs urban and rural roadways, intersections, and grade separations in accordance with design standards established by national and state officials and county specifications; makes preliminary layouts of proposed highway improvements with the aid of reconnaissance and aerial photographs; establishes grade lines in accordance with the requirements of drainage design, existing topography and earthwork economy; prepares summaries of quantities of materials and labor required for proposed road improvement; computes total cost estimates.

Serves as subordinate project engineer for coastal construction projects under professional direction; assists in preparing and revising permit procedures for control of dredging and filling in tidal waters and beach restoration work; assists in preparing design criteria and detail standards for coastal construction work for publication in the public works manual; reviews applications for permit to perform coastal engineering construction work; investigates coastal structures and recommends adjustment, repair and replacement of groins and bulkheads.

Serves as subordinate hydraulic engineer under professional direction, performing designs of secondary canals and related structures; supervises and participates in preparation of construction plans and specifications for canals and water control structures to be constructed by county forces, by contract or under permit; determines amount of performance bond and time limit for contract and permit work; reviews plans for flood control and drainage facilities submitted to the county for approval and permit for construction.

Serves as subordinate bridge engineer under professional direction; investigates proposed bridge sites; makes preliminary design and, after approval by superior, prepares final design; prepares cost estimates of proposed work; writes technical specifications; supervises drafting and layout of plans; makes strength ratings of existing or proposed structures; studies new construction and design methods for possible application to county work.

Serves as a subordinate construction specification writer under professional supervision, prepares contract documents for construction projects; prepares cooperative project agreements, and agreements for engineering and other professional services; prepares and reviews bid tabulations; recommends procedures for the administration of contract documents; prepares specifications for purchase of equipment and materials to be used in various maintenance operations; reviews contract documents and specifications prepared by consulting engineers for use on county projects.

## Human Resources Department

---

### Engineer 1 (001020)

Serves as research engineer preparing and revising standards for the design and construction of public works for publication in the public works manual; investigates new materials and methods for public works construction; assists in compiling and preparing annual County and State Road Department budget recommendations; assists in preparation of ordinances affecting the Public Works Department; prepares periodic and special engineering reports as required; compiles and analyzes data for special tax districts for street lighting, water distribution, sanitary sewers, storm sewers, street paving, and other public improvements.

Under professional supervision, processes all land subdivision plats submitted to the county; examines tentative plats, grading and drainage plans, and final plats; checks improvement bonds for conformance to applicable state and local laws; prepares subdivision plats for county-owned property; prepares final plans and legal descriptions for official bulkhead lines.

Acts as project engineer on construction of bridges, roads, and other public works by contract for the county; works with contractors in setting alignment and grade; inspects placing of steel and the mixing and placing of concrete; inspects completion of each phase of construction; prepares estimates and submits recommendations on monies due contractors each month.

Serves as subordinate right-of-way engineer under professional direction; supervises draftsmen and computers in the preparation of right-of-way maps, parcel sketches and legal descriptions required for obtaining the necessary interests in land to be acquired; checks for accuracy the computation of dimensions and areas of land parcels.

Performs hydraulic computations as required to maintain adequate standards of drainage including rainfall analysis, water run-off, stream flow, ground water and salt water encroachment studies, and related hydrologic problems; supervises the establishment, expansion and maintenance of a network of hydrologic data stations.

Performs research required to convert engineering design computations from manual methods to electronic data processing procedures; develops and writes computer programs for engineering and accounting applications; prepares coding forms, user manuals, operating instructions and diagrams for computer programs; instructs engineering and accounting personnel in the use of computer programs; confers with division heads and their subordinates to develop and revise programs as needed; prepares reports concerning application of electronic data processing to engineering and accounting activities.

Reviews plans of water distribution and sewage collection facilities for compliance with county requirements prior to issuance of construction permit; prepares preliminary and final designs and cost estimates of proposed water supply and sewer facilities; investigates water and sewer service complaints; assists in the preparation of the County Manager's report for the creation of water and sewer special taxing districts.

Acts as head of the Permit and Underground Section; supervises issuance of permits for public works construction in the public right-of-way, issuance of oversize and overweight vehicle permits, review of grading and drainage plans for parking lots to determine effects upon public right-of-way, and preparation of maps showing location of underground utilities.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles and practices of civil engineering.

Knowledge of surveying principles, practices and laws governing land subdivision.

Knowledge of the design, construction and operation of public works facilities, including highways, bridges, water and sewer facilities, flood control and drainage works, and coastal structures.

Knowledge of applicable laws and regulatory codes pertinent to design and construction.

Knowledge of mathematics, automatic data processing equipment and techniques and computer program languages for scientific and business applications.

## Human Resources Department

---

### Engineer 1 (001020)

Ability to learn complex engineering design procedures, and to analyze and organize a large and complex array of data for electronic processing.

Ability to make engineering cost estimates and related computations and recommendations on moderately difficult engineering problems.

Ability to express ideas clearly and concisely, orally and in writing.

Ability to design moderately difficult engineering projects.

Ability to take charge of moderately difficult engineering construction projects, to obtain adherence to plans and specifications, and to secure compliance by private contractors with contracts in a tactful, firm and impartial manner.

Ability to plan, assign and supervise the work of others in a manner conducive to full performance and high morale.

Skill in the use of civil engineering instruments and equipment.

REV 8-66

#### **Nature Of Work**

This is professional civil engineering work in the planning, design, inspection of construction, and maintenance of a variety of public works facilities.

### Engineer 2 (001021)

#### Minimum Qualifications

Bachelor's degree in Engineering. Two years of engineering experience are required. A State of Florida Professional Engineer license; or Bachelor's degree in Engineering Technology awarded or having been enrolled prior to July 1, 1979 and proof of having passed the fundamentals test for the State of Florida Professional Engineer license may substitute for the required education.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional civil engineering work with supervisory responsibility in the planning, design, construction, inspection and maintenance of a variety of public works facilities.

Employees in this class typically serve as heads of work units in the Public Works engineering organization with responsibility for, and participating in, the work of complex and diversified projects. This class is distinguished from that of Engineer 1 in that employees apply more advanced knowledge and skills to projects of a more complex nature, and are responsible for finalizing major projects. Employees receive a minimum of professional direction and confer with superiors on unusual or difficult problems and matters of policy. Work is reviewed by a professional superior primarily to determine general progress and conformity to departmental practices, governmental ordinances and statutes.

##### ILLUSTRATIVE TASKS

Supervises and participates in the production of plans for construction of highways; supervises the design and preparation of plans for construction of highway bridges; supervises field surveys to develop information required for design activities; supervises the preparation of cost estimates of proposed bridges, highways and other improvements; supervises the advance planning of major highway, bridge and related projects, including preparation of recommendations for program scheduling.

Supervises collection, recording and analysis of ground water elevations, surface water stage, rainfall amount and intensity; supervises regulation of water levels throughout the county by operation of dams and water control structures; studies operation record of water control structures and interrelated hydrologic data to improve both results and methods of operation; conducts continuing review of official County Flood Criteria Map and supervises computation of flood water profiles and stage frequency relationship.

Supervises coastal engineering activities of the county; coordinates these activities with state and federal agencies having jurisdiction over dredging and filling in tidal waters and beach preservation work; supervises planning and design of coastal construction projects and reviews plans for such work submitted to the county for approval and permit; supervises and participates in preparation of standards and permit procedures governing such work.

Supervises and participates in processing of special improvement taxing districts; prepares County Manager's report and recommendations for creating special taxing districts; prepares and maintains status reports covering special taxing districts; prepares plans and designs for street lighting improvement districts; designs and prepares recommendations for lighting of arterial streets; investigates and tests new lighting materials for consideration in street lighting programs; handles public inquiries and complaints regarding improvements in special taxing districts.

Supervises and participates in review of plans for proposed water supply and sewer facilities to insure compliance with county standards; supervises and participates in reviews of tentative subdivision plats for water supply and sewerage requirements; designs water and sewer works including treatment plants and pumping facilities; prepares reports and makes preliminary feasibility studies for water and sewerage facilities; assists in developing programs and projects to implement the countywide master plans for water supply and sewerage.

Supervises and participates in preparation of hydraulic design computations for canals, culverts, ditches and storm sewers; estimates drainage area of water sheds and direction of flow; reviews tentative subdivision plats and subdivision drainage plans for adequacy of design and for conformance with County Water Control Plan; reviews permit applications for proposed utility installations and makes recommendations based on their effect on water control facilities; reviews plans for proposed lake excavations and similar work under jurisdiction of other county departments; prepares recommendations regarding engineering features of such plans.

## Human Resources Department

---

### Engineer 2 (001021)

Supervises and participates in development of automatic data processing procedures and their application to engineering and accounting functions; conducts research into new methods of design computation, work measurement recording, and cost accounting using electronic computers; supervises and participates in preparation of computer programs for specific project applications; prepares reports and explanatory materials required for understanding and use of computer programs; instructs users of the programs and assists supervisors in training personnel in their use; investigates areas of operation to which electronic automatic data processing may be applied to increase efficiency and reduce costs.

Acts as traffic design engineer; supervises and participates in studies relating to the movement of traffic on roads and streets for use in geometric design of highways, intersections and interchanges and for design of traffic control devices; prepares technical reports dealing with the traffic engineering aspects of highway design for road program planning and for specific projects; supervises preparation of plans for installation of traffic control signals, signs and markings; through subordinates, investigates complaints and requests concerning local traffic conditions and prepares recommendations for their improvement; prepares road sufficiency ratings and assists in development of the countywide master thoroughfare plan.

Supervises and reviews the work of subordinate technical and professional personnel engaged in preparing cadastral engineering data for state highway and county road projects including right-of-way maps, legal descriptions, survey sketches and related information required for use in right-of-way acquisition and condemnation proceedings.

Supervises and participates in reviewing and checking of building plans and specifications for compliance with building codes; suggests alternative design to safety code requirements; reviews and evaluates engineering drawings, calculations and tests for compliance of various building components; attends and evaluates various tests conducted by laboratories and professional engineers.

Assists in planning and supervising an efficient and effective program of air pollution control; conducts specialized surveys and studies; prepares recommendations, consults with public officials, industrial representatives and private individuals relative to the elimination or control of air pollution; conducts field investigations of complaints of violations, prepares reports with recommendations for corrective measures, makes follow-up investigations.

Supervises engineering survey section providing information for county departments including field work to establish and maintain official survey monuments for section public works construction and related survey work and property corners, surveys of county owned properties, locating right-of-way lines, determining lines and grades for public works construction and related survey work.

Supervises the inspection of public works construction projects, including roads, bridges, canals and other drainage works, water supply and sewer systems, coastal works and land development projects.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and practices of civil engineering and land surveying.

Considerable knowledge of the design, construction and operation of public works projects and facilities, including highways, bridges, water and sewer facilities, flood control works and coastal works.

Considerable knowledge of applicable laws and regulatory codes pertinent to design and construction.

Considerable knowledge of the principles, practices and techniques of hydraulic engineering, hydrology and coastal engineering.

Considerable knowledge of mathematics, automatic data processing equipment and techniques and computer program languages for engineering and related applications.

Considerable knowledge of the principles and practices of traffic planning and engineering and familiarity with current standards for traffic

### Engineer 2 (001021)

control devices.

Knowledge of laws and regulations pertaining to traffic and motor vehicles.

Knowledge of modern developments, current literature and sources of information regarding bridge, highway and other public works design and construction.

Ability to design and prepare engineering plans and specifications for highways, bridges, streets, water control and other major structural projects.

Ability to perform moderately difficult engineering computations and to make recommendations on engineering problems.

Ability to plan, schedule and review the work of technical, professional and clerical assistants in a manner conducive to full performance and high morale.

Ability to make engineering cost estimates, related computations and recommendations on technical engineering problems.

Ability to express ideas clearly and concisely, orally and in writing.

Ability to secure state registration either as a professional engineer or registered land surveyor at time of appointment if required.

Skill in the use of civil engineering instruments and equipment.

REV 8-66

#### **Nature Of Work**

This is advanced professional civil engineering work with supervisory responsibility in the planning, design, construction, inspection and maintenance of a variety of public works facilities.

### Engineer 3 (001022)

#### Minimum Qualifications

Bachelor's degree in Engineering and five years of engineering experience are required. A State of Florida Professional Engineer license or Bachelor's degree in Engineering Technology awarded or having been enrolled prior to July 1, 1979 and proof of having passed the fundamentals test for the State of Florida Professional Engineer license may substitute for the required education.

#### Job Specifications

##### NATURE OF WORK

This is supervisory professional civil engineering work with administrative responsibility in the planning, design, construction, maintenance and operation of varied public works facilities.

An employee in this class typically supervises and participates in a major function of public works engineering, such as highway and bridge design, water control and coastal engineering, sanitary engineering, traffic engineering, subdivision control and regulation, construction supervision and inspection, or cadastral engineering for land acquisition for public purposes. Responsibility includes coordination of engineering activities with other public agencies and private organizations. Supervision is exercised over a group of professional, technical and clerical assistants by delegation of assigned projects and review of completed work for professional quality. This class is distinguished from that of Engineer 2 in that incumbents have significant responsibility in administering a major segment of the public works engineering program. Assignments are broad in scope with considerable opportunity for exercising independent professional judgment and making complex technical decisions. Work is under general direction of a professional superior who reviews for conformity with departmental policies, practices and regulations and for attainment of the desired objectives.

##### ILLUSTRATIVE TASKS

Acts as Head of the Highway Design Section; supervises advance planning and preparation of highway construction programs; supervises design and preparation of construction plans, cost estimates, and contract documents for highway and bridge projects; supervises construction bidding procedures; reviews and reports on designs and plans for similar work submitted to the county for approval and permit.

Acts as Head of the Subdivision Control Section; supervises the processing and recording of subdivision plats in conformity with State law and County ordinances; supervises preparation of subdivision plats and survey sketches for County owned lands, preparation and revision of the County map and the official atlas of section maps showing subdivisions and dedicated rights-of-way for roads and canals; supervises issuance of permits for all construction within public right-of-way, review of grading and paving plans for commercial parking lots and drives, and compilation of underground utilities records.

Acts as Resident Engineer, supervising a staff of field engineers and public works inspectors in the control of public works construction projects including roads, bridges, water supply and sewerage facilities, flood control and drainage works and subdivision improvements.

Supervises construction activities in development of a major seaport; coordinates planning and execution of the project through liaison with the Seaport Director, consulting engineers and contractors.

Acts as Engineer for the Water and Sewer Board; reviews proposals and plans for water and sewer main extensions and submits reports and recommendations to the Board on such proposals; conducts engineering surveys of existing water and sewer systems as required by the Board and prepares reports of condition and operations; reviews practices in water supply and sewerage and recommends technical standards for inclusion in the manual of public works construction.

Acts as Traffic Planning Supervisor; plans and directs the work of subordinate engineers, technicians and clerical personnel engaged in a wide variety of traffic engineering activities applicable to highway planning and design and to the design and operation of traffic control systems and devices; supervises the conduct of studies pertaining to traffic flow, highway capacity, accident records, geometric design of roads, intersections and interchanges, and economic feasibility of proposed highway construction; establishes and maintains records and reporting systems to develop and project data applicable to the Countywide master thoroughfare plan and other long range studies; supervises preparation of road sufficiency ratings for use in setting priorities for planning road improvement programs; prepares correspondence and reports pertaining to traffic engineering problems and projects.

## Human Resources Department

---

### Engineer 3 (001022)

Acts as Assistant Water Control Engineer, coordinating the activities of the maintenance and construction, hydraulic design, coastal engineering and operations sections of the Water Control Division; periodically reviews and supervises revision of the official Water Control Plan of the County and the official flood criteria maps; reviews reports and plans prepared by the U.S. Army Corps of Engineers for flood control and coastal engineering projects affecting the County and prepares analyses and recommendations for information of and action by superiors; assists in coordinating county water control and coastal engineering programs with State and Federal construction and maintenance activities, and with the work of other divisions and departments of the County, other legal governmental units and private developers; prepares reports and correspondence.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of civil engineering and land surveying.

Thorough knowledge of the design, construction, maintenance and operation of major public works projects and facilities such as highways, bridges, water and sewer works, flood control, water conservation and drainage works, coastal protection facilities, seaport facilities and traffic control systems.

Thorough knowledge of the principles, techniques and practices of hydrology and hydraulic engineering pertaining to flood control, drainage and water conservation.

Thorough knowledge of traffic engineering principles and practices and of laws and regulations pertaining to traffic and motor vehicles.

Thorough knowledge of the principles and practices of land surveying and of laws and regulations applicable to land subdivision.

Considerable knowledge of laws and regulations applicable to design and construction of public works facilities.

Knowledge of the principles and procedures of modern office administration.

Ability to plan, schedule, coordinate and review the work of other professional engineering, technical and clerical assistants in a manner conducive to full performance and high morale.

Ability to perform difficult engineering computations and to make comprehensive recommendations on engineering problems.

Ability to express ideas clearly and concisely, orally and in writing.

Skill in the use of civil engineering instruments and equipment.

REV 8-66

#### Nature Of Work

This is supervisory professional civil engineering work with administrative responsibility in the planning, design, construction, maintenance and operation of varied public works facilities.

### Engineer 4 (001023)

**Minimum Qualifications**

Bachelor's degree in Engineering and seven years of engineering experience are required. A State of Florida Professional Engineer license or Bachelor's degree in Engineering Technology awarded or having been enrolled prior to July 1, 1979 and proof of having passed the fundamental test for the State of Florida Professional Engineer license may substitute for the required education.

**Job Specifications**

No Job Specification Available

**Nature Of Work**

This is advanced supervisory professional civil engineering work with administrative responsibility in the management of professional engineering firms, consultants and contractors as the Owner Representative of large scale County construction projects.

### CADD Specialist (001025)

**Minimum Qualifications**

Bachelor's degree in Engineering, Architecture, Construction Management or related field. Two years of experience utilizing AutoCAD to include development of AutoCAD standards are required. Must possess AutoCAD certification. Must possess a valid Driver license.

**Job Specifications****NATURE OF WORK:**

Responsible for maintaining and updating AutoCAD files and as-built records of all of Miami-Dade County Park and Recreation facilities including new construction, renovations and infrastructure, establish and manage CADD management system including an archive of in-house and consultant design work in a logical format.

**Nature Of Work**

This is responsible technical work maintaining and updating AutoCAD files and as-built records of all of Miami-Dade County Park and Recreation facilities including new construction, renovations and infrastructure.

## Human Resources Department

### Construction Specifications Writer (001026)

#### Minimum Qualifications

Bachelor's degree in Architecture, Engineering, Building Construction, or related field, and two years of experience writing technical specifications for construction projects are required; or high school diploma or GED and four years of experience writing technical specifications for construction projects are required; or high school diploma or GED and four years of construction management experience to include two years of experience writing technical specifications for construction projects are required. A Construction Specifier certification may substitute for one year of the required writing technical specifications for construction projects experience.

#### Job Specifications

##### NATURE OF WORK

This is professional and administrative work in the development of building construction specifications and related contract documents for the county.

Employees in this class are responsible for conferring with engineering and architectural units or consultants to analyze and interpret specific needs for proposed capital construction projects. The work requires writing and assembling the contract specifications which provide the legal basis for controlling the activities of construction contractors, and which describe in detail what the contractor is required to provide both in quantity and quality. Work may involve supervision of technical and clerical personnel. Assignments are received with general instructions, however, employees in this class apply knowledge of engineering and architectural planning, design, and construction practices in multiple disciplines, and exercise professional judgment and initiative in performing the assigned duties. Work is reviewed in progress and upon completion by professional superiors for technical adequacy, economy, and conformance to departmental and/or county practices and standards, governmental ordinances, and statutes.

##### ILLUSTRATIVE TASKS

Participates in the production of contract documents for construction of county buildings and other facilities; writes the project Proposal, listing all work to be performed; writes the Measurement and Payment section, describing activities to be performed for each item in the Proposal; prepares the Contract; prepares the Bid; prepares the Performance and Payment Bonds section, including various affidavits required by the County; prepares the Sequence of Construction.

Orders engineering plans and drawings from all required disciplines for given projects, such as electrical, mechanical, civil, environmental, structural; supervises the design and preparation of plans for construction of highway bridges; supervises field surveys to develop information required for design activities; supervises the preparation of cost estimates of proposed bridges, highways and other improvements; supervises the advance planning of major highway, bridge and related projects, including preparation of recommendations for program scheduling.

Supervises collection, recording and analysis of ground water elevations, surface water stage, rainfall amount and intensity; supervises regulation of water levels throughout the county by operation of dams and water control structures; studies operation record of water control structures and interrelated hydrologic data to improve both results and methods of operation; conducts continuing review of official County Flood Criteria Map and supervises computation of flood water profiles and stage frequency relationship.

Supervises coastal engineering activities of the county; coordinates these activities with state and federal agencies having jurisdiction over dredging and filling in tidal waters and beach preservation work; supervises planning and design of coastal construction projects and reviews plans for such work submitted to the county for approval and permit; supervises and participates in preparation of standards and permit procedures governing such work.

Supervises and participates in processing of special improvement taxing districts; prepares County Manager's report and recommendations for creating special taxing districts; prepares and maintains status reports covering special taxing districts; prepares plans and designs for street lighting improvement districts; designs and prepares recommendations for lighting of arterial streets; investigates and tests new lighting materials for consideration in street lighting programs; handles public inquiries and complaints regarding improvements in special taxing districts.

## Human Resources Department

### Construction Specifications Writer (001026)

Supervises and participates in review of plans for proposed water supply and sewer facilities to insure compliance with county standards; supervises and participates in reviews of tentative subdivision plats for water supply and sewerage requirements; designs water and sewer works including treatment plants and pumping facilities; prepares reports and makes preliminary feasibility studies for water and sewerage facilities; assists in developing programs and projects to implement the countywide master plans for water supply and sewerage.

Supervises and participates in preparation of hydraulic design computations for canals, culverts, ditches and storm sewers; estimates drainage area of water sheds and direction of flow; reviews tentative subdivision plats and subdivision drainage plans for adequacy of design and for conformance with County Water Control Plan; reviews permit applications for proposed utility installations and makes recommendations based on their effect on water control facilities; reviews plans for proposed lake excavations and similar work under jurisdiction of other county departments; prepares recommendations regarding engineering features of such plans.

Supervises and participates in development of automatic data processing procedures and their application to engineering and accounting functions; conducts research into new methods of design computation, work measurement recording, and cost accounting using electronic computers; supervises and participates in preparation of computer programs for specific project applications; prepares reports and explanatory materials required for understanding and use of computer programs; instructs users of the programs and assists supervisors in training personnel in their use; investigates areas of operation to which electronic automatic data processing may be applied to increase efficiency and reduce costs.

Acts as traffic design engineer; supervises and participates in studies relating to the movement of traffic on roads and streets for use in geometric design of highways, intersections and interchanges and for design of traffic control devices; prepares technical reports dealing with the traffic engineering aspects of highway design for road program planning and for specific projects; supervises preparation of plans for installation of traffic control signals, signs and markings; through subordinates, investigates complaints and requests concerning local traffic conditions and prepares recommendations for their improvement; prepares road sufficiency ratings and assists in development of the countywide master thoroughfare plan.

Supervises and reviews the work of subordinate technical and professional personnel engaged in preparing cadastral engineering data for state highway and county road projects including right-of-way maps, legal descriptions, survey sketches and related information required for use in right-of-way acquisition and condemnation proceedings.

Supervises and participates in reviewing and checking of building plans and specifications for compliance with building codes; suggests alternative design to safety code requirements; reviews and evaluates engineering drawings, calculations and tests for compliance of various building components; attends and evaluates various tests conducted by laboratories and professional engineers.

Assists in planning and supervising an efficient and effective program of air pollution control; conducts specialized surveys and studies; prepares recommendations, consults with public officials, industrial representatives and private individuals relative to the elimination or control of air pollution; conducts field investigations of complaints of violations, prepares reports with recommendations for corrective measures, makes follow-up investigations.

Supervises engineering survey section providing information for county departments including field work to establish and maintain official survey monuments for section public works construction and related survey work.  
and property corners, surveys of county owned properties, locating right-of-way lines, determining lines and grades for public works construction and related survey work.

Supervises the inspection of public works construction projects, including roads, bridges, canals and other drainage works, water supply and sewer systems, coastal works and land development projects.

Performs related work as required.

#### **Nature Of Work**

This is professional and administrative work in the development of building construction specifications and related contract documents for the county.

### Construction Specifications Writer (001026)

#### **Minimum Qualifications**

Bachelor's degree in Architecture, Engineering, Building Construction, or related field, and four years experience writing technical specifications for construction projects; or high school diploma or GED and eight years experience writing technical specifications for construction projects; or high school diploma or GED and eight years construction management experience to include four years experience writing technical specifications for construction projects required. A Certified Construction Specifier certification may substitute for one year of the required technical specifications writing experience.

### Architectural Drafter 2 (001029)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in engineering drafting or architectural drafting to include Computer-Aided Design Drawing are required. Completion of coursework in Architecture, Engineering, or a related field may substitute for the required experience up to a maximum of two years. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in architectural drafting.

Employees in this class act as principal assistants to professional architects in performing a variety of the more responsible technical drafting and office architectural tasks. Work requires a considerable knowledge of certain phases of architecture such as functional planning, layout, cost estimates, and appearance. Architectural Drafter 2 frequently supervise subordinate technical personnel. Where supervision is not direct, employees provide a point of technical reference and review for junior personnel of the office. All work is subject to check in progress and upon completion by professional architects.

##### ILLUSTRATIVE TASKS

Performs final drafting work on a wide range of building projects including architectural, structural, mechanical, electrical and air conditioning projects.

Prepares sketches, including plans, elevations, site plans and renderings of proposed County facilities as required by other departments under the technical supervision of professional architects.

Prepares architectural working drawings of a more complex nature, including site plans, foundations, floor plans, elevations, sections, details, diagrams and schedules as required by County departments.

Prepares the more complex working drawings for structural, plumbing, heating, electrical and air conditioning work, and assists in writing specifications for all phases of architectural projects.

Conducts structural investigations of existing County facilities to ascertain the feasibility of alteration and renovation.

Checks and gives preliminary review to the work of subordinate drafting personnel including the checking of details, dimensions and calculations to assure accuracy and completeness.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices and techniques of architectural drafting.

Considerable knowledge of mathematics through trigonometry and its application to sub-professional architectural computations.

Considerable knowledge of construction specifications and plans, and the applicable regulations relating to public works construction by contract.

Ability to perform technical computations, to make estimates and tests, and to compile simple structural, architectural and related engineering data.

Ability to read and interpret a wide variety of plats, plans, aerial photographs, survey notes and engineering reports.

Ability to plan and supervise the work of technical assistants in a manner conducive to full performance and high morale.

### Architectural Drafter 2 (001029)

Ability to make difficult and technical architectural drawings.

Ability to understand, follow and transmit complex oral and written instructions.

Skill in the use of drafting instruments and equipment.

REV. 4/98

#### **Nature Of Work**

This is advanced technical work in architectural drafting.

### NEAT Specialist (001030)

**Minimum Qualifications**

High school diploma or GED. Six months of experience operating light equipment such as tractors, trucks or similar equipment to include experience performing general labor duties are required. Must possess a CDL/Class B. The NEAT Specialists will operate large vehicles and similar types of public works equipment.

**Job Specifications**

No Job Specification Available

**Nature Of Work**

This is advanced skilled work in the operation of large vehicles and similar types of public works equipment.

## Architect 1 (001032)

### Minimum Qualifications

Bachelor's degree in Architecture.

### Job Specifications

#### NATURE OF WORK

This is professional and technical architectural work in the preparation of plans, designs and specifications for public works building projects.

An employee in this class is responsible for applying professional architectural skills and knowledge to moderately difficult engineering projects in connection with the design, construction, inspection or maintenance of Public Works. Work may involve supervision of technical assistants in any phase. Assignments are received with general instructions but employees use their own judgment and initiative in solution of details. Work is checked and reviewed frequently throughout its progress and completely at its conclusion by professional associates and superiors.

#### ILLUSTRATIVE TASKS

Acts as subordinate architect under professional direction; plans and designs all types of building projects including architectural, structural, mechanical, electrical and air conditioning phases; writes construction standards and project specifications.

Prepares sketches including plans, elevations, site plans, renderings, and makes reports on feasibility and cost for proposed County work.

Designs and prepares architectural working drawings including site plans, foundations, floor plans, elevations, section details, diagrams and schedules rendering general features and scale details.

Prepares and designs structural framing plans, minor plumbing, heating, electrical and air conditioning work and coordinates all mechanical work by engineers with architectural work on assigned projects.

Writes specifications for all aspects of architectural projects including structural, mechanical, electrical and air conditioning work.

Inspects construction of County facilities including materials used, methods employed and workmanship of all tradespersons involved in order to assure compliance with contract requirements.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles and practices of architecture.

Knowledge of the investigation, design and construction of Public Works facilities.

Ability to make structural and related mathematical computations.

Ability to design moderately difficult architectural projects.

Ability to secure compliance by the private contractors with the contracts and specifications governing Public Works projects, with tact, firmness and impartiality.

Ability to train, and to supervise the work of technical and other subordinates in a manner conducive to full performance and high morale.

Skill in the use of architectural instruments and equipment.

### Architect 1 (001032)

NEW 10-59

#### **Nature Of Work**

This is professional and technical architectural work in the preparation of plans, designs and specifications for public works building projects.

### Architect 2 (001033)

#### Minimum Qualifications

Bachelor's degree in Architecture. Two years of professional experience in design, construction, and management of building and/or construction projects are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional architectural work with some supervisory responsibility.

Employees in this class supervise the work of subordinate professional and sub-professional architectural personnel engaged in the preparation of plan, designs and specifications for County buildings and Public Works projects. Work entails the application of professional architectural skills to various projects undertaken in connection with the design, inspection, investigation and construction of public structures. Work is reviewed by an administrative superior through discussions and inspections principally for determining general progress and adherence to departmental policies and regulations.

##### ILLUSTRATIVE TASKS

Supervises and participates in the preparation of plans, designs, specifications, contract documents, and final working drawings of county building projects including architectural, structural, mechanical, plumbing, heating, electrical and air conditioning work.

Conducts investigations and surveys on existing physical status of county occupied buildings in order to ascertain the feasibility of alteration of addition.

Reviews the work of private architects and engineers engaged in contractual projects for the county, coordinates activities to assure compliance with architectural standards.

Selects architectural motifs for structures, subject to approval of administrative superiors and within the limits imposed by structural requirements.

Confers with engineering personnel engaged in the preparation of structural plans for a building, making recommendations and suggestions as to materials, construction and necessary adjustments in architectural design to fit structural requirements.

Prepares standard and project specifications, analyzes bids, and makes recommendations for award of contracts on approved projects.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and practices of architecture and related engineering work.

Considerable knowledge of the investigation, design and construction of public works facilities.

Knowledge of modern developments, current literature and sources of information pertaining to design and construction.

Knowledge of applicable laws and regulatory codes relative to construction and design.

Knowledge of applicable laws and regulatory codes relative to construction and design.

Ability to plan, design and prepare drawings and specifications for structural projects.

Ability to plan, schedule, coordinate and review the work of technical and clerical subordinates in a manner conducive to full performance and high morale.

### Architect 2 (001033)

Ability to make concise recommendations on engineering problems.

Ability to express one's self clearly and concisely, orally and in writing.

Ability to supervise inspection work on complicated construction projects.

Ability to secure registration as an architect from the Florida State Board of Architect Examiners at time of appointment if required.

Skill in the use of architectural instruments and equipment.

NEW 10-59

#### **Nature Of Work**

This is advanced professional architectural work with some supervisory responsibility.

### Architect 3 (001034)

#### Minimum Qualifications

Bachelor's degree in Architecture. Three years of architectural experience in the planning, design, and management of commercial or public building projects are required.

#### Job Specifications

##### NATURE OF WORK

This is professional architectural work with some administrative responsibility.

The incumbent in this class serves as the assistant to the Chief Architect, coordinating project assignment, work schedule compliance, and providing professional architectural review. Work involves a variety and volume of departmental contacts in coordinating county activities with private organizations as well as other public jurisdictions. Duties require direction and coordination of the activities of subordinate professional, technical and clerical assistants. Assignments are usually broad in scope with opportunity for the use of independent professional judgment and for making responsible technical decisions. Work is reviewed generally upon completion for conformity with departmental policies and regulations by the Chief Architect.

##### ILLUSTRATIVE TASKS

Supervises and coordinates the activities of the architectural branch; furnishes designs, plans and specifications for county building construction, maintenance, modification, repair and alteration.

Delineates projects into work units and makes personnel assignments; rearranges assignment of duties when necessary to meet changing conditions and to assure achieving goals on time; maintains progress records on each project; holds discussions with individuals and groups regarding problems that arise.

Assigns work projects and inspection schedules to building maintenance section; prepares reports and cost estimates for the determination of priority and budget limitations.

Assists the Chief Architect by assuming full operational responsibility when necessary.

Makes periodic, routine and special reports relating to the activities of the architectural program.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the practices and principles of architecture.

Thorough knowledge of public building design and construction.

Considerable knowledge of modern developments, current literature and sources of information regarding design, structures and construction.

Considerable knowledge of modern engineering methods, materials and techniques that apply to the design of buildings.

Knowledge of the principles and procedures of modern office administration.

Ability to plan, design and prepare complete plans and specifications for all building types including structural projects.

Ability to plan, schedule, coordinate and review the work of other architects, engineers, technical and clerical assistants in a manner conducive to full performance and high morale.

### Architect 3 (001034)

Ability to perform difficult computations and to make comprehensive recommendations on engineering problems.

Ability to express one's self clearly and concisely, orally and in writing.

Skill in the use of architectural instruments and equipment.

REV 10-63

#### **Nature Of Work**

This is professional architectural work with some administrative responsibility.

### Architect 4 (001035)

#### Minimum Qualifications

Bachelor's degree in Architecture. Four years of architectural experience in the planning, design and management of commercial or public building projects are required. Must possess a State of Florida Registered Architect license.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional architectural work with administrative responsibilities.

Work involves responsibility for coordination and technical supervision of varied architectural activities in the Public Works Department such as design and construction, planning, property services and building repair, maintenance and alteration. The employee performs a variety and volume of public contacts in coordinating county architectural activities with private and other public jurisdictions. Supervision is exercised directly and indirectly over subordinate professional, technical and clerical personnel. Considerable independence is exercised in making final decisions on technical problems and in participation in the determination of departmental policies. Work is under the administrative direction of the County Engineer and is reviewed generally upon completion for attainment of desired objectives. Assignments are usually broad in scope with considerable opportunity for the use of independent professional judgment and difficult technical decision making.

##### ILLUSTRATIVE TASKS

Plans and directs the professional and administrative activities of the county architectural program, furnishes designs, plans and specifications for county building construction, analyzes and prepares reports on other designs submitted to the county for approval.

Subdivides projects into work units, establishes priorities and makes assignments to subordinates with required general and specific instructions; reassigns duties when necessary to meet changing conditions and to assure attainment of goals on time; maintains progress records on each project; holds discussions with individuals and groups regarding problems that arise.

Acts in a liaison capacity with department heads and elected officials advising them on design characteristics, planning and architectural problems.

Assigns and supervises professional subordinates to act as resident architects on major construction activities awarded on contract or performed by county forces.

Acts as consultant to the County Manager, County Commissioners and various elected officials, in matters pertaining to architecture, planning of public improvements, and major capital outlay projects.

Performs technical and administrative architectural work such as serving as technical advisor on structures, mechanical and electrical engineering, plumbing, elevators, steam generators, heating, ventilating and air conditioning; develops and prepares standard and specialized contracts and specifications.

Manages the operational requirements of a multi-storied public building complex including the design and alteration of office spaces; prepares and supervises space modifications and installation of operational equipment.

Conducts research and in-service training programs.

Assists in the preparation of the annual budget for the architectural division including necessary personnel, equipment and supplies.

Makes periodic, routine and special reports relating to the activities of the County's architectural program.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

### Architect 4 (001035)

Thorough knowledge of the practices and principles of architecture.

Thorough knowledge of building design and construction.

Thorough knowledge of current methods and materials, literature and sources of information regarding building design and structure.

Thorough knowledge of current engineering methods and techniques that apply to the design of buildings.

Knowledge of the principles and procedures of modern business procedures.

Ability to plan, design and prepare complete plans and specifications for all types of buildings and structures.

Ability to plan, schedule, coordinate and review the work of other architects, engineers, technical and clerical assistants in a manner conducive to full performance and high morale.

Ability to perform difficult computations and make comprehensive recommendations on architectural problems.

Ability to express one's self clearly and concisely, orally and in writing.

Skill in the use of architectural instruments and equipment.

NEW 10-63

#### **Nature Of Work**

This is highly responsible professional architectural work with administrative responsibilities.

### PW Professional Contracts Specialist (001036)

#### Minimum Qualifications

Bachelor's degree. One year of experience in contract preparation, monitoring and coordination is required. Additional experience in contract preparation and administration may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF DUTIES:

This is advanced professional work in the administration of Professional Services Agreements for the Miami-Dade County Public Works Department.

Employee in this class is responsible for the administration and rotation of Professional Services Agreements that provide soil, foundation, and material testing services for the Public Works Department. Responsibilities include preparing all documentation required to establish the agreement, preparing advertisements, bid forms, attending pre-bidding and pre-work conferences, advising on what's included in the agreement costs, keeping detailed records of work assigned and billing information and preparing a fee schedule for negotiation purposes. Incumbent exercises independent judgment in monitoring all aspects of the soil testing service agreements for the Department. Supervision is received from an administrative superior who reviews work for effective administration of established goals and objectives.

#### ILLUSTRATIVE TASKS

Prepares all pertinent documentation to start the process for establishing the agreement; contacts all firms to advise of requirements, contacts all County Departments to inform them on the procedures and guidelines to follow with respect to this agreement.

Advises County Departments on the scope of the agreement, such as prices on the fee schedule and/or procedures and services provided; requesting information from the laboratories as to specific types of work performed when needed.

Manages the rotation of the use of the professional agreements; keeps detailed records of all work assigned to the laboratories under agreement and services paid.

Prepares informative packages to be distributed to other Departments which use the agreements, updates the information as needed, distributes copies of the signed agreements to Finance department for payment.

Reviews invoices received to determine what is an appropriate charge; contacts laboratories when certain fees are invoiced incorrectly according to the conditions that apply to the agreement, thus making them aware for future invoicing;

Prepares report on the work, dates, and monies paid to all the laboratories; from time-to-time revises the rotation format of the laboratories to base it on an actual and better distribution of work performed and monies paid; prepares an updated Fee Schedule for negotiation purposes and obtains average prices to be paid.

Prepares contract documents, including the preparation of the Special Provisions, Bid Forms, Advertisements, and preparation of the Contract Package for bidding purposes, as well as, attending Pre-Bid and Pre-work Conferences.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the content and provisions of service agreements between Miami-Dade County and service providers.

Considerable knowledge of the principles and practices of contract monitoring and management.

Knowledge of state and federal regulations, policies and procedures pertaining to employment and training programs.

## Human Resources Department

---

##### NATURE OF WORK

This is specialized field and office work in the inspection and cost estimation of construction and repairs for public works right-of-way projects.

An employee in this class is responsible for inspecting utility projects, investigating citizen complaints and calculating cost estimates. Responsibilities include the conduct of area right-of-way studies, preparation of plans and specifications, provision of technical assistance to field supervisors, and making recommendations concerning work schedules and priorities. Supervision is occasionally exercised over subordinate employees who assist with various phases of work. Supervision is received from a technical superior who reviews work for attainment of desired objectives.

##### ILLUSTRATIVE TASKS

Conducts inspections of drainage systems, sidewalk resurfacing, roadside maintenance, visual obstructions and other utility projects; gathers information to assist in the prioritizing and scheduling of work; prepares cost estimates of labor and materials for construction and repairs.

Conducts field investigations and gathers information to determine the validity of citizen complaints; makes recommendations concerning the resolution of complaints; prepares correspondence and reports of investigative findings.

Conducts area studies to determine right-of-way conditions and identify construction and/or repair needs; makes recommendations for sidewalk, drainage, resurfacing and mowing projects.

Prepares plans, specifications and estimates for right-of-way construction and repair projects.

Provides technical assistance to field supervisors concerning drainage installations, drain cleaning, sidewalk repairs and related utility projects.

Maintains stock levels for drainage, sidewalk, resurfacing and mowing supplies.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the basic principles, practices and techniques of civil engineering and engineering drafting.

Considerable knowledge of the principles, methods, materials and equipment used in right-of-way construction projects.

Considerable knowledge of the practices and techniques used in the inspection and investigation of right-of-way conditions.

Considerable knowledge of departmental rules, regulations and policies related to cost estimation and right-of-way construction.

### Road Construction Cost Estimator (001040)

Considerable knowledge of construction plans and specifications.

Knowledge of public relations principles and practices.

Knowledge of general office practices and procedures.

Ability to inspect right-of-way construction projects and obtain information through investigative methods.

Ability to prepare and design engineering plans and specifications.

Ability to perform engineering calculations and accurately estimate labor and materials for construction and repairs.

Ability to analyze information and make recommendations concerning the resolution of complaints.

Ability to conduct area right-of-way studies and make recommendations for various utility projects.

Ability to communicate clearly and concisely, verbally and in writing.

Skill in the use of engineering instruments and equipment.

##### NATURE OF WORK

This is advanced responsible professional engineering work for Miami-Dade County departments and agencies.

Employees in this class are responsible for performing professional engineering duties requiring registration as a Professional Engineer in the State of Florida. Duties vary greatly by occupational specialization and department of assignment and may include supervising an engineering section; exercising final authority for planning, design, plans preparation and specifications; signing and sealing plans and change orders; inspecting projects for compliance with specifications and accepted engineering standards; performing specialized engineering functions of a highly technical nature involving design, analysis or testing; overriding, accepting, rejecting or modifying engineering documents prepared by a registered Professional Engineer and bearing responsibility for the action; preparing engineering reports for use outside the department or agency; determining whether a design is in compliance with engineering standards, reviewing engineering calculations; and making analyses to answer complex engineering questions. Incumbents exercise considerable independent judgment and technical expertise in the application of professional engineering knowledges to the development and completion of complex engineering projects. Supervision is exercised over professional, technical and clerical subordinates with assigned responsibilities in various phases of engineering operations. General direction is received from a professional superior who holds the incumbent responsible for quality of results and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Directs, supervises and coordinates stationary sources air pollution control programs; reviews plans submitted by professional engineers for construction and operating permits; oversees permitting activities delegated to the County and seals permits; supervises asbestos program and reviews corrective action plans submitted by asbestos consultants and contractors; oversees air toxics control program, reviews plans for air toxics control and seals permits issued.

Supervises and implements state delegated domestic wastewater permitting program; reviews and certifies sewer plans; supervises subordinate engineers, program development and enforcement; issues operating permits and renewals, and certifies affidavits for state permits.

Plans, supervises and analyzes existing and proposed electrical installations servicing County facilities; develops and prepares specifications and drawings to build, upgrade or modify power supply and distribution in County facilities; specifies electrical apparatus for multiple applications; performs as Engineer of Record, Prime Professional or Delegated Engineer as required to complete electrical projects; affixes Registered Engineer seal to plans, reports and other documents.

Supervises and coordinates the Bridge Inspection and Structural Analysis Program in compliance with Florida Statutes and other regulations for the Metrorail and Metromover guideway structures and stations; prepares, signs and seals as Professional Engineer, the final and complete inspection reports pertaining to Metrorail and Metromover bridge structures.

Prepares and supervises preparation of roadway design projects; supervises and reviews roadway and bridge design projects prepared by outside consultant engineering firms; prepares various permit applications.

Designs new projects and modifies existing designs for roads, sewerage facilities, water supplies, flood control, drainage and facility improvements at the County's seaport; supervises field inspectors and activities of professional engineering firms involved in seaport development.

Reviews, designs and provides structural engineering expertise in the renovation of existing buildings or proposed additions to County buildings and/or installations of specialized equipment; reviews projects submitted by consultants; prepares site drainage and parking plans for all sites; affixes Professional Engineer seal for building permits and for all work personally designed.

## Human Resources Department

---

### Professional Engineer (001050)

Directs professional engineering firms engaged by the Aviation Department in areas of mechanical engineering for County airports including HVAC, plumbing and fire systems; makes evaluation and design decisions concerning the maintenance and operation of chilled water plants and building management systems.

Serves as Project Engineer for fuel storage and distribution facilities at Miami-Dade County airports; directs professional engineering firms in the planning, design, construction and maintenance of fuel storage and fuel distribution systems; directs the preparation of required plans and permits.

Exercises responsibility for the permitting of solid waste management landfills and other solid waste disposal facilities with the requisite regulatory agencies; testifies in court and at legislative or administrative hearings and provides expert technical opinions; designs, certifies and serves as Engineer of Record for solid waste landfills; inspects and certifies surface water management systems for County landfills.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the theories, principles and practices of civil, environmental, electrical, structural, transit, traffic, sanitary or mechanical engineering depending upon the occupational specialty.

Thorough knowledge of the interrelationships between different engineering specializations.

Thorough knowledge of local, state and federal laws, regulations and rules concerning permitting, design and construction of County engineering projects.

Thorough knowledge of engineering and construction contracts, forms and procedures pertaining to work performed by outside contractors and consultants.

Considerable knowledge of modern office administration.

Considerable knowledge of supervisory principles and practices.

Ability to plan, direct and coordinate the work of professional engineering, technical and clerical subordinates in a manner conducive to full performance and high morale.

Ability to apply advanced professional engineering knowledges to the design, development and construction of a variety of engineering projects.

Ability to supervise, direct and review the work of engineering consultants in planning, design, plans preparation and specification development for County engineering projects.

Ability to understand complex engineering drawings and documents and make changes, additions and corrections.

Ability to interpret complex engineering regulations and enforce compliance with system design and installation requirements.

Ability to simultaneously manage several complex engineering projects in various phases of development.

Ability to communicate clearly and concisely, verbally and in writing.

##### NATURE OF WORK

This is advanced professional and supervisory engineering work with administrative responsibility for Miami-Dade County departments and agencies.

Employees in this class are responsible for performing professional engineering duties requiring registration as a Professional Engineer in the State of Florida, and for supervising a complex engineering function for a department. Duties vary greatly by occupational specialization and may include supervising the work of professional engineers and others in the construction of roadways, bridges and miscellaneous public works projects; administering a contract processing unit engaged in processing a large number of complex construction documents and contracts; supervising development of complex engineering specifications for construction contracts; signing and/or sealing permit applications and documents as a Professional Engineer; supervising and coordinating highway planning and engineering functions; directing professional engineers in the preparation of construction plans or the review of plans prepared by outside consultants; and supervising the management of engineering projects requiring certification by a Professional Engineer upon completion. Incumbents exercise considerable independent judgment and professional engineering managerial knowledge in the effective administration of highly complex and responsible engineering responsibilities. Supervision is exercised over a staff of professional engineers, technical, administrative and clerical employees engaged in various phases of engineering operations. General direction is received from a professional superior who reviews work for the effective management of engineering services and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Directs and coordinates professional engineers and support personnel in managing construction of roadways, bridges and other public works construction projects; coordinates projects with design engineers, utility companies and other governmental agencies; conducts pre-construction conferences, reviews and oversees negotiation of engineer consultant fees, and attends public hearings to resolve issues and concerns.

Administers and supervises a large and complex construction contract processing unit; interprets contract documents and coordinates all phases of bidding, execution and award processes for construction projects; utilizes Professional Engineer license to sign and/or seal permit applications and documents; assists in resolving engineering design problems; directs engineering design constructability review program; coordinates priorities and revisions necessary for the preparation of contract specifications.

Plans, directs and supervises Petroleum Remediation functions in an environmental resources program; coordinates and directs activities of engineers, hydrogeologists and other professional employees engaged in the regulation of environmental compliance and clean-up efforts at petroleum contaminated sites within Metropolitan Dade County to ensure compliance with local, state and federal regulations.

Supervises and coordinates the work of professional engineers, technical and administrative employees in a highway planning function; represents department at a wide variety of planning, advisory and review committees; reviews utility permits and state roadway plans; supervises highway surveillance and environmental impact studies of proposed highway transportation projects.

Plans, supervises and coordinates the work of professional engineers and engineering support personnel in the preparation of road, bridge, pedestrian walkway and sidewalk, landscape, drainage, traffic and miscellaneous construction plans or the review of plans prepared by outside consultants; implements the design and engineering phase of infrastructure projects in accordance with long-range transportation plans; directs and reviews the negotiation of fees for consultants and coordinates projects with the Florida Department of Transportation and the Federal Highway Administration.

Directs construction plan review activities in an environmental resource program; supervises and coordinates the work of professional engineers, administrative and clerical employees engaged in the review of development and construction plans within Miami-Dade County to ensure compliance with environmental regulations, or serving in engineering support capacities.

### Senior Professional Engineer (001051)

Directs activities of design staff and outside consultants in the preparation and/or review of construction documents for solid waste facilities; supervises the conduct of landfills capacity analyses to estimate landfill closure and long-term cost and capacity analyses of landfills; performs civil, structural and landfill design; performs final review of all plans and specifications; certifies civil, structural and landfill designs as a Professional Engineer.

Directs and supervises the construction management of solid waste engineering projects; certifies to various regulatory agencies the completion of projects requiring Professional Engineer certification; executes to completion the construction requirements of all contract drawings and specifications in construction phases; approves payment of invoices from consulting engineers.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the theories, principles and practices of civil, environmental, electrical, structural, transit, traffic, sanitary or mechanical engineering depending upon the occupational specialty.

Extensive knowledge of the interrelationships between different engineering specializations.

Extensive knowledge of local, state and federal laws, regulations and rules concerning permitting, design and construction of County engineering projects.

