Initiates synchronous multipoint terminal communications providing batch processing to an off-site mainframe computer installation.

Performs local and remote loopback tests.

Maintains a record of computer operations.

Performs cleaning, minor maintenance and adjustments on assigned equipment; changes tape reels and printing ribbons, inserts and aligns paper supply.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operating characteristics and maintenance requirements of mini-computer data processing equipment.

Knowledge of the established rules and regulations governing mini-computer operations in the area of assignment.

Knowledge of the causes of data rejection or error and the action required for correction.

Knowledge of the scheduling and priority of jobs applicable to mini-computer operations in the area of assignment.

Ability to operate mini-computer and peripheral data processing equipment.

Ability to implement work flow procedures to process data processing projects on a mini-computer system.

Ability to perform minor maintenance, cleaning and adjustments to mini-computer equipment.

Ability to understand and carry out verbal and written instructions.

Ability to maintain records of computer operations.

NEW 1-83

#### Nature Of Work

This is technical work in the operation of mini-computer data processing equipment.

### W & S Data Management Section Supervisor (005650)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 credits in a computer related field. Two years experience in a leak detection program using computer related programs and equipment; two years experience using computer assisted mapping software; two years experience in database development and administration and one year supervisory experience are required. Must possess a Miami-Dade County GIS Certificate - Level 2 and have successfully completed an Auto Cad Course Level 2 for mapping and drawing. Additional related experience may substitute for the required education on a year for year basis.

#### Job Specifications

##### NATURE OF WORK

This is professional administrative and supervisory work in data management for the Support and Water Accountability sections of the Miami-Dade Water & Sewer Department.

An employee in this class supervises and manages a data management system that provides technical support to the department's Leak Detection, Valve Exercise and Fire Hydrant Programs. Responsibilities include directing and overseeing subordinate staff in the creation, analysis and updating of reports related to the Leak Detection, Valve Exercise and Fire Hydrant Programs; calculation of the estimated water loss for the water distribution system; maintenance and repair of all leak detection equipment; programming, review and maintenance of all databases; installation of all computer software; creation of GIS and AutoCad maps; and review and analysis of work tickets. The incumbent exercises independent judgment in auditing the water system to account for all water loss and developing proper recommendations to prevent unnecessary water loss along the water distribution system. Supervision is exercised over a staff of subordinate technical and clerical employees engaged in various phases of the section's work. Supervision is received from an administrative superior who reviews work for operational effectiveness and adherence to departmental standards and policies.

##### ILLUSTRATIVE TASKS

Oversees and manages the Data Management Unit in the department's Support & Water Accountability Section to include creating, analyzing and updating reports related to the Leak Detection Program, radio response leaks, and all flushing activities; and calculating the estimated water loss for the water distribution system.

Oversees and assigns daily tasks to the Leak Detection Equipment Specialists in the Electronic Work shop responsible for the maintenance, repair and programming of all leak detection equipment; updating the efficiency program database; downloading information from leak detection equipment used to pinpoint leaks and updating work tickets database.

Oversees and assigns daily tasks to the Information Technology Specialist responsible for providing technical support; installation of all computer software; programming, reviewing and maintaining all databases; creating GIS and AutoCAD maps and troubleshooting all laptops, desk top computers, printers, fax and copy machines.

Oversees and assigns daily tasks to a GIS Graphics Technician II responsible for creating and manipulating maps, sketches and plans; and deploying and analyzing data in the field.

Oversees and assigns daily tasks to Data Entry Specialists responsible for entering daily time records; maintaining numerous databases and preparing daily weekly and monthly reports; requesting locations for work tickets; reviewing and analyzing work tickets submitted to the Construction Management Division and researching job order information.

Performs system water audits to account for all water loss in the water distribution system; analyzes and creates all water loss control reports and makes recommendations to management for need actions.

Creates and updates manuals for training purposes; prepares, develops and implements training classes; creates and prepares presentations for the American WaterWorks Association (AWWA); conducts and coordinates a Leak Detection Program Seminar for other counties, cities and countries; selects appropriate computer software classes for field personnel; cross trains field personnel and evaluates standards for the

### W & S Data Management Section Supervisor (005650)

leak pinpointing process.

Manages the establishment and creation of various databases; manages geo-coding projects for map construction; prepares and maintains paperwork for audit purposes; creates and updates various monthly reports.

Researches and makes recommendations to acquire updated leak detection equipment and leak detection survey methodology; ensures that all leak detection equipment is properly utilized, functioning and maintained; attends GIS annual seminars to evaluate the latest technological advancements and meetings related to leak detection.

Produces and coordinates leak detection and fire hydrant videos for publicity purposes; reviews the preparation of personal Geo-Databases in GIS for the creation of layouts of Miami-Dade County to identify the amount of leaks, atlas pages survey and prioritization of areas of system betterment.

Collects data from various fire departments in Miami-Dade County used to calculate water loss and generate reports; tracks and updates information in the fire hydrant database for hydrants out of service and hydrants which have been repaired; calculates water loss when hydrant repair crews repair and flush hydrants; reviews fire hydrants with locks that prevent unauthorized operations.

Coordinates the valve exercise report; assembles backlog report for work tickets issued; constructs reports tracking flushings performed; and organizes reports that track the number of shutdowns, test kills and tie-ins performed.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of database creation, maintenance and management.

Considerable knowledge of report writing and analysis.

Considerable knowledge of the repair, maintenance and programming of a variety of leak detection equipment used to perform leak surveys.

Considerable knowledge of supervisory principles and practices.

Knowledge of GIS and AutoCAD used to create maps.

Knowledge of new leak detection equipment available and best practices in leak detection surveys.

Ability to install computer software.

Ability to program, review and maintain a variety of databases.

Ability to download information from leak detection equipment to search for potential leaks.

Ability to calculate estimated water loss from the water distribution system.

Ability to troubleshoot lap tops, desk top computers, printers, faxes and copy machines.

Ability to perform a system water audit and account for all water loss.

Ability to analyze and create all water loss control reports and make recommendations to management for needed actions.

### W & S GIS Quality Assurance Specialist (005662)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in Computer Science, Cartography, Geography or related field. One year of experience in interpreting as-built information and transferring as-built data to the GIS to include quality control and quality assurance review. Additional related experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is professional technical work in GIS quality assurance ensuring the accuracy of water and sewer infrastructure GIS layers. An employee in this class is responsible for performing GIS quality assurance responsibilities to ensure water & sewer infrastructure GIS layers are updated according to as-builts, field books, verified data correction requests and other departmental approved sources. Responsibilities include assembling database information for incorporation into the computerized Geographic Information System (GIS), conducting research and analyzing field reports to produce accurate information on the location and nature of water and sewer facilities, and relaying information to other departmental work units to effect repairs where they are found necessary. The incumbent exercises considerable independent judgment in identifying differences between existing drawings of acquired water and sewer facilities and actual structures in the field. Supervision may be exercised over Cadastral Technicians and other working to input and/or correct information in the WASD GIS layers. Supervision is received from a W & S GIS Quality Assurance Supervisor who reviews work for achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Researches and analyzes water and sewer inspection reports to substantiate and compare field findings on pipelines, elevations, laterals, sizes of pipes, dimensions and distances, condition of water and sewer systems, and the location of not yet identified sanitary ducts and covered manholes, valves, hydrants, distribution mains, transmission mains, gravity sewer, force mains and pump stations.

Corrects, updates, verifies, and improves departmental GIS and atlases; identifies discrepancies pertaining to asset identification and submits corrections; checks and verifies various aspects of departmental maps including sewer line flow direction, elevations, number of tie-in lines, diameters, service lines and laterals.

Assists with the "push and synch" process between GIS and EAMS to ensure that all assets shared by both systems contain the same information; generate, interpret, recommend and assist to correct discrepancy reports between GIS and EAMS.

Assign, track, and report GIS maintenance work for Cadastral Technicians or others working to input and/or correct information on the GIS layers, as required.

Performs other related work.

##### KNOWLEDGE, SKILLS AND ABILITIES

Knowledge of the Geographic Information System (GIS) utilized within the Miami-Dade Water & Sewer Department

Knowledge of the principles, practices, techniques and instruments of engineering drafting.

Knowledge of the basic principles of civil engineering as they relate to topographic surveying and engineering drafting.

Knowledge of all above-ground and below-ground water and sewer field facilities.

Knowledge of research techniques and the sources and availability of pertinent information concerning water and sewer systems.

Ability to interpret as-built information and transfer as-built data to a GIS.

Ability to conduct research to correctly update GIS WASD layers.

Ability to incorporate field survey findings into the Geographical Information System database.

Skill in the use of GAMS and ArcGIS software.

NEW 4/29/2013

#### Nature Of Work

This is professional technical work in GIS quality assurance ensuring the accuracy of water and sewer infrastructure GIS layers.

### W&S Cadastral Technician (005665)

#### Minimum Qualifications

High school diploma or GED. Three years of technical drafting experience to include the preparation of working plans and drawings using AutoCADD are required. One year of technical surveying experience may substitute for one year of the required drafting experience. Completion of coursework in Engineering may substitute for the required experience on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work in cadastral engineering.

Employees in this classification act as principal assistants to professional engineers in performing a variety of the more responsible and technical cadastral engineering tasks. Work requires a considerable knowledge of engineering surveying, land surveying and real property interests. Cadastral Technicians frequently supervise subordinate technical personnel. All work is subject to check in progress and upon completion by professional engineers.

##### ILLUSTRATIVE TASKS

Checks and verifies plats of subdivisions which have been prepared by land surveyors for official recording.

Reviews title search information prepared by abstractors to determine ownerships and other property interests.

Prepares and checks legal descriptions of property to be acquired for road right-of-way or other public purposes.

Performs difficult surveying computations to determine bearings and distances included in legal descriptions and area of tracts of land.

Checks executed instruments of conveyance and related documents for proper form, accuracy and completeness.

Supervises the preparation of exhibits, maps and sketches as needed in connection with acquisition functions and condemnation proceedings.

Makes routine field trips to obtain information concerning property descriptions and property values.

Trains lower level technical personnel by informal on-the-job instruction.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of principles, techniques and instruments of engineering drafting.

Considerable knowledge of mathematics through trigonometry and its application to sub-professional engineering and surveying computations.

Considerable knowledge of the basic principles of civil engineering and land surveying.

Considerable knowledge of interests in real property and instruments of conveyance and documents related thereto.

Ability to perform difficult surveying computations.

Ability to read and interpret a wide variety of maps, plans, aerial photographs, survey notes and other cartographic records.

Ability to understand and follow complex oral and written instructions.

### W&S Cadastral Technician (005665)

Skill in the use of engineering drafting instruments and equipment.

NEW 10-73

#### **Nature Of Work**

This is advanced technical work in cadastral engineering.

### W & S Clerk 2 (005702)

#### Minimum Qualifications

High school diploma or GED. One year of general clerical experience is required. Completion of coursework or certified business school may substitute for the required experience on a month-for-month basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work for the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for performing a variety of advanced clerical duties involving moderate complexity for the Miami-Dade Water & Sewer Department. Responsibilities may include receiving and distributing reports and correspondence, maintaining files and logs, responding to requests from the public or various officials, sorting and distributing mail, reviewing and verifying invoices, preparing materials for meetings and conferences, and performing a variety of related office duties. Incumbents perform more complex clerical duties and work with greater independence than employees in the next lower class. Employees may operate standard office equipment for which no previous training is required. Supervision is received from a clerical or administrative superior who reviews work for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Receives and distributes reports and correspondence; logs in requests; stamps, sorts and distributes U.S. and interoffice mail; organizes and maintains office files and records.

Receives and responds to requests or complaints from the public, contractors, and other officials concerning various unit activities or routes telephone calls to appropriate individual or office.

Reviews and corrects invoices pertaining to construction projects.

Prepares agendas for preconstruction meetings, logs in change orders, maintains monitoring well reports and testing laboratory logs.

Assists in the preparation and assembly of booklets, reports and related materials and documents required for various meetings or conferences.

Compiles, reviews and maintains job order files; maintains Daily Activity Reports.

Assists in proofreading engineering documents and contracts and other printed materials to ensure accuracy.

Maintains and updates departmental personnel files; assists in the processing of personnel change documents and maintaining a variety of personnel records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of departmental policies and procedures applicable to the area of assignment.

Knowledge of modern office practices and procedures.

Knowledge of business English, spelling and arithmetic.

Knowledge of departmental operations and activities in the area of assignment.

Ability to understand and carry out moderately complex verbal and written instructions.

Ability to make minor decisions in accordance with established departmental policies and procedures.

Ability to deal with the public in a courteous and tactful manner.

Ability to learn and perform a variety of moderately complex clerical duties.

NEW 10-96

## Human Resources Department

### W & S Records Center Clerk 2 (005707)

#### Minimum Qualifications

High school. Two years of experience in the receipt, storage, issuance and filing of records are required. Must possess a Driver license. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical and public contact work in the retrieval and furnishing of information from document records in the records center of the Miami-Dade Water & Sewer Department.

Employees in this class are primarily responsible for the retrieval of information, documents or complete records from various files in storage in response to requests from sources within and outside the County. Incumbents are responsible for exercising care in releasing information and files only to authorized persons and for withholding release in instances where court order or other action is required. Supervision is received from a technical superior who assists as problems arise in the locating and furnishing of information from records in storage.

##### ILLUSTRATIVE TASKS

Receives requests for records by fax, mail, telephone and the visiting public including County, state and federal officials, attorneys, water & sewer contractors, departmental officials, insurance companies and others; screens requests to assure persons are authorized to receive information and that confidential files can be released without court order.

Retrieves folders or loose documents from record cartons based on file number and nature of documents; refers to automated or manual records center listings as needed; prepares and inserts charge-out tickets and dispatches records or carries them to a reference room.

Assists attorneys, internal auditors and accountants with more difficult record searches; retrieves various folders to trace sequence of documents needed for audit or legal proceedings; locates misplaced or missing material; locates and groups related documents of a particular type or kind.

Provides information from construction, legal and other documents over the telephone; answers general telephone inquiries concerning the nature of semi-active and active records maintained in the depository, or established procedures in use of the facility.

Assists superior in the preparation of inactive records for microfilming by arranging documents in appropriate sequence according to court proceedings or dates; assists in preparation of records for systematic destruction.

Assists superior in the selection and preparation of records to be transferred to the centralized County records depository.

Refills loose documents into cartons and assists in reshelving of records by moving cartons using lifts and ladders as needed.

Supervises operation of the records center in the absence of the immediate supervisor, as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of rules and regulations pertaining to the release of public records.

Knowledge of records center records management system, policies and procedures.

Knowledge of the content of records center active and semi-active records.

Knowledge of the sequence of material in legal, construction or other records in storage.

Knowledge of retention schedules for depository records.

Knowledge of public relations principles and techniques.

Ability to retrieve records from storage promptly and accurately.

Ability to retrieve appropriate documents in difficult record searches.

Ability to establish and maintain effective working relationships with fellow employees, superiors and the public.

Ability to deal courteously, tactfully and effectively with the public and officials of various public and private organizations.

Ability to exercise care in the release of information from records in storage in accordance with established regulations.

Ability to work independently with a minimum of supervision.

Ability to operate lifts and ladders at heights up to sixteen feet.

## Human Resources Department

### W & S Office Support Specialist 2 (005712)

#### Minimum Qualifications

High school diploma or GED. One year of clerical experience is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work which involves moderately complex work methods and problems and requires skilled typewriting.

Although employees in this class perform duties which require skilled typewriting, the principal emphasis is upon the wide variety of clerical tasks performed which require the application of independent judgment and clerical knowledges. Work of these positions other than typewriting is similar in nature and level to that found in the Clerk 2 class. The variety of work differs among positions, but where work is more repetitive there is an additional responsibility for finality of action. Work may include the operation of other standard office machines for which no previous training is required. Supervision is occasionally exercised over a small group of employees assisting in routine details. Until the more difficult phases of a job are learned an employee works under relatively close supervision, but thereafter detailed instructions are received only when changes in procedures are made. Work is reviewed by a supervisor through observation of operations, periodic audits of work performed, review of typewritten material, and by advice and assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Maintains the less complex accounting, financial and cost records where no technical knowledge is required but where frequent procedural problems arise; prepares or checks payrolls, vouchers, requisitions and purchase orders; maintains personnel, financial, court and similar records.

Gives information to other divisions and the public, applying significant knowledge of departmental rules, regulations and procedures to interpretations made.

Supervises a small group of employees engaged in routine clerical and typing duties.

Processes documents requiring various procedural knowledges such as warrants for arrest or insurance claims; reviews documents for sufficiency, obtains necessary signatures and routes appropriately, maintaining follow-up.

Prepares less complex tax statements; computes simple taxes or obtains data for the computation of more involved taxes; replies to correspondence inquiries covering tax procedures.

Composes and types form letters and other routine correspondence based on information from records and files; prepares rough draft reports, narratives and statistical tabulations.

Types from copy, rough draft or general instructions, accounting and financial statements, inventories, court records, letters, payrolls, receipts, medical records and case histories, departmental reports, permits or other materials, frequently requiring independent action and discretion on problems encountered.

Takes and transcribes dictation by dictating machine, including correspondence, reports or other materials; takes dictation from professional personnel requiring knowledge of special terminology.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of business English, spelling and arithmetic.

## Human Resources Department

---

### W & S Office Support Specialist 2 (005712)

Knowledge of office practices and procedures.

Ability to understand and carry out moderately complex oral and written instructions.

Ability to make minor decisions in accordance with procedures, laws and regulations and to apply these to work problems.

Ability to make arithmetic computations accurately with reasonable speed.

Ability to assign, supervise and review the work of other clerical employees in a manner conducive to full performance and high morale.

Ability to meet and deal effectively with the general public and to use tact and good judgment.

Skill in typing accurately from rough draft, plain copy or dictation machines at a reasonable rate of speed.

REV 4/96

#### **Nature Of Work**

This is advanced clerical work which involves moderately complex work methods and problems and requires skilled typewriting.

Must take and pass a typing skills test with a score of 35 net WPM. Photo identification is required to take the typing skills test.

### W & S Complaint Intake Specialist (005714)

#### Minimum Qualifications

High school diploma or GED. One year of clerical experience in public contact, handling complaints, or providing citizen information or referral services is required. Must be able to work a rotating shift schedule, weekends and holidays. Must possess a driver license.

#### Job Specifications

##### NATURE OF WORK

This is independent clerical and field work in the intake and research of construction complaints for the Miami-Dade Water and Sewer Department.

Work in this class involves the responsibility for screening telephone calls, emails, incidents, field activities, and 311 Service Requests to determine the party responsible for construction repairs. Employees research a variety of construction complaints against present and past outstanding construction project listings to determine department/contractor liability via a number of database systems to include, but not limited to, GIS applications. Additional responsibilities include logging complaints into a database; contacting complainants to inform them of the progress of repairs and conducting bi-weekly field inspections of work. Although work is performed in accordance with established policies, it is not supervised in detail and a considerable amount of independent judgment is frequently involved. General supervision is received from an administrative superior who reviews work for operational effectiveness and adherence to departmental standards and policies.

##### ILLUSTRATIVE TASKS

Screens non-emergency telephone calls, e-mails, incidents (EAMS), field activities (FA's)(CC&B), and 311 Service Requests to determine responsibility for construction repairs.

Cross references construction complaints with present and past outstanding construction project listings to determine department/contractor liability via various database applications including GIS.

Organizes, files and refers construction complaints to the appropriate interdepartmental liaison for immediate resolution.

Maintains records related to department construction projects; reviews, compiles and prepares reports on complaints for presentation by designated department liaison.

Performs daily analysis, review, reconciliation and reporting of CC&B Field Activities and CCMS.

Utilizes CCS, EAMS, and CC&B software applications to log complaints into the database system; reviews web based atlas applications (GIS) to confirm layout of water and sewer infrastructure; extracts 311 Service Requests/Complaints from the department's construction group in CSR applications.

Conducts regular quality and assurance monitoring and reporting of customer complaints and customer satisfaction surveying consistent with departmental performance measures; utilizes EAMS and all available applications to deter customer impact and loss of service.

Maintains and develops open lines of communication with Construction Management by attending pre-construction meetings and coordinating with the Public Information Office.

Contacts complainants to inform them of the progress of construction repairs; conducts bi-weekly field inspection of complaints to ensure customer satisfaction and contractor compliance; records findings with photos of completed work.

Performs related work as required.

High school diploma or GED. One year of advanced clerical experience is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced secretarial and related clerical work for the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for performing advanced secretarial duties for water & sewer officials, administrators and managers. Work includes utilizing the full range of modern secretarial skills to perform secretarial duties, operation of word processing equipment, personal computers, typewriters and other office equipment, assigning and reviewing the work of lower-level clerical employees, and preparing a variety of reports, forms, requisitions and correspondence. Duties may include taking and transcribing dictation which may involve financial, engineering or technical terminology. Supervision is received from an administrative official who reviews work for the efficient and effective performance of secretarial duties in support of unit operations.

##### ILLUSTRATIVE TASKS

Performs advanced secretarial duties for officials, administrators and managers of the Miami-Dade Water & Sewer Department; makes appointments and maintains calendar; arranges for conferences and meetings; attends meetings and conferences taking minutes or summary notes.

Opens and distributes mail; maintains control of correspondence flow through work unit and assures that response deadlines are met; composes correspondence or selects standardized formats; prepares a variety of reports, correspondence, documents, forms and requisitions.

Receives visitors and screens telephone callers; acts as receptionist and answers requests for information involving department, division or work unit activities and established policies and procedures.

Operates word processing, personal computer or advanced typewriting equipment to prepare and create reports, generate correspondence or other documents, and complete forms, requisitions and other similar standardized records.

Assigns and reviews the work of lower-level clerical employees engaged in typing, filing and other clerical activities; provides advice and assistance as questions arise concerning work tasks and work unit procedures.

Retrieves and assembles material from files; authorizes expenditures from petty cash funds; requisitions office supplies; performs arithmetic calculations as needed.

Takes and transcribes dictation as required, involving technical or specialized terminology.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of secretarial procedures, methods and techniques.

Knowledge of modern office procedures, practices and equipment.

Knowledge of business English, spelling and arithmetic.

Knowledge of the records, reports and forms utilized in the area of assignment.

Knowledge of the policies, procedures and regulations of the Miami-Dade Water & Sewer Department.

Some knowledge of County organization and operations.

Some knowledge of supervisory principles and practices.

Ability to establish and maintain an effective working relationship with a government official.

Ability to operate modern office equipment.

Ability to search for and compile information from files and other sources.

Ability to make minor decisions in accordance with office procedures and departmental regulations.

Ability to develop and maintain effective departmental and public relations.

Skill in the operation of a computer keyboard.

Skill in typewriting.

#### Minimum Qualifications

High school diploma or GED. Two years of public contact experience to include construction plans coordination or intake and processing of applications or complaints are required.

#### Job Specifications

##### NATURE OF WORK

This is responsible technical and public contact work in the Water & Sewer Department Construction Contracts Management Division. An employee in this class is responsible for processing Performance Bonds; maintaining the integrity of the construction record files and assisting attorneys, government officials, company executives, other members of the public and county employees with requests for information. Supervision is received from a W & S Document Control Supervisor who reviews work for achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Receives requests for records via fax, mail, telephone and in person; screens requests to assure persons requesting information are authorized to receive the information and confidential files may be released without a court order.

Retrieves documents from file cabinets; prepares check out form and dispatches records or places them in a reference room for review by the requester; makes copies of requested documents and invoices the requester.

Assists the Document Control Specialist Supervisor, attorneys and other members of the public with more difficult record searches; retrieves various folders to trace sequence of documents; locates misplaced or missing material; locates and groups related documents on particular contracts or subject matter; provides information from legal and other contractual documents over the telephone; answers general telephone inquiries concerning the nature of semi-active and active records maintained in the depository or established procedures in the use of the facility.

Assists the Document Control Specialist Supervisor in the preparation of inactive records and prepares records for storage in the Records Storage Center; assists in purging files and preparing paperwork for preparation of records for systematic destruction; supervises operation of the records center in absence of the immediate supervisor.

Processes Performance Bonds and Letters of Credit for Department of Transportation (DOT) contracts to allow contractors to work within DOT roadways; upon completion of work by the contractor, release by DOT and meeting conditions of the permit, prepares paperwork for Bonds and/or Letters of Credit for release.

Receives engineering plans via SharePoint link and opens plans in Autodesk Design Review program; formats plans in Autodesk Design Review and sends to copiers/printers; scans and sends marked up plans via email to the Plans Review Section of the New Customer Division; makes copies of plans not in SharePoint and delivers originals to Plans Review; scans large plans into a workstation computer, uploads pages individually and merges into one file to save in SharePoint.

Creates contractor submittals in the Project Control Tracking System (PCTS)/Proliance application used to manage projects and create a workflow to construction supervisors; requests PCTS number via outlook e-mail; communicates records and plan information related to construction site work to construction contractors via e-mail.

Receives hard copy correspondence and PCTS/Proliance application correspondence and distributes to the appropriate personnel; receives customer deliveries of plans, as-builts, shop-drawings and other related documents; creates computer folders to save documents; uploads documents in SharePoint and sends e-mail links to construction supervisors.

Receives New Customer Division documentation and correspondence for the Construction Contracts Management Division's Donation Unit; processes documentation/correspondence in an Excel database and New Business SQL/DSI application.

Prepares requisitions in the ERP/Financial application to order document control supplies and pay invoices.

Performs other related work.

##### NATURE OF WORK

This is responsible supervisory, technical and public contact work in the Water & Sewer Department Construction Contracts Management Division.

An employee in this class is responsible for processing engineering shop drawings, as-builts and other documents for contractors and engineers and assisting attorneys, government officials, company executives, other members of the general public and county employees with record searches and requests. Supervision is exercised over Document Control staff to ensure the integrity of the construction record files. Supervision is received from an administrative supervisor who reviews work for achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Supervises the operation of the Construction Contract Management (CCM) Document Control Records Center.

Plans efficient utilization of storage space and supervises re-shelving and repacking of containers; revises index listings of public records as needed; receives requests for records by fax, mail, telephone and the visiting public; screens requests to assure persons are authorized to receive information and that confidential files can be released without a court order.

Assists subordinates, attorneys and other members of the public with more difficult record searches; retrieves folders to trace sequence of documents; locates misplaced or missing material; locates and groups related documents on particular cases or subject matter; provides information from legal and other documents over the telephone; answers general inquiries concerning the nature of semi-active and active records maintained in the depository or established procedures in use of the facility

Updates filing systems and revises Construction Contracts Document Control Records Center procedures; supervises the systematic destruction of records and signs destruction schedules; prepares documentation of inactive records and prepares records for storage to be sent to the records storage center; purges files and prepares paperwork for preparation of records for systematic destruction according to retention schedules.

Receives engineering plans via SharePoint link; formats plans in Autodesk Design Review and sends to copier/printers; scans and sends marked up plans via e-mail to Plans Review Section of New Customer Division; makes copies of plans not loaded into SharePoint and delivers to Plans Review; scans large plans into a workstation computer, uploads each page and merges into one file to save in SharePoint. Creates contractor submittals in the Project Control Tracking System (PCTS)/Proliance application; creates workflow to construction supervisors; requests PCTS numbers via Outlook e-mail; communicates records and plan information related to construction site work to construction contractors via e-mail; sends and receives instructions via Outlook e-mail.

Receives New Customer Division documentation/correspondence for the Donation Unit of CCM; processes documentation/correspondence into an Excel database and the New Business SQL/DSI application.

Receives hard copy correspondence and PCTS/Proliance correspondence and distributes to the appropriate personnel; receives plans, as-builts, shop-drawings and other documents from customers; creates computer folders to save documents, uploads documents into SharePoint and sends e-mail links to construction supervisors.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs other related work.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of the organization and operation of the Document Control Records Center.

Considerable knowledge of records center records management systems, policies and procedures.

Considerable knowledge of the rules and regulations pertaining to the release of public records.

Considerable knowledge of the content of records center active and semi-active records.

Considerable knowledge of retention schedules for records depository records.

Considerable knowledge of complex computer programs used to format and scan construction plans and for project control tracking

Knowledge of supervisory principles and practices.

Ability to effectively plan record center activities to maintain daily service to requesting parties.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to deal courteously, tactfully and effectively with the public and officials of various public and private organizations.

Ability to efficiently plan and utilize storage space for the storage of a large volume of records.

Ability to exercise care in the release of information from records in storage in accordance with established rules and regulations

## Human Resources Department

### W & S Records Center Clerk 1 (005722)

#### Minimum Qualifications

High school diploma or GED. Six months of experience in the receipt, storage, issuance and filing of records are required. Must possess a Driver license. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is routine clerical and related manual work in the receipt, storage and filing of documents and records in a departmental or centralized records depository.

Employees in this class perform various duties in obtaining, shelving and repacking record containers in a departmental or central records depository. Work includes interfiling of returned documents in appropriate folders in stored record cartons and maintaining accurate records of all transactions. Employees use ladders and lifts in the shelving and movement of records, utilize hand carts, and operate light duty trucks in the transfer of records among various locations. Duties also require the loading and unloading of cartons on and off light duty vehicles. Supervision is received from a technical superior who reviews work for adherence to established policies, procedures and departmental regulations.

##### ILLUSTRATIVE TASKS

Obtains record containers from various County departments and agencies for transfer to the County's central records depository; loads cartons onto light duty vehicles; transports records to the County central records depository and unloads cartons.

Obtains record containers from departmental offices and transports them to departmental records center; transfers record containers from departmental records center to the County's central records depository.

Checks records in containers against transfer lists to assure completeness; notifies superior of missing records; notes on transfer lists the numerical location of each carton on shelves in the records center including aisle and box numbers.

Places containers in correct shelf space using ladders and lists; moves containers between shelves and re-marks as required.

Moves cartons to lower levels as needed to repack contents; repacks boxes by addition of documents to folders or addition of folders.

Retrieves documents or folders from cartons in response to authorized requests.

Refiles returned documents into correct containers and filing positions through references to charge-out tickets; corrects misfiled documents as noted.

Assists superior in the confidential destruction of records in accordance with authorized retention schedules.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the records storage system in a departmental or central records depository.

Knowledge of established procedures in the receipt, shelving, storage and retrieval of record containers.

Knowledge of refiling procedures for records in storage.

Knowledge of established safety practices in the area of assignment.

Some knowledge of the content of records in a records storage facility.

## Human Resources Department

---

### W & S Records Center Clerk 1 (005722)

Ability to shelve and file records accurately.

Ability to operate lifts and ladders at heights up to sixteen feet.

Ability to understand and follow verbal and written instructions.

Ability to safely operate a light duty vehicle.

Sufficient strength to permit the lifting and moving of record containers weighing up to fifty pounds.

### W & S Account Clerk (005728)

#### Minimum Qualifications

High school diploma or GED. One year of experience in bookkeeping; completion of a one year business program in bookkeeping; or completion of six semester credits in Accounting are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical work in the application of elementary bookkeeping principles to the maintenance of accounting or fiscal records for the Miami-Dade Water & Sewer Department.

Employees in this class maintain accounting records involving varied but routine bookkeeping operations in posting and balancing journals, ledgers and other records. Work may involve the operation of standard office equipment such as calculators and computer terminals for which no previous training is required. Incumbents may provide guidance and assistance to subordinate clerical personnel. Supervision is received from a superior through verification of financial records and statements, and review through audit by internal or external auditors.

##### ILLUSTRATIVE TASKS

Maintains cash, invoice, disbursement or control accounts; balances accounts and prepares routine reports; takes trial balances.  
Checks and codes invoices; prepares vouchers for payment and maintains voucher register.  
Compiles figures for use in preparation of preliminary budgets.  
Charges cost items to cost journals; extends, proves and assembles cost records; posts monthly cost records to ledgers.  
Counts, proves, records and prepares reports on daily cash receipts; posts to cash ledgers; prepares daily bank deposit; reimburses concession managers for cash disbursements; prepares reports on daily cash disbursements and posts to disbursement journal.  
Pre-audits fiscal documents for completeness, accuracy and compliance with well defined departmental accounting procedures.  
Classifies receipts and expenditures according to standard accounting classifications.  
Maintains time, material and equipment rental cost account records for capital improvement and maintenance projects.  
Schedules preparation of warrants in order to take advantage of discounts for prompt payment.  
Operates calculators, computer terminals and other standard office equipment.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of bookkeeping principles and practices.  
Some knowledge of standard office practices, methods and equipment.  
Some knowledge of fiscal policies and procedures applicable to the area of assignment.

Ability to make arithmetic computations rapidly and accurately.  
Ability to apply bookkeeping principles to the maintenance of routine fiscal and accounting records.  
Ability to maintain detailed records of inventory and accounting transactions.  
Ability to understand and follow verbal and written instructions.  
Ability to learn the operation of calculators, computer terminals and other standard office and accounting machines for which no significant previous training is needed.

This is specialized clerical work in the application of elementary bookkeeping principles to the maintenance of accounting or fiscal records for the Miami-Dade Water & Sewer Department.

### W & S Billing Clerk (005732)

#### Minimum Qualifications

High school diploma or GED. Two years of clerical and accounting experience with a utility.

#### Job Specifications

##### NATURE OF WORK

This is responsible clerical and customer service work. Employees in this class assist a small group of employees engaged in data entry and other clerical functions. Emphasis of the work is on ensuring the accuracy of billing information and assisting subordinates with unusual or difficult problems. Incumbents exercise independent judgment in coordinating the work of subordinates. General supervision is received from a supervisor who reviews work and who assists with unusual and difficult problems.

##### ILLUSTRATIVE TASKS

Assists a small group of data entry specialists to include assigning work and assisting with complicated applications; corrects account errors, initiates corrective action for accounts billed incorrectly either by pro-rating or estimating; maintains performance reports and conducts research.

Performs data entry to establish, close or change accounts for proper billing and collection; researches accounts and prepares adjustments for posting problems to include checking bills for lack of payment; investigates problem accounts and advises divisions of necessary corrective procedures.

Answers phone calls, faxes and/or emails regarding high bills, low pressure, leaks in mains or lines, final bills, connecting or disconnecting services, tampering, lost/stolen meters, set meters or removals; investigates complaints of excessive water bills or reports of low water consumption; estimates charges where defective or stopped meters are discovered.

Keeps records and prepares reports of assigned work and problems for assigned data entry specialists in Microsoft Excel for evaluation and productivity purposes.

Performs related work as required.

##### KNOWLEDGES, SKILLS & ABILITIES

Knowledge of People Soft CIS and Microsoft software.

Knowledge of supervisory principles and practices.

Knowledge of general office procedures, practices and equipment.

Knowledge of the customer billing system, codes, procedures and charges.

Knowledge of research methods used to resolve billing problems.

Ability to establish and maintain effective working relationships with internal and external customers.

Ability to create and maintain reports in Microsoft Excel.

Ability to research and resolve billing problems in a timely manner.

### W & S Custodial Worker 1 (005736)

#### Minimum Qualifications

Eighth grade. Three months of experience in industrial cleaning are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is moderately heavy manual work in performing routine housekeeping tasks on an assigned shift in Miami-Dade Water & Sewer Department buildings or facilities.

Employees in this class perform manual work involving a variety of housekeeping and domestic tasks to assist in the maintenance of County buildings. Duties include cleaning restrooms and offices, washing windows, removing trash, vacuuming carpets and mopping floors. Incumbents are responsible for the use of proper methods and materials in cleaning and in caring for buildings and equipment. Supervision is received from a custodial supervisor who periodically inspects work in progress and upon completion for satisfactory performance of housekeeping assignments.

##### ILLUSTRATIVE TASKS

Scrubs, mops, waxes and polishes floors; vacuums carpeting; dusts and polishes furniture; washes windows, water fountains, woodwork, toilets, washrooms and fixtures; cleans baseboards, doors and walls.

Keeps areas around buildings clean and free of litter; sweeps walkways.

Replaces burned out light bulbs; assists in making simple repairs to buildings and equipment.

Changes trash and garbage cans and relines with plastic trash bags as required; cleans food conveyors; washes pots and pans; cleans stoves, tables and refrigerators; cleans steam tables and broilers; washes floors in kitchens and cafeterias; washes glassware and dishes.

Moves office and institutional furniture and equipment from one place to another as directed; arranges chairs and tables in meeting rooms.

Checks and delivers linens and laundry.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Some knowledge of the materials, methods and equipment typically used in janitorial work.

Some knowledge of the geography of the buildings or facilities of assignment.

Ability to make minor repairs and adjustments to cleaning equipment.

Ability to understand and follow simple verbal and written instructions.

Physical strength and agility sufficient to perform assigned duties.

### W & S Micrographics Technician 2 (005746)

#### Minimum Qualifications

High school. One year of experience operating microfilm equipment and processing film is required.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the operation of advanced rotary and planetary cameras, microfilm duplicators, readers, film processors and related micrographic equipment.

Employees in this class perform micrographic work requiring the use of specialized equipment and techniques in the reproduction of official records and legal instruments. Duties require the operation of adjustable cameras, duplicators, densitometers, splicers and other microfilm equipment. This class is distinguished from that of the Micrographic Technician 1 in that employees operate a variety of microfilm equipment including numerous types of planetary and rotary cameras, make copies of original film using a microfilm duplicator and splice microfilm. Supervision may be exercised over equipment operators and supporting clerical staff by assignment of work, periodic review of work in progress and occasional verification of finished copies for quality. Work is reviewed by an administrative superior for satisfactory completion of production schedules and compliance with departmental policy.

##### ILLUSTRATIVE TASKS

Operates a variety of rotary and planetary microfilm cameras; adjusts for photographic areas, reduction ratios and settings; inspects documents and records to be copied for wrinkles, smudgings, rips and legal stamps; operates readers and reader printers to verify microfilm copy with official records for completeness and legibility.

Develops microfilm with film processors; mixes chemicals; adjusts water filters and temperature controls; rinses and drains machines; makes minor adjustments to processors.

Splices microfilm where it is necessary to insert missing frames or delete duplicates; makes copies of original film using a microfilm duplicator and operates advanced photo duplicating equipment.

Researches questions concerning filmed documents and makes copies using reader/printer equipment.

Insures that finished microfilm reels are properly labeled for retrieval of documents.

Determines density of microfilm with a densitometer to control film quality.

Recommends the servicing, repair and replacement of equipment and changes in reproduction methods and techniques.

Coordinates reproduction schedules with other departments requesting service; informs supervisor on scheduling, indexing, filing and ordering necessary supplies.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of microfilm, film processing and photostatic techniques and procedures.

Considerable knowledge of the operating principles and maintenance needs of microfilm machines, readers, duplicators, film processors, and related photo duplicating equipment.

Knowledge of developing solutions and techniques used in microfilm photo-chemical and photostatic reproduction processes.

Knowledge of various types of governmental records reproduced in a records management program.

### W & S Micrographics Technician 2 (005746)

Ability to determine the filming characteristics of a variety of records and legal instruments.

Ability to assign and review work of subordinates, as delegated.

Ability to maintain assigned production standards and schedules.

Ability to make minor adjustments to reproduction equipment and to recognize malfunctions immediately.

Skill in the operation of basic microfilm equipment.

REV 10-78

#### **Nature Of Work**

This is technical work in the operation of advanced rotary and planetary cameras, microfilm duplicators, readers, film processors and related micrographic equipment.

### W & S Customer Service Representative 1 (005748)

#### Minimum Qualifications

High school diploma or GED. One year of meter reading and/or customer service experience with a utility is required.

#### Job Specifications

##### NATURE OF WORK

This is field work requiring customer contacts for the Miami-Dade Water and Sewer Department.

Employees in this class are responsible for identifying minor problems and initiating corrective action, and may be responsible for monitoring employees in a lower classification. Duties include exercising considerable independence in handling customer contacts for a County utility as incumbents have frequent contact with the public that have some significance in utility public relations. Independent judgment is exercised in handling customers and in initiating corrective action or collection efforts, and in identifying situations which require the attention of upper management and bring these matters to their attention. Work is performed in accordance with established schedules and procedures, and although work is not clearly supervised, work reports are reviewed by a supervisor through field surveillance and or review of their submitted work reports.

##### ILLUSTRATIVE TASKS

Supervises a small group of meter readers; trains new meter readers; prepares reading schedules; assists in laying out new routes where needed; makes inspections of work of meter readers and keeps records of their work; performs re-readings where initial reading is questionable; assigns numbers to new customers or accounts; monitors the radio and responds to inquiries within a district office on the radio.

Works in an assigned area conducting inspections of pipes and plumbing fixtures prior to connect for service as assigned; connects, disconnects, locks or removes meters; verifies meter reading before institution of service stoppage; tests meters to see if they are recording consumption; performs service verifications; works lag routes; collects delinquent water and sewer bills.