Extensive knowledge of engineering and construction contracts, specifications, documents, forms and procedures pertaining to work performed by outside contractors and consultants.

Thorough knowledge of modern office administration.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of the planning and organizing of complex and specialized construction and engineering projects.

Ability to plan, direct and coordinate the work of professional engineering, technical and clerical subordinates in a manner conducive to full performance and high morale.

Ability to apply advanced professional engineering knowledges to the administration, design, development and construction of a variety of engineering projects.

Ability to supervise, direct and review the work of engineering consultants in planning, design, plans preparation and specification development for County engineering projects.

Ability to understand complex engineering drawings, specifications and documents and make changes, additions and corrections.

Ability to interpret complex engineering regulations and ensure compliance with system design and installation requirements.

Ability to simultaneously manage several complex engineering projects in various phases of development.

Ability to communicate clearly and concisely, verbally and in writing.

##### NATURE OF WORK

This is advanced professional land surveying work with supervisory responsibility for Miami-Dade County departments and agencies.

Employees in this class are responsible for performing professional land surveying duties requiring registration as a Professional Land Surveyor in the State of Florida. Responsibilities include supervising subordinates engaged in the precise measurements of property boundaries, measurement of and preparation of plans showing existing improvements, layout of proposed improvements, preparation of descriptions for use in legal instruments, preparation of maps and record plats, determination of grades and elevations of roads and land, and creation and perpetuation of alignments related to maps, record plats and related documents and the plans and drawings that represent them. Incumbents exercise considerable independent judgment and technical expertise in the application of knowledges of math and science, and the requirements of the law to land surveying activities. Supervision is exercised over subordinate technical and clerical employees performing office and field surveying duties or serving in support capacities. General direction is received from a professional and administrative superior holds the incumbent responsible for the quality of professional land surveying services.

##### ILLUSTRATIVE TASKS

Supervises measuring, locating, establishing or reestablishing lines, angles, elevations, natural and manmade features in the air, on the surface and immediate subsurface of the earth, within underground workings, and on the beds or surface of bodies of water, for the purpose of determining or establishing the facts of size, shape, topography, tidal datum, planes, legal or geodetic location or relocation, and orientation of improved or unimproved real property and appurtenances thereto.

Supervises preparation of right-of-way maps, parcel maps, parcel sketches, legal descriptions and deeds required for obtaining or conveying various interests in land for public purposes including state and County roads, canals, easements, and rapid transit property acquisition.

Examines right-of-way engineering materials for correctness and conformity to state and County standards.

Determines the owner and validity and extent of all the various interests that exist in parcels of land; ensures that all legal instruments necessary to obtain or convey clear title to property are prepared correctly and not subject to misinterpretation.

Supervises the processing of all deeds conveying property to or from Miami-Dade County and the maintenance of permanent Miami-Dade County right-of-way records; examines and approves deeds conveying rights-of-way, easements and property to or from Miami-Dade County.

Signs and seals survey drawings as a Professional Land Surveyor.

Provides assistance to survey crews in the interpretation of construction plans and legal descriptions; reviews field notes for accuracy and completeness; makes survey computations.

Obtains survey information and construction plans from government agencies and consultants to avoid duplication of effort; attends conferences with local, state and federal government agencies, and consulting engineers.

Answers inquiries from the public; prepares written correspondence and reports; recommends purchase of survey equipment and supplies.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

### Professional Land Surveyor (001055)

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the theories, principles and practices of all types of land surveying.

Thorough knowledge of local, state and federal regulations pertaining to land surveying and the conveyance of property ownership.

Thorough knowledge of the operating characteristics and maintenance requirements of modern surveying instruments.

Thorough knowledge of mathematics through trigonometry and its application to field surveying and engineering computations.

Thorough knowledge of legal instruments and documents required to obtain or convey interests in land for public purposes.

Considerable knowledge of the theories, principles and practices of civil engineering.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of construction plans and specifications.

Ability to plan, direct and coordinate the work of field and office survey employees in a manner conducive to full performance and high morale.

Ability to apply advanced professional knowledges of land surveying to achieve desired goals and objectives.

Ability to perform technical mathematical computations related to land surveying.

Ability to read, understand and interpret maps, parcel sketches, legal descriptions, deeds, engineering drawings and construction specifications.

Ability to determine the owner, validity and extent of all the various interests that exist in parcels of land.

Ability to communicate clearly and concisely, verbally and in writing.

Skill in the care and use of modern surveying instruments.

### Chief, Special Taxing Districts Division (001058)

#### Minimum Qualifications

Bachelors degree. A minimum of four to seven years of professional experience in cost estimation, budget administration, engineering or management is required.

#### Job Specifications

##### NATURE OF WORK:

This is advanced and responsible professional and administrative work directing activities of the Special Taxing Districts Division of the Public Works Department. An employee in this class is responsible for planning, directing, supervising and coordinating special taxing district functions whereby residents of Dade County can obtain desired public improvements not normally provided through general tax revenues. Responsibilities include coordinating work with other county departments and public utilities for the creation of special taxing districts, advising civic organizations of necessary procedures before and during the petitioning process, determining if petitions are valid, designing or coordinating the design of public improvements within the section, conducting required public hearings, preparing resolutions, ordinances and reports, supporting public hearings before the Board of County Commissioners, supervising the preparation of preliminary assessment rolls, and recommending changes in special taxing district regulations. The incumbent exercises considerable independent judgment in effectively managing special taxing district functions and processes. Supervision is exercised over a staff of professional, technical and clerical employees with assigned responsibilities in various phases of operations. General direction is received from a senior departmental executive who reviews work for professional management of assigned responsibilities and achievement of special taxing district goals and objectives.

##### ILLUSTRATIVE TASKS:

Plans, directs and coordinates the work of subordinate engineers, drafters and clerical employees engaged in various phases of special taxing district activities.

Manages the creation or establishment of special taxing districts for the purpose of constructing, installing or providing special services such as potable water, sanitary sewers, street lighting, security, street and sidewalk improvements or other services and facilities which may be considered essential by the Board of County Commissioners or desired by residents.

Coordinates work with various county departments and public utilities for the creation of public improvement special taxing districts.

Attends community meetings and advises civic organizations of necessary procedures and code requirements before and during the petitioning process.

Determines that submitted petitions for improvements are valid and meet requirements of the County Code.

Designs public improvements within the district or coordinates design by other County departments.

Conducts required public hearings at a location in the proximity of the proposed new special taxing district to inform residents and property owners of engineering requirements and other considerations.

Prepares resolutions, ordinances and reports for approval by the County Manager and Board of County Commissioners.

Reviews contractual agreements between Dade County and public utilities and other governmental organizations for the construction, service and maintenance of approved projects.

Supports public hearings before the Board of County Commissioners for the creation of special taxing districts.

Supervises the preparation of preliminary assessment rolls for completed projects; compiles administrative and construction costs for the preparation of assessment rates.

Makes recommendations for changes in special taxing district regulations to facilitate and improve the implementation and administration of special taxing districts and their related services.

Thorough knowledge of the theories, principles and practices of civil engineering.

Thorough knowledge of the principles and practices of business and public administration.

Thorough knowledge of public relations principles and techniques.

Considerable knowledge of supervisory principles and practices.

Ability to direct and coordinate special taxing district legal and administrative processes.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, superiors, elected representatives, and a variety of other public and private officials.

Ability to apply advanced engineering principles to the design of a variety of public works improvements.

Ability to conduct public hearings pertaining to the creation of special taxing districts.

Ability to prepare reports, ordinances and resolutions pertaining to the creation of special taxing districts.

Ability to develop recommendations for the improvement of special taxing district regulations and procedures.

Ability to communicate clearly and concisely, verbally and in writing.

##### NATURE OF WORK

This is advanced responsible professional and managerial engineering work planning, directing, and coordinating highway engineering for the Public Works Department.

An employee in this class is responsible for directing complex divisional operations in the evaluation and implementation of highway engineering projects including the preparation of cost estimates, plans, specifications, and contracts for construction of roads and bridges; programming of County transportation activities and their coordination with other County agencies and the State Department of Transportation; and investigating and recommending the installation of new traffic control devices. The employee exercises a considerable degree of independent judgment in the application of advanced principles of civil engineering to the management and direction of highway engineering activities. Supervision is exercised through subordinate levels of professional, technical, and clerical employees assisting in various phases of operations. General direction is received from a senior executive who holds the incumbent responsible for the professional management of highway engineering functions and achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, directs, and coordinates the review of construction plans prepared by consultants, other County agencies, and the Florida Department of Transportation pertaining to roads, bridges, pedestrian walkways and sidewalks, landscaping, drainage, and traffic; implementation of the design and engineering phase of infrastructure projects in accordance with long-range County transportation plans and the annual Capital Budget.

Plans, directs, and coordinates activities pertaining to the negotiation of fees for consultants and the coordination of projects with the Florida Department of Transportation and the Federal Highway Administration; ensures plans and existing conditions are in compliance with the Americans with Disabilities Act; ensures compliance of signal contracts with all applicable laws and regulations.

Plans, directs, and coordinates the preparation of contracts and specifications pertaining to the County's civil engineering construction needs to include traffic signals and signs and signal controller cabinets.

Oversees contracting activities for infrastructure improvement projects such as highways, bridges, storm and surface drainage facilities, street lighting, and other public work projects; ensures that contracting processes are in compliance with law and regulations to include minority participation; and the maintenance of all records and documents pertaining to contracts.

Plans, directs, and coordinates the implementation of traffic engineering studies based on complaints about traffic intersections, roadway markings, and signals; oversees the administration of federal grants pertaining to traffic counting.

Oversees all traffic studies pertaining to public and private schools to include signs, pavement markings, traffic control, signals, road design, bus loading zone, and speed zones; review of road design plans for new schools in order to analyze traffic flow and safe routes to school; creation of safe route to school maps for public schools; and publication of a traffic count map and list.

Plans, directs, and coordinates activities pertaining to the maintenance of a citizen and aesthetics transportation program established to ensure that citizen perspectives are incorporated into the planning and development process of urban transportation systems and that aesthetic considerations recommended by the Transportation Aesthetics Review Committee are an integral part of the planning, design and construction process.

Plans, directs, and coordinates activities pertaining to the maintenance of a bicycle and pedestrian program established to ensure that transportation plans provide for the use of non-motorized alternatives recommended by the Bicycle/Pedestrian Advisory Committee.

## Human Resources Department

---

### Chief, Highway Division (001068)

Oversees the monitoring of programs established to determine the social and environmental impacts of proposed transportation projects.

Oversees the monitoring of the distribution of funds collected from the Local Option Gas Tax, Secondary Gas Tax, and Road Impact Fee programs; coordination with the Florida Department of Transportation regarding the reimbursement of funds to the county for activities on state roads.

Establishes, reviews, and coordinates procedures to ensure compliance with applicable policies, codes, and regulations; prepares divisional budget and financial reports for ensuring compliance with budgetary appropriations; prepares agreements and specifications for consultant and contractual services; develops divisional goals and objectives, and evaluates work methods, procedures, and policies.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance; and performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the theories, principles, and practices of civil engineering.

Extensive knowledge of the theories, principles and practices of highway engineering.

Extensive knowledge of engineering cost estimates, building materials, plans, specifications and contracts pertaining to highway engineering projects.

Extensive knowledge of local, state, and federal laws, regulations, and rules concerning permitting, design, and construction of public works engineering projects.

Extensive knowledge of engineering and construction contracts, specifications, documents, forms, and procedures pertaining to work performed by outside contractors and consultants.

Thorough knowledge of ordinances, codes and regulations pertaining to highway engineering projects.

Thorough knowledge of the principles of management and public administration.

Thorough knowledge of public relations principles and techniques.

Considerable knowledge of supervisory principles and practices.

Knowledge of the policies and procedures used in budget preparation, justification, monitoring and reporting.

Ability to manage and direct divisional activities related to highway engineering.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to establish and maintain effective working relationships with federal and state transportation agency officials, subordinates, superiors and a variety of other public and private officials.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional and managerial work planning, directing, and coordinating operational activities for the Public Works Department.

An employee in this class is responsible for directing a variety of complex divisions, offices, or specialized sections such as all personnel and administrative support functions for the department, traffic engineering, signs and signals, construction, and maintenance of County roads, highways, bridges, and causeways; secondary canal system cleaning and maintenance, and right-of-way acquisition. Responsibilities include developing short and long-range goals, establishing priorities. The incumbent exercises considerable independent judgment in the management of a wide variety of administrative services and support functions and in the resolution of complex administrative problems. Supervision is exercised through subordinate levels of executives, managers, and supervisors over a staff of professional, technical and clerical subordinates assisting in various phases of operations. General direction is received from the Department Director who holds the incumbent responsible for the professional management of departmental operations and achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Prepares proposed and final budgets for the department for presentation to budget committees, the County Administrator, and the County Commission.

Exercises primary operational and administrative control over a specified group of divisions, offices, and sections of the County's governmental operations.

Coordinates the activities of the department and its subdivisions with those other County departments; and when necessary, with comparable organizations in other public and private jurisdictions.

Defines operational goals and objectives recommends and implements organizational and administrative changes.

Reviews existing organizational patterns, work relationships, space, equipment, and manpower utilization; promotes effective operations through standardization, improvement, simplification and installation of new operating systems.

Directs and coordinates diversified departmental personnel management activities, including employee recruitment and selection, interviewing and screening, payroll and benefits, grievances and disciplinary actions, and safety administration.

Oversees management of departmental reproduction services operations in the preparation, printing, and finishing of documents, publications, forms, plats, blueprints and maps for various County departments and the public.

Coordinates the assessment, collection, multi-departmental deposit, financial collection reporting and permanent records management of all Dade County road impact fee revenues.

Supervises departmental budgetary functions; administers departmental operating and capital budgets composed of both general fund and proprietary funds, road impact fees, secondary gas tax and local option gas tax.

Directs departmental fiscal activities, accounting and purchasing functions, and department-wide computer services.

Reviews and evaluates departmental policies and procedures; ensures adherence to various rules and regulations.

Meets with various supervisors and managers to resolve financial and administrative matters; advises superiors on administrative policy and procedure issues; coordinates administrative and financial activities with other County departments and agencies.

Conducts meetings with division directors to establish, review and coordinate procedures to assure compliance with applicable policies, codes and regulations; oversees divisional budget preparation and reviews monthly financial reports for compliance with budgetary appropriations.

Analyzes and evaluates on-going and completed highway engineering projects for conformance with planned goals; analyzes requests for highway engineering projects and makes recommendations based on policy directions.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of supervisory principles and practices.

Ability to exercise judgment and discretion in establishing, applying and interpreting departmental policies and procedures.

Ability to initiate and install administrative programs and procedures and to evaluate their effectiveness.

Ability to direct the operation of assigned county divisions and programs.

Ability to carry out complex oral and written instructions.

Ability to express ideas clearly, concisely, orally and in writing.

Ability to supervise through various levels of executives and supervisors the work of subordinates in a manner conducive to full performance and high morale.

Ability to apply advanced principles of civil, highway and traffic engineering to the analysis and evaluation of highway engineering projects.

Ability to understand and interpret complex architectural and engineering drawings, construction plans, specifications, and contracts pertaining to highway engineering projects.

Ability to assure compliance of highway engineering activities with applicable ordinances, codes, and regulations.

Ability to communicate clearly and concisely, verbally and in writing.

NEW 11-06

#### **Nature Of Work**

This is highly responsible professional and managerial work planning, directing, and coordinating operational activities for the Public Works Department.

## Human Resources Department

### Traffic Analyst 2 (001091)

#### Minimum Qualifications

High school diploma or GED. Two years of inspection or data collection experience in traffic systems design, general engineering or related office environment are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced field and office work in the collection of data essential to the evaluation of traffic problems in the county.

An employee in this class is responsible for conducting independent field and office investigations, studies and surveys relative to off street parking, illumination, origin and destination checks and related urban, suburban and arterial traffic problems. The Traffic Analyst 2 is responsible for the research and definition of the more complex traffic problems and the preparation of resultant findings through reports and specific recommendations. The advanced assignments require the exercise of initiative and technical judgment in the approach and solution of traffic problems. Supervision may be exercised over traffic analysts of a lower grade when on large, complex assignments. Work is reviewed by a superior for accuracy and for adherence to established standards and procedures.

##### ILLUSTRATIVE TASKS

Makes investigations, studies and surveys and prepares detailed reports, including recommendations concerning a variety of traffic problems involving secondary business districts and areas; major thoroughfares and secondary roads; urban, suburban and rural areas; prepares charts, sketches, graphs and related supplementary material to illustrate reports.

Performs a variety of field and office investigations relative to vehicular and pedestrian counts; origin and destination surveys; and flow and accident diagrams.

Meets with and obtains pertinent information from other public agencies, officials and interested parties, relative to traffic problems.

Assists superiors in delineating the more complex traffic problems and on occasion originates traffic investigations and studies.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles, practices and procedures of traffic surveying and the general intent of traffic planning programs.

Knowledge of the rules, regulations and ordinances effective in the county governing traffic operations.

Knowledge of inherent traffic hazards and current precautionary measures.

Knowledge of the geography of the county, its incorporated and unincorporated areas and road network.

Ability to perform mathematic computations rapidly and accurately.

Ability to prepare drawings, sketches, charts and other illustrative material of a nontechnical nature.

Ability to prepare comprehensive reports and recommendations based upon findings.

Ability to meet and deal tactfully with departmental officials and the general public.

Ability to express one's self clearly and concisely, orally and in writing.

Ability to understand and carry out moderately complex oral and written instructions.

This is advanced technical work in the operation of electronic data processing equipment in a large centralized data processing operation.

## Traffic Engineer 1 (001094)

### Minimum Qualifications

Bachelor's degree in Engineering.

### Job Specifications

#### NATURE OF WORK

This is professional engineering work in the planning, design, installation and improvement of traffic and transportation highway systems and control devices.

Employees in this class participate in and implement transportation planning studies, produce geometric traffic engineering designs of roadways and develop comprehensive traffic signal control systems for the metropolitan area. Work involves the application of professional traffic engineering principles to varied projects related to the safe, convenient and economical transportation of persons and goods over the roadway network of the local area. Duties require the application of basic engineering sciences and transportation theory to expedite the movement of vehicular traffic and to overcome deficiencies in the existing transportation complex. Supervision may be exercised over drafting and data collecting subordinates through assignment and review of work in process and upon completion for accuracy and engineering sufficiency. A professional engineering superior assigns projects and advises on unusual or difficult problems, with completed work checked for conformity with departmental policy and governmental regulatory provisions.

#### ILLUSTRATIVE TASKS

Develops proposed traffic signal systems to be computer programmed; prepares internal phasing diagrams, timing sheets, progression off-sets, time space diagrams and work orders for equipment installation.

Prepares preliminary location and geometric design engineering drawings for proposed highway construction projects; develops intersection channelization for highways, submits illustrations, written reports and related data.

Reviews and checks engineering consultant signalization, marking and highway signing plans; makes necessary changes to comply with state and local governmental regulations.

Reviews site plans for various off-street parking developments relative to design, traffic pattern, vehicular access and capacity.

Supervises and evaluates the collection and analysis of traffic and transportation data such as origin-destination, roadway sufficiency, routing and parking capacity.

Participates in the forecasting of long range transportation requirements for the metropolitan area including expressway networks, roadway alignments, interchanges, public transportation systems, arterial network and parking capacity.

Participates in comprehensive transportation planning studies of the local area, assists in the preparation of a master priority plan for arterial and expressway improvements utilizing survey research data and urban planning forecasts.

Reviews major data development plans to insure adequate vehicular flow, parking capacity, roadway integration and proper geometric design.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles and theories of traffic and transportation engineering.

Knowledge of mathematics through trigonometry and the statistical concepts used in analyzing engineering data.

Knowledge of the principles and techniques of geometric roadway design as prescribed by the appropriate traffic regulatory authorities.

Knowledge of national traffic engineering standards for uniform control device installation and utilization.

Knowledge of the fundamentals of urban planning, land use and transportation study.

Knowledge of local, state and federal traffic laws and ordinances.

Ability to analyze engineering and mathematical data and to deduce effective operational plans for traffic control.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to perform scientific research utilizing survey data as well as current sources of published information.

Ability to prepare and submit comprehensive reports with findings and recommendations.

Ability to learn basic computer programming principles for the processing of engineering data.

##### NATURE OF WORK

This is advanced professional engineering work with supervisory responsibility in the planning, design, installation and improvement of traffic and transportation highway systems and control devices.

Employees in this class are responsible for assisting and supervising traffic signal system design, intersection channelization design, pavement marking and geometric roadway design. Work involves participation in and supervision of work units engaged in applying professional traffic engineering principles to varied projects related to the safe, convenient and economical transportation of persons and goods over the local roadway network. Duties require the application of advanced traffic engineering theory and considerable initiative and independent judgment to expedite the movement of vehicular traffic and to improve the existing transportation complex. Supervision is exercised over subordinate professional engineering, drafting and field survey personnel through assignment of projects and the review of completed work for satisfactory results. General supervision is provided by a professional engineering superior who establishes job priorities and reviews work through conferences, written reports and field inspections to insure the accomplishment of desired objectives.

##### ILLUSTRATIVE TASKS

Supervises and participates in the preparation of installation plans and specifications for traffic signals, signal coordination and timing; determines precise timing and phasing of all existing signal systems.

Develops new concepts in signal control utilizing analogue computer, electronic controllers and radar sensors to operate a responsive traffic signal system.

Supervises and assists in the development of geometric roadway designs and highway intersection channelization.

Carries out liaison assignments with state transportation department in the formulating of contracts for signalization and related work; reviews consulting engineering plans for conformity with state and federal standards.

Supervises a work unit in transportation planning; assigns survey projects in community development, programming and research units engaged in implementing the comprehensive transportation plan for the metropolitan area.

Coordinates and prepares substantiating technical reports on public transportation systems, supervises the collection, analysis and evaluation of mass transit systems data.

Prepares and submits comprehensive recommendations on the functional design and operation of proposed new roadways; presents recommendations for the solution of traffic problems and high accident incidence locations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and theories of traffic and transportation engineering.

Considerable knowledge of mathematics through trigonometry and the statistical concepts used in analyzing engineering data.

Considerable knowledge of the principles and techniques of geometric roadway design as prescribed by the appropriate traffic regulatory authorities.

Considerable knowledge of national traffic engineering standards for uniform control device installation and utilization.

Considerable knowledge of the fundamentals of urban planning, land use and transportation study.

Knowledge of local, state and federal traffic laws and ordinances.

Ability to plan, schedule and review the work of professional, technical and survey personnel in a manner conducive to full performance and high morale.

Ability to analyze engineering and mathematical data and to deduce effective operational plans for traffic control.

Ability to express ideas clearly and concisely orally and in writing.

Ability to make complex engineering computations and to prepare meaningful statistical projections.

Ability to apply mass data to electronic data processing systems.

#### Job Specifications

##### NATURE OF WORK

This is specialized field work in the enforcement of laws and ordinances pertaining to animal control within the County.

Employees in this class are responsible for operating specially equipped vehicles in the patrol of an assigned area to apprehend unleashed and unlicensed dogs and other domestic as well as wild animals. Related responsibilities include the investigation of reported animal nuisances and testifying in court as the result of issuance of citations for non-compliance with County animal ordinances. Work involves an element of personal danger in occasional contact with violent or diseased animals and requires tact in dealing with the public. Assignments are usually received by radio transmission or written form which provide information regarding the location and pick up of unleashed dogs or other animals suspected of being diseased, rabid, or otherwise dangerous. Supervision is received from a technical superior who reviews reports of activity and provides directions in unusual or difficult work situations.

##### ILLUSTRATIVE TASKS

Patrols an assigned geographic area in specially equipped vehicles; investigates complaints; questions dog owners and complainants to determine nature of violation; apprehends and collects unleashed, unlicensed, destructive, or deceased dogs or other domestic animals; transports animals to the impoundment facility; and assists in moving animals from vehicles.

Returns licensed animals to owners; explains provisions of the animal control ordinance; issues warnings and official citations.

Investigates reports of bites by animals who are vicious or suspected of being rabid; prepares reports for departmental records and other agencies.

Prepares daily reports of activities and condition of animal found.

Provides testimony in court to support facts relating to issuance of citations, as required.

Assists in animal cruelty cases; assists other enforcement agencies and other organizations concerned with the welfare of animals.

Washes and disinfects vehicle cages, and washes and cleans vehicles after assigned tour of duty.

Operates animal control firearms to subdue dangerous animals under direct supervision of superior.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of principles, practices, and methods of humane animal collection and handling.

Knowledge of the road network of the local geographical area, including municipalities and unincorporated Dade County.

Knowledge of the laws, rules, and ordinances pertaining to animal control and impoundment within Dade County.

### Animal Control Specialist (001142)

Knowledge of the proper use and operation of animal control firearms.

Ability to interpret and enforce related laws and ordinances pertaining to animal control work with firmness, tact, impartiality, and courtesy toward the public.

Ability to understand and follow both verbal and written instructions.

Ability to safely and effectively operate animal control firearms.

Ability to provide information through a deposition or court testimony.

Ability to prepare concise reports of all activities.

Skill in the use of tools and equipment used in apprehending animals.

Skill in the operation of animal control firearms.

Physical strength and agility sufficient to perform assigned duties.

REV 7-93

### **Nature Of Work**

#### Minimum Qualifications

Eighth grade. Six months of experience in the care and feeding of animals are required.

#### Job Specifications

##### NATURE OF WORK

This is manual labor work in the impoundment, handling and care of animals and the cleaning and maintaining of animal shelters in a county facility.

Employees in this class are responsible for the feeding, handling and custodial care of animals as well as assisting in the general care and maintenance of buildings and grounds. Instructions are usually received orally and in writing and repetitive tasks are performed with considerable independence. All work is subject to inspection while in progress and upon completion.

##### ILLUSTRATIVE TASKS

Impounds animals and places within the facility according to size, sex, needs and circumstances involved in their pick up; maintains strict accountability by keeping animals with their respective records.

Disinfects kennels and cages after removing feces and other foreign matter; controls insect pests and parasites by spraying insecticide without causing discomfort or injury to animals.

Feeds animals on a regular schedule; maintains ample fresh water supply.

Assists veterinarians in examining, inoculating, treating and euthanizing animals.

Assists the public in search of a lost pet or when seeking to adopt a new one; handles cash receipts and maintains records pertaining to shelter operations as assigned.

Unloads and stores supplies such as feed, disinfectants and equipment; keeps grounds free of debris and rubbish; performs minor repairs on the building and equipment used in normal operation of the facility.

Removes, corrects or brings to the attention of a supervisor any unsafe practice or safety hazard found.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of established procedures in the impoundment and care of animals in the county animal control facility.

Knowledge of the feeding and custodial care of domestic animals.

Ability to handle various species of animals in a compassionate and safe manner.

Ability to assist the public in an informative, pleasant and helpful manner.

Ability to read and comprehend oral and written instructions.

Ability to maintain, compile and submit records or reports as assigned.

Ability to use tools and equipment routinely utilized in the daily operation of the facility.

Physical strength and agility sufficient to perform manual labor tasks such as lifting, moving equipment and handling or restraining large and sometimes dangerous animals.

Willingness to work various assigned work shifts.

#### NATURE OF WORK

This is specialized investigative work in the enforcement of State and County animal cruelty laws.

An employee in this class is responsible for investigation of animal cruelty complaints, enforcement of State and County animal cruelty laws, and correlation of evidentiary material for prosecution purposes during court procedures. Responsibilities include obtaining warrants under search-and-seizure statutes, inspecting commercial and private pet-related businesses, and issuing warnings and citations for violations of animal cruelty laws. Duties may include supervision of subordinates on some cruelty cases. Supervision is received from a specialized administrative superior who reviews written reports and correspondence, and evaluates performance for effective investigative and enforcement activities.

#### ILLUSTRATIVE TASKS

Serves as animal services information officer; presents departmentally prepared and approved educational programs, including lectures, slides, and demonstrations at schools and civic meetings.

Investigates, enforces and collects evidentiary material for prosecution purposes, including witnesses' names and addresses.

Maintains case numbered reports on cruelty investigations which are extensive in nature and where evidence is seized, along with maintaining proper chains-of-evidence in question; participates and supervises the collection, transportation and confinement of evidentiary material.

Testifies in court as to facts concerning citations issued for violations of animal control laws.

Maintains contacts with other law enforcement agencies, State and County Attorney's Offices, veterinarians, and other agencies requiring special assistance.

Questions complainants, owners and witnesses, enforcing sections of the code pertaining to cruelty, and assures compliance with pertinent sections.

Inspects commercial and private kennels, and pet and grooming shops to assure conformance with laws; explains violations and need for correction of such things as poor sanitary conditions, inadequate food, sick or injured animals, and overcrowded conditions; issues citations as appropriate.

Collects and impounds animals seized under state statutes dealing with cruelty.

Supervises subordinates on cruelty cases and other functions which require direct attention.

Maintains specialized equipment used for gathering evidentiary materials, and inspects and services vehicle assigned.

Provides limited assistance to complainants or witnesses wishing to seek further court action by guiding them through proper channels.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of applicable codes and ordinances governing animal care and control.

Considerable knowledge of departmental policies and procedures pertaining to animal cruelty investigations.

Considerable knowledge of animal identification, illness, habits and behaviors.

Considerable knowledge of the techniques and equipment used in capturing and restraining, receiving, feeding, caring for, grooming and releasing animals.

Knowledge of investigative techniques, methods and procedures.

Knowledge of public relations principles and techniques.

Ability to enforce animal cruelty laws with firmness, tact and impartiality.

Ability to conduct extensive animal cruelty investigations and maintain sound chains-of-evidence.

Ability to issue citations and warnings for violations of animal cruelty laws.

Ability to communicate clearly and concisely, verbally and in writing, to groups and individuals.

Ability to testify in court.

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing the activities of the Miami-Dade Animal Services Department.

An employee in this class is responsible for planning, directing and coordinating the operations of county-wide animal care and control services. Responsibilities include directing through subordinate staff county-wide enforcement of state and local regulations pertaining to domestic animals, administration of license tag and rabies vaccination programs, veterinarian services, dead animal removal from the public right-of-way, adoption and spay/neuter services, humane education, cruelty investigations, public relations, and field operations involving the apprehension, transportation, and confinement of unleashed, unlicensed, diseased or injured dogs or other domestic or wild animals. The incumbent exercises independent judgment in making decisions on technical policies, goals, and objectives, and interacts with local and state organizations regarding animal care and control programs. Supervision is exercised through subordinate personnel with assigned responsibilities in various phases of departmental activities, including administration of license tag and rabies vaccination programs, veterinary services, adoption program, humane education, dead animal removal from the right-of-way, public relations, and field operations involving the control of stray, lost and/or unwanted domestic animals. General direction is received from the County Manager who holds the incumbent responsible for the professional management of departmental operations and the achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, directs and coordinates through subordinates the development of animal care and control program activities.

Directs and coordinates through subordinates the activities of Miami-Dade County's animal shelter including the apprehension, transportation, and confinement of unleashed, unlicensed, diseased or injured dogs and other domestic or wild animals; field enforcement of laws and ordinances pertaining to animal control ordinances within the County; dead animal removal from the right-of-way; impoundment, handling veterinary care and euthanasia of animals; assistance to the public in search of lost pets; investigations of animal cruelty cases in coordination with law enforcement officials and the operation of spay/neuter and animal adoption programs.

Directs and supervises through subordinates the activities of professional and technical employees engaged in providing veterinarian services for Miami-Dade County's animal shelter including interpreting standards and laws pertaining to the care, control, and disposition of impounded dogs; providing technical consultant services to health officers and various agencies; implementing a program for the control of veterinary communicable diseases; directing local rabies control and eradication programs; examining all animals impounded and providing appropriate treatment or

### Director, Miami Dade Animal Services Department (001168)

complement those of the private sector organizations.

Oversees the planning, development and maintenance of a "state of the art animal shelter" including development of a multi-year capital funding strategy to secure substantial shelter improvement.

Establishes departmental programs, functions and direction; sets goals and objectives and monitors their achievement; evaluates animal care and control services and facilities, and assesses their effectiveness in meeting the needs of the citizens of Miami-Dade County.

Exercises financial oversight, including review, approval, and monitoring of expenditures to ensure that they fall within budget allocations.

Meets with outside individuals and groups to solicit input from the community to discuss concerns related to animal care and control issues; attends meetings, conferences and seminars involving local, state and national animal care and control regulation issues, and coordinates with local and regional welfare organizations to maximize quality of animal care and control community-wide.

Makes decisions regarding hiring, discipline and promotion of subordinates; exercises authority for departmental personnel actions consistent with collective bargaining agreements, County personnel rules, and all other applicable rules and regulations.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of state and local laws, regulations, codes, and ordinances pertaining to animal control and welfare.

Extensive knowledge of the principles of general management, business and public administration.

#### DIRECTOR, MIAMI-DADE ANIMAL SERVICES DEPARTMENT

#### KNOWLEDGES, ABILITIES AND SKILLS (Cont.)

Thorough knowledge of laws, regulations, ordinances, and procedures pertaining to the investigation of animal cruelty cases.

Thorough knowledge of animal care and control, including an understanding of the health and temperament issues central to the animal services function.

Considerable knowledge of supervisory principles and practices.

Knowledge of the policies and procedures used in budget preparation, justification, monitoring and reporting, including capital planning and management.

Knowledge of training needs associated with all aspects of animal care and control.

Knowledge of computers and commonly used database programs.

Ability to manage and direct activities related to animal control and welfare.

### Manager, 311 Answer Center (001191)

#### Minimum Qualifications

Miami-Dade County is recruiting for the position of Manager for the 3-1-1 Answer Center. This highly critical position will provide leadership and direction to a fast-paced multi-jurisdictional call center operation comprised of over 200 employees engaged in processing 6000+ calls daily from citizens inquiring about County services as well as municipal, federal and state services. The incumbent will be responsible for the development and implementation of long-range strategic plans to efficiently and effectively manage a complex call center environment with the utmost priority for excellence in customer service. The incumbent will exercise direct supervision over line supervisors and knowledge-base specialists in the day-to-day operations. The ideal candidate will possess excellent writing and verbal communication skills, including public speaking experience; extensive knowledge of industry trends and standards; knowledge of telephony systems and advanced call center technology tools and applications; extensive experience in human resource management to include adequate scheduling of workforce; and knowledge of fiscal and budgetary principles. The incumbent will be expected to maintain high levels of quality service, facilitate customer satisfaction surveys, oversee complaint resolution, be available to operate a 24/7 call center operation, and respond to emergency activations. Bachelor's degree and a minimum of four to eight years of professional administrative experience in the delivery of citizen outreach services or information and referral services is required.

#### Job Specifications

This is highly responsible management and administrative work in planning, organizing and directing Miami-Dade County's Enterprise wide 311 call center operations.

An employee in this class is responsible for planning, directing and supervising a diversified call center activities for Miami-Dade County. Responsibilities include a variety of administrative work, formulating policies and procedures for presentation to the Chief Information Officer, evaluating work program, management systems and technological advances, and monitoring service. The incumbent exercises considerable independent judgment in applying advanced principles of management to the efficient administration of the call center. Supervision is exercised over professional, technical and clerical subordinates with assigned responsibilities in various phases of operations. General direction is received from an administrative superior who reviews work through personal conferences and written reports and holds the incumbent responsible the effective management in the operations of the call center operations.

#### Illustrative Task

Plans, assigns and reviews the work of subordinates supervisors and staff employees of the call center engaged in evaluation and responding to request for information and assistance from citizens and representative of other public and private agencies; delivery of information and referrals services and provides direction to subordinates in addressing complex information request.

Evaluates the call center operations and services and assesses their effectiveness in meeting the needs of the public; directs the development of plans for future services; monitors technological development related to the improvement of the call center.

Coordinates with other county departments and with other senior county executives to assure the provision of services and information provided from other county departments are accurate before it is disseminated to the public.

Supervises the annual budget preparation and administration of the call center fiscal activities; attends department budget meetings to justify proposed expenditures.

Provides critical call center services to the Office of Emergency Management during emergency situations.

Makes decisions regarding hiring, discipline and promotion of subordinates; reviews performance reports prepared by subordinates and rates employee performance; exercise authority for personnel actions consistent with collective bargaining agreements, county personnel rules and all other applicable rules and regulation

### Veterinary Technician (001215)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in Veterinary Medicine; high school diploma or GED and one year of relevant experience working with a Veterinarian in a small animal practice or animal shelter is required. Must receive Euthanasia Certificate within the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is highly skilled medical assistance work supporting a veterinarian in a countywide animal shelter program.

Employees in this class maintain a close working relationship with their supervising veterinarian and exercise considerable independent judgment and initiative in the care and treatment of animals within the shelter. Work involves a wide variety of laboratory activities as well as the inoculation of animals and other activities as assigned. Supervision is received from a Doctor of Veterinary Medicine who evaluates work in progress and upon completion.

##### ILLUSTRATIVE TASKS

Prepares animals for surgery and medication; performs laboratory tests and prepares laboratory reports as directed by a veterinarian.

Performs or assists in performance of euthanasia under direction of a veterinarian; selects and assembles those animals to be euthanized in accordance with law and shelter policy; advises information counter staff of animals euthanized.

Provides information counter staff with data on required rabies vaccinations and surgical sterilization schedules for response to public information requests.

Controls and safeguards all drugs and medicines as directed.

Sweeps, hoses, scrubs and disinfects floors, walls and tables in operating suite; cleans and disinfects or sterilizes equipment and instruments as directed by veterinarian on duty.

Participates and assists in public rabies clinics.

Assists in the holding, feeding and caring for all animals impounded.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of county and state animal control laws and regulations.

Considerable knowledge of methods and practices for the maintenance of clean and humane conditions for impounded animals.

Knowledge of basic veterinary medicine, laboratory practices, materials, equipment and instruments.

Knowledge of general aseptic and sterile techniques.

Knowledge of techniques of preparing surgical packs and the proper cleaning and sterilization of surgical instruments.

Ability to communicate effectively with superiors, shelter personnel, and the public with extreme tact and courtesy.

Ability to perform laboratory tests.

Ability to use medical equipment typical of veterinary medicine and assist a veterinarian performing surgery.

NEW 10-78

#### Nature Of Work

This is highly skilled medical assistance work supporting a veterinarian in a countywide animal shelter program.

### Veterinarian (001216)

#### Minimum Qualifications

Doctorate's degree in Veterinary Medicine. Must possess a State of Florida Veterinarian license.

#### Job Specifications

##### NATURE OF WORK

This is professional work in veterinary medicine in a Metro-Dade County animal services program.

An employee in this class is responsible for the professional care and treatment of animals and implementation of various animal control programs. Responsibilities include interpreting standards and laws related to the care, control and disposition of impounded dogs, assisting in the enforcement of laws pertaining to animal control, serving as a technical consultant to health officers and various agencies, implementing a program for the control of veterinary communicable diseases, directing local canine rabies control and eradication programs, and examining all dogs impounded and providing appropriate treatment or veterinary medical procedures. The incumbent exercises considerable independent judgment and technical expertise in applying the principles of veterinary medicine in the operation of an animal services program. Supervision may be exercised over assigned subordinates assisting with various phases of activities. Supervision is received from a professional superior who reviews work through personal conferences and written reports for achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Assists in the enforcement of County and state laws pertaining to animal control and dog bites, and assists in the prosecution of offenders.

Determines the program and procedures to be used on biological specimens; participates in or supervises autopsies on animals to isolate the etiological agent or disease causing death; interprets laboratory findings.

Implements a program for the control of veterinary communicable diseases; serves as technical consultant to health officers and professional associates, official and voluntary agencies, and the public in recommending effective control procedures and offering diagnostic services.

Directs canine rabies control and eradication programs within the metropolitan area; assists in planning local disease control program; obtains samples and diagnoses diseases; implements vaccination or other corrective actions.

Examines all dogs impounded; directs the separation of diseased dogs for treatment or other disposition; inoculates, spays or neuters all dogs when required by law prior to redemption or adoption.

Prepares activity reports of inspections, tests and laboratory analyses.

Regularly observes all impounded dogs to ensure proper treatment of any animal showing signs of illness or injury.

Performs euthanasia when required in accordance with local laws and recognized humane practices.

Meets with civic organizations and others to provide animal services and control information.

Exercises responsibility for ordering, safekeeping and use of all drugs necessary in the treatment of dogs; maintains complete and accurate records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Extensive knowledge of the theories, principles and practices of veterinary medicine.

Thorough knowledge of county and state animal control laws and regulations.

Thorough knowledge of methods and practices for the maintenance of clean and humane conditions for impounded dogs.

Thorough knowledge of public relations principles and techniques.

Considerable knowledge of the principles of management and public administration.

Ability to apply the principles and practices of veterinary medicine to local animal services operations and activities.

Ability to deal tactfully, diplomatically, persuasively and firmly with members of the public.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to perform veterinary medical research, analyze results and present reports of findings.

Ability to direct and implement various programs in the control of veterinary communicable diseases.

#### Nature Of Work

This is professional work in veterinary medicine in a Miami-Dade County animal services program.

### Veterinarian (001216)

**Minimum Qualifications**

High school diploma or GED. Two years of experience in civil engineering drafting to include construction drawings, engineering surveying work above the instrumentation level, or road, bridge, or related construction experience are required. Must pass the paving and excavating sections of the General Engineering Contractor's examination during the training period.

**Job Specifications**

### Chief, PW & WM Inspector Monitoring (001225)

#### **Minimum Qualifications**

Bachelor's degree in Engineering, Architecture, Construction Management or a related field. A minimum of two to four years of experience in the inspection of road construction and/or public works construction projects are required. Additional work related experience may substitute on a year-for-year basis. Must possess proof of passing the paving and excavating sections of the General Engineering Contractor's Examination or must possess a Miami-Dade County or State of Florida General Contractor's certificate, a Miami-Dade County or State of Florida General Building Contractor certificate, or a Miami-Dade County or State of Florida General Engineering Contractor certificate.

#### **Job Specifications**

No Job Specification Available

#### **Nature Of Work**

This is responsible technical supervisory work with administrative responsibility in the inspection of public works installation for compliance with the Miami-Dade County Public Works manual and applicable standards.

## Title Analyst (001228)

### Minimum Qualifications

High school diploma or GED. Two years of experience in researching abstracts and one year of experience in title examinations are required.

### Job Specifications

#### NATURE OF WORK

This is advanced technical work involving title searching and abstracting in the acquisition of right-of-way for public use.

Employees in this class are responsible for researching ownership records, instruments of title and other legal documents necessary in acquiring rights-of-way or easement rights to property required for public use. Work involves the searching of records from first recorded description to present time, checking the entire chain of title for reservations, outstanding interests such as mortgages, probates, judgments, liens, bankruptcy and miscellaneous matters against names in the chain title. Duties require the use of independent judgment in determining pertinent information and the ability to present this information in acceptable form. An administrative superior reviews work for thoroughness and compliance with legal and departmental policy.

#### ILLUSTRATIVE TASKS

Makes detailed search of title to parcel or parcels from abstract and title company records; checks chain of title for reservations, outstanding interests such as mortgages, probates, judgments, liens or bankruptcy proceedings.

Checks necessary or questionable instruments with records on file in county recorders office; makes summary of essential data necessary to show the true status of parcel under search.

Searches for previous right-of-way conveyances; makes special note of exceptions or reservations in prior title which may not have been shown in subsequent conveyances.

Reviews a variety of recorded information to insure that all essential data necessary to understanding the title of the parcel or parcels involved is complete.

Certifies that grantor appearing in said deed is the legal title holder and that there are no outstanding mortgages, judgments or liens of record against property.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the legal processes and documents pertinent to the acquisition and transfer of real property to the county.

Thorough knowledge of the methods used for checking entire chain of title and records involving rights-of-way or easement rights required for public use.

Considerable knowledge of modern office procedures and practices.

Knowledge of topographic mapping, sufficient to read and interpret legal descriptions of parcels of land to be acquired.

Ability to express ideas clearly and concisely, orally and in writing.

Ability to analyze complex technical and legal documents relating to the acquisition and transfer of real property.

Ability to prepare and submit detailed reports.

### Nature Of Work

This is advanced technical work involving title searching and abstracting in the acquisition of right-of-way for public use.

### Traffic Signal Construction Inspector (001235)

#### Minimum Qualifications

High school diploma or GED. Five years of experience in the inspection, management and/or installation of traffic signal construction and/or maintenance projects are required. Must possess a Dade County Certificate of Competency as a Journeyman or Master Electrician. Must obtain an IMSA Traffic Signal Certification Level 2 by the end of the probationary period.

#### Job Specifications

##### ATURE OF WORK

This is advanced technical work in the inspection of traffic signal construction for the Public Works Department.

An employee in this class is responsible for inspecting various aspects of traffic signal installation, modification and improvement projects. Responsibilities include providing technical direction to consultants and contractors, assisting in overseeing installation of traffic signals and related equipment, inspecting electrical installations to ensure compliance with electrical code requirements, testing controller equipment and components for proper operation, and providing assistance in the development of plans and specifications. The incumbent exercises considerable independent judgment in the inspection and testing of traffic signal installations to ensure conformance with plans, specifications and regulations. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Reviews roadway traffic signal improvement projects; provides information concerning construction plans and specifications; provides technical direction to field consultants and contractors.

Oversees contractors in excavation and restoration of trenches for installation of electrical conduit, placement of concrete and steel poles, backfilling with concrete, installation of span wire assemblies and suspension hardware assemblies, and placement and fastening of fittings or supports.

Oversees installation of wiring and ensures electrical connections and grounding are done in accordance with electrical code requirements; ensures wiring and connections are in accordance with wiring diagrams supplied by manufacturer, from the terminal board to any and all controller units, preemptions, flashers, relays, coordinating units, switches, service lead-ins, interconnect and any other equipment necessary for satisfactory operation.

Conducts tests of controller equipment and components including grounding and microprocessor operation to ensure proper installation and operation in accordance with the signal operation plan and timing sheets.

Assists in the resolution of difficult or unusual roadway conditions involving the installation of traffic signals.

Prepares a variety of technical reports and prepares correspondence.

Prepares for and attends pre-construction meetings concerning traffic signal projects.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the design and operating characteristics of traffic signal equipment.

Thorough knowledge of the methods and procedures used in the installation, testing and troubleshooting of traffic signal equipment.

Thorough knowledge of the theories and principles of electronics and electricity as applied to the design, installation, testing and operation of traffic signal devices and equipment.

Considerable knowledge of the tools, equipment and methods of the electronic and electrical trades.

Considerable knowledge of the occupational hazards and safety precautions required in the electrical/electronic trades.

Considerable knowledge of construction plans, blueprints and specifications.

Ability to oversee the work of contractors engaged in the installation of traffic signal equipment.

Ability to interpret technical sketches, blueprints, diagrams and specifications.

Ability to inspect traffic signal installations and ensure that work conforms with applicable electrical codes and related regulations.

Ability to detect the source of malfunctions in complex traffic signal devices and equipment.

Ability to prepare technical records and reports.

Skill in the diagnosis of electrical or electronic malfunctions in traffic signal control and systems equipment.

### Traffic Signal Construction Inspector (001235)

NEW 10-96

#### **Nature Of Work**

This is advanced technical work in the inspection of traffic signal construction for the Public Works Department.

### Traffic Signal Technician 1 (001237)

#### Minimum Qualifications

High school diploma or GED. Must obtain an IMSA Traffic Signal 1 Certification within one-year of appointment.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the installation, maintenance, modification and repair of traffic signal control mechanisms.

Employees in this class are responsible for the maintenance and repair of a variety of traffic signal equipment including electronic and electro-mechanical traffic controllers, master control systems and traffic signal intersection equipment. Duties include building emergency replacement controllers, performing on-site maintenance and repairs, testing and troubleshooting traffic signal equipment and conducting field inspection of contractors work. Incumbents exercise some independent judgment in the application of the principles and theories of electronics. Supervision is occasionally exercised over subordinate employees who assist with various phases of work. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory maintenance and repair of traffic signal control units.

##### ILLUSTRATIVE TASKS

Repairs, maintains and modifies electronic power supplies used in a variety of equipment including traffic controllers, computer driven maps and displays, and emergency standby power units; installs, repairs and modifies traffic signal poles and mast arms; installs and repairs conduit and electrical cables.

Builds-up and modifies microprocessor based traffic control equipment; installs computer telemetry units in controller cabinets; repairs and modifies microprocessor based, digital and analog controller modules used in traffic control units.

Installs, repairs and maintains digital multiplex telemetry equipment; builds-up emergency replacement controllers using pretimed units to replace damaged traffic controllers; installs emergency, new and replacement controllers at intersections.

Performs on-site maintenance and repairs including cutting span wire and cable, replacing damaged signal heads and burnt out signal lamps, and repairing underground electrical service runs and vehicle loops.

Troubleshoots traffic signal equipment and cable for shorted wires; tests electronic control units to identify

defective components; uses specialized electronic equipment such as oscilloscopes, signal generators, microprocessor testers and telemetry testers to assure the safety of traffic control units.

Operates electronic equipment to interface telephone equipment with remote traffic signal controllers; uses proper radio procedures and codes to document trouble calls, damage reports and work orders; operates and maintains traffic signal lift trucks.

Conducts field inspections of traffic signal control equipment installed by contractors.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and theories of electronics as related to the operation, maintenance and repair of intersection equipment, traffic controllers and control systems.

Considerable knowledge of the principles and theories used in installing, testing and troubleshooting of intersection equipment, traffic controllers and control systems.

Considerable knowledge of the operation and maintenance of state-of-the-art test equipment using LSI, MOS, CMOS, TTL, DTL and microprocessor technologies.

Considerable knowledge of the tools, materials, methods and practices of the electrical/electronics trades.

Considerable knowledge of the occupational hazards and safety precautions of the electrical/electronic trades.

Knowledge of the proper types of splices used for overhead and underground cable installations.

Knowledge of precision test equipment such as voltmeters, ampmeters, meggers and cable locators.

Ability to interpret technical sketches, blueprints and diagrams.

Ability to identify causes of malfunctions and make necessary adjustments in traffic control units.

Ability to accurately apply principles and theories in the operation, maintenance and repair of traffic signal control units.

Ability to operate and maintain precision test equipment.

Ability to make minor repairs and adjustments to precision test equipment.

High school. Five years of experience in the installation, maintenance and repair of traffic signal control mechanisms are required. Must possess an IMSA Traffic Signal Certification Level 2.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work with some supervisory responsibility in the installation, maintenance, modification and repair of traffic signal control mechanisms.

Employees in this class supervise and participate in the work of skilled technical subordinates involved in the maintenance and repair of a variety of traffic signal equipment including electronic, electro-mechanical traffic controllers, master control systems and traffic signal intersection equipment. Duties include coordinating activities with outside agencies, identifying intersections with unresolved problems, instructing subordinates in the operation and maintenance of equipment, and testing control units to locate defective parts. Incumbents exercise independent judgment in determining methods and procedures for the installation, modification and repair of traffic signal equipment. Supervision is exercised over subordinate employees through assignment and review of work and provision of assistance with difficult problems. Supervision is received from a technical superior who reviews work in progress and upon completion for compliance to specifications and standards.

##### ILLUSTRATIVE TASKS

Supervises and participates in the repair, maintenance and modification of electronic power supplies used in a variety of equipment including traffic controllers, computer driven maps and displays, and emergency standby power units; assists in the installation and repair of signal poles, mast arms and cables.

Supervises and participates in the build-up and modification of microprocessor based traffic control equipment, installation and repair of computer telemetry units, and repair and modification of controller modules used in traffic control units.

Supervises and participates in on-site maintenance and repairs for traffic signal installations including replacement of damaged signal heads and burnt out signal lamps; assists with the repair of underground electrical service runs and cut vehicle loops.

Supervises and participates in the troubleshooting of intersection equipment, maintenance of digital multiplex telemetry equipment, and build-up of emergency replacement controllers.

Supervises the repair and testing of electro-mechanical traffic signal equipment; diagnoses malfunctions and corrects problems using spare equipment and cabinet prints; uses state-of-the-art electronic equipment to repair and test control units.

Coordinates activities with outside agencies to assure proper operation of interconnect lines.

Instructs subordinates in the operation and maintenance of electronic interface equipment, precision test equipment, and traffic signal lift trucks.

Reviews trouble and damage reports to identify intersection with unresolved problems.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electronics as related to the operation, maintenance and repair of intersection equipment, traffic controllers and control systems.

Thorough knowledge of the principles and theories used in installing, testing and troubleshooting intersection equipment, traffic controllers and control systems.

Considerable knowledge of the operation and maintenance of state-of-the-art test equipment using LSI, MOS, CMOS, TTL, DTL and microprocessor technologies.

Considerable knowledge of the tools, materials, methods and practices of the electrical/electronic trades.

Considerable knowledge of the occupational hazards and safety precautions of the electrical/electronic trades.

Considerable knowledge of the proper types of splices used for overhead and underground cable installations.

Considerable knowledge of precision test equipment such as voltmeters, ammeters, meggers and cable locators.

Knowledge of supervisory principles and practices.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to interpret and explain technical sketches, blueprints and diagrams.

### Traffic Signal Technician 2 (001238)

Ability to accurately apply principles and theories in the operation, maintenance and repair of traffic signal control units.

Ability to diagnose malfunctions and make necessary adjustments in traffic control units.

Ability to operate and maintain precision test equipment.

Ability to make minor repairs and adjustments to precision test equipment.

Ability to use proper radio codes and procedures.

Skill in the use of tools, equipment and testing devices of the electrical/electronic trades.

### Traffic Signal Technician Supervisor (001239)

#### Minimum Qualifications

High school diploma or GED. Two years of experience as a Traffic Signal Technician 2 with Miami-Dade County or four years of experience in traffic signal construction and/or maintenance to include two years in a supervisory capacity are required. Must possess an IMSA Traffic Signal Certification Level 2 and a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory work in planning and coordinating the installation, modification and repair of traffic signal control mechanisms. Employees in this class are responsible for supervising through subordinate supervisors a staff of technical and maintenance employees engaged in the installation, modification and repair of traffic signal equipment including electronic and electro-mechanical traffic controllers, master control systems and traffic signal intersection equipment. Emphasis of the work coordinating traffic signal control activities with utility companies, government officials and contractors to ensure that activities conform with safety standards. Responsibilities include advising subordinates on major installations and modifications, assisting in the design of special circuitry for complex systems, and reviewing blueprints for special circuitry requirements. Incumbents exercise considerable independent judgment in determining systems equipment and job requirements. Supervision is exercised over subordinate employees through periodic inspection of work in progress and upon completion for adherence to job specifications. General supervision is received from a professional superior who reviews work through personal conferences and observations for achievement of desired results.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisory and technical employees engaged in the installation, maintenance and repair of traffic signal intersection equipment, electro-mechanical traffic controllers and master control systems.

Coordinates the activities of work crews and provides technical direction; supervises hazardous or unusual work assignments; participates in jobs involving unusual or difficult technical problems.

Advises subordinate supervisors concerning major installations and modifications of signal control equipment and master control systems; assists in the design of special circuitry for complex systems equipment; reviews sketches, blueprints, work orders and electronic circuit diagrams for special circuitry requirements.

Prepares work schedules and assigns work orders; reviews blueprints and suggests working procedures; instructs subordinates in the operation and use of equipment.

Coordinates the installation, maintenance and repair of electronic equipment with utility companies, state officials and contractors; meets with utility personnel for clearances on overhead and underground installations; notifies utility companies upon completion of installations. Conducts inspections of equipment installed at new intersections by contractors.

Prepares estimates of costs, time and materials required for proposed jobs; maintains records of labor and materials cost; requisitions equipment, materials and supplies.

Communicates and enforces established safety practices and procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electronics as related to the operation, maintenance and repair of traffic signal intersection equipment, electro-mechanical traffic controllers and master control systems.

Thorough knowledge of the principles and theories used in installing, testing and troubleshooting traffic signal intersection equipment, electro-mechanical controllers and master control systems.

Thorough knowledge of the operation and maintenance of state-of-the-art test equipment using LSI, MOS, CMOS, TTL, DTL and microprocessor technologies.

Thorough knowledge of precision test equipment such as voltmeters, ampmeters, meggers and cable locators.

Considerable knowledge of the tools, methods and practices of the electrical/electronic trades.

Considerable knowledge of the occupational hazards and safety precautions of the electrical/electronic trades.

Considerable knowledge of the proper types of splices used for overhead and underground cable installations.

### Traffic Maintenance Repairer (001242)

#### Minimum Qualifications

Eighth grade and one year of experience in the installation of traffic signs and/or the application of street markings are required; or Currently employed by Miami-Dade County as a Maintenance Repairer with permanent status is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work with some supervisory responsibility in the installation of traffic control devices and application of pavement markings and messages.

Employees in this class are responsible for supervising and participating in the installation, removal and repair of signs, construction of asphalt curbing and traffic channelization and the application of painted street markings. Employees work with a crew of traffic maintenance helpers utilizing motorized spray equipment, air compressors and paint striping machines. Assignments are received from a superior in the form of work orders which diagram work to be accomplished and by oral instructions for the more routine work. Work is reviewed by a foreman who inspects work in progress and upon completion for compliance with instructions and satisfactory completion of work schedules.

##### ILLUSTRATIVE TASKS

Receives work orders requiring erection, replacement and repair of stop, caution and warning signs, construction of asphalt curbing or traffic islands, street painting and striping for barrier lines, center lines, cross walks and related activities.

Directs the work of a crew completing work orders and maintaining equipment; assists in performance of tasks as needed to complete projects or train subordinates using a variety of equipment such as air compressors and striping machines.

Applies pavement marking stencils, regulates compressors and prepares paint for application.

Insures compliance of subordinates with safety precautions; inspects completed work for conformance to quality and quantity standards, and traffic engineering specifications.

Contacts the public in the area where crews are working, informs property owners of the work being performed.

Inspects assigned area for damaged or worn signs and markings and reports to superior.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the practices, methods, equipment and materials used in installing traffic control devices and painting traffic control lines.

Knowledge of the occupational hazards and necessary precautions of traffic device installation work.

Knowledge of the adaptabilities and limitation of various kinds of paints and other surfacing materials utilized on the various types of pavements and sign compositions.

Knowledge of operational characteristics, maintenance and repair needs of motorized equipment used in traffic maintenance activities.

Ability to lay out and direct the work of a crew of traffic maintenance helpers and laborers in a manner conducive to full performance and high morale.

Ability to understand and implement instructional diagrams, written and oral instructions.

Ability to anticipate routine equipment maintenance needs.

Ability to secure a Florida State driver's license if required by assignment.

Ability to keep simple records and make simple reports.

Physical strength and agility sufficient to work long hours out of doors and occasionally under adverse working conditions.

REV 1-73

## **Human Resources Department**

---

### **Traffic Maintenance Repairer (001242)**

### Traffic Maintenance Supervisor 2 (001246)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in the installation or inspection of traffic signs, or traffic sign replacement investigations are required. Must possess an IMSA Work Zone Safety Specialist Certificate.

#### Job Specifications

##### NATURE OF WORK

This is large scale supervisory work in the installation and maintenance of traffic control devices and markings.

Work in this class involves the coordination of personnel, mobile equipment and supplies used in a wide variety of traffic markings, sign installations, roadway channelization and product testing. Employees are responsible for work scheduling and for insuring that all field assignments are satisfactorily completed according to prescribed traffic engineering plans. Work requires the use of some independent judgment and initiative in determining material requirements and motorized equipment to be used in the various types of installations. Supervision is exercised over construction and maintenance crews assigned throughout the metropolitan area, special instructions and assistance are provided in the more difficult projects. General supervision is provided by a maintenance superior who determines job priorities and reviews performance primarily for the efficient and economical completion of work schedules.

##### ILLUSTRATIVE TASKS

Develops and issues work schedules for the installation and maintenance of traffic control devices and markings.

Supervises through subordinate foremen the erection of traffic signs, asphaltic and cement channelization, roadway marking by use of transverse lines, long lines and pavement messages.

Inspects work in progress and upon completion for adherence to illustrated schematic plans and for quality of workmanship.

Carries out traffic materials testing program for a variety of paints, reflective devices and mechanical equipment; submits evaluation report to superiors with appropriate recommendation.

Provides for the necessary training of the maintenance staff, demonstrates the proper use of motorized equipment and the standard safety precautions applicable to working in vehicular traffic.

Insures that all supplies are available when needed and that all motorized equipment is in proper working order.

Maintains records on work orders completed, supplies and manpower utilized and related information.

Recommends personnel transactions to a superior, suggests the purchase of various supplies and equipment and submits cost reduction proposals.

Assists the maintenance superintendent in developing efficient work methods and economical manpower utilization techniques.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles of traffic engineering as applied to roadway marking and devices used in the control of traffic movement.

Thorough knowledge of the methods, materials and equipment used in traffic maintenance.

Considerable knowledge of safety standards and precautions applicable to working in high volume traffic flow.

Considerable knowledge of mechanical technology and operating characteristics of motorized equipment.

Knowledge of effective supervisory practices and techniques for organizing and coordinating large scale field work.

Ability to assign work from engineering schematic plans using surveying data and measurements.

Ability to organize and coordinate work crews effectively throughout the metropolitan area.

Ability to prepare and submit reports on materials testing programs.

Ability to estimate manpower, material and equipment requirements for long range maintenance and construction programs.

Ability to analyze operating procedures and to recommend improvements where possible.

### Mosquito Control Inspector (001252)

#### Minimum Qualifications

High school diploma or GED. Must possess a Driver license. Must be able to work varied schedules to include nights.

#### Job Specifications

##### NATURE OF WORK

This is routine field inspection work in the control of mosquitoes.

Employees in this class are responsible for performing inspections of suspected mosquito breeding places in residential and rural areas and operating spraying equipment and spray vehicles to assist in the control of mosquitoes. Work follows established routines with specific instructions received from superiors on all new assignments. Supervision is received from a superior who reviews work through field inspection evaluation reports and on-site inspections.

##### ILLUSTRATIVE TASKS

Makes systematic daily checks of assigned area in the salt marshes during summer mosquito breeding season; walks ditches and dips water at regular established intervals to check for the presence of mosquito larvae; inspects all types of artificial containers in residential and rural areas for the presence of mosquitoes; determines species of mosquitoes and the stage of the breeding process; inspects daily to prevent new breeding areas from developing; maintains alert for incoming flights of mosquitoes from adjacent areas.

Makes door-to-door inspection of an assigned residential area; contacts residents and distributes mosquito leaflets; looks for containers holding water, for pools, elevator shafts, sumps, buckets, tires and other locations where mosquitoes could breed; calls undesirable situations to the attention of occupants and asks for cooperation in eliminating the problem; keeps accurate work records of inspections made.

Makes counts of adult mosquitoes at established stations throughout the county.

Drives spray trucks, fog trucks, and uses spraying equipment to spray any type of area where mosquitoes may be breeding, including artificial containers such as catch basins.

Assists in loading, mixing and unloading insecticide for helicopter and fixed-wing airplane spray operations; assists in "spotting" for the helicopter and fixed-wing airplane.

Assists supervisors by answering telephone, routing trucks and pinning mosquito complaint maps when necessary.

Cleans vehicles and equipment as necessary.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the breeding characteristics of mosquitoes, and of the identifying characteristics of the principal species common to South Florida.

Knowledge of the safe use of pesticides.

Knowledge of the Metropolitan Dade County Mosquito Ordinance.

Ability to learn rapidly, the rules and regulations concerning control of mosquitoes and to apply this knowledge to specific inspection work.

Ability to read and understand the contents of pesticide labels.

Ability to make field inspections and ascertain facts through investigation.

Ability to keep records and prepare routine reports.

Ability to follow verbal and written instructions.

#### Minimum Qualifications

High school diploma or GED. Two years of field experience in mosquito abatement or pest control to include pesticide usage, equipment and inspection procedures are required. Must pass the Florida Department of Agriculture examination in the CORE, Public Health and Aerial categories and must successfully complete the Code Enforcement Training Program given by the Public Works Department within the probationary period. Completion of 30 semester credits to include 10 semester credits in Biology and/or Entomology may substitute for required experience to a maximum of one year. Must obtain a CDL/Class C with Hazardous Materials Endorsement prior to completion of the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is administrative and technical work with supervisory responsibility in a mosquito control and inspection program.

Employees in this class are responsible for developing and implementing mosquito control policies and procedures and for the enforcement of the county ordinance pertaining to mosquito control. Emphasis of the work is on supervising a staff of subordinate supervisors assigned to specific zones of the county, establishing and revising a variety of procedures used in the reception of public complaints and establishing priorities for the application of insecticides and scheduling of aircraft for mosquito spraying. Incumbents exercise independent judgment in planning work to be performed, dealing with public complaints and in devising procedures required for an effective mosquito control program. Supervision is exercised through subordinate supervisors over a staff of mosquito control inspectors, technical and clerical employees assigned to various phases of the program. Supervision is received from an administrative superior who reviews work through reports and personal conferences for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Supervises through subordinate supervisors a staff of inspectors, technical and clerical employees engaged in carrying out assigned responsibilities in a mosquito control and inspection program.

Establishes, reviews and modifies field operational procedures used by subordinate supervisors to perform the duties of inspection and mosquito eradication.

Supervises and controls the inventory of insecticides used by subordinate supervisors in field fogging and those that are used in aerial application.

Reviews recommendations from subordinate supervisors, and plans and supervises the aerial application of pesticides; oversees and schedules the hours of a Mosquito Control Pilot/Technician.

Plans, reviews and directs the work performed under the direction of a labor crew supervisor; assures that proper mosquito control trails and paths are established to be used by inspectors in the eradication effort.

Plans, directs and supervises the work performed by a heavy equipment operator in trail construction and larvaciding.

Plans, directs and reviews work performed in vehicle and aircraft maintenance; assures that established manufacturer's and/or FAA requirements are adhered to; establishes priorities and deadlines to assure equipment availability.

Maintains statistical records and prepares periodic reports; provides information for, and assists in budget preparation.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance evaluations prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the breeding characteristics of mosquitoes, and of the identifying characteristics of the principal species common to South Florida.

Considerable knowledge of entomological principles, practices and techniques concerning the identification and control of larval and adult mosquitoes.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the Metropolitan Dade County Mosquito Ordinance.

Considerable knowledge of public relations principles and techniques.

Knowledge of the geography of Metropolitan Dade County.

### Duplicating Equipment Operator (001280)

#### Minimum Qualifications

High school diploma or GED. Six months of experience in the operation of duplicating equipment are required.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the operation of complex reproduction equipment.

Employees in this class operate diazo and other complex reproduction equipment to reproduce a variety of manuals, booklets, contracts, aerial photographs, maps, plats and other documents requiring mass production. Duties include operating, adjusting and maintaining assigned equipment, production of blueline/blackline work, sepia and mylar film prints, and operation of less complex camera and related reproduction equipment. Assignments are generally in the form of work orders and employees are responsible for quality and quantity of work produced according to job specifications. Supervision is received from a technical or administrative superior who reviews work in progress and finished production for technical quality and adherence to departmental standards.

##### ILLUSTRATIVE TASKS

Operates diazo and other complex reproduction equipment to produce a variety of documents, maps and other printed matter requiring mass production.

Receives and reviews requests for reproduction services including number of copies required, original mylar film documents and job specifications.

Operates, maintains and adjusts controls to produce printing products; corrects malfunctions as they occur; cleans glass cylinders, exterior trays and cylinder surface; switches nozzles on ammonia tanks as required.

Produces mylar and sepia prints of structural, architectural, civil and mechanical engineering drawings, utility drawings and blueline/blackline prints.

Operates less complex horizontal camera's and other reproduction equipment.

Maintains stocks of papers, films, chemicals and diazo materials.

Maintains records of printing production.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operating, repair and maintenance characteristics of diazo and other complex duplicating equipment.

Knowledge of the papers, inks, chemicals and films used in diazo, camera and other duplicating equipment operations.

Knowledge of printing job specifications.

Knowledge of the records and forms used in the area of assignment.

Ability to operate, adjust, maintain and perform minor repair to complex duplicating equipment.

Ability to follow verbal and written instructions.

Ability to maintain routine records of duplicating equipment operation.

Physical strength and agility sufficient to lift heavy loads and stand for prolonged periods of time.

Skill in duplicating equipment operation.

### Duplicating Equipment Supervisor (001282)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in the operation of duplicating equipment to include experience in offset and photolithographic processes are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory and skilled work in the operation of offset and photolithographic reproduction equipment.

An employee in this class is responsible for the production of legible copies of legal documents, official records, architectural and engineering plans and specifications. Duties require the operation of varied types of photocopy, photostatic equipment, and photochemical machines and making the necessary adjustments, settings and required servicing for daily use. Incumbents are responsible for making decisions and exercising independent judgment pertaining to the size, weight and cutting of paper, the type of machine or equipment to be used to produce the desired results and the scheduling priority of each job. Supervision is exercised over subordinate personnel by assignment of work, checking work in progress and review of finished copies for quality. Work is reviewed by an administrative superior for timely completion of work schedules and for efficiency of reproduction services.

##### ILLUSTRATIVE TASKS

Sets up and operates offset process duplicating and related photographic equipment in producing a variety of legal documents, official records and engineering drawings.

Makes offset plates by etching, washing and sensitizing; inks plates and develops for reproduction uses.

Personally operates cameras, develops, masks, strips and rules negatives; makes line and half tone plates through the use of vacuum frame and arc lights.

Confers with department officials regarding work to be performed, methods used and priority of work.

Maintains item inventory of all common office and reproduction supplies used; submits requisitions to maintain supply levels.

Recommends the servicing, repair and replacement of equipment and changes in reproduction methods and techniques.

Supervises the cleaning, oiling and adjusting of duplicating equipment; may make minor repairs to equipment.

Prepares reports of reproduction and office supplies issued to include cost for budget control.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the various photolithography equipment, materials and methods used in the reproduction of a variety of documents.

Considerable knowledge of the operation, limitations and adaptabilities of offset presses, photochemical and auxiliary equipment.

Considerable knowledge of the papers, inks, chemicals and other supplies used in duplicating and photography.

Ability to make minor maintenance repairs on equipment used.

Ability to determine the photographic characteristics of a variety of drawings, forms and records.

Ability to plan, schedule and organize work to meet deadlines.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to maintain simple production records and to submit reports.

Skill in the operation of cameras and the developing of negatives.

##### NATURE OF WORK

This is advanced specialized supervisory work in the protection of public and private property at the county seaport facility.

Employees in this class are responsible for planning, assigning, and reviewing the work of subordinate seaport security supervisors engaged in supervising security activities at the county seaport facility in coordination with other law enforcement agencies and private companies. Responsibilities include directing security actions to assure the safety of persons while on county property, protect county facilities, and prevent unauthorized access to restricted port areas. Work occasionally involves an element of personal danger and is performed with considerable independence in accordance with established security and safety practices. Supervision is exercised through subordinate security supervisors over security officers engaged in patrolling and protecting seaport facilities. Supervision is received from and administrative superior who reviews work for effective supervision of security operations and adherence to established security policies, procedures, and regulations.

##### ILLUSTRATIVE TASKS

Supervises seaport security activities in coordination with local and federal law enforcement agencies in a variety of special seaport related activities, including permit application background investigations, accident investigations, and control of traffic for special events.

Plans assignment schedules for security supervisors and security officers on a specific work shift; periodically checks by patrol vehicle all posts to assure appropriate security procedures are being followed; provides relief at posts when necessary, and assists in patrolling seaport property as required.

Supervises plain clothes detail and is responsible for all security equipment on an assigned shift.

Reviews daily seaport operating reports to ascertain that appropriate security measures are planned for the day's event and makes necessary changes as required.

Prepares and reviews incident reports, memorandum, and logs of activities prepared by security officers and supervisors to assure conformance with departmental rules, regulations, and procedures.

Recommends changes to seaport security policies, procedures, and operations to correct deficiencies and improve operations; keeps abreast of new procedures and developments in the security field.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employees performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of federal, state, and local government laws, regulations, and rules used in the protection of persons and public property at a major seaport.

Considerable knowledge of the departmental policies, regulations, emergency and contingency plans and procedures.

Knowledge of supervisory principles and practices.

Knowledge of seaport facility and operations, including buildings, roadways, geographical layout and port users.

### Seaport Security Supervisor 2 (001302)

Considerable knowledge of modern security practices, techniques and methods of law enforcement.

Considerable knowledge of public relations principles and techniques.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to enforce seaport rules, regulations and procedures with firmness, tact and impartiality.

Ability to react promptly and correctly in emergency situations.

Ability to recommend changes in security policies and procedures to enhance effectiveness and efficiency of security operations.

Ability to investigate accidents and participate in investigations conducted by law enforcement officers.

Ability to communicate clearly and concisely, verbally and in writing.

#### **Nature Of Work**

This is advanced specialized supervisory work in the protection of public and private property at the county seaport facility.

## Seaport Security Coordinator (001303)

### Minimum Qualifications

Bachelor's degree in Business Administration, Public Administration, Police Science or related field. One year of experience in seaport or aviation security administration is required. Additional experience may substitute for the required education on a year-for-year basis. Applicants qualifying for employment with the Miami-Dade Seaport Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. All employees of Miami-Dade Seaport Department who work in secure unescorted access areas are required by federal law to have a Transportation Worker Identification Credential (TWIC) Card. All future Seaport security personnel must obtain a TWIC card prior to employment. The security clearance required by federal law is a continuing condition of employment.

### Job Specifications

#### NATURE OF WORK

This is advanced administrative work performing, planning and coordinating various administrative activities in the ID/Credentialing Unit of the Miami-Dade Seaport.

Employees in this class are responsible for performing diversified administrative duties or specializing in assigned administrative work of a more complex nature. Responsibilities include adjudicating fingerprints; auditing companies and employees that leave the Seaport without returning their badges; coordinating the security awareness program and assisting the division chief with regulatory issues. Additional responsibilities include keeping up with regulatory issues in the legislature, preparing briefing papers on changes in security levels and supervising the data entry staff on the weekends or in the absence of the Data Entry Supervisor. Incumbents exercise considerable independent judgment in the adjudication of fingerprint results and handling any issues that arise from the denial of the Port Identification Badge in accordance with federal, state and local regulation. Supervision is received from an administrative superior who reviews work for effective management of assigned responsibilities and achievement of established goals and procedures.

#### ILLUSTRATIVE TASKS

Reviews and adjudicates fingerprint results, and handles any issues that arise from the denial of the Port Identification Badge in accordance with federal, state and local regulations.

Reviews a variety of reports prepared by subordinates on assigned shifts concerning field inspections, non-routine incidents, access control issues or incidents, ID badge confiscations, and assures that corrective actions are taken to ensure compliance with regulations and to minimize any interruption in the overall operation at the port; assures reports are completed properly and in accordance with established procedures.

Coordinates Seaport operation activities with various other departmental divisions, fire and police agencies, port tenants and a variety of federal organizations.

Prepares statistical reports, maintains records of ID badge approvals and denials and prepares periodic reports summarizing the operations activities as it relates to security and compliance issues.

Prepares or directs the preparation of notices to port users in the event of circumstances which affect seaport operations such as street closures, changes in alert levels, new security procedures and other situations.

Prepares security awareness pamphlets and training as necessary to improve the overall compliance with security regulations by port users.

Performs related work as required.

#### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the principles of general management, public and business administration and their application to governmental administration.

Considerable knowledge of research techniques and the sources and availability of current information applicable to the adjudication of fingerprints and identification/credentialing.

Considerable knowledge of applicable federal, state, and county laws relating to fingerprint adjudication and the issuance or denial of identification badges.

Considerable knowledge of departmental legal, administrative and procedural regulations.

Considerable knowledge of the principles and practices of modern office administration.

Knowledge of supervisory principles and practices.

Ability to analyze a variety of administrative problems and make sound recommendations as to their solution.

All future Seaport security personnel must obtain a TWIC card prior to employment. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is administrative and supervisory work coordinating operations and service activities in the Security Enforcement area at the Miami-Dade County Seaport.

Incumbents in this classification are responsible for planning, assigning and reviewing the work of a staff of specialized supervisory, enforcement and clerical employees engaged in a variety of activities in support of Seaport security operations. Emphasis of the work is on operational regulatory compliance activities and the protection of public and private property at the County Seaport facility. The incumbents exercise considerable independent judgment in making immediate decisions regarding Seaport security, regulatory compliance and in the development and implementation of policies and procedures to correct deficiencies and improve security operations. Supervision is exercised through subordinate supervisors over specialized security enforcement and clerical subordinates who assist with various phases of work. General direction is received from an administrative superior who reviews work through personal conferences and written reports for efficiency of seaport security activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisors, specialized enforcement and clerical staff, engaged in the protection of public and private property and in operational regulatory compliance activities at the County Seaport facility. Responsibilities include planning, assigning and monitoring security activities in coordination with other law enforcement agencies and private companies, including permit application, background investigations, accident investigations, traffic control for special events, compiling information for daily reports for U.S. Customs on port users processed and the investigatory process involved in the issuance of Port IDs.

Plans assignment schedules for subordinate supervisory, specialized enforcement and clerical staff on a specific work shift. Periodically performs field checks by patrol vehicle on all security posts to assure appropriate security procedures are being followed; provides relief at posts when necessary, and assists in patrolling seaport property.

Responds to tenant issues and concerns; conducts audits surrounding ID badge issues; reviews appeals from applicants denied ID badges; instructs operational staff on compliance issues and ensures that compliance changes are made part of the training manual.

Reviews a variety of reports prepared by subordinates on assigned shifts concerning field inspections and non-routine incidents; assures that corrective actions have been taken or will be taken to provide fast and efficient customer service; assures that reports are completed properly and in accordance with established procedures.

Coordinates administrative and operational details related to the implementation of the facility security plan.

Responsible for operations and maintenance of all security equipment, including radios, vehicles, access control systems, and closed-circuit television systems.

Reviews daily seaport operating reports to ascertain that appropriate security measures are planned for the day's events and makes necessary changes when required.

### Seaport Security Operations Supervisor (001305)

Prepares and reviews incident reports, memoranda, and logs of activities prepared by security officers and supervisor, to assure conformance with departmental rules, regulations and procedures; prepares periodic reports summarizing operational activities.

Assists in the development and implementation as well as recommends changes to seaport security policies, procedures and operations to correct deficiencies and improve operations; keeps abreast of new procedures and developments in the security field.

Coordinates Seaport security operations and regulatory activities with various other departments, divisions, fire and police agencies, port tenants and a variety of Federal organizations; prepares or directs the preparation of Notices to Port users in the event of circumstances which affect seaport operations such as closed streets, closed taxiways or other situations.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee's performance.

Performs related work as required.

#### KNOWLEDGE, SKILLS AND ABILITIES

Thorough knowledge of operating procedures and departmental rules and regulations related to security and regulatory compliance.

Thorough knowledge of modern security practices, techniques and methods of law enforcement.

Thorough knowledge of policies, regulations and procedures used in protecting and patrolling public property at a major seaport facility.

Thorough knowledge of cruise line, tenant and leasehold operations at Miami-Dade Seaport.

Thorough knowledge of the geography of the Miami-Dade Seaport including road network, building locations, public and private facilities and cruise line operating areas.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of federal and local regulations governing the control of a large transportation facility.

Considerable knowledge of departmental records, forms and reports required for ID badge processing.

Knowledge of the principles and practices of public and business administration.

Knowledge of the principles and practices of modern office administration.

Knowledge of public relations principles and techniques.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, superiors and officials of other government agencies and port tenants.

Ability to analyze a variety of administrative and operational problems and make sound recommendations for their solution.

Ability to exercise judgment and discretion in devising, installing and interpreting departmental rules, regulations and procedures.

Ability to express ideas clearly and concisely, both verbally and in writing.

Ability to initiate and install administrative and operational programs and procedures and to evaluate their effectiveness.

All future Seaport security personnel must obtain a TWIC card prior to employment. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in the extermination of pests for the Miami-Dade Seaport Department.

Employees in this class are responsible for participating in the control and extermination of insects, vermin, rats and other pests on the outside areas of the Seaport. Responsibilities include inspecting premises and investigating complaints of infestation, selecting the best methods of extermination, employing various chemicals or equipment to exterminate pests, and informing occupants of the proper procedures and precautions required during the extermination process. A Seaport Exterminator may oversee and inspect treatment that is applied by an outside contractor to ensure compliance with applicable standards. Supervision is received from a supervisor who will review work for the effectiveness of extermination activities.

##### Illustrative Tasks

Inspects premises and investigates complaints of infestation; determines nature of infestation and selects best methods of extermination.

Uses powders, sprays, solutions, traps or bait in exterminating pests; prepares and combines chemicals in proper proportions for safe and effective use.

Informs occupants on procedures and precautions required during the extermination process; instructs residents in methods of preventing the recurrence and spread of infestation.

Oversees and inspects treatment applied by outside contractors to ensure compliance with established extermination standards.

Keeps records and prepares reports of inspections and extermination activities, as well as updates a Material Safety Data Book.

Controls inventory of all chemicals, traps and baits used in the extermination process.

Performs custodial and other related work as required.

##### Knowledge, Skills and Abilities:

Knowledge of the methods, materials and equipment used in exterminating work.

Knowledge of specialized toxic materials used in a wide variety of extermination tasks.

Knowledge of the laws, rules and regulations governing the use of toxic exterminating supplies and materials.

Knowledge of the occupational hazards and safety precautions applicable to exterminating work.

Ability to utilize extermination materials, supplies and equipment to eradicate a variety of pests and infestations.

## Human Resources Department

---

### Seaport Exterminator (001309)

Ability to examine and identify infestations and select the proper course of action to control or exterminate them.

Ability to observe and enforce established safety practices and procedures.

#### Minimum Qualifications

High school. Two years of experience in the maintenance of electrical and hydraulics equipment are required. Applicants qualifying for employment with the Miami-Dade Seaport Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. All employees of Miami-Dade Seaport Department who work in secure unescorted access areas are required by federal law to have a Transportation Worker Identification Credential (TWIC) Card. All future Seaport security personnel must obtain a TWIC card prior to employment. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is skilled mechanical work at the journeyman level in the repair and maintenance of seaport hydraulic and related electrical equipment. Employees in this class perform skilled work in the repair and maintenance of fluid power and electrical systems which activate and control passenger loading bridges. Work involves diagnosing, repairing, overhauling and adjusting a variety of hydraulic equipment and hydraulic systems. Supervision is occasionally exercised over subordinate employees who assist with various phases of work. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory repair and maintenance of hydraulic systems.

##### ILLUSTRATIVE TASKS

Repairs and maintains a variety of hydraulically controlled and operated equipment with emphasis on passenger loading bridges; makes adjustments on pressure relief valves and flow control valves to bring components into proper operating range. Overhauls, rebuilds and services hydraulic component parts such as cylinders, directional control valves, pumps, piston type and wash plate pumps; fabricates hydraulic hoses, fittings and piping; certifies rebuilt components for required operating pressure. Troubleshoots hydraulic and electrical systems to locate and correct problems; makes bench tests to locate leaks and defects in equipment; recommends solutions to correct operating problems. Makes occasional repairs in the field; tests and checks components and equipment before returning to service. Observes established safety practices and procedures. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the construction, design, repair and adjustment of hydraulic and electrical components and equipment. Considerable knowledge of the operation of passenger loading bridges.

Considerable knowledge of tool and equipment needed for major and minor repairs of hydraulic and electrical systems associated with loading bridges.

Considerable knowledge of hydraulic and electrical principles and theory.

Considerable knowledge of the mechanics of hydraulic and electrical components.

Knowledge of the occupational hazards and safety precautions of hydraulic and electrical work.

Ability to diagnose and detect failures in hydraulic systems.

Ability to read hydraulic and electrical schematics.

Ability to follow verbal and written instructions.

Skill in the care and use of tools, equipment and materials used in industrial hydraulics.

Skill in the diagnosis of hydraulic and electrical malfunctions.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in the coordination of vessel movements at the county seaport facility.

An employee in this class is responsible for vessel berth assignments and for supervising the arrival, departure and dock location of all vessels at the county seaport. Responsibilities include supervising subordinates engaged in verifying vessel reports, manifests and other items, coordinating work with various steamship agencies, and supervising the operation of the seaport drawbridge. The incumbent exercises considerable independent judgment in the assignment of available berths by taking into consideration the proximity of berths to agents' consolidation sheds, storage lots, staging areas, railroad tracks, and crane availability in order to assist stevedoring companies in reducing total labor costs. Supervision is exercised over a staff of subordinate superintendents and bridge operators engaged in carrying out assigned responsibilities. Supervision is received from an administrative superior who reviews work for efficiency of operations, through personal observations, written reports and personal conferences.

##### ILLUSTRATIVE TASKS

Receives requests for vessel berths and assigns berths; coordinates vessel arrivals, departures and berth locations to maximize operational efficiency and safety, including the scheduling of passenger ships, gantry cranes, container cargo ships, oil barges and regular cargo vessels. Confers with vessel agents, harbor pilots, departmental employees and other maritime officials through radio or direct telephone contact to insure proper and timely vessel arrivals, shifting and departures from berths.

Supervises subordinates in the review and verifications of vessel reports, manifests, ship electricity and water usage.

Prepares input for Daily Dock Report and certifies the accuracy of the arrival, location and departure of all vessels at the seaport.

Maintains the department's vessel status board to provide an accurate scale model of ship activity at the seaport.

Reviews duty officers' log books daily and reports deficiencies.

When instructed, may order and enforce the removal or change the berth or location of any vessel for the purpose of facilitating navigation or commerce, or for the protection of other vessels or property.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on job related problems; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of maritime rules, regulations and traffic procedures.

Considerable knowledge of operations and activities at a major seaport facility.

Considerable knowledge of Federal, state and local policies, regulations and procedures pertaining to seaport operations.

Considerable knowledge of the provisions of various tariffs and lease agreements in use at the seaport.

Considerable knowledge of the maintenance, management and commercial use of dock areas and warehouse facilities, passenger terminals and commercial scales.

Considerable knowledge of cargo storage and transfer to and from ships by stevedores, rail and trucks.

Considerable knowledge of the geography of the seaport operating area including road network, users and facilities.

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of the factors involved in the efficient and effective assignment of berths at a large seaport facility.

### Seaport Berthing Officer (001314)

Knowledge of supervisory principles and practices.

Ability to coordinate and supervise the efficient and effective berthing of a wide variety of vessels at a large seaport facility.

Ability to establish and maintain effective working relations with port tenants, users, supervisors and officials of other government agencies.

Ability to plan and coordinate the movements of ships, passengers and cargo.

Ability to plan, assign and review the work of a staff of subordinates in a manner conducive to full performance and high morale.

Ability to enforce seaport rules, regulations and procedures firmly and impartially.

Ability to react promptly and appropriately in emergency situations.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to keep complete and accurate records and prepare reports.

NEW 1-84

#### **Nature Of Work**

### Job Specifications

#### NATURE OF WORK

This is specialized work in coordination and supervision of operations and service activities on an assigned shift at the county seaport facility.

Employees in this class are responsible for the continuous inspection of port cargo terminal areas to assure adherence to lease agreements, cargo and vehicular movement requirements, applicable seaport regulations and policies, and port safety and sanitary standards. Some incumbents in this class are responsible for coordinating and supervising port waterfront, passenger terminal and cargo terminal operations after normal work hours. Work involves the application of some independent judgment in the enforcement of seaport operational policies and pertinent regulations. Supervision may be exercised over subordinate employees engaged in operations through assignment and review of work. Supervision is received from an administrative superior who makes assignments and reviews work for conformance to seaport policies and for efficiency of operations through personal conferences and review of written reports.

#### ILLUSTRATIVE TASKS

Patrols and inspects cargo terminal areas including cargo sheds and open storage areas; monitors tenant's use of covered and open cargo space for efficiency, safety and compliance with tariff and lease agreements; identifies and stores abandoned cargo; monitors cargo for movement prior to free time expiration and for demurrage charges; assists in processing revenue producing documentation involving cargo wharfage and demurrage; investigates related problems and settles disputes.

Conducts fire inspections of cargo sheds and related areas to ensure that fire safety equipment is accessible and in proper working condition; initiates immediate corrective action as required; prepares periodic written fire inspection reports.

Monitors parking of automobiles, trucks, trailers, cranes and other vehicles in cargo areas to prevent interference with moving vehicular traffic, scheduled cargo operations and railroad traffic.

Supervises operation of commercial truck scales and scale operators; processes truck scale receipts and funds.

Monitors cargo area security lighting and working lights for proper operation; initiates maintenance requests for lighting, equipment or building repairs as necessary.

Supervises port operations after normal work hours; controls all ship arrivals, departures, and shifting of berths; communicates with harbor pilots, noting time, conditions of berth areas and unusual circumstances; confers with vessel agents to insure meeting of schedules or modifying if necessary.

Monitors vessel loading and unloading, crane operations, railroad, cargo and passenger operations for effect on schedules and compliance with safety requirements; patrols and inspects all seaport facilities.

Responds to accidents and incidents on the port, assisting with investigations and taking necessary corrective action; coordinates emergency situations with fire, police, Coast Guard and other emergency agencies.

Insures that port is ready for safe vessel berthing and cargo operations including adequate night lighting, positioning of passenger vessel gantry bridges and readiness of passenger terminal areas.

Patrols and inspects passenger terminal areas including passenger accesses, reception areas, boarding bridges and ramps, automobile parking facilities, and related areas; monitors vehicular traffic in passenger areas to insure quick resolution of problems; obtains assistance of seaport security employees as necessary; insures that passenger terminal safety is maintained including elevators, fire protection equipment, life preservers and electrical equipment.

Performs related work as required.

#### Job Specifications

##### Nature of Work

This is routine operational work in terminal operations on an assigned shift at the Miami-Dade Seaport.

Employees in this class are responsible for performing a variety of duties in support of terminal building operations at the Miami-Dade Seaport. Work involves assisting passengers on route to assigned boarding gates, providing information and instructions to passengers and the public, and assisting with maintenance and security within the terminal complex. Duties include inspecting terminal facilities, monitoring janitorial contracts to ensure their compliance with contractual requirements, and providing assistance in varied terminal operations functions. Work is performed according to established rules and procedures and some judgment and tact is required in dealing with the traveling public. Supervision is received from a specialized superior, who makes daily work assignments and reviews work through personal conference, observations and written reports for conformity with the departmental rules, regulations, and procedures.

#### ILLUSTRATIVE TASKS

Prepares Seaport Passenger Terminals for daily cruise operations activities by checking on the safety and serviceability of the lighting, air-conditioning, elevators, escalators, conveyor belts, carousels and other equipment in the facility; inspects all other aspects of the terminal such as the condition of, or defects in, carpeting, restrooms, walls and ceiling; expedites contact and response for repairs and assistance by Seaport staff.

Provides directions to ground transportation, restrooms, ticket counters, baggage pick-up areas and other locations as well as providing assistance in a variety of situations that may be troublesome to the cruising public; assists disabled passengers to elevators and assists their movement through seaport facilities.

Monitors cruise ship's passenger loading and unloading in compliance with safety requirements in accordance with Port security, US Customs, INS, DEA and US Coast Guard.

Patrols terminal facility areas to ensure integrity of all doors leading to waterside comply with the US Coast Guard.

Monitors ILA operation for compliance with baggage handling rules.

Assists with traffic control by placing signs and traffic control devices to expedite the flow of private vehicles and buses engaged in the drop-off and pick-up of passengers; assists with parking lot toll collection and oversize vehicle parking.

Assists with special functions held in Passenger Terminals, escorts inspectors and workmen to secured areas in compliance with enhanced security policy and procedures.

Responds to and investigates all accidents, incidents and hazardous material spills in cruise areas, and takes necessary corrective action; coordinates emergency situations with fire, police, Coast Guard and other government and private agencies; preserves order and assists in rescue operations at the scene of emergencies.

### Seaport Terminal Operations Specialist (001317)

Operates radio equipment devices.

Performs related work as required.

#### KNOWLEDGE, SKILLS AND ABILITIES

Knowledge of rules, regulations and procedures pertaining to terminal operations at the Miami-Dade Seaport.

Knowledge of effective public relations techniques.

Knowledge of operations and activities at the Miami-Dade Seaport.

Knowledge of crowd control methods and techniques.

Knowledge of cruise line, tenant, concessionaire and leasehold operations at the Miami-Dade Seaport.

Knowledge of modern security practices and techniques.

Ability to establish and maintain effective working relationships with superiors and with officials of various related seaport related organizations.

Ability to enforce seaport regulations firmly and impartially and with respect for individual rights.

Ability to exercise judgment and discretion in the application of departmental policies and procedures.

Ability to react promptly and correctly in emergency situations.

Ability to prepare routine and written records.

Ability to understand and follow verbal and written instructions.

#### **Nature Of Work**

This is routine operational work in terminal operations on an assigned shift at the Miami-Dade Seaport.

## Human Resources Department

### Seaport Passenger Terminal Operations Manager (001318)

#### Minimum Qualifications

High school diploma or GED. Four years of experience in the operational phases of a seaport facility to include experience in passenger terminal, cargo terminal, or berthing operations are required. Applicants qualifying for employment with the Miami-Dade Seaport Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. All employees of Miami-Dade Seaport Department who work in secure unescorted access areas are required by federal law to have a Transportation Worker Identification Credential (TWIC) Card. All future Seaport security personnel must obtain a TWIC card prior to employment. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in the management of passenger terminal operations at the county seaport facility.

An employee in this class is responsible for supervising passenger terminal operations and related activities to insure passenger safety and convenience. Emphasis of the work is on enforcement of safety and cleanliness, regulations, supervision of the operation of automobile toll parking lots, insuring prompt resolutions to traffic problems and formulating recommendations for improvement in efficiency.

Responsibilities include patrolling and inspecting passenger terminal areas, initiating requests for repairs and maintenance and establishing working relationships with port tenants, users, various organizations and the public. Work involves the application of independent judgment in accomplishing operational objectives within the area of assignment. Supervision is exercised over subordinate supervisory and specialized employees, through scheduling, assignment and review of work. Supervision is received from an administrative superior who reviews work through personal observations and review of written reports for efficiency of operations and attainment of objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinates engaged in supervising passenger terminal operations on an assigned shift, operating automobile toll parking lots and performing various semi-skilled maintenance tasks.

Patrols and inspects passenger terminal areas including passenger accesses reception areas, boarding bridges and ramps, automobile parking facilities, ships' berths, port tenants, offices and storage spaces, and related port facilities.

Insures that passenger terminal safety is maintained, including elevator operation, fire protection equipment, life preservers and electrical equipment; takes action to assure that hazardous conditions are eliminated.

Supervises operation of automobile toll parking lots and collection of revenues; safeguards funds and maintains records of parking lot revenues and expenditures; accounts for cash receipts; processes parking permits, tickets and toll revenues.

Monitors buses, taxis and automobile traffic and parking in passenger terminal areas to insure prompt resolution of developing problems; obtains services of seaport security personnel as required.

Determines modifications needed in facilities and procedures due to addition of new ships or changes in cruise ship schedules; recommends changes as necessary.

Indicates action for repairs and maintenance needed on passenger terminal buildings and equipment.

Establishes working relationships with tenants, passenger vessel agents, and with various local and Federal organizations to insure safe, efficient operations and to react quickly to problems.

Assists port passengers with personal inquiries for instructions and information; investigates allegations of lost or stolen possessions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on job related problems; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the use, management and maintenance of a seaport passenger terminal complex and related facilities.

Thorough knowledge of operations and activities at a major seaport facility.

Considerable knowledge of the hazards and safety precautions applicable to the large scale movement of passenger and vehicular traffic.

### Seaport Passenger Terminal Operations Manager (001318)

Considerable knowledge of maritime rules, regulations and traffic procedures.  
Considerable knowledge of Federal, state and local policies, regulations and procedures pertaining to seaport operations.  
Considerable knowledge of public relations techniques.  
Considerable knowledge of supervisory principles and practices.  
Knowledge of the principles and practices of modern office administration.

Ability to establish and maintain effective working relationships with port tenants, users, subordinates, officials of other government agencies and the public.

Ability to plan and coordinate the large scale movement of seaport passengers through a passenger terminal complex.

Ability to enforce seaport rules, regulations and procedures firmly and impartially.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to keep complete and accurate records and prepare reports.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in engineering construction inspection for the Seaport Department.

An employee in this class is responsible for the inspection of a variety of marine and civil engineering construction projects to assure compliance with legal requirements and construction specifications. Responsibilities include resolving field conflicts, issues with contractors, consultants and government agencies; reviewing project design construction documents at various phases of completion; attending all pre-construction meetings related to the Port's Capital Development Program, and progressing and staffing meetings; reviewing schedule of values, construction progress, making recommendations, coordinating with Port Engineer, and Project Manager on problems investigated; reviewing submittals of Guaranteed Maximum Prices on Port capital improvement projects and reviewing pay request of professional services or contractors on percentage of work completed or materials stored on site. The incumbent exercises independent judgment in the application of construction inspection methods and techniques to the inspection of large and complex marine and civil engineering construction projects. Supervision is received from a technical superior who reviews work for effective inspections of marine and civil engineering construction projects through all phases of the construction process.

##### ILLUSTRATED TASKS

Performs field inspections and contract review to insure projects comply with contract plans, technical specifications, shop drawings, schedules, budgets and safety requirements; supervises field inspectors monitoring for deficiencies and non-compliance items and inspecting for corrections of defects to ensure that the standards as per contract and safety are met; makes and handles arrangements to have materials tested by ordering work to consultants or testing labs; schedules and assists in the preparation of consultant substantial and final completion inspections in various trades.

Manages and supervises the work of surveyors, other Seaport divisions, testing labs, professional services and vendors on contract services for the Port's capital construction projects and special expedited projects.

Reviews project design construction documents at various phases of completion in order to assure accuracy through coordination between architectural, structural and related engineering trades; checks for compliance with local, state, federal codes and Port design standards and makes recommendations for necessary changes.

Attends all pre-construction meetings related to the Port's Capital Development Program progress and staff meetings; reviews schedule of values, construction progress and make recommendations; coordinates with Port Engineer and Project Manager on problems investigated and delays; evaluates requests to prevent increasing cost or use of contingency funds; prepares estimates for various projects on quantity, cost and time frame.

Reviews submittals of guaranteed maximum prices on Port capital improvement projects; reviews pay requests of professional services or contractors on percentage of work completed or materials stored on site.

Perform other related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Thorough knowledge of the principles and practices; methods and materials of marine and building construction.

Thorough knowledge of construction plans and specifications.

Considerable knowledge of the basic principles of civil and marine engineering.

## Human Resources Department

---

### Seaport Construction Inspection Specialist (001330)

Considerable knowledge of the principles and practices of modern land surveying.

Considerable knowledge of law regulations, administrative requirements, and County standards pertaining to seaport construction projects.

Ability to make detailed technical inspections of marine and civil engineering projects and enforce contract terms and regulations firmly, tactfully and impartially.

Ability to read and interpret blueprints, construction plans and specifications.

Ability to detect, analyze and report on technical field construction inspection problems.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to swim.

Skill in the use of modern surveying equipment.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in directing multi-shift custodial and housekeeping activities at the county seaport facility.