Balances money and receipts; makes bank deposits and/or turns in money and receipts to Water & Sewer Cashiers; completes forms and maintains files containing work logs and mileage slips; completes door hangers and leaves notes on customer premises with application information pertaining to the visit.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of water meter-reading procedures.

Considerable knowledge of the customer billing system, codes procedures and charges.

Some knowledge of residential and commercial pipe systems, plumbing fixtures, and the operating principles of water meters.

Ability to read water meters and record readings.

Ability to perform simple arithmetical calculations accurately and quickly and maintain accurate records for bank deposits.

Ability to operate standard office equipment including a calculator, CRT or PC.

Ability to establish and maintain effective working relationships with the public.

Ability to keep records and prepare reports.

## Human Resources Department

---

### **W & S Customer Service Representative 1 (005748)**

Ability to maintain assigned equipment including Miami-Dade vehicle and various tools and supplies.

Skill in the use of small hand tools such as pliers, wrenches and screw drivers in making minor repairs and adjustments to meter connections.

REV 3-90, 1-07

#### **Nature Of Work**

This is field or office work requiring customer contacts, for the Miami-Dade Water and Sewer Authority Department.

### W & S Customer Service Representative 2 (005749)

#### Minimum Qualifications

One year of experience as a Miami-Dade County Customer Service Representative 1; or high school diploma or GED, and two years of experience performing customer service functions are required.

#### Job Specifications

##### NATURE OF WORK

This is complex public contact work in receiving, handling, investigating and adjusting complaints of customers of a county water and sewer utility.

Work in this class involves responsibility for investigating and adjusting customer complaints concerning water service and billing. Complaints may be received by way of the telephone, in-person, via the web or regular mail service. Incumbents may investigate these complaints and may also take applications for new service. This customer contact is of significance in utility public relations. Although work is performed in accordance with established policies, it is not supervised in detail and a considerable amount of independent judgment is frequently involved. General supervision is received from an employee in a higher class and may consist of detailed field surveillances, customer service reports, consultations and a review of reports.

##### ILLUSTRATIVE TASKS

Receives general requests and inquiries via telephone, walk-in, e-mail and regular mail from customers regarding high bills, low pressure, leaks in mains or lines, final bills, connecting or disconnecting of service, transfer of accounts, or refunds of deposits; processes requests and inquiries with tact and politeness.

Negotiates settlement of controversial water bills.

Investigates complaints of excessive water bills or reports of low water consumption in the field; checks buildings for leaks in plumbing; operates leak detection and portable test meter; estimates charges where defective or stopped meters are discovered; credits customer accounts according to departmental rules and regulations.

Provides consumers information to help them conserve water.

Performs a wide variety of clerical tasks in the office in maintaining records of customer contacts, checking bills for lack of payment, or maintaining service records; compiles various statistics and reports regarding meter reading, vehicles and other district related activities.

Assigns and dispatches work to subordinate employees; performs sub-meter inspections and service verifications; performs connects and disconnects of meters and other field activities related to the transfer of water and sewer service.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of utility department rates, credit procedures and billing practices.

Considerable knowledge of utility department rules, regulations and policies.

Considerable knowledge of residential and commercial pipe systems, plumbing fixtures, and the operating principles of water meters.

Knowledge of personal computer applications.

Ability to apply general departmental rules and procedures to specific customer problems regarding billing or service.

Ability to handle customer complaints tactfully, and to establish and maintain effective working relationships with the public.

## Human Resources Department

### W & S Communications Support Specialist (005751)

#### Minimum Qualifications

High school diploma or GED. Two years of public contact or interviewing experience are required. Must be able to work a rotating shift schedule, weekends and holidays. Duties require the physical ability to sit for extended periods of time. As a condition of continued employment, the ability to handle stressful emergency communications will be assessed during the training and probationary period.

#### Job Specifications

##### NATURE OF WORK

This is advanced communications work in a centralized 24-hour emergency communications call center for the Miami-Dade Water and Sewer Department.

Employees in this class are responsible for operating dispatching equipment; accurate, rapid and effective evaluation and response to telephone complaints and requests for information; and for monitoring alarm systems in a twenty-four hour seven-day week central communications center. Responsibilities include operating radio equipment to dispatch complaints and relay information, receiving telephone complaints from water and sewer customers, monitoring alarms and relaying data, completing telephone and complaint statistical reports, and compiling and completing other reports, logs and summaries. Some independent judgment is required in handling water and sewer service requests and in coordinating efforts to resolve problems. Supervision is received from an administrative superior who reviews work through personal observations and written reports for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Operates a radio console to receive and prioritize water and sewer-related complaints and relay information; dispatches calls for emergency and non-emergency calls for service; monitors status of field units; and records actions on radio log and automated customer information system.

Operates the ACD phone system and other communications equipment in receiving calls, determining the nature, geographic location, jurisdiction, and priority of the incident.

Monitors alarms and pumps at sewer lift stations and relays information to field units as required; operates paging system to send priority messages and work orders to field units.

Completes telephone and complaint statistical reports on a daily basis; accumulates information on a weekly and monthly basis and enters into computer terminal.

Reports and requests orders for flat tires and towing of departmental vehicles; completes abnormal discharge reports and follow up reports in the event of sewer spills and notifies governmental regulatory agencies.

Orders barricades and the servicing of barricades for field units after hours and on weekends to secure hazardous areas.

Reads hard copy and electronic maps and atlases to determine areas of responsibility and actions that are required.

Reports hazardous situations called in by field units to appropriate police, fire/rescue, or public safety agency authorities.

Advises fire departments of fire hydrants that have been repaired, put out of service or are being flushed.

Advises appropriate department work units and government agencies in the event of water off in large areas or for extended periods of time.

Performs minor maintenance tasks on communications center equipment, including resetting console equipment and documenting and preparing malfunction reports or shift transfer sheets for equipment repairs.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of radio transmitting techniques and procedures applicable to the dispatch of water and sewer mobile units.

Considerable knowledge of water and sewer field operations.

Considerable knowledge of the records, forms, logs and reports applicable to centralized communications center operations and activities.

Knowledge of the roadways and municipal boundaries of Miami-Dade County.

Knowledge of actions required as the result of alarm conditions.

Knowledge of departmental customer service policies and procedures.

Knowledge of maps and atlases used to identify the location of water and sewer facilities.

Ability to operate a computer-aided dispatch system.

### W & S Communications Support Specialist (005751)

- Ability to discuss water and sewer complaints with customers and explain departmental procedures.
- Ability to communicate effectively with customers and field units using telephones and radio equipment.
- Ability to carry out verbal and written instructions.
- Ability to express ideas clearly and concisely, both verbally and in writing.
- Ability to establish and maintain effective working relationships with co-workers, supervisors, and the general public.
- Ability to handle multiple tasks simultaneously.
- Ability to make swift, logical decisions and judgments in accordance with prior dispatch knowledges or experience.
- Ability to prepare and maintain reports, records and other documents.
- Ability to react calmly and quickly in emergency situations.
- Ability to speak clearly using good diction in the expression of ideas and information.

NEW 10-95; Revised 08-2008

#### **Nature Of Work**

This is advanced communications work in a centralized communications center for the Miami-Dade Water and Sewer Department. Applicants must take and pass a typing test with a score of 25 net words per minute, and then take and pass a computer-based skills test which will evaluate the ability to follow verbal and written instructions, decision making, data entry (audio), call summarization, cross referencing, prioritization and multi-tasking. Taking all components of the computer skills test will take approximately one hour. Photo identification, such as a driver's license, is required and must be presented to take the computer skills test.

### W & S Personnel Technician (005752)

#### Minimum Qualifications

High school diploma or GED. Two years of advanced clerical experience processing and maintaining personnel or payroll records are required. Completion of college coursework may substitute for the required experience on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is technical work assisting a professional or administrative superior in departmental personnel administration.

Employees in this class perform a variety of paraprofessional personnel administration activities in support of a departmental personnel function. Duties or combinations of duties performed vary, depending on the department to which assigned. Responsibilities include conducting preliminary interviews of applicants for employment, coordinating payroll related activities, advising supervisors and employees regarding personnel policies and procedures, and assisting in a variety of specialized personnel administration work. Incumbents exercise some independent judgment and discretion in interpreting and applying knowledges of standard personnel administration principles and practices. Supervision may be exercised over subordinate clerical employees by assignment and review of work for accuracy and conformance to personnel rules, regulations and procedures. Supervision is received from a professional or administrative superior who assigns work, assists with difficult problems and evaluates performance for technical quality, thoroughness and timely progress of work.

##### ILLUSTRATIVE TASKS

Assists in interviewing applicants for initial employment or for promotional positions; evaluates applicants' experience and training for adherence to minimum requirements; refers prospective employees to departmental hiring authorities for employment consideration and makes recommendations for selection or rejection; processes new employees for appointment in accordance with established procedures.

Serves as a departmental contact person for payroll related matters; provides information, resolves problems, and receives and responds to inquiries; coordinates work between departmental office and field operations, and the centralized personnel-payroll system; prepares and reviews the preparation of various personnel and payroll documents; assures accuracy of information and timely submission.

Monitors a departmental employee performance evaluation program, assures timely preparation of employee performance reports, assists department supervisors as needed in their proper completion; reviews performance reports for completeness, accuracy and for completion according to established procedures.

Prepares various statistical reports for use by department officials including overtime and leave usage analyses, vacancy reports, affirmative action reports, and others as required.

Maintains departmental table of organization; records changes such as transfers, demotions and status changes to insure availability of accurate information.

Confers with and provides information to supervisors and employees concerning established procedure and policy requirements in the selection of employees from eligible lists, leave requests, overtime authorizations, group insurance, employee transfers and promotions, and other personnel related transactions and functions.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of specific regulations and procedures relating to preparation and maintenance of personnel actions, records and reports.

Considerable knowledge of departmental organization and operations as related to personnel administration activities and requirements.

## Human Resources Department

### W & S Utility Supply Specialist 1 (005755)

#### Minimum Qualifications

High school diploma or GED. One year of experience in warehousing OR supply and inventory control is required. Must possess a Driver license. Must operate a forklift. Purchasing experience preferred.

#### Job Specifications

##### NATURE OF WORK

This is specialized utility supply work for the Miami-Dade Water and Sewer Authority-Department.

Employees in this class are responsible for the receipt, storage, and issuance of parts, materials, and supplies used by a water and sewer utility. Emphasis of the work is on receiving and inspecting general and technical materials, issuing supplies and materials to user areas, storing stock items received and assuring proper stock item markings, rotating stock, posting issues and receipts of goods to an automated inventory system, and operating standard warehouse equipment. Duties require knowledge of a wide variety of specialized materials and supplies required for utility system operation, repair, and maintenance. Supervision is received from a senior supply official who reviews work for adherence to departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Issues supplies and materials including electrical, plumbing, and carpentry commodities to various user areas including water and sewer maintenance, production, and installation operations.

Receives and inspects materials received from orders placed for restocking of depleted stock; confirms quantities and types of items received against original order documentation.

Assists with receiving and inspecting non-stock materials ordered for various user divisions, as required.

Places stock items accepted and received in their proper locations; provides necessary stock item markings and identifications when necessary.

Rotates stock according to established warehousing practices and procedures.

Operates computer terminal to post issue and receipt of goods to the automated inventory system.

Completes required stock receipt and issue documentation.

Operates warehousing equipment including fork lifts and pallet jacks.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the types, sizes, grades, specifications, and nomenclatures of specialized utility system supplies and materials.

Knowledge of general electrical, plumbing, and carpentry supplies and commodities.

Knowledge of the receipt, storage, and issue practices of a utility supply warehouse.

Knowledge of automated inventory management system operation.

Knowledge of inventory practices and procedures of a utility supply warehouse.

Knowledge of recordkeeping requirements applicable to the area of assignment.

Ability to accurately receive and issue a wide variety of specialized and general supplies and materials.

Ability to maintain accurate inventory records.

Ability to operate standard warehousing equipment.

Ability to understand and utilize an automated inventory management system.

Physical strength and agility sufficient to permit lifting and moving of stock.

##### NATURE OF WORK

This is specialized work in the purchasing, receipt, storage and issuance of automotive and heavy equipment parts for the Miami-Dade Water and Sewer Department.

An employee in this class is responsible for purchasing a variety of automotive and heavy equipment parts, maintaining inventory levels and issuing parts for departmental usage. Responsibilities include obtaining competitive bid quotations from vendors, preparing purchase orders, scheduling deliveries, assisting in the receipt and storage of commodities, and maintaining contacts with County purchasing officials and various vendors. Duties require considerable knowledge of auto parts and heavy equipment supplies and County procurement practices and procedures. Supervision is received from an administrative superior who reviews work for conformance with established purchasing and warehousing policies and for the timely and accurate filing of supply requisitions.

##### ILLUSTRATIVE TASKS

Reviews requests for the purchase of automotive and heavy equipment parts and supplies; refers to current supply catalogs and other references for sources of supply; contacts departmental officials to clarify amounts and/or nature of items requested.

Obtains competitive bid quotations from vendors; determines lowest and best bidders and prepares purchase orders; maintains files of vendors.

Schedules deliveries and follows up on delays; assists in the receipt, storage and issuance of commodities; checks deliveries against requisitions for accuracy and completeness.

Prepares damaged or incorrect deliveries for return; contacts vendors and delivery services; repackages defective or reclaimed goods for return to vendor.

Utilizes an automated inventory management system to complete procurement functions.

Requisitions items to maintain adequate inventory levels; places parts, tools, materials and other items on shelves or in bins; notifies supervisor of items in short supply.

Establishes contacts with County procurement officials and various vendors concerning orders, deliveries, prices, shortages and related matters.

Prepares and maintains inventory and procurement records; prepares and submits vendor performance reports; compiles information for statistical reports; maintains filing system.

Performs manual labor and operates materials handling equipment to move and issue stock.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of County procurement policies, practices and procedures.

Considerable knowledge of the sizes, types, grades, use and nomenclature of a wide variety of automotive and heavy equipment parts and supplies.

Considerable knowledge of an automated inventory management system for automotive and heavy equipment parts and supplies.

Considerable knowledge of automotive parts warehousing operations, policies and procedures.

Considerable knowledge of automotive parts inventory control practices and procedures.

Considerable knowledge of the sources and availability of automotive and heavy equipment parts and supplies.

Ability to determine the sizes, types, grades and quantities of a wide variety of automotive and heavy equipment parts required for departmental operations.

Ability to establish and maintain effective working relationships with County purchasing officials, departmental employees and supervisors, and representative of vendors.

Ability to analyze competitive bids and determine the lowest and best bidders.

### W & S Capital Inventory Specialist (005758)

#### Minimum Qualifications

High school or GED. Four years of advanced clerical experience to include inventory control and record keeping, conducting surveillance operations, or configuring and monitoring security access systems are required. Must possess a Driver's license.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative work in performing various administrative activities in the General Maintenance Division for the Miami Dade Water and Sewer.

An employee in this class performs various administrative duties including investigating the loss or damage to the Miami-Dade Water & Sewer Department's capital equipment, coordinating divisional employee training, identifying divisional capital equipment items and maintaining current records on transactions affecting such property. Additional responsibilities include conducting administrative studies as required. Supervision is received from an administrative superior who reviews work for attainment of desired management objectives and conformity with established administrative and departmental policies and procedures through conferences, personal inspections and reviews of reports.

##### ILLUSTRATIVE TASKS

Investigates the loss or damage to the department's capital equipment as mandated by Administrative Order 8-2 Use, Care, Control and Disposal of County Personal Property; investigates the circumstances surrounding the lost, stolen or damaged property; interviews all parties; prepares investigative reports; and provides recommendations to the Department Director to include policy/procedural changes and any actions that should be taken against involved parties.

Recommends to the Fixed Assets Manager the deletion from the active Capital Inventory Records assets which have been reported as "unlocated" on three successive annual physical inventories, and which have a depreciated dollar valuation of "zero", when generally accepted depreciation schedules for the classification of assets are applied.

Conducts assigned research, procedural or administrative studies and prepares narrative and statistical reports, proposing courses of actions; reviews workload reports from operating segments for conformance with department instructions; audits program records reflecting client or patron workloads for conformance with department instructions and accuracy of computations.

Coordinates the reporting of the divisional vehicle mileage usage reports; assists with the recruiting/hiring process; coordinates & serves as divisional liaison for employee training.

Maintains assigned General Maintenance Division property records on a current basis indicating transfers, deletions, condition, use and final disposition of capital items.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the principles of general management and their application to governmental administration.

Considerable knowledge of research techniques and the sources and availability of current information applicable to the area of assignment.

Knowledge of the principles and procedures of modern office administration.

Ability to perform administrative tasks such as investigating the loss or damage to the department's capital equipment as mandated by Administrative Order 8-2.

### W & S Purchasing Specialist (005760)

#### Minimum Qualifications

High school diploma or GED. Three years of large-scale purchasing and contract management experience involving a variety of commodities are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized work administering and managing the procurement process of commodities and services for the Procurement Section of the Miami-Dade Water & Sewer Department.

Employees in this classification are responsible for specialized utility specific contract development and compliance, as well as fiscal adherence. Responsibilities typically include managing and administering contracts and one-time requisitions/contracts and processing small purchase orders. Employees in this classification may exercise supervision over subordinate staff through the assignment of work. General supervision is received from an administrative superior who reviews work for conformity with established administrative and departmental policies and attainment of desired objectives through conferences and review of reports of operations.

##### ILLUSTRATIVE TASKS

Develop methods and strategies to ensure goods and services are available to facilitate operation of the department.

Coordinate with various end users to establish needs, including modifications to specifications and annual dollar requirements.

Researches sole source vendors, obtains required documentation and prepares justifications for the General Services Administration (GSA), Department of Procurement Management (DPM) or Board of County Commissioners (BCC) action; meet with GSA and DPM staff to complete specialized purchasing requirements for the department.

Reviews various other contracts which may be required by end users to meet department needs including reviewing state contracts or other county contracts.

Coordinates the overall usage of small purchase orders to ensure that the commodity assignments do not exceed the designated amount for the fiscal year.

Respond to departmental inquiries as to proper methods for purchases and interpretation of contracts; provides memoranda to staff as to contract usage; works with end users to analyze their needs, specifications and dollar requirements.

Request allocations and issue releases for purchase orders through ADPICS; print and mail purchase order releases to the awarded vendor.

Maintain on going communication with GSA and DPM to secure contracts.

Develop training programs and facilitate the required training for storeroom staff and other departmental liaison representatives related to purchasing procedures used to facilitate proper contract management.

Perform other related functions such as emergency purchases during critical times such as hurricanes or other types of emergencies.

Perform related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of large-scale procurement methods, practices and procedures.

Considerable knowledge of federal, state and local laws, rules, regulations and ordinances effective in governing the purchase of commodities and services.

## Human Resources Department

##### NATURE OF WORK

This is technical work in the performance of a variety of standardized tests and laboratory procedures for the Miami-Dade Water and Sewer Department.

Employees in this class are responsible for conducting qualitative and quantitative laboratory examinations of potable water and related pollutants. Duties include preparing various media, solutions and reagents and conducting tests to identify water pathogens and indicator bacteria. Related work includes collecting bacteriological samples, conducting daily routine water and chemical analyses, and preparing solutions and reagents for testing. Routine work is performed independently following established procedures for the examination of water and wastewater. Supervision is received from a professional superior who reviews work for accuracy of results and conformance with established laboratory procedures and techniques.

##### ILLUSTRATIVE TASKS

- Collects bacteriological samples in compliance with regulatory requirements or in response to customer complaints.
- Performs bacteriological tests on raw, treated and distribution samples.
- Performs daily routine chemical analyses on raw and treated water samples.
- Prepares chemical reagents for bacteriological and chemical tests under the supervision of a professional chemist.
- Assists in instrumental analyses involving sample preparation and actual running of samples.
- Assists in the preparation of State Board of Health report and reports to other governmental agencies; prepares vehicle mileage and condition reports.
- Receives and responds to customer complaints, as necessary.
- Provides assistance to chemists in the conduct of various research projects.
- Cleans glassware and assists in the maintenance of laboratory equipment.
- Inform chemists when reagents or equipment require reordering or repairs.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the basic principles of chemistry and microbiology as related to standardized tests and procedures performed in a water quality laboratory.

Considerable knowledge of laboratory methods and procedures used in determining drinking water quality.

- Knowledge of modern equipment and scientific instruments used in a water quality laboratory.
- Knowledge of sterile techniques used in the collection of bacteriological samples.
- Knowledge of records, forms and reports used in the area of assignment.
- Knowledge of quality control tests and checks used in laboratory procedures.
- Ability to perform laboratory tests and procedures in accordance with established practices.
- Ability to prepare various media, solutions and reagents and conduct tests for water pathogens and indicator bacteria.
- Ability to make accurate observations and reports of results.
- Ability to provide effective assistance in the conduct of laboratory research projects.
- Ability to respond to customer complaints and inquiries.
- Skill in laboratory manipulative techniques.

##### NATURE OF WORK

This is advanced technical work with administrative duties in the performance of a variety of standardized tests and laboratory procedures for the Miami-Dade Water and Sewer Department.

Employees in this class are responsible for conducting laboratory analysis of water and wastewater samples for the quantification, isolation and identification of microbial colonies. Duties include preparing various media, solutions and reagents and conducting tests to identify environmental pathogens and indicator bacteria. Related work includes collecting bacteriological samples, conducting daily routine environmental and chemical analyses, and preparing solutions and reagents for testing. Work differs from that found in the W & S Laboratory Technician 1 classification in that incumbents are responsible for performing quality control of media and reagents, maintaining a stock of pathogenic and non-pathogenic bacterial cultures, validating testing using positive and negative controls and calibrating various analytical instruments. Routine work is performed independently following established procedures for the examination of water and wastewater. Supervision is received from a professional superior who reviews work for accuracy of results and conformance with established laboratory procedures and techniques.

##### ILLUSTRATIVE TASKS

Conducts field and laboratory analyses of water and wastewater samples from wells, distribution systems and treatment plants for the quantification, isolation and identification of microbial colonies; performs tests for Total and Fecal Coliform using the Most Probable Number (MPN), Enzyme Substrate coliform test (presence and absence) and Membrane Filtration (MF) procedure; analyzes samples for turbidity, pH, solids, CBOD, and other chemical parameters.

Performs quality control of media and reagents; maintains a stock of bacteria cultures used as standards for specificity and sensitivity of media; handles harmful bacteria and contaminated bacteriological samples.

Verifies and confirms positive coliform; prepares, analyzes and records the number and type of colonies on total and fecal coliform plates.

Maintains bacteriological, quality control and inventory records; performs "Use Test" on reagent grade water; conducts quality control on laboratory autoclave and incubators.

Utilizes the Laboratory Information Management System (LIMS) to log in samples; enters test results and generates reports and summaries.

Performs other microbial tests such as the Heterotrophic Plate Count, Fecal Streptococcus, and Enterococcus used to comply with permit requirements as mandated by various regulatory agencies such as the Environmental Protection Agency (EPA), Florida Department of Health (FDOH), Florida Department of Environmental Protection (FDEP) and the Department of Environmental Regulatory Management (DERM).

Orders supplies and equipments; assists in the maintenance of laboratory equipment.

Performs other related duties as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the basic principles of chemistry and microbiology as related to standardized tests and procedures performed in an environmental laboratory.

Considerable knowledge of the National Laboratory Accreditation Conference (NELAC) quality control standards.

## Human Resources Department

---

### W & S Laboratory Technician 2 (005765)

Considerable knowledge of laboratory methods and procedures used in determining drinking water, wastewater, and residuals quality.

Considerable knowledge of the techniques used in performing quality control of media and reagents.

Considerable knowledge of the techniques used to handle harmful bacteria and contaminated bacteriological samples.

Considerable knowledge of the Laboratory Information Management System (LIMS).

Considerable knowledge of the techniques used to validate test data.

Considerable knowledge of techniques used to calibrate analytical instruments.

Knowledge of modern equipment and scientific instruments used in an environmental laboratory.

Knowledge of sterile techniques used in the collection and handling of bacteriological samples.

Knowledge of records, forms and reports used in the area of assignment.

Knowledge of quality control tests and checks used in laboratory procedures.

Ability to perform laboratory tests and procedures in accordance with established practices.

Ability to prepare various media, solutions and reagents and conduct tests for environmental pathogens and indicator bacteria.

Ability to perform quality control of media and reagents, maintain stocks of bacterial cultures and properly handle harmful bacteria and contaminated bacteriological samples.

Ability to maintain bacteriological, quality control and inventory records.

Ability to effectively utilize LIMS to log in samples, enter test results and generate reports and summaries.

Ability to validate test data entered into LIMS.

Ability to make accurate observations and reports of results.

Ability to provide effective assistance in the conduct of laboratory research projects.

Ability to respond to customer complaints and inquiries.

Skill in laboratory manipulative techniques.

This is advanced technical work with administrative duties in the performance of a variety of standardized tests and laboratory procedures for the Miami-Dade Water and Sewer Department.

### W & S Meter Reader (005770)

#### Minimum Qualifications

High school diploma or GED. Duties require physical ability to stoop, kneel, and crouch; walk for extended periods of time in all types of weather; and lift and/or move up to 52 pounds. Must possess a valid Driver license. The driving records of the qualifying applicants will be subject to review by the Miami-Dade Water and Sewer Department.

#### Job Specifications

##### NATURE OF WORK

This is routine work in reading and recording readings of water meters.

Employees in this class are responsible for the accurate recordings of water meter readings, maintaining good working relationships with customers, and maintaining their equipment and vehicle in good operating order. Employees may be required to clean out meter boxes, and replace, or report upon, broken lids and covers. Instructions are usually received orally and tasks are performed without close field supervision. All work is subject to inspection while in progress and upon completion.

##### ILLUSTRATIVE TASKS

Reads water meters, and enters readings on an electronic hand-held meter reading device.

Performs general clerical duties, and may be required to notify customers of certain situations related to meter reading.

Records proper entry on the electronic meter reading device to initiate corrective action for leaks and repairs which should be performed by maintenance personnel.

Cleans meter boxes and replaces or reports broken lids and covers.

Reports new services and tampering violations.

Obtains readings on floating meters.

Immediately reports dangerous meter box conditions to the appropriate unit.

Maintains accurate records of vehicle mileage; maintains vehicle in clean condition and obtains proper servicing and repair for vehicle to assure that it is in safe operating condition.

May be required to turn on water service, check addresses, check meter numbers, and do routine, basic field checking with minimal customer contact.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of meters and gauges used in recording water consumption.

Ability to learn the operation of meters and gauges used in recording water consumption.

Ability to learn the operation of an electronic hand-held meter reading device.

Ability to establish and maintain effective working relationships with the public.

Ability to perform field assignments with a minimum of supervision.

Ability to keep simple records and submit accurate reports of field inspections.

Skill in the use of test equipment and measuring devices.

Physical strength and agility sufficient to lift and handle items weighing up to 52 pounds.

##### NATURE OF WORK

This is specialized clerical work in the Water and Sewer Authority-Department Mail Center.

Employees in this class perform a variety of duties in the collection, sorting, processing and distribution of interoffice and U.S. Mail. Duties include picking-up cash payments from WASAD pay stations, collecting and distributing interoffice and U.S. Mail, processing a large volume of utility bills using postal equipment, completing various forms required by the U.S. Postal Service, and advising departmental employees on routine mail handling procedures. Duties occasionally involve physical exertion and exposure to adverse weather conditions. Supervision is received from a technical superior who reviews work for conformance to departmental rules and procedures, and U.S. postal regulations.

##### ILLUSTRATIVE TASKS

Operates automotive equipment to collect and distribute interoffice mail; collects and distributes mail to other County departments, or other agencies; picks-up cash payments from WASAD pay stations.

Collects incoming payments, letters, packages and periodicals from U.S. Post Office facilities; sorts and opens mail.

Processes utility bills for mailing; sorts bills according to bulk rate mailing requirements; folds bills on folding machine and adjusts as necessary; sets postage meters for correct date and postage rates; inserts bills into envelopes and meter stamps each using inserting machine.

Prepares bulk rate mailing forms for the U.S. Postal Service.

Maintains daily mail logs, auto use receipts and daily delivery records.

Posts daily meter readings for meter log book as required by the U.S. Postal Service; takes postage meters to U.S.P.S. for postage registration.

Advises other department employees on routine mail procedures and U.S. Postal Service requirements; provides certified or registered mail forms.

Receives, unloads and stores supply deliveries.

Makes special deliveries or pick-ups as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of U.S. Postal Service rules, regulations, rate and documentation required for processing U.S. Mail.

Knowledge of departmental operations pertaining to collection, sorting, processing and distributing U.S. and interoffice mail.

Knowledge of the operation of standard and computerized mail processing equipment.

Knowledge of the geography of the metropolitan Dade County area.

Knowledge of office practices and procedures.

Ability to read and understand instructional manuals, regulations and other official U.S. Postal Service materials.

Ability to operate automotive equipment in a safe manner.

Ability to lift heavy items, use hand trucks and similar equipment to transport heavy loads.

Ability to operate equipment with speed and accuracy while standing.

Ability to follow verbal and written instructions.

Physical strength and agility sufficient to perform assigned duties.

##### NATURE OF WORK

This is specialized supervisory clerical work in the Water and Sewer Authority-Department Mail Center.

An employee in this class is responsible for supervising and participating in the operation of a WASAD Mail Center. Responsibilities include supervising Mail Center employees, maintaining inventories of required supplies, determining the need for major adjustments to Mail Center equipment, and performing duties in the collection, sorting, processing and distribution of U.S. and interoffice mail. Duties occasionally involve physical exertion and exposure to adverse weather conditions. Supervision is received from an administrative superior who assists with difficult problems and reviews work for adherence to departmental and U.S. Postal Service regulations and procedures.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate Mail Center employees engaged in collection, sorting, processing and distributing interoffice and U.S. Mail; assists with difficult problems and provides training in procedures and equipment operation.

Prepares Weekly Mail Report and various other reports.

Represents Mail Center at Postal Customer Council meetings.

Maintains inventory of supplies, materials and equipment used in the Mail Center operations.

Determines when equipment requires major adjustments and performs minor adjustments and repairs.

Operates automotive equipment to collect U.S. Mail, interoffice mail, payments from WASAD pay stations; operates a variety of mail center equipment to process utility bills and other U.S. Mail.

Posts daily meter readings for meter log book and takes postage meters to U.S.P.S. for postage registration.

Advises other departmental employees on routine mail procedures and U.S. Postal Service requirements; provides certified or registered mail forms.

Makes recommendations regarding hiring, discipline and promotions of subordinates; authorizes leave and overtime; evaluates and rates employees performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of U.S. Postal Service rules, regulations, rates and documentation required for processing U.S. Mail.

Knowledge of supervisory principles and practices.

Knowledge of departmental procedures and operations pertaining to collection, processing and distributing U.S. and interoffice mail.

Knowledge of the operating and maintenance characteristics of mail processing equipment.

Knowledge of the geography of the Metropolitan Dade County area.

Knowledge of office practices and procedures.

Ability to read and understand instructional manuals, regulations and other official U.S. Postal Service Materials.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to operate automotive equipment in a safe manner.

Ability to lift heavy items, use hand trucks and similar equipment to transport heavy loads.

Ability to maintain effective working relationships with subordinates, superiors and departmental employees.

Ability to operate equipment with speed and accuracy while standing.

Physical strength and agility sufficient to perform assigned duties.

**W & S Mail Center Clerk 2 (005773)**

### W & S Data Entry Specialist 1 (005775)

#### Minimum Qualifications

High school diploma or GED. One year of typing or data entry experience is required.

#### Job Specifications

##### NATURE OF WORK

This is data entry and clerical work which involves moderately complex work methods and problems and requires data entry skills. Although the emphasis of the work is on data entry, employees are also responsible for the performance of a wide variety of tasks which require the application of independent judgment and clerical knowledge. The variety of work differs among positions, but where work is more repetitive there is an additional responsibility for finality of action. Work may include the operation of other standard office machines for which no previous training is required. Supervision is occasionally exercised over a small group of employees assisting in routine details. Until the more difficult phases of a job are learned an employee works under relatively close supervision, but thereafter detailed instructions are received only when changes in procedures are made. Work is reviewed by a supervisor through observation of operations, periodic audits of work performed, and by advice and assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Performs data entry including researching, verifying, and correcting information to be entered into a database; creates simple forms and formats or statistical charts; runs and prints reports, and performs disk backups.

Operates standard office equipment such as personal computer, copy or facsimile machine, and calculator; screens telephone calls and refers caller to appropriate party or takes telephone message; opens, sorts, and distributes mail; sorts and files correspondence, reports, or other materials.

Processes documents requiring various procedural knowledge specific to area of assignment; reviews documents for sufficiency, obtains necessary signatures and routes appropriately, maintaining follow-up; provides information to other divisions and the public, applying significant knowledge of departmental rules, regulations and procedures to interpretations made; may supervise a small group of employees engaged in routine clerical duties.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of simple data processing and transmission principles utilized in computerized information systems.

Knowledge of routine office practices and procedures.

Ability to read and decipher data on source documents to be entered.

Ability to enter and verify information with accuracy and a reasonable rate of speed.

Ability to understand and follow oral and written instructions.

Ability to work with considerable independence.

Skill in data entry or typing.

##### NATURE OF WORK

This is data entry and clerical work which involves complex work methods and problems and requires advanced data entry skills.

Employees in this class are responsible for performing work where the emphasis is on data entry. Employees are also responsible for the performance of a wide variety of tasks, which requires the application of independent judgment and clerical knowledge. Work is reviewed by a supervisor through observation of operations, periodic audits, and evaluation of work performed.

##### ILLUSTRATIVE TASKS

Performs data entry including researching, verifying, and correcting information to be entered into a database.

May develop simple databases using various computer software packages; ensures data is valid and properly stored; generates reports, tables, graphs or maps from database information; and conducts database queries.

Regularly creates complex financial spreadsheets, forms, or formats using various computer software packages; prepares diagrams or drawings using computer graphic software.

Screens telephone calls and refers callers to appropriate party or takes telephone message; opens, sorts, and distributes mail; sorts and files correspondence, reports, vouchers or other materials.

Processes documents requiring various procedural knowledge specific to area of assignment; reviews documents for sufficiency, obtains necessary signatures and routes appropriately, maintaining follow-up.

Provides information to other divisions and the public, applying significant knowledge of departmental rules, regulations and procedures.

May supervise a small group of employees engaged in routine clerical duties.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of simple data processing and transmission principles utilized in computerized information system.

Knowledge of routine office practices and procedures as it pertains to MDCU.

Ability to read and decipher data on source documents to be entered.

Ability to enter and verify information with accuracy and a reasonable rate of speed.

Ability to understand and follow oral and written instructions.

Ability to work with considerable independence.

Skill in data entry or typing.

#### Nature Of Work

This is advanced data entry and clerical work in recording and verifying data for the Water and Sewer Department.

### W & S Geo-Data Collection & Mapping Technician (005777)

#### Minimum Qualifications

High school diploma or GED. One year of experience using computer-assisted mapping and utility pipeline location equipment is required. Completion of computer-assisted mapping or computer-assisted design coursework may substitute for the required experience on a month-for-month basis.

#### Job Specifications

##### NATURE OF WORK

This is moderately skilled technical and field work locating and inventorying water and sewer assets for the Water Distribution Division of the Miami-Dade Water & Sewer Department.

Employees in this class locate underground water infrastructure and inventory and reference water and sewer assets using GPS devices and laptop computers to input recovered data. Supervision is received from a technical superior who evaluates the accuracy, quality and quantity of work through observation and review of work.

##### ILLUSTRATIVE TASKS

Determine location and path of underground water infrastructure with the help of available tools such as metal detectors and line tracers.

Inventory and reference water and sewer assets as found in the field which are not currently reflected in archived documents and department records; use GPS devices and laptop computers to input recovered data.

Assist in revising and analyzing atlas pages, as-builts, field notes and other documentation that will help field research.

Study, examine and compare archive information with physical terrain, property lines, right-of-ways and geographic arrangements to verify water and sewer framework; make corrections when needed.

Sketch roadways, landmarks and ground layouts with superimposed water and sewer infrastructure to update and correct inaccurate data.

Register, photograph and generate work tickets for any broken, damaged, or faulty structure for repair.

Assist other departmental sections with shutdown tests, missing assets and various other concerns.

Prepare, organize and generate daily field reports to include sketches, pictures and field notes.

Perform related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Knowledge of computers and GPS devices.

Knowledge of simple surveying techniques.

Ability to use underground locating tools such as line tracers and metal detectors.

Ability to work independently in the field.

Ability to keep records and prepare reports using Power Point and Excel.

Ability to read and understand blueprints.

### W & S Mini-Computer Data Technician (005783)

#### Minimum Qualifications

High school diploma or GED. Two years of experience with mini-computer systems, data entry and data rejection analysis are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical and technical work in a large and complex multi-computer data processing activity.

Employees in this class are responsible for assembling, processing, correcting and reprocessing data entered into mini-computer equipment which may be processed on-site or transmitted to an off-site mainframe computer installation. Duties include inspecting and prioritizing input documents, assembling data for transmission to an off-site computer, balancing output reports to pre-established totals, initiating action to reprocess out-of-balance or incorrect reports, operating data processing peripheral equipment and submitting workloads on pre-determined work schedules. Related responsibilities include referring to job control language printouts, determining causes of data rejection or error, submitting appropriate correcting entries, and manually maintaining a limited tape library. Supervision is received from a technical superior who periodically reviews work in progress and upon completion and assists with difficult or unusual problems.

##### ILLUSTRATIVE TASKS

Inspects input documents for routine errors and prioritizes materials prior to CRT entry.

Assembles data for transmission to an off-site computer installation; operates cathode-ray tube equipment to correct data errors.

Operates data processing peripheral equipment to submit and receive data including tape and/or disk mounts.

Submits workload for processing via pre-determined work schedules.

Balances output reports to pre-established totals.

Refers to job control language printouts for appropriate condition codes.

Determines causes of data rejection or error and submits appropriate correction entries.

Initiates action required to reprocess out-of-balance or incorrect reports.

Maintains detailed controls on acceptable output.

Manually maintains a limited tape library.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operating characteristics of mini-computer and peripheral equipment used in a complex mini-computer data processing activity.

Knowledge of the scheduling and priority of jobs for mini-computer processing.

Knowledge of specialized computer languages utilized in a mini-computer data processing installation.

Knowledge of established departmental rules and regulations concerning mini-computer operations.

Knowledge of the causes of data rejection or error and the action required for correction.

Ability to operate mini-computer and related peripheral equipment.

Ability to detect the causes of data rejection or error and submit appropriate corrections.

Ability to read and understand specialized job control language utilized in a mini-computer operation.

Ability to initiate action required to reprocess out-of-balance or incorrect reports.

Ability to maintain a limited tape library.

Ability to balance output reports to pre-established totals.

Ability to maintain effective working relationships with fellow employees, superiors and other departmental officials.

### W & S Mini-Computer Data Technician (005783)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field. Additional related experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is entry level technical computer programming, systems analysis, or operating systems programming work for the Water and Sewer Department.

Employees in this new classification will be responsible for performing a myriad of functions in various platform environments, to include writing code, testing, debugging, writing documentation or performing work for new or existing information systems, assisting with the analysis of recommendations submitted by departmental business units concerning proposed automated systems, assisting with the maintenance and modification of existing applications, and with writing system proposals, assisting with diagnosing and resolving software and hardware problems, and defining users and security levels. Incumbents will be working under the close supervision of an information technology professional.

##### ILLUSTRATIVE TASKS

Designs program logic and code using approved programming languages; creates program code for reporting requirements; participates in the analysis and development of new computer systems; assists in preparing database logical designs; assists in preparing program and system test data to validate programs and systems.

Assists with resolving various hardware and software problems; troubleshoots hardware malfunctions and provides appropriate solutions; designs and creates statistical or graphical applications according to departmental needs; prepares programming status reports; maintains hardware inventory.

Participates in the preliminary analysis of small scale projects; assists in determining the need for information, type of information required, probable cost and preparation of preliminary systems proposals; assists in identifying and correcting errors in program documentation; assists with the installation of new hardware and software and customizing configuring components to the needs of the user and department; conducts problem resolution with users.

Assists in troubleshooting the upgrade and maintenance of local area networks, including hardware/software problems; assists in setting-up users, directories and security systems configuration documentation; maintains system data security tables; assists in analyzing hardware systems to ensure peak performance.

Performs related work as required.