An employee in this class is responsible for planning, assigning and reviewing the work of subordinates and subordinate supervisors engaged in a variety of custodial and housekeeping tasks. Emphasis of the work is on the large scale coordination of equipment, materials and personnel to assure proper custodial maintenance of passenger terminals, transit sheds, storage areas, streets, offices and office buildings. Related responsibilities include the sale of potable water to ships, trash pick up and disposal, and supervision of the mixing and handling of various chemicals. Supervision is exercised over a large number of custodial and specialized employees through subordinate supervisors. Supervision is received from an administrative superior through personal conferences and observation of seaport facilities for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate custodial supervisors working various shifts and supervising custodial employees engaged in cleaning offices, office buildings and passenger terminals, sweeping streets, cleaning restrooms and sweeping, mopping and waxing floors.

Supervises specialized employees engaged in providing potable water to ships; reviews the care and maintenance of watering hoses, meters and water bays.

Supervises specialized employees engaged in the pick up, storage and disposal of trash and garbage.

Inspects passenger terminals, transit sheds, storage areas, offices and office buildings for custodial or maintenance needs and for potential safety hazards; takes corrective action as necessary.

Inspects all roadways to determine maintenance needs and assigns employees to operate street sweeping equipment as required.

Supervises insect and rodent control at the seaport; supervises the mixing and handling of pesticides, herbicides and rodenticides.

Keeps records and submits various reports; prepares requisitions for supplies and equipment; reviews maintenance requirements of assigned vehicles and schedules preventive maintenance.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the materials, methods and equipment used in a large scale custodial operation.

Considerable knowledge of the operating and maintenance characteristics of various machines and equipment used in a large scale custodial operation.

Considerable knowledge of the special housekeeping and custodial requirements of the county seaport facility.

Considerable knowledge of supervisory principles and practices.

Knowledge of occupational hazards and safety precautions applicable to seaport housekeeping and custodial activities.

Knowledge of the geography of the seaport operating area including road network, passenger facilities, cargo facilities and office buildings.

Knowledge of the operations and schedule of activities at the seaport facility including the requirements of port users.

Knowledge of the proper storage and use of pesticides, herbicides and rodenticides.

Ability to supervise a large staff of subordinates in a manner conducive to full performance and high morale.  
Ability to plan and schedule work programs to complete assigned responsibilities in a multi-shift custodial operation.  
Ability to coordinate various work crews and use of equipment and materials in geographically separated areas.  
Ability to keep complete and accurate records and prepare reports.  
Ability to understand and follow oral and written instructions.

NEW 10-80

#### **Nature Of Work**

This is responsible supervisory work in directing multi-shift custodial and housekeeping activities at the county seaport facility.

## Human Resources Department

### Seaport Facilities Superintendent (001434)

#### Minimum Qualifications

High school diploma or GED. Four years of progressively responsible experience in facilities maintenance to include supervisory experience are required. Must possess a Miami-Dade County Certificate of Competency as a Journeyman or Master's License in Air-Conditioning. A General Contractor or Building Contractor's license can substitute for the required trades certification. Applicants qualifying for employment with the Miami-Dade Seaport Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. All employees of Miami-Dade Seaport Department who work in secure unescorted access areas are required by federal law to have a Transportation Worker Identification Credential (TWIC) Card. All future Seaport security personnel must obtain a TWIC card prior to employment. The security clearance required by federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in the maintenance of the Port of Miami.

An employee in this class coordinates workers, equipment and materials used in the repair and maintenance performed on buildings, roads, causeways, bridges, drainage facilities, dock aprons, bulkheads, open ground storage areas, electrical and water lines located on the Port of Miami. Responsibilities include contracting services for the structural and mechanical trades, mobile equipment operation and repair, earth moving, road building, and building annexes maintenance. Independent judgment is exercised in planning and assigning work by utilizing labor, materials and equipment efficiently. Supervision is exercised through subordinate supervisors over trades and clerical staff with assigned responsibilities in various phases of operations and in the assignment and inspection of work in progress and upon completion. Supervision is received from a professional superior who assigns work in the form of written orders, drawings, or verbal instructions and reviews completed work by the occasional inspection of facilities for satisfactory operation.

##### ILLUSTRATIVE TASKS

Supervises, assigns, coordinates and directs all phases of seaport facilities maintenance through a large staff of supervisors, tradesmen, equipment operators, laborers, custodial workers and clerical and inventory personnel engaged in maintenance and new construction activities; may qualify the department as a contractor by maintaining an active master's license in one of the trades to include procuring the appropriate permits, insuring that all work is performed according to applicable building codes and that subsequent approvals and final inspections are obtained.

Makes period maintenance inspections; recommends building repairs and improvements; estimates time, labor, equipment and materials required; maintains records, prepares and submits reports; selects equipment for purchase.

Consults with supervisors, contractors, engineers, seaport tenants and lessees on proposed construction repairs and new installations; makes recommendations for modifications to existing facilities and equipment; schedules and implements regular and preventive maintenance programs according to manufacturer's recommendations.

Corresponds with equipment and product manufacturers; inspects and approves materials and supplies; maintains architectural and engineering records of buildings and equipment; prepares annual maintenance and housekeeping budget for the department.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

## Human Resources Department

---

### Seaport Facilities Superintendent (001434)

Thorough knowledge of methods, practices, techniques used in the maintenance and repair of a seaport and industrial complex and related buildings, grounds, wharves, aprons and equipment.

Thorough knowledge of the principles, practices, methods and techniques of the building, grounds keeping, housekeeping and mechanical trades.

Thorough knowledge of the principles and practices of engineering, excavation, pilings, grading and utilization of related heavy equipment.

Considerable knowledge of local building codes as related to seaport facilities.

Ability to plan, assign, coordinate and direct the work of a large staff of technical, trades, custodial, labor and clerical personnel engaged in a variety of tasks in a manner conducive to full performance and high morale.

Ability to prepare requisitions and specifications for various types of building materials and mobile equipment and to devise modifications to equipment to meet specific work problems.

Ability to read and interpret engineering plans and specifications.

Ability to plan work schedules for maintenance and minor construction projects.

Ability to prepare comprehensive reports.

Ability to estimate time, labor, equipment and material costs for specific projects.

NEW/07/10/2007

#### **Nature Of Work**

This is technical and supervisory work in the maintenance of electrical, air conditioning and water systems at the county seaport.

### Chief, Seaport Construction Management Services (001456)

#### Minimum Qualifications

Bachelor's degree in Engineering, Construction Engineering, Construction Management or a related field. A minimum of four to eight years of experience in the design, construction or management of capital construction or improvement projects, to include supervisory experience is required. A State of Florida Professional Engineer license, State of Florida Registered Architect license, Miami-Dade County or State of Florida General Contractor's certificate, Miami-Dade County or State of Florida General Building Contractor certificate, or Miami-Dade County or State of Florida General Engineering Contractor certificate, a Certificate of Eligibility in General Building or General Engineering may substitute for the required education.

Applicants qualifying for employment with the Miami-Dade Seaport Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. All employees of Miami-Dade Seaport Department who work in secure unescorted access areas are required by federal law to have a Transportation Worker Identification Credential (TWIC) Card. #### Job Specifications

##### NATURE OF WORK

This is highly responsible professional and supervisory civil engineering work in planning and directing activities of the Construction Management Division for the Seaport Department.

An employee in this class is responsible for supervising the management of seaport construction projects. Responsibilities include coordinating numerous projects in various phases of development; monitoring work to assure that construction proceeds in accordance with plans, specifications and schedules; supervising the preparation of estimates for contractor progress payments; resolving construction problems encountered in the field; and negotiating and preparing change orders to contracts. The incumbent exercises extensive independent judgment and technical expertise in the application of the principles and practices of architecture and engineering to the management of seaport construction projects. Supervision is exercised through subordinate supervisors over employees engaged in field inspection activities or serving in various support capacities. General direction is received from an Assistant Department Director who holds the incumbent responsible for the effective management of seaport construction projects and achievement of related divisional goals and objectives.

##### ILLUSTRATIVE TASKS

Manages and coordinates all phases of seaport construction projects from award to general contractor through completion and placement of project in service; prepares weekly reports on status of projects.

Plans, coordinates and directs the work of construction inspectors conducting field inspections for seaport facility construction being performed by general contractors.

Monitors the activities of construction inspection supervisors to assure that construction is performed in accordance with engineering plans and specifications, applicable building codes, and County rules and regulations.

Monitors the construction inspection supervisors who schedule and conduct pre-bid and pre-construction conferences.

Monitors the preparation of estimates for contractor progress payments; reviews and approves monthly construction pay requests; maintains active records of project's financial status.

Conducts meetings with contractors, consultants and applicable departmental officials to resolve field construction problems; responds to all contractors' Request for Information (RFIs).

### **Chief, Seaport Construction Management Services (001456)**

Monitors and supervises the negotiation and preparation of change orders submitted by contractors; provides all necessary close out documents.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### **KNOWLEDGES, SKILLS AND ABILITIES**

Extensive knowledge of the theories, principles and practices of construction management, architecture and civil engineering.

Extensive knowledge of the design characteristics of seaport facilities.

Extensive knowledge of building materials, methods and construction systems.

Thorough knowledge of building codes and regulations pertaining to the construction of seaport facilities.

Thorough knowledge of the contracts, records, forms, reports and procedures applicable to seaport construction projects.

Considerable knowledge of supervisory principles and practices.

Ability to plan, organize and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to direct and coordinate the detailed technical inspection of seaport construction projects in various phases of development.

Ability to understand and interpret complex architectural and engineering plans and specifications related to complex civil engineering construction projects.

Ability to assure that complex construction projects are completed in accordance with plans and specifications and applicable building regulations.

Ability to simultaneously manage several complex construction projects in various phases of development.

Ability to establish and maintain effective working relationships with subordinates, superiors and officials of other public and private organizations.

Ability to exercise judgment and discretion in devising and installing policies and procedures for administration of seaport construction projects.

Ability to communicate clearly and concisely, verbally and in writing.

### Flood Plain Construction Inspector (001510)

#### Minimum Qualifications

Bachelor's degree in Engineering, Architecture, Construction Management, or related field; or possess a Miami-Dade County General Contractor license and one year of engineering plans review, construction management, or related experience are required. Additional experience may substitute for required education or licensure on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the inspection of building construction within flood hazard districts.

An employee in this class is responsible for inspecting building construction in coastal areas of the county, preparing damage assessments and evaluation reports, and reviewing building permit applications for new construction and repairs in flood hazard areas. Responsibilities include conducting field inspections, assisting in administration of building code requirements for development in coastal areas, and assisting in the review of requests for variances and in preparation of cases appealed to the Environmental Quality Control Board. Supervision is received from an administrative superior who reviews work for technical competence and conformance with established departmental policies, procedures and regulations.

##### ILLUSTRATIVE TASKS

Conducts interviews with homeowners and contractors and performs field inspections of damaged structures within flood hazard districts; examines all aspects of structures from roof to foundation; prepares inspection reports concerning compliance with Substantial Damage and Substantial Improvement sections of the South Florida Building Code.

Assists in assuring compliance with local, state and federal regulations requiring areas vulnerable to flooding be protected against flood damage at the time of initial construction or when substantial improvement is needed.

Assists in the administration of building code requirements for development in flood hazard areas; reviews building permit applications for new construction and repairs in coastal areas to assure proposed construction is protected against flood damage, anchored to prevent floatation, collapse or lateral movement, and that construction materials and utility equipment are resistant to flood damage.

Coordinates work and maintains contacts with local environmental and building administrators, federal emergency management officials and the County Attorney's Office.

Maintains knowledge of Dade County Flood Criteria Maps, flood insurance rate maps and flood insurance studies prepared by federal agencies.

Assists in the preparation of reports concerning individual requests for variances from building code regulations applicable to development within flood hazard districts.

Assists in the preparation of cases appealed to the Environmental Quality Control Board; provides testimony as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of provisions of the South Florida Building Code pertaining to building construction.

Considerable knowledge of Substantial Damage and Substantial Improvements sections of the South Florida Building Code related to building construction in coastal areas of Dade County.

Considerable knowledge of general building construction methods, techniques, processes and procedures.

Considerable knowledge of building construction plans and blueprints.

Knowledge of Dade County Flood Criteria Maps, flood insurance rating maps and current flood insurance studies.

Knowledge of public relations principles and techniques.

Ability to perform technical field inspections of building construction to determine compliance with Substantial Damage and Substantial Improvement sections of the South Florida Building Code.

Ability to understand complex structural installations and related fields in the construction industry.

Ability to prepare detailed technical building inspection reports concerning damage assessments and evaluations.

Ability to examine building permit applications for new construction and building repairs for structures in flood hazard areas.

Ability to establish and maintain effective working relationships with superiors, various public and private officials and members of the public.

### Flood Plain Program Supervisor (001511)

#### Minimum Qualifications

Bachelor's degree in Engineering, Architecture, Construction Management or related field, or a current valid General Contractor's license is required. Two years of engineering, plans review, construction management or related experience are required. Additional experience may substitute for required education or licensure on a year- for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and supervisory work in assisting in the management of the Dade County flood plain management program.

Employees in this class are responsible for supervising technical subordinates and performing a variety of administrative duties in the regulation of development within flood hazard areas of unincorporated Dade County. Responsibilities include preparation of recommendations for issuance of variances and waivers from flood plain regulations, preparation of documents for the Environmental Quality Control Board, review of flood plain construction and development plans, negotiation of alternatives to proposed projects to minimize flood damages, and assistance in preparation of the application for the federal Community Rating System. Supervision is exercised over technical subordinates engaged in reviewing plans for development and construction within the flood plain. Supervision is received from an administrative superior who reviews work for effective assistance in flood plain program administration.

##### ILLUSTRATIVE TASKS

- Supervises and direct technical subordinates in the review of plans for development and construction in flood plain areas.

- Prepares written recommendations concerning issuance of variances and waivers from flood plain regulations; prepares recommendations to the Environmental Quality Control Board if decisions are appealed.

- Gathers background information and meets with applicants, engineers and architects to encourage voluntary compliance with program.

- Provides interpretations of regulations and assists in negotiating alternative construction methods and practices to minimize flood damages.

- Coordinates and prepares written documents for submittal of the application for the federal Community Rating System program.

- Provides technical support to staff of the Stormwater Utility Program; conducts special projects in support of the Stormwater Utility Master Plan.

- Reviews and makes recommendations for enforcement action in cases of non-compliance with the South Florida Building Code.

- Organizes workshops to promote flood protection techniques and the flood management program for Dade County.

- Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Thorough knowledge of provisions of the South Florida Building Code pertaining to flood plain construction and development.

- Thorough knowledge of general building construction methods, techniques, processes and procedures.

- Considerable knowledge of the theories, principles and practices of civil engineering.

- Considerable knowledge of justifications for the issuance of waivers and variances from flood plain construction regulations.

- Considerable knowledge of the procedures for preparation of cases appealed to the Environmental Quality Control Board.

- Knowledge of supervisory principles and practices.

- Ability to provide effective assistance in the management of various aspects of the Dade County flood plain management program.

- Ability to interpret and apply complex flood plain construction and development regulations to proposed flood plain development projects.

- Ability to negotiate alternative construction methods and practices to assure compliance with flood plain development regulations.

- Ability to supervise subordinates in a manner conducive to full performance and high morale.

- Ability to coordinate flood plain management with officials of other County departments and agencies and with state and federal officials.

- Ability to establish and maintain effective working relationships with subordinates, superiors, private architects and engineers and the public.

#### **Nature Of Work**

### Hydrogeologist 1 (001520)

#### Minimum Qualifications

Bachelor's degree in Geology, Chemistry, Hydrogeology, Biology or related field.

#### Job Specifications

##### NATURE OF WORK

This is professional geo-hydrological work in the conservation and management of water resources in an environmental resource management program.

Employees in this class are responsible for the conduct of hydrologic investigations and participation in technical studies related to water resources management. Duties include the qualitative and quantitative analysis of water samples, identification of pollutants constituting present or potential hazards to water resources and preparation of analytical reports of field surveys and laboratory findings. Incumbents apply advanced knowledge of scientific and analytical principles and exercise some independent judgment in completing assigned tasks. Supervision is received from a professional superior who assigns work, reviews field and laboratory data and assists with unusual or difficult analyses.

##### ILLUSTRATIVE TASKS

Performs chemical and physical analyses of water samples using qualitative and quantitative procedures; determines water quality characteristics including source of nutrients and presence of pollutants; prepares laboratory reports of results and findings.

Participates in qualitative and quantitative investigations in specialized fields such as mathematical modeling, geophysics, water quality, marine geology and sedimentology to identify present or potential effluents, pollutants and toxins harmful to water resources.

Conducts field and laboratory analyses to determine geohydrologic factors related to land and subsurface disposal and storage of liquid and solid waste; studies animal and plant life as they affect and are affected by sediment and dissolved materials in natural water.

Participates in studies concerning chemical and physical interactions between the surface and groundwater, the relationship between water quality characteristics and environmental factors, and the effects of natural and induced phenomena on groundwater systems.

Prepares chemical reagents for field studies and laboratory analyses, maintains inventory of laboratory equipment and supplies; maintains sample logs and compiles statistical data.

Assists in the preparation of technical reports concerning comprehensive evaluation studies and field surveys.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the sciences of geology, hydrology and water chemistry including the basic principles and techniques of investigation and analysis.

Knowledge of the methods, techniques and equipment used in the collection, sampling and analysis of geo-hydrological data.

Knowledge of the basic scientific principles and practices in physics, biology, mathematics and physical sciences.

Some knowledge of laboratory controls and sampling theory used in chemical research, experimentation, analysis and synthesis.

Some knowledge of ecological conditions which constitute current or potential environmental hazards affecting groundwater and aquatic systems.

Some knowledge of current trends and research in hydrology and geology.

Ability to apply scientific and technical knowledge with accuracy and professional judgment in the sampling, analysis and reporting of geo-hydrological data.

Ability to evaluate findings from field surveys and laboratory experiments.

Ability to prepare and submit accurate and complete reports of laboratory findings.

Ability to make minor repairs and adjustments to laboratory and field instruments and equipment.

##### NATURE OF WORK

This is advanced professional geo-hydrological work with some supervisory responsibility in the conservation and management of water resources in an environmental resources management program.

Employees in this class are responsible for supervision of technical and professional employees engaged in the conduct of qualitative and quantitative hydrologic investigations and analyses. Emphasis of the work is on supervision of geologic, hydrologic and other technical studies, quantitative determination of interrelations between water quality characteristics and environmental factors, scheduling of laboratory procedures and interpretation of findings. Supervision is exercised through assignment of work, control of field and laboratory procedures and responsibility for reporting field and laboratory findings. General supervision is received from a professional superior who reviews work through conferences, written reports and occasional observation of field and laboratory activities.

##### ILLUSTRATIVE TASKS

Supervises the chemical and physical analyses of water samples to determine water quality characteristics including source of nutrients and presence of pollutants; prepares and reviews detailed technical reports of field surveys and laboratory findings.

Supervises and participates in comprehensive studies in specialized fields such as mathematical modeling, geophysics, water quality, marine geology and sedimentology to identify present or potential effluents, pollutants and toxins harmful to water resources.

Conducts research, experiments and studies concerning the location of freshwater/saltwater interface, effects of canals on groundwater systems, development of aquatic communities, effects of stormwater runoff on water quality, attenuation capabilities of aquifers, preparation of surface and groundwater monitoring networks and related geo-hydrological matters.

Interprets findings of qualitative and quantitative hydrologic studies to determine the long range effects of potential and existing water contamination.

Assists with the implementation of new field and laboratory procedures; devises quality control techniques and calculates standard deviations on sampling and testing procedures.

Compiles various types of water resources data concerning water quality and water levels; requisitions materials and equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the sciences of geology, hydrology and water chemistry including the basic principles and techniques of scientific investigation and analysis.

Considerable knowledge of the methods, techniques and equipment used in the collection, sampling and analysis of geo-hydrological data.

Considerable knowledge of the basic scientific principles and practices in physics, biology, mathematics and physical sciences.

Knowledge of laboratory controls and sampling theory used in chemical research experimentation, analysis and synthesis.

Knowledge of ecological conditions which constitute current or potential environmental hazards affecting groundwater and aquatic systems.

Knowledge of reference sources, current trends and research in hydrology and geology.

Knowledge of supervisory principles and practices.

Ability to apply advanced scientific technical knowledge with accuracy and professional judgment in the analysis, review and reporting of geo-hydrological data.

Ability to conduct research, experiments and studies to determine the long range effects of potential and existing water contamination.

Ability to evaluate findings from difficult field surveys and laboratory experiments.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to prepare and submit accurate and complete reports of comprehensive studies and laboratory findings.

Ability to detect malfunctions in laboratory and field instruments and equipment and make minor repairs.

### Hydrogeologist 2 (001521)

#### **Nature Of Work**

This is advanced professional geo-hydrological work with some supervisory responsibility in the conservation and management of water resources in an environmental resources management program.

#### Job Specifications

##### NATURE OF WORK

This is supervisory geo-hydrological work with administrative responsibility in the conversation and management of water resources in an environmental resource management program.

An employee in this class is responsible for planning, supervising and coordinating qualitative and quantitative investigations in specialized fields such as mathematical modeling, geophysics, water quality, marine geology and sedimentology. Emphasis of the work is on designing and planning comprehensive evaluation studies, coordinating hydrologic activities with other public and private agencies, providing assistance and advice to subordinates and presenting analytical findings to management. Typical assignments are broad in scope with considerable opportunity for exercising independent judgment and making complex decisions. Supervision is exercised over a group of professional, technical and clerical employees through assignment and review of work for accuracy and completion. Supervision is received from an administrative superior who reviews work for achievement of objectives through personal conferences and written reports.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of professional, technical and clerical employees engaged in the chemical and physical analyses of water samples; assists with difficult or unusual problems; provides continuous training in work methods and procedures and in the application of local, state and Federal rules, regulations and laws.

Directs and conducts complex hydrological experiments, investigations, studies and research to identify present or potential effluents, pollutants and toxins harmful to water resources; supervises and participates in the preparation of detailed reports concerning field surveys and laboratory findings.

Evaluates findings of qualitative and quantitative hydrologic studies and makes recommendations concerning the treatment or resolution of water conservation and management problems.

Develops and recommends new field and laboratory procedures and methodologies; recommends changes in existing departmental rules, regulations and policies.

Supervises advanced planning and preparation of surface and groundwater monitoring systems.

Keeps informed on current developments in mathematical modeling, geophysics, water quality, marine geology and sedimentology and Federal, state and local issues concerning conservation and management of water resources.

Attends various meetings to coordinate hydrologic investigative activities with officials of other departments, municipalities and private organizations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; counsels subordinates on job-related problems; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the sciences of geology, hydrology and water chemistry including the principles and techniques of scientific investigation and analysis.

Thorough knowledge of basic scientific principles and practices in physics, biology, mathematics and related physical sciences.

Considerable knowledge of methods, techniques and equipment used in the collective, sampling and analysis of geo-hydrological data.

Considerable knowledge of the current trends in water conservation and management.

Considerable knowledge of laboratory controls and sampling theory used in chemical research, experimentation, analysis and synthesis.

Knowledge of Federal, state, and local laws, rules, regulations and guidelines governing pollution control activities.

Knowledge of supervisory principles and practices.

Ability to supervise a staff of professional, technical and clerical employees in a manner conducive to full performance and high morale.

Ability to plan, conduct and evaluate analyses, experiments, research and studies to determine the long-range effects of existing water

### Hydrogeologist 3 (001522)

contamination.

Ability to evaluate findings from difficult field surveys and laboratory experiments and formulate sound recommendations.

Ability to provide technical training and supervision in the conduct of field investigations and laboratory analyses.

Ability to detect malfunctions in field and laboratory equipment and make necessary adjustments or determine the need for servicing.

Ability to establish and maintain effective working relationships with a variety of public and private officials.

Ability to express ideas clearly and concisely, verbally and in writing.

### Chemist 1 (001525)

#### Minimum Qualifications

Bachelor's degree in Chemistry or a natural science field.

#### Job Specifications

##### NATURE OF WORK

This is beginning level scientific work in performing laboratory analyses for air and water pollution control.

An employee in this class conducts technical laboratory tests and examinations of substances obtained through various environmental sampling techniques. Work is performed in accordance with systematized theory, scientific principles, laboratory techniques and controls to insure accurate and verifiable results. Emphasis of the work is on making scientific identifications of suspected pollutant substances gathered by air and water sampling equipment. Duties occasionally require contact with contaminated, corrosive or toxic materials. Supervision may be exercised over subordinate laboratory technicians who assist with the basic laboratory tests and analytical procedures. A professional superior reviews test results for qualitative findings and assists in procedures where abnormal or difficult analyses are indicated.

##### ILLUSTRATIVE TASKS

Performs physical and chemical tests and analyses of unknown substances by qualitative and quantitative procedures; identifies present or potential pollutant elements and submits findings in laboratory report.

Examines air samples to determine presence of toxic vapors, conducts dust and pollen counts to ascertain concentration levels.

Performs chemical and bacteriological analyses of water samples to determine presence of effluents, pollutants and various toxins harmful to plants, animals and humans.

Conducts gravimetric and colorimetric analyses; performs quantitative and qualitative gas chromatographic evaluation.

Determines chemical and physical composition and properties of compounds utilizing spectroscopy and spectrophotometry; identifies unknown elements by observing and recording characteristic spectra.

Ascertains relationships between molecular structures and chemical and physical properties to aid in analyses of unknown compounds.

Prepares chemical reagents for field studies and laboratory analyses, maintains inventory of laboratory equipment and supplies, maintains sample logs and compiles statistical data.

Prepares and submits written analytical reports of laboratory findings and recommends repetition of testing and corrective action in abnormal findings.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the science of chemistry including the principles, methods and techniques of analyzing the composition of substances.

Knowledge of laboratory procedures used in the performance of chemical chromatographic atomic absorption and colorimetric analyses.

Knowledge of the basic scientific principles and practices in physics, biology, mathematics and physical sciences.

Some knowledge of modern equipment and scientific instruments used in air and water pollution control.

Some knowledge of the basic investigative techniques, laboratory controls and sampling theory used in chemical research, experimentation, analysis and synthesis.

Ability to apply scientific and technical knowledge with accuracy and professional judgment in the completion of laboratory tests and examinations.

Ability to evaluate test results in terms of laboratory controls and methods.

Ability to prepare and submit accurate and complete reports of laboratory findings.

Ability to make minor repairs and adjustments to laboratory and field instruments and equipment.

Skill in laboratory manipulative techniques.

##### NATURE OF WORK

This is advanced scientific work with supervisory responsibility in laboratory analysis for air and water pollution investigation and code enforcement.

Employees in this class are responsible for the technical supervision of trained chemists and subordinate laboratory assistants engaged in conducting qualitative and quantitative laboratory examinations by means of chemical, physical and instrument analysis. Emphasis of the work is on scheduling laboratory procedures, insuring accuracy of tests and interpreting results in terms of total environmental investigation and recommendation. Incumbents are required to perform the more complex analyses of organic and inorganic compounds often involving experimentation and use of specialized techniques of analysis and synthesis. Work requires the application of scientific theory, and knowledge of specialized laboratory procedures used in studying the characteristics of air and water pollutants. Supervision is exercised over subordinate laboratory staff through assignment of work and administrative control of analytical procedures to insure accurate and complete reporting of test results. General supervision is received from the chief chemist who reviews work through conference, written reports and occasional observation of laboratory procedures.

##### ILLUSTRATIVE TASKS

Supervises the conduct of chemical and physical tests and analyses of unknown substances through gravimetric, spectrographic, colorimetric and chromatographic atomic absorption laboratory techniques.

Reviews and participates in chemical, physical and biological studies of air and water samples to determine the presence of effluents, toxins and pollutant substances.

Conducts independent research experiments and comprehensive evaluation studies to determine the long range effects of potential and existing air and water contamination.

Develops new and improved laboratory procedures and chemical agents to rectify and control the release of harmful elements into the air and water environment.

Trains and supervises professional chemists and laboratory assistants in air and water pollution control methodology; devises quality control techniques and calculates standard deviations on sampling and testing procedures.

Prepares and submits detailed reports of laboratory activities; requisitions materials and equipment and recommends new procedures to improve efficiency and economy.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the science of chemistry including the principles, methods and techniques of analyzing the composition of substances.

Considerable knowledge of the basic scientific principles and theories of physics, biology, mathematics and related physical sciences.

Considerable knowledge of the principles and procedures of laboratory chemical analysis.

Knowledge of modern equipment and scientific instruments used in air and water pollution control.

Knowledge of quality control procedures, sampling and statistical techniques used in determining reliability and validity.

Knowledge of reference sources, current trends and recent research in air and water pollution control.

Ability to plan, assign and supervise the work of professionals and subordinate technicians in a manner conducive to full performance and high morale.

Ability to apply scientific and technical knowledge with accuracy and judgment in the review of laboratory procedures.

Ability to train subordinate technical staff in the specialized laboratory techniques of air and water pollution investigation.

Ability to detect malfunctions in laboratory equipment and to make the necessary adjustments or determine the need for maintenance service.

Skill in laboratory manipulative techniques.

#### NATURE OF WORK

This is supervisory scientific work with administrative responsibility in laboratory analysis of air and water samples in an environmental resources management program.

Employees in this class are responsible for supervision of subordinate professional and technical employees engaged in conducting qualitative and quantitative biological, chemical and physical analyses. Emphasis of the work is on developing and implementing laboratory methods and procedures, providing assistance and advice to subordinates and presenting analytical findings and results to management. Additional responsibilities include contact with data processing professionals to develop and implement approved recommendations involving computerized systems. Supervision is exercised over subordinate professional and technical staff through assignment and review of work and for adherence to departmental standards and policies. Supervision is received from a professional superior who reviews work for achievement of objectives through personal conferences and written reports.

#### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of professional and technical employees engaged in the qualitative and quantitative analysis of air and water samples; assists with difficult or unusual problems; provides training in work methods and procedures, and in the application of local, state and Federal rules, regulations and laws.

Directs and conducts complex chemical, physical and biological experiments, investigations, studies and research to determine the presence of effluents, toxins and pollutants in the environment; supervises and participates in the preparation of detailed reports concerning laboratory activities and findings.

Develops and implements new analytical procedures and methodologies, standard operational procedures, preventive maintenance schedules and quality control procedures; recommends changes in existing departmental rules, regulations and policies.

Keeps informed on current developments in gas chromatography/mass spectrometry, analytical instrumental and environmental chemistry, and issues concerning environmental protection.

Attends meetings and conferences to provide training and consultations to officials of departments, municipalities and other organizations concerning pollution control activities and legislative developments.

Prepares preliminary budget estimates and documents; authorizes requisitions for materials; conducts feasibility studies and recommends purchase of specialized equipment.

Coordinates preventive maintenance and repairs to equipment.

Makes recommendations regarding hiring, discipline and promotion of subordinates; counsels subordinates on job-related problems; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the science of Chemistry including methods, principles and procedures of laboratory chemical analysis.

Thorough knowledge of the scientific principles and theories of physics, biology, mathematics and related physical sciences.

Considerable knowledge of the current trends in air and water pollution control research.

Considerable knowledge of the operation and maintenance of laboratory equipment and instruments.

Considerable knowledge of quality control procedures, sampling and statistical techniques used in determining reliability and validity.

Considerable knowledge of Federal, state and local laws, rules, regulations and guidelines governing pollution control activities.

Knowledge of supervisory principles and practices.

Ability to supervise a staff of professional and technical employees in a manner conducive to full performance and high morale.

Ability to plan, conduct and evaluate analyses, experiments, research and studies of the long-range effects of potential and existing air and water contamination.

Ability to apply scientific and technical knowledge with accuracy and judgment in developing and implementing analytical, operational and

#### Job Specifications

##### NATURE OF WORK

This is paraprofessional work in the management of coastal zone and other biological resources.

Employees in this class assist environmental professionals in various phases of resource restoration or regulatory programs, including beach restoration and monitoring, Biscayne Bay restoration and enhancement, artificial reef construction, wildlife protection, and coastal, wetland and tree permitting programs. Duties include assisting with beach surveys, water quality sampling, biological assessment of shoreline submerged habitats, preparation of routine permitting documents, maintenance of technical equipment and boats, recordkeeping, filing and other clerical functions. Employees exercise some knowledge of biological principles, methods and procedures, and computerization related to marine, wetland or forest environments. Supervision is received from an environmental professional who reviews work for satisfactory completion of assigned tasks.

##### ILLUSTRATIVE TASKS

Under supervision of professional biologists, assists in monitoring and assessment of reef and seagrass habitats, using scuba-diving techniques.

Assists in collection of data on endangered species, such as manatees or sea turtles, or other wildlife including sitings and habitats assessments.

Assists in collection of water quality samples using appropriate field meters or scientific equipment; delivers samples to laboratory; assembles and prepares supplies, meters, sample bottles.

Compiles routine monitoring and permitting data and enters into established computer data bases.

Makes on-site inspections for on-going restoration projects and routine permit applications; prepares memo-form reports on inspections.

Compiles support materials such as aerials, plat maps, surveys and records necessary for the development of restoration projects and permit applications.

Performs routine maintenance of field equipment, diving equipment, and boats.

Maintains a technical library.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the science of Biology in the area of assignment.

Knowledge of scuba-diving techniques and practices.

Knowledge of technical sampling equipment.

Knowledge of computer data bases applicable to biological services.

Knowledge of South Florida ecosystems and their functions and values.

Ability to assist professionals in monitoring and assessment of biological systems, data collection, and collection of field samples.

Ability to use scuba-diving equipment safely, to a depth of 100 feet.

Ability to operate technical sampling equipment.

Ability to prepare and submit accurate and complete records and reports.

Ability to carry out field and laboratory assignments in accordance with standardized procedures.

##### NATURE OF WORK

This is professional biology work in the conservation and management of terrestrial and aquatic biological resources.

Employees in this class are engaged in biological investigations and analytical work in one or more phases of an environmental resources program which includes pollution control, water management, environmental planning and special studies. Incumbents typically investigate public complaints, conduct field investigations and conduct tests for violation of county pollution control ordinances. Duties include field sampling, laboratory analysis and reporting of various ecological conditions constituting current or potential environmental hazards.

Employees exercise knowledge of biological principles, methods, techniques and procedures applicable in the areas of assignment. Work is performed in accordance with standardized field and laboratory methods and techniques with limited judgment exercised in recognizing abnormal test results. Supervision is received from a professional superior who assigns work, reviews field and laboratory data and assists in analyses and code interpretations.

##### ILLUSTRATIVE TASKS

Collects and prepares biological samples for qualitative and quantitative analyses, using biological sampling equipment.

Identifies organisms and broadly classifies them; assists in the rearing and culturing of organisms for laboratory experimentation and sets up less difficult experiments to determine the effects of pollutants upon these organisms, as assigned.

Performs related chemical analyses, including conductivity, pH, alkalinity, hardness and dissolved oxygen as needed for field surveys.

Makes on-site inspections of proposed dredge and fill projects.

Conducts field inspections during coastal construction, dredge and fill projects to insure compliance with permit limitations and protection of biological resources.

Keeps detailed records involving descriptions of field surveys and laboratory experiments; prepares reports from records and prepares preliminary valuations of the results and findings obtained.

Assists in long range research and comprehensive evaluation studies as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the science of biology in the areas of assignment including basic principles and techniques of biological investigation and analysis.

Knowledge of standardized methods, techniques and equipment used in biology collection, sampling and laboratory analysis.

Knowledge of county ordinances relating to pollution control.

Some knowledge of community ecology.

Some knowledge of ecological conditions which constitute current or potential environmental hazards.

Some knowledge of current trends and research in terrestrial and aquatic biology.

Ability to apply scientific knowledge in biological sampling, laboratory analysis and reporting of ecological conditions.

Ability to carry out field and laboratory assignments in accord with standardized procedures.

Ability to identify and classify organisms in the scientific areas of assignment.

Ability to evaluate findings from field surveys and laboratory experiments.

##### NATURE OF WORK

This is advanced professional biology work with some supervisory responsibility in the conservation and management of terrestrial and aquatic biological resources.

Employees in this class are typically responsible for direct professional supervision of biologists and technical personnel engaged in conducting qualitative and quantitative biological investigations, using field and laboratory analyses. Supervision is exercised through assignment of work, control of field and laboratory procedures, and responsibility for reporting of investigative results. Incumbents are required to assist in species identification, community structure analyses and ecosystem modeling, and conduct research or evaluation studies as assigned. Emphasis is on study of the life history, habits, classification and economic relationships of organisms as well as investigations involving the quantitative determination of interrelations between species and the effects of natural and manmade changes of the environment on their survival and growth. General supervision is received from a professional superior who reviews work through conferences, written reports and occasional observation of field and laboratory procedures.

##### ILLUSTRATIVE TASKS

Supervises biological field investigations and laboratory analysis of biological samples for identification, standing crop and diversity of species present.

Conducts research, experiments and comprehensive evaluation studies to determine the long range effects of existing and potential air and water contamination on biological communities.

Conducts microbiological investigations to determine the microflora found in potable water supply systems and their effect on human health and the pollutant attenuating effect of local soil and associated soil microorganisms.

Trains and supervises biology technicians in biological methods; assists in developing quality control techniques, and analyzes sampling and testing procedures.

Reviews and analyzes coastal construction, dredge and fill permit applications and plans.

Prepares and submits detailed reports of biological field and laboratory activities.

Performs related work as required.

##### NATURE OF WORK

This is technical field and office work inspecting and testing in an air and water pollution control program.

An employee in this class investigates public complaints, conducts surveys and tests for violations of the metropolitan pollution control ordinances. Work involves responsibility for field sampling, laboratory analysis and reporting of various atmospheric and water conditions constituting current or potential environmental sanitation hazards. Work is performed in accordance with standardized field and laboratory methods and techniques with some independent judgment exercised in recognizing abnormal test results. Technical supervision is received from a professional engineering superior who assigns work, reviews test findings and assists in complex analyses and code interpretations.

##### ILLUSTRATIVE TASKS

Investigates public complaints on air or water pollution and related sanitation hazards within the scope of the metropolitan pollution control ordinance; takes photographs, records environmental conditions relative to humidity, vapor, odor, dust, toxins, effluents and varied pollutants.

Installs, operates and maintains field test equipment such as high volume air samplers, dust fall samplers, manual gas sampling kits, dust collecting slides and similar ambient air and stack sampling apparatus; records tests results and notes effects on plant and animal life.

Prepares solutions and reagents for chemical and physical tests of air and water samples in the laboratory; records and calculates field and laboratory data, including meteorologic conditions, and assists in cumulative compilations and analyses.

Serves complaint on code violators, collects pertinent information, prepares reports and testifies in court as required.

Assists with the installation and inspection of air pollution abatement equipment; investigates requests to burn refuse and recommends proper controls.

Assists in the explanation of the metropolitan pollution control ordinance to industrial and government officials; advises on corrective action and reports findings to an engineering superior.

Maintains inspection records for area of assignment; submits narrative and statistical reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of chemistry, physics and biology as pertains to air and water pollution.

Knowledge of the apparatus and techniques used in field testing for pollutants and industrial effluents.

Knowledge of the basic laboratory solutions, cultures, reagents and the standard measuring apparatus used in the quantitative and qualitative analyses of atmospheric and water substances.

Knowledge of the metropolitan pollution control ordinance including applicability, inspection and enforcement.

Ability to enforce the code with tact and impartiality.

### **Pollution Control Inspector 1 (001534)**

Ability to evaluate laboratory test results with accuracy and judgment.

Ability to keep records and prepare narrative and statistical reports.

Ability to express ideas clearly and concisely, orally and in writing.

Skill in the use of mechanical measuring devices.

NEW 10-66

#### **Nature Of Work**

This is technical field and office work inspecting and testing in an air and water pollution control program.

### Pollution Control Inspector 2 (001535)

#### Minimum Qualifications

Bachelor's degree in Biology, Chemistry, Geology, Civil Engineering, Mechanical Engineering, Chemical Engineering, Environmental Engineering, or related natural science and one year of experience investigating or analyzing pollution and/or environmental problems and developing solutions are required; or one year of experience as a Pollution Control Inspector 1 with Miami-Dade County is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is technical supervisory work in the inspection, testing and enforcement of an air and water pollution control ordinance.

Employees in this class coordinate and supervise the investigation of public complaints, conduct surveys and sampling procedures and assist industrial representatives in complying with the prescribed environmental sanitary standards. Work involves the implementation of systematic area wide inspections to determine the presence of potential or existing sources of air and water contamination. Duties require the use of considerable independent judgment in interpreting the need for intensive and more detailed examination of environmental effluents. Supervision is exercised over a staff of field inspectors by assignment and review of completed tests and by providing technical assistance in unusual or difficult investigations. Supervision is received from an enforcement administrator who reviews work for thoroughness and the satisfactory completion of the assigned field tests and inspections.

##### ILLUSTRATIVE TASKS

Coordinates and supervises field inspections for possible violations of the metropolitan pollution control ordinance; reviews and analyzes test results and environmental samples of humidity, vapor, odor, dust, toxins, effluents and various atmospheric and water carried waste products.

Maintains comprehensive environmental sampling profile records utilizing tests results from high volume air samplers, dust fall samplers, manual gas sampling kits, dust collection slides and similar ambient air and stack sampling apparatus.

Confers with code violators, explains corrective action necessary for voluntary compliance and assists with information on various types of abatement systems.

Personally conducts inspection of complex industrial structures, sets up reinspection schedules and special laboratory tests to be administered in compiling cumulative data on emission of waste products.

Authorizes requests for open burning, establishes control conditions and collaborates with other environmental health authorities to assist with planning for incineration of waste materials.

Prepares and assembles all inspection reports and correspondence necessary for appeal board proceedings and court action.

Maintains activity records and submits reports reflecting workload, citations issued, voluntary compliance and related enforcement data.

Trains and assists subordinate inspectors, evaluates performance and recommends equipment and supplies necessary to carry out field work.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of chemistry, physics and biology as pertains to air and water pollution.

Considerable knowledge of the apparatus and techniques used in field testing for pollution and industrial effluents.

Considerable knowledge of the metropolitan pollution control ordinance including applicability, inspection and enforcement.

Knowledge of the basic laboratory solutions, cultures, reagents and the standard measuring apparatus used in the quantitative and qualitative analyses of atmospheric and water substances.

Knowledge of basic sanitary engineering techniques and procedures used in controlling industrial waste emission.

Ability to plan and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to deal with the public tactfully and to provide information and technical assistance as requested.

Ability to enforce the code with tact and impartiality.

Ability to evaluate laboratory tests results with accuracy and judgment.

Ability to assemble and submit concise reports of field investigations and enforcement activities.

Ability to express ideas clearly and concisely, orally and in writing.

Skill in the use of mechanical measuring devices.

### Pollution Control Inspector 2 (001535)

NEW 1-68

#### **Nature Of Work**

This is technical supervisory work in the inspection, testing and enforcement of an air and water pollution control ordinance.

### Pollution Control Plan Reviewer (001538)

#### Minimum Qualifications

Bachelor's degree in Engineering, Architecture, Land Surveying, Construction Management, Environmental Science or related field; or Completion of 60 semester credits to include 12 semester credits in Engineering, Architecture, Construction Management, Land Surveying, Environmental Science or related field. Two years of experience in engineering drafting, surveying, or plans review are required. Additional experience in engineering drafting, surveying or plans review may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work with supervisory responsibility in the review of construction plans for compliance with pollution control regulations.

Employees in this class are responsible for reviewing and approving subdivision plans and individual construction plans concerning water supply, sewage disposal facilities and other possible pollution sources as required by various codes and regulations. Responsibilities include supervising and coordinating the work of technical subordinates, reviewing plans of large and diversified construction projects, and reviewing a variety of requests to assure compliance with local laws, rules and regulations. Incumbents apply significant knowledge of civil engineering principles and exercise independent judgment in the performance of assigned duties. Supervision is exercised over a staff of technical subordinates through assignment of work, provision of advice and assistance, and review upon completion. Supervision is received from a professional superior who reviews work for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Supervises and coordinates the work of a staff of subordinate plan review employees engaged in reviewing and analyzing a variety of subdivision and building plans for compliance with local laws, rules and regulations.

Participates in all phases of the plan review process including the review of subdivision plats, building plans, requests to the Zoning Appeals Board and the Developmental Impact Committee, and Certificates of Occupancy.

Assists in the preparation of documents and exhibits required for appeals to the Environmental Quality Control Board and assists in the review and processing of legal documents required by county legal authorities.

Assists and advises the public on the preparation of legal documents such as estoppel letters and covenants; informs the public on proper procedures for the expeditious processing of submittals.

Prepares responses to public inquiries.

Attends Plat Committee meetings to provide recommendations on Tentative Plats and Waiver of Plats in process of consideration.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of local pollution control codes, rules and regulations pertaining to new construction particularly concerning sanitary disposal facilities.

Considerable knowledge of the principles and practices of civil engineering.

Considerable knowledge of the county construction plan review process.

Knowledge of supervisory principles and practices.

Knowledge of public relations principles and techniques.

Knowledge of supervisory principles.

Knowledge of mathematics as applied to construction plans review work.

Ability to review construction plans and a variety of related requests for compliance with local pollution control codes, rules and regulations.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to express ideas clearly and concisely verbally and in writing.

Ability to develop effective recommendations concerning compliance with local pollution control laws.

Ability to deal tactfully and persuasively with a variety of public and private officials.

Ability to perform mathematical calculations quickly and accurately.

### Environmental Code Enforcement Officer 1 (001547)

#### Minimum Qualifications

Bachelor's degree in Engineering, Environmental Science, Physical Science or related field. One year of enforcement or inspection experience in an environmental or law enforcement is required. Must present a Driver license during the interview selection process.

#### Job Specifications

##### NATURE OF WORK

This is administrative work in the enforcement of regulatory ordinances in an environmental resource management program. Employees in this class are responsible for supervising and participating in the preparation of environmental cases for judicial review. Responsibilities include assisting in the coordination and preparation of legal cases for processing through the civil and criminal court systems. Duties include supervising clerical subordinates and preparing status letters concerning the department's involvement at specific sites pursuant to requests of legal cases. Supervision is received from an administrative superior who reviews work through personal conferences for effective support in the enforcement of environmental regulatory ordinances.

##### ILLUSTRATIVE TASKS

Prepares case files for the filing of civil lawsuits, criminal complaints and administrative consent agreements; prepares case summaries based on review of the file, title and document searches.

Prepares administrative and laboratory cost calculations for enforcement cases; administers collection of penalties and administrative costs.

Coordinates and drafts environmental review letters based on data collected from various operating sections of the department.

Supervises clerical employees engaged in obtaining corporate and ownership information and updating the case tracking program.

Coordinates enforcement follow-up of Environmental Quality Control Board orders and "Covenants Running With The Land" through department inspections and engineering staff.

Prepares and administers Consent Agreements pursuant to Civil Violation Notices issued by the department.

Performs emergency inspections for civil lawsuits, criminal complaints and consent agreements.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of legal procedures in the preparation of environmental cases for judicial review.

Considerable knowledge of ordinances and regulations pertaining to air and water pollution control.

Knowledge of basic scientific principles and practices in physics, biology, mathematics and physical sciences.

Knowledge of supervisory principles and practices.

Ability to assist in the preparation of legal cases for processing through civil and criminal court systems.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to coordinate work with other departmental work units.

Ability to prepare cost estimates and administer their collection.

Ability to communicate clearly and concisely, verbally and in writing.

#### NATURE OF WORK

This is administrative and supervisory work in the enforcement of regulatory ordinances in an environmental resource management program. Employees in this class are responsible for supervising and participating in the investigation and preparation of environmental cases for administrative and judicial review. Responsibilities include gathering evidence against alleged code violators, meeting with code violators to encourage voluntary compliance, preparing and following up on administrative consent agreements and testifying in court as an expert witness. Independent judgment is exercised in the interpretation of regulations and enforcement of ordinances. Supervision is exercised over a staff of subordinates through assignment and review of work for compliance with established policies and procedures. Supervision is received from an administrative superior who reviews work for effectiveness of enforcement and assists with difficult or unusual investigations.

#### ILLUSTRATIVE TASKS

Supervises and participates in the investigation of public complaints pertaining to air and water pollution; inspects pollution sources and determines the nature and extent of code violations; performs surveillance to gather evidence against alleged code violators. Meets with code violators to resolve non-compliance conditions on a voluntary basis; prepares administrative consent agreements; monitors the activities of code violators to ensure compliance with terms of voluntary consent agreements. Reviews enforcement cases for completeness of evidence; extracts evidential materials from various files and records; confers with witnesses to prepare statements of testimony. Issues warnings and citations to code violators; attends administrative hearings for code violators who fail to comply with established procedures; prepares court documents and testifies as an expert witness. Provides information to the general public, commercial establishments and other governmental agencies concerning the metropolitan pollution control ordinance.

Coordinates activities with outside agencies to provide for comprehensive enforcement in cases involving multiple jurisdictions. Trains department employees concerning the legal requirements for gathering and documenting evidence. Prepares, maintains and submits a variety of narrative and statistical reports; completes various forms, schedules and correspondence. Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employees performance. Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the ordinances, rules and regulations pertaining to air and water pollution control.  
Considerable knowledge of the legal procedures related to the enforcement of environmental safety standards.  
Considerable knowledge of investigative and surveillance procedures used in the enforcement of local ordinances.  
Considerable knowledge of the basic scientific principles and practices in physics, biology, mathematics and physical sciences.  
Considerable knowledge of the methods, techniques and equipment used in the collection, sampling and analysis of atmospheric and water substances.  
Knowledge of supervisory principles and practices.  
Ability to supervise subordinates in a manner conducive to full performance and high morale.  
Ability to enforce provisions of local ordinances with firmness, tact and impartiality.  
Ability to interpret and apply provisions of the environmental pollution control ordinances and regulations.  
Ability to ascertain facts through the application of investigative and surveillance techniques.  
Ability to apply scientific technical knowledge with accuracy and professional judgment in the collection, sampling and analysis of environmental data.  
Ability to prepare accurate and complete reports of investigative findings.