##### MINIMUM QUALIFICATIONS

Completion of 60 semester credits to include 15 semester credits in a computer, cartography, or geography related field is required. Additional related experience may substitute for the required education on a year-for-year basis.

NEW 12/04

### W & S Systems Analyst/Programmer 1 (005785)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field or completion of an information technology certification program (Novel, UNIX, Microsoft, or ORACLE). One year of programming and systems analysis experience is required. Additional programming and systems analysis experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is technical work in systems analysis in a centralized data processing operation.

Employees in this class are responsible for assisting in the analysis, design and implementation of less complex or smaller scale projects utilizing computer systems. Responsibilities include participation in the completion of new or revised projects of a less difficult nature under the guidance of a superior, and participation in less complex phases of projects including preliminary analysis of feasibility, systems proposals, system design, program documentation, systems implementation and follow up. Employees utilize knowledge of computer capabilities, subject matter of programs in user agencies, and current techniques and methods of systems design in the performance of assigned duties. Supervision is received from a technical superior who serves as a project team leader and provides guidance during work in progress and reviews completed work for quality of results and achievement of objectives.

##### ILLUSTRATIVE TASKS

Participates with other staff members and a technical supervisor in the preliminary analysis of large scale projects; performs tasks including determining the need for information, type of information required, probable cost, and preparation of preliminary systems proposals.

Completes assigned phases in the design of system specifications and completion of program documentation; studies and analyzes existing procedures and prepares system flow charts to describe present and proposed operations.

Participates in documentation for new systems and in the test plan; assists in identifying and correcting errors in program documentation.

Tests, checks and analyzes program instruction for improvements as needed.

Completes less difficult projects not requiring extensive systems analysis and team participation; completes all phases of design and documentation and explains program to users.

Revises program instructions or alters flow charts into coded machine instructions to improve existing programs as assigned.

Performs related work as required.

##### KNOWLEDGE AND SKILLS

Considerable knowledge of the principles and practices of systems analysis and design.

Considerable knowledge of computer programming.

Knowledge of capabilities of computer hardware and software.

Knowledge of the cost of hardware and software systems.

Knowledge of specific computer systems within the area of assignment.

Ability to evaluate user informational requirements.

Ability to determine the feasibility of the application of computer systems to the problem of user informational requirements.

#### Nature Of Work

This is technical work in systems analysis in a centralized data processing operation.

### W & S Systems Analyst/Programmer 2 (005786)

#### Minimum Qualifications

Completion of 60 semester credits to include 15 semester credits in a computer related field or completion of an information technology certification program (Novel, UNIX, Microsoft, or ORACLE). Two years of programming and systems analysis experience are required. Additional programming and systems analysis experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced and supervisory work in systems analysis in a centralized data processing operation.

Employees in this class are responsible for the analysis, design and implementation of large scale projects utilizing computer systems. Responsibilities include conducting feasibility studies, developing systems proposals, designing and developing systems projects and coordinating systems development with management officials in user departments. Additional duties include coordinating the work of a team of systems analysis and participating programmers assigned to the development of systems projects, conducting or supervising user training as required, and supervising the design of any necessary system revisions. Employees utilize advance knowledge of computer capabilities and subject matter of programs in user agencies in the design of complete systems of a complex nature. General supervision is received from a technical superior who evaluates completed systems work for quality of results and achievement of objectives.

##### ILLUSTRATIVE TASKS

Meets with agency management and supervisory personnel to discuss various operating problems and goals susceptible to computer systems solutions; discusses and evaluates management needs, objectives and goals.

Supervises team preparation of feasibility studies including information required, probable costs, details of systems proposals and related factors.

Meets with management personnel and potential users to present and explain systems proposals.

Assigns phases of systems design work to systems analysts and participating programmers; arrives at design objectives and decisions and develops systems specifications; supervises documentation stages and coordinates work with programming staff; analyzes systems logic difficulties; assures final results of test plan.

Plans all phases of implementation of new systems; formulates user training and supervisory and clerical staff; supervises the conduct of user training and participates as necessary; compiles, composes and assembles total documentation.

Supervises the transfer of documentation into production stages in initial use of the system; meets with management and other personnel in follow-up usage and supervises the design of any necessary revisions.

Supervises or participates in the revision of user agency organizational or procedural studies of a manual systems nature, as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of system analysis and design.

Thorough knowledge of computer programming.

Considerable knowledge of the capabilities of computer hardware and software.

Considerable knowledge of specific computer systems within the areas of assignments.

Some knowledge of supervisory principles and practices.

Ability to evaluate complex user informational requirements.

Ability to determine the feasibility of the application of computer systems to the problem of user informational requirements.

Ability to design complex systems requiring extensive analysis.

Ability to analyze complex systems problems and develop effective solutions.

Ability to develop systems to meet management needs on a timely basis.

Ability to express ideas clearly and concisely, verbally and in writing.

#### Nature Of Work

This is advanced and supervisory work in systems analysis in a centralized data processing operation.

### W & S GIS Verification Section Supervisor (005796)

#### Minimum Qualifications

Bachelor's degree. Three years of experience in geographic information systems management to include supervisory experience. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is professional and supervisory work managing the GIS Field Verification Section for the Miami-Dade Water & Sewer Department. An employee in this class is responsible for managing the activities of the GIS Field Verification Section and the design, implementation and maintenance of a GIS data management system used to respond to large water main emergencies. Responsibilities include the planning, design and coordination of emergency projects utilizing the Hydrologic Data Model and Geodatabase; the design, implementation and maintenance of an efficient data management system and the creation and maintenance of special data conversion and GPS applications. The incumbent exercises independent judgment converting as-builts and pipe laying schedules into a GeoDatabase used for pipe assessments and the prioritization of pipe replacements to avoid catastrophic pipe failures. Supervision is exercised over a staff of professional, technical and survey crews engaged in various phases of the unit's work through subordinate supervisors. Supervision is received from an administrative superior who reviews work for operational effectiveness and adherence to departmental standards and policies.

##### ILLUSTRATIVE TASKS

Supervises and oversees the activities of the GIS Field Verification Section through subordinate supervisors.

Plans, designs and coordinates emergency project development in critical situations such as Water Transmission Concrete Pipe failure.

Acts as the System Administrator for the Enterprise Asset Management System (EAMS) and Data-Spy; creates all reports used by the division.

Designs, implements and maintains an efficient data management system to accurately respond to emergencies dealing with large water main problems and/or water main breaks.

Creates a data conversion and image vectorization process to enhance the search of asset locations requested by management and used for response to crucial scenarios.

Creates advanced applications using ArcGIS (Geographical Information System) and AutoCAD software; develops and implements applications using various programming languages such as Python, Visual Basic.Net, HTML and Java.

Creates and maintains the Geodatabase and advanced queries to perform analysis of the Water Distribution System through GIS using SQL (Structure Query Language).

Creates and maintains GPS applications using technology such as ArcPAD and Trimble GPS Analyst Extension.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the Geographic Information System (GIS) utilized within the Miami-Dade Water & Sewer Department.

Considerable knowledge of EAMS and Data-Spy applications.

Considerable knowledge of data conversion and image vectorization process.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the principles, practices, techniques and instruments of engineering drafting.

Knowledge of the basic principles of civil engineering as they relate to topographic surveying and engineering drafting.

Knowledge of all above-ground and below-ground water and sewer field facilities.

Knowledge of research techniques and the sources and availability of pertinent information concerning water and sewer systems.

Ability to manage multiple projects simultaneously

Ability to reprioritize tasks to meet deadlines

Ability to interpret as-built information and transfer as-built data to a GIS.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, superiors, and a variety of other public and private individuals.

Ability to incorporate field survey findings into the Geographical Information System database.

Skill in the use of ArcGIS and AutoCAD software.

Skill in the use of technologies to create and maintain GPS applications

Skill in the use of SQL (Structure Query Language) and various programming languages to develop and implement applications.

##### NATURE OF WORK

This is heavy manual work involving limited skills in various maintenance and construction tasks for the Miami-Dade Water and Sewer Department.

Employees in this class perform laboring tasks requiring some acquired skills in the use of hand tools, power tools and equipment, or occasional operation of light automotive equipment. Duties may involve the maintenance of water treatment buildings and equipment, assisting in the repair of various types of sewer pipes, and assisting journeymen in a variety of trade and craft areas. Employees are responsible for the upkeep and efficient operation of the tools or equipment used. Instructions are usually received verbally and routine tasks are performed with considerable independence, while more difficult work is performed under the supervision of a skilled trades employee or crew leader. All work is subject to inspection in progress and upon completion.

##### ILLUSTRATIVE TASKS

Chips and scrapes water treatment units and contact basin weirs to remove calcium buildup and maintain proper flow; assists in maintenance and cleanup of operational equipment and areas.

Assists in the installation and repair of various sizes of clay, PVC, galvanized and cast iron pipes above and below ground; sets up cones and directs traffic as necessary; performs hand-digging in difficult areas inaccessible to heavy equipment.

Operates pressure cleaning equipment to clean water treatment units, buildings and other structures.

Assists in the installation and repair of various water meters; operates jackhammer or gas saw to cut sidewalks.

Operates pick-up truck or other vehicle to transport tools, equipment and supplies; loads and unloads equipment and supplies on and off of trucks or other utility vehicles.

Operates power mowers, small tractors, saws, edgers, clippers and other equipment used in landscaping and roadside maintenance.

Operates, cleans and maintains large power-spraying equipment used to control insects, plant pests, and weeds.

Assists in surface preparation and spray painting of signs; cleans, sands, straightens and repairs signs.

Maintains tools and equipment used; cleans and makes minor repairs; performs routine preventive maintenance.

Assists in maintaining work areas; removes trash, debris and waste materials from treatment plant areas.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of basic methods, materials and techniques used in maintenance and construction work.

Knowledge of power tools and equipment used in water and sewer maintenance activities.

Knowledge of occupational hazards and safety precautions applicable to the area of assignment.

Ability to operate pick-up or other trucks, small tractors and similar automotive equipment.

Ability to understand and follow verbal and written instructions.

Ability to assist in the installation, repair and maintenance of a variety of water and sewer facilities and equipment.

Ability to work out-of-doors occasionally under adverse weather conditions.

Skill in the operation of power tools and equipment.

Physical strength and agility sufficient to perform heavy manual labor.

NEW 10-96

#### Nature Of Work

This is heavy manual work involving limited skills in various maintenance and construction tasks for the Miami-Dade Water and Sewer Department.

## Human Resources Department

---

**W & S Semi-Skilled Laborer (005802)**

### W & S Maintenance Repairer (005803)

#### Minimum Qualifications

Eighth grade. One year of experience performing semi-skilled maintenance and repair tasks or assisting with maintenance and repairs in any of a variety of the skilled trades is required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in the performance of a variety of maintenance and repair tasks in one or more trades areas for the Miami-Dade Water and Sewer Department.

Employees in this class perform a variety of general maintenance work which approaches the journeyman level but does not require as high a degree of skill. Employees are frequently called upon to perform rough maintenance and repair work covering several utility, mechanical or building trades areas. Assignments are usually received verbally, may be accompanied by sketches or diagrams, and are generally specific as to the nature of the work. Employees may devise their own methods of accomplishing assigned tasks and may work with some independence. All work is subject to inspection in process and upon completion by a skilled trades employee or technical supervisor.

##### ILLUSTRATIVE TASKS

- Assists in the installation and repair of various sizes of clay, PVC, galvanized and cast iron pipes above and below ground; assists in the repair and installation of various sizes of water mains and services.

- Operates jetter, vactor and sidelifift equipment.

- Checks and maintains fluid levels on mobile equipment, crew trucks, sidelififts and air compressors on a daily basis; checks and maintains truck stock such as fittings, clamps and chemicals.

- Assists in drilling manhole walls, inserting probes and inserting grout for repairs.

- Assists in the repair and maintenance of hydraulic, electronic and hydronic systems on jetters and vactors.

- Repairs and maintains small tools including tamper/wackers, jackhammers, light-towers, root cutters, gas and air saws, and pneumatic hand tools.

- Performs smoke tests by placing blowers over manholes and dropping smoke bombs into manholes; keeps simple test records and submits reports.

- Assists in the repair and overhaul of pumps, shafts and other mechanical items; cleans and maintains pump station equipment and keeps simple records.

- Replaces defective light bulbs and fluorescent lights; replaces burned out fuses; cuts, threads and bends conduit pipe to sizes and lengths required by electricians.

- Makes general minor repairs to wood fixtures; assists in the installation of doors, door jams, and other hardware fixtures.

- Mixes plaster, mortar and cement; assists journeymen engaged in building or repairing brick, stone or tile walls and structures.

- Prepares walls for painting and does rough painting; erects scaffolding.

- Assists in repair and overhaul of air conditioning and refrigeration equipment.

- Assists plumbers by unstopping sinks, toilets, sewer lines and similar facilities.

- Makes minor repairs to riding lawnmowers, pushmowers, weed eaters and edgers; changes oil, adjusts and cleans equipment.

- Loads and unloads materials; cleans tools and work area upon completion of projects.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Knowledge of the standard tools, materials, methods and practices of a variety of trades areas.

- Knowledge of the occupational hazards and safety precautions applicable to the area of assignment.

- Ability to understand and follow verbal and written instructions.

- Ability to understand and work from rough sketches and diagrams.

- Ability to make rough estimates of time and material requirements for maintenance and repair assignments.

- Skill in the care and use of tools, materials and equipment of various trades areas.

- Skill in the operation of power tools and equipment.

- Physical strength and agility sufficient to perform assigned duties.

### W & S Maintenance Mechanic (005804)

#### Minimum Qualifications

Eighth grade. One year of experience installing, maintaining and overhauling pumps, engines, or heavy equipment is required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the maintenance and repair of buildings, machinery and mechanical equipment for the Miami-Dade Water and Sewer Department.

Employees in this class perform specialized mechanical work in a manual trade or skilled work in more than one craft. Work involves the maintenance and repair of mechanical equipment, machinery and electrical apparatus used at a wide variety of water and sewer buildings and facilities including pumping equipment and accessories, piping, water tanks, pneumatic and hydraulic tools, and gasoline and diesel-powered equipment. Employees work independently using handtools, power tools and various precision-measuring and testing instruments. Assignments may be in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning equipment. Work is reviewed by a technical supervisor who inspects work occasionally in progress and upon completion for compliance with instructions and satisfactory operation of equipment repaired and maintained.

##### ILLUSTRATIVE TASKS

Overhauls, repairs and maintains pumping equipment; inspects and determines extent of required repairs, removes equipment, disassembles pumps, replaces and installs bearings and packing sleeves, removes and installs impellers and wear rings, installs rebuilt pumps, aligns shafts of motors to pumps, and tests pump units for proper operation.

Performs rough welding to repair pumping equipment, pump bases, motor bases, piping and water tanks; replaces fittings or re-pipes seal water systems.

Performs preventive maintenance work through removing and inspecting pumping equipment, taking accurate measurements and pressure readings and conducting visual inspections; repairs valves and piping.

Operates shop equipment including lathe to trim impellers and perform minor shaft repairs, and operates drill press, shear and brake in the fabrication of equipment such as water tanks, pump bases and wetwell covers.

Repairs and overhauls various types of gasoline and diesel equipment including tamper plates, cement mixers and arrowboards.

Repairs and overhauls various types of pneumatic and hydraulic tools including air impact tools, jackhammers, sump pumps, air saws and grinders.

Repairs and overhauls various types of mechanical tools such as tapping machines, reed pipe cutters, rigid pipe cutters and pipe threaders.

Designs, manufactures and installs cabinets and shelving for clamps, fittings and other small tools stored on crew trucks.

Repairs and maintains all parts on jetters and vactors including pressure hoses, gauges and pumps.

Repairs and overhauls hydraulic pumps, high pressure pumps, generators and air compressors.

Makes simple time and material estimates for proposed jobs; maintains records of equipment repaired and maintained

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the methods, materials, tools and practices used in a specialized trade or in the building, electrical or mechanical crafts.

Considerable knowledge of the occupational hazards and safety precautions of the building, electrical and mechanical trades.

Knowledge of the principles of mechanics.

Knowledge of the operating, repair and maintenance characteristics of a wide variety of specialized mechanical and electrical equipment used in water and sewer installations.

Knowledge of the operating, repair and maintenance characteristics of a wide variety of mechanical and electrical equipment in use in water and sewer buildings and facilities.

Ability to detect malfunctions in machinery and equipment and make necessary repairs or adjustments.

Ability to work from verbal or written instructions, simple diagrams and sketches.

Ability to make simple time and material estimates.

## Human Resources Department

### W & S Welder (005805)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in gas, electric and tungsten inert gas welding in the horizontal, vertical, overhead and flat positions including layout and fabrication are required. Must possess a certificate issued by affiliates of and/or by the American Welding Society. Must possess a CDL/Class B. Must possess own hand tools. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the cutting and welding of metallic articles, parts, structures and equipment.

Employees in this class are responsible for the application of trade skills to a variety of welding, brazing and metal cutting tasks on ferrous and non-ferrous metals. Duties include the fabrication of some metallic items, maintaining and performing minor repairs to welding equipment, and occasionally operating a motor vehicle to perform field work. Assignments may be received verbally or through written instructions, blueprints or diagrams. Incumbents exercise considerable independent judgment in the selection of methods and procedures to produce desired results. Supervision is received from a technical or administrative superior who reviews work in progress and upon completion for satisfactory application of welding skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Preheats and cleans metals; lays out, cuts and fits materials for welding; selects proper welding heat and proper types and sizes of electrodes for correct penetration and strength of welded metals.

Operates acetylene or electric arc welding equipment in the performance of cutting and welding tasks on machinery and equipment such as truck and automotive bodies, steam and plumbing systems, pump and engine parts, dragline buckets, dozer blades and tracks, loader buckets and other similar machinery and apparatus; performs horizontal, vertical, overhead and flat welding.

Operates various tools and equipment used in welding repair procedures including air wrenches, sheet metal shears and brakes, hoist, drill presses and lift trucks.

Participates in the manufacture of specialized machinery and apparatus for various construction and repair activities.

Brazes, solders and coats non-ferrous metals; performs silver and lead soldering.

Assists in the design of a variety of specialized equipment and builds equipment according to job specifications.

Occasionally does blacksmithing including the manufacturing of eye bolts, braces, angle brackets and similar items.

Occasionally operates a motor vehicle to transport portable welders and acetylene burning-welding equipment to field construction sites.

Cleans, stores, maintains and makes minor repairs to welding equipment.

Adheres to established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of methods, practices and techniques of welding.

Considerable knowledge of the care and use of the tools of the welding trade.

Considerable knowledge of the occupational hazards and safety precautions required in the operation of acetylene or electric arc welding equipment.

Considerable knowledge of the properties of ferrous and non-ferrous metals used in welding work.

Ability to understand and follow verbal and written instructions.

Ability to read simple sketches, diagrams and blueprints.

Ability to operate welding equipment and to perform a variety of welding assignments.

Skill in welding.

Skill in the operation of welding equipment.

Physical strength and agility sufficient to perform assigned duties.

REV 12-94

#### **Nature Of Work**

This is skilled work at the journeyman level in the cutting and welding of metallic articles, parts, structures and equipment.

### Sewer Inspection Technician 1 (005806)

#### Minimum Qualifications

High school diploma or GED. One year of experience in sewer maintenance or electronics is required. Must possess a CDL/Class B with a Tanker endorsement.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the operation of a mobile closed-circuit television inspection and chemical sealing unit in the wastewater infrastructure.

Employees in this class work as part of a team in conducting internal inspection of underground sewer lines and sealing defective lines to prevent groundwater infiltration. Work requires the operation of cable winches and video power cables. Employees may drive a TV Grout unit truck as assigned. Supervision is received from a technical superior at the site who provides instruction on work operations and reviews completed assignments.

##### ILLUSTRATIVE TASKS

Maintains the TV Grout truck and equipment; prepares the TV Grout truck with the necessary equipment for the day's assignment.

Adjusts the tension on the trackers used to mount the camera equipment and lowers the camera underground; assists the Sewer Inspection Technician 2 in activating and adjusting television camera and monitors control for optimal clarity and contrast.

Assists the Sewer Inspection Technician 2 in preparing descriptions of each identified sewer defect and recording all pertinent data including exact location of defect; obtains addresses and locates clean-outs of residences or vacant lots for each line segment for entry into the computer system; makes atlas corrections.

Fills out manhole inspection forms.

Assists the Sewer Inspection Technician 2 in operating remote control units inflating and deflating packer unit to complete sealing operations.

Measures and mixes basic sealing chemicals in compound tank and checks set-up time of sealing compound.

Erects barricades or traffic cones to protect equipment operators at the site.

Assists the Sewer Inspection Technician 2s in the man entry inspection of large diameter pipes.

Inspects air supply of breathing apparatus and completes confined space entry permits.

Locates sewer laterals and rear easement manholes.

Plugs off line segments with leaks as necessary to complete inspections.

Drives TV Grout unit truck; performs the work of the Sewer Inspection Technician 2 in his absence.

Performs confined space entry into manholes and large diameter pipes; opens and monitors confined space entry permits.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the types and properties of sewer line construction, sewer layouts, gases encountered and wastewater characteristics.

### Sewer Inspection Technician 1 (005806)

Knowledge of the operation and maintenance of a closed-circuit TV system and a chemical sealing unit and attachments.

Knowledge of methods, practices, techniques, materials, tools, and equipment employed in detecting and correcting groundwater infiltration into sewer lines.

Knowledge of sewer inspection and maintenance.

Knowledge of occupational hazards and necessary safety precautions.

Ability to perform minor repair and maintenance of electrical and electronic systems.

Ability to determine proper chemical mixture and set-up time.

Ability to operate video camera viewer and audio-visual recorder.

Ability to prepare accurate records showing conditions of sewer lines.

Ability to perform sealing operations in manholes.

Ability to work with hand tools.

Ability to read, and interpret maps, blueprints, schematics, and plans.

Ability to understand and follow oral and written instructions.

Ability to maintain effective working relationships with fellow employees and work as part of a team.

NEW 6/19/2013

### **Nature Of Work**

### Sewer Inspection Technician 2 (005807)

#### Minimum Qualifications

High school diploma or GED. One year of experience in the inspection of water and sewer lines to include the operation of video equipment is required. Must possess a CDL/Class B with a Tanker endorsement.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the operation of a mobile closed circuit television inspection and chemical sealing unit in wastewater infrastructure.

Employees in this class direct a team of employees conducting internal inspection of sewer lines and sealing defective lines to prevent groundwater infiltration. Functional direction is exercised at the site, in the absence of supervisor, through verbal instructions during scanning and sealing operations and review of work upon completion. Incumbents are required to drive a TV Grout unit truck. Supervision is received from a technical superior who sets work priorities and confers on work problems.

##### ILLUSTRATIVE TASKS

Inspects sewer lines using a mobile closed circuit television camera; activates and adjusts television camera and monitors control for optimal clarity and contrast; records all pertinent data including exact location of defect by conducting continuous surveys of the county's underground sewer mains and services; locates and identifies unrecorded installations.

Locates, identifies and documents degree of damage for infiltration and exfiltration points and sewer defects; records descriptions of identified sewer line and lateral defects during inspections; reports immediately any emergency repairs needed to the crew supervisor.

Records landscape conditions of area with video camera equipment prior to inspection.

Drives TV Grout unit truck.

Reads and interprets Geographic Information System (GIS) and Enterprise Assets Management System (EAMS) gravity mains maps to ensure proper equipment number is used to document findings in the Granite XP System.

Maintains and submits daily records and performs data transfer of all work performed; prepares atlas corrections as needed to request the addition or removal of line segments.

Conducts manhole rehabilitations using chemicals, sealants and masonry.

Determines chemical composition based on type of sealing activity and prepares or oversees preparation of compound.

Conducts large diameter man entry pipe inspections to identify pipe defects; insures all safety protocols are followed.

Conducts various types of grout repairs to stop ground water infiltration; operates remote control units inflating and deflating packer unit to complete pipe sealing operations.

Conducts trenchless repairs to pipe and liner defects; inspects sewer laterals from the mainline and inspects submerged pipes to identify debris fields or deformities using a sonar system.

Performs confined space entry into manholes and large diameter pipes; opens and monitors confined space entry permits.

Investigates the source of smoke leakage by inspecting sewer lines once smoke tests have identified possible defects; responds to customer back-up complaints.

Communicates with immediate supervisor to coordinate the shutdown of pump stations and monitoring of sewer levels.

Supervises a crew as the lead man; instructs technicians and other team personnel in inspection and sealing operations; trains employees in

### Sewer Inspection Technician 2 (005807)

the operation of the TV Grout system; directs safety measures to include work zone traffic control.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operation and maintenance of a closed circuit TV system and a chemical sealing unit.

Considerable knowledge of the types and properties of sewer line construction.

Considerable knowledge of sewer layouts, gases encountered and wastewater characteristics.

Considerable knowledge of occupational hazards and necessary safety precautions.

Knowledge of methods, practices, techniques, materials, tools and equipment employed in detecting and correcting water infiltration into sewer lines.

Knowledge of sewer inspection, maintenance and repair procedures.

Ability to read and interpret maps, blueprints, schematics and plans.

Ability to determine proper chemical mixture and set-up time.

Ability to supervise work of a small crew effectively.

Ability to establish and maintain effective working relationships with employees and supervisors.

Ability to prepare accurate records showing conditions of sewer lines.

Ability to operate video camera viewer and audio visual recorder.

Ability to operate TV Grout unit equipment.

Ability to communicate orally.

### W & S Utility Equipment Technician (005817)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the maintenance and repair of sewer sludge handling equipment to include brown bear, auger/aerator tractor, vactor/jetter truck, and excavator are required. Must possess a CDL/Class A. Must be able to lift up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is skilled mechanical work at the journeyman level in the diagnosis, repair and preventive maintenance of sludge and construction equipment as well as large stationary plant diesel engines, generators and welding fabrication of specialized parts for equipment modification.

Employees in this class perform skilled work in the diagnosis, maintenance, overhaul, modification and repairs of Brown Bears, CAT 1926, dozers, loaders, graders, hydro-cranes, backhoes, light towers, basket lifts, sweepers, bush hogs, rollers, fork lifts, water pumps, industrial mowers, draglines, drilling equipment, buckets, welders, compressors, auger trucks, lube trucks, spray rigs, and other equipment. Work involves diagnosing, repairing, and overhauling engines, transmissions, HVAC systems, ignitions, electrical systems, hydraulic systems, differentials, brakes, hydrodynamic systems, fuel delivery systems, suspension, steering, track assemblies, generators, final drives, P.T.O.'s, buckets, articulating joints and other systems. Related duties may include maintaining customer relations, operating a computer terminal to enter work order information and research vehicle repair histories, inspecting vehicles after commercial repairs, new vehicle inspection and preparation, and maintaining parts inventories. Supervision is occasionally exercised over maintenance repairers and semi-skilled laborers assisting in various phases of the work. Supervision is received from a shop supervisor or other superior who reviews work for satisfactory performance of equipment repaired, overhauled or maintained.

##### ILLUSTRATIVE TASKS

- Tests, inspects, and repairs vehicle emission equipment in compliance with vehicle emissions legislation.

- Diagnoses and repairs complete electrical systems, suspension and steering systems, and transmissions/transaxles.

- Employs onboard computer systems and external computerized diagnostic systems in the performance of repair, overhaul and maintenance work.

- Inspects, diagnoses, repairs, and overhauls hydraulic and air brake systems, including Anti-lock Brake Systems (ABS).

- Debriefs vehicle operators to understand driveability concerns and affect appropriate repairs.

- Performs some minor body work, including removal and replacement of body parts; inspects vehicles after commercial repair; adjusts and aligns body parts and hardware, as required.

- Orders parts and maintains adequate parts inventory.

- Diagnoses and repairs air-conditioning systems in compliance with environmental legislation.

- Prepares and completes work orders; operates computer terminal to enter information and research vehicle repair history in the automated Equipment Management System.

- Changes vehicle tires and wheels; performs wait jobs, as required; makes repairs in the shop and in the field; cleans and maintains shop, tools and shop equipment.

- Performs preventive maintenance, including complete unit inspections, changing fluids, and making adjustments; performs lubrications and repairs all defects, as required.

- Operates, diagnoses and repairs hydrodynamic systems; adjusts, repairs and overhauls complete hydraulic systems on various pieces of construction equipment.

- Inspects, diagnoses and repairs power take off (PTO) systems.

- Diagnoses and repairs fossil fuel delivery systems, including Compressed Natural Gas (CNG), diesel fuel injection and gasoline-powered equipment.

- Operates, diagnoses and repairs aerial ladder equipment.

- Removes, repairs and replaces track assemblies.

- Inspects new equipment and ensures contractual specifications have been met prior to vehicle acceptance.

- Certifies equipment before returning to in-service status.

- Observes established safety practices and procedures.

- Performs related work as required.

### W & S Backflow Enforcement Specialist (005822)

#### Minimum Qualifications

High school diploma or GED. One year of experience installing and repairing water meters and/or assisting in general plumbing procedures is required. Must be certified through the Florida Center for Training, Research and Education for Environmental Occupations (TREEO) Certification Program or other comparable certification program for Backflow Prevention Device Testers.

#### Job Specifications

##### NATURE OF WORK

This is code enforcement and skilled mechanical maintenance work in the repair and maintenance of backflow prevention assemblies.

Employees in this class are responsible for enforcing the Cross-Connection Control program, investigating illegal/unauthorized water use and cleaning, installing, testing, repairing and maintaining backflow prevention assemblies of various sizes. Work requires the use of tools and other equipment used to test, repair and maintain backflow prevention assemblies. Duties include preparing reports and maintaining current knowledge of laws and regulations pertaining to the work. Supervision is received from a technical superior who reviews work for conformance with established policies and procedures and satisfactory operation of equipment repaired installed or maintained.

##### ILLUSTRATIVE TASKS

Enforces the Cross-Connection Control program; performs site inspections to determine if the premises requires installation of a backflow preventer; meets with customers and other interested parties to mediate disputes and provide information and education materials; performs various code enforcement activities including ensuring the accuracy of reported test results.

Installs, tests, repairs and maintains backflow prevention assemblies at various departmental facilities including pump stations, wastewater treatment plants, water plants, and office buildings as well as floating meters.

Investigates illegal water use; inspects premises to determine cause of unauthorized water usage; inspects various mechanical components such as fire system pumps and various drains; investigates unauthorized discharge to the sewage system by private wells; coordinates activities with other county departments as required.

Coordinates and oversees the work of private contractors performing work for the department on private property; meets with the affected residents; performs preliminary investigations and layouts; acts as a liaison between private contractors and residents; inspects and approves work performed by contractors.

Provides support to various department programs, such as the Low Flow Shower Head program and represents the department and county at various career day events at public schools.

Performs other related duties as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Knowledge of laws, rules and regulations pertaining to the detection and prevention of cross connections which pose a threat to public health.

Knowledge of the legal procedures related to the enforcement of the Cross-Connection Control program.

Knowledge of investigative and surveillance procedures used in the enforcement of local ordinances

Knowledge of the methods, practices and materials used in the maintenance, repair and testing of backflow prevention assemblies.

Knowledge of the use of pressure gauges, portable flow meters, manometers and other equipment used in the repair and maintenance of backflow prevention assemblies.

### W & S Backflow Enforcement Specialist (005822)

Knowledge of basic plumbing techniques.

Knowledge of established safety practices and procedures applicable to the area of assignment.

Ability to enforce provisions of local ordinances with firmness, tact and impartiality.

Ability to interpret and apply provisions of the Cross-Connection Control program ordinance.

Ability to ascertain facts through the application of investigative and surveillance techniques.

Ability to keep records and prepare accurate and complete reports of investigative findings.

Ability to establish and maintain effective working relationships with subordinates, superiors and various public and private officials.

Ability to repair, install, overhaul and maintain backflow prevention assemblies.

Ability to use tools, gauges, manometers and other equipment to test, repair and maintain backflow prevention assemblies.

Ability to make thorough inspections and determine if repairing or overhauling backflow prevention assemblies is required.

Ability to communicate effectively, both verbally and in writing.

Skill in the use of tools, gauges, manometers and other equipment.

#### **Nature Of Work**

This is code enforcement and skilled mechanical maintenance work in the repair and maintenance of backflow prevention assemblies.

### W & S Septic Waste Attendant (005825)

#### Minimum Qualifications

Eighth grade. Six months of experience as a general helper or laborer are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is heavy manual and limited customer service work involving limited skills in monitoring septic waste disposal, and maintenance and construction tasks at Miami-Dade Water and Sewer Department Wastewater Treatment Plants.

Employees in this class monitor the proper disposal of septic waste by septic waste disposal companies to include checking customer account status and preparing billing tickets. Employees also perform laboring tasks requiring some acquired skills in the use of hand tools, power tools and equipment, or occasional operation of light automotive equipment. Duties may involve the maintenance of wastewater treatment buildings and equipment. Employees are responsible for the upkeep and efficient operation of the tools or equipment used. Instructions are usually received verbally and routine tasks are performed with considerable independence, while more difficult work is performed under the supervision of a skilled trades employee or crew leader. All work is subject to inspection in progress and upon completion.

##### ILLUSTRATIVE TASKS

Supervises the dumping of septic waste by private septic waste disposal companies to include determining acceptability of waste material, verifying truck's sticker corresponds with the department's paperwork and that the account is in paid status; fills out billing tickets to be submitted to the Water & Sewer billing department.

Inspects disposal area to minimize safety hazards; enforces rules and procedures governing the operation of the septic waste disposal area; coordinates issues with plant operations and security; notifies plant operations of septic truck overage spills outside of waste containment area and assists in cleaning up spills; maintains order and flow of traffic into the waste disposal bays.

Collects samples of septic waste for laboratory analysis.

Assists in the general maintenance of waste site; maintains the roadway clear of debris for vehicles; hoses down bar screens and grit collection area; maintains cleanliness of grit building; removes trash, debris, waste materials from containment area and performs other custodial duties.

Assists in the installation and repair of various sizes of clay, PVC, galvanized and cast iron pipes above and below ground; sets up cones and directs traffic as necessary; performs hand-digging in difficult areas inaccessible to heavy equipment.

Operates pressure cleaning equipment to clean buildings and other structures.

Operates pick-up truck or other vehicle to transport tools, equipment and supplies; loads and unloads equipment and supplies on and off of trucks or other utility vehicles.

Operates power mowers, small tractors, saws, edgers, clippers and other equipment used in landscaping and roadside maintenance.

Operates, cleans and maintains large power-spraying equipment used to control insects, plant pests, and weeds.

Assists in surface preparation and spray painting of signs; cleans, sands, straightens and repairs signs.

Maintains tools and equipment used; cleans and makes minor repairs; performs routine preventive maintenance.

Assists in maintaining work areas; removes trash, debris and waste materials from treatment plant areas.

Performs related work as required.

### W & S Septic Waste Attendant (005825)

#### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of basic methods, materials and techniques used in maintenance and construction work.

Knowledge of power tools and equipment used in water and sewer maintenance activities.

Knowledge of occupational hazards and safety precautions applicable to the area of assignment.

Ability to provide routine information to customers in a courteous and tactful manner.

Ability to properly fill out billing tickets.

Ability to operate pick-up or other trucks, small tractors and similar automotive equipment.

Ability to understand and follow verbal and written instructions.

Ability to assist in the installation, repair and maintenance of a variety of water and sewer facilities and equipment.

Ability to work out-of-doors occasionally under adverse weather conditions.

Skill in the operation of power tools and equipment.

Physical strength and agility sufficient to perform heavy manual labor.

NEW 1/5/2012

#### **Nature Of Work**

### W & S Automotive Bodyworker (005826)

#### Minimum Qualifications

Eighth grade. One year of skilled experience in automotive body repair work and automotive painting is required.

#### Job Specifications

##### NATURE OF WORK

This is skilled body and fender work at the journeyman level.

An Automotive Bodyworker makes all types of repairs to the bodies and cabs of a variety of automotive and construction equipment using specialized body tools and equipment. Work also includes priming and painting the repaired surfaces, and occasionally the complete repainting of vehicles. General assignments are received in the form of oral or written orders and are performed with considerable independence, subject to occasional routine check during progress and final inspection on completion by a foreman or other supervisor.

##### ILLUSTRATIVE TASKS

Rebuilds, replaces and repairs automotive, truck and construction equipment bodies, grills and frames; removes dents and straightens door panels, quarter panels, fenders and hoods with hammers and fender irons; welds breaks and fractures in sheet metal and frames; straightens frames and wheels with presses and other equipment; repairs and solders radiator leaks.

Brushes or spray paints a wide variety of county automotive equipment, such as trucks, motorcycles, road rollers, compressors and other construction and maintenance equipment, as well as fire and police apparatus and passenger vehicles; cleans vehicle with high pressure steam; sands rough or rusted spots; masks out areas to remain unpainted with masking tape; applies primer and fillers; applies paint; buffs painted areas after drying; removes masking and replaces parts which were removed to facilitate painting; paints and otherwise letters identifying names and numbers on apparatus.

Applies under-coating and steam cleans vehicles.

Does a variety of miscellaneous work about the garage; installs accessory equipment such as lights and sirens; assists generally with automotive repair work.

Paints and otherwise letters identifying names and numbers on apparatus.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, methods, materials and tools used in body and fender work.

Considerable knowledge of the processes involved in preparing automotive and other public works equipment for painting and the techniques used in spray and brush painting.

Considerable knowledge of the occupational hazards and safety precautions of the trade.

Knowledge of the principles, methods, materials and tools of the automotive mechanic trade.

Knowledge of the special techniques employed to produce legible and sharply detailed lettering.

Ability to carry out oral or written instructions.

Skill in the use and care of tools employed in body and fender work.

Skill in mixing and matching paints and in applying paints and finishes by brush or spray gun.

#### Nature Of Work

This is skilled body and fender work at the journeyman level. An Automotive Bodyworker makes all types of repairs to the bodies and cabs of a variety of automotive and construction equipment using specialized body tools and equipment.

### W & S Automotive Equipment Operator 1 (005827)

#### Minimum Qualifications

Eighth grade. Six months of experience in the operation of medium-duty trucks such as dump trucks, flatbed trucks, single unit cargo trucks, tank trucks or similar equipment are required. Must possess a CDL/Class B with tanker endorsement.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of trucks and similar types of automotive equipment for the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for operating dump and stake body trucks, water carriers, light tractors, vans, motorized sweepers, wreckers, pick up trucks, fork lifts and other vehicles used in varied water & sewer operations. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operation checks and routine preventive maintenance. Work requires some manipulative skill and dexterity in operating vehicles safely while driving under varying road and weather conditions. Supervision is received from a supervisor who reviews work in progress and upon completion for proper equipment operation and thoroughness in carrying out assigned tasks.

##### ILLUSTRATIVE TASKS

- Drives dump truck, flatbed truck or other vehicle and transports labor crew, materials, supplies, tools and equipment to work sites; supervises laboring tasks in roadway patching, road shoulder and median maintenance, and weed cutting.

- Operates tank truck and oil distributor in roadway resurfacing and related maintenance; operates a roller to prepare parking lot, roadway or bicycle path surfaces.

- Drives passenger bus to transport students and others; drives van and stake body vehicle to deliver building supplies, laundry and various materials.

- Operates a sweeper tractor to remove refuse from roadways, parking lots and other areas.

- Operates heavy duty wrecker equipped with crane and winch; hoists and tows disabled vehicle to repair shop.

- May assist labor crew with assigned tasks or direct work of labor crew on landscape, roadway or other maintenance jobs.

- Performs routine pre-operational checks and routine preventive maintenance of equipment; makes minor adjustments to equipment in the field.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Knowledge of the operational characteristics of medium-sized trucks and similar types of automotive equipment.

- Knowledge of safe driving techniques and the occupational hazards of motorized equipment operation.

- Knowledge of local traffic rules and regulations.

- Some knowledge of the geography and road network of the metropolitan area.

- Ability to operate an assigned vehicle in the prescribed manner.

- Ability to detect improper functioning mechanical systems on an assigned vehicle.

- Ability to make minor adjustments and to perform minor servicing of automotive equipment.

- Skill in driving medium-sized trucks and similar automotive equipment.

NEW 10-94

#### Nature Of Work

This is skilled work in the operation of trucks and similar types of automotive equipment for the Miami-Dade Water & Sewer Department.