##### NATURE OF WORK

This is advanced professional, administrative and supervisory work in the management of environmental programs for the Department of Environmental Resources Management.

Employees in this class are responsible for supervising and implementing complex environmental resource projects in accordance with established procedures and regulations. Responsibilities may include supervising technical field activities, administering contracts and professional service agreements, developing educational and training programs, drafting ordinances and regulations, administering grants, and supervising and participating in complex environmental studies. Duties vary widely depending upon area of assignment and may be related to environmental planning, pollution prevention or remediation, enforcement, natural resources management or other areas. Incumbents exercise considerable independent judgment in managing programmatic and fiscal aspects of environmental resource projects and programs. Supervision may be exercised over professional, technical and clerical subordinates assisting in various phases of program activities. Supervision is received from a professional superior who reviews work through personal conferences and written reports for effective project management and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate field inspectors, engineers, plans reviewers, engineering technicians, hydrogeologists, biologists and/or other professional or technical employees assisting in project management field or office operations.

Manages grant-funded projects and ensures that programs and procedures are consistent with local, state and federal regulations; develops grant objectives based on analysis of existing problems, designs work programs, and develops and administers project budgets.

Supervises and participates in studies related to land use, wellfield protection, hazardous materials, biological resources, air pollution, bay restoration and enhancement, water conservation, stormwater management, industrial and agricultural waste management, environmental permitting, program compliance and enforcement, water and wastewater treatment facilities or other areas.

Manages contracts and professional service agreements; prepares technical specifications for bid proposals, reviews work orders and purchase requests, monitors contractors' performance, authorizes payments, and ensures work is completed in accordance with contract requirements.

Prepares and reviews reports for submission to local, state and federal agencies.

Participates in agency and interagency committee meetings; coordinates project activities with other local, state and federal agencies.

Organizes and implements educational workshops and seminars; develops and distributes educational and technical information.

Coordinates a variety of construction and operating permit application reviews.

Coordinates projects and programs for the assessment and clean-up of various contaminated sites throughout Dade County.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the theories, principles and practices of environmental science.

Thorough knowledge of scientific research, analytical methods, statistical methods and scientific analysis.

Thorough knowledge of local, state and federal environmental regulations pertaining to the area of assignment.

Thorough knowledge of the goals and objectives of the environmental program of assignment.

Considerable knowledge of local, state and federal agencies concerned with environmental compliance, regulations and policies.

Considerable knowledge of supervisory principles and practices.

##### NATURE OF WORK

This is advanced responsible professional work with supervisory responsibility in environmental code coordination for the Department of Environmental Resources Management.

An employee in this class is responsible for the review and analysis of hearing applications before the Environmental Quality Control Board and other environmental boards and committees. Responsibilities include supervising the review of hearing applications, filing of all materials for hearings, determining variances required from provisions of environmental codes, preparation of materials to be presented at public hearings, and interpreting environmental rules and regulations. The incumbent exercises considerable independent judgment in the coordination of environmental hearing application review processes. Supervision is exercised over professional and technical employees engaged in the review and processing of hearing applications. General direction is received from a senior executive who holds the incumbent responsible for the professional management of code coordination activities and achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of professional and technical employees engaged in the review of Environmental Quality Control Board hearing applications, zoning applications, Developmental Impact Committee applications, and governmental facilities applications.

Directs the filing of all materials for hearings or consideration by boards and agencies including the Environmental Quality Control Board, Board of County Commissioners, Zoning Appeals Board and Developmental Impact Committee; ensures that all notice requirements and filing deadlines are met.

Reviews all applications filed before the Environmental Quality Control Board and makes determinations concerning the extent and kind of variances required and from which sections of environmental code; prepares Environmental Quality Control Board agendas for publication.

Supervises and participates in the preparation of all materials to be presented at public hearings of the Environmental Quality Control Board including pre-hearing memorandums, plans, maps, aerial photographs and surveys.

Advises attorneys, engineers, architects and the public on environmental code requirements pertaining to land use, land development and related matters.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of local, state and federal environmental laws and regulations.

Thorough knowledge of administrative procedures required in the processing of environmental hearing applications.

Thorough knowledge of the role and organization of various boards and committees involved in the review of environmental hearing applications.

Considerable knowledge of research methods and techniques pertaining to environmental code issues.

##### NATURE OF WORK

This is advanced responsible professional work supervising environmental programs for the Department of Environmental Resource Management.

Employees in this class are responsible for planning, coordinating and supervising major environmental protection programs. Responsibilities include developing new environmental programs, policies, standards and regulations, investigating and resolving environmental code violations, administering qualitative and quantitative environmental investigations in specialized fields, coordinating work with other public agencies and private organizations, planning comprehensive evaluation studies, managing staff review of technical submittals, and presenting analytical findings.

Incumbents works with considerable independence within the scope of professional methods and procedures to accomplish assigned projects. Supervision is exercised over a staff of professional, technical and clerical subordinates by delegation of assigned projects and review of completed work for quality of results and conformance with regulatory objectives. General supervision is received from a professional and administrative superior who holds the incumbent responsible for achieving environmental program objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of professional, technical and clerical employees engaged in environmental planning studies, environmental permitting and compliance programs, and preparation of detailed reports concerning emissions of pollutants from complex industrial structures, and remediation plans.

Assists in developing environmental policies and regulations by conducting studies and preparing briefing documents; presents recommendations to advisory boards and the BCC; provides court expert witness support for enforcement activities.

Evaluates test results of environmental samples and makes recommendations for the efficient resolution of code violations; meets with violators to implement voluntary compliance agreements; monitors code violators to assure compliance is achieved.

Develops and recommends new field and analytical procedures and methodologies and prepares procedural manuals to train and assure standardization with State and Federal regulations.

Reviews records, reports and correspondence for inclusion in permanent records; supervises preparation of noncompliance cases for board hearings and court proceedings; assures completeness of evidence for prosecution.

Directs and conducts complex chemical, hydrological and microbiological studies to determine impact of pollution on freshwater resources, drinking water supplies, and human health.

Prepares ordinances to codify new local regulations, and interpretive reports explaining local, State and Federal regulations.

Participates in inter-agency activities involving environmental protection; confers with officials of public and private organizations.

Prepares budget reports and grant proposals for outside funding of environment projects.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, policies and procedures of environmental administration.

Thorough knowledge of local, State and Federal regulations pertaining to environmental protection, water quality, hazardous waste, and related fields.

Considerable knowledge of scientific principles, theories and practices in environmental areas including water chemistry, sanitary and environmental engineering, public health, hydrology, mathematics, microbiology, toxicology, and biology.

Considerable knowledge of techniques of scientific investigation and analysis.

##### NATURE OF WORK

This is highly responsible professional managerial work in planning and directing activities of the Waste Management Division of the Department of Environmental Resources Management.

An employee in this class is responsible for planning, directing and coordinating complex pollution prevention and control programs. Responsibilities include directing inspections of industrial facilities, monitoring developments in environmental regulations, reviewing new waste management technologies, implementing enforcement programs to prosecute violations of environmental regulations, developing clean up programs to restore contaminated resources, responding to public inquiries concerning departmental programs, coordinating work with a variety of outside agencies, and installing policies and procedures required to achieve departmental pollution control objectives. The incumbent exercises considerable independent judgment and technical expertise in organizing and implementing complex pollution prevention and control programs. Supervision is exercised through subordinate supervisors over a staff of professional, technical, administrative and clerical employees engaged in various phases of program operations. General direction is received from an Assistant Department Director who holds the incumbent responsible for the professional management of division activities and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Directs and coordinates, through subordinate supervisors, pollution prevention and control programs to inspect industrial operations, and facilities storing, generating and/or disposing of hazardous materials and/or wastes having the potential to cause water or ground pollution. Monitors developments in environmental regulations, innovative technologies and emerging trends in all forms of waste management on local, state and national levels.

Establishes and administers, through subordinate supervisors, enforcement programs to ensure that violations of local, state and federal environmental regulations are prosecuted appropriately and equitably.

Establishes and implements, through subordinate supervisors, clean up programs to restore contaminated environmental resources to the point where there remains no significant risk to public health or the environment.

Directs and coordinates environmental engineering functions applicable to pollution prevention and control programs.

Coordinates pollution prevention and control activities with other local, state and federal agencies, special interest groups, environmental groups, and the media.

Develops new policies, ordinances and programs reflecting emerging technologies, environmental protection and waste minimization.

Negotiates interagency agreements for the delegation of environmental programs by state and federal environmental agencies for the protection and restoration of the environment.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of scientific theories, principles and practices of environmental science.

Extensive knowledge of local, state and federal rules and regulations pertaining to pollution prevention and control.

Thorough knowledge of local pollution prevention and control programs and activities.

Thorough knowledge of current technological developments and trends in the area of environmental science.

Thorough knowledge of the principles of management and public administration.

Thorough knowledge of supervisory principles and practices.

Ability to direct and coordinate complex programs in pollution prevention and control in accordance with established regulations to achieve desired goals and objectives.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

## Human Resources Department

---

### Pollution Control Division Chief (001580)

Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of other public and private officials.

Ability to enforce pollution prevention and control program regulations with firmness, tact and impartiality.

Ability to communicate clearly and concisely, verbally and in writing.

##### NATURE OF WORK

This is supervisory professional civil engineering work with administrative responsibility in the planning, design, construction, maintenance and operation of varied public works facilities.

An employee in this class typically supervises and participates in a major function of public works engineering, such as highway and bridge design, water control and coastal engineering, sanitary engineering, traffic engineering, subdivision control and regulation, construction supervision and inspection, or cadastral engineering for land acquisition for public purposes. Responsibility includes coordination of engineering activities with other public agencies and private organizations. Supervision is exercised over a group of professional, technical and clerical assistants by delegation of assigned projects and review of completed work for professional quality. This class is distinguished from that of Engineer 2 in that incumbents have significant responsibility in administering a major segment of the public works engineering program. Assignments are broad in scope with considerable opportunity for exercising independent professional judgment and making complex technical decisions. Work is under general direction of a professional superior who reviews for conformity with departmental policies, practices and regulations and for attainment of the desired objectives.

##### ILLUSTRATIVE TASKS

Acts as Head of the Highway Design Section; supervises advance planning and preparation of highway construction programs; supervises design and preparation of construction plans, cost estimates, and contract documents for highway and bridge projects; supervises construction bidding procedures; reviews and reports on designs and plans for similar work submitted to the county for approval and permit.

Acts as Head of the Subdivision Control Section; supervises the processing and recording of subdivision plats in conformity with State law and County ordinances; supervises preparation of subdivision plats and survey sketches for County owned lands, preparation and revision of the County map and the official atlas of section maps showing subdivisions and dedicated rights-of-way for roads and canals; supervises issuance of permits for all construction within public right-of-way, review of grading and paving plans for commercial parking lots and drives, and compilation of underground utilities records.

Acts as Resident Engineer, supervising a staff of field engineers and public works inspectors in the control of public works construction projects including roads, bridges, water supply and sewerage facilities, flood control and drainage works and subdivision improvements.

Supervises construction activities in development of a major seaport; coordinates planning and execution of the project through liaison with the Seaport Director, consulting engineers and contractors.

Acts as Engineer for the Water and Sewer Board; reviews proposals and plans for water and sewer main extensions and submits reports and recommendations to the Board on such proposals; conducts engineering surveys of existing water and sewer systems as required by the Board and prepares reports of condition and operations; reviews practices in water supply and sewerage and recommends technical standards for inclusion in the manual of public works construction.

Acts as Traffic Planning Supervisor; plans and directs the work of subordinate engineers, technicians and clerical personnel engaged in a wide variety of traffic engineering activities applicable to highway planning and design and to the design and operation of traffic control systems and devices; supervises the conduct of studies pertaining to traffic flow, highway capacity, accident records, geometric design of roads, intersections and interchanges, and economic feasibility of proposed highway construction; establishes and maintains records and reporting systems to develop and project data applicable to the Countywide master thoroughfare plan and other long range studies; supervises preparation of road sufficiency ratings for use in setting priorities for planning road improvement programs; prepares correspondence and reports pertaining to traffic engineering problems and projects.

Acts as Assistant Water Control Engineer, coordinating the activities of the maintenance and construction, hydraulic design, coastal

### Energy Management Analyst (001587)

engineering and operations sections of the Water Control Division; periodically reviews and supervises revision of the official Water Control Plan of the County and the official flood criteria maps; reviews reports and plans prepared by the U.S. Army Corps of Engineers for flood control and coastal engineering projects affecting the County and prepares analyses and recommendations for information of and action by superiors; assists in coordinating county water control and coastal engineering programs with State and Federal construction and maintenance activities, and with the work of other divisions and departments of the County, other legal governmental units and private developers; prepares reports and correspondence.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of civil engineering and land surveying.

Thorough knowledge of the design, construction, maintenance and operation of major public works projects and facilities such as highways, bridges, water and sewer works, flood control, water conservation and drainage works, coastal protection facilities, seaport facilities and traffic control systems.

Thorough knowledge of the principles, techniques and practices of hydrology and hydraulic engineering pertaining to flood control, drainage and water conservation.

Thorough knowledge of traffic engineering principles and practices and of laws and regulations pertaining to traffic and motor vehicles.

Thorough knowledge of the principles and practices of land surveying and of laws and regulations applicable to land subdivision.

Considerable knowledge of laws and regulations applicable to design and construction of public works facilities.

Knowledge of the principles and procedures of modern office administration.

Ability to plan, schedule, coordinate and review the work of other professional engineering, technical and clerical assistants in a manner conducive to full performance and high morale.

Ability to perform difficult engineering computations and to make comprehensive recommendations on engineering problems.

Ability to express ideas clearly and concisely, orally and in writing.

Skill in the use of civil engineering instruments and equipment.

### Mini-Computer Operator 1 (001612)

#### Minimum Qualifications

High school or GED. One year of experience in the operation of mini-computer data processing equipment to include data entry is required.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the operation of mini-computer data processing equipment.

Employees in this class are responsible for operating a mini-computer system through the use of a console keyboard to automatically process business, accounting and statistical data. Responsibilities may include processing data on-site or transmitting data to an off-site mainframe computer installation. Emphasis of the work is on selecting data for processing, operating a console keyboard and related peripheral data processing equipment, processing complete projects, and inspecting completed products for accuracy, sequence and form. Related responsibilities include performing cleaning and minor maintenance tasks on assigned equipment and maintaining a record of operations. Supervision is received from a technical superior who reviews work in progress and upon completion and assists with solutions to difficult or unusual problems.

##### ILLUSTRATIVE TASKS

Receives data for processing in mini-computer and prepares computer to run job; operates a console keyboard and peripheral data processing equipment to process complete projects and inspects products for accuracy, sequence and form.

Operates computer console keyboard, optical card reader, printing terminals having drum or chain type technology, digital tape drives, interactive display terminals, data storage systems employing flexible disks, and disk-based operating systems which supervise the processing of user programs.

Initiates synchronous terminal communications.

Initiates synchronous multipoint terminal communications providing batch processing to an off-site mainframe computer installation.

Performs local and remote loopback tests.

Maintains a record of computer operations.

Performs cleaning, minor maintenance and adjustments on assigned equipment; changes tape reels and printing ribbons, inserts and aligns paper supply.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operating characteristics and maintenance requirements of mini-computer data processing equipment.

Knowledge of the established rules and regulations governing mini-computer operations in the area of assignment.

Knowledge of the causes of data rejection or error and the action required for correction.

Knowledge of the scheduling and priority of jobs applicable to mini-computer operations in the area of assignment.

Ability to operate mini-computer and peripheral data processing equipment.

Ability to implement work flow procedures to process data processing projects on a mini-computer system.

Ability to perform minor maintenance, cleaning and adjustments to mini-computer equipment.

Ability to understand and carry out verbal and written instructions.

Ability to maintain records of computer operations.

NEW 1-83

### Commission Information Systems Analyst (001687)

#### Minimum Qualifications

Bachelor's degree in Computer Science. Four years of experience in analyzing, developing and implementing information automation projects are required. OR Completion of 60 semester credits from an accredited college or university to include a minimum of 15 semester credits in Computer Science. Four years of experience in analyzing, developing and implementing information automation projects are required. Additional two years of professional experience relative to the classification may substitute for the 15 semester credits in Computer Science.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible technical systems analysis work for the Information Technology Department.

An employee in this class is responsible for planning and coordinating automation and telecommunications requirements for the Board of County Commissioners and the County Manager's Office. Responsibilities include planning and organizing project teams to modify and implement information systems, directing the procurement of software and computer equipment, coordinating requirements for desk top and cellular telephones, analyzing information technology and telecommunications needs, and monitoring a problem management system to assure timely and effective services to elected officials and senior County management. The incumbent exercises considerable independent judgment and technical expertise in planning, managing and administering various major automation and telecommunications projects. Supervision may be exercised over subordinates on a project basis. General direction is received from an administrative superior who reviews work through personal conferences and written reports for effective provision of information technology and telecommunications services to the BCC and County Manager's Office.

##### ILLUSTRATIVE TASKS

Plans and coordinates the automation and telecommunications requirements of members and staff of the Board of County Commissioners and the County Manager's Office.

Supervises depot technicians and others; monitors a problem management system to assure timely and effective responses to elected officials and senior County officials and managers.

Participates in the analysis and evaluation of information technology requirements of the Board of County Commissioners and County Manager's Office.

Maintains contacts with County vendors to order, expedite and follow up on the delivery of computer hardware and software.

Coordinates computer system training; advises superiors of BCC central office and district office requirements for computer equipment, printers, cellular and desk top telephones; Coordinates work with other departmental officials to provide host data, public access system and other computer network needs. Coordinates requests for Geographic Information System access and reports.

Monitors installation of computer equipment and telephones in district offices and other remote locations; monitors billings and FAMIS reports concerned with computer and telecommunications technology.

Provides individual consulting service to members of the Board of County Commissioners and their staff.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the design and capabilities of computer hardware, computer software and telecommunications systems.

Thorough knowledge of computer programming and systems analysis.

Thorough knowledge of the planning, designing and implementing of computer and telecommunications projects.

Thorough knowledge of the automation needs of the members and staff of the Board of County Commissioners and the County Manager's Office.

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of the principles of management and business administration.

Ability to analyze and evaluate the automation and telecommunications needs of the Board of County Commissioners and the County Manager's Office.

Ability to technically evaluate computer hardware and software for applicability to the needs of the BCC and the County Manager's Office.

## Human Resources Department

### ITD Information Center Analyst 1 (001706)

#### Minimum Qualifications

#### Job Specifications

##### NATURE OF WORK

This is advanced technical computer programming work, planning, designing and implementing complex Information Center software systems.

Employees in this class are responsible for independently creating complex "user friendly" interactive systems for Information Center operations. Emphasis of the work is on evaluating system and/or user requirements, preparing programming specifications, and planning, developing, testing, documenting, and installing new software systems or updates. Responsibilities include keeping up to date on new Information Center hardware and software, maintaining or developing the necessary systems to simplify Information Center users technical involvement with the system, preparing all documentation, diagnosing and correcting problem occurrences, and assisting with the Information Center "help desk" duties. Supervision is received from a professional and technical superior who provides guidance and reviews work for achievement of Information Center objectives.

##### ILLUSTRATIVE TASKS

Evaluates system requirements and completes all aspects of system development to produce a quality product within a scheduled time frame. Reviews new hardware and software products to determine applicability to the Information Center and recommends appropriate modifications.

Creates, documents, and installs Information Center software systems for the users and staff.

Develops and/or maintains complex programs to make the Information Center software interactive with in-house on-line, data base or "standard" systems, and "user friendly" at the same time.

Documents the Information Center systems according to departmental standards.

Prepares detailed test plans to validate system performance prior to installation; diagnoses and corrects complex system/program problems.

Assists users with program definition and problem solving on as nontechnical a level as possible; provides guidance and technical expertise to the Information Center staff; coordinates technical efforts to assure user

satisfaction.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of computer programming.

Considerable knowledge of the design capabilities of micro and mainframe computer hardware and software.

Considerable knowledge of packaged software and/or utilities used in the development and maintenance of Information Center systems.

Knowledge of symbolic logic, mathematics and statistics.

Knowledge of the computer operations within the county.

Ability to design complex program logic and code in appropriate computer programming languages.

Ability to recognize and solve system malfunctions.

Ability to interpret Information Center user requests and/or problems and translate them into functioning system components.

Ability to establish and maintain effective working relations with a variety of county officials and employees.

Ability to communicate clearly and correctly, verbally and in writing.

Ability to work independently and complete assignments on a timely basis with a minimum of supervision.

### Communication Service Representative 1 (001724)

#### Minimum Qualifications

High school diploma or GED. Two years of experience providing and planning telephone services in a telephone company, governmental agency or similar structured large organization are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical work in providing, modifying and coordinating telephone services for the county service.

The Communication Service Representative is responsible for receiving requests from county departments for telephone service surveys, advising on appropriate telephone instrument equipment, location and cost, and maintaining contact with the public utility providing telephone service countywide. Emphasis of the work is on assisting departments in initial installation or modification of telephone service and investigating user complaints. The incumbent must apply knowledge of telephone equipment characteristics, system planning, user requirements, cost factors and billing procedures for service. Supervision is received from an administrative or technical superior who confers on unusual problems, inspects telephone systems in use as required, and reviews written reports to evaluate attainment of management objectives and conformity with established procedures and policies.

##### ILLUSTRATIVE TASKS

Receives and processes requests for telephone service from all county offices; visits offices to make telephone service surveys and analyses for new installations or modifications in existing service; recommends appropriate service based on completed surveys.

Advises supervisory personnel on instrument types and associated modules including call directors, speakerphones, touchmatic services and intercom systems; advises on location of instruments and cost factors; recommends alternate plans that serve user requirements at less cost.

Discusses client operational and telephone equipment requirements with the public utility providing service; refers requests to the telephone company for installation and modification; inspects completed work for conformance to requirements.

Receives and investigates complaints from county departments relating to defective equipment or malfunctioning of service; initiates corrective action work orders to the telephone company; expedites service where delays occur.

Provides necessary detail to clerical support personnel for preparation of service orders; provides billing information to accounting personnel; furnishes current information to personnel responsible for preparation of county telephone directories as requested; prepares required reports on telephone services furnished to county departments.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of various telephone instruments including call directors, speakerphones and related equipment.

Considerable knowledge of the types of telephone installations commonly used in operational activities of various county offices.

Knowledge of established procedures of the telephone utility company in providing services to the county.

Knowledge of current costs of various telephone equipment and associated modules.

Ability to assist county operational activities in their telephone equipment requirements.

Ability to keep abreast of current telephone communication systems and equipment by coordination with technical engineering personnel.

Ability to process requests for initial telephone service and modifications promptly.

Ability to furnish accurate cost data to county departments and billing personnel.

Ability to maintain effective relationships with supervisory personnel in various county departments and with telephone company officials.

NEW 10-78

#### Nature Of Work

This is administrative and related technical work in providing, modifying and coordinating telephone services for the county service.

### Communication Service Representative 2 (001725)

#### Minimum Qualifications

High school diploma or GED. Three years of experience providing and planning telephone services in a telephone company, governmental agency or similar structured large organization are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced specialized clerical and technical work planning and implementing telephone services for the County.

Employees in this classification assess the needs of the customer and ensure the successful implementation of telephone-related services. Emphasis of the work is on providing proper system design by considering aspects of equipment, features and usage; understanding office operations and interfacing with other IT professional personnel and vendors. The incumbent exercises independent judgment applying knowledge of telephone and network experience to develop system planning, user requirements and cost factors and managing complex PBX sites. Work differs from that found in the Communication Service Representative 1 classification in that incumbents may work independently with minimal direct supervision and may be responsible for large PBX locations having hundreds of telephone stations. Supervision is received from an administrative or technical superior who confers on unusual problems, inspects telephone systems in use and reviews reports to evaluate attainment of management objectives.

##### ILLUSTRATIVE TASKS

Visits County offices and conducts customer interviews to determine the exact requirements, analyze present equipment and recommend appropriate service based on information gathered from the completed survey.

Performs feature administration changes in large PBX sites including voicemail, instruments, Automatic Call Distributors (ACD), Auto Attendants and other Call Processing systems as well as maintaining voicemail and ACD applications and records.

Prepares configuration templates and programming sheets to program system features, telephone numbers, user information and identifying equipment location; ensures that work order requests are accurate and understandable; tracks changes to station inventory equipment.

Coordinates requests with public utilities for service and installation of telephone lines and network services such as ISDN, T1 and data circuits.

Provides customer training on new switch implementations as well as remedial training and training on upgrades.

Prices and processes complex telephone orders and effects necessary database changes.

Writes bid specifications for small system installations.

Reviews vendor proposals; recommends system/vendor solutions.

Provides direction and guidance to Communication Service Representative 1s and other staff.

Provides direct instruction to user clients on processes and policies.

Performs related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of various large telephone systems, such as Siemens, Nortel, Meridian and others used throughout County facilities.

Considerable knowledge of the types of telephone installations commonly used in operational activities of various County offices.

### Communication Service Representative 2 (001725)

Knowledge of voice processing systems including voice applications.

Knowledge of IP telephony and wireless technology for voice and data applications.

Knowledge of system software in order to introduce frequent changes requested by County agencies.

Knowledge of established procedures of the telephone utility company providing services to the County.

Knowledge of current costs of various telephone equipment types and associated modules.

Knowledge of the County's PBX features and software.

Knowledge of Microsoft Office products and database programs required to keep track of work orders, repairs, moves, etc.

Ability to keep abreast of current voice communication systems and equipment and coordinate system installation with technical personnel.

Ability to plan and provide telephone services in a telephone company or government agency.

Ability to make routine software changes on the PBX while understanding the implications of each change.

Ability to train agency personnel on the use of the phone system and its features and functionality.

Ability to maintain effective relationships with supervisory personnel in various County departments and with telephone company officials.

8/15/2005

#### **Nature Of Work**

This is advanced specialized clerical and technical work planning and implementing telephone services for the County.

## Miami-Dade County Telephone Systems Supervisor (001726)

### Minimum Qualifications

High school diploma or GED. Six years of experience in the management of complex telephone switching systems to include experience at a supervisory level are required.

### Job Specifications

#### NATURE OF WORK

This is technical and administrative work with supervisory responsibility in the management of a County-owned telephone system.

An employee in this class is responsible for supervising and coordinating telephone service for County departments and agencies utilizing County-owned switching equipment. Responsibilities include development and management of communications policies and procedures, monitoring telephone system configuration and design, coordinating planning and modification of the telephone system, and maintaining contact with vendors and public utility providing telephone service. The incumbent exercises independent judgment in the application of technical knowledge to interconnect switching equipment, system planning and configuration, and system evaluation. Supervision is exercised over a staff of Customer Service Representatives engaged in assisting customers with various aspects of telephone service. Supervision is received from an administrative superior who reviews work for efficient and effective management of the telephone system and appropriate telephone service to user departments and agencies.

#### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of Customer Service Representatives engaged in processing requests for telephone service, advising user departments and agencies on instrument types, locations and costs, and investigating complaints and taking corrective action; ensures appropriate responses are made and for requests for telephone system information.

Conducts investigations of special service requirements for customers and negotiates new service with vendors; conducts special investigations and initiates corrective action as required.

Initiates and develops contacts with independent vendors and public utility providing telephone service, regarding operational requirements for installation and modification of systems; inspects completed work for adherence to specifications.

Maintains records on system configuration equipment, traffic analysis, service orders, maintenance contracts, and billing.

Monitors telephone system configuration and design, and coordinates the planning and modification of telephone systems; prepares specifications and confers with engineering staff concerning design of system hardware.

Monitors customer work orders to ensure compliance with established departmental rules and regulations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of electronic telephone switching equipment provided by independent interconnect companies.

Considerable knowledge of modern telephone system design, capabilities, and related equipment.

Considerable knowledge of telephone service requirements commonly used in operational activities of various County agencies.

Knowledge of established procedures of the telephone utility company and independent vendors providing service.

Knowledge of current costs for various telephone service and equipment provided by public utility and vendors as contained in tariffs.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to adopt and design individual telephone systems to meet multiple users needs.

Ability to develop communications policies regarding all phases of telephone service, maintenance, and billing.

Ability to evaluate and correct system or equipment malfunctions and user problems.

Ability to keep abreast of current communications systems and equipment.

Ability to train County employees in system advantages and feature usage.

Ability to communicate through telephone and personal contact with independent vendors, local utilities and County employees regarding telephone service.

##### NATURE OF WORK

This is advanced skilled technical work in the installation, maintenance and repair of complex telecommunications infrastructure equipment in a centralized telecommunications operation.

Employees in this class are responsible for the installation, maintenance and repair of complex fiber-optic, video, audio and microwave transmission systems; digital and analog stationary, portable and mobile radio systems, digital, analog and cellular telephone equipment; emergency equipment; digital and analog computer systems, major telephone systems, voice recording systems; and dispatch consoles. Duties include troubleshooting of hardware and software problems, faulty circuitry, transmission and distribution lines; installation, maintenance and repair of telecommunications equipment to the component level, and preventive maintenance of equipment. Work requires the application of fundamental and advanced principles, techniques, practices and methods of electronic technology. Employees exercise some independent judgment in designing and implementing major system requirements and modifications, and ensuring timely responses to critical telecommunications infrastructure activities. Supervision is received from a technical superior who reviews work for compliance with established specifications and standards, and satisfactory functioning of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Installs, maintains and repairs complex fiber-optic, video, audio, and microwave transmission systems; digital and analog stationary, portable and mobile radio systems; digital, analog and cellular telephone equipment; emergency equipment; digital and analog computer systems; major telephone systems; voice recording systems and dispatch consoles to the component level.

Performs diagnostic evaluation of hardware and software problems, faulty circuitry, and transmission and distribution lines, and takes corrective action.

Performs telecommunications equipment overhauls including adjusting, repairing and replacing parts and converting obsolete equipment to comply with current telecommunications engineering design and construction standards.

Performs pre-installation site visits to determine personnel and material requirements.

Installs building riser and lateral cables; ensures proper bonding and grounding of inside and outside plant cable.

Reads, interprets and works from various schematics, blueprints and electronic diagrams.

Performs periodic inspection of contractor installation work to ensure compliance with project requirements.

Utilizes advanced test equipment for problem determination and resolution.

Interacts with vendors in the installation, maintenance, repair and testing of systems hardware and software.

Performs periodic frequency checks required by the Federal Communications Commission to ensure that transmitting equipment is broadcasting within the limits of assigned frequencies and modulation.

### Senior Telecommunications Technician (Data/Telephone) (001733)

Coordinates changes, modifications and cut-overs of existing systems to ensure uninterrupted communications.

Interacts with customers in the emergency and routine repair and maintenance of equipment, and in customer training; maintains proper inventory of supplies required to perform work.

Observes established safety practices and procedures applicable to electrical and electronic work.

Prepares and maintains documentation required by the Federal Communications Commission; prepares reports of work activities, work estimates, and requisitions for supplies and equipment.

Makes recommendations concerning infrastructure telecommunications systems hardware and software.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of electronic theories and principles pertaining to fiber-optic, video, audio and microwave systems, portable and mobile radio systems, digital and analog computers, or telephony.

Thorough knowledge of the practices, methods, tools, equipment and materials used in the installation, maintenance, repair and testing of complex telecommunications systems.

Thorough knowledge of operating characteristics and protocols of complex infrastructure telecommunications systems.

Considerable knowledge of various types of inside and outside cables and their applications.

Considerable knowledge of all elements of inside wiring encoding; main, intermediate and horizontal distribution systems; riser cable system, and terminating jacks.

Knowledge of designated cable paths.

Knowledge of local, state and national standards and codes applicable to telecommunications systems installation and maintenance.

Knowledge of occupational hazards and safety precautions applicable to the installation of complex telecommunications systems.

Ability to diagnose malfunctioning telecommunications systems and related equipment using specialized electronic tools and precision testing equipment.

Ability to interpret and work from schematics, blueprints, electronic circuitry diagrams and simple architectural drawings.

Ability to install, splice and troubleshoot inside and outside wiring for various types of transmission media.

Ability to install vertical riser and lateral conduits, cable trays and racks to support inside cable plants.

Ability to communicate effectively, verbally and in writing.

Ability to climb into and out of manholes or motor vehicles, ascend and descend step ladders, lift up to fifty pounds, and occasionally use aerial ladders and equipment.

Ability to prepare and maintain documentation required by the Federal Communications Commission, records and reports, work estimates and requisitions.

### **Senior Telecommunications Technician (Data/Telephone) (001733)**

Skill in the diagnosis of electrical and electronic malfunctions in complex infrastructure telecommunications systems and equipment.

Skill in the use of standard tools, equipment and precision testing devices of the electronic trade.

REV 10-94

#### **Nature Of Work**

This is advanced skilled technical work in the installation, maintenance and repair of complex telecommunications infrastructure equipment in a centralized telecommunications operation.

### Telecommunications Supervisor (Data/Telephone) (001734)

#### Minimum Qualifications

High school diploma or GED. Five years of experience in the installation, testing, repair, and maintenance of complex data and telephone communications including PBXs, electronic key systems, network switches and servers, routers, transmission systems, voice over internet protocol (VOIP) and related equipment; Certificate of Completion in Electronics from a vocational school and three years of experience in the installation, testing, repair, and maintenance of complex communications equipment; or Completion of 60 semester credits to include 15 semester credits in Electronics or Electrical Engineering and three years of experience in the installation, testing, repair, and maintenance of complex communications equipment are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in coordinating and inspecting the installation, maintenance, modification and repair of radio receiver-decoder units and associated telecommunications equipment.

Employees in this class plan, assign and coordinate the work of skilled technical subordinates servicing a variety of radio-decoder units and other telecommunications equipment. Responsibilities include contact with representatives of private or public communications agencies, state officials, and equipment and service contractors in order to coordinate repairs and new installations. Employees exercise considerable independent judgment in determining systems and job requirements regarding various technical phases of repair, installation, modification and maintenance. Possession of a second class radio telephone license issued by the Federal Communications Commission may be required depending on work emphasis. Instructions are received in the form of blueprints and work orders, with detailed planning and review of completed projects the responsibility of the incumbent. Supervision is received from a technical superior who reviews work for timely completion of work schedules and evaluates system operations.

##### ILLUSTRATIVE TASKS

Supervises hazardous or unusual work assignments at the site; participates as needed in installations involving unusual or difficult technical problems; works with superiors in planning new installations or major modifications of equipment.

Assigns and directs crews to job sites; reads and checks blueprints before distribution to crews; assists technicians with any technical problems that might arise involving assigned projects.

Plans daily work schedules; suggests working procedures; instructs in techniques and use of new operational or test equipment.

Coordinates with private or public communications agencies regarding priority of installation of various telecommunications equipment.

Assists in special circuitry designs for more complex signal installations; interprets blueprints for changes in or planning of special circuitry.

Develops, schedules and supervises the performance of a

#### TELECOMMUNICATIONS SUPERVISOR (Cont'd)

##### ILLUSTRATIVE TASKS (Cont'd)

preventive maintenance program providing for servicing, cleaning, synchronizing and testing of radio, telephone and related communications equipment.

Estimates time and materials required for proposed jobs; reviews time sheets and work reports, trouble reports and service calls; prepares progress reports.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electricity and electronics as applied to telecommunication transmitters and receivers,

### Telecommunications Supervisor (Data/Telephone) (001734)

digital and analog computers, radar detectors and electronic circuitry.

Thorough knowledge of occupational hazards and safety precautions in the electronic trade and work with high voltage.

Thorough knowledge of the practices, methods, tools and equipment used in the repair, maintenance, testing and replacement of telecommunication equipment.

Considerable knowledge of precision test equipment such as digital frequency measuring equipment, oscilloscopes and precision voltage and current measuring devices.

Knowledge of recent developments, current literature and sources of information in the field of telecommunications.

Ability to interpret and work from technical sketches, blueprints and electronic circuitry diagrams.

Ability to estimate costs, labor and materials necessary to perform assigned work.

Ability to plan and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to deal effectively with representatives of telecommunication equipment contractors and county departments.

Ability to maintain complete records and prepare and submit comprehensive reports.

Skill in the detection, determination and elimination of malfunctions in associated telecommunications equipment.

1734

#### TELECOMMUNICATIONS SUPERVISOR (Cont'd)

#### DESIRABLE EXPERIENCE AND TRAINING

Considerable supervisory experience in installation, maintenance and repair of digital and voice-actuated telecommunications equipment; graduation from a standard high school or vocational school.

NEW 10-78

#### Nature Of Work

This is skilled supervisory work in coordinating and inspecting the installation, maintenance, modification and repair of radio receiver-decoder units and associated telecommunications equipment.

## Human Resources Department

### Telecommunications Manager (001735)

#### Minimum Qualifications

High school diploma or GED. Five years of experience to include two years of supervisory experience in the repair, maintenance, installation and operation of complex communications equipment related to digital PBX and other telephone systems are required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible professional and technical managerial work planning and directing activities for the ETSD Field Services Division.

Employees in this class are responsible for planning, assigning, reviewing and providing final review of work of subordinate supervisors involved in providing maintenance services and support to wide area networks, local area networks, servers, desktops, computer equipment and telephone systems. Responsibilities include reviewing and evaluating complaints from County Departments regarding the wide area network, local area network, computer systems, servers, computer equipment and telephone systems and initiating corrective action. The incumbent exercises considerable independent judgment in developing, recommending and designing appropriate service level agreements on behalf of County Departments. Supervision is exercised over a staff of technical supervisory subordinates engaged in coordinating and inspecting the installation, maintenance, modification and repair of wide area networks, local area networks, servers, desktops, computer equipment and telephone equipment. General direction is received from an administrative superior who holds the incumbent responsible for the achievement of divisional goals and objectives.

##### ILLUSTRATIVE TASKS

Develops, recommends, and designs appropriate service level agreements on behalf of County Departments to provide maintenance services and support to wide area networks, local area networks, servers, desktops, computer equipment and telephone systems.

Reviews and evaluates complaints from County Departments for wide area networks, local area networks, computer systems, servers, computer equipment and telephone systems and initiates corrective action.

Advises and makes recommendations to County Departments on policies and procedures regarding the services provided by the Field Services Division.

Ensures that maintenance records are kept on individual system configurations, equipment, service orders, contracts and billings.

Initiates and develops contacts with independent vendors and County staff regarding operational requirements for ongoing work to install, maintain and modify computer and telephone systems ensuring adherence to compliance by inspecting completed work.

Reviews and manages projects involving computer and telephone systems to ensure compliance to service level agreements and deliverables.

Prepares and distributes directives on operational standards and procedures for the maintenance of computer and telephone systems.

Prepares performance measurement reports on the section's ability to meet established service level agreements.

Prepares and maintains section's budget.

Prepares costs and makes equipment recommendations for various computer and telephone systems and telecommunications equipment.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

## Human Resources Department

---

### Telecommunications Manager (001735)

Thorough knowledge of telecommunications principles and practices.

Thorough knowledge of wide area networks, local area networks, servers, desktops, computer equipment and telephone systems.

Thorough knowledge of the development and design of service level agreements.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of recent developments, current literature and sources of information in the field of telecommunications.

Ability to review and manage telecommunication projects to ensure compliance to service level agreements and deliverables.

Ability to estimate costs, labor and materials necessary to perform assigned work.

Ability to maintain complete records and prepare and submit comprehensive reports.

Ability to plan and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to communicate clearly and concisely, both verbally and in writing.

Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of other public and private officials.

Ability to analyze and evaluate service level agreements and make effective recommendations for their adoption.

#### **Nature Of Work**

This is highly responsible professional and technical managerial work planning and directing activities for the ETSD Field Services Division.

### Telecommunications Infrastructure Specialist (001736)

#### Minimum Qualifications

High school diploma or GED. Four years of experience in field and administrative support of complex telecommunications systems are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work providing field and administrative support to the Radio Engineering staff of the Radio Communication Services Division of the Enterprise Technology Services Department.

An employee in this class is responsible for providing field and administrative support to the Radio Engineering staff and managing the workload of a dynamic work environment, including supervising contractors, project billing and technical correspondence. Employees exercises some independent judgment in providing logistic and documentation support for new system structures and upgrades. Supervision is received from a technical superior who reviews work for compliance with established specifications and standards, and satisfactory functioning of new system structures and upgrades.

##### ILLUSTRATIVE TASKS

Provides logistic and documentation support for new system structures and upgrades including materials procurement and coordination of contractor work assignments; facilitates and documents system radio tower loading analysis as needed.

Provides field and administrative support to the Radio Engineering staff including supervising contractors, project billing, and technical correspondence.

Documents and assists field engineers in the planning, implementation, modification and construction of radio sites and other engineering field tasks; supports the maintenance and creation of the system's ACAD technical drawings.

Monitors status, renewal and modification of the FCC system licenses as required.

Provides technical assistance and training to customers and supports the purchasing of radio equipment and basic accessories.

Maintains the Motorola M30 Unipage (paging) system database including the addition and removal of subscribers.

Performs related duties as required

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of electronic theories and principles pertaining to complex telecommunication systems.

Knowledge of Microwave, Trunking Radio, EDACS Protocol and Paging Systems.

Knowledge of Federal Communications Commission License procedures, rules and regulations.

Knowledge of Windows 98, Windows 2000, NT, Office 2000, Access and Internet.

Knowledge of County procurement practices and project billing.

Ability to communicate effectively, verbally and in writing.

Ability to use ACAD software.

Ability to prepare and maintain documentation required by the Federal Communications Commission, records, and reports, work estimates and requisitions.

### ITD Radio Systems Manager (001739)

#### Minimum Qualifications

Bachelor's degree. Eight years of progressively responsible experience in large LMR (land mobile radio) radio infrastructure systems to include problem determination and resolution are required.

Preferences: Proven experience with leading propagation studies, site development, understanding of radio backhaul and grounding systems is strongly desired.

#### Job Specifications

##### NATURE OF WORK

This is responsible management, professional and technical work managing all aspects of the Miami-Dade County 800 MHz Radio Communications System which provides integrated radio communications for law enforcement agencies in the County and municipalities. The system also provides radio communications for all of the County Administrative Departments, the Dade County School Board, Miami-Dade Transit System, and other State and Federal agencies operating in Miami-Dade County.

An employee in this class is responsible for activities associated with the management, maintenance, repair and uninterrupted operation of telecommunication systems, including radio, video and microwave infrastructures essential to the safety and welfare of the citizens and employees of Miami-Dade County as well as a variety of stationary and mobile electronic systems and ensuring RF licenses granted by the FCC to the County are maintained and managed properly..

Responsibilities include coordinating activities with federal and local government agencies, manufacturing representatives and engineers involved in telecommunication systems installation and modifications. The incumbent exercises considerable independent judgment, action, and initiative in making complex technical decisions.

Additional duties involve consultation with representatives of industry and professional organizations, management and technical personnel of local governments and direct contact with vendors providing maintenance and technical support to the County Radio Systems.

Supervision is exercised over a group of supervisory, professional, technical and clerical staff whose work is reviewed for professional quality and compliance with professional standards. Supervision is received from a professional superior who reviews work for conformity with departmental policies, practices and regulations for the attainment of desired objectives. Work is reviewed through conferences, observations of results obtained, programs, reports and recommendations.

##### Illustrative Tasks

Plans, assigns and reviews the work of subordinate professional supervisors and coordinates the work with RF and operational engineers and technicians engaged in operating, maintaining, modifying, and installing telecommunication systems; assists in the preparation of cost comparison studies, specifications for purchase or lease of telecommunications equipment and scheduling of installations to assure efficient operations and minimal impact to customers.

Reviews applicable reports to ascertain the status of the Enhanced Digital Access Control System (EDACS) and identifies maintenance requirements.

Reviews data to insure optimum performance and utilization of the EDACS trunked system and reviews trunked contingency plans to insure they are correct and functional.

Serves as primary liaison for Miami-Dade County on state, regional and local coordinating boards and other bodies. Communicates decisions, and other information related to radio systems operations to Miami-Dade County officials and managers, local jurisdictions, and vendors that have an impact on their services or operations.

Prepares Scopes of Work and Requests for Proposal for the purchase of radio system equipment, maintenance and repair of equipment and for other services required to provide reliable radio services; prepares contract review documentation and supervises the day to day execution

## Human Resources Department

---

### ITD Radio Systems Manager (001739)

of these contracts.

Prepares programs; schedules training of communications personnel responsible for operation and maintenance of the systems.

Keeps abreast of developments in the rapidly changing field of telecommunications systems to assist upper management in strategic decision support for new technology implementation.

Develops plans and strategies for the upgrade of the 800MHz radio system to a state of the art system involving a number of phases and interrelated contracts spanning several years.

Inspects and approves completed work for compliance with plans, specifications, regulations and instructions.

Leads software and network system development teams responsible for maintaining system related databases and computer control equipment.

Provides considerable insight into network performance and interoperability considerations.

Reviews all purchases of radio equipment by county administrative departments.

Prepares and submits grant requests for emergency radio equipment to support disasters preparedness and interoperability initiatives.

Develops schedules and evaluates the performance of a preventative maintenance program for a variety of communications equipment, such as 800 MHz-UHF-VHF radio transmitters, receivers, microwave, audio/video equipment as supervised by subordinate personnel.

Manages the installation and testing of new communication systems. development and implementation of software applications related to radio communication and data required to maintain the system.

Manages the creation and modification of AUTOCAD drawings and specifications of the Radio system infrastructure.

Reviews manufacturer's schematic diagrams and technical drawings for accuracy in the installation and modification of communication systems.

Supervises the management of frequency licenses and ensures authorized frequencies are operating in accordance with applicable regulations to avoid interference.

Supervises and participates in the design and preparation of schematic diagrams for modification, installation and documentation of technical specifications for specialized communications systems.

Maintains and operates computer controlled management information system for the 800 MHz trunked radio system (EDACS), that includes load balance analysis, control of unit assignments, group structures, user account maintenance and research related to unauthorized usage.

Ensures that appropriate operational parameters and options are assigned to each user of the radio system.

Coordinates communications systems maintenance, repair, modification, and operation with other county agencies.

Develops and implements ad-hoc procedures as related to the trunked EDACS system.

Serves as primary interface to County agencies, municipalities, state, federal, and other radio communications entities during special event planning sessions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

### ITD Radio Systems Manager (001739)

Performs related work as required.

#### Knowledge, Skills and Abilities

Thorough knowledge of microwave, video, UHF, VHF and 800 MHz trunked simulcast radio systems, computer based management and control systems and associated subsystems.

Thorough knowledge of public safety and emergency response communications systems procedures, practices and terminology.

Thorough knowledge of Federal Communications Commission Rules and regulations as well as state and local laws governing the operations of radio equipment, frequency licensing, and services.

Thorough knowledge of telecommunications planning, implementation and maintenance.

Thorough knowledge of electronics theory and principles.

Thorough knowledge of the principles of management and public administration.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of Trunked Simulcast EDACS Radio system.

Thorough knowledge of general radio telephone operations.

Thorough knowledge of and direct experience with LAN/WAN network systems, TCP/IP, Internet and network design

Ability to detect, determine and eliminate malfunctions in electronic systems.

Ability to review manufacturer's schematic diagrams and technical drawings for accuracy in installation and modification of communications systems; ability to design and prepare schematic diagrams for modification, installation and documentation of technical specifications for specialized communications systems.

Ability to coordinate interoperability program efforts with federal, state, regional and local jurisdictions.

Ability to prepare cost comparison studies, specifications for purchase or lease of telecommunications equipment and schedule installations to assure efficient operations and minimal impact to customers.

Ability to develop schedules and evaluate the performance of a preventative maintenance program for a variety of telecommunications equipment.

Ability to maintain complete records and prepare comprehensive technical reports.

Ability to fully utilize personal computer productivity office tools.

Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of other public and private officials.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to communicate clearly and concisely, both verbally and in writing.

#### Minimum Qualifications

Bachelor's degree in Electrical Engineering, Electronic Engineering or Computer Engineering. Two years of engineering experience in the communications field are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional telecommunications work in the planning, design and implementation of telecommunications and computer networking systems and facilities. Employees in this class are responsible for planning and designing complex and diversified projects, including but not limited to telephone switching and multiplexing systems, radio transmission systems, computer network systems including local and wide area networks. Responsibilities include performing technical work in the research or design of complex telecommunications and computer networking systems, coordinating the work of field crews in the installation of systems, and participating in economic studies for telecommunications and computer networking systems and facilities. Incumbents apply advanced knowledge to complex telecommunication and computer networking systems and are responsible for finalizing major projects. Supervision may be exercised over technical employees engaged in the installation of telecommunications and computer networking systems. Supervision is received from a professional superior who reviews general progress of work and assists with difficult problems or issues of policy.

##### ILLUSTRATIVE TASKS

Plans and designs medium sized telecommunications and computer networking systems.

Performs economic studies and detailed cost estimates and of proposed telecommunications projects.

Reviews building construction plans for compliance with county telecommunications and computer networking systems criteria and master plan; proposes designs compliant with federal, state and local regulations and mandates.

Schedules and coordinates the work of field crews performing installation of telecommunications and computer networking systems to ensure compliance with contracts, design criteria, County, industry and national code standards.

Prepares specifications for the purchase of equipment to be used in the implementation of medium-sized telecommunications and computer network systems.

Writes technical specifications for bids or Requests for Proposals for medium-sized telecommunications and computer networking systems.

Investigates areas of operation to which new or existing technologies may be applied to increase efficiency and reduce costs.