### W & S Automotive Equipment Operator 2 (005828)

#### Minimum Qualifications

High school diploma or GED. One year of experience operating medium and/or heavy-duty automotive or medium and/or heavy-duty construction equipment is required. Must possess a CDL/Class A. An operator's proficiency test will be administered during the interview selection process.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled work in the operation of large vehicles and similar types of public works equipment for the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for operating tractor trailers, heavy duty road rollers, front end loaders, small bulldozers and other vehicles used principally for maintenance and construction purposes. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operational checks and routine preventive maintenance. Work requires skill and dexterity in using simultaneous control mechanisms on assigned vehicles. Supervision is received from a maintenance or construction supervisor who reviews work in progress and upon completion for proper equipment operation and thoroughness in carrying out assigned tasks.

##### ILLUSTRATIVE TASKS

Transports construction equipment using a low bed trailer; operates tractor trailer in local hauling tasks; loads and unloads vehicles as required.

- Operates heavy duty road roller in resurfacing and roadway construction.

- Operates front end loader or small tractor rigged with hydraulic loading lift and back hoe digging shovel.

- Operates amphibious vehicles used in spraying and removing vegetation from canals and waterways.

- Drives truck and operates hydraulic aerial hoists used in tree maintenance; uses crane and winch attachments for loading and placing various equipment and materials.

- May operate smaller earth-moving equipment such as bulldozers, graders and mobile hydrocranes.

- Operates mowtrim or boom-mounted saw to trim roadside vegetation and canal banks.

- Operates large dump truck to haul construction materials or debris.

- Operates large street sweeper for road maintenance.

- Operates a single bed trash truck with chipper attachment to cut back visual obstructions and hazardous roadside vegetation.

- Performs routine pre-operational checks and routine preventive maintenance of equipment; makes minor adjustments to equipment in the field.

- May assist labor crew with assigned tasks or direct labor crew on landscape or construction jobs.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Knowledge of the operational characteristics of large vehicles and larger types of automotive equipment.

- Knowledge of large vehicles and public works equipment used for maintenance and construction purposes.

- Knowledge of safe driving techniques and the occupational hazards of motorized equipment operation.

- Knowledge of local traffic rules and regulations.

- Some knowledge of the geography and road network of the metropolitan area.

- Ability to operate an assigned vehicle in the prescribed manner.

- Ability to detect malfunctions while operating heavy equipment.

- Ability to make minor adjustments and to perform minor servicing of assigned automotive equipment.

- Skill in the operation of heavy automotive and public works equipment.

### W & S Heavy Equipment Operator (005830)

#### Minimum Qualifications

High school diploma or GED. Two years of experience operating heavy construction equipment to include backhoe, excavator, lowboy and payload loader are required. Must possess a CDL/Class A. Must obtain a Tanker endorsement during the probationary period. An operator proficiency test will be administered during the interview selection process.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of heavy duty earth-moving equipment utilized by the Miami-Dade Water & Sewer Department.

Employees in this class operate large diesel-powered vehicles used in varied maintenance and construction tasks. Duties include the operation of equipment with complex control systems requiring a high degree of manipulative skill and dexterity. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operational checks and routine preventive maintenance. Supervision is received from a field supervisor who inspects work in progress and upon completion for effective equipment operation and compliance with engineering standards.

##### ILLUSTRATIVE TASKS

Operates an excavator used for major pipeline installation and repairs; properly places sheeting and shoring necessary to safely allow workmen to be in the trench area; sets pumps and well points.

Operates combination backhoes used for minor and major pipeline installation and repairs of various size pipe lines; works in confined or restricted area; excavates around underground utilities; cleans up previously excavated debris and properly backfills excavations; loads dump trucks and safely transports equipment.

Operates front end loaders used for major pipeline installation and repairs including the movement of large amounts of debris and loading of dump trucks and the restoration of roadways and the spreading of asphalt.

Operates trenchers used to cut wide trenches in hard rock areas for pipeline installation.

Operates ditchers used in the installation of small water service lines.

Operates a skid steer loader to clean up in very confined working zones and for placing sod.

Operates a power broom used to clean up construction site areas.

Operates a mobile hydraulic crane or sidelifte used in pipeline installation.

Operates a dump truck used for the hauling of various types of materials from job sites.

Operates a lowboy used to transport heavy equipment to and from job sites.

Operates a water tank used for the watering down of construction sites to minimize dusty conditions and water freshly planted sod.

Operates large diesel powered, heavy-duty pay loader used in the loading of raw wastewater solids, such as grit grease, rags, and plastic material.

Operates large diesel powered machines specifically designed to turn cake sludge on asphalt drying beds used to dry this material for the purpose of removing as much moisture as possible before disposing.

Operates large diesel powered screening equipment used to screen dried sewage sludge resulting in a finished end product of Class "AA"

### W & S Heavy Equipment Operator (005830)

sludge for sale to an outside market.

Operates diesel powered vacuor machines to clean sewer lines at plants and clean floating debris from treatment process tanks.

Operates tractor and broom to empty grit bins at plants and street clearings; maintains the drying beds by removing weeds; clears roadways; performs the jetting of sewer lines; cleans debris from treatment tanks.

Performs pre-operational checks and routine preventive maintenance on equipment; completes paperwork detailing work activities.

May serve as a crew leader over a small field crew of equipment operators and laborers.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operating characteristics of heavy duty earth-moving equipment.

Considerable knowledge of the occupational hazards and safety precautions applicable to the operation of construction equipment.

Knowledge of basic maintenance requirements of heavy construction equipment.

Knowledge of different soil types and conditions and the digging techniques required by each in order to excavate safely.

Ability to detect malfunctions while operating heavy construction equipment.

Ability to make adjustments and to perform minor maintenance to heavy equipment.

Ability to perform earth work according to engineering specifications.

Ability to operate equipment in confined or restricted areas.

Skill in the operation of large earth-moving equipment.

NEW 2/28/2007

#### Nature Of Work

This is skilled work in the operation of heavy duty earth-moving equipment utilized by the Miami-Dade Water & Sewer Department.

### W & S Water Meter Repairer (005834)

#### Minimum Qualifications

High school diploma or GED. One year of pipefitting experience or one year of experience in the installation, maintenance, or repair of meters, gauges, water pipelines, or similar mechanical equipment is required. Must possess Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled mechanical maintenance repair work in cleaning, testing, repairing and maintaining water meters, and in making installations of meters in the field.

Work involves responsibility for making repairs to, and testing, large and small meters used for accurately measuring water consumption.

Work requires adjusting meters to prescribed limits of accuracy and making emergency repairs to water services, field adjustments to meters, and installation or removal of meters. Supervision is received from a foreman who assigns work and inspects work on completion for maintenance of established standards.

##### ILLUSTRATIVE TASKS

Inspects, takes down, cleans, determines needed repairs, repairs and reassembles domestic and commercial service water meters; replaces defective parts and makes necessary adjustments to secure conformity with prescribed standards of accuracy; conducts accuracy tests on meters before and after repairs.

Removes meters and replaces them with new or properly adjusted meters, either for periodic shop inspection of meters or at the termination of service.

Replaces broken small pipes; digs out, cleans and raises meter boxes; replaces broken boxes or lids; makes field repairs on the larger meters, changing defective registers and replacing broken glasses.

Reads large meters not normally accessible to regular meter reading personnel, repacks stuffing box leaks.

Makes field investigations on complaints of poor water pressure; sets recording meters in the field to check leaks and complaints of excessive charges.

Investigates possibility of leaks in the county system; notifies property owners when leaks are found in private lines.

Installs pressure gauges on fire hydrants; checks and replaces pressure charts on a regular scheduled basis.

Keeps records of meter performance, and of shop and field work carried out; assists in preparing replacement parts inventories.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the practices, methods and materials used in the maintenance, repair and testing of water meters.

Knowledge of basic plumbing techniques applicable to working on water meter pipes.

Knowledge of the use of pressure gauges, pressure recorders, portable flow meters and manometers.

Knowledge of the construction and principles of operation of various types of domestic and commercial water meters and gauges.

Ability to determine repair and adjustment needs to water meters.

Ability to make basic field repairs on meters of all sizes.

Ability to read water meters, and to keep simple performance and repair records.

Ability to work from written and oral instructions.

Skill in the use of tapping equipment, wrenches, drill press, punch press, emery wheel, and other tools or power machines used in repairing or installing water meters.

NEW 4-73

#### Nature Of Work

This is skilled mechanical maintenance repair work in cleaning, testing, repairing and maintaining water meters, and in making installations of meters in the field.

### W & S Water Meter Repairer (005834)

#### Minimum Qualifications

High school diploma or GED. One year of experience working with water distribution systems is required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the magnetic location of underground pipelines.

Work in this class involves using magnetic detection equipment in locating water lines, valves or boxes. Employees must learn through experience to differentiate pipe and service line location signals from the miscellaneous signals produced by buried scrap metal objects. Work is generally performed independently in the field, but receives supervision from a technical superior who evaluates quality of work through observation, and measures quantity of work through review of reports submitted.

##### ILLUSTRATIVE TASKS

Operates a magnetic pipe or line detector to locate covered valves, meter boxes and unmarked water lines or cables.

Meets with contractors and utility company representatives and lays out the location of the county's pipelines to prevent damage when work must be done in close proximity to such lines.

Operates a chlorinator to destroy bacteria in new or existing water lines; operates a pressure pump to test small diameter water lines for leaks.

Makes simple test of water to insure proper chlorination and safety before being turned on to the consumer.

Takes meter readings for those meters which have been magnetically located.

Keeps records of work performed and submits reports to supervisor.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the pattern of water mains and laterals within the county and of record sources indicating such locations.

Knowledge of the techniques and practices of pipefitting, water meter setting and small diameter pipe repair.

Knowledge of the variety of cables and pipelines commonly found underground in urban areas.

Knowledge of the techniques and practices applicable to the chlorination of water lines.

Ability to work independently in the field.

Ability to keep records and prepare reports on work accomplished.

Ability to maintain good working relationships with contractors, utilities representatives and others met in the course of work.

NEW 4-73

#### Nature Of Work

This is skilled work in the magnetic location of underground pipelines.

### W & S Service Technician 2 (005838)

#### Minimum Qualifications

High school diploma or GED. One year of experience as a W & S Service Technician 1 or one year of experience in leak detection, survey or locating underground utilities using electronic locating equipment or leak detection equipment is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work requiring considerable experience in the electronic location of underground water main leaks.

Work in this class involves the exercise of considerable independent judgment in interpreting electronically recorded audio indications of underground leaks in water lines of all sizes. Employee is responsible for choosing the exact area to be excavated by pipe maintenance crews. Work is subject to general direction and review of a superior.

##### ILLUSTRATIVE TASKS

Conducts a continuous survey of the county's underground water mains and services in order to locate leaks; identifies unrecorded installations in the county's water system.

Identifies the exact location of water lines and leaks for the county's water maintenance crews; interprets audio signals recorded electronically, and differentiates between water leak sounds and a wide variety of extraneous noises.

Meets with contractors and utility company representatives in connection with their excavation work in close proximity to county mains.

Performs flow and pressure tests as an alternate method of determining water leaks when the use of electronic equipment is not practical.

Maintains records of all work performed and submits reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the grid pattern of water mains and laterals in the county.

Considerable knowledge of the techniques applicable to the operation of magnetic and electronic pipe detection equipment.

Considerable knowledge of the types and locations of pipes and cables found underground in proximity to water mains.

Knowledge of the principles and practices applicable to the maintenance of a water distribution system.

Knowledge of the time and equipment requirements necessary in making water main excavations and repairs.

Ability to distinguish the electronically recorded sounds produced by main leaks from other nonrelated sounds also recorded by the same instrument.

Ability to trace leaks back to an exact location on a water line, although leak sounds may be recorded at some distance from actual source.

Ability to work independently in the field.

Ability to prepare detailed reports and records of work performed.

Ability to maintain good working relationships with contractors and utilities company representatives.

NEW 4-73

#### Nature Of Work

This is skilled work requiring considerable experience in the electronic location of underground water main leaks.

### W & S Plant Electrician (005840)

#### Minimum Qualifications

Must possess a Miami-Dade County Journeyman or Master Certificate of Competency as an Electrician. Two years of experience as a Journeyman Electrician to include high voltage work (2,400/4,160/15,000) are required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled journeyman work in the installation, maintenance and repair of both high and low voltage electrical and electronic systems and equipment found in water and sewage treatment plants and pumping systems.

Employees in this class perform skilled electrical and electronic repair tasks in accordance with standard practices of the electrical and electronic trade, including responsibility for performing the special work required for high voltage electrical equipment and controls. Work requires a knowledge of the mechanical and operational aspects of equipment and its installation. Incumbents use special electrical tools such as voltmeters, ammeters, insulation testing meters, industrial analyzers, ground testers and also use special equipment necessary for the maintenance of large electrical motors and switchgear. Assignments are made either orally or through written orders and may be accompanied by diagrams and blueprints. Technical supervision is received from a superior on unusual or difficult operational problems and is checked by satisfactory performance of equipment repaired or maintained.

##### ILLUSTRATIVE TASKS

Installs, alters, repairs and maintains both high and low voltage motors, generators, switchgear, motor controllers, transformers, wiring systems, electronic components and other related equipment.

Installs, alters, repairs and maintains special metering, control, telemetering and recording equipment.

Maintains accurate records of time and materials used, and the maintenance and repair history of all electrical equipment on which work is performed.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of standard practices, methods, tools and materials of the electrical and electronic trade.

Considerable knowledge of the installation, alteration, repair and maintenance of both high and low voltage electrical and electronic systems and equipment found in the plant of assignment.

Knowledge and understanding of electronic, air, mechanical and electrical types of metering, telemetering, control and recording equipment used in water or sewage treatment plants, water supply and distribution systems and lime plants.

Knowledge of local and national electrical codes.

Knowledge of the hazards of the trade, and of appropriate precautionary measures, particularly as they pertain to work on high voltage electrical systems and equipment.

Knowledge of the operating principles and repair techniques applicable to electronic equipment.

Ability to locate and adjust defects in electrical and electronic systems and equipment.

Ability to work from electrical diagrams and blueprints, and to understand and effectively carry out oral and written instructions.

Ability to make estimates of time and materials.

Ability to follow electrical wiring diagrams on low and medium voltage motor controllers and circuit breakers.

Skill in the care and use of standard and special electrical tools and testing equipment.

REV 10-77

#### Nature Of Work

This is advanced skilled journeyman work in the installation, maintenance and repair of both high and low voltage electrical and electronic systems and equipment found in water and sewage treatment plants and pumping systems.

### W & S Plant Electrician (005840)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the operation and minor maintenance of large stationary diesel engines and auxiliary equipment are required. Must be able to work rotating shifts.

#### Job Specifications

##### NATURE OF WORK

This is routine stationary diesel operation on an assigned shift.

Work in this class involves responsibility for the operation of large diesel engines used to drive large pumps and related equipment. Work is performed in accordance with well established routines and standards. Employees are permitted to make only minor repairs and adjustments to the engines or the auxiliary equipment. General supervision is received from a superior for conformance to established operating procedures.

##### ILLUSTRATIVE TASKS

Starts, operates, stops and adjusts large diesel engines and their auxiliaries according to load demands and characteristics; reads meters gauges and other recording and indicating devices showing operating conditions.

Makes adjustments to provide most satisfactory engine and auxiliary equipment operation; makes continual inspection of the engines and auxiliaries to which assigned.

Checks fuel supply, cooling water, exhaust temperatures and lubricating oil consumption; makes operating adjustments, minor repairs, keeps machinery clean and maintains a continuous operating record of each engine and auxiliary.

Keeps records and prepares simple reports of operations and activities.

May supervise a small group of semi-skilled or unskilled employees.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operation, maintenance and minor repair of large diesel engines and their auxiliaries.

Considerable knowledge of the operating principles of electric generators, motors, large blowers, air compressors, large pumps and valves and chlorinators.

Ability to recognize unsatisfactory operating conditions as shown by meters, gauges, indicating and measuring devices, and abnormal engine sounds.

Ability to act quickly in making necessary changes or adjustments as needed.

Ability to prepare clear and accurate records and reports.

Ability to understand and follow oral and written instructions.

NEW 4-73

#### Nature Of Work

This is routine stationary diesel operation on an assigned shift.

## Human Resources Department

---

### W & S Power Plant Operator 2 (005843)

#### Minimum Qualifications

High school diploma or GED. Four years of experience in the operation of large scale stationary engines and generators are required or two years of experience as a Diesel Plant Operator or W & S Power Plant Operator 1 in the Miami-Dade Water and Sewer Department are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is routine work operating and maintaining large (900 kw and larger) stationary diesel and methane gas engines on an assigned shift.

Employees in this class are responsible for the operation and day-to-day maintenance of large diesel engines used to drive electric generators and related equipment. Duties are performed in accordance with established routines and standards, and include the operation and maintenance of diesel and methane gas engines. Employees are permitted to make only minor repairs and adjustments to diesel engines or auxiliary equipment. General supervision is received from an administrative superior who reviews work for conformance with established policies and procedures.

##### ILLUSTRATIVE TASKS

Starts, operates, stops and adjusts large diesel and methane gas engines and their auxiliaries according to load demands and characteristics; reads meters, gauges and other recording and indicating devices showing operating conditions.

Makes adjustments to provide most satisfactory engine and auxiliary equipment operation; makes continual inspection of the engines and auxiliaries to which assigned.

Checks fuel supply, cooling water, exhaust temperatures and lubricating oil consumption; makes operating adjustments, changes filters, changes lubricating oil and makes minor repairs; keeps machinery clean and maintains a continuous operating record of each engine and auxiliary.

Keeps records and prepares simple reports of operations and activities.

May supervise a small group of semi-skilled or unskilled employees.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operation, maintenance and minor repair of large diesel and methane gas engines and their auxiliaries.

Considerable knowledge of the operating principles of electric generators, motors, large blowers and air compressors.

Ability to recognize unsatisfactory operating conditions as shown by meters, gauges, indicating and measuring devices, and abnormal engine sounds.

Ability to act quickly in making necessary changes or adjustments as needed.

Ability to prepare clear and accurate records and reports.

Ability to understand and follow verbal and written instructions.

### **W & S Power Plant Operator 2 (005843)**

This is routine work operating and maintaining large (900 kw and larger) stationary diesel and methane gas engines on an assigned shift.

### W & S Plant Diesel Mechanic (005844)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in the maintenance and major overhaul of diesel engines, power generators and pumps are required. Must possess a Class D license.

#### Job Specifications

##### NATURE OF WORK

This is skilled journeyman level work in the maintenance, repair and overhaul of large stationary diesel engines and auxiliary equipment. Employees in this class perform specialized work in the maintenance, repair and overhaul of large diesel engines. Work involves the maintenance and repair of diesel machinery and mechanical equipment such as fuel pump governors, compression valves, engine governors, clutches and other related equipment. Employees work independently using specialized handtools, power tools and various precision measuring and testing instruments especially suited to diesel repair. General supervision is received from a foreman or engineering supervisor. Supervision may occasionally be exercised over a small group of semi-skilled or unskilled employees in repair and overhaul work.

##### ILLUSTRATIVE TASKS

Diagnoses, adjusts, repairs and overhauls a variety of large stationary diesel engines, generators and auxiliary equipment. Uses various types of shop equipment, precision instruments and specialized tools such as: dynamometers, valve refacing and seating equipment, micrometers, dial gauges, grinders, lathes and cylinder cones. Repairs, pump-test and gauges injection nozzles; repairs and adjusts fuel pump governors, compression valves, engine governors, clutches, right angle drives and other related equipment. Cleans, repairs and adjusts gas admission, injection and metering valves; calibrates various pneumatic proportioners, flow regulators, transmitters, pressure regulators and activators for balancing firing pressures and temperatures with use of natural gas as an engine fuel. Checks, replaces and fits new camshaft bearing and timing gears; inspects and replaces worn accessory spring drive gears, springs and guides. Replaces, cleans and overhauls lubricating oil pumps, water pumps, turbocharger lube oil pumps and speed increaser lube oil pumps; cleans, inspects and overhauls turbochargers. Performs minor lathe work in reaming bushings and checking shaft alignment; repairs and cleans air starting distributor system; uses acetylene and arc welding equipment to make up brackets and weld broken metal parts. Keeps records of engine maintenance work performed, operation time, time cards of each day's work, of work to be done and spare parts used. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the construction, design, repair and adjustment of a wide variety of diesel engines and their auxiliaries. Considerable knowledge of the usual types of mechanic's tools and equipment as well as the special tools, gauges, machinery and shop equipment used in the maintenance and repair of diesel engines. Ability to detect by inspection any worn, defective or improperly adjusted diesel part or assembly. Ability to supervise a small group of semi-skilled and unskilled employees. Ability to follow written and oral instructions, and to keep records of repair and maintenance operations conducted. Skill in the diagnosis of defects and failures of large diesel engines and their auxiliary equipment.

NEW 4-73

#### Nature Of Work

This is skilled journeyman level work in the maintenance, repair and overhaul of large stationary diesel engines and auxiliary equipment.

### W & S Plant Mechanic (005846)

#### Minimum Qualifications

High school diploma or GED. Three years of skilled experience in the installation, maintenance, and repair of a variety of pumps and related mechanical equipment are required. Must possess a driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, repair and maintenance of mechanical equipment in a large water and sewage plant.

Work in this class involves responsibility for the maintenance, installation and repair of a wide variety of mechanical equipment in sewage and water treatment plants. Supervision over incumbents is generally limited to assignment of work and the inspection of work upon completion, and occasional review in process; instructions are given in considerable detail only when work assignments involve new or difficult problems.

##### ILLUSTRATIVE TASKS

Repairs and maintains electrical motors; cleans, revarnishes and oils electrical motors; inspects and repairs bearings; maintains centrifugal pumps, keeping seal rings in proper condition; renews sleeves; oils bearings, maintains proper alignment of pumps and motors; inspects and repairs rubber connections in couplings.

Maintains oil switches and starting compensators, and keeps contacts smooth and clean; maintains proper oil level in switch compensators and transformers; keeps switch pots in repair and filled with oil to secure proper resistance.

Maintains, repairs and replaces such machinery as alum and lime elevators, chemical buckets, bearings, sprockets, chains and motors; maintains and repairs lime agitators, slackers, feeders, conveyors and classifiers.

Installs new seats in pumps, and replaces pistons and valves; maintains and repairs mixing tanks and motors; repairs and replaces reduction gears and paddles; installs screen bars, rakes and trash grinder parts.

Repairs and maintains carbon dioxide pipelines so as to insure a uniform flow of gas through water; maintains and repairs chlorinators and ammoniators; rebuilds air compressors.

Constructs, repairs and maintains refractory linings and related brick work in kilns and ducts; welds and assists in the fabrication, repair and maintenance of kilns, fire doors, flue dampers and pipelines for steam, water, oil and air, using both electric and gas techniques; repairs and maintains equipment such as electrically driven fan units and kiln auxiliaries.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of methods and techniques used in the installation, repair and maintenance of a wide variety of motors and pumps. Considerable knowledge of methods and techniques used in the repair and maintenance of a wide range of mechanical and valve equipment such as is found in a large water treatment or sewage plant.

Knowledge of methods and techniques used in the installation, repair and maintenance of pipes, pipe fittings, gauges, venturi meters and other similar equipment.

Knowledge of the principles and practices of chemical and physical treatment of water or sewage.

Ability to work from blueprints, pencil sketches or written and oral instructions.

Ability to keep work records and make reports of materials used and work performed.

Ability to perform routine preventive maintenance for a wide variety of plant equipment.

Skill in the use of mechanic's tools and shop equipment in the installation, repair and maintenance of plant equipment.

NEW 4-73

#### Nature Of Work

This is skilled work at the journeyman level in the installation, repair and maintenance of mechanical equipment in a large water and sewage plant.

### W & S Plant Mechanic (005846)

#### Minimum Qualifications

High school diploma or GED. One year of experience in pipefitting or performing installations, maintenance, or repair on infrastructure of water and sewer systems is required. Must possess a CDL/Class B with tanker endorsement.

#### Job Specifications

##### NATURE OF WORK

This is skilled pipefitting work in the installation, repair and maintenance of waterpipe systems.

Work involves performing pipefitting tasks of a journeyman level in the installation, repair and maintenance of all pipelines in the county water system. Work is usually performed under the supervision of a foreman, although work may be carried out in shop or field without immediate supervision. Incumbents in this class occasionally supervise a small group of laborers, making work layouts on the basis of verbal or written instructions, blueprints or sketches usually received from a foreman.

##### ILLUSTRATIVE TASKS

Installs, replaces and maintains steel, wrought iron, cast iron, galvanized, copper, brass and other types of pipe of various sizes employed in water distribution lines; measures, cuts and fits tile or asbestos cement pipe.

Cuts, saws, threads, bends and reams pipe; solders joints or tubings; caulks pipe joints with lead; makes screwed flange connections and welded joints; installs, repairs and replaces valves and other fittings which are integral parts off pipelines; fastens and installs pipe hangers and braces; grinds and checks valves; repairs pipe leaks; and replaces worn flanges and gaskets.

Cleans pipes and applies protective coating; checks for leaks and other defects in valves, meters and water mains off various sizes.

Installs, repairs and maintains standard and high pressure fire hydrants; maintains related distribution systems.

Uses pipe dies, power threading and cutting machines, reamers, tapping machines, hammers, chisels, wrenches, saws, caulking tools, acetylene torches and other tools and equipment involved in the installation, repair and removal of pipes, pipe fittings, meters and valves.

Occasionally supervises the work of a small number of maintenance laborers.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods, practices, techniques, materials, tools and equipment employed in joining, jointing, fitting, cutting, bending and threading all types of water distribution pipes.

Knowledge of the performance of various pipe materials under a wide variety of conditions.

Knowledge of the hazards of the trades, and of necessary precautionary measures.

Ability to direct and supervise a small group of maintenance repairmen and laborers in a manner conducive to full performance and high morale.

Ability to work from blueprints, sketches and oral instructions.

Skill in the use of tools and in the application of techniques of the trade.

NEW 4-73

#### Nature Of Work

This is skilled pipefitting work in the installation, repair and maintenance of waterpipe systems.

### W & S Instrument Technician (005850)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the installation, maintenance and repair of electrical, electronic, hydraulic and or pneumatic instrumentation and process control equipment. An ISA level one Certified Control System Technician certification, an Associates Degree in Electronics or Electrical Engineering Technology, an Industrial Electronics Technical Certification, or a Miami-Dade County Electrical Journeyman license may substitute for the required experience. Must possess a driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled journeyman work in the installation, repair and maintenance of water and sewer treatment plant instrumentation.

Employees in this class are responsible for the installation, maintenance and repair of electronic, pneumatic, mechanical and electrical types of metering, control and recording equipment used in large water and sewer treatment plants. Work is performed in accordance with standard practices of the electrical and electronic trades and requires a knowledge of the mechanical and operational aspects of equipment monitored through instrumentation. Incumbents must use special electrical tools such as voltmeters, ammeters and oscilloscopes. Assignments are made either orally or through written work orders and may be accompanied by diagrams or blueprints. Supervision may be exercised over subordinate skilled and unskilled employees. Technical supervision is received from a superior who assists with unusual or difficult problems and evaluates work for satisfactory functioning of treatment plant instruments.

##### ILLUSTRATIVE TASKS

Installs, alters, repairs and maintains special metering, control and recording instrumentation equipment utilized in water and sewer treatment plants, water pumping stations and distribution systems; inspects and diagnoses technical instrument problems; locates and adjusts defects in instruments.

Uses special electric and electronic tools and equipment such as voltmeters, ammeters, insulation testing meters, industrial analyzers and oscilloscopes.

Maintains records of time and materials used in installing and repairing instrumentation and maintains repair history of metering, control and recording equipment.

Requisitions supplies and materials necessary for instrument repair.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard practices, methods, tools, and materials of the electrical and electronic trades.

Considerable knowledge of special methods, techniques and tools used in the repair, maintenance and installation of water and sewer treatment plant instrumentation.

Considerable knowledge of the mechanical and electrical equipment used in large water and sewer treatment plants and related facilities.

Knowledge of the occupational hazards and safety precautions required when working on controls for high voltage electrical systems and equipment.

Ability to locate and diagnose defective water and sewer plant instrumentation.

Ability to work from diagrams and blueprints and to understand and effectively carry out oral and written instructions.

## Human Resources Department

---

### W & S Instrument Technician (005850)

Ability to use precision test equipment to repair, maintain and install water and sewer plant instrumentation.

Skill in the care and use of standard and specialized electrical tools and precision test equipment.

#### **Nature Of Work**

This is skilled journeyman work in the installation, repair and maintenance of water and sewer treatment plant instrumentation.

### W & S Leak Detection Equipment Specialist (005851)

#### Minimum Qualifications

High school diploma or GED. One year of experience in the maintenance, troubleshooting, and repair of electronic equipment is required; or one year of experience in leak detection or locating underground utilities using electronic locating equipment or leak detection equipment, to include maintenance of leak detection equipment, is required.

Must possess a valid driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the maintenance and repair of electronic leak detection equipment and data analysis and interpretation for the Water & Sewer Department.

Employees in this class are responsible for analyzing and interpreting gathered data for potential leaks, troubleshooting and repairing leak detection equipment. The work in this class involves the inspection and diagnosis of different types of technical instruments and equipment. The incumbent uses the GIS program to design graphical information for the pinpoint and deployment crews. The employees in this class exercise considerable independent judgment in analyzing the data for potential leaks, as well as in the repair and maintenance schedules for use of the equipment. Work is subject to general direction and review from a technical supervisor.

##### ILLUSTRATIVE TASKS

Repairs, maintains, services and controls electronic equipment and instruments used in the Support and Water Accountability Section, including Permalog loggers, Z-Corr loggers, Aqualog 80 loggers, BK Precision analog oscilloscopes, Fisher ferro magnetic locators, Akron water flow test kit, Fluid conservation system correlator, and other specialized devices.

Performs annual preventive maintenance and emergency servicing for a variety of specialized instruments and equipment.

Uses special electric and electronic tools and equipment such as voltmeters, ammeters, industrial analyzers and oscilloscopes.

Requests the supplies and materials necessary for instrument and equipment repair.

Maintains log records of time and materials used in repairs and adjustments of equipment and instruments.

Provides training for field technicians on existing and new leak detection and/or survey equipment; Communicates with development companies in reference to new equipment, instruments or software updates needed for installation and/or implementation.

Uses GIS Program to design maps and appropriate distribution of leak survey devices (loggers) for the pinpoint and deployment crews out in the field.

Cleans and charges loggers, downloads recorded data to be analyzed for potential leaks and produces graphs of potential leaks and distributes them to pinpoint crews for final on-site analysis.

Updates atlas pages according to recent information received from field crews via GIS program.

Tracks final analysis for quality control purposes on the Leak and Deployment Response Database and forwards monthly reports to the Data Management Section; Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the principles and theories of electronic equipment as applied to the operation and maintenance of electrical and telemetric devices.

Considerable knowledge of the standard tools, materials, methods, and practices of the electrical trade.

Considerable knowledge of the practices, methods, tools, equipment and materials used in the repair, testing, maintenance, and replacement

## Human Resources Department

of electrical and telemetric receiving and transmitting equipment.

#### **Nature Of Work**

This is skilled technical work in the maintenance and repair of electronic leak detection equipment and data analysis and interpretation for the Water & Sewer Department.

### W & S Treatment Plant Operator 1 (005852)

#### Minimum Qualifications

High school diploma or GED. Must possess a Driver license. Must register for the required coursework to obtain a State of Florida Class "C" Wastewater/Water license and must obtain a State of Florida Class "C" Wastewater/Water license within 30 months of employment. Applicants who can show proof of passing the State of Florida Treatment Plant Operator Class C examination will not be required to take the Miami-Dade County W & S Treatment Plant Operator 1 competitive examination.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in operating a major portion of the water, sewage, lime, generating or pumping equipment on an assigned shift. Work in this class involves shift responsibility for the routine operation of a major section or function of a county plant. Employees exercise some independent judgment in making adjustments to machinery and equipment operated in accordance with established standards. Supervision is received from a superior who has overall responsibility for plant operations, and who indicates the types of adjustments or procedural modifications necessary in achieving a desired plant result.

##### ILLUSTRATIVE TASKS

Inspects area of responsibility to determine that all machinery is operating properly; takes samples of water or sewage at various stages of the treatment process to determine effectiveness of treatment procedures; on the basis of sample result institutes alteration of processes to provide effective treatment.

Inspects and adjusts treatment plant equipment such as pretreatment equipment, oxygenation trains, clarifiers, gravity thickeners, digesters, large pump stations, injection wells, chlorinators, lime slakers, flocculators, sludge collectors, rapid sand filters, chemical feeders, vacuum filters, conveyors systems, screens and related equipment.

Inspects recording charts, meters, and on the Site SCADA system and on the basis of such information adjusts treatment plant procedures in conformance with operating instructions.

Operates mechanical equipment in sludge thickening tanks and feeder box; operates screw conveyor, slurry pumps, carbon dioxide compressors, sludge return pump stations, concentrator piston pumps, sludge transfer pumps, plant discharge pump station systems, injection well systems and other electrical and mechanical equipment.

Measures and adjusts slurry feed; checks water pressure on spray nozzles of a scrubber; assists in the overall maintenance of the plant; transfers sludge from tank to tank throughout a complex digester system; programs automatic samplers.

Inspects, starts, stops and operates pumps and auxiliary equipment; determine operating conditions and needed adjustments for repairs; assists in general repair of pumping equipment; analyzes samples at water softener and boilers and makes necessary adjustments.

Inspects bearings, equipment lubrication; records readings of the various gauges and amperage.

Prepares records of shift operations; may supervise a small group of skilled and unskilled employees.

Responsible for maintaining a clean and safe work environment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operating theory and principles of the plant.

Ability to make minor repairs to equipment operated.

Ability to accurately follow routine operating and recording procedures.

Ability to detect faulty operating characteristics in equipment or processes, and to institute remedial action.

Ability to maintain detailed routine operating records.

Ability to work with and supervise subordinate unskilled and semi-skilled personnel.

Ability to understand and follow oral and written instructions.

Skill in making minor repairs and adjustments to pumping equipment and valves.

## Human Resources Department

---

### W & S Treatment Plant Operator 1 (005852)

REV-5/2009

#### **Nature Of Work**

This is skilled work in operating a major portion of the water, sewage, line, generating or pumping equipment on an assigned shift. The written examination will evaluate math computation skills, record keeping skills, the ability to follow written instructions, and the ability to read graphs, charts, gauges and meters. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of 1/2 (.50) point per year of continuous, full-time service in the County service to a maximum credit of ten years or five points. Applicants requesting Veterans' preference must submit Veterans' preference documents at the time of application. Preference will be given to veterans and spouses of veterans when applicable. Those claiming this preference must submit documentation of eligibility for preference, such as a copy of a DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility from the armed force(s) (Army, Navy, Air Force, Marine Corps, and/or Coast Guard of the United States). The DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility documents must include wartime dates of service and an honorable discharge. In addition to the DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility, those who are claiming preference as a disabled veteran must provide a recent letter (within one year) from the Department of Veteran's Affairs or Department of Defense stating the percentage of their service-connected disability. All veterans are required to complete a Veteran's Preference Claim Form at the time of application. Apply online at [www.miamidade.gov/jobs](http://www.miamidade.gov/jobs) from Friday, March 12, 2010 until Friday, March 26, 2010. APPLICANTS MUST ACCESS [WWW.MIAMIDADE.GOV/ERD/TEST](http://WWW.MIAMIDADE.GOV/ERD/TEST) OR CALL (305) 375-0297 (OPTION 2) FOR WRITTEN TEST DATE, TIME, AND LOCATION ON OR AFTER April 14, 2010 AND TEST RESULTS ON OR AFTER May 10, 2010. Doors to the test facility will close promptly at the time indicated. No one will be admitted for registration after the doors to the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination.

### W & S Treatment Plant Operator 2 (Water) (005853)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the operation of a water treatment plant are required. Must possess a State of Florida Class B Water license. Must present a Driver license during the interview selection process. Shift work is required.

#### Job Specifications

##### NATURE OF WORK

This is skilled and limited supervisory work having shift responsibility for the operation of a water, sewage or lime facility.

Work in this class involves general operating responsibility during a given shift for one major county plant. Employees in this class frequently operate a plant without benefit of immediate supervision, and are called upon to make technical determinations regarding modification of plant operating procedures pending review at some later time by a technical superior. Incumbents may also direct and assist plant operators and unskilled workers assigned to a given shift. Supervision is exercised over subordinate plant operators and unskilled workers assigned to a given shift. Super-vision is received from a plant supervisor or superintendent who establishes routine operating standards, reviews records of operating results and gives specific instructions regarding new maintenance or operating practices

##### ILLUSTRATIVE TASKS

Controls the operation of a water treatment plant; maintains check on and anticipates demand for water throughout distribution system; regulates flow of water into plant by starting or stopping well pumps; maintains water levels of reservoirs.

Reviews records of operating results prepared by subordinate operator for specific areas of a plant; gives instructions regarding modified operating procedures based on test reports of water quality; maintains desired water pressure in the distribution system insofar as this is possible through operation of a treatment plant.

Conducts routine checks on a large sewage treatment plant; inspects each of various treatment stages; operates sand filters, grit elevators, digester and sludge transfer pumps, and chlorination equipment on a test basis; takes regular readings of sewage flow through plant.

Takes samples of sludge and reclaimed water; adjusts treatment process to achieve desired results; instructs subordinate operators in standard operating procedures; participates in and supervises minor maintenance of equipment and plant.

Operates a rotary lime kiln, including a fuel oil heating and firing system, forced draft and induced draft system, and related equipment; checks instruments on control panel and adjusts firing to maintain proper percentage of oxygen and carbon dioxide in the kiln exhaust gases, proper temperature inside the kiln, and proper feeder building temperature.

Takes samples of the finished lime at regular intervals, and makes visual checks of lime in furnace; keeps records of kiln temperatures, speed and draft; of oil temperatures, pressure, and flow; of percent solids in and quantity of flow of slurry, and similar records.

Supervises and participates in the installation, repair and maintenance of pumps, turbines, auxiliaries, valves, gauges, pipes and fittings; supervises the upkeep and cleaning of buildings.

Makes inspection of plant and equipment to determine operating condition, need for repair parts, stores and plant operation; requisitions new parts and supplies as needed; keeps inventories and prepares time sheets and work reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods of installing and repairing pumps, turbines, gauges of various sorts, pipes and related equipment.

Considerable knowledge of the operating principles and theory of the plant to which assigned.

Knowledge of the established routines and practices for operation of the equipment, and related testing and measuring devices in the plant to which assigned.

Knowledge of the preventive maintenance practices applicable to equipment operated.

Knowledge of desirable records maintenance practices applied to equipment operated.

Knowledge of the safety hazards and relevant precautions of the work.

Ability to supervise the work of subordinate personnel while participating in plant operations.

Ability to maintain plant operations within narrowly established standards.

Ability to recognize and remedy plant malfunctions.

Ability to make minor repairs to electrical and mechanical equipment.

Ability to maintain detailed operating records, and

### W & S Sludge Dewatering Operator 1 (005855)

#### Minimum Qualifications

High school diploma or GED. One year of experience in the operation of mechanical equipment is required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the operation of sludge dewatering equipment for the County water and sewer utility.

Employees in this class are responsible for the operation of pumps, centrifuges, feeders and related equipment on an assigned shift.

Responsibilities include monitoring of feed pump rates, adjusting treatment processes, collecting samples of feed sludge, and maintaining records and reports. Some independent judgment is required in making adjustments to treatment equipment and in varying procedures.

Supervision is received from a technical superior who assists with unusual and difficult problems and reviews work for compliance with operational procedures.

##### ILLUSTRATIVE TASKS

Inspects sludge dewatering facility to determine that all machinery is operating properly; uses a moisture balance to run solids tests on feed sludge and cake; adjust treatment process to achieve desired results.

Starts, stops and adjusts pumps, centrifuges, boilers, feeders and related dewatering equipment; mixes polymer and sets polymer feed pump rates; records readings of various gauges, dials and meters.

Collects samples of feed sludge, cake and centrate for laboratory composites; reviews plant and laboratory reports and makes minor adjustments to assure efficient dewatering operations; assists with routine maintenance and repair of sludge dewatering equipment.

Maintains records and prepares reports of shift operations and unusual incidents occurring on assigned shift.

Operates dump trucks to unload sludge cake at drying beds.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the operating characteristics and routine maintenance requirements of sludge dewatering pumps, centrifuges, feeders and related equipment.

Knowledge of established rules and regulations governing sludge dewatering operations.

Knowledge of the chemical and physical processes and analyses of sludge dewatering operations.

Knowledge of the materials and tools used in the operation and maintenance of sludge dewatering equipment.

Knowledge of the occupational hazards and safety precautions applicable to sludge dewatering operations.

Knowledge of standard recordkeeping procedures.