Analyzes and performs traffic studies on existing medium-sized telecommunication and computer networking systems; implements software and hardware changes accordingly for efficient and cost effective operation.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the principles and practices of telecommunications and practices of telecommunications and/or computer network systems.

Considerable knowledge of the design, implementation and operation of public telecommunications systems and computer networks, including radio, video, data and telephone.

Considerable knowledge of applicable federal, state and local laws pertaining to telecommunications and computer networking and any applicable County and industry standards and national codes pertaining to the design, implementation and operation of telecommunication and/or computer networking systems.

## Human Resources Department

---

### ITD Infrastructure Systems Engineer (001744)

Knowledge of standard practices, methods, tools and materials used in the installation of telecommunications and computer networking systems and facilities.

Ability to use PC-based project management systems in the development of PET networks/GANTT charts, critical path and other project management tools such as spreadsheets and database programs.

Ability to perform economic studies and detailed cost estimates and make recommendations on moderately-difficult telecommunications and computer networking projects.

Ability to design and implement moderately-difficult telecommunications and/or computer networking systems.

Ability to express highly technical ideas clearly and concisely, orally and in writing.

Ability to prepare reports to be utilized in decision-making process by senior management.

Ability to schedule and manage moderately difficult telecommunications and computer network projects to ensure adherence to contract terms, designs and specifications, and to secure compliance by private contracts with contracts in a tactful, firm and impartial manner.

Ability to plan assign, supervise and audit the work of others in a manner conducive to high performance and high morale.

Skill in the use of applicable electronic instruments and equipment.

8/2002

#### **Nature Of Work**

This is advanced professional telecommunications work in the planning, design and implementation of telecommunications and computer networking systems and facilities.

Bachelor's degree in Electrical Engineering, Electronic Engineering or Computer Engineering. Five years of engineering experience in the communications field are required.

#### Job Specifications

##### NATURE OF WORK

This is highly advanced professional systems engineering work in planning, designing, implementing, maintaining and operating various large scale infrastructure telecommunications, computer systems and facilities.

Employees in this class are responsible for managing very large and technically complex diversified projects including, but not limited to major telephone switching and multiplexing systems, wide area radio transmission systems, digital and analog microwave systems, fiber optic wide area networks, integration of computer networks with telecommunication networks and providing project management for multi-million dollar projects. Responsibilities include acting as project leaders to other technical professionals to provide the most cost effective and technically superior solutions to the County's telecommunication and computer network infrastructure and integrating different technologies. The incumbent exercises considerable independent judgment making difficult and complex technical decisions. Work differs from that found in the Infrastructure Systems Engineer classification in that assignments are very broad in scope and incumbents provide project management for very large and technically complex diversified multi-million dollar projects. General direction is received from an administrative superior who reviews work for conformity with departmental policies, practices and regulations and for the attainment of desired objectives.

##### Illustrative Tasks

Plans, designs, and implements complex telecommunications and/or computer networking systems; directs turnkey large and complex telecommunications and/or computer networking systems.

Integrates several different telecommunication and computer networking technologies to provide a technical solution to the business needs of a County Department.

Conducts economic studies, prepares cost estimates, reviews construction plans, engineers traffic studies and implements major complex telecommunications and/or computer networking projects of multi-million dollar magnitude.

Prepares correspondence and technical reports pertaining to engineering studies and projects.

Provides options and recommendations to upper management for decision making on diverse information technology directions and strategies.

Performs related work as required.

##### Knowledge, Skills and Abilities

Thorough knowledge of the principals and practices of telecommunications and computer network systems.

Thorough knowledge of the design, implementation, and operation of public telecommunication systems and computer networks, including radio, video, data and telephone.

Thorough knowledge of diverse technologies for integration of telecommunication and computer networks, and their working relationship to each other.

Thorough knowledge of different types of transmission systems, including but not limited to fiber optic technology, digital and analog microwave technologies, coaxial and twisted pair technologies, wireless technology and satellite transmission technology.

### **ITD Senior Infrastructure Systems Engineer (001746)**

Thorough knowledge of applicable International, Federal, State, and local laws pertaining to telecommunications and computer networking and applicable County and industry standards and international and national codes pertaining to design, implementation and operation of telecommunication and/or computer networking systems.

Ability to design, implement and integrate complex and highly difficult telecommunication and computer networking systems.

Ability to use PC based project management systems developing PERT networks/GANTT charts, critical paths and other project management tools such as spreadsheets and data base programs.

Ability to plan, schedule, coordinate and review the work of other professional team members for conformance with budget, schedule and desired results.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to prepare comprehensive reports on technical strategies and solutions.

Ability to use applicable electronic and diagnostic instruments and equipment.

Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of other public and private officials.

#### Job Specifications

##### NATURE OF WORK

This is administrative and professional work in directing and coordinating the functions of the infrastructure divisions of the Enterprise Technology Services Department.

Employees in this class plan, direct and administer professional engineering and technical programs in such areas as radio, video, data and telephone systems.

Primary emphasis is on planning and supervising the work of several professional, technical, and administrative personnel in order to meet the objectives of the unit in design, construction, operation and maintenance of major and complex telecommunication and computer systems and networks. Responsibilities include acting as liaison with other departments of the County, other public and private agencies, as well as international and national agencies involved in setting policy and standards for telecommunication and computer networks. The incumbent exercises considerable independent judgment in making final decisions on technical problems and formulating departmental policies and programs related to the County's telecommunication and computer network strategy. Supervision is exercised over subordinate supervisors, systems engineers, operating systems programmers, technical support analysts and other technical and administrative personnel engaged in various phases of the County's telecommunication and computer network infrastructure. General direction is received from a division director who reviews work for the attainment of desired administrative and professional objectives.

##### Illustrative Tasks

Administers the County's telecommunication and computer network infrastructure through subordinate supervisors, systems engineers, operating systems programmers, technical support analysts and other technical and administrative personnel.

Provides integrated service solutions and project management for a variety of County department projects.

Develops, improves and maintains the long range infrastructure plans of the County's telecommunication and computer network programs through subordinate technical and non-technical personnel.

Supervises the design procurement, implementation and operation of major County telecommunication and computer network projects.

Acts as liaison with other units of local government, state and federal agencies, professional and civic organizations to coordinate integrated telecommunication and computer network programs and projects.

Supervises the preparation of contract documents to include, but not limited to RFPs, ITBs and requisitions from federal and state contracts.

Participates in the negotiation process and acts as the chair of the negotiation committee at the discretion of the County Manager in negotiating the best contract for the County's telecommunication and computer network infrastructure.

Attends meetings of public bodies and civic organizations as required in connection with the County's telecommunication and computer network infrastructure programs.

Prepares the unit's line item operating budget, PATC's (Proposed Addition to Core), SLA's (Service Level Agreements) and capital improvement requests and monitors expenditures.

Defines, assigns and tracks projects based on priorities and resource availability insuring the best utilization of staff members.

Establishes and enforces standards for the development, maintenance and use of County's telecommunication and computer network

### ITD Infrastructure Systems Manager (001748)

infrastructure systems, software, tools and protocol.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### Knowledge, Skills and Abilities

Thorough knowledge of the principals and practices of telecommunication and computer networks systems and integration methodologies for the delivery of information technology solutions to business problems.

Thorough knowledge of the design, implementation, and operation of public and private telecommunications and computer network systems.

Considerable knowledge of modern developments, current literature and sources of information in the area of telecommunication and computer networks.

Considerable knowledge of the principles of management and public administration.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the international, federal, state and local laws and regulatory codes related to construction, design, implementation and operation of telecommunications and computer network systems and facilities.

Considerable knowledge of budget preparation, cost allocation and control methodologies in expenditure tracking.

Ability to plan, design and prepare complete turnkey plans and specifications for major complex telecommunication and computer network systems.

Ability to apply technical knowledge to integrate different technologies to administrative and business work flow problems.

Ability to technically and professional review a wide variety and large volume of engineering and constructions plans, technical manuals and reports, specifications and laws pertaining to telecommunications and computer networks.

Ability to use applicable electronic instruments and equipment.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of other public and private officials.

#### Minimum Qualifications

The Miami-Dade County Enterprise Resource Planning System (ERP) Division Director is responsible for the countywide implementation of Peoplesoft in support of departmental strategic plans and operations in the areas of Finance, Procurement and Human Resources. In addition, the position is responsible for integration with other strategies including Electronic Document Management (EDMS), Asset Management and Data warehousing. Critical responsibilities include managing a countywide implementation with a diverse team; oversight to integrator and managing vendor relations; and developing and managing the division budget.

A Bachelor's degree and a minimum of five to ten years of professional Information technology management experience to include managing ERP implementations, strategic, tactical and operational planning as well as development of operational and capital budgets is required. Ideal candidates will have demonstrated ability in working with diverse business units and teams in support of information technology program plans; managing vendors demonstrating top notch negotiation, mediation and contract management skills; and overseeing project management practices in a matrix environment.

Miami-Dade County offers great benefits including full medical insurance benefits, dental and vision insurance, life and disability insurance plans, 457 pretax savings plan, flexible spending accounts, paid holidays, vacation and sick time, membership in the Florida Retirement System, professional development, and a tuition reimbursement program.

Bachelor's degree. A minimum of seven to ten years of progressively responsible managerial experience in a large information technology organization to include experience with multiple IT platforms, development and implementation of large-scale projects, fiscal management, and strategic planning and analysis is required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing the activities of Enterprise Technology Services Department. An employee in this class is responsible for directing and supervising the functions of a large centralized computer center with an extensive network of interconnected distributed processors in various departments. Emphasis of the work is on assuring the provision of economical and efficient automated data processing services to county departments, developing policy for the use of automated data processing within the county and establishing divisional objectives for departmental operations and measuring results. Responsibilities include developing plans for the acquisition, installation and operation of automated data processing equipment for the county and negotiating contractual terms and conditions with appropriate vendors. The incumbent exercises an extensive degree of originality, judgment and professional and technical managerial knowledge in formulating departmental policies and in directing automated data processing activities. Supervision is exercised through various levels of subordinate executives and supervisors over a variety of technical, professional, administrative, specialized and clerical employees with assigned responsibilities in various phases of department operations. General supervision is received from the County Manager who holds the incumbent responsible for the attainment of desired objectives, the professional management of departmental operations and for quality of service to county departments.

##### ILLUSTRATIVE TASKS

Directs and supervises the operation of a large centralized computer center, through subordinate executives and supervisors, providing economical and efficient automated data processing services to county departments.

Develops policies for the use of automated data processing for the county; reviews existing policies and modifies, updates and revises as necessary; attends meetings and conferences with various county officials to resolve a variety of management problems.

Reviews existing organizational patterns, work relationships and staff responsibilities and structures the organization of the department to effectively achieve goals and objectives; defines divisional and departmental objectives; establishes and implements programs and plans designed to achieve goals and evaluates progress toward meeting departmental and divisional objectives; redirects priorities as necessary.

Coordinates departmental operations with other county executives and with senior county management.

Authorizes feasibility studies and economic analyses designed to improve effectiveness and efficiency of automated data processing activities; reviews and approves results.

Develops, presents and supports budget estimates and financial plans concerning acquisition of data processing equipment and software acquisition or development costs.

Plans for and assures the acquisition, installation and operation of automated data processing equipment for county departments.

Negotiates with vendors, contractual terms and conditions regarding acquisition, installation and maintenance of data processing equipment.

Assures the efficient and economical disposal of data processing equipment no longer required for county needs.

Makes decisions regarding hiring, discipline and promotion of subordinates; reviews performance reports prepared by subordinates and rates employee performance; exercises authority for departmental personnel actions consistent with collective bargaining agreements, county personnel rules and all other applicable rules and regulations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the principles of public and business administration.

Thorough knowledge of the principles of management and their application to the administration of government activities.

Thorough knowledge of current developments in the field of automated data processing technology.

Thorough knowledge of computer programming, computer systems and electronic data processing equipment.

Thorough knowledge of data processing needs of county departments.

Thorough knowledge of supervisory principles and practices.

### ITD Director (001789)

Thorough knowledge of applicable county, state and Federal laws, rules and regulations pertaining to departmental operations.

Ability to balance demand with limited resources in providing effective, efficient and economical data processing services to county departments.

Ability to use advanced professional managerial and technical knowledges to formulate departmental policy and control departmental activities.

Ability to plan, organize and supervise, through various levels of executives and supervisors, the work of subordinates in a manner conducive to full performance and high morale.

Ability to effectively evaluate the impact of alternative possible courses of action on departmental operations, future developments and circumstances of a new or unprecedented nature.

Ability to establish and maintain effective working relationships with senior county management, officials of other county departments and representatives of private organizations.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to determine if departmental standards are being met and to redirect priorities as necessary.

##### NATURE OF WORK:

This is highly responsible executive level work in assisting in planning and directing the complex activities of the Information Technology Department.

An employee in this class is responsible for assisting the Department Director in directing, planning and coordinating supervising the diversified functions of a centralized computer center with an extensive network of interconnected distributed processors in various departments. Emphasis of the work is on assuring the provision of economical and efficient automated data processing services to County departments, developing policy for the use of automated data processing within the county and establishing divisional objectives for departmental operations and measuring results. Responsibilities include developing plans for the acquisition, installation and operation of automated data processing equipment for the county and negotiating contractual terms and conditions with appropriate vendors. The incumbent exercises extensive independent judgment and professional managerial knowledge in formulating departmental policies and in directing automated data processing activities. Supervision is exercised through various levels of subordinate division directors and supervisors over a variety of technical, professional, administrative, specialized and clerical employees with assigned responsibilities in various phases of operations. General supervision is received from the Department Director who holds the incumbent responsible for the attainment of desired objectives and the professional management of departmental operations.

##### ILLUSTRATIVE TASKS:

Manages and supervises the operation of a large centralized computer center, through subordinate executives and supervisors, providing economical and efficient automated data processing services to county departments.

Develops policies for the use of automated data processing for the county; reviews existing policies and modifies, updates and revises as necessary; attends meetings and conferences with various county officials to resolve a variety of management problems.

Reviews existing organizational patterns, work relationships, and staff responsibilities and structures the organization of the department to effectively achieve goals and objectives; defines divisional and departmental objectives; establishes and implements programs and plans designed to achieve goals and evaluates progress toward meeting departmental and divisional objectives; redirects priorities as necessary.

Coordinates departmental operations with other county executives and with senior county management.

Authorizes feasibility studies and economic analyses designed to improve effectiveness and efficiency of automated data processing activities; reviews and approves results.

Develops, presents, and supports budget estimates and financial plans concerning acquisition of data processing equipment and software acquisition or development costs.

Plans for and ensures the acquisition, installation and operation of automated data processing equipment for county departments.

Negotiates with vendors, contractual terms and conditions regarding acquisition, installation and maintenance of data processing equipment.

Ensures the efficient and economical disposal of data processing equipment no longer required for county needs.

Makes decisions regarding hiring, discipline, and promotion of subordinates; reviews performance reports prepared by subordinates and rates employee performance; exercises authority for departmental personnel actions consistent with collective bargaining agreements, county personnel rules and all other applicable rules and regulations.

## Human Resources Department

---

### Assistant Director, ITD (001798)

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS:

Thorough knowledge of the principles of public and business administration.

Thorough knowledge of the principles of management and their application to the administration of government activities.

Thorough knowledge of current developments in the field of automated data processing technology.

Thorough knowledge of computer programming, computer systems and electronic data processing equipment.

Thorough knowledge of data processing needs of county departments.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of applicable county, state and federal laws, rules and regulations pertaining to departmental operations.

Ability to balance demand with limited resources in providing effective, efficient and economical data processing services to county departments.

Ability to use advanced professional managerial and technical knowledge to formulate departmental policy and control departmental activities.

Ability to plan, organize and supervise, through various levels of executives and supervisors, the work of subordinates in a manner conducive to full performance and high morale.

Ability to effectively evaluate the impact of alternative possible courses of action on departmental operations, future developments and circumstances of a new or unprecedented nature.

Ability to establish and maintain effective working relationships with senior county management, officials of other county departments and representatives of private organizations.

Ability to communicate clearly, concisely, verbally, and in writing.

Ability to determine if departmental standards are being met and to redirect priorities as necessary.

### Computer Operations Support Clerk 1 (001800)

#### Minimum Qualifications

High school diploma or GED. Six months of experience in a computer operations environment or completion of three semester credits in Computer Science are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is clerical work in the performance of a variety of duties supporting computer production activities in a large central data processing operation.

Employees in this class operate a variety of equipment to separate and duplicate computer printouts according to user requirements; pack and ship output to departmental users and assure adequate stock of forms and supplies required for production. Duties include moving small equipment and furniture within the department, assisting or performing periodic inventories of computer forms and performing tasks to maintain a computer tape library. Work requires a moderate amount of physical activity in lifting and transporting boxes of computer forms and handling various pieces of equipment. Employees may be assigned to fixed or rotational shifts depending upon workload. Supervision is received from a technical superior who reviews work for timely execution of assigned duties and for conformance to established departmental rules, regulations and procedures.

##### ILLUSTRATIVE TASKS

Operates and adjusts computer printout duplicating and cutting and carbon separation equipment such as data form busters, decollators, delivers, sorters and photoduplicating machines in order to prepare computer printouts according to a prescribed user format.

Separates computer listings by job name and number in accordance with existing procedures; packs and ships output to user departments.

Receives, stores and issues paper stock and forms in order to maintain a supply and material inventory in a departmental storeroom; assists or performs periodic inventories of all computer forms and supplies.

Schedules and sends computer tapes to and from the tape library; selects and replaces computer tapes according to numerical indices; operates tape cleaning machines to clean and strip magnetic tapes in order to maintain a computer tape library.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of established departmental operating policies, rules and procedures.

Knowledge of the operating characteristics of computers and peripheral equipment used in data processing.

Knowledge of procedures used in shipping documentation to department users.

Knowledge of the receipt, storage and issuance of departmental stores.

Knowledge of the routing, scheduling and priority of programs going to and from the computer.

Ability to operate and adjust a variety of peripheral computer equipment.

Ability to pack and ship completed report printouts.

Ability to maintain accurate inventory records.

Ability to learn and follow routine filing, sorting and record keeping procedures.

Ability to select and replace computer tapes according to numerical index.

Ability to operate a tape cleaning machine.

Physical agility and strength sufficient to perform assigned duties.

#### Nature Of Work

This is clerical work in the performance of a variety of duties supporting computer production activities in a large central data processing operation.

## Human Resources Department

### Computer Operations Support Clerk 2 (001801)

#### Minimum Qualifications

Completion of 15 semester credits in Computer Science; or high school diploma or GED and one year of experience in computer production support services are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is clerical and technical work in performing a variety of duties supporting computer production activities in a large central data processing operation.

Employees in this class operate a variety of equipment to separate, duplicate and microfilm printouts, notify supervisors of equipment problems or delays in report preparation or distribution, and complete output logs according to established departmental procedures. Additional duties include responding to inquiries on job status, assembling data inputs, control cards and procedures required to process a program or series of programs, and assisting in the review of results after processing of programs. Work involves performing tasks to maintain a computer tape library, and employees may be assigned to fixed or rotational shifts depending upon workload. Supervision is received from a technical superior who reviews work for timely execution of assigned duties and for adherence to established departmental rules, regulations and procedures.

##### ILLUSTRATIVE TASKS

Operates, adjusts and maintains computer printout duplicating, and cutting and carbon separating equipment such as data from bursters, decollators, delevators, sorters and photoduplicating machines in order to prepare computer printouts according to a prescribed user format. Notifies appropriate supervisor of equipment problems or delays in report preparation or distribution. Completes required output logs or other files for output distribution. Responds to inquiries as to job status through investigation and/or use of a vide display device. Operates microfilm and microfiche equipment for both original and duplicate processing. Assists a supervisor in assembling data inputs, control cards and procedures required to process a program or series of programs; assists in reviewing quality results after processing of programs; assembles additional material for subsequent processing. Schedules and sends computer tapes to and from the tape library; selects and replaces tapes according to numerical indices; operates tape cleaning machines to clean and strip magnetic tapes in order to maintain a computer tape library. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of established departmental operating policies, rules and procedures.  
Knowledge of operating characteristics of computers and peripheral equipment used in data processing.  
Knowledge of record keeping requirements for computer outputs.  
Knowledge of the forms, packaging and records pertaining to microfilm and microfiche processing.  
Knowledge of the routing, scheduling and priority of programs going to and from computer processing.  
Knowledge of job control language utilized in a central data processing operation.  
Some knowledge of established procedures used in program and job documentation.  
Some knowledge of the content of items on incoming forms and computer printouts.  
Ability to operate, adjust and maintain a variety of peripheral computer equipment.  
Ability to learn and follow routine filing, sorting and record keeping procedures.  
Ability to select and replace computer tapes according to a numerical index.  
Ability to operate a tape cleaning machine.  
Ability to assemble data inputs, control cards, procedures and related materials required to process a program or series of linked programs.  
Ability to balance and reconcile predetermined numeric totals on source documents with computer produced compilations.  
Ability to maintain effective working relationships with staff members, supervisors and representatives of user agencies.

#### Nature Of Work

This is clerical and technical work in performing a variety of duties supporting computer production activities in a large central data processing operation.

##### NATURE OF WORK

This is advanced technical work in the operation of electronic data processing equipment in a large centralized data processing operation. Employees in this class are responsible for operating a complex computer console which controls and monitors electronic data processing equipment that automatically processes a large volume of business, accounting and statistical information. Duties include preparing the computer for program processing and operating the console in order to satisfactorily complete each scheduled computer operation. Employees are responsible for the manipulation of controls and observance of visual indicators in accordance with standard procedures and for rearranging the sequence of program steps for correcting of errors, or to continue operations when individual units of the system malfunction. Work is performed with considerable independence on routine operations, and employees may provide guidance and direction to subordinate clerical or technical personnel engaged in performing various tasks in support of computer operations. Supervision is received from a technical supervisor who reviews work in progress and upon completion for accuracy in processing and for conformance with established instructions.

##### ILLUSTRATIVE TASKS

- Prepares computer system for each program using operating instructions and procedures; keeps abreast of the status of all jobs active in the computer.
- Prepares all peripheral equipment with the required forms, cards and tape files; verifies that all necessary files and data have been submitted for processing.
- Operates the computer console and makes program and input data revisions to expedite the correction of errors.
- Verifies that all computer output is complete and accurate before release from the section.
- Maintains records of operator time and equipment utilization.
- Assists supervisor in various phases of operations and serves as shift supervisor in superior's absence.
- Maintains work area in a neat and orderly manner.
- Notifies superiors or hardware vendor of program or equipment malfunctions.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Considerable knowledge of the operating characteristics of modern electronic data processing equipment.
- Considerable knowledge of off-line devices and auxiliary input-output equipment.
- Considerable knowledge of the operating procedures used in the area of assignment.
- Considerable knowledge of the various job applications processed by the electronic data processing system.
- Knowledge of the application of computers to the processing of business, accounting and statistical information.
- Ability to operate data processing and peripheral equipment.
- Ability to assemble, organize and implement work flow procedures used in electronic data processing.
- Ability to detect equipment and program malfunctions.
- Ability to understand and carry out verbal and written instructions.
- Ability to express ideas clearly and concisely, verbally and in writing.

### Computer Operations Specialist 1 (001818)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in Computer Science. One year of experience in console operations, teleprocessing operations, or specialized computer operations such as printers, micrographs and tape drives is required; or high school diploma or GED. Two years of experience in a large-scale data processing installation to include one year of experience in console operations, teleprocessing operations, or specialized computer operations are required.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the operation of electronic data processing equipment in a large centralized data processing installation. Employees in this class assist in the maintenance of production batch schedules through the operation of a computer console and related peripheral equipment. Work stations may include but are not limited to master console, printing, bursting/sealing equipment and tape library equipment. Employees in this classification are responsible for participating in the development of procedures for quality control and following quality control and cleaning procedures for the equipment they operate. Employees may provide guidance, direction and training to employees in lower classifications and receive technical direction from a technical supervisor or senior computer operator.

##### ILLUSTRATIVE TASKS

Issues Job Entry Subsystem Two (JES2) commands to set, start, backspace, forward space, and stop printers; controls remote devices, sets initiators, classes, assigns priorities to input/output jobs, changes job outgroup class, starts and stops initiators, releases Time Sharing Option (TSO) data sets and monitors spool utilization.

Using the Multiple Virtual Storage Operating System (MVS/Z-os) issues commands to vary input/output devices such as printers, tape drivers and terminals, on-line and off-line; identifies, interprets and replies to console messages for printer interventions, tape mounts and tape swaps as displayed in the master or alternate consoles; issues commands to change performance groups, configures chips on-line and off-line, varies paths on line and off-line and enters basic modify commands for CICS.

Using Job Control Language (JCL) identifies and corrects minor JCL errors such as missing parameters, commas or cards; separates reports as they come out of the printers and distributes them according to documented procedures and distribution lists.

Using the Tape Management System (RMM) performs tape library functions that call for daily preparation of tape/cartridges volumes to be used for processing, re-filing the volumes after completion; interprets data from various RMM reports to identify problem tapes/cartridges; performs vaulting procedures using RMM reports; interprets data from the Operating System Tape Inquire to find data pertaining to tape generations, creation dates and other tape management information and prepares and submits for execution jobs to initialize tapes.

Sends and receives messages through MS-Mail; writes documents in Microsoft word or equivalent.

Monitors CPU usage, paging rates, device allocation and detects reserves and other exceptions using OMEGAMON.

Inserts and sends jobs, marks jobs complete and interprets messages coming from OPC in the master console.

Inquires, re-creates and releases output using Dispatch.

Troubleshoots minor VTAM problems that include, NCPs, lines, terminals, printers and network nodes; monitors and troubleshoots problems in IDMS, CICS, Distributed Systems Network, Internet and applications.

Monitors the Tivoli console and acts to alerts as needed; initiates and updates problem reports using Tivoli and the Work Order System.

Operates and performs required cleaning procedures associated with various hardware.

### Computer Operations Specialist 1 (001818)

Switches devices among the different and logical partitions in ITD.

Performs related work as required.

#### KNOWLEDGES, SKILLS AND ABILITIES

Knowledge of Personal Computers including hardware installation, cabling and software installation.

Knowledge of Job Entry Subsystem Two (JES2) commands.

Knowledge of Multiple Virtual Storage Operating System (MVS/Z-os).

Knowledge of Job Control Language (JCL), Automated Job Scheduler (OPC), Tape Management System (RMM), Time Sharing Option (TSO), and OMEGAMON.

Knowledge of Dispatch, Jobview and On-Demand report distribution systems; network and Tivoli Console Operations (TEC).

Ability to identify, interpret and reply to console messages.

Ability to operate a desk top calculator and match report totals, according to established procedures for report balancing.

Ability to perform and follow inventory procedures and stock room duties.

Ability to write and complete reports as necessary to report hardware and software problems.

Ability to communicate clearly and concisely, verbally and in writing.

7/18/2005

#### **Nature Of Work**

This is technical work in the operation of electronic data processing equipment in a large centralized data processing installation.

### Computer Operations Specialist 2 (001819)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in Computer Science. Two years of experience in console operations, teleprocessing operations, or specialized computer operations such as printers, micrographs and tape drives are required; or high school diploma or GED and three years of experience in a large-scale data processing installation to include one year of experience in console operations, teleprocessing operations, or specialized computer operations are required.

#### Job Specifications

##### NATURE OF WORK

This is technical work with supervisory responsibility in the operation of multiple consoles supporting central processing units at a large electronic data processing facility.

Employees in this class oversee the work of professional and technical staff engaged in the operation of data processing equipment supplied by multiple vendors and in the diagnostics of hardware and software problems. Duties include preparing application systems for production and testing, diagnosing operational problems with software and hardware components, and coordinating work with other data processing units. Supervision may be exercised over a variety of professional and technical employees with assigned responsibilities in data processing production and operations. Supervision is received directly from a Computer Room Supervisor or and Operations Manager.

##### ILLUSTRATIVE TASKS

Troubleshoots and detects JES2 problems such as resource shortages, high spool utilization and JES2 abends; starts and stops JES2 whenever the need arises; prepares and performs cold and warm restarts whenever needed.

Issues commands using MVS to vary input/output devices such as printers, tape drives and terminals, to on line and off-line; identifies, interprets, and replies to console messages for printer interventions, tape mounts and swaps as displayed in the master or alternate consoles; issues commands to change performance groups, configures chips on-line and off-line, varies paths on-line and off-line, enters basic modify commands for CICS and issues MVS commands to close/open files in CICS; issues start/stop commands for all the applications and tasks running in the system; follows procedures to run the 9672's CMOS and 2064Z Series IBM processor's in single image and partitioned mode; uses MVS display command to the fullest extent.

Identifies and corrects minor JCL errors such as missing parameters, commas or cards; creates and inserts JCL overrides to correct problems dealing with space or change of libraries, etc.; access 'DOCAID' (documentation package) and follows documented restart procedures.

Alters the OPC (Automated Job Scheduler) as necessary; checks for abends, history and frequency; restarts or inserts jobs; accesses the online documentation system for recovery instructions; brings up and down OPC and sub tasks as necessary.

Performs tape library functions using RMM listings; prepares tape/cartridge volumes daily to be used for processing; refills the volumes; interprets data from various RMM reports to identify problem tapes/ cartridges; performs vaulting procedures using RMM reports; interprets data from the Operating System Tape Inquire (RMMINQ) to find data pertaining to tape generations, creation dates and other tape management information; prepares and submits jobs for execution to initialize tapes.

Sends and receives messages through the email system; composes documents using Microsoft word; prepares documents in EXCEL.

Performs basic TSO commands such as FSE, DSAT, SDSF, etc.; uses TSO/SDSF to display/control printers and output via the various SDSF screens; identifies abnormal TSO return codes; traces lost output accessing SYSLOG via TSO Q option or TSO "SDSF LOG" option; creates partitioned data sets; uses the "print off" option in TSO; accesses the Operator Library to create, submit and update members to close/open files and transactions in CICS.

Monitors CPU usage, paging rates, device allocations and detects reserves and other exceptions using OMEGAMON; develops new frames to monitor individual resources.

### Computer Operations Specialist 2 (001819)

Troubleshoots network problems with NCP's, lines, terminals, printers and network nodes; troubleshoots, brings up/down network problems with NCP's, lines, terminals printers and network nodes; troubleshoots, brings up/down, and or modifies major mainframe applications such as VTAM, CICS, IDMS and NETVIEW; varies network nodes active and inactive; performs cabling and equipment installation as requested by the supervisor; strap modems (set network types, alarms, speeds etc.).

Enables/disables programs in IDMS; allocates/de-allocates files in IDMS; displays the status of programs in IDMS; issues proper commands to cancel users in IDMS; checks the VTAM interfaces in IDMS and activates them as necessary.

Troubleshoots network problems using the facilities available in NETVIEW.

Performs bring up/down procedures, job monitoring, job recreation, releases or changes bundle times and changes recipient copies in Dispatch and Jobview; performs bring up/down procedures and sub tasks in ON-Demand.

Initiates, updates and searches for problem reports on Tivoli and the Work Order System; uses online documentation (Docaid) procedures to call for support, and escalation.

Operates and performs required cleaning procedures associated with various hardware products.

Switches devices among the different physical and logical mainframe partitions; develops new matrixes to accommodate different system configurations; changes passwords for access; cables new devices to switch.

Switches systems and performs IML's, IPL's and rebooting procedures on Mainframe partitions and various servers and switches in the Distributed Platform environment.

Performs other related duties.

#### KNOWLEDGES SKILLS AND ABILITIES

Knowledge of Personal Computers including hardware installation, cabling and software installation.

Knowledge of Job Entry Subsystem Two (JES2) commands.

Knowledge of Multiple Virtual Storage/Z-OperatingSystem (MVS/Zos).

Knowledge of Job Control Language (JCL), Automated Job Scheduler (OPC), Tape Management System (RMM), Time Sharing Option (TSO) and OMEGAMON.

Knowledge of Network fiber operations, Data Base Operations, Tivoli Console Operations (TEC), Dispatch, JobView and On-Demand.

Ability to develop comprehensive Preventative Maintenance work plans.

Ability to identify, interpret and reply to console messages.

Ability to write and complete problem reports as necessary to report hardware and software problems.

Ability to communicate clearly and concisely, verbally and in writing

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with superiors and various specialized data processing employees.

This is technical work in the delivery, installation, setup, and maintenance of computer hardware and software components.

### Computer Technician 2 (001827)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field and one year of experience in the installation, maintenance or repair of personal computers and related equipment are required; completion of a vocational or trade school program in the installation, maintenance or repair of personal computers and related equipment and one year of experience in the installation, maintenance or repair of personal computers and related equipment are required; or High school diploma or GED and two years of experience in the installation, maintenance or repair of personal computers and related equipment are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in the delivery, installation, setup, testing, and maintenance of computer hardware and software components. Employees in this classification are responsible for installing, configuring, and troubleshooting computer hardware and providing department-wide end-user support. Supervision is received from a technical or non-technical supervisor depending upon department size and structure.

##### ILLUSTRATIVE TASKS

Installs computer hardware including personal computers, terminals, servers, modems, faxes, printers, telephone circuits, controllers, and other components; installs local-area-networks including configuring hard drives and servers, network interface cards, cabling, hubs, routers, and associated software.

Isolates the nature of system failures or PC problems and utilizes diagnostic utilities in order to troubleshoot problems; tests the connectivity of devices; performs procedures necessary for backing-up systems; performs system upgrades.

Tests new software applications for compatibility, ease of installation, and viability and makes recommendations; provides assistance for terminal to host connectivity using a mainframe utility.

Provides department-wide end-user support and service with regard to hardware and software problems through a formal help-desk or on-site repair; provides training to end-users on typically 2nd level of help and is part of the Help Desk personnel the network and different software packages.

Prepares large instructional manuals for Help Desk personnel and other staff; maintains records and documents; prepares reports showing work completed by Help Desk staff; creates user accounts and controls network security.

Contacts centralized Information Technology Department (ITD) or outside vendors for problems not resolved by department; tracks outside vendor and ITD trouble calls.

Documents relocation of equipment, installations, and major repairs; requisitions hardware such as modems, memory, cables, connectors, and PC's; conducts inventory control; documents and maintains library for applications that are being used on network.

##### KNOWLEDGE AND SKILLS

Considerable knowledge of the current principles and practices of computer systems technology.

Considerable knowledge of the current research and trends of new computer related technologies.

Thorough knowledge of cabling/wiring strategies.

Basic knowledge of computer software applications to understand the process of starting and unloading software programs, and the associated load on the network.

Troubleshooting skills for network problems.

System tools skill for troubleshooting.

Skill is the use of computer and peripheral equipment.

#### Nature Of Work

This is advanced technical work in the delivery, installation, setup, testing, and maintenance of computer hardware and software components.

### Computer Technician Supervisor (001830)

#### **Minimum Qualifications**

Completion of 60 semester credits to include 15 semester credits in a computer related field and two years of experience in the installation, maintenance or repair of personal computers and related equipment; completion of a vocational or trade school program in the installation, maintenance or repair of personal computers and related equipment and two years of experience in the installation, maintenance or repair of personal computers and related equipment; or high school and three years of experience in the installation, maintenance or repair of personal computers and related equipment are required.

#### **Job Specifications**

No Job Specification Available

#### **Nature Of Work**

This is technical and supervisory work managing a computer help desk.

## Network Manager 1 (001832)

### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field and two years of experience in the installation and maintenance of local area networks; or completion of an information technology certification program (Novell, UNIX, Microsoft, Oracle, DELL, or NORTEL) and four years of experience in the installation and maintenance of local area networks or wide area networks are required. Additional experience may substitute for the required education on a year-for-year basis.

### Job Specifications

#### NATURE OF WORK

This is professional analytical and technical work with administrative responsibility in the development, implementation, and management of local-area-networks (LANs) for a County department. Employees in this classification are responsible for activities pertaining to the planning, installation, and administration of local-area-networks. Incumbents may supervise subordinate technical employees engaged in the installation and configuration of local-area-networks and components, troubleshooting activities, and end-user support. Supervision is received from a technical or non-technical superior depending on department size and structure.

#### ILLUSTRATIVE TASKS

Provides technical support for local-area-networks (LANs) and all systems that reside on the LAN; manages firewall hardware and mainframe gateways; researches, analyzes, configures, installs, tests, and manages routers, may be at the 2 level, switches, hubs, and dial-in dial-out communications.

Defines system objectives and prepares directives on operating standards and authorized procedures for data handling and control; projects future hardware requirements based on present usage and anticipated growth to support office automation; determines and manages data security and emergency procedures; ensures the operational integrity of the network.

Conducts capacity planning and analysis of hardware and software that will enhance operating and development activities without adverse impact to the system or clients; and maintains network connections associated with moves, adds, or changes; and reviews hardware/software products, LAN topologies, and protocols to determine applicability.

Identifies network maintenance routines and documents procedures; documents network configurations, topology, physical connections, wiring schematics, and user accounts; and establishes and maintains archiving procedures.

Conducts feasibility studies and cost benefit analyses in order to recommend techniques for optimization of network performance; presents and explains system proposals to management; assists in determining budgetary and contract requirements as they relate to computer purchases; prepares monthly reports to include project updates and evaluations; keeps management informed regarding system capabilities and resources, and performance measures.

Develops benchmarks to determine most appropriate equipment to purchase; receives and tests new equipment prior to installation; utilizes project management tools and techniques to schedule and track acquisition and installation of hardware; maintains a software and hardware inventory and control system; coordinates software and hardware problems with vendors as necessary.

#### KNOWLEDGE AND SKILLS

Considerable knowledge of operating system components and language relevant to area of assignment.

Considerable knowledge of physical and logical networks to support network operation.

Considerable knowledge of the current principles and practices of computer systems technology.

Considerable knowledge of the current research and trends of new computer related technologies.

Knowledge of cabling/wiring strategies.

Basic knowledge of computer software applications to understand the process of starting and unloading software programs, and the associated load on the network.

Troubleshooting skills for network problems.

System tools skill for troubleshooting.

Basic digital circuit skill to troubleshoot.

Skill in the use of computer and peripheral equipment.

### Nature Of Work

This is professional analytical and technical work with administrative responsibility in the development, implementation, and management of local-area-networks (LANs) for a County department.

## Human Resources Department

**Network Manager 1 (001832)**

### Network Manager 2 (001833)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field and three years of experience in the design, implementation, and administration of local area networks and/or wide area networks are required; or completion of an information technology certification program such as (Novel, UNIX, Microsoft, DELL, NORTEL, AVAYA, CISCO or Oracle) and five years of experience in the design, implementation, and administration of local area networks or wide area networks are required. Additional related experience in the design, implementation, and administration of local area networks or wide area networks may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional analytical and technical work with administrative responsibility overseeing and participating in the design, development, implementation, and management of complex local- and wide-area-networks (LANs and WANs) for a County department. Employees in this classification provide high-level professional technical support and project management direction in the planning, installation, and administration of complex local - and wide-area-networks. Incumbents may supervise Network Manager 1 incumbents and other technical employees engaged in the administration, installation, and configuration of networks and network components, troubleshooting activities, and end-user support. Supervision is received from a technical or non-technical superior depending on department size and structure.

##### ILLUSTRATIVE TASKS

Provides technical support for local- and wide-area-networks and all systems that reside on the WAN; oversees or manages firewall hardware and mainframe gateways; researches, analyzes, designs, configures, installs, tests, and manages complex routers, switches, hubs, and dial-in dial-out communications.

Defines system objectives and prepares directives on operating standards and authorized procedures for data handling and control; projects future hardware requirements based on present usage and anticipated growth to support departmental automation; determines and manages data security and emergency procedures; ensures the operational integrity of networks.

Manages capacity planning and analysis of hardware and software that will enhance operating and development activities without adverse impact to the system or clients; reviews hardware and software products, LAN topologies, and protocols to determine applicability.

Identifies network maintenance routines and documents procedures; documents network configurations, topology, physical connections, and writing schematics; and establishes and maintains archiving procedures.

Manages feasibility studies and cost benefit analyses conducted to optimize network performance; presents and explains system proposals to management; prepares monthly reports to include project updates and evaluations; keeps management informed regarding system capabilities and resources, and performance measures.

Determines budgetary and contract requirements as they relate to computer purchases; develops benchmark to determine most appropriate equipment to purchase; coordinates software and hardware problems with vendors as necessary to include management of vendor contracts.

##### KNOWLEDGE AND SKILLS

Thorough knowledge of the current practices of principles and practices of computer systems technology.

Thorough knowledge of the current research and trends of new computer-related technologies.

Thorough knowledge of operating system components and language relevant to area of assignment.

Advanced knowledge of physical and logical networks to support network operation.

Advanced knowledge and skill pertaining to routers and bridges and traffic analysis.

Advanced knowledge of network protocols.

Considerable knowledge of telecommunications standards and media.

Considerable knowledge of computer software applications to understand associated load to network.

Advanced network systems design and implementation skill.

Considerable capacity planning skill for long-term network requirements, including predicting and supporting additional network connections.

Project management skill.

Router configuration skill.

### Minimum Qualifications

Must be currently enrolled in a college or university with a major in Computer Science, Information Management, Mathematics, Engineering or related field. Completion of 60 semester credits.

### Job Specifications

#### NATURE OF WORK

This is technical work and training within one or more information technology disciplines.

Employees in this classification will receive assignments and training involving software, hardware, and/or networking. Emphasis of the work is on progressively complex technical assignments and on training in tools, techniques and methods utilized in the particular business operation. Duties may include writing, testing and debugging computer programs; evaluating user informational requirements and participating in feasibility studies; installing and configuring hardware; troubleshooting and resolving basic hardware problems; installing network software and maintaining network interfaces; and documenting processes, procedures and standards. Supervision is received from a technical or administrative superior who assigns tasks that are specific and measurable.

#### ILLUSTRATIVE TASKS

Develops, documents, tests and debugs computer programs using approved programming and applications using approved programming languages.

Performs maintenance and modification of less complex computer programs.

Assesses user application system requirements, participates in project definition and feasibility studies.

Provides support in systems development activities.

Installs and configures communications equipment.

Performs testing to ensure that equipment is operational.

Diagnoses basic hardware problems and performs repairs.

Installs network software and assists in setting-up users, directories and security systems.

Prepares documentation on processes, procedures and/or standards applicable to assigned projects.

Develops training guides, procedures manuals, technical standards and other written instructional information.

Receives training in tools, techniques and methods used within the particular business operation for the accomplishment of assigned projects.

Performs related work as required.

#### MINIMUM QUALIFICATIONS

Must be currently enrolled in a college or university. Completion of 60 semester credits from a college or university with a major in Computer Science, Information Management, Mathematics, Engineering or a related field.

NEW 10/01

### Information Technology Specialist (001841)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in Computer Science, Cartography, Geography or related field. Additional related experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is entry level technical computer programming, systems analysis, or operating systems programming work.

Employees in this new classification will be responsible for performing a myriad of functions in various platform environments, to include writing code, testing, debugging, writing documentation or performing work for new or existing information systems, assisting with the analysis of recommendations submitted by departments concerning proposed automated systems, assisting with the maintenance and modification of existing applications, and with writing system proposals, assisting with diagnosing and resolving software and hardware problems, and defining users and security levels. Incumbents will be working under the close supervision of an information technology professional.

##### ILLUSTRATIVE TASKS

Designs program logic and code using approved programming languages; creates program code for reporting requirements; participates in the analysis and development of new computer systems; assists in preparing database logical designs; assists in preparing program and system test data to validate programs and systems.

Assists with resolving various hardware and software problems; troubleshoots hardware malfunctions and provides appropriate solutions; designs and creates statistical or graphical applications according to departmental needs; prepares programming status reports; maintains hardware inventory.

Participates in the preliminary analysis of small scale projects; assists in determining the need for information, type of information required, probable cost and preparation of preliminary systems proposals; assists in identifying and correcting errors in program documentation; assists with the installation of new hardware and software and customizing configuring components to the needs of the user and department; conducts problem resolution with users.

Assists in troubleshooting the upgrade and maintenance of local area networks, including hardware/software problems; assists in setting-up users, directories and security systems configuration documentation; maintains system data security tables; assists in analyzing hardware systems to ensure peak performance.

Performs related work as required.

##### MINIMUM QUALIFICATIONS

Completion of 60 semester credits to include 15 semester credits in a computer, cartography, or geography related field is required. Additional related experience may substitute for the required education on a year-for-year basis.

NEW 10/01

#### Nature Of Work

This is entry level technical computer programming, systems analysis, or operating systems programming work.

### Systems Analyst/Programmer 1 (001843)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field or completion of an information technology certification program (Novel, UNIX, Microsoft, or Oracle). One year of programming and systems analysis experience is required. Additional programming and systems analysis experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is technical work in systems analysis in a centralized data processing operation.

Employees in this class are responsible for assisting in the analysis, design and implementation of less complex or smaller scale projects utilizing computer systems. Responsibilities include participation in the completion of new or revised projects of a less difficult nature under the guidance of a superior, and participation in less complex phases of projects including preliminary analysis of feasibility, systems proposals, system design, program documentation, systems implementation and follow up. Employees utilize knowledge of computer capabilities, subject matter of programs in user agencies, and current techniques and methods of systems design in the performance of assigned duties. Supervision is received from a technical superior who serves as a project team leader and provides guidance during work in progress and reviews completed work for quality of results and achievement of objectives.

##### ILLUSTRATIVE TASKS

Participates with other staff members and a technical supervisor in the preliminary analysis of large scale projects; performs tasks including determining the need for information, type of information required, probable cost, and preparation of preliminary systems proposals.

Completes assigned phases in the design of system specifications and completion of program documentation; studies and analyzes existing procedures and prepares system flow charts to describe present and proposed operations.

Participates in documentation for new systems and in the test plan; assists in identifying and correcting errors in program documentation.

Tests, checks and analyzes program instruction for improvements as needed.

Completes less difficult projects not requiring extensive systems analysis and team participation; completes all phases of design and documentation and explains program to users.

Revises program instructions or alters flow charts into coded machine instructions to improve existing programs as assigned.

Performs related work as required.

##### KNOWLEDGE AND SKILLS

Considerable knowledge of the principles and practices of systems analysis and design.

Considerable knowledge of computer programming.

Knowledge of capabilities of computer hardware and software.

Knowledge of the cost of hardware and software systems.

Knowledge of specific computer systems within the area of assignment.

Ability to evaluate user informational requirements.

Ability to determine the feasibility of the application of computer systems to the problem of user informational requirements.

#### Nature Of Work

This is technical work in systems analysis in a centralized data processing operation.

### Systems Analyst/Programmer 2 (001844)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field or completion of an information technology certification program (Novel, UNIX, Microsoft, or Oracle). Two years of programming and systems analysis experience are required. Additional programming and systems analysis experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced and supervisory work in systems analysis in a centralized data processing operation.

Employees in this class are responsible for the analysis, design and implementation of large scale projects utilizing computer systems. Responsibilities include conducting feasibility studies, developing systems proposals, designing and developing systems projects and coordinating systems development with management officials in user departments. Additional duties include coordinating the work of a team of systems analysis and participating programmers assigned to the development of systems projects, conducting or supervising user training as required, and supervising the design of any necessary system revisions. Employees utilize advance knowledge of computer capabilities and subject matter of programs in user agencies in the design of complete systems of a complex nature. General supervision is received from a technical superior who evaluates completed systems work for quality of results and achievement of objectives.

##### ILLUSTRATIVE TASKS

Meets with agency management and supervisory personnel to discuss various operating problems and goals susceptible to computer systems solutions; discusses and evaluates management needs, objectives and goals.

Supervises team preparation of feasibility studies including information required, probable costs, details of systems proposals and related factors.

Meets with management personnel and potential users to present and explain systems proposals.

Assigns phases of systems design work to systems analysts and participating programmers; arrives at design objectives and decisions and develops systems specifications; supervises documentation stages and coordinates work with programming staff; analyzes systems logic difficulties; assures final results of test plan.

Plans all phases of implementation of new systems; formulates user training and supervisory and clerical staff; supervises the conduct of user training and participates as necessary; compiles, composes and assembles total documentation.

Supervises the transfer of documentation into production stages in initial use of the system; meets with management and other personnel in follow-up usage and supervises the design of any necessary revisions.

Supervises or participates in the revision of user agency organizational or procedural studies of a manual systems nature, as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of system analysis and design.

Thorough knowledge of computer programming.

Considerable knowledge of the capabilities of computer hardware and software.

Considerable knowledge of specific computer systems within the areas of assignments.

Some knowledge of supervisory principles and practices.

Ability to evaluate complex user informational requirements.

Ability to determine the feasibility of the application of computer systems to the problem of user informational requirements.

Ability to design complex systems requiring extensive analysis.

Ability to analyze complex systems problems and develop effective solutions.

Ability to develop systems to meet management needs on a timely basis.

Ability to express ideas clearly and concisely, verbally and in writing.

#### Nature Of Work

This is advanced and supervisory work in systems analysis in a centralized data processing operation.

## **Human Resources Department**

---

**Systems Analyst/Programmer 2 (001844)**

### Senior Systems Analyst/Programmer (001845)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer-related field or completion of an information technology certification program (Novel, UNIX, Microsoft, or Oracle). Three years of programming and systems analysis experience are required. Additional programming and systems analysis experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical systems analysis work in a large and complex centralized data processing operation.

Employees in this class assist in designing, developing and implementing new information systems and modifying data processing systems in a variety of subject matter fields. Emphasis of the work is on defining problems and systems objectives, documentation of fact-finding, analysis of results and preparation of findings, recommendations and specifications in formal reports and verbal presentations.

Responsibilities include communication with application programmers in defining system and program specifications, and exercising considerable technical judgment and initiative in applying probability theory and integrating management information and forecasting systems. Incumbents may be assigned to a variety of subject matter areas and may serve as team leaders in the implementation of various systems. Supervision is received from a technical supervisor who reviews work for achievement of desired results and provides assistance, analysis and user communications, as required.

##### ILLUSTRATIVE TASKS

Analyzes management needs regarding information systems, information retrieval, and expanded use of computing and data processing equipment in operations and processes.

Designs complex automated systems for data handling and management decision-making, including specifications of methods and procedures to be followed within the organization.

Participates in finding interviews to gather information; applies current state-of-the-art technology to effect solution of problems; arrives at design objectives and decision.

Coordinates team preparation of studies including gathering of information and preparation of systems proposals, as assigned.

Assures that all phases of system design and development are accomplished according to the selected system methodology and within established departmental standards, schedules and allocated funds.

Directs testing and investigations regarding obtaining the best types of equipment; recommends location and type of equipment for data processing installations.

Organizes and directs feasibility studies, systems analysis and systems design activities; evaluates operational systems and recommends improvements.

Performs cost/benefit analysis of proposed applications to determine whether costs are justified by the purposes to be served on project, scheduling, resources and costs to evaluate approaches and to advise superiors.

Makes formal written and verbal presentations of findings, recommendations and specifications.

Prepares detailed program specifications and system specifications as required; prepares test plans and implementation plans to assure successful implementation of quality systems.

Exercises primary responsibility for system implementation including the monitoring of programming, testing, user training and implementation for adherence to standards and specifications.

Defines security and control procedure for systems.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of advanced computer software and hardware including programming languages, software packages and peripheral equipment.

Thorough knowledge of symbolic logic and the principles of deductive reasoning.

Considerable knowledge of mathematics, mathematical relationships, probability theory and business statistics.

Considerable knowledge of basic governmental accounting and operational procedures.

Ability to comprehend, analyze and interpret organizational and procedural problems, and to make alterations in existing programs.

## Human Resources Department

---

### Senior Systems Analyst/Programmer (001845)

Ability to design and install systems for data processing equipment and to evaluate their effectiveness.  
Ability to develop flow charts and diagrams, devise work flow sequences and prepare complex cost analysis reports.  
Ability to communicate effectively, verbally and in writing.  
Ability to establish and maintain effective working relationships with departmental and other county employees.  
Ability to coordinate team preparation of systems studies.

Advanced programming and/or system maintenance and problem determination experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work planning, designing and implementing operational procedures utilizing various computer hardware and software systems in a centralized data processing operation.

Employees in this class are responsible for reviewing and analyzing software supplied by manufacturers and utilized in conjunction with centralized data processing hardware configurations. Responsibilities include working with other technical data processing personnel to determine optimum configurations required for installation, and analyzing changes and enhancements to software issued by manufacturers and determining impact on existing production systems, systems design and programming standards, and operating procedures. Related responsibilities include guiding systems designers and programmers in the use of systems software and linkage to application programs. Supervision is received from a technical supervisor who confers on application and operational problems and other technical support functions and evaluated work for quality of results.

##### ILLUSTRATIVE TASKS

- Keeps abreast of technological developments concerning systems software supplied by data processing manufacturers.
- Analyzes new and modified software for impact on installation problems, standards and procedures.
- Selects new software or modifications that will enhance operating and development activities.
- Implements new systems software and modifications in an optimal manner and assures minimal adverse effects on current production and testing, and minimal impact on development activities.
- Assists other data processing technical employees in establishing standards for use of installation software.
- Prepares instructional materials for systems designers, programmers, and operators that describe effects and new requirements resulting from changes to systems software.
- Designs, codes, tests and implements special software required by the installation.
- Identifies and documents standards for use and operation of systems software.
- Analyzes production and testing problems to determine causes of systems software malfunctions and makes corrections, as required.
- Performs related work as required.

##### KNOWLEDGE, ABILITIES AND SKILLS

- Thorough knowledge of the design and capabilities of computer hardware and software.
- Thorough knowledge of computer programming, including IBM Assembler.
- Considerable knowledge of symbolic logic, mathematics and business statistics.
- Considerable knowledge of systems analysis and design.
- Considerable knowledge of current technical developments in systems software.
- Ability to define application and operational problems and develop effective solutions.
- Ability to detect malfunctions in vendor hardware and software.
- Ability to work effectively with vendor representatives in the solution of equipment related problems.
- Ability to establish and maintain effective working relations with data processing officials and officials of user departments and agencies.
- Ability to furnish competent technical advice on systems capability in the design of complex systems.
- Ability to express ideas clearly and concisely, verbally and in writing.

#### Nature Of Work

This is advanced technical work planning, designing and implementing operational procedures utilizing various computer hardware and

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field. Four years of advanced programming and/or system maintenance and problem determination experience are required; or Completion of an information technology certification program (Novel, UNIX, Microsoft, or Oracle). Six years of advanced programming and/or system maintenance and problem determination experience are required. Advanced programming and/or system maintenance and problem determination experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced and responsible technical work planning, designing and implementing operational procedures utilizing various computer hardware and software systems in a centralized data processing operation.

Employees in this class are responsible for analyzing current and planned system usage and developing recommendations for software systems utilized in conjunction with centralized data processing configurations. Responsibilities include participating in system hardware and software installation and maintenance, defining standards for efficient utilization of system resources and assuring maximum availability and reliability of computer system software and related components. Incumbents may be assigned to direct and train subordinate systems programmers. This classification is distinguished from Systems Programmers in that incumbents perform advanced technical work in one or more highly specialized technical phases of software systems and programming. Supervision is received from a technical and administrative superior who reviews work for effectiveness in completing assigned responsibilities.

##### ILLUSTRATIVE TASKS

- Defines hardware and software requirements to meet teleprocessing, database, or operating system needs.
- Installs and maintains data transmission networks and/or operating software in support of data processing systems.
- Assures maximum availability and reliability of component software.
- Analyses current and planned teleprocessing, database, or operating systems to assure adequate capabilities.
- Provides system training for operations and programming personnel.
- Determines available software to meet system requirements.
- Analyses trends in DASD (Direct Access Storage Device) utilization to assure adequate availability.
- Defines system performance parameters based on batch job turnaround time, elapsed time, throughout, terminal response, and transaction time.
- Assists programming and operations staff in solution of system problems.
- Provides continued maintenance of installed systems to assure that adequate capacity is available at economic cost.
- Monitors system performance and recommends modifications as needed.
- Analyses system software problems reported to Problem Management Personnel.
- Provides consultation services to programming, operations, and data control personnel.
- Prepares and distributes informational bulletins relating to system software changes.
- Assists in establishing standards for use of installation software.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Thorough knowledge of the design and capabilities of computer hardware and software.
- Thorough knowledge of computer programming.
- Thorough knowledge of symbolic logic, mathematics and business statistics.
- Thorough knowledge of systems analysis and design.
- Thorough knowledge of current technical developments in systems software.
- Ability to define application and operational problems and develop effective solutions.
- Ability to detect malfunctions in vendor hardware and software.
- Ability to work effectively with vendor representatives in the solution of equipment related problems.
- Ability to establish and maintain effective working relations with data processing officials and officials of user departments and agencies.

---

### Senior Operating Systems Programmer (001851)

Ability to furnish competent technical advises on systems capability in the design of complex systems.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to analyze current and planned computer system usage and make effective recommendations to provide for future capabilities.

#### **Nature Of Work**

This is advanced and responsible technical work planning, designing and implementing operational procedures utilizing various computer hardware and software systems in a centralized data processing operation.

## Human Resources Department

### Systems Support Manager (001853)

#### Minimum Qualifications

Bachelor's degree to include 15 semester credits in a computer related field are required. Eight years of progressively responsible experience in systems maintenance and problem determination are required. Experience in a computer related field may substitute on a year-for-year basis for required education.

#### Job Specifications

##### NATURE OF WORK

This is complex and specialized technical support work in planning, designing, implementing, evaluating and maintaining of specialized software programs used in support of applications and control systems.

An employee in this class is responsible for supervising the work of Systems Programmers performing a variety of specialized technical assistance functions for operational and programming sections of a county data processing installation. Duties include directing the analysis of vendor software, determining corrective measures for hardware and software malfunctions, determining the most feasible design for interfaces between hardware applications systems, and establishing and enforcing software utilization standards. Additional responsibilities include conducting feasibility and cost studies of new programs and installations. General direction is received from an administrative superior who confers an application and operation problems and evaluates work for quality of results.

##### ILLUSTRATIVE TASKS

Establishes standards in conjunction with Quality Assurance Group for development, maintenance and use of software packages; identifies requirements for customized software; estimates resource requirements and costs for developing specialized software and directs the development, design, programming and testing of specialized software.

Directs acquisition of appropriate software packages, establishing methods for classifying options and alternatives, and for selecting among alternatives of system software packages provided by manufacturers.

Determines cost benefit alternatives for various configurations of operating software; determines potential adverse or favorable impact of new software applications on current operations and requirements for new software.

Selects systems software, reviews and approves results of software tests prior to implementation; implements new software packages and modifications ensuring minimal adverse impact on current production, testing and systems development.

Analyzes more complex software application and operational problems with vendor representatives; applies modifications to vendor software to correct problems; provides advanced technical advice and assistance to operational and programming personnel where difficulty is encountered in planning, designing or implementing new systems.

Works with departmental training coordinator to plan and conduct training courses for systems designers, programmers and operators in the use and operation of installation software.

Assist in achieving and maintaining favorable cost performance ratios through selection of suitable system control software and hardware configurations; establishes methods for gathering data needed to monitor system control software and hardware performance; identifies changes needed to adapt to problems and to anticipate future needs; evaluates software and initiates actions for improvement.

Plans and initiates actions for the acquisition, training and development of Systems Programmers and other staff; schedules and assigns work and assures best utilization of staff members; prepares performance evaluations; discusses work related problems with employees and initiates actions for performance improvement; holds meetings with staff to explain and discuss new or revised procedures; approves employee leave.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of systems analysis and design, and computer programming.

Thorough knowledge of the design, capabilities and cost effectiveness of vendor hardware and software.

Thorough knowledge of the technical maintenance of vendor hardware and software.

Thorough knowledge of advanced computer software and hardware including programming languages, software packages and modern peripheral equipment.

Thorough knowledge of the capabilities and cost of hardware and software resources.

Considerable knowledge of mathematics and statistics including differential and linear equations, optimization, simulation and forecasting.

Considerable knowledge of principles and practices of supervision applicable to a technical staff.

### Systems Support Manager (001853)

Considerable knowledge of the theory of management and the installation and evaluation of administrative procedures.

Ability to plan, coordinate and supervise the work of a staff of technically trained employees in a manner conducive to full performance and high moral.

Ability to make decisions based on sound judgment and to evaluate progress of the overall service.

Ability to interpret system statements; develop general and detailed flow charts and to prepare descriptions of hardware and software configurations.

Ability to define application and operation problems and to develop solutions.

Ability to detect malfunctions in vendor hardware and software, and to coordinate effectively with vendor representatives in the solution of equipment related problems.

Ability to furnish competent technical advice on systems capability in the design of complex systems.

Ability to establish and maintain effective working relationships with data processing personnel and personnel in user departments.

Ability to express ideas clearly and concisely, orally and in writing.

#### **Nature Of Work**

This is complex and specialized technical support work in planning, designing, implementing, evaluating and maintaining specialized software programs used in support of applications and control systems.

#### **Nature Of Work**

This is technical work responsible for quality assurance of development projects.

### Production Control Specialist (001858)

#### Minimum Qualifications

High school diploma or GED and two years of production support experience in a large-scale data processing installation; or completion of 30 semester credits to include six semester credits in Computer Science and one year of production support experience in a large scale data processing installation are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized technical work in analyzing computer production problems, coordinating the availability of required materials for computer processing, and operating various devices to create and handle computer output in a large centralized data processing operation.

Employees in this class are responsible for analyzing computer production problems and adjusting computer processing schedules to utilize available time until problems are corrected and reruns can be initiated. Duties include coordinating the receipt of data inputs from the data entry function and file available from the library to ensure that required materials are accessible at the computer for timely processing, monitoring and mounting tapes on disc drives, and scheduling and printing reports. Related responsibilities include inspecting data input and output for accuracy and communicating with programmers and user agencies on job status and problem resolution. Work is performed in accordance with established data processing procedures and workload schedules, and employees may be required to work various shifts. All work is subject to inspection in progress and upon completion by a technical superior for proper scheduling format and for conformance to departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Analyzes computer production problems and adjusts computer processing schedules to utilize available time until problems are corrected and reruns can be initiated.

Assembles data inputs, control cards and procedures and determines file availability from library to ensure that all required materials are accessible at the computer to process a program or series of linked programs.

Assembles files and materials for individual jobs in accordance with established data processing procedures and workload schedules.

Maintains batch or detailed control on all acceptable input; refers to job control language printouts, verifies batch totals and inspects data input for accuracy and conformance to established standards.

Assembles data outputs with other materials for subsequent processing; reviews system message log when abnormal endings occur; initiates action required to re-process aborted or incorrect jobs.

Communicates with programmers and user agencies on job status and appropriate problem resolution; receives special requests for services from user agencies such as increasing the number of covers of a job or running special jobs.

Develops procedures manuals for production and runs and aide in the design and development of controls for procedures for any new applications.

Prepares batch transfers for on-line data entry.

Provides training in data processing production control techniques to other departmental employees as assigned.

Gathers statistics on tape usage, tape drive errors and various library functions for periodic status reports.

Checks audit reports for discrepancies and if any occur makes immediate report to system staff.

Evaluates physical quality performance of tapes, strips and/or replaces by means of automatic evaluation equipment; operates printer.

Distributes daily "EREF" report to alert programming staff of read or write errors on their particular volumes.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of operating characteristics of computers and peripheral equipment used in data processing.

Knowledge of routing, scheduling and priority of programs going to and from computer processing.

Knowledge of job control language utilized in a central data processing operation.

Knowledge of established procedures used in program and job documentation.

Knowledge of established departmental operating policies, rules and procedures.

Knowledge of the content of items on incoming forms and computer printouts.

Ability to analyze and detect errors in establishing procedures and computer formats.

Ability to analyze computer production problems and adjust computer processing schedules accordingly.

### **Production Control Specialist (001858)**

- Ability to ensure that input data is submitted according to schedule.
- Ability to assemble data inputs, control cards, procedures and related materials required to process a program or series of linked programs.
- Ability to balance and reconcile predetermined numeric totals on source documents with computer produced compilations.
- Ability to keep accurate records of all incoming and outgoing material processed on computer hardware.
- Ability to apply job control language to correct errors or notify programmers of specific causes of a program breakdown.
- Ability to maintain effective working relationships with staff members, superiors and representatives of user agencies.
- Ability to initiate action required to re-process aborted or incorrect jobs.
- Ability to develop procedural manuals for production runs.
- Ability to prepare batch transfers for on-line data entry.

#### **Nature Of Work**

This is specialized technical work in analyzing computer production problems, coordinating the availability of required materials for computer processing, and operating various devices to create and handle computer output in a large centralized data processing operation.

### Technical Support Analyst (001860)

**Minimum Qualifications**

Completion of 60 semester credits to include 15 semester credits in a computer related field and three years of experience in programming, systems analysis or systems programming are required; or completion of an information technology certification program (Novell, UNIX, Microsoft, or Oracle) and five years of experience in programming, systems analysis or systems programming experience are required. Bachelor's degree in Computer Science and two years of experience in technical computer information systems training; or Bachelor's degree to include 15 semester credits in Computer Science and two years of experience in technical computer information systems training are required. Additional related experience may substitute for the education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional, technical and administrative work in the development, administration and evaluation of a highly technical range of training programs in the Information Technology Department.

An employee in this class is responsible for planning and coordinating advanced technical training programs for data processing and communications professionals. Emphasis of the work is on utilizing advanced data processing hardware and software to plan, implement and evaluate technical training programs, consulting with supervisors to determine training needs and priorities, recommending additional training activities to supervisors and management, and maintaining contacts with various specialized vendors, County and community educational resources. Supervision may be exercised over subordinate employees assisting in the preparation and implementation of data processing training programs. Supervision is received from an administrative superior who reviews program activities for timely progress in meeting training goals and objectives.

##### ILLUSTRATIVE TASKS

Coordinates the planning, design and implementation of training classes and other learning activities for ITD and its customers.

Advises programmers, systems analysts, computer operators, line supervisors and other personnel on the most appropriate means of meeting training needs; applies a wide range of data processing/communications training techniques, options and programs, and makes recommendations when consulted.

Performs training needs assessments by use of automated systems; maintains statistical data base associated with training needs surveys.

Conducts in-depth, formal, systematic evaluation activities of automated training products such as Computer Based Training (CBT), Interactive Video System (IVI), and other systems through coordination with supervisors and employees; prepares reports on the quality and quantity of the training accomplished; utilizes personal computers and mainframe to prepare and distribute course catalogs and updates; utilizes automated systems for CBT registration, grading, and records maintenance.

Approves requests for educational leave and travel; advises employees on availability of outside technical training courses, course requirements and related career development information; assists in completing arrangements for use of instructors or consultants from outside institutions in the preparation and conducting of technical training programs.

Introduces new training technologies, updated releases, and maintains training materials inventory for department.

Participates in the development of departmental training budget; identifies new technical training resources.

Assists students with subject matter and operation of training equipment; schedules rooms, equipment and materials to support training activities; monitors students' progress and provides regular status reports to students' supervisors.

Prepares, compiles and edits training materials including outlines, training schedules, lesson plans and training aids; assures that all items needed for training are available on schedule to all registered students; develops mechanisms, activities, programs, and systems to facilitate technical continuing education.

Performs related work as required.

### Technical Training Specialist 3 (001864)

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of employee training principles, practices and methods.

Knowledge of data processing hardware and software used in ITD.

Knowledge of ITD host and micro applications, data bases and network operations.

Knowledge of data processing/communications trends, developments and issues.

Knowledge of automated record keeping and report generation systems.

Ability to plan, develop, implement and evaluate technical training to all functional areas within ITD.

Ability to conduct needs assessment studies.

Ability to evaluate and select vendor training products.

Ability to coordinate with all organizational levels as well as customers in the delivery of technical training.

Ability to express oneself clearly and concisely, both verbally and in writing.

#### **Nature Of Work**

This is advanced professional, technical and administrative work in the development, administration and evaluation of a highly technical range of training programs in the Information Technology Department.

## Human Resources Department

### Senior Security Systems Engineer (001867)

#### Minimum Qualifications

Six years of IT network experience are required and five years of information security experience are required.

#### Job Specifications

#### Nature Of Work

### Database Administrator (001868)

#### Minimum Qualifications

Bachelor's Degree in Information Technology. Two years of experience in support of the given DBMS, including installation, patching, troubleshooting, database installs and restructures and advanced programming and/or system maintenance and problem determination are required. Additional relevant experience may substitute for the degree on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is responsible technical work installing and maintaining Database Management Systems Software.

Incumbents are responsible for reviewing and analyzing database software supplied by manufacturers and utilized in conjunction with centralized data processing hardware configurations. Responsibilities include working with other technical data processing personnel to determine optimum configurations required for installation, and analyzing changes and enhancements to software issued by manufacturers and determining impact on existing production systems, systems design, programming and database standards, and operating procedures. Related responsibilities include guiding systems designers and programmers in the use of database software and linkage to application programs. Supervision is received from a technical supervisor who reviews work for achievement of desired results and provides assistance, analysis and user communications, as required.

##### ILLUSTRATIVE TASKS

Keeps abreast of technological developments concerning database software supplied by database manufacturers.

Analyzes new and modified database software for impact on installation problems, standards and procedures; selects new software or modifications that will enhance database and development activities.

Implements new database software and modifications in an optimal manner and assures minimal adverse effects on current production and testing, and minimal impact on development activities.

Assists other data processing technical employees in establishing standards for use of database software.

Prepares instructional materials for system designers, programmers and developers that describe effects and new requirements resulting from changes to database software.

Designs, codes, tests and implements special software required by the installation.

Identifies and documents standards for use and operation of database software.

Analyzes production and testing problems to determine causes of database software malfunctions and makes corrections, as required.

Performs related work as required.

##### KNOWLEDGE SKILLS & ABILITIES

Thorough knowledge of the given DBMS assigned and support tools used.

Thorough knowledge of database software and its impact on installation problems, standards and procedures.

Knowledge of DBMSs utilized/managed by ITD such as IDMS, Oracle, DB2, SQL Server, UDB/LUW on z/OS, AIX, SUN Solaris, Windows, Linux.

Ability to define and maintain database objects.

Ability to install vendor package applications for the given DBMS assigned.

Ability to provide system support and programming in the given operating system.

Ability to troubleshoot and resolve problems for the given DBMS assigned.

Ability to communicate effectively, verbally and in writing.

Ability to establish and maintain effective working relationships with departmental and other county employees.

Skill in performance monitoring and tuning in the given environment.

## Database Manager (001875)

### Minimum Qualifications

#### Job Specifications

##### NATURE OF WORK

This is responsible complex and specialized technical support work with supervisory responsibility monitoring and supporting County-wide critical production systems using Oracle, DB2, IDMS, SQL Server and UDB/LUW DBMS Systems Software and RDBMS related products. Incumbents provide support in planning, designing, implementing, evaluating and maintaining specialized software programs used in support of applications and control systems. Responsibilities include directing the analysis of vendor software, determining corrective measures for hardware and software malfunctions, determining the most feasible design for interfaces between hardware applications systems, and establishing and enforcing software utilization standards. Additional responsibilities include managing and maintaining County-wide DBMS software licenses, conducting feasibility and cost studies of new programs and installations. Incumbents supervise the work of DBAs and SDBAs engaged in performing a variety of Database Administration functions for operational and programming sections of a county data processing installation. Supervision is received from a technical supervisor who reviews work for achievement of desired results and provides assistance, analysis and user communications, as required.

##### ILLUSTRATIVE TASKS

Establishes standards in conjunction with Quality Assurance Group for development, maintenance and use of software packages; identifies requirements for customized software; estimates resource requirements and costs for developing specialized software and directs the development, design, programming and testing of databases and related software.

Directs the acquisition of appropriate software packages, establishing methods for classifying options and alternatives, and for selecting among alternatives of system software packages provided by manufacturers.

Determines cost benefit alternatives for various configurations of database software; determines potential adverse or favorable impact of new database software on current operations and requirements of the new software.

Prepares an annual budget and selects database software, reviews and approves results of software tests prior to implementation; implements new database packages and modifications ensuring minimal adverse impact on current production, testing, system development.

Analyzes more complex software application and operational problems with vendor representatives; applies modifications to vendor software to correct problems; provides advanced technical advice and assistance to operational and programming personnel where difficulty is encountered in planning, designing or implementing new systems.

Assists in achieving and maintaining favorable cost performance ratios through selection of suitable system control software and hardware configurations; establishes methods for gathering data needed to monitor database performance; identifies changes needed to adapt to problems and to anticipate future needs; evaluates software and initiates actions for improvement.

Plans and initiates actions for the acquisition, training and development of DBAs and other staff.

Plans, assigns and reviews the work of subordinate staff; holds meetings with staff to explain and discuss new or revised procedures.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates, authorizes leave and overtime; reviews employee performance reports prepared by subordinates, and rates employee performance.

Performs other related work.

##### KNOWLEDGES SKILLS & ABILITIES

Thorough knowledge of system analysis and design, and computer programming.

Thorough knowledge of the design, capabilities and cost effectiveness of vendor hardware and software; thorough knowledge of the technical maintenance of vendor hardware and software.

Thorough knowledge of DBMS and related software.

Thorough knowledge of the capabilities and cost of DBMS resources.

Considerable knowledge of mathematics and statistics including differential and linear equations, optimization, simulation and forecasting.

Considerable knowledge of principles and practices of supervision applicable to technical staff.

Considerable knowledge of the theory of management and the installation and evaluation of administrative procedures.

Ability to plan, coordinate and supervise the work of a staff of technically trained employees in a manner conducive to full performance and high moral.

Ability to make decisions based on sound judgment and to evaluate progress of the overall service.

Ability to interpret system statements.

Ability to develop general and detailed flow charts and to prepare descriptions of hardware and software configurations.

Ability to define application and operation problems and to develop solutions.

Ability to detect malfunctions in vendor hardware and software, and to coordinate effectively with vendor representatives in the solution of

### Database Manager (001875)

equipment related problems.

Ability to furnish competent technical advice on systems capability in the design of complex systems;

Ability to establish and maintain effective working relationships with other employees, supervisors, departmental officials, officials of other agencies and the general public.

Ability to express ideas clearly and concisely, orally and in writing.

### Middleware Senior Administrator (001884)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field and four years of advanced programming and/or system maintenance and problem determination experience are required; or completion of an information technology certification program and six years of advanced programming and/or system maintenance and problem determination experience are required. Advanced programming and/or system maintenance and problem determination experience may substitute for the required education on a year-for-year basis. Technical certifications in middleware software environments and related technologies are desirable.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work responsible for design, architecture, and hands-on implementation of enterprise middleware software environments including but not limited to portal, web application servers, messaging, voice response collaboration, web services and related middleware components in three environments, Integration, Staging and Production that provide services to customers. This is a technical position that involves a blend of skills with a high focus on technical skills, the ability to communicate complex technical concepts to customers and heavy project management duties. Supervision is received from a technical supervisor who confers on application and operational problems and other technical support functions and evaluated work for quality of results.

##### ILLUSTRATIVE TASKS

Administers and maintains all production and other mission critical technology associated with the middleware software environments including installation, maintenance and error correction to ensure the stability and reliability of all environments

Upgrade middleware software environments by conferring with vendors and application team; and developing, testing, evaluating and installing enhancements and new software.

Maintain middleware software environments' performance to maximize server uptime via monitoring and analysis; performance tuning; troubleshooting system hardware, software and operating system issues; and escalating application problems to the vendor and server issues to the server support team.

Assigns and organizes work for junior staff and monitors their progress.

Implement and troubleshoot all database connections with industry standard relational databases.

Secure middleware software environments by developing system access, monitoring, control and evaluation; ensuring system backup; ensuring system OS patching; and maintaining system documentation.

Develop, organize and maintain standard operational procedures; establish and test disaster recovery policies and procedures; and support the design and execution of system load/stress testing.

Proactively monitor and resolve assigned customer trouble tickets within appropriate time frames and escalate tickets as necessary.

Address customer requests consistent with customer/business requirements, mutually agreed upon availability and performance criteria.

Perform customer-facing engagements in related technology areas consistent with this job description.

Participate in technical educational activity to communicate the value-added services of middleware technology.

Build proof-of-concept systems and demonstration environments.

Establish and maintain relationships with customers.

Maintain relevant and current knowledge within assigned technical fields.

Manage large scale IT projects and cross divisional teams assigned to their projects.

Submit status reports and conduct project status meetings.

Provide technical consultations and presentations to IT and external customers as needed.

Represent the team in departmental and/or customer meetings as needed.

##### KNOWLEDGE, ABILITIES AND SKILLS

Advanced knowledge of and experience in enterprise class middleware software environment administration including the ability to evaluate, install, test, configure, maintain, monitor performance of applications and their components

Ability to provide technical assistance to application development teams for systems administration

## Human Resources Department

---

### Middleware Senior Administrator (001884)

Advanced analytical, troubleshooting and test skills

Advanced configuration management skills with applicable experience in both web application and client/server environments.

Advanced knowledge of security concepts and their application on the middleware software environments currently implemented, including security certificates and SSL, security and integration features of portals, such as WebSphere Global Security, SSO, portal credential vault, SSL, LDAP, and WebSphere Member Manager; TIM/TAM integration.

Experience with industry standard relational databases.

LDAP administration skills a requirement.

Ability to create and maintain processes required for effective systems administration

Exceptional organizational, documentation and communication skills

Expertise in load management, clustering, failover and high availability of middleware software environments

Thorough understanding of Java/J2EE programming concepts and development environments.

Advanced knowledge and use of the full scope of desktop productivity tools.

#### **Nature Of Work**

This is advanced technical work responsible for design, architecture, and hands-on implementation of enterprise middleware software environments including but not limited to portal, web application servers, messaging, voice response collaboration, web services and related middleware components in three environments, Integration, Staging and Production that provide services to customers.

## Claims Representative 1 (001903)

### Minimum Qualifications

High school diploma or GED. One year of specialized clerical experience in a claims or employee service environment is required.

### Job Specifications

#### NATURE OF WORK

This is specialized clerical work in the processing and evaluation of workmen's compensation, public liability and automobile liability claims.

Employees in this class perform various clerical duties and related public contact work in processing all types of claims and maintaining related records. Duties require use of tact in obtaining claim information and communicating with claimants, county employees, physicians, hospitals and officials of other county offices and of various municipalities. Incumbents must be able to apply knowledge of statutory requirements in claim processing and skill in the use of a typewriter and calculator. Supervision is received from administrative superiors who offer assistance in resolving unusual problems or obtaining required information and review work for accuracy and thoroughness in processing.

#### ILLUSTRATIVE TASKS

Receives incoming first reports of injury in workmen's compensation cases and automobile and public liability first reports in liability cases. Reviews claims for completeness; contacts county departments or municipalities insured under the county's workmen's compensation plan to obtain additional information such as return to work dates and names of witnesses.

Requests first reports of injury from proper department when medical information is received and no record is found; maintains alphabetical file on pending first reports.

Establishes claimant files; codes all first reports for computer input according to established procedures; numbers first reports and maintains claims register; refers claims to supervisors for establishment of reserves and to safety official for review; maintains chronological records of action on cases assigned.

Types correspondence for adjusters and supervisors; transcribes recorded statements; maintains automobile accident log, logs computer batches and files master control cards; periodically reconciles computer data on printouts against files; closes files, maintains closing log and prepares data input to close computer files; prepares periodic reports required by the State.

Reviews bills for workmen's compensation and medical expenses for conformance to medical and surgical fee schedules; adjusts charges according to established procedures; prepares payment vouchers, codes payments for computer input and maintains payment record on each file.

Assists supervisors, adjusters and attorneys in their investigations by initiating investigative requests; refers interrogatives to proper agency, requests police reports, departmental reports, photographs and other related materials; maintains litigation log.

Answers inquiries and provides information to claimants, physicians, hospitals, physical therapists and pharmacies concerning continuing patient care, billings and reports; arranges transportation, nursing care and hospital admission for claimants.

Prepares releases and Pay-to-Orders for settlement of claims and payment of claims, investigation fees, appraisal bills and attorney's fees. Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of clerical procedures involved in processing workmen's compensation, general liability and automobile liability claims.

Knowledge of Florida Statutes, local ordinances and departmental regulations relating to workmen's compensation.

Knowledge of general office procedures, practices and equipment.

Some knowledge of medical terminology in the review of diagnostic and treatment records.

Ability to make mathematical computations with speed and accuracy.

Ability to maintain financial records accurately.

Ability to assemble information from office records and prepare accurate and complete reports.

Ability to process claims in accordance with applicable instructions.

Ability to communicate effectively with claimants, county officials, third party insurance carriers and medical staffs in the community.

Ability to prepare computerized input forms and understand instructions regarding the related data processing system.

### Job Specifications

#### NATURE OF WORK

This is specialized office and field work in the investigation and adjustment of public liability and property loss or damage claims. Employees in this class are responsible for investigation and adjustment of cases involving claims for alleged damages arising from the operation or use of county property. Duties require the application of specialized insurance knowledge to determine liability and the feasibility of an equitable adjustment, and responsible contact with various local government officials whose municipalities are insured through county liability coverage. Incumbents are also responsible for the settlement of claims within a limited settlement authority. Work differs from that found in the Liability Claims Investigator class in that incumbents exercise considerable discretion and independent judgment in negotiating with claimants and attorneys to reach equitable settlements and avoid litigation. Supervision is received from an administrative superior who assigns cases for investigation, adjustment and reviews work primarily for the attainment of factual information upon which settlement is made, or where higher level disposition and legal action may be required.

#### ILLUSTRATIVE TASKS

Analyzes reports of public liability and property damage claims arising from the operation or use of county property in order to determine validity of claims and extent of county liability exposure.

Conducts field and telephone investigations by locating and interviewing witnesses, claimants, county employees, law enforcement officers and other parties.

Negotiates directly with claimants and attorneys and attempts to effect an equitable settlement; makes settlements within their settlement authority.

Assists in the preparation of cases for trial by obtaining statements, taking photographs and measurements, and arranging for witnesses to appear in court; testifies in court and attends litigation mediations.

Initiates location investigations in serious liability cases and obtains information useful in the assessment of cases. Prepares written case evaluations, outline facts, damages, exposure and settlement recommendations.

Recommends litigation when settlement cannot be negotiated.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of investigative techniques and practices used in the negotiation and adjustment of civil liability claims.

Considerable knowledge of the general theory and content of negligence and public liability laws.

Considerable knowledge of litigation preparation as related to evidence, admissible statements and medical testimony.

Knowledge of departmental practices and procedures as related to claims investigation and settlement.

Knowledge of local government organization, functions and safety provisions.

Ability to analyze facts and exercise sound judgment in arriving at conclusions.

Ability to obtain complete information through interview and observation methods.

Ability to make immediate decisions on claim adjustment matters.

Ability to deal tactfully and courteously with claimants, attorneys, physicians and the general public.

Ability to maintain complete records and to prepare and submit accurate reports.

Ability to analyze accidents from written reports and location investigations.

Ability to perform unsupervised field work.

Ability to conduct investigations and to ascertain concealed information.

### Nature Of Work

This is specialized office and field work in the investigation and adjustment of public liability and property loss or damage claims.

### Insurance Data Supervisor (001927)

#### Minimum Qualifications

High school. Four years of advanced clerical experience to include performing data entry are required.

#### Job Specifications

##### Nature of Work

This is technical and supervisory work in the management of an insurance data information system.

An employee in this class is responsible for the maintenance of the database for a computerized risk management information system and computerized checkwriting. Emphasis of the work is on planning, development, compliance, and coordination of the system to meet the needs of all users and all applicable requirements. Additional responsibilities include training of technical subordinates and claims employees in procedures for new programs, designing of input forms, and preparation of a variety of required reports. Supervision is exercised over a staff of technical and clerical employees engaged in receiving and entering a variety of data and performing tasks in the maintenance of the insurance data system. Supervision is received from a professional supervisor who holds the incumbent responsible for operational efficiency.

#### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate technical and clerical employees engaged in the maintenance of data for the computerized risk management information system and computerized checkwriting; advises, monitors and assists with work in progress and assures completion according to internal scheduling requirements.

Coordinates the use of the insurance data system for all users; designs input forms, writes and maintains procedures for use of new programs and trains employees in these procedures.

Reviews and updates database records as necessary to maximize system utilization, comply with state statutes, and federal laws, e.g. reviews and updates location codes, vendor records, database tables, etc.

Keeps informed of all new system enhancements and assists in the development of new computer programs.

Prepares and submits a variety of reports necessary to comply with a variety of State and County ordinances, rules and regulations; retrieves information as required.

Maintains contact with various departments and municipalities regarding the interpretation of various reports; corrects errors as needed.

Maintains contact with private computer service to discuss hardware, software and maintenance matters.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance. Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of computer scheduling requirements in a risk management information system.

Knowledge of the operating characteristics of modern electronic data processing equipment.

Knowledge of departmental policies and procedures and State and County laws pertaining to claims administration, Worker's Compensation and Liability Insurance.

Knowledge of input forms and coding requirements necessary for accurate data input.

Knowledge of procedure manuals and their application to risk and insurance data management.

Knowledge of the various reporting responsibilities required by State and County ordinances, rules and regulations.

Some knowledge of the design and capabilities of computer software and hardware.

Some knowledge of supervisory principles and practices.

Some knowledge of computer programming.

Ability to plan, organize and coordinate a large volume of work in an effective and timely manner.

Ability to operate data processing and peripheral equipment.

Ability to detect equipment and program malfunctions.

Ability to prepare reports required by the State and County ordinances, rules and regulations.

Ability to develop new applications for a risk management information system.

Ability to supervise subordinate personnel in a manner conducive to full performance and high morale.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to establish and maintain effective working relationships with other employees, supervisor, department officials, officers of municipalities and the public.

### Safety Specialist 2 (001965)

#### Minimum Qualifications

Bachelor's degree. One year of professional administrative experience in industrial or vehicular safety or accident prevention programs, safety training programs, or closely related experience is required. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical field and office work in a departmental employee industrial safety and vehicle accident prevention program. Employees in this class are responsible for performing a variety of complex duties in support of a loss control program to prevent employee on-the-job accidents. Responsibilities include the periodic inspection of various facilities, buildings and equipment, preparation of reports detailing findings and recommendations, investigation of industrial accidents and the provision of educational training courses for employees and supervisors to prevent on-the-job injuries. Incumbents may be responsible for the development of a loss control program for a County department engaged in large-scale industrial operations. Supervision may be exercised over subordinate technical and clerical employees that assist with various phases of a safety program. Supervision is received from a professional or administrative superior through personal conferences and review of written reports for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Performs inspections of various County facilities, buildings and equipment to determine proper adherence to established safety standards and to assure that accident prevention techniques are being fully implemented.

Prepares written reports of field inspections and discusses findings and recommendations with various County officials to assure correction of unsafe conditions and minimize losses.

Performs investigations of industrial accidents which cause damage to County property and/or injury to persons; determines causes of accidents and develops recommendations for appropriate actions to prevent recurrences such as changes in work procedures or the provision of specialized equipment for employee protection.

Conducts educational safety training courses for County employees in proper safety practices, first aid, and in the safe operation and maintenance of vehicles and equipment.

Advises superiors of unique or unusual conditions which have the potential of resulting in large monetary losses.

Exercises responsibility for the development and administration of a loss prevention program in a department characterized by large scale industrial operations; schedules and conducts safety meetings with department supervisors; assists supervisors in the preparation of accident reports; evaluates causes of industrial accidents and develops recommendations for changes in work procedures or equipment; analyzes departmental accident frequency and severity rates.

Develops, organizes, prepares and revises departmental safety manuals; prepares periodic reports on progress of safety program, cost analyses and other subjects as required.

Develops specifications and makes recommendations for the purchase of new or improved safety equipment.

Maintains contacts with local, State and national safety organizations to keep informed on current developments in the safety field.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of loss prevention practices, procedures and techniques used in varied employment situations and equipment operations.

Considerable knowledge of the objectives of the loss control program to which assigned.

Considerable knowledge of standard safety equipment and safedriving methods applicable to varied types of vehicle operations and work areas.

Considerable knowledge of hazardous working conditions and equipment operations in various work environments.

Knowledge of accident prevention records and statistical measurements of accident frequency and severity.

Ability to detect hazardous working conditions in varied work environments and equipment operations.

### Risk Management Insurance Representative (001970)

#### Minimum Qualifications

High school diploma or GED. One year of experience in an insurance environment is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced specialized clerical work assisting in the administration of property and casualty insurance programs.

An employee in this class is responsible for maintaining comprehensive listings of County properties and developing underwriting information for insurance bid specifications. Duties include preparing property schedules, reviewing insurance policies, researching information for underwriting data, handling required bonds for various County officials, identifying exposures which could result in a loss to the County, and assisting with the property insurance claim for damages to County properties by Hurricane Andrew. Supervision is received from an administrative superior who reviews work through reports and personal conferences for satisfactory assistance in the development of underwriting data, claim processing, and related risk management duties.

##### ILLUSTRATIVE TASKS

Maintains comprehensive listings of County properties to be insured; prepares schedules based on information received from County departments, site visits, and appraisals.

Maintains a computerized database for property schedules; enters information, calculates increased values and generates reports.

Researches information for underwriting data for insurance bid specifications; reviews current insurance policies, obtains information from insurance companies, County departments, and other sources; prepares portions of bid specifications.

Handles bonds for various County officials as required by Florida Statutes; verifies premium charges and corresponds with state authorities to ensure compliance with statutory requirements.

Identifies exposures which may result in a loss to the County.

Assists in processing the property insurance claim for damages suffered to County property by Hurricane Andrew; reviews coverage determinations made by insurance company; researches policy schedules and contacts County departments if further information is needed for a determination of coverage by the insurance company; compares insurance company's determination of coverage to insurance policy and questions denial of coverage, if necessary.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the content and provisions of property and casualty insurance policies.

Knowledge of property and casualty insurance coverages.

Knowledge of insurance terminology.

Knowledge of the clerical and administrative procedures involved in processing property and casualty claims.

Knowledge of requirements for underwriting data for insurance bid specifications.

Knowledge of modern office practices and procedures.

Ability to develop comprehensive listings of County properties for insurance coverage purposes.

Ability to make mathematical calculations with speed and accuracy.

Ability to develop underwriting data for insurance bid specifications.

Ability to process complex claims in accordance with applicable instructions.

Ability to communicate effectively with insurance adjusters concerning property and casualty claims.

Ability to operate modern office equipment.

Skill in the use of computer terminals, calculators, and other office equipment.

### Risk Management Specialist (001973)

#### Minimum Qualifications

Bachelor's degree in Risk Management, Business Administration, Public Administration, Finance, or related field.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional work in the determination of insurance requirements and administration of insurance policies purchased by the county.

An employee in this class is responsible for writing insurance requirements for county operations, preparing specifications for the purchase of insurance policies, evaluation of proposals and administration of insurance policies purchased by the county. Responsibilities include preparing legal advertisements announcing request for bid proposals, analyzing bid proposals, preparing resolutions for Commission action, reviewing and calculating insurance billings, and assisting in research and development of new insurance programs. Considerable independent judgment is exercised in the application of specialized insurance knowledges to the development and administration of proposed or existing county insurance policies. Supervision is received from a professional superior who evaluates work for professional quality, accuracy, timeliness, thoroughness, and for adherence to departmental practices and procedures.

##### ILLUSTRATIVE TASKS

Develops appropriate insurance requirements for contracts, lease agreements and professional service agreements under the direction of a professional insurance superior.

Devises and implements master schedules for renewal of all insurance policies.

Prepares bid specifications for insurance policies after researching risk, updating all underwriting information and determining exposures and limits.

Prepares legal advertisements and notices to agents announcing the request for bid proposals of all insurance policies.

Represents county risk management division at public meetings for opening of all bid proposals; prepares written analyses of bid proposals for presentation to Commission.

Prepares resolutions, accompanying memorandums and documentation of recommended proposals for Commission action; prepares appropriate correspondence to agents announcing award of coverages.

Analyzes binders, policies and endorsements to assure compliance with insurance specifications.

Reviews insurance premium billings, calculates insurance billings, allocates premiums to departments or municipalities and prepares invoices for specified insurance coverages.

Acts as liaison between court and insurance agents in insurance matters; handles claims under specified policies of insurance by assuring proper documentation and proper payment of claims.

Assists in developing new insurance programs including research of risk exposure and collection of underwriting information; maintains and updates insurance reference library.

Represents county risk management division in presentations to departments concerning insurance requirements.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and practices of insurance and risk management as applied to governmental self-insurance.

Considerable knowledge of the content and meaning of the information contained in complex insurance policies covering a variety of risks.

Knowledge of county purchasing practices and procedures.

Knowledge of the principles and practices of accounting.

Knowledge of bid specification preparation and bid analysis techniques.

Knowledge of public relations principles and techniques.

Ability to develop insurance requirements for contracts, lease agreements and professional service agreements.

Ability to analyze proposed insurance policies, binders and endorsements to assure compliance with insurance specifications.

Ability to perform complex research in risk exposure and collection of underwriting information to assist in developing new insurance programs.

Ability to communicate effectively, verbally and in writing.

Ability to calculate insurance billings and prepare accurate invoices for insurance coverage.

### Planning Technician (002004)

REV 12-93

#### **Nature Of Work**

This is paraprofessional technical work in the development of factual information for metropolitan area comprehensive planning.

### Junior Planner (002007)

#### Minimum Qualifications

Bachelor's degree in Planning; Master's degree in Geography, Economics, Statistics, Sociology, Urban Studies, or Computer Science; or Bachelor's degree in planning related field and one year of planning experience are required. Planning related fields are Geography, Architecture, Engineering, Economics, Statistics, Sociology, Urban Studies, Computer Science, Business Administration or Public Administration.

#### Job Specifications

##### NATURE OF WORK

This is professional planning work in the development and analysis of information for metropolitan area comprehensive planning.

Employees in this class are responsible for assisting and participating in the design and conduct of studies and analyses in support of planning proposals and in updating the Comprehensive Development Master Plan. Responsibilities may include conducting demographic research, participating in data management, preparing recommendations for zoning applications, conducting studies and analyses for environmental planning projects, providing planning information to other agencies and the public, and compiling and analyzing data using statistical software programs. Incumbents may be assigned to one or more phases of a planning program including comprehensive planning, geography, economics, environmental planning, demographics, transportation planning, and other areas. Employees exercise some independent judgment in the conduct of research and analysis within the scope of departmental policies and procedures. Supervision is received from a professional superior who reviews work for technical quality and assists with difficult or unusual problems.

##### ILLUSTRATIVE TASKS

Assists in the design and conduct of demographic studies and analyses; lays out and prepares printed tables for use in reports and studies; writes brief narratives, analyses and profiles.

Maintains electronic data sets, creates new files, runs and troubleshoots existing programs; creates small area subfiles of census and other data, updates vital statistics and matches to census geography; develops spreadsheets and graphs.

Responds to requests for data and information from various agencies and the public.

Prepares written recommendations for zoning applications, including logging and filing applications, field surveys, preliminary review and evaluation, and final written recommendations; provides assistance to the public.

Assists in the preparation of environmental elements of the Comprehensive Development Master Plan; conducts inventories and analyses addressing upland and wetland ecosystems; reviews environmental planning legislation and assists in evaluation of environmental planning projects.

Develops and prepares detailed and comprehensive transit planning reports; assists in mass transit research and data management; conducts analyses of transit system ridership utilizing computer models.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the principles, methods and practices of urban planning.

Considerable knowledge of research techniques and statistical methods.

Knowledge of the County's Comprehensive Development Master Plan.

Knowledge of computer applications pertaining to planning functions including statistical, spreadsheet, database and graphic programs.

Knowledge of socioeconomic characteristics of Dade County.

Knowledge of Dade County zoning regulations and codes.

Knowledge of federal, state and local programs concerned with environmental elements of the Comprehensive Development Master Plan.

Ability to research, develop, organize and analyze information, and formulate effective recommendations.

Ability to express ideas and information, clearly and concisely, verbally and in writing.

Ability to apply statistical concepts and methods to urban planning assignments.

Ability to utilize statistical software programs to compile relevant planning information in the form required.

Ability to establish and maintain effective working relations with supervisors, fellow employees and officials of other agencies.

### Job Specifications

#### NATURE OF WORK

This is advanced professional planning work in the development and analysis of information for metropolitan area comprehensive planning.

Employees in this class are responsible for performing complex studies and analyses in support of planning projects and proposals, and in updating the Comprehensive Development Master Plan. Responsibilities may include evaluating and formulating land-use strategies, conducting demographic research, database management, analyzing and appraising elements of the Comprehensive Development Master Plan, evaluating proposals to amend plan elements, compiling and analyzing data using statistical software programs, and preparing oral and written presentations of project-related materials. Incumbents may be assigned to one or more phases of a planning program including comprehensive, planning, growth management, transportation planning, urban economic development, urban service planning, geography, and other areas. Employees exercise independent judgment in the performance of analytical tasks addressing complex and varied planning issues. Supervision is received from a professional superior who reviews work for the effective application of planning principles and techniques to advanced planning assignments.

#### ILLUSTRATIVE TASKS

- Conducts planning studies to address relevant physical planning issues and recommend warranted changes to County plans and land development regulations.

- Assists in the design and conduct of studies pertaining to growth management, mass transportation, urban economic development, housing, urban service planning, or progress toward implementing the objectives of the Comprehensive Development Master Plan.

- Assists in the evaluation, analysis, update and implementation of various elements of the Comprehensive Development Master Plan.

- Assists in the evaluation of applications requesting amendments to the Comprehensive Development Master Plan.

- Prepares written and oral presentations of planning project-related materials.

- Develops, accesses and processes computerized data files using statistical software programs to assist in various aspects of the planning process.

- Assists in the formulation, enhancement and testing of methods and procedures to monitor and evaluate impact on, and capabilities of, urban services, transportation facilities, and other planning elements.

- Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

- Considerable knowledge of the principles, methods and practices of urban planning.

- Considerable knowledge of research techniques and statistical methods.

- Considerable knowledge of the County's Comprehensive Development Master Plan.

- Considerable knowledge of computer applications pertaining to planning functions including statistical, spreadsheet, database and graphic programs.

- Considerable knowledge of socioeconomic characteristics of Dade County.

- Knowledge of local government land development regulations and growth management strategies.

- Ability to research, develop, organize and analyze information, and prepare finished reports or work products.

- Ability to express ideas and information clearly and concisely, verbally and in writing.

- Ability to apply statistical concepts and methods to urban planning assignments.

- Ability to analyze various elements of the Comprehensive Development Master Plan and plan amendments, and prepare effective recommendations.

- Ability to utilize statistical software programs to compile relevant planning information in the form requested.

#### NATURE OF WORK

This is advanced professional and supervisory planning work in directing a major activity of program administration in the county Planning Department.

Employees in this class perform a variety of analytical and supervisory tasks related to the formulation and/or revision of a specific phase of the comprehensive master plan for the county. Work involves contributions to the development of a systematic data base, demographic projections, the ongoing evaluation of the impact of demographic changes and the outlining and evaluation of alternative strategies available to the county. These positions are distinguished from the Junior and Senior Planners by a wide degree of responsibility and independent judgment as well as the degree to which they are expected to provide supervision and guidance to subordinate planners and technical personnel. Employees are expected to contribute to policy and project development presentations in support of planning proposals, as well as ongoing liaison with county departments and the public. Supervision is received from a superior through conferences outlining desired objectives, observation of programs and periodic progress reports.