Ability to operate sludge dewatering equipment and dump trucks.

Ability to analyze chemical and physical dewatering processes, recognize abnormalities and institute remedial action.

Ability to make minor repairs and perform routine maintenance for sludge dewatering equipment.

Ability to understand and follow oral and written instructions.

Ability to maintain records and prepare routine reports.

Physical strength and agility sufficient to perform assigned duties.

#### Job Specifications

##### NATURE OF WORK

This is skilled and limited supervisory work in the operation of a sludge dewatering plant for the county water and sewer utility.

An employee in this class is responsible for supervising the work of subordinate skilled and unskilled employees engaged in the operation and maintenance of pumps, centrifuges, feeders, boilers and related equipment. Emphasis of the work is on providing technical guidance, planning work methods and procedures, and participating in plant operations. Responsibilities include monitoring of equipment utilization, treatment processes and shift operations for adherence to established methods and procedures. Supervision is exercised over subordinate employees through assignment and review of work and provision of assistance with difficult or unusual problems. Supervision is received from a technical superior who reviews work for compliance with facility operational procedures.

##### ILLUSTRATIVE TASKS

Supervises and participates in the operation of pumps, centrifuges, boilers, feeders and related dewatering equipment; monitors feed rates for sludge digester, polymer pumps and recirculating pumps; conducts solids tests and provides instructions concerning modified treatment processes.

Supervises and participates in maintenance and repair of valve pits, macerators, weirs, troughs, centrifuges, boilers, pipes and pumps.

Collects samples of feed sludge and cake; operates dump trucks to load and unload sludge cake; prepares operations records and reports; requisitions equipment, materials and supplies.

Conducts inspections of facility and equipment to determine operating condition and repair needs.

Communicates and enforces established safety practices and procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employees performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operating characteristics and maintenance requirements of sludge dewatering pumps, centrifuges, feeders and related equipment.

Considerable knowledge of established rules and regulations governing sludge dewatering operations.

Considerable knowledge of chemical and physical processes and analyses concerning sludge dewatering operations.

Considerable knowledge of the materials and tools used in the operation, maintenance and repair of sludge dewatering equipment.

Considerable knowledge of the occupational hazards and safety precautions applicable to sludge dewatering operations.

Knowledge of supervisory principles and practices.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to operate sludge dewatering equipment and dump trucks.

Ability to analyze chemical and physical dewatering processes and instruct subordinates concerning the recognition of abnormalities and implementation of remedial actions.

Ability to inspect, maintain and repair sludge dewatering equipment.

Ability to communicate effectively, verbally and in writing.

Ability to prepare operations records and reports.

Physical strength and agility sufficient to perform assigned duties.

### W & S Flow Meter Technician (005858)

#### Minimum Qualifications

Eighth grade. One year of experience performing semi-skilled maintenance or repair tasks on water and/or sewer facilities is required. Must possess a CDL/Class B license. Tanker endorsement preferred.

#### Job Specifications

##### NATURE OF WORK

This is technical work in the installation, maintenance and removal of open and closed-channel flow monitoring equipment.

Employees in this class perform duties in the installation and operation of flow meters used to measure sewage flow through pump stations before and after repairs are conducted to document the impact of corrective actions on system performance. Duties include installing and starting flow meter equipment, ensuring the meters are operating properly, inputting information through the use of a lap top computer, and removing flow meter equipment. Employees may be assisted by a semi-skilled helper in the performance of assigned duties. Supervision is received from a technical supervisor who reviews work for conformance with established policies and procedures.

##### ILLUSTRATIVE TASKS

Installs, maintains and removes open and closed-channel flow monitoring equipment.

Determines the presence of toxic gases in confined spaces using a gas detector; observes established safety practices and procedures; visually checks the amount of sewage flowing into the pump station.

Determines the proper type of flow meter to be installed based upon grease content and access to inlet.

Connects meter to lap top computer; inputs pipe diameter, pipe material, and level of flow and actual velocity using a portable velocity meter; starts meter to verify that readings are accurate.

Disconnects lap top computer from flow meter; secures an anchor to wall in manhole and secures flow meter to anchor.

Maintains flow meters by checking readings at pump stations to verify their accuracy, and returning to manholes to clean meters, as required.

Removes flow meters after use; connects lap top computer to flow meter to generate reports on sewage flow.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of sewer lines, sewer layouts, pump stations and sewage flow characteristics.

Knowledge of the installation, maintenance and removal of open and closed-channel flow monitoring equipment.

Knowledge of the occupational hazards and safety precautions applicable to the work.

Some knowledge of lap top computer operation.

Ability to install, maintain and remove flow meters in accordance with departmental procedures.

Ability to follow verbal and written instructions.

Ability to operate lap top computer equipment used in the installation and removal of flow meters.

Physical strength and agility sufficient to perform assigned duties.

##### MINIMUM QUALIFICATIONS

Graduation from an accredited high school. GED or high school equivalency is acceptable. One year of experience performing water and sewer semi-skilled maintenance or repair tasks is required.

### W & S Senior Meter Technician (005859)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the repair and installation of water meters, AMR/AMI systems and/or water services are required. Must obtain a State of Florida Level 3 Water Distribution System license during the probationary period. Must possess a driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled mechanical and technical work in the installation and maintenance of large diameter water meters and the performance of various field functions related to Automated Meter Reading (AMR) and Advanced Metering Infrastructure (AMI).

Work involves responsibility for making repairs to, and testing, large diameter water meters including all turbine-type meters and various electromagnetic-type meters used for accurately measuring water consumption. Work requires maintaining proper calibration of all large diameter water meters to prescribed limits of accuracy using both mechanical and computerized methods. This classification is distinguished from subordinate classifications engaged in meter repairs by servicing larger and more complex meters, installing and maintaining AMR technology, and ensuring that standard procedures and instructions are followed in the performance of meter service. Supervision is received from a technical superior who reviews work for conformance with established policies and procedures and satisfactory operation of equipment repaired, installed or maintained.

##### ILLUSTRATIVE TASKS

Maintains proper calibration of all large diameter water meters greater than three inches to include all turbine-type and various electromagnetic-type meters; performs on-site testing of meters using calibrated test meter; adjusts calibration of meters to meet appropriate AWWA standards using both mechanical and computerized methods.

Performs all various field functions related to AMR and AMI; installs, troubleshoots, removes, and replaces radio transmission devices; verifies proper communication between various transmitters installed throughout the service area, and the collection towers.

Installs, replaces, maintains all large diameter water meters greater than three inches; prepares all materials, coordinate and leads job with appropriate staff; performs quality control inspection of all completed work.

Locates water meters, mains and services using electronic line location, metal detection and leak detection equipment.

Inspects water services to ensure departmental standards are followed prior to use by land developers and builders; meets with various contractors and developers, and recommends solutions for non-compliant and/or deficient installations.

Performs other related work.

##### KNOWLEDGES, SKILLS AND ABILITIES

Knowledge of the practices, methods and materials used in the maintenance, repair and testing of large diameter water meters including turbine-type meters and electromagnetic-type meters.

Knowledge of Automated Meter Reading (AMR) and Advanced Metering Infrastructure (AMI).

Knowledge of basic plumbing techniques applicable to working on water meter pipes.

Knowledge of the use of the calibrated test meter to test meters.

Knowledge of mechanical and computerized calibration methods used to adjust meters.

Knowledge of established safety practices and procedures applicable to the area of assignment.

Ability to diagnoses problems with meters installations and determines the most cost-effective and efficient means of repair.

Ability to prepare the appropriate materials, coordinate with staff and lead work in the installation and maintenance of large diameter water meters.

Ability to install, troubleshoot and replace AMR devices.

Ability to verify the proper communication between AMR transmitters and the collection towers.

Ability to work from written and oral instructions.

Ability to establish and maintain effective working relationships with subordinates, superiors and various public and private officials.

Ability to make thorough inspections to determine if water services meet departmental standards.

Ability to communicate effectively, both verbally and in writing.

Skill in the use of equipment used in repairing or installing large diameter water meters.

## Human Resources Department

### W & S Lime Production Plant Operator 1 (005860)

#### Minimum Qualifications

Eighth grade. One year of skilled mechanical maintenance experience is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of a major of a recalcination plant on an assigned shift.

Work in this class involves shift responsibility for the routine and emergency operation of a plant feed building. Employees work under conditions of extreme heat. Incumbents exercise some independent judgment in making adjustments and repairs to machinery and equipment in accordance with established standards. Supervision is received from a plant superior who indicates the type of adjustments or procedural modifications to be made in achieving desired plant results.

##### ILLUSTRATIVE TASKS

Inspects assigned areas to determine that all machinery and equipment is operating properly; takes samples of slurry at various stages of process to determine effectiveness of thickening solids; on the basis of sample results institutes alteration of process to provide proper production.

Operates mechanical equipment such as sludge thickening tanks, air compressors, thickening tank, Bird centrifugal filters, scoop feeder, kiln feeder, CO2 compressors, induced draft fan, effluent pumps, centrifuge reject tank, clarifier sludge pumps, and other electrical and mechanical equipment used in a rotary kiln lime plant.

Measures and adjusts slurry feed to maintain high production level of lime; maintains water pressure on scrubber tower and humidifier to control dust.

Inspects, starts, stops and operates pumps and auxiliary emergency equipment; repairs of pumping equipment, emergency generator, kiln tractor, centrifuges, air compressors, and relining of kiln with fire brick; insulates pipes and boiler and completes steam fitting work.

Analyzes samples at water softener and boiler and makes necessary adjustments; inspects kiln bearings, rollers and reduction gears for drive mechanism of rotary kiln.

Keeps record of oil changes and lubrication of all equipment; prepares records of shift operations and may supervise a small group of skilled and unskilled employees.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of operating theories and principles of the plant to which assigned.

Knowledge of preventive maintenance and repair techniques for equipment operated.

Knowledge of procedures and operating standards applicable to the equipment operated.

Knowledge of general operating principles of a wide variety of electrical, mechanical, and welding equipment.

Ability to climb and make repairs on equipment in high areas.

Ability to follow applicable operating and recording procedures.

Ability to detect faulty operating characteristics in equipment or processes and institute remedial action.

Ability to maintain detailed routine operating records.

Ability to respond quickly in emergency situations to prevent warping of rotary kiln.

Ability to work with and supervise subordinate unskilled and skilled personnel.

Ability to understand and follow oral and written instructions.

Ability to make required repairs and adjustments to machinery and equipment.

NEW 10-76

#### Nature Of Work

#### Job Specifications

##### NATURE OF WORK

This is skilled and shift supervisory work in the operation of a recalcination plant.

Work in this class involves shift supervision and various duties in the operation and maintenance of a lime production plant. Duties include the proper utilization of staff, equipment and burning processes in producing a high quality of oxide at a high production level to meet the needs of water plants. Supervision is exercised over subordinate personnel assigned to plant facilities. Supervision is received from a plant supervisor who exercises general direction and review over work performed.

##### ILLUSTRATIVE TASKS

Maintains and operates lime plant equipment and facilities and performs tests and analysis on lime as required.

Reviews plant and laboratory reports and directs the adjustments of processing methods to improve plant efficiency.

Prepares reports on plant process and production for submission to supervisor; provides technical assistance on matters related to plant operations.

Maintains records of plant operations and makes recommendations concerning alterations and extensions to the plant.

Maintains, repairs and replaces such machinery as lime elevators, discharge conveyors, air compressors, boiler, boiler feed pump, water softener, reduction gears, sludge pumps, slurry pumps, reject pumps, effluent pumps, CO2 compressors, Bird centrifugal filters, scoop feeder, kiln feeder, thickeners, emergency generator, standby kiln tractor, pump tractor, kiln bearings and tires, kiln thermo-couplings, dust collectors, grinders, oil pumps and various types of valves.

Constructs, repairs and maintains replacement refractory lining and related brick work in kiln and ducts, removal and replacement of super-X asbestos insulation in kiln lining.

Welds and assists in the fabrication, repair and maintenance of kiln, fire doors, flu dampers and pipe lines for steam, water, oil and air using both electric and gas techniques; repairs and maintains equipment such as electrically driven fan units and kiln auxiliaries.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the machinery, equipment, materials and operating practices of a lime plant.

Considerable knowledge of the chemical and physical processes involved in the production of lime and the conduct of related chemical and physical analyses.

Knowledge of the practices, methods, materials and tools of the mechanical trades related to the maintenance of a lime plant.

Knowledge of the safety hazards and relevant precautions of the work involved.

Ability to plan and supervise the work of subordinate operators and others in a manner conducive to full performance and high morale.

Ability to keep records and prepare clear and concise reports of plant operations.

Ability to detect in machinery and equipment and to make appropriate adjustments and repairs.

Ability to react quickly in emergency situations to prevent warping of kiln.

Ability to understand, follow and transmit oral and written instructions.

Skill in the use and care of tools, equipment and materials utilized in the operation and maintenance of a lime production plant.

NEW 10-76

#### Nature Of Work

## W & S Evaluation & Review Specialist (005862)

### Minimum Qualifications

High school. Three years of experience in the inspection of water and sewer lines to include the operation of video equipment are required. Must possess a Class B with a tanker endorsement.

### Job Specifications

#### NATURE OF WORK

This is advanced technical work in the review of inspection sewer videos produced by a mobile closed circuit television unit in a Miami-Dade Water & Sewer facility.

Employees in this class review digital videos produced by a team of employees conducting internal inspections of sewer lines. Emphasis of the work is on identifying and evaluating defects which allow water infiltration or exfiltration, determining the most cost effective method of repair required and referring to appropriate personnel for repairs. Supervision is received from a technical superior who sets work priorities and confers on work problems.

#### ILLUSTRATIVE TASKS

Operates television and computer network in reviewing CD or downloaded videos to identify defects in sewer lines; reviews for information concerning sewer conditions including weather at the time of televising, pump station number, manhole numbers, and specific description of the location.

Evaluates each identified defect and determines the method of repair required based on the severity of defect or line segment and economical factors; enter findings into database.

Issues repairs to in-house forces or construction management based on the method of repair required such as pipe replacement, cured in-place liners, fold and form liners, point repairs, robotic point repairs, sectional repairs or grouting; updates database with repair completion dates.

Verifies accuracy and audits sewer system inventory by comparing information received from various methods of inspection such as smoke testing, manhole or TV inspection; atlases and databases.

Performs field surveys noting surface composition such as asphalt, concrete restoration, curb and gutter and driveways; elevation and approximate estimates of water tables; ground composition such as clay or sand; and impediments to construction such as trees, foliage, overhead utilities or structures and noting known crossings of underground facilities and photographing pertinent surface conditions.

Performs related work as necessary.

#### KNOWLEDGES, SKILLS AND ABILITIES

Knowledge of the types and properties of sewers and construction.

Knowledge of sewer layouts and water flow characteristics.

Knowledge of methods, practices, techniques, materials, tools and equipment employed in detecting and correcting water infiltration into sewer lines.

Knowledge of sewer inspection, maintenance and repair procedures.

Ability to read and interpret maps, blueprints, schematics and plans.

Ability to establish and maintain effective working relationships with employees and supervisors.

## Human Resources Department

---

### W & S Evaluation & Review Specialist (005862)

This is advanced technical work in the review of inspection sewer videos produced by a mobile closed circuit television unit in a Miami-Dade Water & Sewer facility.

### W & S Valve Exercise Technician (005866)

#### Minimum Qualifications

High school diploma or GED. One year of experience working with water distribution systems is required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the exercise of valves in the water distribution system to ensure valves are operable.

Employees in this class monitor the proper exercise of valves in the water distribution system. Responsibilities include monitoring and assisting semi-skilled workers in the valve exercise process, reviewing atlas pages, and field verification and measurement of valve coordinates; confirming and entering all data associated with exercising valves and requesting GIS updates; completion of works orders and entering work orders, time booked and vehicle usage into the Enterprise Asset Management Systems (EAMS) on a daily basis; and generating work orders for items needing attention or repair such as missing and buried valve boxes and broken valves. Work is generally performed independently in the field, but receives supervision from a technical superior who evaluates quality of work through observation, and measures quantity of work through review of reports submitted.

##### ILLUSTRATIVE TASKS

Instructs, monitors and assists subordinates in the valve exercising process; ensures daily production quota of valves exercised is met.

Completes works orders, books time, labor and vehicle usage daily into the EAMS using a laptop computer.

Confirms and enters all data associated with exercising valves daily and requests GIS updates.

Reviews atlas pages; performs field verification and measures all coordinates for each valve.

Generates works orders for items that need attention or repair such as missing and buried valves boxes and broken valves.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the principles and practices applicable to the maintenance of a water distribution system.

Knowledge of the methods, practices and techniques used in the exercise of valves.

Knowledge of computers and data management systems used by the department.

Knowledge of the occupational hazards and safety precautions of the work.

Ability to work independently in the field.

Ability to supervise work of a small crew effectively.

Ability to establish and maintain effective working relationships with employees and supervisors.

Ability to keep records and prepare reports on work accomplished.

Ability to read atlas pages.

### W & S Sewer Lateral Repairer (005867)

#### Minimum Qualifications

High school. One year of experience in maintenance repair work or assisting in the maintenance and repair of sewer lines is required. Must possess a Commercial Drivers/Class B license with a tanker endorsement.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the inspection, cleaning and repair of laterals in the County sewer system.

Employees in this class are responsible for investigating customer complaints pertaining to the sewer system, sewer backups, and infiltration and leaks through flow meter monitoring, sewer line televising and visual inspection. Duties include grouting and cleaning sewer lines as necessary, conducting smoke bomb tests to detect leaks and illegally connected storm drains, and completing required job orders and reports. Supervision is received from a field supervisor who reviews work occasionally in progress and upon completion for satisfactory inspection, cleaning and repair of laterals.

##### ILLUSTRATIVE TASKS

Locates sewer laterals; inspects sewer laterals and mains using a TV truck; grouts and cleans sewer lines as necessary.

Installs flow meters in manhole inverts and pump stations; monitors flow using remote equipment or by reading flow meter charts.

Visually inspects storm drain catch basins.

Conducts smoke bomb tests to detect leaks and illegally connected storm drains.

Performs manhole investigations to check for infiltration in County sewer lines.

Conducts field investigations of customer complaints concerning the sewer system or sewer backups; notifies property owners when leaks are found in private lines.

Performs dye tests to verify if customer is connected to the County sewer system.

Clears lateral stoppages using snakes with appropriate headers such as root or grease cutters.

Completes job orders, work tickets and unscheduled maintenance reports.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the types and properties of sewer line construction, sewer layouts, gases encountered, and water flow characteristics.

Knowledge of the methods, practices and techniques used in clearing sewer blockages in sewers and laterals.

Knowledge of the methods, practices and techniques used in detecting and correcting water infiltration into sewer lines.

Knowledge of pump station operations.

Knowledge of the performance of various pipe materials under a wide variety of conditions.

Knowledge of the practices, methods and materials used in the maintenance and repair of sewer laterals.

Knowledge of sewer inspection and maintenance practices.

Knowledge of basic plumbing techniques applicable to working on sewers and laterals.

Knowledge of the occupational hazards and safety precautions of the work.

Ability to locate sewer laterals.

Ability to determine the proper chemical mixture and set-up time for grouting operations.

Ability to operate a video camera viewer and audio visual recorder.

Ability to prepare accurate records indicating conditions of sewer lines.

Ability to operate sewer jetters and vactors.

Ability to interpret flow isolation information.

Ability to understand and follow verbal and written instructions.

Ability to read and interpret sketches, blueprints and diagrams.

#### **Nature Of Work**

This is skilled work in the inspection, cleaning and repair of laterals in the County sewer system.

### W & S Structural Maintenance Worker (005872)

#### Minimum Qualifications

High school diploma or GED. Three years of skilled experience in general building maintenance to include one year of experience in masonry, painting, or carpentry are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the construction, repair, maintenance and industrial painting of water and sewer structures, fixtures and equipment.

Employees in this class are responsible for performing skilled carpentry, industrial painting, masonry tasks and general building maintenance in accordance with standard trade practices. Work involves construction, repair, maintenance and industrial painting to water and sewer plants and related stations, tanks, elevated towers, pumps, motors and related equipment. Supervision is received from a technical or administrative superior who periodically inspects work in progress and reviews completion for satisfactory application of skills and for adherence to job specifications.

##### ILLUSTRATIVE TASKS

Prepares surfaces to be painted using sandblasters, beadblasters, pressure cleaners, steam cleaners, electric and air-powered sanders, grinders and chisels, toxic chemicals and industrial cleaning agents.

Applies paints, stains, varnishes, shellac, lacquer, bituminous, chlorinated rubber, primer, fiberglass, epoxies and other industrial type coatings to buildings, structures and elevated towers above ground, wet and dry wells below ground, and the inside of enclosed tanks, often using scaffolding, extension ladders, hanging basin chairs, extension planks, pikes, ladder jacks, swinging stage and other erection and hanging devices.

Performs carpentry work in the construction, remodeling, alteration and maintenance of water and sewer facilities; installs doors, windows, partitions and drop ceilings; constructs and repairs cabinets, furniture and shelving; builds forms, repairs roofs and floors.

Lays bricks and concrete blocks; applies and trims mortar; constructs and tests forms in preparation for pouring cement; assists in pouring large quantities of concrete for foundations and reinforcements; applies cement grout to patch surfaces; mixes mortar; floats and screeds on poured concrete to secure specified finish; operates vibrators or rotary finishers.

Performs general building maintenance such as replacing light bulbs and performing minor plumbing repairs.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the masonry trade including stone work, plastering, cement finishing and tile setting.

Considerable knowledge of the standard practices, methods, tools and materials of the carpentry trade.

Considerable knowledge of the standard practices, methods, tools and materials of the painting trade.

Considerable knowledge of the occupational hazards and safety precautions of the painting, carpentry and masonry trades.

Ability to read and interpret blueprints, sketches and drawings.

Ability to operate a variety of equipment used in the painting, carpentry and masonry trades.

Skill in carpentry.

Skill in the operation of carpentry tools and equipment.

Skill in masonry.

Skill in the manipulation and operation of masonry tools and equipment.

Skill in painting.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, maintenance and repair of refrigeration equipment for the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for servicing air conditioning systems and units, cold storage plants, refrigerators, water cooling systems and related equipment utilized in a wide variety of water & sewer facilities and buildings. Employees work independently using handtools, power tools and various precision measuring and testing instruments. Assignments may be in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning equipment. Work is reviewed by a maintenance supervisor who inspects work occasionally in progress and upon completion for compliance with instructions and for satisfactory operation of equipment repaired, installed or maintained.

##### ILLUSTRATIVE TASKS

Overhauls and services refrigeration units by repairing, replacing or adjusting worn or broken parts on condensers, compressors and water and vacuum pumps; tests refrigeration equipment for refrigerant leaks.

Repairs or adjusts valves, piping connections, fittings and couplings by bolting, riveting, welding, soldering and brazing, using hand tools, acetylene torch, prestolite torch and drill press.

Removes motors and pumps, replaces shafts and bearings, repacks and reinstalls; replaces, repairs and recalibrates thermostats and humidistats; adjusts expansion valves; adjusts or changes belts; replaces gaskets, hinges and hardware.

Sets airflow controls to suit occupants by adjusting splitters, dampers, diffusers and fan speeds; removes, cleans and replaces strainers and filters; rebuilds, repairs and paints wood and metal cooling towers and fans; adds appropriate chemicals to water towers to prevent rust and corrosion.

Starts equipment, observes operation and reads gauges and instruments such as volt-ohm meters; determines temperature, velocity and humidity factors using air and water temperature gauges; adjusts mechanisms such as valves, controls and pumps to control level of fluid, pressure and temperature; bleeds contaminants from system and charges with specified amount and type of refrigerant; checks gauges and makes periodic preventive maintenance inspections.

Assists supervisor in planning modifications and new installation projects, preparation of specifications, and in major overhauling and reconditioning jobs utilizing blueprints, engineering specifications and knowledge of refrigerant systems.

Maintains simple job records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the practices, methods, materials, test instruments and tools commonly utilized in the repair and service of various types of refrigeration equipment.

Considerable knowledge of the mechanical operation and repair characteristics of various kinds of refrigeration equipment.

Considerable knowledge of the occupational hazards and safety precautions of the work.

Knowledge of the principles of mechanics.

Ability to detect defects in machinery and to make the necessary repairs or adjustments.

Ability to work from verbal or written instructions, simple diagrams and sketches.

Skill in the care and use of tools and equipment essential for the repair of food, water and air refrigerating equipment.

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, alteration, maintenance and repair of electrical systems, equipment and fixtures at the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for performing skilled electrical tasks in accordance with standard electrical trade practices. Duties include working independently with considerable latitude in determining methods of work, and using specialized tools and testing instruments of the electrical trade. Assignments may be verbal or consist of sketches, blueprints and electrical diagrams. Employees are frequently assisted by various skilled and unskilled trades helpers who assist in various phases of electrical work. Supervision is received from a technical or administrative superior who inspects work upon completion for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Maintains and repairs sterilizers, heaters, fans, floor scrubbers, circulating pumps, electric pumps and other pumps used in water treatment plants; installs, repairs and maintains motors, generators, switch gears, motor controls and other electrical equipment used in sewer treatment plants.

Installs, repairs and replaces electrical conduit, electrical wire, transformers, switches, electrical panels, fixtures and other electrical equipment for buildings, security and area lighting.

Repairs motors, flasher units, time clocks, relays, switches, control boxes and fuse boxes.

Locates and corrects power failures and motor trouble on electrically operated machinery, apparatus and systems.

Occasionally performs electrical work on refrigeration equipment; repairs, reconditions, modifies, replaces and installs equipment to refrigerate air and water.

Performs electrical work on moveable bridges such as repairing electrical motors and controllers, installing traffic warning and gate lights, installing and repairing switch panels, lights and electrical circuits, and replacing worn-out conduit and wire.

Reads and interprets sketches, blueprints and electrical diagrams.

Observes established safety practices and procedures applicable to the electrical trade.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the electrical trade.

Considerable knowledge of the principles and theory of electricity.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work on high voltage electrical systems and equipment.

Knowledge of blueprints and electrical diagrams.

Knowledge of local electrical codes effective in the County.

Ability to install, repair, maintain and alter a variety of electrical equipment and systems.

Ability to follow verbal and written instructions.

Ability to read and interpret blueprints, sketches and electrical diagrams.

Skill in the care and use of standard tools, equipment and testing instruments of the electrical trade.

Skill in the diagnosis of electrical malfunctions.

Skill in the electrical trade.

#### Minimum Qualifications

Eighth grade. Must possess a current valid Miami-Dade County Certificate of Competency as a Journeyman Plumber. Must possess a Driver license and own hand tools.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, maintenance and repair of plumbing systems, fixtures and accessories.

Employees in this class are responsible for performing skilled plumbing tasks in accordance with standard trade practices. Duties include determining work methods and required materials, cutting and installing pipes, performing a variety of plumbing repair and maintenance tasks, and utilizing specialized tools and testing instruments of the plumbing trade. Assignments may be verbal or consist of blueprints, sketches or diagrams. Employees are frequently assisted by various skilled and unskilled trades helpers who assist in various phases of plumbing work. Supervision is received from a technical or administrative superior who periodically inspects work in progress and upon completion for satisfactory performance of equipment, compliance with job specifications and adherence to applicable codes and regulations.

##### ILLUSTRATIVE TASKS

Cuts openings in walls for pipes; bends pipes to needed contours; cuts, reams and threads pipe; cuts and installs pvc pipe and polyethylene tubing to specifications.

Installs, maintains and repairs valves, faucets, bathtubs, sinks, lavatories, sewers, vents, drinking fountains, water heaters and other fixtures.

Installs irrigation systems including pumps, pressure tanks, sprinklers, sprinkler controls and connectors.

Pours molten solder over joints and spreads and tapers solder.

Maintains piping systems by opening clogged drains with plungers or other devices; snakes-out pipes and fixtures; replaces washers on leaky faucets; tests for leaks by filling pipe with water under pressure and checking fall pressure with gauges.

Installs pipe and hoses on fire trucks, spray trucks and other specialized equipment and apparatus.

Repairs, replaces and checks high and low pressure steam boilers; blows down and flushes boilers; checks, repairs and replaces safety devices and controls as necessary; flushes and cleans boilers, storage and return tanks, hot water heaters and similar equipment.

Reads and interprets blueprints, sketches and diagrams.

Prepares estimates of time and materials required for plumbing assignments.

Observes established safety practices and procedures.

Operates and uses specialized plumbing tools and equipment such as ratchet cutters, reamers, electric and gasoline powered sewer snakes, pipe wrenches, chain wrenches and pipe vices.

Assigns tasks to various skilled and unskilled helpers assisting in various phases of plumbing work.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the plumbing trade.

Considerable knowledge of the flows, pressures and capacities of water tanks and lines.

Considerable knowledge of applicable local plumbing codes effective in the county.

Considerable knowledge of the occupational hazards and safety precautions of the plumbing trade.

Knowledge of blueprints and plumbing diagrams.

Ability to install, repair and maintain plumbing systems, fixtures and accessories.

Ability to locate defects in plumbing fixtures, systems and equipment.

Ability to follow verbal and written instructions.

Ability to read and interpret blueprints, sketches and diagrams.

Ability to prepare time and material estimates for plumbing assignments.

Skill in the care and use of standard tools, equipment and testing devices of the plumbing trade.

Skill in the diagnosis of plumbing malfunctions.

Skill in the plumbing trade.

### W & S Engineering Survey Technician 1 (005888)

#### Minimum Qualifications

High school diploma or GED. One year of land surveying field experience is required. Must possess a valid State of Florida Driver's License.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled technical work assisting on surveying and engineering field projects.

Employees in this class are responsible for utilizing simple engineering and surveying practices in the performance of sub-professional work on engineering field projects. While little independent judgment or action is required, employees are assigned progressively more difficult tasks as experience is gained. Assignments are generally accompanied by specific instructions until routines are thoroughly mastered. Supervision is received from a technical superior who reviews work for compliance with instructions and established procedures.

##### ILLUSTRATIVE TASKS

Serves as a rod-person on a topographic survey crew; operates measuring tapes, chains, rules and rods; sets up range rods, stackers, tripods, targets and prisms; sets up traffic cones and barricades as directed.

Cuts brush and clears line with machetes, axes, chain saws and brush cutters.

Sets nails, spikes, stakes, pipes and sign posts with hammers, mauls, sledge hammers and drivers.

Digs holes with shovels, picks and digging bars.

Opens manholes and measures pipe sizes and inverts.

Operates various leveling rods.

Serves as rod-person and general aide in hydrographic surveys; obtains soundings from small boats.

Works inside ditches and trenches measuring pipes and fittings.

Maintains hand tools and surveying equipment; keeps work trucks stocked and clean.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Some knowledge of simple surveying and engineering instruments, equipment and practices.

Ability to understand and follow verbal and written instructions.

Ability to obtain a State of Florida Driver's License.

Physical strength and agility sufficient to perform assigned duties.

#### Nature Of Work

This is semi-skilled technical work assisting on surveying and engineering field projects.

### W & S Engineering Survey Technician 2 (005889)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in survey work to include one year of experience as rod person or instrument person are required. Must possess Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work assisting on surveying and engineering field projects.

Employees in this class are responsible for performing the duties of an instrument person using surveying instruments in topographic or hydrographic field surveys. Work assignments are received accompanied by detailed written or verbal instructions. Incumbents have more responsibility for work methods and greater opportunity to use independent judgment than in the next lower class. Work may include directing Engineering Surveying Technician 1 in the performance of their duties. Supervision is received from a technical superior who reviews work for satisfactory application of surveying skills and compliance with instructions and procedures.

##### ILLUSTRATIVE TASKS

Sets up, adjusts and operates a transit/theodolite and electronic measuring device to locate and establish lines, points and angles, and establish the correlation of surface features with each other by angles, elevations and distances.

Sets up, adjusts and operates a level and electronic device to obtain or establish elevations of surface features and waterways.

Directs Engineering Surveying Tech 1's in the performance of surveying duties, as required.

Prepares drawings from field notes, reduces field notes, and makes simple computations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the techniques and practices of field surveying.

Knowledge of the use of modern surveying instruments.

Knowledge of mathematics through trigonometry.

Some knowledge of general construction principles and practices.

Ability to understand and follow verbal and written instructions.

Ability to make simple surveying computations quickly and accurately.

Ability to read and interpret specifications, maps and technical drawings.

Ability to obtain a State of Florida Driver's License.

Ability to prepare drawings from field work neatly and accurately.

Skill in the use of surveying instruments.

Physical strength and agility sufficient to perform assigned duties.

## Human Resources Department

### W & S Engineering Survey Technician 2 (005889)

REV 08-02

#### **Nature Of Work**

This is skilled technical work assisting on surveying and engineering field projects.

The written examination will evaluate techniques and practices of field surveying, use of modern surveying instruments, mathematics through geometry, general construction principles and practices, simple surveying computations, and the ability to follow written instructions.

Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of 1/2 point per year of continuous, full-time service in the County service to a maximum credit of ten years of service or five points. Applicants requesting Veterans' preference must submit Veterans' preference documents at the time of application. Preference will be given to veterans and spouses of veterans when applicable. Those claiming this preference must submit documentation of eligibility for preference, such as a copy of a DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility from the armed force(s) (Army, Navy, Air Force, Marine Corps, and/or Coast Guard of the United States). The DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility documents must include wartime dates of service and an honorable discharge. In addition to the DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility, those who are claiming preference as a disabled veteran must provide a recent letter (within one year) from the Department of Veteran's Affairs or Department of Defense stating the percentage of their service-connected disability. All veterans are required to complete a Veteran's Preference Claim Form at the time of application. Photo identification is required at the time of application. Applicants must apply in person. Employment applications accepted at the Employment Customer Service Center, 140 West Flagler Street, Suite 105, Miami, Florida from Monday, March 26, 2007 through Monday, April 9, 2007, 8:30 a.m. to 4:00 p.m., Monday through Friday. Location of examination: Stephen P. Clark Center, 111 NW 1st Street, 18th Floor, Room 18-3, Miami, Florida, 33128-1996. Date of examination: Tuesday, May 1, 2007. Registration time: 8:30 a.m. until 8:45 a.m. Doors to the test facility will be closed promptly at 8:45 a.m. No one will be admitted for registration after the doors to the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination.

### W & S Projects Inspector 1 (005895)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the inspection of water and sewer utilities projects or related public works structures OR five years of experience in the installation and repair of water and sewer utilities are required. Completion of coursework in Civil Engineering, Architectural Engineering, Engineering Technology, Construction Management or related field may substitute for the required experience on a month-for-month basis to a maximum of one year. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is technical work monitoring the work of contractors engaged in construction projects for the Miami-Dade Water and Sewer Department.

Employees in this class are responsible for inspecting a variety of water and sewer construction projects. Responsibilities include reviewing projects for compliance with approved plans and specifications; troubleshooting for any design conflicts and informing the appropriate personnel; coordinating with state and local municipal agencies to ensure compliance with local and state standards; investigating and responding to complaints from the general public; preparing daily reports of the progress of multiple projects; issuing citations to contractors for non-compliance and assisting department locators with any conflicts with contractors regarding the Sunshine State regulations. Other responsibilities include verification of materials and permits; relaying field changes to supervisors and creating thorough punch lists of items; interpreting plans and reviewing post construction documents and as-built drawings for accuracy and participating in pre-construction and performance meetings. Supervision is received from a technical superior who reviews work for effective inspections of water and sewer construction projects through all phases of the construction process.

##### ILLUSTRATIVE TASKS

Inspects all phases of the construction of water and sewer facilities, lift stations, pipelines, and sewer collection systems for new constructions and rehabilitations to include site work, concrete, masonry, metals, thermals and moisture protection, doors and windows, finishes, mechanical and electrical equipment for compliance with the South Florida Building Code, Dade County Public Works Department Standards and Department of Transportation Standards.

Reviews and ensures compliance with approved plans and specifications; troubleshoots for any design conflicts that may arise during construction and notifies appropriate personnel; coordinates with state and local municipal agencies to ensure compliance with local and state standards.

Investigates and responds to complaints from the general public; provides information on county policies and objectives.

Monitors the progress of multiple on-going jobs and prepares daily reports which can be used to defend the county from potential disputes.

Issues citations to contractors in non-compliance with county regulations and procedures; assists departmental locators with any conflicts with contractors regarding the Sunshine State regulations.

Verifies all materials such as pipes, prefabricated structures, electrical cabinets for compliance with approved shop drawings; checks for appropriate permits for such things as dewatering, excavation, electrical, and maintenance of traffic prior to the start of the project; relays field changes and unforeseen field conditions to supervisors; creates a thorough punch list of items that must be addressed before project completion.

Interprets plans to ensure proper elevation, stationing and maintains redline drawings during the course of the project; reviews post construction documents and as-built drawings for accuracy and conformity to departmental standards and specifications.

Participates in pre-construction and performance meetings; communicates with other departmental sections such as sewage collection, water distribution and lift station personnel to coordinate the shut down of existing facilities for interconnection to newly complete work and for

### W & S Projects Inspector 1 (005895)

final acceptance of the project; monitors lime rock road densities or any other tests specified as needed.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the principles, practices, methods, and materials of engineering construction work.

Knowledge of the content and meaning of construction plans and specifications.

Knowledge of the principles, practices, and methods of paving and drainage construction.

Knowledge of the design characteristics of a variety of water and sewer utility structures and related facilities.

Knowledge of the records, reports, and forms required in utility construction projects.

Knowledge of the techniques and practices of field surveying.

Knowledge of building codes and regulations pertaining to construction of water and sewer facilities.

Ability to perform detailed technical inspections of water and sewer construction projects.

Ability to read and interpret construction plans, blueprints, and specifications.

Ability to operate basic surveying instruments.

Ability to determine if construction projects are in compliance with construction plans and specifications, and local building codes and regulations.

Ability to review and prepare forms and reports, and maintain records related to water and sewer construction projects.

Skill in the use of basic surveying instruments.

#### NATURE OF WORK

This is advanced technical work with supervisory responsibility in engineering construction inspection for the Miami-Dade Water and Sewer Department.

Employees in this class are responsible for assisting and supervising subordinate construction inspectors in the inspection of a variety of water and sewer construction projects. Responsibilities include providing advanced technical assistance to construction inspectors, reviewing payment estimates, reviewing reports prepared by construction inspectors, confirming layouts and grades of structures, investigating complaints and requests, and ensuring compliance of contractors with contract plans and specifications. Incumbents exercise independent judgment in the application of construction inspection methods and techniques to the inspection of large and complex water and sewer construction projects. Supervision is exercised over a staff of construction inspectors engaged in monitoring construction activities for compliance with plans and specifications. Supervision is received from a technical superior who reviews work for effective inspections of water and sewer construction projects through all phases of the construction process.

#### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of subordinate construction inspectors engaged in monitoring contractors engaged in construction of pipelines, buildings, and related water and sewer facilities.

Provides advanced technical assistance in the construction inspection process and in coordination of various structural projects; attends pre-construction meetings.

Reviews payment estimates submitted for payment by construction inspectors.

Ensures compliance of contractors with plans and specifications for a variety of large and complex water and sewer construction projects.

Inspects construction projects and reviews preparation of list of deficiencies, inspection reports, field book entries, and mileage and vehicle reports.

Reviews interpretations of County plans and specifications by subordinate construction inspectors; confirms layouts and grades of structures.

Investigates complaints and requests concerning construction projects or construction inspections.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the principles, practices, methods, and materials of engineering construction work.

Knowledge of the content and meaning of construction plans and specifications.

Knowledge of the principles, practices, and methods of paving and drainage construction.

Knowledge of the design characteristics of a variety of water and sewer utility structures and related facilities.

Knowledge of supervisory principles and practices.

Knowledge of the records, reports, and forms required in utility construction projects.

Knowledge of the techniques and practices of field surveying.

Knowledge of building codes and regulations pertaining to construction of water and sewer facilities.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to direct and perform detailed technical inspections of water and sewer construction projects.

Ability to read and interpret construction plans, blueprints, and specifications.

Ability to operate basic surveying instruments.

Ability to determine if construction projects are in compliance with construction plans and specifications, and local building codes and

### Utility Inventory Specialist (005901)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in diversified buying activities or inventory control and data processing are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is specialized work in the classification of stock, computerized entry of stock information and conduct of physical inventories for a water and sewer utility.

An employee in this class is responsible for planning, coordinating and implementing methods and procedures for the control of stock classification and conduct of physical inventories in a geographically dispersed departmental warehousing operation with numerous locations. Duties include the coordination of stock classifications with federal stock numbers, development and implementation of a computerized inventory control system, and supervision of departmentwide physical inventories. Supervision may be exercised over a staff of specialized and clerical employees through assignment and review of work and provision of assistance with difficult or unusual problems. Supervision is received from an administrative superior who reviews work for achievement of desired results and compliance with established standards.