#### ILLUSTRATIVE TASKS

Participates in generalized and specific studies pertaining to land use, economic development, transportation, community facilities, water supply, sewage treatment and disposal, and park and recreation facilities in support of the overall master plan.

Reviews existing zoning provisions and makes recommendations for the revision of zoning ordinances to conform with individual and metropolitan needs.

Assists the Planning Director in developing presentations and reports to the Planning Advisory Council, Board of County Commissioners and the County Manager.

Provides input to the preparation of applications for federal funds and makes clearinghouse reviews of the applications of other agencies. Supervises and serves as technical advisor to subordinate professional planners and technical personnel on respective objectives, work methods and findings.

Confers with civic leaders, government officials, industrialists, educators and financiers in order to develop a factual basis for planning projects and studies.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the principles, methods and practices of urban planning.

Thorough knowledge of recent developments, current literature and sources of information regarding urban planning.

Thorough knowledge of economics, public finance and sociology as it applies to urban planning.

Considerable knowledge of public administration with particular reference to county and municipal administration and management.

Considerable knowledge of research techniques.

Considerable knowledge of the principles and practices of civil engineering and architecture.

Ability to organize and analyze information and formulate substantive recommendations thereon.

Ability to prepare comprehensive reports and to present technical information clearly to both professional and lay groups.

Ability to express one's self clearly and concisely, orally and in writing.

Ability to coordinate the work of subordinate planning and technical personnel.

Ability to establish and maintain effective working relationships with fellow employees, supervisors, outside agencies and the general public.

Planning-related fields are Geography, Biology, Hydrology, Geology, Environmental Sciences, Urban Affairs, or Land Management.

### Job Specifications

#### NATURE OF WORK

This is advanced professional and supervisory planning work in directing a major segment of program administration in the county Planning Department.

Employees in this class are responsible for planning, coordinating, assigning and supervising the work of subordinate professional planners and technical personnel in a section engaged in the collection, compilation, assimilation and presentation of data related to the development of metropolitan and neighborhood master plans for land use and community facilities, for activities related to plan implementation, such as zoning and subdivision regulation development and administration, and for economic and demographic research supportive of plan development and implementation. Duties involve the development of a specific phase of the plan or plan implementation. Planning Section Supervisors work with considerable independence within the scope of professional methods and procedures to accomplish assigned projects. Work requires exercising mature and independent judgment based on accumulated experience in determining courses of action and in the development and presentation of material within a specific area of functional specialization. Administrative supervision is received from the Planning Division Supervisor through conferences outlining desired objectives, observation of effectiveness of work programs and periodic reports and statements.

#### ILLUSTRATIVE TASKS

Assists Planning Division Supervisor in preparing departmental recommendations on zoning change applications and presenting recommendations to county advisory boards and the County Commission.

Supervises several subordinate planners engaged in reviewing, preparing, revising and presenting land use and developmental control ordinances.

Assists Planning Division Supervisor in reviewing large scale development items for compliance with local developmental codes.

Supervises team preparations of major research studies and the presentations of final results.

Assists Planning Division Supervisor in the supervision of planner teams assigned to reviewing and responding to requests for building moratorium and zoning moratorium studies and for comprehensive area planning studies of land use, community facilities and services and developmental regulation needs.

Confers with civic leaders, government officials, resident groups and homeowners associations to identify issues, goals and objectives, and discuss alternate plans for meeting physical, social and economic needs.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the principles, methods and practices of urban planning.

Extensive knowledge of recent developments, current literature and sources of information regarding urban planning.

Extensive knowledge of economics, public finance and sociology as it applies to urban planning.

Thorough knowledge of public administration with particular reference to county and municipal administration and management.

Thorough knowledge of research techniques.

Considerable knowledge of the principles and practices of civil engineering and architecture.

Considerable knowledge of modern office practices, procedures and appliances.

Ability to represent the department on policy, technical and procedural matters and to establish and maintain effective working relationships with a wide range of individuals and groups.

Ability to plan, assign, direct and review the activities of a subordinate staff in a manner conducive to full performance and high morale.

## Zoning Clerk (002020)

### Minimum Qualifications

High school diploma or GED. One year of clerical or public contact experience is required.

### Job Specifications

#### NATURE OF WORK

This is specialized clerical work processing zoning hearing applications and related construction plans for the Department of Planning and Zoning.

Employees in this class are responsible for assisting developers, contractors, realtors, attorneys and the public with zoning hearing applications. Duties include explaining legal requirements and departmental policies and procedures, retrieving files of past zoning cases, clarifying zoning districts and the uses allowed within them, determining if applicants meet code requirements, computing fees and collecting payments, and preparing files for zoning hearings. Some judgment is exercised in the application of departmental rules and regulations to zoning hearing application and construction plans processing. Supervision is received from an administrative superior who reviews work through personal observations and conferences for compliance with departmental policies and procedures.

#### ILLUSTRATIVE TASKS

Assists developers, contractors, realtors, attorneys and the public by telephone and in person on zoning hearing applications and various other types of applications, forms, legal requirements, and departmental policies and procedures.

Utilizes knowledge of legal descriptions of Miami-Dade County properties to retrieve files of past zoning cases and enforcement cases and to determine potential inspection dates.

Distributes zoning information, and interprets and clarifies zoning districts and the uses allowed within them for the public.

Reviews applicant's construction plans for residential improvements and determines if applicant complies with code requirements for qualifying for application of an Administrative Variance.

Collects appropriate fees, receives payments and provides receipts; maintains log books and receipt books for use in the preparation of accounting and statistical reports.

Operates a computer terminal to assist the public regarding ownership and legal descriptions of properties, status of zoning applications, enforcement cases, inspections and related data; enters information for zoning notice mailers.

Prepares correspondence, forms and documents related to the preparation of legal advertisements, County Commission kits, and files.

Compiles all necessary paperwork, construction plans, zoning sketches, and transcripts for zoning hearings; photocopies and distributes kits, agendas, worksheets and construction plans.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of Miami-Dade County zoning rules, regulations and procedures.

Considerable knowledge of departmental policies and procedures pertaining to processing of zoning hearing applications and related construction plans.

Knowledge of modern office equipment, methods and practices.

Knowledge of public relations principles and techniques.

### Zoning Clerk (002020)

Knowledge of legal descriptions.

Knowledge of arithmetic.

Ability to interpret zoning regulations and explain policies, procedures and legal requirements to zoning hearing applicants.

Ability to use tact and diplomacy in dealing with developers, contractors, attorneys, realtors, and the public.

Ability to operate modern office equipment including computer terminals and calculators.

Ability to determine if applicants comply with zoning code requirements for qualifying for an Administrative Variance.

Ability to compile required documentation for zoning hearings.

Skill in the use of modern office equipment.

Completion of coursework in Engineering, Architecture, Building Construction, Real Estate, Landscape Development, or related field may substitute for required experience on a year-for-year basis.

### Job Specifications

#### NATURE OF WORK

This is advanced technical work involving the enforcement of zoning regulations applicable to the processing of construction plans and permits covering residential, industrial and commercial developments in the unincorporated areas of Dade County.

Employees in this class perform work involving the application of advanced zoning code, policy, and procedural knowledge and ability to use independent judgment while dealing with developers, architects and engineers regarding zoning plan processing work. Incumbents must be thoroughly familiar with the Development Impact Committee and Development of Regional Impact guidelines and regulations. Zoning Plans Processors may also be responsible for studies of proposed changes to zoning regulations, development standards and operating procedures relative to their work. Supervision may be exercised over clerical personnel and new employees during their initial training period. Incumbents may also be requested to assist other staff members in difficult areas of zoning code interpretation. Work is performed under the direction of a section supervisor who reviews work through observation, conference and attainment of desired objectives.

#### ILLUSTRATIVE TASKS

Examines construction and site plans for conformance to all applicable zoning codes, regulations and resolutions and to the developmental impact regulations and guidelines.

Reviews and analyzes legal descriptions of proposed developments against zoning maps, plats and permits; utilizes a computer terminal to verify tax folio numbers.

Coordinates the processing of plans with other departments and agencies in order for all concerned parties to implement applicable regulations in the plans processing stage.

Assigns street addresses to all proposed developments in accordance with zoning regulations and portal procedures.

Researches hearing files, resolutions, unity of title, and deed or plat restrictions which are applicable to determine whether special conditions or restrictions must be imposed on the development or use.

Computes and verifies development calculations relative to structural, height, number of stories, set back, height ratio, ground coverage, floor area, open space trade-offs, parking spaces versus unit and use, lot size, landscaping plans and easements.

Processes plans and permits against "master model" procedure.

Explains reasons for disapproval or changes on plans or permit applications with developers, architects, engineers or other individuals in order for such holds to be corrected by applicant prior to the approval of the plan and issuance of a permit.

Attends various meetings relative to special developments, interpretations of regulations, and procedures and guidelines which are applicable to zoning processing work.

Maintains work progress records of zoning plans examined.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the County's building and zoning codes, regulations, procedures and guidelines.

Considerable knowledge of the legal, administrative and procedural regulations applicable to zoning plans processing work.

Considerable knowledge of the content and meaning of symbols, diagrams and other items found on blueprints and/or in the "Zoning Code/Zoning Handbook".

Considerable knowledge of legal descriptions, property deeds and abstracts.

Knowledge of mathematics as applied to zoning plans processing work.

Knowledge of the "master model procedure".

Knowledge of public relations principles and practices.

Knowledge of departments or agencies required to implement applicable regulations during the plans processing stage.

Ability to read, interpret and analyze construction, site or development plans.

### **Zoning Services Senior Plans Processor (002024)**

Ability to rapidly and thoroughly examine plans and process applications under workload deadline conditions.  
Ability to communicate effectively, orally and in writing.  
Ability to deal tactfully and decisively with the public.  
Ability to explain and enforce regulations firmly and impartially.  
Ability to perform mathematical computations accurately.  
Ability to interpret and use information from zoning maps, plats, blueprints and legal descriptions.  
Ability to research necessary information for efficient job performance.  
Ability to establish and maintain an effective working relationship with co-workers, other departments and agencies, and the general public.

### Economic Policy Coordinator (002085)

#### Minimum Qualifications

Miami-Dade County is seeking a progressive, experienced, and proactive economist for the position of Economic Policy Coordinator. Miami-Dade County is one of the largest county governments in the Southeastern United States with a \$6.4 billion budget, 30,000 employees and 45 departments, serving a population of more than 2.3 million residents. The successful candidate will have a proven track record and professional expertise in the analysis of economic trends, local and national economic conditions, and multiple complex operating and capital budgets specifically in regards to socioeconomic policy.

The Economic Policy Coordinator's responsibilities include making recommendations regarding departmental programmatic and budgetary policies, overseeing the coordination and implementation of the economic elements of the Miami-Dade County Comprehensive Development Master Plan and working closely with the local Social and Economic Development Council (SEDC). The ideal candidate must have a management style that demonstrates and promotes competence, courtesy, collaboration and creativity. The successful candidate will interface through the County Manager's Office to provide periodic reports to the Mayor and the Board of County Commissioners.

Minimum qualifications include a Ph.D. degree in Economics with a minimum of five to ten years professional experience in research or consulting in the fields of applied economics, impact analyses, economic modeling and simulation, and urban regional economics. Econometrics and quantitative methods experience are required. The ability to communicate complex economic analyses in non-technical language is highly desired. The ideal candidate should have knowledge of the South Florida economy and the ability to work with governmental organizations.

Submit cover letter with requisition number 7260003, resume, current salary and three work-related references as soon as possible to: Luis L. Gonzalez, Miami-Dade County, Manager, Recruitment and Internal Placement Section, Employee Relations Department, Personnel Services Division, 111 NW 1 Street, Suite 2020, Miami, Florida 33128-3396 or submit via e-mail as a Word document attachment to [LLG@miamidade.gov](mailto:LLG@miamidade.gov) by Friday, March 2, 2007.

##### NATURE OF WORK

This is technical work in the inspection of plumbing installations for compliance with the Florida Building Code.

Employees in this class are responsible for making technical field inspections of new and existing plumbing installations for compliance with the Florida Building Code. Responsibilities include inspecting plumbing installations in progress and upon completion, advising contractors or owners on necessary changes, engaging in routine and periodic patrols to detect violations, issuing violation notices, investigating complaints of defective installations, and signing permits granting final county approval for completed work. Related office duties include providing information to contractors and the public, and assisting in the resolution of their disagreements. Supervision is received from a technical supervisor who reviews work for conformance with established departmental policies, procedures and regulations.

##### ILLUSTRATIVE TASKS

Conducts technical field inspections in all plumbing permit categories of new and existing installations for compliance with the Florida Building Code.

Examines plumbing projects for defects, omissions, violations, and other departures from correct procedure; provides recommendations and suggestions to contractors or owners regarding changes necessary to bring establishment up to code requirements; assures all plumbing work conforms to national and county plumbing codes.

Inspects all work upon completion and signs permit granting final county approval that building is safe for life and property.

Performs inspections to insure that work proceeds in accordance with approved plans.

Engages in routine and periodic patrols and inspections to check for violations and hazardous conditions; issues violations notices and occasionally, summonses, to violators.

Investigates complaints of defective installations which are reported as sanitation or other hazards; notifies responsible person of defects and issues verbal or written instructions for correction; makes reinspections; reports violations and represents Metro-Dade County at court hearings.

Organizes inspection route schedule and maintains accurate records of inspections.

Answers telephone calls from contractors and the public; offers information and clarifications; assists in resolving conflicts between contractors and property owners.

Approves qualifications for homeowner's permits.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of applicable provisions of the Florida Building Code pertaining to building construction and plumbing

### Plumbing Inspector (002135)

installations.

Considerable knowledge of codes and regulations governing plumbing, gas, and pool installations.

Considerable knowledge of the methods and practices involved in installing, repairing, and maintaining plumbing installations, equipment and appliances.

Considerable knowledge of possible defects and faults in plumbing installations, and of effective corrective measures.

Knowledge of blueprints submitted for plumbing work permits.

Knowledge of departmental policies and procedures.

Knowledge of records, reports, and forms used in the area of assignment.

Ability to conduct technical field inspections of plumbing installations to assure compliance with the Florida Building Code.

Ability to understand structural and plumbing installations and related fields in the construction industry.

Ability to explain inspection results and required corrections both verbally and in writing.

Ability to read blueprints submitted for plumbing work permits and to conduct inspections to assure that the work proceeds in accordance with approved plans.

Ability to enforce building codes with firmness, tact, and impartiality.

##### NATURE OF WORK

This is field and related office work in the investigation, inspection and enforcement of a minimum standards ordinance for dwelling structures.

Employees in this class are responsible for obtaining information concerning the physical condition of dwelling units, rooming houses, hotels, motels and similar structures used for human habitation. Work involves determining the structural adequacy, number of occupants and sanitary condition of housing facilities used for living, sleeping, cooking and eating. Duties require rendering technical advice and assistance to owners and tenants by recommending construction methods by which minimum housing standards may be achieved. Work is performed independently in the field, incumbents must exercise tact and judgment in explaining code requirements to tenants, landlords, agents and contractors. Supervision is received from a superior inspector who reviews work upon completion for accuracy and thoroughness by review of reports and discussions.

##### ILLUSTRATIVE TASKS

Inspects dwelling units such as rooming houses, apartments, hotels, motels, mobile homes, temporary shelters and other types of structures used for human shelter.

Determines structural and sanitary adequacy for human habitation; inspects water supply and sewer system, cooking facilities, garbage disposal facilities, lighting and ventilation, insect and vermin protection, minimum living space requirements, cleanliness, electrical system and related housing standards.

Completes reports on violations of building code, housing code, zoning regulations, fire prevention code, public health laws, and any unlawful activity carried on within the premises; advises State Hotel and Restaurant Commission on suspected violations by licensed commercial establishments.

Advises owners, property managers, contractors, attorneys and others on demolition or modifications and repairs necessary to comply with the law; conducts follow-up investigations to ascertain that all work is completed as required.

Advises tenants of various local welfare agencies rendering social service assistance; refers suspected diseased persons to public health officials.

Appears in court and before minimum housing appeals board as a witness in prosecution for non-compliance with housing code violation citations.

Maintains inspection records and reports, initiates various notification letters, sends referral memoranda to other governmental agencies involved in housing and urban renewal.

Recommends demolition of structures considered unsafe and beyond repair.

Coordinates inspection and enforcement effort with available related programs of governmental and private organizations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the various building trades including construction, modification and repair methods and materials.

Knowledge of the local building, zoning and public health codes and ordinances pertaining to housing standards for human habitation.

Knowledge of the various services administered by public and private agencies to indigent, informed and dependent persons.

Ability to learn and enforce a minimum standards housing code for private and commercial dwelling structures.

Ability to deal with the public tactfully and to provide information and assistance as requested.

Ability to perform field assignments with a minimum of supervision in all types of neighborhoods.

Ability to keep simple records and submit accurate reports of field inspections.

Ability to train others in housing inspection work.

REV 4-82

#### **Nature Of Work**

This is field and related office work in the investigation, inspection and enforcement of a minimum standards ordinance for dwelling structures.

### Housing Inspector 2 (002156)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in housing code enforcement and/or building or construction inspection are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the investigation, inspection and enforcement of a minimum standards ordinance for dwelling structures. Employees in this class are responsible for coordinating and assigning housing code inspections and enforcement. Work involves the selection and training of inspectors conducting field investigations of private and commercial dwelling structures to determine occupancy, structural and sanitary habitability. Duties require the use of considerable independent judgment and tactful communication with landlords, property managers, rental agents, attorneys and contractors. Supervision is exercised over a staff of field inspectors by assignment and review of completed work and by providing technical assistance in unusual or difficult cases. General supervision is received from an administrative superior who reviews work for thoroughness and the satisfactory completion of inspection work as assigned.

##### ILLUSTRATIVE TASKS

Coordinates and supervises inspectors engaged in enforcing the minimum housing standards code; assists in the investigation of plumbing, mechanical, electrical, structural, ventilation, lighting, vermin protection, refuse and general sanitary conditions of dwelling units.

Assigns inspectors of various types of dwelling structures such as rooming houses, apartments, hotels, motels, mobile homes, temporary shelters and similar facilities; reviews field inspection reports and recommends methods for compliance with minimum housing code standards.

Designs and conducts comprehensive neighborhood surveys to determine housing code enforcement needs; recommends intensive inspections of blighted dwelling areas.

Prepares and assembles all reports, correspondence and legal forms necessary for housing appeal board proceedings.

Maintains activity records and submits periodic reports reflecting workload, citations issued, compliance and various enforcement statistics.

Provides factual data to other governmental agencies regarding violations of the building code, zoning ordinances, fire safety code, public health laws and state Hotel and Restaurant Commission regulations.

Evaluates performance of subordinate staff, recommends

personnel administration matters, equipment requirements and work improvement techniques.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of housing code inspection and enforcement in private and commercial dwelling units.

Considerable knowledge of the various building trades including construction, modification and repair methods and materials.

Considerable knowledge of the local building, zoning and fire safety codes and public health regulations pertaining to sanitary housing facilities.

Considerable knowledge of the services rendered by local public and private agencies engaged in housing and urban development activities.

Ability to plan and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to deal with the public tactfully and to provide information and assistance as requested.

Ability to estimate construction and maintenance costs and to recommend appropriate structural and mechanical repairs.

Ability to assemble and submit concise reports of field investigations and enforcement activities.

This is supervisory work in the investigation, inspection and enforcement of a minimum standards ordinance for dwelling structures.

### Building Plans Processor (002167)

#### Minimum Qualifications

Must possess a State of Florida Professional Engineer license, a State of Florida Registered Architect license, or a General Contractor's license. Five years of experience under the jurisdiction of the Building Code are required; or Must be a currently certified Building Official, Plans Examiner or Inspector with five years of experience in such positions, three years of which shall have been within the jurisdiction of the Building Code are required; or Must be a currently certified Building Inspector having an Associate of Science degree in a course of education approved by the Board of Rules and Appeals. Five years of experience as a licensed General Contractor, two years of which shall have been within the jurisdiction of the Building Code are required; or three years of experience as a Building Official, Plans Examiner or Inspector within the jurisdiction of the Building Code are required. This modified criteria shall apply only to individuals holding one of the following: 1. A General Contractor's license issued by the State of Florida Construction Industry Licensing Board, provided the license number is less than #7837 or, 2. A General Contractor's license issued by the Miami-Dade County Construction Trades Qualifying Board or, 3. A General Contractor's license issued by the State of Florida Construction Industry Licensing Board with license #7837 or greater holding a certification as a roofing contractor or inspector issued by the State of Florida Construction Industry Licensing Board or Miami-Dade County Construction Trades Qualifying Board or, 4. Any General Contractor's license issued subsequent to a proctored examination graded by an independent testing agency approved by the Board of Rules and Appeals. All applicants must be eligible for certification by the Miami-Dade County Board of Rules and Appeals as specified in Chapter 8 of the Code of Miami-Dade County. General Contractors must be eligible for certification by the Florida Building Code Administrators and Inspectors Board as specified in Chapter 468, Florida Statutes. Certificate and/or license must be in good standing with Miami-Dade County's Contractors Licensing and Enforcement Section, and/or the Florida Department of Business and Professional Regulation with no pending complaints. All applicants qualifying for employment will be subject to extensive background screening. Applicants holding an active certificate will be required to inactivate their certificate at their own expense upon employment. This position is exempt from Miami-Dade County's Residence Requirement (Section 2-11.17 of the Code of Miami-Dade County) for Broward County residents only.

#### Job Specifications

##### NATURE OF WORK

This is technical engineering work in the examination of residential, light commercial and industrial construction plans for compliance with the Florida Building Code and other applicable codes and regulations.

Employees in this class perform evaluation work involving the application of engineering and architectural skills and judgment in examining construction plans. Emphasis of the work is on the examination of building plans for residential and light commercial structures. Incumbents assigned to work on-site at Miami International Airport may be required to perform both building plans processing and technical field inspections of new and existing building installations at MIA for compliance with the Florida Building Code. Incumbents may assist field building inspectors in order to locate building code violations at the construction site or answer technical inquiries from customers, engineers, architects or field inspectors. Supervision may be exercised over technical and clerical personnel. Incumbents are responsible to a technical superior for architectural and engineering processing assignments. Work is reviewed only upon challenge of engineering decisions to the Chief or Secretary of the Board of Rules and Appeals.

##### ILLUSTRATIVE TASKS

Examines proposed residential and light commercial construction plans submitted for permit approval; examines all types of building plans for integrity as detailed and required by the Florida Building Code and all other applicable standards and regulations.

Approves or disapproves proposed plans in accordance with code and other regulatory requirements and discusses disapproved items with architects, engineers, contractors and/or owner builders to obtain plan changes necessary for approval.

## Building Plans Processor (002167)

Evaluates proposed alternate methods and materials against code requirements.

Evaluates requests for product approvals; ascertains by field visits that manufactured products used in construction meet specifications of the original product approval.

Orders necessary shop drawings and field tests, soil reports and special supervision of construction as required to complete plans processing work.

Evaluates qualifications of contractors or owner builders to perform the work proposed on applications and plans in accordance with the Miami-Dade County Code.

Answers technical questions concerning the Florida Building Code for field inspectors.

Coordinates plans examining with other county departments for compliance with standards and regulations.

Conducts technical field inspections at Miami International Airport in all building permit categories of new and existing installations for compliance with the Florida Building Code; examines building projects for defects, omissions, violations, and other departures from correct procedure; provides recommendations and suggestions to contractors or owners regarding changes necessary to bring establishment up to code requirements; ensures all building construction work conforms to national and county building codes; inspects all work upon completion and signs permit granting final county approval that building is safe for life and property; performs building inspections to ensure that work proceeds in accordance with approved plans.

Performs related work as required.

### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the engineering principles and practices of architectural and structural plans examining work.

Considerable knowledge of the Florida Building Code and all other applicable codes, standards and regulations.

Knowledge of general construction methods and procedures.

Ability to read, interpret and evaluate architectural and structural details of construction plans against code requirements and good construction practices.

Ability to express ideas clearly and concisely, orally and in writing.

Ability to plan, assign and supervise the work of others in a manner conducive to full performance and high morale.

Ability to rapidly and thoroughly examine plans against codes under workload deadline conditions.

Ability to relate to architects, engineers and contractors in a professional manner.

Ability to explain the Florida Building Code, Miami-Dade County Code and other applicable standards and/or requirements to customers, engineers, architects and field inspectors.

### Plumbing Plans Processor (002170)

#### Minimum Qualifications

Five years of field experience under a Certificate of Competency as a Master Plumber issued by the Miami-Dade County Construction Trades Qualifying Board are required. Persons with a Certificate of Competency issued by reciprocity with Miami-Dade County will be eligible; or Five years of field experience under a certificate as a State Plumbing Contractor issued by the Florida Construction Industry Licensing Board are required; or Five years of field experience under a license as a Florida Professional Engineer having obtained the license pursuant to examination in the mechanical discipline are required. Applicants must provide proof of certification or licensure for five years; however, a current certificate or license is not required. All applicants must be eligible for certification by the Miami-Dade County Board of Rules and Appeals as specified in Chapter 8 of the Code of Miami-Dade County. Master Plumbers and State Contractors must also be eligible for certification by the Florida Building Code Administrators and Inspectors Board as specified in Chapter 468, Florida Statutes. Certificate and/or license must be in good standing with Miami-Dade County's Contractor Licensing and Enforcement Section and/or the Florida Department of Business and Professional Regulation with no pending complaints. All applicants qualifying for employment will be subject to extensive background screening. Applicants holding an active certificate will be required to inactivate their certificate at their own expense upon employment. This position is exempt from Miami-Dade County residence requirements, (Section 2-11.17 of the Code of Miami-Dade County) for Broward County residents only.

#### Job Specifications

##### NATURE OF WORK

This is technical engineering work in the examination of residential, light commercial and industrial construction plans for compliance with the Florida Building Code and other applicable codes and regulations.

Employees in this class perform evaluation work involving the application of engineering and architectural skills and judgment in examining construction plans. Emphasis of the work is on the examination of plumbing engineering plans for residential, commercial and industrial structures. Incumbents assigned to work on-site at Miami International Airport may be required to perform both plumbing plans processing and technical field inspections of new and existing plumbing installations at MIA for compliance with the Florida Building Code. Incumbents may assist field plumbing inspectors in order to locate building code violations at the construction site or answer technical inquiries from customers, engineers, architects or field inspectors. Supervision may be exercised over technical and clerical personnel. Incumbents are responsible to a technical superior for architectural and engineering processing assignments. Work is reviewed only upon challenge of engineering decisions to the Chief or Secretary of the Board of Rules and Appeals.

##### ILLUSTRATIVE TASKS

Examines proposed residential and light commercial construction plans submitted for permit approval; examines all types of plans for plumbing integrity as detailed and required by the Building Code and all other applicable standards and regulations.

Approves or disapproves proposed plans in accordance with code and other regulatory requirements and discusses disapproved items with architects, engineers, contractors and/or owner builders to obtain plan changes necessary for approval.

Evaluates proposed alternate methods and materials against code requirements.

Evaluates requests for product approvals; ascertains by field visits that manufactured products used in construction meet specifications of the original product approval.

Orders necessary shop drawings and field tests, soil reports and special supervision of construction as required to complete plans processing work.

## Plumbing Plans Processor (002170)

Evaluates qualifications of contractors or owner builders to perform the work proposed on applications and plans in accordance with the Miami-Dade County Code.

Answers technical questions concerning the Building Code for field plumbing inspectors.

Coordinates plans examining with other county departments for compliance with standards and regulations.

Conducts technical field inspections at Miami International Airport in all plumbing permit categories of new and existing installations for compliance with the Building Code; examines plumbing projects for defects, omissions, violations, and other departures from correct procedure; provides recommendations and suggestions to contractors or owners regarding changes necessary to bring establishment up to code requirements; assures all plumbing work conforms to national and county plumbing codes; inspects all work upon completion and signs permit granting final county approval that building is safe for life and property; performs plumbing inspections to insure that work proceeds in accordance with approved plans.

Performs related work as required.

### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the engineering principles and practices of plumbing plans examining work.

Considerable knowledge of the Building Code and all other applicable codes, standards and regulations.

Knowledge of general construction methods and procedures.

Ability to read, interpret and evaluate plumbing details of construction plans against code requirements and good construction practices, depending on field of expertise.

Ability to express ideas clearly and concisely, orally and in writing.

Ability to plan, assign and supervise the work of others in a manner conducive to full performance and high morale.

Ability to rapidly and thoroughly examine plans against codes under workload deadline conditions.

Ability to relate to architects, engineers and contractors in a professional manner.

Ability to explain the Building Code, Miami-Dade County Code and other applicable standards and/or requirements to customers, engineers, architects and field inspectors.

REV 09/2005

### Nature Of Work

This is technical engineering work in the examination of residential, light commercial and industrial construction plans for compliance with the Florida Building Code and other applicable codes and regulations.

### Roofing Plans Processor (002172)

#### Minimum Qualifications

Must possess a certificate as a Roofing Contractor issued by the Miami-Dade County Construction Trades Qualifying Board or the Florida Construction Industry Board and ten years of experience in the roofing industry; a personal certificate from the Miami-Dade County Construction Trades Qualifying Board as a Roofing Inspector or Contractor and ten years of experience in the roofing industry and certification as a Building Inspector in Miami-Dade County; a personal certificate as a General Contractor issued by either the Miami-Dade County Construction Trades Qualifying Board or the Florida Construction Industry Licensing Board (provided the number of the license is less than #7837) and ten years of experience in the roofing industry and certification as a Building Inspector in Miami-Dade County; or a State of Florida Registered Architect or State of Florida Professional Engineer license and ten years of experience in the roofing industry are required. All applicants must be eligible for certification by the Miami-Dade County Board of Rules and Appeals as specified in Chapter 8 of the Code of Miami-Dade County and the Florida Building Code Administrators and Inspectors Board as specified in Chapter 468, Florida Statutes. Certificate must be in good standing with Miami-Dade County's Contractors Licensing and Enforcement Section, and/or the Florida Department of Business and Professional Regulation with no pending complaints. All applicants qualifying for employment will be subject to extensive background screening and will be required to inactivate their certification at their own expense upon employment. This position is exempt from Residence Requirement (Section 2-11.17 of the Code of Miami-Dade County) for Broward County residents only.

#### Job Specifications

#### Nature Of Work

This is technical engineering work in the examination of residential, light commercial and industrial construction plans for compliance with the Florida Building Code and other applicable codes and regulations.

## Structural Plans Processor (002173)

### Minimum Qualifications

Must possess a State of Florida Professional Engineer license under the structural discipline. Applicants who were licensed as a Professional Engineer under the civil engineering discipline on or before March 1, 1993 are also eligible. Five years of experience as a structural engineer practicing within the area of jurisdiction of the Building Code with responsibility for the design of building structures are required. All applicants must be eligible for certification by the Miami-Dade County Board of Rules and Appeals as specified in Chapter 8 of the Code of Miami-Dade County. License must be in good standing with the Florida Department of Business and Professional Regulation with no pending complaints. All applicants qualifying for employment will be subject to extensive background screening. This position is exempt from Miami-Dade County residence requirements (Section 2-11.17 of the Code of Miami-Dade County) for Broward County residents only.

### Job Specifications

#### NATURE OF WORK

This is advanced professional engineering work in the examination of complex construction plans for building construction projects.

Employees in this class are responsible for examining commercial and residential construction permit plans to determine structural integrity and compliance with requirements of the Florida Building Code and other applicable codes and regulations. Responsibilities include reviewing walk-thru and drop-off residential and commercial construction plans, determining structural adequacy of various types of ratings and structures or buildings, and approving or disapproving proposed plans in accordance with code requirements. Related duties include interpreting the Florida Building Code, evaluating new building materials, maintaining familiarity with new methods of construction, and approving temporary or progressive occupancies. Incumbents exercise considerable independent judgment in the application of professional engineering knowledges to the examination of complex construction plans, determination of structural integrity, and in the performance of related engineering duties. General supervision is received from a professional and administrative superior who reviews work for professional and technical quality and adherence to departmental policies and procedures.

#### ILLUSTRATIVE TASKS

Reviews walk-thru projects for residential additions and commercial plans; determines the structural adequacy of various types of ratings and structures or buildings by verifying mathematical engineering computations and engineering procedures for stress, load, strength, fire resistivity and other factors; examines plans for architectural integrity as required by the Florida Building Code; evaluates alternate methods, procedures, materials and products for compliance with code requirements.

Examines drop-off residential and commercial construction plans submitted for permit approval; determines the structural adequacy of various types of ratings and structures or buildings by verifying mathematical engineering computations and engineering procedures for stress, load, strength, fire resistivity, and other factors; examines plans for architectural integrity as required by the Florida Building Code.

Approves or disapproves proposed plans in accordance with the code and other regulatory requirements; discusses disapproved items with architects, engineers, contractors, and property owners to obtain plan changes necessary for approval.

Makes interpretations of the Florida Building Code and makes decisions concerning the feasibility of deviations from the code under various conditions.

Evaluates engineering criteria to enforce control procedures for the fabrication of various building materials and types of construction; makes recommendations for the establishment of departmental policy concerning the use of new building materials.

Keeps abreast of methods of new construction; evaluates proposed construction plans in light of the adequacy of built-in life safety features and systems.

Approves temporary or progressive occupancies; sanctions temporary electrical hookups for equipment testing purposes and recommends waiving of fees.

Orders necessary shop drawings, field tests, soil reports, and special supervision of construction as required to complete plans processing work.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

### Structural Plans Processor (002173)

Extensive knowledge of the engineering principles and practices of architectural, structural, electrical, plumbing, and mechanical construction work.

Extensive knowledge of general building construction methods, techniques, processes, and procedures.

Thorough knowledge of the Florida Building Code and other applicable codes, standards, and regulations.

Thorough knowledge of the design and construction of modern residential and commercial buildings.

Thorough knowledge of the theories and principles of civil engineering.

Thorough knowledge of departmental policies, practices and procedures related to the examination of residential and commercial construction plans.

Ability to read, interpret and evaluate architectural, structural, electrical, plumbing, and mechanical details of construction plans against code requirements and sound construction practices.

Ability to read, interpret and evaluate complex technical information, engineering calculations, test reports, and engineering specifications.

Ability to perform complex engineering computations and calculations in the evaluation of proposed building construction projects.

Ability to establish and maintain effective working relationships with the public, contractors, architects, engineers, and others in the structural plans examination process.

Ability to evaluate new building materials and products and make effective recommendations for their approval or disapproval.

Ability to communicate clearly and concisely, verbally and in writing.

### RER Enforcement Collections/Contracts Representative (002200)

#### Minimum Qualifications

High school diploma or GED. Two years of credit collections, processing liens, accounts receivables, or related clerical experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work in the billing and collection of enforcement costs for the Building Department.

Employees in this class are responsible for the processing of liens, civil violation notices, intent to lien and demand for payment invoices, satisfaction of liens or final orders, in the billing and collection of enforcement costs for violations of the Florida Building Code. Duties include conducting research to determine property ownership and payment of civil violation notices, and dealing with property owners in resolving billing disputes. Supervision is received from an administrative superior who reviews work for conformance with established departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Reviews lien checklist and prepares lien settlement cost and final lien cap; prepares and maintains lien invoices for satisfaction of lien and notice of violation letter.

Charges cost items to cost journals; proves and assembles cost records; compiles figures for use in preparation of statistics; schedules payments due on extensions granted for payment of enforcement costs; reconciles ledgers of incremental settlement payments made by violators prior to recording a lien.

Tracks settlements concerning criminal cases; reconciles ledgers of payments received from violators.

Receives correspondence on appeals of enforcement costs from violators.

Prepares liens for supervisor's review and recording with the Clerk of the Courts; prepares Hearing Officer's Affidavit in the lien process when civil violation notices are outstanding and not appealed prior to the recordation of lien.

Researches property records to determine any changes in property ownership; researches historical data in processing of liens or demands for payment, requests for violation letters, payment of civil violation notices, and appeals.

Prepares special response letters for the negotiation of settlements and in response to appeal correspondence.

Maintains financial records in accordance with office procedures.

Assists violators in the resolution of billing disputes; refers complex billing issues to supervisor.

Operates computer terminal equipment and other standard office equipment.

Collects payments for settlements and liens and satisfies liens when payments are received.

Prepares bid and contract documents for securing and demolition of structures, securing of swimming pools and asbestos removal for supervisors review.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of modern office practices, procedures and equipment.

Considerable knowledge of the Florida Building Code as it pertains to the collection of enforcement costs.

Considerable knowledge of the processing of liens, civil violation notices and other documents in the collection of enforcement costs from violators of the Florida Building Code.

Considerable knowledge of the records, forms, documents and affidavits used in the processing of enforcement cost cases.

Knowledge of research techniques and sources and availability of current information.

Knowledge of public relations principles and techniques.

Knowledge of bookkeeping practices and procedures.

Ability to prepare liens, civil violation notices and other documents in the billing and collection of enforcement costs from violators of the Florida Building Code.

Ability to prepare, maintain and reconcile complex financial records.

Ability to research various records to obtain necessary information for departmental enforcement cases.

Ability to deal firmly, tactfully and diplomatically with members of the public who are in violation of the Florida Building Code.

#### Minimum Qualifications

High school diploma or GED. Two years of experience as an intake worker, customer service representative or other public contact experience are required.

#### Job Specifications

##### NATURE OF WORK

This is public service work providing assistance to the public in accessing County services.

Employees in this class are responsible for the prompt, accurate and effective evaluation of and response to requests for information and assistance from citizens and representatives of other public and private agencies. Duties include the intake of code enforcement requests, opening work orders for requests for assistance, updating code enforcement case files, and producing letters and other documents pertaining to code enforcement. Work is performed in accordance with prescribed procedures and departmental regulations. Supervision is received from a technical supervisor who assists with difficult or unusual problems and reviews work for conformance with established policies and procedures.

##### ILLUSTRATIVE TASKS

Receives and answers telephone inquiries and service requests from the public, other governmental entities and private social service agencies; opens requests in case management system; provides information, makes appropriate referrals and processes requests for assistance for County services or code enforcement.

Maintains and updates resource information including the accuracy of telephone numbers, rules and regulations, and the incorporation of information on new programs and services.

Maintains daily activity records including telephone calls received and actions taken; prepares correspondence and reports; maintains enforcement case files and generates automated reports.

Assists the public by providing permitting, civil violation, lien, criminal or civil case information; provides information to other agencies and officials to assist in completing enforcement cases.

Processes daily inspection results and documents case files.

Prepares Notices of Violations; requests warranty deed and corporate information; completes legal servicing of notices.

Processes citations issued for code violations and maintains logs; determines jurisdiction applicable to violations in accordance with departmental procedures.

Maintains open and closed case logs, lien logs and receipt logs for the preparation of accounting and statistical reports.

Processes and collects funds due for administrative costs, non-violation letters, recovery fees, liens and other fees.

Opens and processes complaint files; logs complaints and forwards for investigation.

Prepares lists of work locations for contractors to clear lots, remove abandoned vehicles and trim trees.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of office practices and procedures.

Knowledge of County codes, administrative orders and departmental policies and procedures applicable to the area of assignment.

Knowledge of the structure and functions of County government sufficient to answer questions or transfer inquiries to the appropriate authority.

Knowledge of the geography of the local metropolitan area and major road networks.

Knowledge of code enforcement practices and procedures.

Ability to distinguish clearly between municipal and County boundary lines.

Ability to exercise tact and diplomacy in dealing with members of the public and with other public and private officials.

Ability to prepare and maintain records and reports.

Ability to compose simple correspondence using correct grammar, spelling and punctuation.

Ability to understand verbal and written instructions.

Ability to perform arithmetic calculations.

Additional experience may substitute for the required education on a year-for-year basis. Must possess a Driver license. Applicants will be subject to a thorough background investigation.

### Job Specifications

#### NATURE OF WORK

This is office and field work in the investigation and enforcement of a variety of Metro-Dade County Code regulations.

Employees in this class receive complaints, conduct inspections, determine the existence of violations, and prepare citations or other notices involving County codes and ordinances. Duties include performing field inspections, interpreting technical legal provisions and administrative directives pertaining to code enforcement, and preparing criminal case documents and case summaries for civil actions. Incumbents exercise tact and diplomacy in explaining regulations to property owners, business persons and attorneys. Supervision is received from an administrative superior who reviews work through personal conferences and written reports, and assists with difficult or unusual cases.

#### ILLUSTRATIVE TASKS

Receives complaints of violations of County Code regulations; conducts field inspections to determine and verify the nature of violations; prepares and serves notices to remove existing violations.

Performs evening or weekend inspections and surveillance to secure compliance relative to violations occurring in unincorporated areas.

Confers with other County departments on matters relating to complex zoning regulations, building codes and environmental codes; prepares investigative field reports of violations for presentation to applicable boards or to the State Attorney's Office.

Investigates code violations by identifying, locating, observing and collecting evidence in accordance with cumulative criteria defined by various County Codes and departmental policies and procedures.

Determines responsible parties by legal abstracting of personal and private property; interprets legal descriptions of parcels of land to accurately determine the precise location of platted and unplatted property.

Meets with individuals, groups and violators; conveys verbal and written information concerning County Code regulations.

Prepares code violation and investigation reports; issues civil citations; testifies at administrative and judicial hearings; prepares correspondence and official notices; prepares criminal case exhibits and civil case summaries from work files.

Prepares work orders; reviews work completed by violators, County crews, or contractors to ensure compliance with corrective action instructions.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of County Codes, regulations, rules and administrative practices relating to enforcement actions.

Considerable knowledge of the geography of metropolitan Dade County including major road networks and municipal boundaries.

Knowledge of legal procedures related to the enforcement of County ordinances and regulations.

Knowledge of modern office equipment, practices and procedures.

Knowledge of public relations principles and techniques.

Knowledge of business English, spelling and arithmetic.

Ability to explain and enforce regulations with firmness, tact and impartiality.

Ability to make inspections and determine facts through investigations.

Ability to explain enforcement processes clearly and concisely, verbally and in writing, to groups and individuals.

Ability to maintain records and prepare reports.

Ability to review and analyze reports from other government agencies and departmental employees.

#### NATURE OF WORK

This is advanced administrative and supervisory work in the investigation and enforcement of a variety of Metro-Dade County Code regulations.

Employees in this class are responsible for planning, assigning and reviewing the work of neighborhood compliance officers engaged in field and office activities related to the enforcement of County ordinances. Responsibilities include providing advice on field and office work problems, developing non-judicial solutions to code violations, coordinating enforcement activities with a variety of officials and organizations, overseeing completion of service requests and various statistical reports, and developing recommendations for improved enforcement activities. Incumbents exercise considerable independent judgment in the coordination and resolution of various County Code enforcement issues. Supervision is exercised over a staff of neighborhood compliance officers engaged in various phases of compliance activities. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory achievement of enforcement objectives.

#### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of neighborhood compliance officers engaged in the enforcement of a variety of Metro-Dade County Code regulations.

Provides advice and assistance to neighborhood compliance officers and service representatives concerning office and field work; assists in the review of County records necessary to complete investigations of requests for assistance.

Makes recommendations and implements solutions to resolve code violations without the necessity of court action.

Maintains working relations with complainants, violators, property owners, homeowner groups, trustees, hearing offices and attorney's; coordinates multi-agency enforcement actions as required.

Implements enforcement procedures and methodologies; makes recommendations for changes in existing department rules, policies and regulations pertaining to enforcement.

Attends community meetings and explains County Code regulations; reviews complex complaints with citizens or local groups and develops action plans.

Prepares, maintains and submits a variety of narrative and statistical reports; completes forms, schedules and correspondence.

Coordinates the processing of criminal cases and the preparation of enforcement case histories.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of County Codes, regulations, rules and administrative practices relating to enforcement actions.

Considerable knowledge of the geography of metropolitan Dade County including major road networks and municipal boundaries.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of investigative methods, legal procedures and enforcement techniques pertaining to the enforcement of County ordinances and regulations.

Knowledge of the principles and practices of modern office administration.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to meet and deal effectively with the public and their representatives, subordinates and superiors.

Ability to express ideas and information, clearly and concisely, verbally and in writing.

Ability to enforce local ordinances with firmness, tact and impartiality.

#### NATURE OF WORK

This is advanced administrative work in enforcement collections and contract monitoring for the Team Metro Department.

An employee in this class is responsible for the billing and collection of enforcement costs for violations as provided within the provisions of 8CC, Chapters, 22-103.14, 2-103.15, 2-105.16, 19-19-8(c), 19-12(B), 19-14(A), 21-21-30.01(d), 21-30.01(f) and chapter 33 of the Code of Miami-Dade County. Responsibilities include supervising subordinates engaged in processing billing and collection enforcement costs, developing payment plans and monitoring payment schedules, dealing with public inquiries concerning enforcement costs, developing and implementing lien policies and procedures, and monitoring contracts for the securing or demolition of structures. The incumbent exercises considerable independent judgment in assuring compliance with enforcement cost collection policies and procedures. Supervision is exercised over clerical subordinates engaged in processing liens, payments, civil violation notices and other documents in enforcement collection activities. Supervision is received from an administrative superior who reviews work for effective management of enforcement collection and contract monitoring responsibilities and achievement of established goals and objectives.

#### ILLUSTRATIVE TASKS

Supervises subordinates engaged in processing liens, civil violation notices, intent of lien and demand for payment invoices, satisfaction of liens or final orders in the billing and collection of enforcement costs for violations of the South Florida Building Code.

Develops payment plans with citizens and monitors payment of settlement costs; monitors payment schedules established by settlements in criminal or civil court.

Receives and responds to public inquiries concerning cost recovery fees, tickets, and notices of violation for enforcement of zoning, minimum housing and building code violations.

Coordinates the development of lien policies and procedures.

Recommends settlement costs based on facts involved in enforcement cases; reviews requests to modify fines; drafts procedures to implement cost recovery fees.

Supervises preparation of bid and contract documents for the securing of swimming pools, asbestos removal, securing of structures and demolition of structures; assures that Notices to Proceed are in proper order; advises vendors of required permits prior to job commencement; assures that standard operating procedures are utilized in the bid process.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the processing of liens, civil violation notices and other documents in the collection of enforcement costs from violators of the South Florida Building Code.

Considerable knowledge of the principles of business and public administration.

Considerable knowledge of provisions of the South Florida Building Code pertaining to the collection of enforcement costs.

Considerable knowledge of the records, forms, documents and affidavits used in the processing of enforcement cost cases.

Considerable knowledge of bid processes and procedures involved in contracting for the securing or demolition of structures and other enforcement services.

Knowledge of the principles of accounting.

Knowledge of public relations principles and techniques.

Knowledge of supervisory principles and practices.

Ability to plan, direct and coordinate the processing of liens, civil violation notices and other documents in the collection of enforcement costs from building code violators.

#### Job Specifications

##### NATURE OF WORK

This is supervisory clerical work or independent clerical work of comparable responsibility.

Employees in this class usually plan, assign and review the work of a moderate sized clerical staff engaged in complex clerical activities. In the absence of supervisory responsibilities they do more advanced clerical work requiring the application of more varied and involved procedures and the more frequent use of a higher degree of independent judgment in solving work problems than is found in the Clerk 2 class. Situations concerning important departures from standard practices and procedures are referred to a superior for final decision. New assignments usually consist of statements of desired objectives, and work is usually reviewed only for achievement of desired results.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of a moderate sized clerical staff engaged in such activities as making simple interpretations of planning, building, and zoning laws, rules and regulations; in preparing maps for zoning purposes; compiling and auditing payrolls, and in recording minutes of court procedures.

Supervises a small clerical staff engaged in diverse filing, typing and stenographic activities relating to such functions as: park operations, billing and receiving waste collection fees, or scheduling minor hospital purchasing, maintenance and transportation activities.

Supervises the mail room of a large county institution; maintains current roster for purposes of mail distribution; sorts mail and packages; sells stamps and money orders, insures and affixes postage to parcel post; maintains official governmental postal manual containing regulations and directives pertaining to the use of the mails, and answers difficult inquiries.

Answers calls pertaining to right-of-way dedicated to the county; assists abstractor in title search, checks right-of-way and property deeds as to description; prepares deeds for acceptance by the Board of County Commissioners, and after recording enters them in the right-of-way records. Keeps county property books and section tracings up-to-date as to right-of-way and county properties.

Assists superior in planning for and administration of Division activities including budget, personnel, purchasing and work methods and procedures; supervises a group of clerical, duplicating equipment operators, driver-messengers, and custodial services, and a central storeroom of office and stationary supplies for county departments.

Supervises and participates in preparing tax statements, in posting tax payments to rolls, in checking rolls for delinquent taxes, and in balancing the rolls at close of the year; maintains property card files of parcels of land in the county, with particular emphasis on property having delinquent taxes due; prepares interest charts for delinquent sale certificates; conducts tax deed sales; prepares and supervises the preparation of municipal and county delinquent real estate tax bills.

Supervises the complaint section of a department; receives calls and answers questions pertaining to drainage, road construction and repair, sidewalks, canals, debris removal, rock pits and related engineering matters; maintains cross reference file on all projects under construction for purposes of public information.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of business English, spelling and arithmetic.

## Human Resources Department

---

### RER Product Control Technician (002245)

Considerable knowledge of office practices, procedures and appliances.

Some knowledge of the principles of office management and supervision and ability to apply this knowledge to work problems.

Ability to acquire rapidly considerable knowledge of the legal, administrative and procedural regulations applicable to the organization of assignment.

Ability to keep complex records and prepare periodic reports from such records.

Ability to plan, assign and coordinate the work of a moderate sized clerical staff, and to instruct and train clerical subordinates in a manner conducive to full performance and high morale.

Ability to develop and maintain effective departmental and public relations.

Ability to develop, layout, and install clerical procedures and operations from general instructions.