##### ILLUSTRATIVE TASKS

Develops and implements a computerized inventory control system for a large variety of chemicals, parts, materials, tools, supplies and equipment.

Develops, implements and evaluates methods and procedures for classification, input and inventory of an extensive inventory of utility supply items.

Coordinates the assignment of new stock codes with a central data processing operation in order to produce catalogs and labels for distribution.

Contacts vendors in order to correct item descriptions and assign proper federal stock identification numbers.

Coordinates related stock and codes through a computerized inventory control system.

Confers with maintenance and operations supervisors concerning necessary equipment and supplies.

Coordinates and supervises departmentwide physical inventories; recommends the number of employees required to complete pre-inventory, inventory and post-inventory; monitors the stock levels of supply facilities.

Plans, assigns and reveiws the work of specialized and clerical employees engaged in the classification of stock, computerized entry of stock information and conduct of physical inventories.

Trains employees in stock classification, computerized entry and inventory procedures.

Advise supervisors and technical employees of problems in classifying and in computer entry of stock.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of computerized purchasing and inventory control systems.

Considerable knowledge of federal stock numbering and of the federal stock classification system.

Considerable knowledge of warehousing operations, and policies and procedures of a public water and sewer utility.

Considerable knowledge of inventory control and records keeping procedures.

Knowledge of supervisory principles and practices.

Knowledge of simple data processing and transmission principles utilized in computerized information systems.

Knowledge of a wide variety of specialized commodity groupings such as chemicals, mechanical parts, heavy machines, electrical components and automotive parts.

Ability to plan, assign and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to develop and implement a computerized inventory control system for a large variety of utility supply items.

Ability to develop, implement and evaluate methods and procedures for classification, input and inventory of utility supply items.

Ability to operate a computer terminal with moderate speed and a high degree of accuracy.

### W & S Employee Safety & Development Instructor (005902)

#### Minimum Qualifications

Bachelor's degree in Adult Education, Education, Human Resources, Instructional Design, or related field. One year of professional experience in developing and facilitating training programs to include safety training is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional work with some administrative responsibility in the development, administration and evaluation of diversified in-service training programs for the Miami-Dade Water & Sewer Department

Employees in this class are responsible for planning, implementing, supervising and evaluating varied training programs for the Water & Sewer Department. Responsibilities include consulting with supervisors to determine their training needs and priorities, evaluating on-going programs, recommending additional training activities to supervisors and management, planning development of new or revision of existing programs, and maintaining contact with various community educational resources and programs, as well as centralized county training activities. Emphasis of the work is on administering training in a variety of technical and theoretical fields related to the work of the department. Supervision is received from an administrative or professional superior who reviews program activities for timely progress and quality of results in meeting management goals and objectives for training.

##### ILLUSTRATIVE TASKS

Consults with management and supervisors to determine current training needs and relative priorities; specifies additional training needs observed in contacts within the department; advises on methods and programs to meet new training objectives.

Plans new training courses or revisions in existing courses within the department; supervises the compilation of materials including course outlines, lesson plans, and training aids; researches, edits and develops training materials for use in specific programs.

Participates in selected in-service training by conducting formal sessions or seminars; assists the supervisory staff in training methods and techniques in the conduct of sessions; advises supervisors in the systematic planning and conduct of on-the-job training.

Promotes specialized training courses related to hazardous materials and conditions; consults with the department's Safety Officer to ensure training provided complies with any applicable OSHA and departmental policies, regulations and procedures.

Evaluates training programs in progress or upon completion to determine effectiveness of training efforts in relation to departmental needs; discusses evaluation findings with management and confers on the best approach to improvements in training where needed.

Maintains resource library materials, training aids and equipment; orders training materials; supervises the scheduling of departmental personnel in training programs and the maintenance of related records; maintains a database of training activity and produces reports for management.

Keeps informed on current bibliographic and other published information in various training fields.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of general adult educational theories and principles.

Considerable knowledge of local educational resources and sources of available information useful in planning of departmental training programs.

Considerable knowledge of departmental organization and operations in relation to requirements for effective training.

Considerable knowledge of the planning and conduct of training programs in diversified fields.

##### NATURE OF WORK

This is supervisory work in customer service and public contact for the county water and sewer utility.

Employees in this class plan, assign and supervise the work of subordinate specialized, technical and clerical employees engaged in the activities of either a district office, customer relations, customer service, new business, meter reading, collection, distribution or field unit. Responsibilities include handling the more complex customer complaints, conducting field investigations, determining special service requirements, coordinating assigned functions with other customer service units, preparing and evaluating work standards and supervising the maintenance of computerized customer service records. Incumbents exercise some independent judgment in the interpretation and application of departmental policies, rules, regulations and procedures. Supervision is exercised over a staff of employees through assignment and review of work and provision of assistance with difficult problems. Supervision is received from an administrative superior who reviews work for attainment of desired objectives through conferences, observations and written reports.

##### ILLUSTRATIVE TASKS

Supervises and participates in the activities of either a district office, customer relations, customer service, new business, meter reading, collection, distribution or field unit.

Conducts field investigations to resolve difficult or unusual customer complaints and service problems; assists in the investigation of commercial and industrial customers to determine special service requirements; prepares correspondence and reports of investigative findings and results.

Prepares and evaluates work standards to ascertain efficiency levels and compliance with priority schedules; recommends changes in procedures, staffing and management systems; prepares work schedules, training materials and procedural manuals.

Reviews records and reports prepared by subordinates for accuracy and completeness; supervises the maintenance of a computerized customer service records control system; confers with supervisory and technical employees concerning data processing problems.

Assists customers who have not received satisfaction from subordinates; interprets and explains departmental rules and regulations for customers; determines if water service being provided coincides with established policies and procedures.

Coordinates assigned functions such as the installation of new service, collection of service fees, handling of customer complaints, reading of meters, preparation and issuance of work orders, or connect and disconnect of service with other customer service units.

Prepares plans for new meter reading routes in connection with the extension of water service to new areas, or the addition of a significant number of meters within established residential areas.

Supervises the processing of applications for new water service; obtains necessary preliminary information; requests site plans and subdivision layouts from customers.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of utility department rates, credit procedures and billing practices.

Considerable knowledge of departmental rules, regulations and policies related to customer service activities.

Considerable knowledge of factors involved in providing new or modified water service to prospective residential and commercial customers.

Knowledge of existing distribution facilities of the department.

Knowledge of supervisory principles and practices.

##### NATURE OF WORK

This is administrative and supervisory work in the management of the Miami-Dade Water & Sewer Department's 24 hour Emergency Communication Center.

An employee in this class is responsible for supervising, planning, assigning and reviewing the daily work of subordinate specialized and clerical employees engaged in SCADA monitoring, dispatch and support services, through subordinate supervisors. Responsibilities include facilitating and coordinating customer service activities to include coordinating field investigations, evaluating work standards and supervising the maintenance of computerized department service records; investigating and resolving more difficult customer complaints and service problems to include determining special dispute requirements; reviewing the adequacy of staffing levels and overseeing the training of subordinates in specialized communication procedures and protocols; and interpreting operating data and instituting modifications in operational procedures to assure continuous and efficient operations. Employees exercise some independent judgment in interpreting operating data and instituting modifications in operational procedures to assure continuous and efficient operations. Supervision is exercised over a staff of employees through assignment and review of work and provision of assistance with difficult problems. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory completion of assigned responsibilities and who holds the incumbent responsible for the effective supervision of the Emergency Communication Center.

##### ILLUSTRATIVE TASKS

Supervises, plans, assigns and reviews the work of a staff of supervisory, specialized and clerical employees engaged in SCADA monitoring, dispatch and support service activities.

Assists internal and external customers and the general public regarding emergency and non-emergency inquiries to the Miami-Dade Water & Sewer Department; provides customers with billing system and computerized enterprise service records information after hours; processes water reconnection credits after hours for delinquent and new service customers and forwards customer billing complaints to the Customer Service Division for further processing.

Reviews the adequacy of staffing levels; develops and monitors training of subordinates in specialized communication procedures and protocols applicable to the area of assignment; ensures the compliance of departmental rules and regulations applicable to a 24 hour call center.

Prepares a variety of correspondence in response to inquiries or complaints from customers, other governmental agencies, municipalities and organizations; presides over administrative hearings regarding customer service.

Receives and resolves the more difficult customer complaints/calls; interprets and explains departmental rules and regulations to customers; determines if the service provided by subordinates is in accordance with Communication Center's policies and procedures.

Investigates employee accidents involving County vehicles and other employee accidents and injuries; prepares and submits required reports and necessary follow-up; investigates billing disputes and provides pertinent information to the Damage and Liability Investigation Unit.

Operates and maintains the 800 MHz radio console for dispatching of complaints, relaying technical data and coordinating radio traffic; transmits group pages using Pagenet to essential departmental personnel to disseminate priority messages.

Documents and monitors SCADA for pump station and plant alarms; operation of pumps, valves and resetting controls as required by field supervisor on duty or after hours on-call staff.

Reports hazards and other emergency matters reported by field staff to police and fire agencies; reports hydrants being repaired, flushed or

### **W & S Communications Center Supervisor (005911)**

out of service to the fire departments; contacts underground utilities for emergency clearances before repair work in the field begins; obtains emergency locations from electric, gas, cable and other utilities when emergency excavations are required; reports areas out of water due to repairs to regulatory agencies and departmental staff; and provides meter personnel with meter locations, meter numbers and set dates from Customer Information System.

Maintains, supports and ensures the functionality of the department's Emergency Backup Communications Center.

Reviews, authorizes payment, and reconciles invoices and statements from county vendors under the Towing and Tire Service Contracts.

Ensures the proper maintenance of computerized enterprise service records, the completion of telephone, radio, and work order logs and phone and complaint statistical reports; completes the Domestic Wastewater Report for sewage overflow notification to regulatory agencies and departmental staff.

Attends management meetings to consult and offer recommendations for policy and procedural changes.

Acts as the department's back-up liaison to the EOC during county-wide emergency activation; collects, reviews, and reports on damage assessment data provided by WASD divisions and sections after natural disasters for FEMA reimbursement.

Maintains Emergency Communication Center Mirra Recording Symposium and ERP Procurement System; updates the 311 web application.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### **KNOWLEDGES, SKILLS AND ABILITIES**

Considerable knowledge of departmental rules, regulations and procedures utilized in the automated radio dispatching of emergency water & sewer personnel.

Considerable knowledge of the operating characteristics of computerized dispatch systems.

Considerable knowledge of dispatch techniques and procedures used in computerized dispatch systems.

Considerable knowledge of the department's Customer Care & Billing - Mobile workforce Management System (CCB/MWM), Supervisory Control and Data Acquisition system (SCADA) and the DOFIN systems.

Knowledge of supervisory principles and practices.

Knowledge of the principles of management, public and business administration and their application to water and sewer communications center operations.

Knowledge of public relations principles.

##### NATURE OF WORK

This is administrative and supervisory work assisting in the management of the Miami-Dade Water & Sewer Department's 24 hour Emergency Call Center.

An employee in this class is responsible for directing and overseeing an assigned shift of employees engaged in answering emergency and non-emergency calls from customers, departmental personnel, the general public and other agencies. Duties include handling the more difficult or complex calls; handling administrative tasks required by the department or various regulatory agencies and interpreting and explaining departmental policies, procedures and service charges. Employees exercise independent judgment in resolving customer complaints by making adjustments to customer's accounts, providing and extending service and assisting in the efficient and effective management of the center. General supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory completion of assigned responsibilities and who holds the incumbent responsible for the effective supervision of their respective shift.

##### ILLUSTRATIVE TASKS

Monitors and supervises the operation of subordinates on an assigned shift through assignment and review of their work; resolves operational problems and assists in the efficient and effective management of the communications center.

Provides substitute emergency and non-emergency dispatching support to field crew personnel; assures public notification of hazardous conditions by posting and submitting supplemental Domestic Waste Water reports to regulatory agencies.

Provides direction and information to departmental customers; establishes water service after-hours; assists in settling customer disputes for sewer call-out services; handles complaints concerning hazardous conditions that may be the responsibility of other departments and/or municipalities; conducts investigations and coordinates assigned functions for field units.

Trains dispatchers in basic and advanced dispatch techniques used to dispatch emergency and non-emergency personnel, revised operational procedures, standardized departmental rules, and regulatory agency notification; develops and recommends teaching aids and materials for on site instruction of employees.

Assists in maintaining contact with upper management, investigative units and the Office of Emergency Management during an emergency activation.

Compiles information for reports concerning the results of inspections and submits findings to supervisors and other departmental personnel.

Maintains logs and updates on-call list for various divisions and sections for the department and other agencies.

Enforces departmental rules, regulations, procedures and agreements with respect to spill notification, on-call repair crews, towing and other repair services.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Organizes and adjusts various dispatch assignments to incorporate special equipment; analyzes and recommends improvements in dispatch procedures and processes, assignments, and radio and data terminal usage.

Assists in retrieving audio data from voice recording system in response to requests for information and to support training and quality control programs.

Incumbents exercise considerable independent judgment in the interpretation and application of departmental policies, rules, regulations and procedures. Supervision is exercised over a staff of employees through assignment and review of work and provision of assistance with difficult problems. Supervision is received from an administrative superior who reviews work for attainment of desired objectives through conferences, observations and written reports.

##### ILLUSTRATIVE TASKS

Supervises and participates in the activities of a centralized communications center.

Plans and directs the work of employees engaged in the receipt and dispatch of emergency and non-emergency service calls and other communication; ensures support services comply with departmental, County, and regulatory policies and procedures; interprets and explains departmental rules and regulations for customers; investigates and resolves more difficult or unusual customer complaints and service problems.

Supervises the issuance of work orders and monitors for completion; facilitates and coordinates customer service activities or connect and disconnect of service with customer service and field units.

Reviews records and reports prepared by subordinates for accuracy and completeness; prepares a variety of correspondence in response to internal and external inquiries; supervises the maintenance of an automated records system; confers with supervisory and technical employees concerning data management needs and problems.

Supervises and facilitates emergency management functions for the department and in conjunction with other County departments and regulatory agencies.

Prepares and evaluates work standards to ascertain efficiency levels and compliance with priority schedules; recommends changes in procedures, staffing and management systems; purchases supplies and equipment; prepares work schedules, training materials and procedural manuals; prepares and administers the communications center's budget.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of radio transmitting communications techniques and procedures applicable to the dispatch of water and sewer mobile units.

## Human Resources Department

### W&S Communications Center Manager (005915)

Considerable knowledge of utility department field operations and maintenance practices.

Considerable knowledge of the records, forms, logs and reports applicable to centralized communications center operations and activities.

Considerable knowledge of applicable laws, regulations, and procedures pertaining to emergency management response, planning, and activities.

Considerable knowledge of departmental rules, regulations and policies related to customer service activities.

Considerable knowledge of maps, atlases, and automated geographic information systems used to identify water and sewer facilities and infrastructure locations.

Knowledge of existing distribution facilities of the department.

Knowledge of supervisory principles and practices.

Knowledge of residential and commercial pipe systems, plumbing fixtures and the operating principles of water meters.

Ability to exercise judgment and discretion in discussing water and sewer complaints and interpreting and explaining departmental procedures with internal and external customers.

Ability to analyze communications and customer service problems and recommend acceptable solutions.

Ability to communicate effectively, verbally and in writing, with field units, other agencies, and the public.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to make necessary investigations and handle complaints.

Ability to establish and maintain effective working relationships with subordinates, superiors, other departmental employees, developers, customers and the public.

This is managerial work in radio communications, customer service, and public contact for the Water and Sewer Department.

## Human Resources Department

### W & S Utilities Collections Manager (005917)

#### Minimum Qualifications

Bachelor's degree in Business Administration, Accounting, Finance or related field. A minimum of two to three years of progressively responsible accounting experience including accounts receivable, billing and collections to include one year at the supervisory level are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced and responsible administrative and supervisory work in the billing and collection of delinquent retail accounts for the county water and sewer utility.

An employee in this class is responsible for supervising the work of subordinates engaged in the billing, reconciliation and maintenance of specialized accounts for volume water and sewer charges, damages committed by contractors, construction projects completed for other entities and septic tank dumping charges. Emphasis of the work is on providing guidance and administrative direction for specialized billing and collection activities. Responsibilities include developing and implementing credit and collection policies and procedures, analysis of accounts to determine acceptable payments, compilation of accounting data, and coordination of activities with other departmental operations. The incumbent exercises considerable independent judgment and professional knowledge of accounting and collection principles and practices. Supervision is exercised over professional and clerical personnel through review of records and reports for adherence to established principles, practices and procedures. General supervision is received from an administrative superior who reviews work for attainment of desired results, operational effectiveness and adherence to departmental standards and policies.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of subordinate professional and clerical employees engaged in specialized billing and collection activities; assists with difficult or unusual problems; provides continuous training in work methods and procedures and in the application of local, state and Federal rules, regulations and laws.

Supervises and participates in the development and installation of new and revised accounting systems; develops and implements billing and collection policies and procedures; recommends changes in existing departmental rules, regulations and policies.

Supervises the determination of account collectibility; determines the percentage and amount for acceptable payments; approves payment schedules and financial arrangements; recommends the disposition of accounts.

Assists internal auditors and outside auditors in the examination of departmental accounting for specialized billing activities; initiates corrective action as a result of audit findings to improve financial operations, statements and controls.

Reviews collection schedules and prepares financial and statistical reports; compiles accounting and financial data for presentation as an expert witness.

Attends various meetings to coordinate special billing and collection activities with other departmental operations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of professional accounting principles and practices, office management, and the development, installation and maintenance of utility billing and collection systems.

Thorough knowledge of departmental rules, regulations and policies related to special billing and collection systems.

Thorough knowledge of the sources of information, accounting techniques and organization of information used in the preparation of fiscal reports, statements, schedules and summaries.

Thorough knowledge of the procedures and techniques used in the preparation of detailed and complex billing and collection documents.

Thorough knowledge of Federal, state and local laws, rules and regulations relating to financial records of the department.

Thorough knowledge of the legal provisions and proceedings which govern the collection of delinquent accounts.

Considerable knowledge of supervisory principles and practices.

Ability to supervise a large staff of professional, administrative and clerical employees in a manner conducive to full performance and high

### Utilities Supply Supervisor 1 (005918)

#### Minimum Qualifications

High school diploma or GED. Two years of warehousing operations experience to include the purchasing or large-scale inventory control of a variety of commodities for a large industrial, commercial, or similar-type of organization are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the purchase, receipt, storage and issuance of commodities for a water and sewer utility warehouse. Employees in this class are responsible for supervision of a warehouse facility stocking plumbing, electrical, carpentry, refrigeration and related building maintenance supplies. Emphasis of the work is on planning, coordinating and implementing procedures for the requisitioning, receiving, storing, issuing and the recording of a large variety of commodities. Duties include coordinating requisitioning activities with central purchasing, maintenance of a computerized inventory control system and monitoring stock levels of the assigned supply facility. Supervision is exercised over a group of specialized and clerical employees through assignment and review of work and provision of assistance with difficult problems. Supervision is received from an administrative superior who reviews work for conformity with departmental policies and procedures and for efficient operation of the warehouse facility.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of subordinate specialized and clerical employees engaged in the purchase, receipt, storage and issuance of a large variety of parts, materials, tools, supplies and equipment.

Develops, implements and evaluates methods and procedures for requisitioning, receiving, storing, issuing and the recording of utility supply items; confers with maintenance and operations supervisors concerning necessary equipment and supplies; coordinates requisitioning activities with central purchasing operation.

Supervises and participates in the maintenance of a computerized inventory control and records keeping system; monitors stock levels of assigned supply facility; plans and implements storage and precautionary methods to protect stock from loss, damage or deterioration.

Initiates purchase requests; contacts vendors for competitive bid quotations; determines best method of purchase and lowest bidders and advises supervisor of problems in requisitioning and obtaining goods.

Confers with central purchasing employees, department officials and vendors concerning purchase requests, delivery schedules, damaged goods, incorrect deliveries and billing.

Consults with manufacturer's representatives concerning stock planning, equipment modifications, parts interchangeability and requisitioning procedures; coordinates activities with vendors and suppliers to assure optimum service and delivery.

Verifies receipt and issuance of supplies; approves invoices for payments; prepares routine and special reports concerning distribution activities and related matters.

Trains subordinates in purchasing, distribution and inventory procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of departmental policies and procedures concerning the purchase, receipt, storage and issuance of various commodities including parts, materials, tools and equipment.

Considerable knowledge of computerized purchasing and inventory control systems.

Considerable knowledge of inventory control and records keeping procedures.

Knowledge of supervisory principles and practices.

Knowledge of simple data processing and transmission principles utilized in computerized information systems.

Knowledge of centralized purchasing methods and procedures.

Knowledge of specifications, grades, qualities, supply sources and market factors of commodity categories in area of assignment.

### Utilities Supply Supervisor 1 (005918)

Ability to plan, assign and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to develop and implement warehousing and purchasing operational policies and procedures.

Ability to maintain accurate procurement and inventory records.

Ability to analyze and review a large volume of procurement requests on a timely basis.

Ability to manage a utility warehouse operation in an efficient and effective manner.

Ability to determine the types, sizes, grades and quantities of a variety of utility equipment and goods.

Ability to establish and maintain effective working relationships with vendors, manufacturers, subordinates, superiors and purchasing officials.

Ability to communicate clearly and concisely, verbally and in writing.

### W & S Paving Cost Estimator (005920)

#### Minimum Qualifications

Bachelor's degree. One year of professional experience in the preparation of construction cost estimates is required.

#### Job Specifications

##### NATURE OF WORK

This is field and administrative work in the preparation of paving costs estimates and coordination of field inspections for the Miami-Dade Water & Sewer Department.

An employee in this class is responsible for preparing paving cost estimates for proposed capital and other projects; coordinating field inspections to compile information about specific field requirements in order to estimate the scope of work and cost; management and coordination of field inspections to include evaluation of inspection results and advise on best options for paving layouts; and reviewing all monthly invoices for paving activities for multiple restoration orders from the Public Works and Waste Management Department. Employee exercises some independent judgment in keeping the division within paving budget allocations. Supervision is exercised over subordinate staff through assignment and review of work. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Analyzes, calculates, monitors and reviews paving cost estimates using the Public Works & Waste Management Department Street Paving Rehabilitation contracts; uses field information, photos, sketches, construction standards and requirements in the preparation of comprehensive paving cost analysis.

Monitors Paving Request process; issues daily work for field inspections, monitors schedules, reviews and discusses inspection results, advises on the course of action in paving layouts and other field conflicts; supervises the inspection of all aerial pipe crossings during normal operations and after major events such as hurricanes; supervises the field inspections for the Quality Control program for in-house paving restorations.

Reviews and processes Public Works & Waste Management Department paving invoice payments to include verifying the scope of work, account status and approvals from the originators of the restoration orders; verifies field information and sketches, generates field investigations and rejects or approves the paving charges.

Supervises subordinate clerical and field employees engaged in various phases of the section's operations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Assists divisions in paving budgeting and release of capital funds; reviews Street Paving Rehabilitation contracts to include special provisions and prices; makes recommendations to upper management; updates field inspection paving information, cost estimates, paving budget considerations and field related decisions; assists with the research and submittal of records for the Safety Office for construction related claims.

Handles complaints received from municipalities or other agencies to include assigning an investigation or requesting action from other divisions or departments; assists with the implementation and improvement of the Enterprise Asset Management System (EAMS) for the division; assists with personnel training and data management; supervises the section's reporting process; coordinates field investigations requested by the Public Works & Waste Management Department.

Performs other related work.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of paving and road construction requirements.

Considerable knowledge of construction practices used to evaluate field information.

Considerable knowledge of construction standards, plans, permit requirements, codes and regulations, area conditions, and current contract prices and provisions.

Knowledge of supervisory principles and practices.

Knowledge of basic accounting principles, practices and procedures and their application to governmental computerized accounting systems.

Ability to express ideas and information clearly and concisely, verbally and in writing, to groups and individuals.

Ability to establish and maintain effective working relationships with a variety of public and private officials.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to estimate scopes of work and calculate costs to assist management in project planning and billing.

Ability to evaluate inspection results and advise on best option for paving layouts.

Ability to analyze paving operations performed and invoiced annually to project future paving expenditures.

### **W & S Paving Cost Estimator (005920)**

This is advanced professional supervisory work in the preparation and monitoring of paving cost estimates and the coordination and management of field inspection activities.

### W & S Senior Microbiologist (005923)

#### Minimum Qualifications

Bachelor's degree in Microbiology, Biology, Chemistry or related field. One year professional experience in environmental microbiology to include laboratory experience in water/wastewater, food, or beverage microbiological monitoring is required.

#### Job Specifications

##### NATURE OF WORK

This is professional and supervisory microbiological work organizing, directing and coordinating the analysis of water samples for microbial contamination at Miami-Dade County Water Treatment Plants.

Employees in this class are responsible for supervising and participating in the conduct of qualitative and quantitative analysis of water samples from various sources using approved analytical methods. Responsibilities include developing and ensuring compliance with all requirements mandated by the National Environmental Laboratory Accreditation Program (NELAP) standards; directing investigations to resolve customer complaints; organizing and supervising the collection of samples for regulatory compliance, treatment process troubleshooting and investigative projects; reviewing and validating quality control and analytical data generated by subordinates; and ensuring compliance with regulatory policies and procedures for maintaining inventory records for laboratory chemicals, supplies and instrument service and repair. Supervision is exercised over subordinate laboratory employees through assignment of work, control of field and laboratory procedures, and responsibility for reporting field and laboratory findings. Supervision is received from a professional superior who reviews field and laboratory data and assists with difficult problems.

##### ILLUSTRATIVE TASKS

Supervises and participates in the conduct of qualitative and quantitative analysis using approved analytical methodologies on samples from treatment plant source water, Aquifer Storage and Recovery Systems (ASR), alternative water supply systems, monitoring wells, plant influent, plant effluent, plant process stream, treatment chemicals, treated drinking water, collection system, customer complaints, distribution system and special studies in accordance with NELAP standards and federal, state, local rules, regulations, permits and consent orders.

Develops and ensures compliance with all "Quality System" requirements mandated by NELAP standards to include calibrating various scientific instruments to ensure verification of performance and adherence to control limits, maintaining quality control records; running positive and negative controls, required spikes, duplicates and continuous calibration; establishing quality of standards and reagents, data reduction; documenting corrective measures and instrument maintenance; writing Standard Operating Procedures (SOPs) and participating in internal and external audits.

Performs or supervises the performance of investigations to resolve customer complaints, distribution system water quality anomalies, treatment plant modification and process disturbances; evaluates investigation results and makes recommendations regarding resolution; prepares draft of formal responses to requests for information regarding water quality and other inquiries related to departmental operations and objectives.

Organizes and supervises the collection of samples for regulatory compliance, treatment process troubleshooting and investigative projects to include the preparation of sample bottles, labels, and chain-of-custody documentation, preparation and calibration of field testing equipment, preparation of reagents for operational testing, and collection of water samples from various sources.

Complies with all professional qualifications and training requirements mandated by NELAP standard to include annual recurrent data integrity and ethics training, measurement uncertainty training and demonstration of capabilities for all analytical tests performed.

Utilizes a Laboratory Information Management System (LIMS) for sample labeling, sample log in, process scheduling, sample batching, entry of analytical and quality control data, instrument maintenance information and generation of various reports and data summaries for regulatory submittal; reviews and validates quality control and analytical data generated by subordinates.

Ensures compliance with regulatory policies and procedures for maintaining inventory records for laboratory chemicals, supplies and instrument service and repair; evaluates new instrumentation and technologies and makes recommendations to management; prepares specifications for supplies and services, procures and receives supplies; participates in peer review of emerging methods, process technologies and instrumentation.

Trains and supervises laboratory technicians in analytical procedures, methodologies, quality control requirements, use of the LIMS and data reporting in accordance with NELAP and regulatory agency protocols and standards.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the sciences of microbiology and water chemistry including the basic principles and techniques of investigation

### W & S Senior Microbiologist (005923)

and analysis.

Considerable knowledge of the methods, techniques and equipment used in the collection, sampling and analysis of microbiological data in accordance with sample collection and field testing protocols and Standard Operating Procedures (SOPs) mandated by NELAP, federal and state agencies.

Considerable knowledge of NELAP standards; federal, state, and local rules and regulations; and permits and consent orders for the qualitative and quantitative analysis of water samples.

Considerable knowledge of maintaining quality control records in accordance with laboratory certification.

Considerable knowledge of the Laboratory Information Management Systems (LIMS).

Considerable knowledge of the regulatory policies and procedures for maintaining inventory records for laboratory chemicals, supplies and instrument service and repair.

Considerable knowledge of the basic scientific principles and practices of physics, biology, mathematics and physical sciences.

Considerable knowledge of laboratory controls and sampling theory used in microbiological experimentation, analysis and synthesis.

Considerable knowledge of conditions which constitute current or potential hazards affecting distribution wells and treatment plants.

Knowledge of supervisory principles and practices.

Ability to apply scientific and technical knowledge with accuracy and professional judgment in sampling, analysis and reporting of microbiological data.

Ability to supervise and conduct investigations, experiments and analyses for identification of microbial colonies.

Ability to isolate and identify colonies using specialized tests such as enterotube, oxiferm, motility, oxidase, indol, catalase, coagulase and gram stain.

Ability to identify and analyze conditions which constitute current or potential hazards affecting distribution wells and treatment plants.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to interpret and explain the results of water quality investigations to customers.

Ability to prepare and submit accurate and complete reports of investigations and laboratory findings.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

### W & S Hazardous Waste Specialist (005924)

#### Minimum Qualifications

High school diploma or GED. Two years of investigative experience in the transportation and handling of hazardous materials or waste are required.

#### Job Specifications

##### NATURE OF WORK

This is field enforcement work of regulatory ordinances pertaining to the storage, collection and disposal of hazardous and other regulated waste for the Miami-Dade Water & Sewer Department.

Employees in this class are responsible for performing a variety of complex tasks related to compliance with regulatory agencies in the areas of accumulation, transportation and disposal of hazardous and other regulated waste. Duties include performing field inspections, interpreting technical legal provisions and administrative directives pertaining to hazardous and other regulated waste enforcement. Incumbents exercise some independent judgment in the application and enforcement of regulations. Supervision is received from a superior who reviews work through personal conferences and written reports, and assists with difficult or unusual cases.

##### ILLUSTRATIVE TASKS

Inspects storage tanks, monitoring wells, piping, containment areas and vapor recovery systems to ensure equipment is in proper working condition and in compliance with the Department of Environmental Management (DERM), Florida Department of Environmental Protection (FDEP) and the Environmental Protection Agency (EPA) regulations.

Works with DERM's Quality Air Control section in the application of vapor recovery system permits for fueling stations; coordinates the testing of vapor recovery systems including stage one transfers (fuel transfer from a truck to tank) involving either a coaxial or two point system or stage two transfers (fuel transfer from tank to a vehicle).

Maintains a database to track expired permits and prepare documentation for permit renewals; prepares requisitions for selected vendors to perform vapor recovery system testing; maintains vapor recovery permit files and storage tank registration files as required by regulatory agencies.

Accompanies DERM inspectors on inspections of pump stations; takes corrective action if any violations are found and informs DERM of action taken; inspects waste accumulation sites to ensure department's compliance with RCRA; maintains a database of weekly hazardous waste inspection logs; inspects construction sites to verify that the tank installation work is performed properly; utilizes various tools and safety equipment in the process of inspecting.

Provides field training to supervisors and leadworkers to ensure compliance monitoring of above and underground tanks, monitoring wells, containment areas, piping, fuel reading, continuous automatic leak detection systems and vapor recovery systems; provides instruction on verifying the accuracy of a hazardous or non-hazardous waste manifest for compliance with the Department of Transportation (DOT) regulations; provides training on hazardous materials placards, labels, NFPA signs and the use of the material safety data sheet.

Manages and controls hazardous and other regulated waste disposal operations in the field; verifies and approves waste profiles; inspects haulers' vehicles to assure DOT compliance; assures contractors' compliance with hazardous waste disposal requirements; verifies and approves cargo manifest and documentation; arranges for proper testing and analysis of suspicious materials; assists supervisor in selecting the most appropriate disposal methods; prepares reports and correspondence; verifies the accuracy of vendors' invoices with the actual field activities.

Develops, implements and manages a central hazardous waste accumulation point at each of the water and wastewater plants.

Supervises asbestos work performed by abatement contractors to assure regulatory and safety compliance; prepares project and completion reports.

## Human Resources Department

---

### W & S Hazardous Waste Specialist (005924)

Coordinates asbestos pipe disposal activities, provides direction on proper wrapping, labeling, transporting, disposal, documenting and payments.

Assists in the interpretation and enforcement of various federal, state and local laws and regulations.

Maintains an emergency response of readiness at all times.

Performs related work as required.

#### KNOWLEDGE, ABILITIES AND SKILLS

Considerable knowledge of hazardous and other regulated waste regulations, and administrative practices relating to enforcement actions.

Considerable knowledge of the geography of Miami-Dade County including major road network and municipal boundaries.

Knowledge of legal procedures related to the enforcement of hazardous and other regulated waste ordinances and regulations.

Knowledge of modern office equipment, practices and procedures.

Knowledge of public relations principles and techniques.

Ability to explain and enforce regulations with firmness, tact and impartiality.

Ability to make inspections and determine facts through investigations.

Ability to explain enforcement processes clearly and concisely, verbally and in writing, to groups and individuals.

Ability to maintain records and prepare reports.

### W & S Microbiologist (005925)

#### Minimum Qualifications

Bachelor's degree in Microbiology, Biology, Chemistry or related field.

#### Job Specifications

##### NATURE OF WORK

This is professional microbiological work in the collection, preparation and analysis of water samples for microbial contamination. Employees in this class are responsible for performing qualitative and quantitative analyses of water samples obtained from distribution wells, treatment plants and related facilities. Responsibilities include identification of microbial colonies, determination of growth promotion qualities of media, preparation of media and plates for analyses, coordination of microbiologic investigations and preparation of comprehensive reports of results and findings. Supervision may be exercised over subordinate laboratory employees through assignment of work, control of field and laboratory procedures, and responsibility for reporting field and laboratory findings. Supervision is received from a professional superior who reviews field and laboratory data and assists with difficult problems.

##### ILLUSTRATIVE TASKS

Performs professional duties in the collection and preparation of microbiological samples for qualitative and quantitative analyses; determines investigations necessary for locating microbial contamination sources based upon routine, special and quality control tests; prepares comprehensive reports of results and findings.

Conducts field and laboratory analyses of water samples for identification of microbial colonies and determination of growth promotion qualities of media; prepares media and plates for tests and analyses; isolates and identifies colonies using specialized tests such as enterotube, oxiferm, motility, oxidase, indol, catalase, coagulase and gram stain.

Performs and analyzes various microbiological tests including most probable number, quality control, autoclave, turbidity and pH for routine bacteria collected from distribution wells and treatment plants.

Analyzes total, standard and extended coliform plates; verifies and confirms positive coliform; prepares, analyzes and records the number and type of colonies on routine total and standard coliform plates.

Coordinates and schedules investigations of contaminated sources and determines corrective actions for elimination of microbial contamination.

Maintains a stock of bacteria cultures to be used as standards for specificity and sensitivity of media; performs biological quality control on laboratory grade water; handles harmful bacteria and contaminate bacteriological samples.

Performs statistical analyses and tabulations of microbiological data; maintains bacteriological, quality control and inventory records; orders supplies and equipment; assists in the maintenance of laboratory equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the sciences of microbiology and water chemistry including the basic principles and techniques of investigation and analysis.

Knowledge of the methods, techniques and equipment used in the collection, sampling and analysis of microbiological data.

Knowledge of the basic scientific principles and practices of physics, biology, mathematics and physical sciences.

Knowledge of laboratory controls and sampling theory used in microbiological experimentation, analysis and synthesis.

Knowledge of conditions which constitute current or potential hazards affecting distribution wells and treatment plants.

Some knowledge of supervisory principles and practices.

Ability to apply scientific and technical knowledge with accuracy and professional judgment in sampling, analysis and reporting of microbiological data.

Ability to conduct investigations, experiments and analyses for identification of microbial colonies.

Ability to isolate and identify colonies using specialized tests such as enterotube, oxiferm, motility, oxidase, indol, catalase, coagulase and gram stain.

Ability to identify and analyze conditions which constitute current or potential hazards affecting distribution wells and treatment plants.

Ability to prepare and submit accurate and complete reports of investigations and laboratory findings.

#### NATURE OF WORK

This is professional scientific work in an environmental laboratory for the Miami-Dade Water and Sewer Department.

Employees in this class are responsible for conducting qualitative and quantitative analyses of water and wastewater treatment plant influent, process stream, treatment chemicals, production and monitoring wells, treated drinking water, and treated effluent. Technical responsibilities include calibrating instruments required for laboratory tests and operational functions, analyzing daily required samples, maintaining quality control records, analyzing customer complaint samples and determining necessary corrective actions. Incumbents apply advanced knowledge of chemistry in the performance of a variety of laboratory chemical analyses to assure compliance with local, state and federal requirements. Supervision may be exercised over subordinate laboratory personnel. Supervision is received from a professional superior who reviews the results of qualitative and quantitative analyses for conformance with; departmental policies, procedures and regulations, The National Environmental Laboratory Accreditation Conference Institute (TNI), and federal, state, local rules, regulations, permits and consent orders.

#### ILLUSTRATIVE TASKS

Performs qualitative and quantitative analysis using approved analytical methodologies on samples from treatment plant source water, Aquifer Storage and Recovery Systems (ASR), alternative water supply systems, monitoring wells, plant influent, plant effluent, plant process stream, treatment chemicals, treated wastewater, treated drinking water, collection system, customer complaints, distribution system, and special studies in accordance with TNI standards and federal, state, local rules, regulations, permits, and consent orders.

Complies with all quality system requirements mandated by TNI standards to include, but not limited to calibrating various scientific instruments to ensure verification of performance and adherence to control limits as specified by certification criteria; maintains quality control records associated with the certification of the laboratory including logging samples, recording all standardizations, calibration and analytical results from tests performed; establishes limits of detection, limits of quantitation, running positive and negative controls, required spikes, duplicates and continuous calibration verification; establishes quality of standards and reagents, data reduction; documents corrective measures and instrument maintenance; assists in the writing of Standard Operating Procedures (SOPs) pertaining to assigned area and training new employees in conformance with TNI standards; participates in internal and external audits.

Utilizes a Laboratory Information Management System (LIMS) for sample labeling, sample log in, process scheduling, sample batching, entry of analytical and quality control data, instrument maintenance information and generation of various reports and data summaries.

Adheres to all sample collection and field testing protocols and SOPs in accordance with TNI standards, federal and state agencies to include, but not limited to the preparation of sample bottles, labels and chain-of-custody documentation; preparation and calibration of field testing equipment; preparation of reagents for operational testing; collection of samples from treatment plant source water, ASR systems, alternative water supply systems, monitoring wells, plant influent, plant effluent, plant process stream, treatment chemicals, treated wastewater, treated drinking water, collection system, customer complaints, distribution system and special studies.

Complies with all professional qualifications and training requirements mandated by TNI standards to include, but not limited to annual recurrent data integrity and ethics training, measurement uncertainty training and demonstration of capabilities for all analytical tests performed.

Maintains inventory records for laboratory chemicals, supplies and instruments; maintains detailed records for maintenance of laboratory instrument and contacts manufacturer for preventative maintenance and service as needed; procures and receives supplies in accordance with established policies and procedures.

Responds to requests for information from internal and external customers, customer inquiries regarding water quality and assists in responding to water quality complaints and other inquiries related to departmental operations and objectives; assists operational personnel in troubleshooting treatment process anomalies.

### W & S Environmental Chemist 1 (005926)

Complies with all county, departmental and TNI policies and procedures regarding employee safety and laboratory safety.

Assists in training staff as directed by the laboratory supervisor.

Performs other related duties as required.

#### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of water and wastewater treatment processes and the water distribution system.

Knowledge of the science of chemistry including methods, principles and procedures of laboratory chemical analysis.

Knowledge of approved analytical methodologies used to perform qualitative and quantitative analysis of treatment plant water and other related samples.

Knowledge of local, state and federal laws and regulations pertaining to drinking water and wastewater.

Knowledge of The National Environmental Laboratory Accreditation Conference Institute (TNI) standards.

Knowledge of all sample collection and field testing protocols and SOPS in accordance with TNI, federal and state agencies.

Knowledge of all quality system and proficiency testing requirements mandated by TNI standards.

Knowledge of the Laboratory Information Management System (LIMS)

Knowledge of the equipment and scientific instruments used in determining drinking water and wastewater quality.

Knowledge of the organization and operation of a large and complex environmental laboratory.

Ability to professionally apply scientific and technical knowledge in the conduct of laboratory analyses of drinking water, wastewater, and other samples.

Ability to analyze and interpret the results of complex experiments and make effective recommendations to correct abnormal water and wastewater quality conditions.

Ability to prepare and submit accurate and complete reports of laboratory tests and examinations.

Ability to calibrate and troubleshoot various scientific instruments used to perform tests of a variety of samples.

Ability to handle customer complaints tactfully, and to establish and maintain effective working relationships with the public.

Ability to establish and maintain effective working relationships with co-workers, supervisors, outside utilities staff, and the general public.

Skill in laboratory manipulative techniques.

##### ILLUSTRATIVE TASKS

Supervises and participates in the conduct of qualitative and quantitative analysis using approved analytical methodologies on samples from treatment plant source water, Aquifer Storage and Recovery Systems (ASR), alternative water supply systems, monitoring wells, plant influent, plant effluent, plant process stream, treatment chemicals, treated wastewater, treated drinking water, collection system, customer complaints, distribution system, and special studies in accordance with TNI standards and federal, state, local rules, regulations, permits and consent orders.

Develops and ensures compliance with all "Quality System" requirements mandated by TNI standards to include, but not limited to calibrating various scientific instruments to ensure verification of performance and adherence to control limits as specified by certification criteria; maintains quality control records associated with the certification of the laboratory including logging samples, recording all standardizations, calibration and analytical results from tests performed; establishes limits of detection, limits of quantitation verification, running positive and negative controls, required spikes, duplicates and continuous calibration; establishes quality of standards and reagents, data reduction; documents corrective measures and instrument maintenance; writes Standard Operating Procedures (SOPs) and participates in internal and external audits; may serve as the designated Laboratory QA Officer in accordance with TNI guidelines in exercising these tasks.

Utilizes a Laboratory Information Management System (LIMS) for sample labeling, sample log in, process scheduling, sample batching, entry of analytical and quality control data, instrument maintenance information and generation of various reports and data summaries for regulatory approval; reviews and validates quality control and analytical data generated by subordinates.

Organizes and supervises the collection of samples for regulatory compliance, treatment process troubleshooting and investigative projects in accordance with sample collection and field testing protocols and SOPs mandated by TNI, federal and state agencies to include, but not limited to the preparation of sample bottles, labels and chain-of-custody documentation; preparation and calibration of field testing equipment; preparation of reagents for operational testing; collection of samples from treatment plant source water, ASR systems, alternative water supply systems, monitoring wells, plant influent, plant effluent, plant process stream, treatment chemicals, treated wastewater, treated drinking water, collection system, customer complaints, distribution system and special studies.

Complies with all professional qualifications and training requirements mandated by TNI standards to include, but not limited to annual

### W & S Environmental Chemist 2 (005927)

recurrent data integrity and ethics training, measurement uncertainty training and demonstration of capabilities for all analytical tests performed.

Performs or supervises the performance of investigations to resolve customer complaints, distribution system water quality anomalies and treatment plant process modifications and anomalies; evaluates investigation results and makes recommendations regarding resolution; prepares formal responses to requests for information from internal and external customers including customer inquiries regarding water quality and other inquiries related to departmental operations and objectives.

Trains and supervises professional chemists and laboratory technicians in analytical procedures, methodologies, quality control requirements, use of the Laboratory Information Management System (LIMS) and data reporting in accordance with TNI and regulatory agency protocols and standards; assists in the training of Plant Operations personnel in analytical procedures and methodologies relating to process control.

Ensures compliance with regulatory policies and procedures for maintaining inventory records for laboratory chemicals, supplies and instrument service and repair; evaluates new instrumentation and technologies which may improve laboratory efficiency and makes recommendations to management; prepares specifications for supplies and services, procures and receives supplies in accordance with established policies and procedures.

Participates in the recruitment process and makes recommendations regarding discipline of subordinates; authorizes leave and reviews time reporting records and evaluates overtime usage; evaluates and rates employee performance.

Complies with all county, departmental and TNI policies and procedures regarding employee safety and laboratory safety.

Performs other related duties as required.

#### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of water and wastewater treatment processes and the water distribution system.

Considerable knowledge of the science of chemistry including methods, principles and procedures of laboratory chemical analysis.

Considerable knowledge of approved analytical methodologies used to perform qualitative and quantitative analysis of treatment plant water and other related samples.

Considerable knowledge of local, state and federal laws and regulations pertaining to drinking water and wastewater.

Considerable knowledge of The National Environmental Laboratory Accreditation Conference Institute (TNI) standards.

Considerable knowledge of all sample collection and field testing protocols and SOPS in accordance with TNI, federal and state agencies.

Considerable knowledge of all quality system and proficiency testing requirements mandated by TNI standards.

Considerable knowledge of the Laboratory Information Management System (LIMS)

Considerable knowledge of the equipment and scientific instruments used in determining drinking water and wastewater quality.

Considerable knowledge of the organization and operation of a large and complex environmental laboratory.

Knowledge of supervisory principles and practices.

Ability to professionally apply scientific and technical knowledge in the conduct of laboratory analyses of drinking water, wastewater, and other samples.

##### NATURE OF WORK

This is supervisory scientific work with administrative responsibility directing a water quality laboratory for the Miami-Dade Water & Sewer Department.

An employee in this class is responsible for planning, assigning, and reviewing the work of subordinate employees engaged in the qualitative and quantitative analysis of water treatment plant source water, treatment chemicals, and treated drinking water. Responsibilities include assuring adherence to laboratory quality control procedures, assuring compliance with requirements of various regulatory agencies, developing new analytical procedures and methodologies, preparing technical specifications for laboratory equipment, supplies, materials and other needs, directing complex experiments and studies, and reviewing and interpreting analytical data generated on a daily basis. The incumbent exercises considerable independent judgment and technical expertise in assuring the drinking water produced by the utility meets all local, state, and federal requirements. Supervision is exercised over a staff of professional and technical employees with assigned responsibilities in various phases of laboratory operations. General direction is received from an administrative superior who reviews work through observations, reports and personal conferences, and holds the incumbent responsible for the professional management of laboratory activities and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of professional and technical employees engaged in the qualitative and quantitative analysis of water treatment plant source water, treatment chemicals, and treated drinking water in order to assure compliance with federal, state, and local drinking water rules, laws, and regulations.

Ensures adherence with required laboratory quality control protocol and procedures as defined by state laboratory certification criteria to maintain laboratory state certification status and licenses.

Prepares, organizes and submits reports to federal, state, and local regulatory agencies to establish compliance with drinking water rules and regulations.

Develops and implements new analytical procedures and methodologies, standard operational procedures, preventive maintenance schedules, and quality control procedures based on current regulatory policies and procedures and anticipated regulatory changes.

Prepares technical specifications for the purchase of specialized laboratory equipment, obtain services of commercial contract laboratories, establish preventive maintenance or service contracts, and establish purchase orders for the purchasing of expendable laboratory equipment and supplies; reviews final bid award recommendations.

Directs and conducts complex chemical, physical and microbiological experiments, investigations, studies and research to determine the presence of contaminants in the source and treated water, and to evaluate new treatment process techniques.

Reviews and interprets all analytical data generated daily for the purpose of maintaining quality control of the in-plant treatment processes and quality control of water in the distribution system; reports anomalies and makes recommendations for corrective action.

Prepares budget estimates and documents; authorizes requisitions for materials.

Keeps informed on current developments in the fields of analytical and environmental chemistry, technical management, computer science, and drinking water and environmental protection legislation.

Develops short and long-range laboratory objectives; evaluates work methods, policies and procedures.

Responds to telephone calls and complaints from the public concerning the water utility; explains utility operations and activities; conducts plant tours.

Maintains working relationships with officials of local, state and federal agencies involved in environmental protection.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

### W & S Rate Analyst (005932)

#### Minimum Qualifications

Bachelor's degree in Finance, Business Administration, Public Administration, Accounting, Economics or a related field. Two years of professional experience in utility accounting, finance or administration are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative work in the analysis of water and sewer rates for the Miami-Dade Water and Sewer Authority Department. An employee in this class is responsible for analyzing and preparing water and sewer rates, consumption projections and various reports to provide accurate information to structure rates which are fair for the public and financially sound for the utility. Responsibilities include analyzing water consumption, billing information and other factors, compiling data from other utilities, estimating revenues, and responding to auditor and customer concerns regarding rates and charges. The incumbent exercises considerable independent judgment in the application of specialized knowledge of utility rate analysis to the determination of water and sewer rates. Supervision is received from a professional superior who reviews work through personal conferences and written reports for thorough, accurate, and complete water and sewer rate and charges development.

##### ILLUSTRATIVE TASKS

Compiles and analyzes monthly data on number of customers billed, water consumption, monthly average usage by revenue codes, rainfall, unbilled volume, water production, unaccounted for water and detailed billing information for wholesale customers.

Compiles and analyzes monthly data on the number of customers billed, sewage treated, monthly average treated by revenue codes, rainfall, unbilled flow, unexplained flow and detailed billing information for wholesale customers.

Obtains data from Broward utilities and the City of North Miami Beach, which bill some of the sewer customers for the Department according to agreements.

Prepares water and sewer revenue projections for annual budget; obtains current population projections by census sub-tract; correlates data received with current extensions of the water and sewer systems and projects retail customer growth and increased consumption by wholesale customers.

Estimates revenues based on customer projections and existing rates and recommends new rates where changes are appropriate.

Performs miscellaneous analyses and studies relating to water and sewer rates and revenues, including calculation of septage disposal charges, user charge studies, conservation rate studies, and calculation of unit production costs.

Compiles data and prepares projections related to treated volumes, billed volumes, customers, and population for special reports, loan applications, bond sales, and other purposes.

Conducts surveys of other utilities to develop information concerning policies, rates, charges, and utility management.

Responds to questions and challenges from auditors and representatives of customers regarding rates and charges; testifies at rate hearings.

Prepares written and oral reports; composes correspondence and other documents.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the theory, methods, practices, and procedures of water and sewer utility rate calculations.

Thorough knowledge of utility accounting, the principles of finance, and principles of business and public administration.

Considerable knowledge of agreements and contracts between WASAD and other government agencies pertaining to water and sewer charges.

Considerable knowledge of the departmental organization and operation of the Miami-Dade Water and Sewer Authority-Department.

Knowledge of computer spreadsheet programs.

Ability to analyze accounting processes and other detailed information and calculate fair and equitable water and sewer rates and charges.

Ability to assist in the formulation of departmental policies and procedures.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to testify at water and sewer rate hearings.

Ability to deal tactfully, persuasively, and diplomatically with members of the public.

### W & S Real Estate Manager (005933)

#### Minimum Qualifications

Bachelor's degree in Real Estate, Business Administration, Public Administration, or a related field. Must possess a State of Florida Real Estate Salesperson license or State of Florida Real Estate Broker's license. Four years of experience in the sale, acquisition, or appraisal of real estate are required. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced technical work with administrative responsibility in the acquisition of property and rights-of-way for the Miami-Dade Water & Sewer Department.

An employee in this class is responsible for conducting negotiations for the acquisition of real property and rights-of-way. Emphasis of the work is on coordinating the acquisition of a variety of parcels of real property required for departmental projects, coordinating activities with various local and state organizations, and assuring compliance with local, state and Federal laws and regulations. Supervision is received from an administrative and technical superior who provides engineering data upon which acquisition activities are predicated and who holds the incumbent responsible for the attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Provides assistance to departmental staff in interpreting and applying local, state or federal rules, regulations and laws in connection with real estate acquisition, disposition and use of properties.

Conducts studies and prepares reports related to the acquisition, disposition and use of real estate properties; prepares parcel files, researches and verifies ownership of real property and inspects property to be acquired.

Reviews appraisal reports, maps, surveys and construction plans; prepares sales contracts, legal documents, easements, deeds and related documentation related to acquisition activities; conducts tax searches and requests checks necessary for disbursement at closing, eminent domain proceedings or to pay for services.

Advises and recommends changes in a project to achieve more economical acquisitions or avoid eminent domain; assists the County Attorney's Office (CAO) in the filing of eminent domain; makes recommendations about surplus property and coordinates the sale of properties with GSA; serves as the liaison between GSA and the department for acquiring surplus property from other county departments.

Contacts and meets with property owners, surveyors, appraisers, engineers and attorneys; handles complex negotiations for the acquisition of real property involving large parcels and large monetary values; supervises the preparation of parties of interest information for use in eminent domain proceedings; attends settlement conferences in eminent domain suits.

Prepares periodic project progress reports for the department director's office and other upper management; supports the Wholesale Billing Unit with the collection of rent, the Accounts Payable unit with the payment of rent and the Property Accounting unit with delinquent taxes and ownership research.

Acts as project manager for the acquisition of land for capital projects; coordinates and oversees projects contracted to GSA and assists them with difficult or unusual problems.

Serves as a liaison between the department, other county departments, state or municipal agencies, title companies and the private section; enforces operating policies and procedures to comply with county, state and federal funding guidelines.

Performs other related duties as required.

### New Business Contracting Officer (005937)

#### Minimum Qualifications

Bachelor's degree. Two years experience in contract management is required.

#### Job Specifications

##### NATURE OF WORK

This is professional administrative work in New Business operations for the Miami-Dade Water and Sewer Department.

An employee in this class is responsible for preparing contractual agreements with developers for the construction and installation of water and sewer facilities. Responsibilities include preparing contractual agreements, addendums to and assignments of such agreements, unities of title and covenants running with the land, releases and other legal instruments related to the provision of water and sewer services. Additional responsibilities may include the drafting of interdepartmental agreements and other governmental entities and the review of service area releases and expansions. Supervision may be exercised over subordinate clerical and professional employees. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Drafts service agreements, related legal contract documents and technical specifications in collaboration with the County Attorney's Office (CAO), to enforce Miami-Dade County's Rules and Regulations for water and sewer services.

Prepares agreements with municipalities regarding the acceptance and release of water and sewer service areas.

Reviews and analyzes complex scopes of work to determine the type of contract instrument required and the language needed to assure the integrity of the County's water and sewer systems.

Determines construction connection charges amounts and service connection charges.

Coordinates work with other County departments and departmental work units including Plans Review, Customer Service, Inspections, Water Distribution and Data Processing; conducts preliminary discussions with departmental officials and customers to evaluate and recommend an adequate approach to service agreement contracts.

Assists in the negotiation of complex agreements and/or associate legal instruments to obtain certain adjustments or refinements related to agreement terms and conditions and construction connection cost receivables and deliverables; provides advice and responds to claims from property owners, developers, architects, attorneys, engineers and consultants.

Trains subordinate technical and clerical employees on service agreements and associate document requirements; reviews established connection service accounts and water allocation procedures linked to agreements and associated documents.

Conducts research to establish the cost of service facilities and accuracy of service agreements data using PCTS/Proliance application project management software, ERP/Oracle Financial application, CITIX/GIS software access application, CIS/PeopleSoft software application, DSI/Developer System Infobase software application, and IS2/Invoice System 2 software application.

Prepares verbal and written reports on service agreements activities, identifies problem areas, determines trends and recommends solutions; develops and updates ASE Performance Measures for the New Business Unit scorecard using ASE/Active Strategy software system application; integrates Engineering Division business plan and updates business scorecard in ASE.

Researches best practices on service agreement operations in local governments and municipalities; recommends service agreement documents and operations improvements.

Provides information related to ASE and the County Business Plan.

Performs related work as required.

##### NATURE OF WORK

This is advanced administrative work in the coordination and management of donation projects for the New Customer Division of the Miami-Dade County Water and Sewer Department.

An employee in this class is responsible for acting as a liaison between the Water and Sewer Department, other Miami-Dade County departments, municipalities, attorneys, developers and the general public in order to complete donation projects that may have a large impact on the department. Responsibilities include assisting in the interpretation and application of rules and regulations pertaining to water and sewer system extensions; management of project scheduling and tracking; management and maintenance of New Customer Division fees and charges and assisting the Division Chief in the day to day duties of donation projects oversight. General supervision is received from an administrative superior who reviews work for conformity with established administrative and departmental policies and attainment of desired objectives through conferences and review of reports of operations.

##### ILLUSTRATIVE TASKS

Acts as a liaison between the Miami-Dade Water and Sewer Department (WASD), other county departments, municipalities, attorneys, developers and the general public in order to complete donation projects that may have a large impact on the department to include assisting in an in-depth review and analysis of the impact on services for both water and sewer.

Assists in the interpretation and application of rules and regulations pertaining to water and sewer system extensions to include consulting with the County Attorney's Office (CAO) to ensure compliance with water and sewer service agreements.

Manages project scheduling and tracking of all work that comes to the New Customer Division; tracks all development projects to ensure that mandatory deadlines are met.

Manages and maintains New Customer Division fees and charges; performs comprehensive analysis of costs to the department versus fees charged for services to the public in order to determine the implementation and maintenance of fee schedules; calculates new rates, proposes changes in rate structure and implements new fees.

Assists the division chief, where applicable, in the day to day duties of donation projects oversight.

Formulates, develops, implements and monitors programs, procedures and operation initiatives to include formulating departmental policies and procedures; establishes organizational goals and performance measures used in Active Strategy Enterprise (ASE).

Reports to and updates senior management regarding projects of public interest such as schools, hospitals and government projects.

Identifies and implements opportunities for improvement in the processes for project reviews, approvals and acceptance.

Prepares public outreach materials and information dealing with new customers including fees and processes to include brochures and public meeting handouts; organizes public meetings.

Coordinates the implementation of resolutions and ordinances approved by the Board of County Commissioners (BCC), which affect WASD developer projects; determines if a specific WASD ordinance must be written and what other legal and operational changes are necessary to incorporate the BCC ordinances.

Reviews past and proposed water and sewer usage per location in order to determine potential impact and service fees; reviews pump station capacity and water and sewer main extension projects; determines oversizing credits.

Makes on-site field assessments and investigations of proposed developments to determine the feasibility and availability of water and sewer services for projects; reviews existing and proposed infrastructure to determine the feasibility of proposed developments tying into the WASD system as per department rules and regulations.

Facilitates meetings to discuss interagency coordination when reviewing development projects and the application of impact fees; maintains records of agreements and resolutions for projects and assures follow-up by the appropriate WASD section.

Obtains legal opinions on matters pertaining to development projects and requirements as set forth by the department's rules and regulation; seeks clarification on rendered legal opinions; reviews legal documents created as a result of negotiations; prepares demand letters regarding disputes and/or claims.

Interacts with development industry professionals to include land use attorneys, professional engineers, architects, general and specialty contractors and real estate agents to resolve problems.

Performs research of county, state and national codes and standards to prepare analysis for project specific problems and documents solutions.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the rules and regulations pertaining to water and sewer service agreements.

### W & S New Business Representative (005940)

#### Minimum Qualifications

High school diploma or GED. Currently employed with permanent status as a Customer Service Representative 2 with Miami-Dade County or three years of customer service experience are required.

#### Job Specifications

##### NATURE OF WORK

This is public contact work involving the initiation of new water service for business and residential customers.

Work in this class involves responsibility for the intake and evaluation of applications and the determination of proper water service to new customers. Public relations constitutes a major part of this position. Although work is performed in accordance with established policies, an employee in this position functions largely independently in both field work and office operations. General supervision is received from a Customer Service Supervisor who establishes areas of responsibilities and checks results obtained through personal consultation and a periodic review of work and reports.

##### ILLUSTRATIVE TASKS

Receives applications for new water service from perspective customers and answers questions concerning the initiation of new water service.

Contacts developers of subdivisions and other contractor personnel concerning permits required for water service installation.

Evaluates requests for service for availability, location, size and type.

Analyzes and verifies information received from customers by using plat books, atlas, blueprints, maps, engineers' drawings, etc.

Maintains a cross referenced file system of all new business contracts.

Determines size of service lines, number of meters, submeters, and firelines needed for service area; who bears the cost of water mains extension; what fees and deposits are required for water service and availability of water source.

Receives deposits or fees from customers, issues receipts and logs journal.

Requests Bill of Sales, Release of Liens, Water Main Warranties, and final approvals from field inspectors when water mains are installed by private contractors.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of utility department rates, credit procedures, billing practices and charges for services.

Thorough knowledge of plat books, atlas, and service area covered by the authority.

Thorough knowledge of the content and meaning of items on standard operating forms.

Thorough knowledge of departmental rules, regulations and policies.

Knowledge of techniques and requirements of utility service planning.

Knowledge of utility supply mains, meters, submeters and firelines required for service areas.

Knowledge of principles and practices of effective public relations.

Knowledge of principles and methods of records maintenance.

Ability to discuss service requests with customers, answer questions and explain departmental rules, regulations and policies.

Ability to establish and effective working relationships with the public.

Ability to keep records and prepare reports.

Ability to coordinate work effectively with other divisions.

### New Business Processor (005943)

#### Minimum Qualifications

One year of experience as a Miami-Dade County Customer Service Representative 1; or high school diploma or GED, and two years of experience performing customer service functions are required.

#### Job Specifications

##### NATURE OF WORK

This is complex public contact work in handling internal and external customer complaints and inquiries by walk-in, telephone and e-mail.

Work in this class involves responsibility for creating all new retail, residential and commercial accounts for customers of the Miami-Dade Water and Sewer Department (WASD); scheduling and re-scheduling meter requests; coordinating with field supervisors and customers to expedite special requests and adding service and deposit fees to customer accounts. Additional responsibilities include creating and processing invoices for New Business, Plans Review and Inspection Units and providing support to the Plans Review and Inspection Units through the operation of various computer systems; verifying validated invoice against customer information system for accuracy and completeness; assisting supervisors with quality assurance by running New Business Unit queries and reports; digitizing New Business Unit's completed verification forms, ordinance letters and invoices; and modifying service point types to the existing retail accounts impacting our billing system. Although work is performed in accordance with established policies, it is not supervised in detail and a considerable amount of independent judgment is frequently involved. General supervision is received from an administrative superior who reviews work for operational effectiveness and adherence to departmental standards and policies.

##### ILLUSTRATIVE TASKS

Creates new accounts for residential and commercial domestic services; firelines; pump stations; compound meters; sewer only accounts, floating meters and construction meter accounts.

Schedules and reschedules meter installations.

Receives inquiries from developers and residential customers regarding meter installations and sets, new accounts status and other concerns; follows up with the meter shop regarding problems related to newly created accounts or issues involving field rejections; assists in providing coverage to the front reception area that provides information to and assists in resolving customer issues.

Collects up-front fees for verification form and ordinance letter requests; collects fees and creates invoices for connection charges, ordinance fees, as-builts, water and sewer mains, transmission capacity forms, fire lines, facility service and easement letters.

Updates existing customer account records with changes to gallons per day ratings and premise types, as well as performing abolishments when changing accounts from water only to water and sewer.

Digitizes forms in GIS system.

Applies deposits and adjustments to customer accounts and charges customers for new meter installations.

Assigns projects to New Business Representatives from various building department processes such as concurrent plans processing and paper plans tracking; removes holds from such systems,

Assists customers in filling out drop-off applications; answers customer questions concerning fees and processing time frames.

Retains records and information of previous accounts created; maintains records and prepares reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the requirements for WASD's approval to pre-qualify customer's intake drop-off's, to include other County Departments.

### New Business Manager (005944)

#### Minimum Qualifications

Bachelor's Degree. A minimum of three to six years of experience in administering and negotiating contracts and legal documents is required.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory work in New Business operations for the County water and sewer utility.

An employee in this class is responsible for management and coordination of office functions for Utility Development Contracts and New Business. Emphasis of the work is on supervising New Business Office functions to establish and activate water service, preparing utilities contracts for developers, and executing extension agreements and requirements for new commercial, residential and industrial developments. Duties include billing impact fees and service charges for new service, determining water and sewer availability, and negotiating with developers, owners and attorneys of developers. The incumbent exercises some independent judgement in interpretation and application of departmental policies, procedures and regulations. Supervision is received from a professional superior who reviews work for efficiency and effectiveness of New Business of Utility Development Contract functions.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of employees in the New Business Office engaged in establishing accounts to activate service, collect deposits, process work orders for meters to be set, locating water main area and sewer, researching charges according to color coded atlas, informing customers of water main availability, and researching impact fees and billings.

Prepares service agreements; reviews projects with engineering staff to determine point of connection, location and size of mains; calculates developer's cost, capacities and payment schedule.

Negotiates and executes water and sewer extension agreements and requirement for new commercial, residential and industrial developments; meets with consultants, developers and attorneys; field checks projects; sends written notices to developers that fail to meet criteria, reviews responses and consults with Assistant County Attorney's, as required; grants extensions or executes releases or addendums to agreements.

Makes recommendations regarding hiring, discipline and promotion of subordinate; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of Utility Development Contracts and New Business operations at a water and sewer utility.

Considerable knowledge of departmental policies, procedures, regulations and legal requirements pertaining to Utility Development Contracts.

Considerable knowledge of supervisory principles and practices.

Knowledge of public relations principles and techniques.

Knowledge of research techniques and sources of information.

Ability to negotiate and execute complex service agreements and extension agreements with developers and attorney's.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to enforce departmental regulations firmly, tactfully and impartially.

Ability to establish and maintain effective working relationships with subordinates, superiors and representatives of developers.

### W & S Meter Repair Supervisor (005945)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the installation, repair, and maintenance of a wide variety of water meters are required. Must obtain certification in "Backflow Prevention Device Testers" from the Florida Center for Training, Research, and Education for Environmental Occupations (TREEO), or comparable certification within the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the installation, repair, and maintenance of water distribution lines and services.

Work in this class involves responsibility for supervising a group of skilled and semi-skilled workers engaged in the installation, repair, location, testing and maintenance of water distribution lines and services, valves, fire hydrants, connections and disconnections of service lines, water meters and boxes, backflow preventers and testing of large (turbine) meters. Assignments are usually received from a technical superior in the form of general oral instructions, or designs and specifications for new installations. Difficult maintenance or construction assignments are subject to frequent inspection while work is in process, but employee is allowed considerable latitude in carrying out normal work assignments.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of skilled and semi-skilled employees engaged in the installation, repair, location, testing and maintenance of water distribution lines and services, valves, fire hydrants, connections and disconnections of service lines, water meters and boxes, backflow preventers, and testing of large (turbine) meters.

Receives and reviews periodic production reports of various water meter repairs, backflow preventer testers, location and design, and develops solutions to improve efficiency and effectiveness of various meter operations and maintenance.

Assists in technical investigations related to the Department and preparation of plans, as built and specifications of new construction work in the Department distribution system; serves as technical matter expert for the Department on matters concerning metering equipment, cross connection control devices, valves, etc.; meets with the WASD Engineering Division, other County Departments, other public utility companies, state and local officials and contractors.

Meets with representatives from water meter, backflow preventer, meter box and cover manufacturers to assure compliance with Miami-Dade County standards; represents Miami-Dade Water and Sewer Department at the American Water Works Association Standards Committee and the American Backflow Preventers National Association.

Makes requests for equipment supplies and materials necessary for completion of work projects; examines blue prints and estimates cost of materials and labor necessary to complete work.

Communicates and enforces established safety measures and regulations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Works with customers and the Customer Service and New Business Divisions to troubleshoot and solve high bills and other water distribution problems.

Performs related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of methods, practices, techniques, materials and tools used in the installation and repair of water distribution lines

##### NATURE OF WORK

This is highly responsible supervisory and technical work planning and directing activities of the Miami-Dade Water & Sewer Department Meter Division.

An employee in this class is responsible for directing and supervising large-scale activities in maintaining, installing and repairing water meters throughout the departmental service area. Responsibilities include reviewing and approving the purchase of equipment and materials, preparing and administering divisional budgets, maintaining large inventories of water meters, developing and installing division policies and procedures, and coordinating work with other divisions of the department. The incumbent exercises considerable independent judgment and technical expertise in assuring that water meters throughout the service area are properly maintained, installed and repaired. Supervision is exercised over subordinate supervisory, technical, semi-skilled and clerical employees engaged in various phases of water meter installation and repair activities or serving in support capacities. General direction is received from an executive who holds the incumbent responsible for effective management of assigned responsibilities and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Directs, supervises and coordinates the work of supervisors and employees engaged in the shop repair of water meters used throughout the departmental service area.

Supervises and directs the work of supervisors and field units engaged in the installation and servicing of water meters throughout the service area; supervises the installation of new piping onto existing water mains.

Directs the elimination of all cross connections, and the installation, testing and maintaining of back flow prevention assemblies.

Designs, develops and installs new policies and procedures governing divisional operations; implements solutions to problems to improve efficiency and effectiveness of water meter installation, repair and maintenance activities.

Provides assistance to other local, state, national and international agencies involved in water meter installations.

Prepares reports concerning water meter production and cost effectiveness measures of water meter repairs.

Reviews and administers annual divisional budget and maintains expenses within budgetary allocations.

Coordinates work with representatives of other operating divisions to resolve problems and plan for future growth and operating requirements.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Extensive knowledge of the operating characteristics and maintenance requirements of water meters, water distribution systems and back flow prevention assemblies.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of the equipment and supplies required for water meter repair installation, maintenance and repair activities.

Thorough knowledge of the geographical layout of the Miami-Dade Water & Sewer Department water and sewer system.

Considerable knowledge of costs, time and materials required to complete water meter installations, maintenance and repairs.

Considerable knowledge of budget preparation and administration.

Ability to coordinate employees, equipment, materials and supplies in the large-scale maintenance, repair and installation of water meters.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

##### NATURE OF WORK

This is advanced technical work in the planning and scheduling of preventive maintenance work for equipment at Miami-Dade County Water & Sewer Department facilities.

Employees in this class are responsible for the Asset Management (Cassworks) software database that allows the department to produce and track preventive maintenance in compliance with mandates from regulatory agencies. Responsibilities include creating, monitoring and modifying database records in Cassworks; serving as a liaison between project managers, field operations, plant supervisors, end users and vendors to create schedules; completing revisions and maintenance of equipment; testing new software modifications; training end users and troubleshooting computer software. Incumbents are assigned to specific areas of expertise, such as electrical or mechanical and exercise considerable independent judgment in ensuring preventive maintenance activities are in compliance with regulatory mandates. Supervision is received from an administrative superior who holds the incumbent responsible for the attainment of established goals and conformity to departmental standards.

##### ILLUSTRATIVE TASKS

Creates, monitors and modifies database records in the computerized Maintenance Management Systems software (Cassworks) for the preventive maintenance program; creates asset numbers, loop tag numbers, master loop numbers and activity definitions.

Serves as liaison between project managers, field operations, plant supervisors, departmental end users and vendors to assess and coordinate preventive maintenance schedules, updates, activities lists, and frequency of maintenance to be performed; prints required reports and work tickets for multiple facilities on a weekly basis.

Completes revisions and maintenance of equipment; conducts inventory and creates new asset information to include barcode labeling and continued maintenance and replacement of identification labels; performs research on equipment maintenance, scans images and PDF manuals and links them to the database.

Trains field personnel on the Remote Entry Work Order Processing (RWOP) system; trains end users in PC operations and Casswork applications used to create service requests and non-scheduled work tickets; tests and troubleshoots software used for Casswork applications; analyzes program for effectiveness and requests required changes.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Considerable knowledge of the electrical or mechanical trades as they apply to the maintenance and repairs of equipment operating at water and sewer facilities.

Considerable knowledge of industry standards and work practices as they apply to the maintenance and repairs of equipment operating at water and sewer facilities.

Considerable knowledge of applicable local codes and ordinances, OSHA safety rules and regulations and the South Florida Building Code.

Considerable knowledge of the computerized maintenance management system.

### **W & S Maintenance Planner/Scheduler (005965)**

Ability to create, monitor and modify database records in the computerized maintenance management system.

Ability to train end users in the computerized maintenance management system.

Ability to test and trouble shoot computer software used in the computer maintenance management system and analyze the program for effectiveness and recommend necessary changes.

Ability to perform difficult technical computations and to make comprehensive recommendations to resolve technical problems.

Ability to establish and maintain effective working relationships with subordinates, superiors and public and private agencies.

Ability to express ideas clearly and concisely, orally and in writing.

NEW/3/07/2007

#### **Nature Of Work**

This is advanced technical work in the planning and scheduling of preventive maintenance work for equipment at Miami-Dade County Water & Sewer Department facilities.

### W & S Plant Electrical Supervisor (005966)

#### Minimum Qualifications

High school diploma or GED. One year of experience as a Plant Electrician with Miami-Dade County are required. Must possess a Miami-Dade County Master Electrician license; or High school diploma or GED and three years of experience as a Journeyman Electrician to include two years of experience in installation, maintenance and repair of low and high voltage electrical and/or electronic systems and equipment in industrial and/or commercial facilities are required. Must possess a Miami-Dade County Master Electrician license .

#### Job Specifications

##### NATURE OF WORK

This is supervisory and highly skilled work in the installation, maintenance and repair of both high and low voltage electrical and electronic systems and equipment used by large water and sewer plants.

An employee in this class supervises and performs skilled electrical and electronic trade, including responsibility for supervising and performing the special work required for high voltage electrical equipment and electronic controls found at large water and sewage plants. Assignments are made either orally or through written work orders, and may be accompanied by diagrams or blueprints. Supervision is exercised over skilled electricians and other skilled and unskilled personnel, and evaluation is made of their work through observation of results. Functional supervision is received from a superior who gives instructions.

##### ILLUSTRATIVE TASKS

Schedules maintenance inspections for a wide variety of electrical equipment.

Maintains accurate records of time spent, material used and repair history of all electrical equipment in plant.

Supervises and assists in the installation, alteration, repair and maintenance of both high and low voltage motors, generators, switchgear, motor controllers, transformers, wiring systems and other related equipment.

Supervises and assists in the installation, alteration, repair and maintenance of special metering, electronic control, recording and telemetering equipment used in water or sewage treatment plants, lift stations and distribution systems.

Uses and instructs others in the use of special electric and electronic tools such as voltmeters, ammeters, insulation testing meters, industrial analyzers, ground testers, oscilloscopes, ohmmeters and cable fault locators; uses special equipment necessary for the maintenance of large motors, generators and transformers.

Provides technical advice and assistance to engineering personnel in the design of high and low voltage electrical and electronic systems and equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge and understanding of electronic, air, mechanical and electrical types of metering, control, recording and telemetering equipment used in water or sewage treatment plants, on water supply and distribution systems, or in incinerators.

Considerable knowledge of the installation, alteration, repair and maintenance of both high and low voltage electrical and electronic systems and equipment.

Considerable knowledge of standard practices, methods, tools and materials of the electrical and electronic trade.

Considerable knowledge of local and national electrical codes.

Considerable knowledge of the hazards of the trade, and of appropriate precautionary measures, particularly as they pertain to work on high voltage electrical systems and equipment.

Ability to plan work for and supervise skilled and unskilled personnel in a manner conducive to full performance and high morale.

Ability to locate and adjust defects in electrical and electronic systems and equipment.

Ability to plan maintenance schedules for electrical and electronic equipment.

Ability to work from electrical diagrams and blueprints, and to understand and effectively carry out oral and written instructions.

Ability to make estimates of time and materials.

Ability to maintain complete records of work performed.

### W & S Plant Electrical Supervisor (005966)

Skill in the care and use of standard and special electrical and electronic tools and testing equipment.  
Ability to follow electrical wiring diagrams on low and medium voltage motor controllers and circuit breakers.

REV 10-77

#### **Nature Of Work**

This is supervisory and highly skilled work in the installation, maintenance and repair of both high and low voltage electrical and electronic systems and equipment used by large water and sewer plants.

### W & S Plant Diesel Maintenance Supervisor (005970)

#### Minimum Qualifications

High school diploma or GED and five years of experience in the installation, repair and maintenance of large diesel systems are required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is skilled and supervisory work in the maintenance, repair and overhaul of large stationary diesel engines, generators and auxiliary equipment.

Employees in this class are responsible for supervising and performing skilled mechanical tasks on a variety of large diesel equipment in a geographically dispersed departmental water and sewer treatment plant operation. Responsibilities include the diagnosis, adjustment, repair and overhaul of diesel machinery and mechanical equipment, establishing preventive maintenance schedules, determining materials, supplies and equipment and maintaining records of maintenance and repair activities. Supervision is exercised over subordinate skilled and unskilled employees through assignment and review of work and provision of assistance with difficult problems. General supervision is received from an administrative and technical superior through personal conferences and inspection of projects in progress and upon completion for quality workmanship and compliance with completion schedules.

##### ILLUSTRATIVE TASKS

Supervises and participates in the diagnosis, adjustment, repair and overhaul of a variety of large stationary diesel engines, generators and auxiliary equipment.

Makes inspections and assists in the repair of injection nozzles, fuel pump governors, compression nozzles and valves, clutches, right-angle drives and related equipment.

Supervises the cleaning, repair and adjustment of gas admission, injection and metering valves; calibrates various pneumatic proportioners, flow regulators, transmitters, pressure regulators and activators for balancing firing pressures and temperatures with use of natural gas as an engine fuel.

Supervises the checking, replacement and fitting of new camshaft bearing and timing gears, main bearings, cylinders and pistons; assists in the replacement of worn accessory spring drive gears, springs and guides.

Supervises the replacement, cleaning and overhaul of engine lubricating oil pumps, water pumps, turbocharger lube oil pumps and speed increaser lube oil pumps.

Performs major lathe work in making parts, reaming bushings and checking shaft alignments; uses arc and acetylene welding equipment to repair broken parts of diesel engines and auxiliary equipment.

Uses various types of shop equipment, precision instruments and specialized tools such as dynamometers, valve refacing, seating equipment, micrometers, dial gauges, grinders, lathes and cylinder cones.

Establishes a schedule of preventive maintenance for all diesel engines, generators and auxiliary equipment.

Determines materials, supplies and equipment required for repair and maintenance work.

Maintains accurate records of time, materials, maintenance and repair history of all diesel engines.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the construction, design, repair and adjustment of a wide variety of large diesel engines, generators and auxiliary equipment.

Thorough knowledge of the tools, equipment, gauges and machinery used in the maintenance and repair of large diesel engines, generators and auxiliary equipment.

Considerable knowledge of preventive maintenance schedules for all diesel engines, generators and auxiliary equipment.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of occupational hazards and safety precautions required in the maintenance and repair of diesel engines, generators

### W & S Plant Diesel Maintenance Supervisor (005970)

and auxiliary equipment.

Knowledge of office practices and procedures.

Ability to plan, assign and supervise the work of a staff of subordinates in a manner conducive to full performance and high morale.

Ability to diagnose, adjust, repair and overhaul a variety of large diesel engines, generators and auxiliary equipment.

Ability to plan preventive maintenance schedules for diesel engines, generators and auxiliary equipment.

Ability to use various types of shop equipment, precision instruments and specialized tools.

Ability to understand and work from blueprints, plans, sketches and construction drawings.

Ability to maintain accurate records of time, labor and materials.

Ability to follow and transmit verbal and written instructions.

Skill in the diagnosis of mechanical repair and maintenance problems.

## Human Resources Department

### W & S Plant Maintenance Supervisor (005972)

#### Minimum Qualifications

High school diploma or GED. Two years of experience as a Plant Mechanic or a Plant Diesel Mechanic with Miami-Dade County are required; or High school diploma GED. Five years of experience in the maintenance, repair and overhaul of diesel engines, power generators or a variety of pumps and related mechanical equipment to include two years of skilled mechanical maintenance experience in treatment processing plants are required.

#### Job Specifications

##### NATURE OF WORK

This is skilled and supervisory work in the installation, alteration, maintenance and repair of a wide variety of mechanical equipment at water and sewage treatment plants.

Work in this class involves responsibility for supervising and performing skilled mechanical tasks on a variety of mechanical equipment used by lime or water and sewage treatment plants. Establishes and operates a preventive maintenance program for all mechanical equipment. Assignments are made either orally or through written work orders, and may be accompanied by diagrams or blueprints. Technical supervision of the incumbent in the performance of his duties. He supervises skilled and unskilled personnel in moderately large numbers in conducting the plant maintenance program.

##### ILLUSTRATIVE TASKS

Supervises and assists in the installation, alteration, maintenance and repair of a large variety of mechanical equipment used by large water or sewage treatment plants, chemical feeders, including: chlorinators pumps, internal combustion engines and agitators; mechanical equipment used for a large lime kiln; mechanical equipment found in flocculators; and filters, grinders, conveyors and screens.

Makes inspections of pumps, turbines and other mechanical equipment, and in kiln brick work; determines materials, supplies and equipment required for repair and maintenance work; packs pumps, repairs valves, pumps, fans and softening equipment.

Establishes a schedule of preventive maintenance for all mechanical equipment to assure to continuous and satisfactory operation of the plant at all times.

Inspects pumps, motors and specialized plant equipment for operating condition and needed repairs; checks and calibrates such devices as flow meters, venturi meters and recording instruments; maintains telemetering devices.

Maintains accurate records of time, material, maintenance and repair history of all equipment at the plant.

Performs cutting and welding with acetylene and electric equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the installation, maintenance and repair of a wide variety of mechanical equipment employed in a large water, lime or sewage treatment plant.

Considerable knowledge of preventive maintenance programs for all equipment at a large plant, and the ability to establish and keep up such a maintenance schedule.

Knowledge of the routine methods of water or sewage treatment, and of the various treatment processes.

Ability to direct and supervise subordinates in mechanical installation, repair and maintenance work.

Ability to work from blueprints, pencil sketches and written or oral instructions.

Ability to keep time, labor and material records, and to prepare clear and concise work reports.

Skill in the use of mechanic's tools, welding and shop equipment in the installation, repair and maintenance of plant equipment.

##### NATURE OF WORK

This is advanced responsible administrative and supervisory work in the review and approval of all commodity and service purchases as well as Capital Construction Projects under five million dollars thru the Miscellaneous Capital Construction (MCC) Program for the Miami-Dade Water & Sewer Department.

An employee in this class is responsible for supervising a subordinate staff of professional employees who are responsible for reviewing and approving the purchasing of goods, services and capital construction commodities. Responsibilities include preparing the Board of County Commissioner (BCC) agenda items, attending Department Director agenda briefings, Budget and Finance Committee meetings and BCC agenda meetings; providing advice and guidance to the Department Director and senior management on high profile issues related to procurement contract BCC agenda items; advising end users of proper acquisition strategy for current and future projects and needs and meeting with engineering staff to plan and review construction capital improvement projects.

The incumbent exercises an extensive degree of independent judgment and technical expertise in developing and providing acquisition strategy through the analysis of marketplace trends and other factors to assure competitive marketplace equilibrium and adherence to County regulations. Supervision is exercised over a staff of professional subordinates engaged in various phases of the procurement process. General supervision is received from an administrative superior who reviews work through personal conferences and written reports for the professional management of procurement activities and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Serves as the departmental liaison between Internal Services, Procurement Management and the Water and Sewer Department's (WASD) Office of Agenda Coordination for all related BCC procurement agenda items; attends BCC Committee meetings as the designated WASD procurement representative; answers questions and makes presentations as required.

Meets with departmental senior management to acquisition strategies for high profile and time critical projects to ensure lean operations while meeting all established goals; supervises the review and approval of all departmental commodity and service purchase orders and capital construction releases thru the MCC Program.

Prepares the Stores/Procurement section budget submittal; monitors the Operations and Maintenance budget for compliance and all approved Emergency Requisition project numbers to ensure divisional accounts are properly accounted for; investigates potential issues in a timely manner and duly reports audit concerns to management.

Supervises subordinate employees responsible for the initiation and administration of numerous county contracts for commodities unique to WASD and for generating and administering all vendor assistance and vendor non-performance issues and concerns.

Supervises subordinate employees involved in managing numerous requisition line items to include centralized stock order replenishment, cycle counts, annual inventory for multiple storeroom locations and daily transfers to accommodate user needs; meets with both internal and external auditors and County Finance staff to ensure the integrity of the process.

Supervises subordinate employees engaged in the processing and awarding of WASD capital construction projects thru MCC Contracts.

Reviews and approves all purchase orders at level 3 for goods and services.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of County regulations and ordinances pertaining to the purchase of commodities and services.

Considerable knowledge of global commodities for specialized contracts in natural gas and chemicals used in water and sewer operations.

Thorough knowledge of the principles of business and public administration.

Considerable knowledge of contract negotiation strategies and techniques.

Considerable knowledge of documentation requirements pertaining to County contracting processes.

Considerable knowledge of public relations principles and techniques.

Knowledge of supervisory principles and practices.

Ability to gather, analyze, interpret, summarize and present complex data in a logical format.

Ability to express ideas and information clearly and concisely, verbally and in writing, to groups and individuals.

Ability to establish and maintain effective working relationships with a variety of public and private officials.

Ability to analyze a complex scope of work and devise appropriate evaluation criteria.

##### NATURE OF WORK

This is highly responsible professional engineering work overseeing the delivery of large regulatory programs for the Miami-Dade Water and Sewer Department.

An employee in this class is responsible for large regulatory driven programs consisting of multiple projects which have potential monetary penalties for non-performance and direct impacts to long term water supplies for Miami-Dade County. Responsibilities include coordinating and expediting multiple projects in order to overcome external obstacles with regulators, consultants, contractors and vendors and internally the efficient transfer of project responsibilities between divisions and assistant director groups. The incumbent exercises an extensive degree of independent judgment and professional engineering and managerial knowledge to insure the overall success and on time delivery of these programs. Supervision is exercised over a staff of contractors, consulting engineers and in-house professional staff engaged in large multi-million dollar construction projects and engineering studies. General direction is received from a Deputy Director who holds the incumbent responsible for the professional management and timely delivery of multi-project programs that impact the ability to secure adequate drinking water supplies and avoid a construction moratorium in Miami-Dade County.

##### ILLUSTRATIVE TASKS

Supervises and coordinates program planning, project development and scoping, budgeting, resource allocation and scheduling.

Supervises and coordinates project design, regulatory review and approval, building permit expediting, expenditure review and approval.

Supervises and coordinates construction, claims review, regulatory problem solving, building inspection expediting, project commissioning and contract closeout.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Thorough knowledge of water resources and regulatory issues.

Thorough knowledge of the workings of state and federal regulatory agencies such as the United States Environmental Protection Agency (USEPA), the Florida Department of Environmental Protection (FDEP) and the South Florida Water Management District (SFWMD)

Thorough knowledge of Water and Wastewater Facilities Master Plans.

Thorough knowledge of the management and maintenance of a large water and sewer utility operation.

Thorough knowledge of project control and tracking systems used for real time project tracking.

Through knowledge of quality assurance approval processes to expedite reasonable and appropriate payments and eliminate contract disputes, delivery delays and work stoppages.

Thorough knowledge of treatment processes used and new technologies for water and wastewater facilities operations.

##### NATURE OF WORK

This is highly responsible professional and supervisory work overseeing and managing public and governmental affairs for the Miami-Dade Water & Sewer Department.

An employee in this class directs, coordinates and administers all aspects of the flow of information between the department and all levels of county government and during emergencies between all levels of local, state and federal government agencies. Responsibilities include public outreach and education; community awareness programs and media relations activities dedicated to the dissemination of information regarding department operations, programs, policies, procedures and its ongoing construction program. Additional responsibilities include emergency preparedness response activities and contingency planning; working with neighborhood communities, business and civil leaders to educate and promote department policies, programs and operations; serving as the department's Public Records Custodian and developing extensive public outreach for programs to inform and educate the public on the use of alternative water supplies required by the state. The incumbent exercises considerable independent judgment in maintaining clear and effective lines of communication between the department and the Offices of the County Manager (OCM), Mayor and Board of County Commissioners (BCC) and providing accurate and timely information to county residents. Supervision is exercised over a staff of professional and clerical employees engaged in assisting with various phases of the work. General direction is received from the department director who holds the incumbent responsible for effectively communicating and promoting a variety of diversified, multi-lingual, water and sewer related public affairs programs.

##### ILLUSTRATIVE TASKS

Acts as departmental liaison with the OCM, Mayor and BCC; provides a coordinated management structure for issues affecting the department by insuring effective communication between departmental senior staff, administrative staff, technical personnel and support staff relating to management and administrative issues, the customer satisfaction survey, Needs Assessment Program and customer complaints and inquiries.

Communicates and promotes a variety of diversified , multi-lingual, water and sewer related public affairs programs to include public outreach and education, community awareness and media relations and new programs associated with Water Reuse, Consumptive Use Agreement, Public Involvement Plan, long term capital programs and the Water Efficiency Plan.

Directs and coordinates research and development of water and sewer educational programs and promotional materials for schools, community groups, and department employees; coordinates television and motion picture production of water and sewer facilities; supervises the production of marketing materials and advertising program to promote greater public knowledge of the department's services and policies; coordinates with the Communications Director and Miami-Dade TV for promotional spots and the management of the Environmental Enhancement Grants that encompass educational programs in schools to include theatre productions, radio shows and hands-on educational displays.

Directs emergency preparedness response activities and contingency planning associated with emergency situations such as hurricanes, sewer overflows, unpermitted discharges, natural disasters and pipe failures and promotes positive press for the department through media relations activities.

Edits and provides creative guidance in the production of annual reports, federally mandated consumer confidence reports, magazines, directories, newsletters, feature articles and other written materials; develops and authorizes content for the department's intranet and internet websites to ensure the public is receiving accurate and timely information.

Supervises the investigation and follow-up of county constituent inquiries and complaints received from the offices of the Mayor, BCC and OCM; oversees activities related to complaints received in the form of "buck-slips" from the OCM.

##### NATURE OF WORK

This is an advanced professional administrative position planning, directing and coordinating the diversified activities of the Intergovernmental Affairs Section.

An employee in this class is responsible for managing through subordinate professional staff the procurement of Professional Architect and Engineering Services; preparing and monitoring Professional Service Agreements and amendments to such agreements; managing the County's Equitable Distribution Program for professional architect/engineering services; preparing and managing long-term wholesale water and sewer agreements and resolving all related utility issues; analyzing and preparing interdepartmental contracts with other entities; preparing Memoranda of Understanding with other County departments; reviewing and commenting on all proposed annexations and incorporations occurring within the county; determining the department's water and sewer service areas and processing the releases of acceptance of such service areas; and verifying the conversion of water and sewer service area maps to the GIS is accurate. The incumbent exercises considerable independent judgment in analyzing various utility issues and responding to achieve the goals and financial interests of the department and meet legal and administrative requirements. Supervision is exercised over a section of professional and clerical employees with assigned responsibilities in the diversified activities of the section. General direction is received from an administrative superior who reviews work through personal conferences and reports for satisfactory attainment of goals and objectives.

##### ILLUSTRATIVE TASKS

Prepares and manages agreements with the department's wholesale water and sewer customers and directs the resolution of complex and varied utility and billing issues related to such service; prepares amendments to said agreements.

Analyzes, directs and coordinates utility issues with the department's executive and senior staff related to the request for interlocal agreements with municipalities and other agencies beside wholesale customers and prepares contracts for other government entities.

Prepares Memoranda of Understanding with other county departments for the provision of various reciprocal services including provision of water and/or sewer service, inspection services, construction or maintenance services, use of facilities and grants of easement to include monitoring construction contracts and provisions for billing service requiring monitoring and management to ensure payment.

Prepares resolutions and ordinance for action by the Board of County Commissioners (BCC) and responds to questions from the County Executive Office concerning items; prepares correspondence for the Water & Sewer Department Director, Assistant Directors and the County Executive Office memoranda to the BCC.

Reviews and responds to annexation and incorporation applications to determine the impact on the county's water and sewer systems.

Directs and manages the procurement of the department's professional engineering and architectural services and prepares professional service agreements; coordinates project information with executive and senior staff from the Water & Sewer and other County Departments; manages the department's use of the county's Equitable Distribution Program.

Acts as the liaison for analyzing and making determinations on all water and sewer service area issues; prepares service area releases to other utilities and acceptance of water and/or sewer service areas from other utilities for the signature of the Water & Sewer Department Director; ensures that the conversion of information to the GIS is accurate.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, SKILLS AND ABILITIES

Thorough knowledge of the principles of management and public administration.

Thorough knowledge of procurement policies, procedures and regulations pertaining to construction contracts and professional service agreements.

Thorough knowledge of the content and format of complex contracts and agreements pertaining to Water & Sewer development projects.

Thorough knowledge of local, state and federal regulations pertaining to contracts and agreements for the design, construction and maintenance of county water and sewer facilities.

Thorough knowledge of utility and billing issues related to agreements with the department's wholesale customers.

Considerable knowledge of the Water & Sewer Department's Multi-Year Capital Improvement Plan.

Considerable knowledge of supervisory principles and practices.

Ability to analyze various utility issues and respond to achieve the goals and financial interests of the department and meet legal and administrative requirements.

## Human Resources Department

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing the complex and diversified operations and activities of the Miami-Dade Water and Sewer Department.

An employee in this class is responsible for planning, directing and coordinating operations of county-wide water distribution and wastewater transmission systems as well as related administrative and support functions. Responsibilities include directing, through subordinate levels of executives and managers, wastewater collection operations and treatment functions, potable water distribution and treatment operations, system maintenance requirements, engineering and construction activities, and a variety of financial, administrative and operational support activities. The incumbent exercises extensive independent judgment and professional managerial knowledge in the administration of a large and complex water and sewer system providing service to the public. Supervision is exercised through subordinate levels of executives, managers and supervisors over a large, diversified and geographically dispersed staff of professional, operational, technical, administrative and clerical employees. General direction is received from the County Manager who holds the incumbent responsible for the professional management of departmental operations and the achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, directs and coordinates, through subordinate executives, departmental administrative and support functions including financial services, employee relations, labor relations, management information systems, materials management, intergovernmental relations, marketing and communications, public services, and service planning and scheduling.

Directs and coordinates, through subordinate executives, water and wastewater operations including facilities maintenance, and operations of distribution and collection system.

Supervises, through subordinate executives and managers, engineering functions including communications, transmission system development, design and engineering, project control, and system and facilities construction.

Establishes departmental projects, functions and direction; sets goals and objectives and monitors their achievement; evaluates services and assesses their effectiveness in meeting the needs of the citizens of Miami-Dade County.

Reviews organizational patterns, work relationships, and staff responsibilities; structures the organization of the department to effectively achieve organizational goals.

Ensures that utility operations meets the regulatory standards specified by State and Federal Governments (Consent Decree); interacts with other County department officials in order to promote a well coordinated and total government service program.

Meets with executive, supervisory and administrative employees to discuss and resolve budgetary issues, operating and maintenance problems, legislative developments, and other items.

Plans, directs, coordinates, and supervises department operations, long and short range planning, and engineering activities.

Meets with the County Manager, Budget Director, Assistant County Attorney, elected County officials, and regulatory and government agencies to discuss and resolve problems encountered in the treatment of water and wastewater. Ensures that all established state and federal

## Human Resources Department

### Director, Miami-Dade Water & Sewer Department (005999)

regulatory standards are met.

Reviews, approves, and monitors expenditures and ensures that they fall within budget allocations.

Meets with outside individuals and groups to get input from the community to discuss concerns related to water and wastewater issues.

Makes decisions regarding hiring, discipline and promotion of subordinates; exercises authority for departmental personnel actions consistent with collective bargaining agreements, County personnel rules, and all other applicable rules and regulations.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the organization, interrelationships and operations of the Miami-Dade Water and Sewer Department.

Extensive knowledge of the mission, goals and objectives of the department in providing quality services and potable water within budgetary constraints.

Extensive knowledge of the principles of general management, business and public administration.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of local, state and federal regulations pertaining to water and wastewater operations and maintenance.

Thorough knowledge of public relations principles and techniques.

Ability to apply advanced professional knowledge of the principles of management, business and public administration in directing, supervising and coordinating a large and complex public utility system.

Ability to plan, organize, direct and coordinate, through various levels of executives, managers and supervisors, the work of subordinates in a manner conducive to full performance and high morale.

Ability to delegate the authority to subordinates necessary to complete responsibilities in varied departmental activities.

Ability to communicate clearly and concisely, verbally and in writing, to groups and individuals.

Ability to establish and maintain effective working relationships with senior County management, elected officials, and officials of other local, state and national organizations.

Ability to exercise judgment and discretion in devising, installing and interpreting departmental and County policies, rules and regulations.

Ability to effectively evaluate the impact of alternative possible courses of action on water and wastewater operations, future developments and circumstances of a new or unprecedented nature.

Ability to determine if departmental standards are being met and to redirect priorities as necessary.

#### MINIMUM QUALIFICATIONS

Bachelor's degree in Engineering . Must possess a State of Florida Professional Engineer license. Ten years of progressively responsible managerial and/or administrative experience in public works engineering, water and sewer construction and/or operation and maintenance to include five years of supervisory experience with duties in engineering and administration of a utility, public works, construction or operation of a water and sewer organization are required.

#### Nature Of Work

This is moderately heavy manual work performing routine housekeeping tasks on an assigned shift in County buildings or facilities.

### Custodial Worker 2 (006002)

#### Minimum Qualifications

Eighth grade. Six months of experience in custodial or janitorial work to include experience in heavy-duty cleaning and manual labor are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is heavy manual work performing more difficult housekeeping tasks on an assigned shift in County buildings or facilities.

Employees in this class perform heavy manual work involving a variety of housekeeping tasks to assist in the maintenance of a variety of County buildings. Duties include operating various types of automatic housekeeping equipment, cleaning restrooms and offices, removing trash, washing windows, vacuuming carpets and mopping floors. Incumbents are responsible for the use of proper methods and materials in cleaning and caring for buildings and equipment. Work is distinguished from that of the next lower class by the requirement for greater skill in the performance of work, more independence of action and primary operation of various types of automated housekeeping equipment. Supervision is received from a custodial supervisor who periodically inspects work in progress and upon completion for satisfactory performance of housekeeping assignments.

##### ILLUSTRATIVE TASKS

Operates automatic housekeeping equipment for floor cleaning including buffing and carpet shampoo machines and other equipment; scrubs, strips and waxes floors and shampoos carpets.

Operates wall vacuum cleaners and wall washing equipment; cleans walls, curtains, drapes and venetian blinds, using ladders as necessary.

Maintains working order and cleanliness of wall washing equipment, floor machines, vacuum cleaners, wet-dry vacuum cleaners, automatic scrubbing equipment, wringers, dollies and floor signs; makes minor repairs when necessary.

Performs routine daily cleaning of offices, lobbies, conference rooms and classrooms; mops floors, dusts and polishes furniture; washes woodwork and fixtures.

Scrubs and disinfects restroom floors; cleans tile, dividers and baseboards; cleans, polishes and disinfects toilets; checks and replenishes linen, toilet paper, handsoap and deodorizers.

Cleans and changes trash and garbage cans and relines with plastic trash bags as required; washes outside surfaces and refrigerators, cabinets and furniture.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the materials, methods and equipment typically used in janitorial work.

Knowledge of operation and routine care of various types of automatic housekeeping equipment.

Knowledge of disinfectants used in cleaning restrooms and other common areas.

Some knowledge of general sanitation standards in cleaning work.

Ability to make minor repairs and adjustments to automatic cleaning equipment.

Ability to work with a minimum of supervision from written job procedures and work schedules.

Ability to understand and follow simple oral and written instructions.

Physical strength and agility sufficient to perform assigned duties.

### Custodial Worker Supervisor 2 (006005)

#### Minimum Qualifications

Eighth grade. One year of experience performing manual labor involving varying custodial or janitorial work to include supervisory experience is required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory custodial work on an assigned shift in county buildings or facilities.

Employees in this class supervise the work of a moderately large staff of subordinate custodial employees engaged in routine and specialized cleaning tasks in county buildings or facilities. Emphasis of the work is on preparing work schedules, assigning custodial employees to various areas and reviewing work in progress and upon completion, training new employees, maintaining records, and ordering supplies. Work differs from that in the next lower class by larger scale supervisory responsibilities, responsibility for custodial functions covering larger geographical areas and by performance of some minor administrative duties. Supervision is exercised over a moderately large staff of custodial workers by assignment of tasks and review of work in progress and upon completion. Supervision is received from a superior through personal conferences and inspection of completed work for satisfactory compliance with instructions and completion of custodial assignments.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a moderately large staff of custodial employees on assigned shifts, directly or through subordinate supervisors, engaged in floor cleaning, dusting, waxing and polishing furniture, cleaning of offices, restrooms and fixtures, shampooing of carpets, wall washing and related tasks in large county buildings or several smaller county buildings in a geographical area.

Prepares work schedules, and assigns employees to work areas; assists supervisors in planning work and schedules; answers questions and assists employees during work in progress.

Trains new employees in the use of cleaning materials and equipment and in cleaning and sanitation methods applicable to the area of assignment; explains changes in procedures, types of cleaning agents or equipment.

Makes rounds and inspects work in progress by crews in various areas of large buildings or working in different buildings or facilities; inspects mechanical equipment and orders repairs as necessary; assures compliance with established sanitation standards.

Requisitions equipment, materials and supplies; issues cleaning and linen supplies and maintains inventory records; prepares reports concerning cleaning supplies and custodial operations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on work related problems; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the materials, methods and equipment typically used in janitorial work.

Considerable knowledge of the operation and routine care of various types of automatic housekeeping equipment.

Knowledge of specialized cleaning agents peculiar to the area of assignment.

Knowledge of sanitation standards established for the area of assignment.

Knowledge of departmental administrative procedures.

Knowledge of supervisory principles and practices.

Ability to plan, assign and review the work of subordinates in a manner conducive to full performance and high morale.

Ability to supervise and coordinate custodial work in different geographical locations.

Ability to train subordinates in the use of materials, methods and equipment.

Ability to understand and follow verbal and written instructions.

### Guard (006008)

#### Minimum Qualifications

Eighth grade. Six months of security experience are required. Must possess a Driver license. Must be able to work nights, weekends and holidays on a varying work schedule.

#### Job Specifications

##### NATURE OF WORK

This is security work in protecting and patrolling public property on an assigned shift for the County.

Employees in this class patrol an assigned area of guard a facility entrance to safeguard grounds, buildings, parking lots, equipment and other property from fire, theft, vandalism and entrance by unauthorized persons. Duties may include operation of a motor vehicle to patrol the assigned area or patrolling on foot, and employees may be required to perform rounds and punch a time clock in accordance with a predetermined schedule. Work is performed in accordance with established rules and regulations and employees are responsible for notifying authorities in the event of emergencies such as fires or unauthorized entrances. Supervision is received from a superior who reviews work through personal conferences and review of reports detailing shift occurrences.

##### ILLUSTRATIVE TASKS

Conducts security patrols on foot and in a motor vehicle; watches for fires, prowlers, suspicious activities and other circumstances which could cause loss or damage to public property; punches a time clock on a prearranged schedule as required.

Patrols public parks, marinas, parking lots, grounds and inside and outside County facilities; reports disturbances, suspicious activities and emergencies.

Assures that lights are turned on and off as required and that doors and gates are properly locked.

Maintains security at the entrance to a County facility to prevent the entrance of unauthorized persons.

Prepares logs and reports of incidents and routine shift occurrences.

Accepts routine documents and messages for delivery to superiors on day shift; answers telephone and provides routine information to the public.

Assists in maintaining appearance and safety of public facility by picking up trash, garbage and other refuse while on assigned patrols, and disposing in appropriate containers.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the geography of the buildings and grounds to which assigned.

Knowledge of the rules, regulations and procedures pertaining to security of the assigned area.

Knowledge of basic security practices and techniques.

Knowledge of the rules and regulations pertaining to admission and exit from County property.

Ability to enforce security regulations in the area of assignment.

Ability to follow prescribed routines in performing security patrols.

Ability to react promptly and correctly in emergency situations.

Ability to prepare logs and reports concerning shift occurrences.

Physical strength and agility sufficient to perform assigned duties.

### Bridge Operator (006010)

#### Minimum Qualifications

Eighth grade. Must have own transportation and be able to work a shift schedule to include weekends. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is light manual work operating a mechanical drawbridge and performing related clerical work.

Employees in this class are responsible for operating a power driven drawbridge on an assigned shift, to allow the safe passage of water and land traffic with a minimum of delay. Duties involve keeping records of water traffic passing under the bridge and records of incidents occurring at the bridge. Supervision is received from a supervisor who assigns shifts and reviews work through personal inspection and review of bridge records and reports.

##### ILLUSTRATIVE TASKS

Operates a power driven drawbridge on an assigned shift; raises and lowers bridge according to pre-arranged schedules or upon proper signal from vessels; engages traffic lights, blinkers and/or warning bells; watches as traffic begins to stop and engages controls to lower automobile gates; operates controls to raise drawbridge; after vessel has passed through bridge, operates controls to lower bridge, raise automobile gates and turn off signals.

Maintains bridge logs by recording time bridge was opened, name of vessel passing through, direction of travel and time bridge was closed; maintains a log of non-routine incidents occurring at the bridge.

Upon bridge malfunction, resets circuit breakers, engages emergency generators, or manually lowers bridge using appropriate controls; informs supervisor of operational trouble with bridge; puts on or takes off balance weights to assist operation of bridge, as required.

Maintains bridge house in clean and orderly manner.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the rules and regulations controlling the operation of drawbridges crossing navigable waterways of the County.

Some knowledge of the construction and operation of power driven drawbridges.

Some knowledge of heavy electrical motors and of power driven hoisting machinery and equipment.

Ability to understand and follow oral or written instructions.

Ability to work independently in the absence of an immediate supervisor.

Ability to keep simple records and to make reports.

Ability to react quickly and calmly in emergencies.

### Laundry Manager (006020)

#### Minimum Qualifications

High school. One year of supervisory and management experience in a high volume commercial or institutional laundry operation is required.

#### Job Specifications

##### NATURE OF WORK

This is large scale supervisory work in laundry management and central linen service in a county facility.

An employee in this class is responsible for the efficient and economical operation and maintenance of a high volume laundry engaged in processing linen supplies, uniforms and various items used in a large medical facility. An additional responsibility may include the rendering of technical advice and assistance to a prisoner-operated laundry at a large county penal institution. Work also includes the supervision of a central linen service unit engaged in mending, repairing and storing laundered supply items. The incumbent in this class exercises considerable independent judgment in discharging the duties required while receiving only general direction from an administrative superior who periodically checks operational efficiency through review of production reports and cost records. Supervision is exercised through subordinate laundry foreman over all assigned personnel by determining quality and quantity production controls and through inspection of work in process.

##### ILLUSTRATIVE TASKS

Assigns, supervises and reviews the work of a large number of laundry employees engaged in receiving, washing, ironing, packaging and delivering laundry to various departments; consults with subordinate supervisory personnel regarding work schedules and problems.

Trains new employees in correct and efficient methods of hand and machine laundry operations, and inspects their work closely until duties are thoroughly learned.

Supervises through a subordinate supervisor, sewing and mending services for the hospital.

Assigns and reassigns personnel in order to meet emergency situations caused by vacation schedules, illness and vacancies in the units; maintains records of time worked by employees; maintains records of production, supplies used, and other costs, and prepares and submits reports on costs and efficiency of laundry and related operations.

Observes, analyzes and revises laundry and sewing room schedules and assignments in order to maintain efficient operation in accordance with varying work load requirements.

Maintains a stock of supplies including soaps, bleaches, starches and other standard laundry supplies; makes or arranges for the making of minor repairs and adjustments to the laundry machines and equipment and to sewing machinery and equipment; sees that machinery is adequately oiled and greased; recommends equipment replacement and writes purchase specifications.

Insures proper training of new employees in hand and machine operations; periodically inspects their work for adherence to work methods. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of large scale laundry methods, materials and practices including the operation and maintenance of washing machines, extractors, tumblers, presses, hand irons and flatwork ironers.

Thorough knowledge of health and safety hazards present in laundry and sewing room operation and of effective precautionary measures.

Considerable knowledge of the basic principles, practices and requirements of operating a central sewing, mending and linen supply service for a large institution.

Ability to plan, assign and supervise the work of a large group of employees in a manner conducive to full performance and high morale.

Ability to instruct and train new employees in laundry operations.

Ability to observe and analyze problems in laundry production and to improve efficiency and working conditions.

Ability to operate all laundry equipment, to instruct others in this operation and to maintain it in good working condition.

Ability to keep records and to prepare reports.

### Parking Lot Attendant (006028)

#### Minimum Qualifications

Tenth grade. Six months of money handling or clerical experience are required.

#### Job Specifications

##### NATURE OF WORK

This is routine operational and clerical work attending public parking facilities.

Employees in this class attend public parking lots, carpool parking lots or parking garages and collect established parking fees and issue receipt tickets. Duties include enforcing parking facility regulations, preparing reports detailing money collected and safeguarding parking facility areas, cars, drivers and passengers. Work is performed independently in accordance with detailed instructions and regulations and occasionally involves exposure to adverse weather conditions. Supervision is received from a specialized or administrative superior, who reviews work through personal observations and exact checks of receipt tickets with money collected.

##### ILLUSTRATIVE TASKS

Collects and records parking fees; makes change, as necessary; directs cars to parking spaces; assures that compact cars park only in designated spaces for small cars and assures that there are the appropriate number of vehicle occupants to qualify for carpool lot parking.

Enforces parking rules and regulations; places and removes barricades in various areas of the parking facility to prevent parking in restricted areas, such as emergency exits.

Reports malfunctions of parking lot equipment, such as automatic ticket dispensers and gates to supervisor; operates gates manually, as required.

Provides general information and directions to car drivers, passengers and the public concerning locations of buildings, locations of public and private organizations and surrounding road network.

Patrols parking areas and reports disturbances, suspicious persons and suspicious circumstances to appropriate authorities.

Completes damage reports for automobile damage or accidents occurring to cars while parked in the parking facility.

Maintains records on number of cars parked and money received; counts money and reconciles balance with tickets issued; safeguards money collected and turns in money, records and unused tickets to supervisor.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the rules, regulations and procedures governing parking facility operations.

Knowledge of simple arithmetic.

Knowledge of basic record keeping techniques.

Knowledge of the locations of various buildings and organizations and the road network in the area of assignment.

Ability to enforce parking facility rules, regulations and procedures with firmness, tact and impartiality.

Ability to provide routine information to the public.

Ability to maintain simple records and prepare reports.

#### Minimum Qualifications

High school. One year of experience as an attendant or manager for a parking facility is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the operation of public parking facilities.

An employee in this class is responsible for planning, assigning and reviewing the work of a staff of specialized employees engaged in attending public parking lots, carpool parking lots or parking garages. Responsibilities include assigning attendants to work locations, establishing work schedules, training new employees, supervising work in progress and assuring the collection and safeguarding of receipts from daily operations. Duties involve arranging for cleaning and repairs of parking facilities and responding to complaints from the public. Supervision is exercised over a staff of subordinate attendants who are assigned responsibility for the operation of various parking facilities. Supervision is received from a professional or administrative superior through personal conferences and review of written reports for efficient and effective operation of a variety of public parking facilities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of subordinate parking lot attendants engaged in the operation of various public parking lots, carpool parking lots or parking garages; assigns employees to work stations; prepares work schedules and revises as necessary due to vacations, illness or other factors.

Makes periodic inspections of parking facilities to assure efficient and effective parking operations; authorizes towing of illegally parked vehicles as necessary.

Issues receipt tickets and collection forms to attendants; makes periodic car counts to verify attendant's records; substitutes for employees as necessary.

Collects daily parking fees from attendants after reconciliation and verifies accuracy of receipts; safeguards money collected and transfers money to appropriate authority.

Provides training to new employees in attendant duties and responsibilities.  
Inspects parking facilities and reports cleaning and repair needs.

Receives and responds to complaints from the public regarding parking facilities; submits reports to superior concerning public complaints.

Requisitions equipment and supplies.

Maintains records of personnel using official business parking facilities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the rules, regulations and procedures governing parking facility operations.

Knowledge of basic personnel practices and procedures.

### Laborer (006030)

#### Minimum Qualifications

Eighth grade. Six months of experience performing manual labor are required. Must be able to work a varying schedule and have reliable transportation.

#### Job Specifications

##### NATURE OF WORK

This is routine unskilled light and heavy manual work in County departments and agencies.

Employees in this class are responsible for the satisfactory performance of light and heavy manual laboring tasks in a variety of construction and maintenance activities. Duties may include the occasional operation of small engine equipment. Work may be closely supervised and performed under the immediate direction of a superior although many tasks may be routine and repetitive in nature and accomplished under general supervision.

##### ILLUSTRATIVE TASKS

Performs a variety of manual tasks not requiring specialized knowledges and skills.

Sprays and trims foliage; cuts grass, pulls weeds, rakes leaves, edges walkways, and trims hedges.

Digs holes for trees and shrubs; ties burlap sacks around roots; assists in planting trees and shrubbery.

Assists trades employees by carrying materials and tools; mixes mortar and concrete using prescribed amounts of material; cleans up job site upon completion of project; loads and unloads materials and tools.

Clears mosquito ditches with bush cutter; digs mosquito ditches with shovels; sprays mosquito larvae using hand-operated compressor.

Washes vehicular equipment; performs rough sanding and masking; cleans shop areas.

Installs road signs; clears brush from roadside; erects barricades.

Sweeps walkways and removes refuse and debris from grounds, buildings and parking lots.

Loads and unloads heavy materials from trucks and other vehicles; moves or aids in moving heavy boxes or equipment and large and bulky objects.

Operates chainsaws, weed eaters and other small engine equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Some knowledge of simple hand tools used in maintenance and construction work.

Ability to understand and follow verbal or written instructions.

Ability to occasionally operate simple power equipment used in maintenance or construction work.

Physical strength and agility sufficient to perform assigned duties.

#### Nature Of Work

This is routine unskilled light and heavy manual work in County departments and agencies.

### Semi-Skilled Laborer (006035)

#### Minimum Qualifications

Eighth grade. Six months of experience as a general helper or laborer are required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is heavy manual work involving limited skills in various maintenance and construction tasks throughout the county.

Employees in this class perform laboring tasks requiring some acquired skills in the use of hand tools, power tools and equipment, or occasional operation of light automotive equipment. Duties may include removing, cleaning, adjusting and lubricating mechanical equipment and assisting journeymen in a variety of trade and craft areas. Employees in this class are responsible for the upkeep and efficient operation of the tools or equipment used. Instructions are usually received orally and routine tasks are performed with considerable independence, more difficult work is performed under the supervision of a foreman or skilled craftsman. All work is subject to inspection while in progress and upon completion.

##### ILLUSTRATIVE TASKS

Operates power spraying equipment in the eradication and control of hyacinths in canals and waterways; cleans culverts and other water control structures.

Removes and replaces air conditioning filters, cleans filters and coils, and re-sets dampers.

Operates power mowers, saws, edgers, and clippers and other equipment used in landscaping and roadside maintenance.

Checks machinery and makes minor adjustments at pumping stations and lift stations; maintains area in a clean and sanitary condition.

Operates, cleans and maintains large power spraying equipment used to control insects, plant pests and weeds.

Performs maintenance work on railroad spur trucks; replaces cross ties, rails and switches; keeps railway right-of-way clear.

Assists in surface preparation and spray painting of signs; cleans, sands, straightens, and repairs signs.

Patches pot holes with hot asphalt; places lime rock along road shoulders, may operate small roller.

Occasionally operates amphibious vehicle in dragging canals for weeds and obstructions.

Occasionally works as helper on dynamite drill rig; fills hole with sand after dynamite is placed.

Occasionally drives heavy construction equipment to and from job sites and assists with preventive field maintenance consisting of oiling and lubrication of equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of power tools and equipment used in building and grounds maintenance.

Knowledge of the occupational hazards and necessary safety precautions applicable to laboring work.

Ability to operate trucks, small rollers, small tractors and similar automotive equipment.

Ability to understand and follow oral and written instructions.

Ability to secure a Florida Chauffeur's license if required.

Skill in the operation of power tools and equipment.

Physical strength and agility sufficient to perform heavy manual labor, and occasionally under adverse weather conditions.

REV 10-66

#### Nature Of Work

This is heavy manual work involving limited skills in various maintenance and construction tasks throughout the county.

### Semi-Skilled Laborer (006035)

#### Minimum Qualifications

Eighth grade. Two years of supervisory experience in road, grounds, facilities or related maintenance are required.

Must obtain a CDL prior to completion of the six-month probationary period.

#### Job Specifications

##### NATURE OF WORK

This is large scale supervisory work with some technical responsibility in general labor operations.

Labor Foremen 3 are responsible for the coordination and supervision of large laboring, equipment operating, and building and grounds maintenance crews. Incumbents frequently have some technical responsibility for specific phases of assigned work, and responsibility for public contacts in connection with assigned projects. These positions are distinguished from the lower class of Labor Foreman 2 in that they work under less supervision, and involve supervising larger crews, maintaining more responsible contacts and performing certain technical phases of operations. All work is under the direction of an engineering or other superior who reviews completed work for thoroughness and adherence to project schedules.

##### ILLUSTRATIVE TASKS

Supervises bridge operators and repairmen, general laborers and equipment in causeway maintenance; supervises the painting of bridges, toll houses, light poles and similar structures; supervises roadway maintenance including road patching and repairing of drawbridges; supervises repairing and replacing of worn out electrical apparatus; keeps required time and work reports.

Supervises a large laboring crew and equipment operators in mosquito control work including clearing brush, digging ditches, placing heavy motorized digging equipment; reads maps as needed; keeps required time and work reports.

Inspects railway trackage for defects and determines needed repairs; supervises adjustment of switches with rails; orders materials for railway repairs; supervises crew in continuous maintenance operations; keeps required reports of time, work and materials.

Supervises a laboring crew and equipment operators engaged in various operations such as waste collection, landscaping, unloading of supplies, grounds maintenance, cleaning of assigned areas, delivery of supplies and related work at a large county hospital.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard tools, materials, methods and techniques of general labor operations, and road and bridge maintenance or related public works maintenance.

Considerable knowledge of the occupational hazards and necessary safety precautions applicable to the work.

Knowledge of the operational characteristics and repair needs of typical public works maintenance equipment.

Ability to coordinate and supervise the work of large numbers of subordinate men and equipment in a manner conducive to full performance and high morale.

Ability to anticipate and plan for maintenance.

Ability to understand and transmit oral and written instructions.

Ability to keep simple records and make simple reports.

Ability to read simple blueprints and diagrams.

REV 7-63

#### Nature Of Work

This is large scale supervisory work with some technical responsibility in general labor operations.

### Sprayer Helper (006043)

#### Minimum Qualifications

Eighth grade. Must obtain a State of Florida Restricted-Use Pesticide Applicator's and a CDL/Class A within the trainee period.

#### Job Specifications

##### NATURE OF WORK

This is specialized work in assisting in spraying and removing weeds, hyacinths, and other vegetation from canals, ditches, canal banks, and roadways.

Employees in this class are responsible for assisting a Sprayer in the spraying and removal of noxious vegetation from canals, ditches, canal banks and roadways, mixing chemicals used in spraying operations, and assisting in the operation of spray boats, pole trucks, spray trucks, and other equipment. Employees typically work long hours in the field and occasionally under adverse weather conditions. Supervision is received from a Sprayer who reviews work for effective assistance in spraying and removing vegetation.

##### ILLUSTRATIVE TASKS

Assists Sprayer in spraying and removing weeds, hyacinths, and other noxious vegetation from canals, ditches, canal banks, and roadways.

Mixes chemicals to be used in spraying operations; places chemicals on or near the bottom of canals, water surface, banks, and roadways, as required.

Assists Sprayer in the operation of spray boat, pole truck, spray truck, and other equipment used in the controlling of aquatic and turf weeds.

Assists in the preparation and maintenance of reports for activities and crew operations; helps maintain records of equipment and spray used.

Contacts property owners and other persons in reference to spraying and treating noxious plant life.

Continues spray operations when Sprayer is absent.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the equipment used in the spraying of aquatic weeds and other noxious vegetation.

Knowledge of the occupational hazards and safety precautions applicable to spray work.

Knowledge of the various types of chemicals used in spraying aquatic weeds and other noxious vegetation.

Ability to operate spraying equipment, including spray boat, pole truck, and spray truck.

Ability to understand and follow verbal and written instructions.

Ability to swim.

Ability to work under occasional adverse weather conditions.

Physical strength and agility sufficient to perform assigned duties.

NEW 10-93

#### Nature Of Work

This is specialized work in assisting in spraying and removing weeds, hyacinths, and other vegetation from canals, ditches, canal banks, and roadways.

### Sprayer (006044)

#### Minimum Qualifications

Eighth grade. Six months of experience in the use of pesticides or herbicides are required. Must possess a current State of Florida Restricted-Use Pesticide Applicator's license. Must obtain certifications in Aquatic and Right-of-Way categories, and a CDL/Class A within the trainee period.

#### Job Specifications

##### NATURE OF WORK

This is specialized work in the spraying and mechanical removal of hyacinths, weeds and related vegetation from canals, ditches and canal banks.

Employees in this classification are responsible for the spraying and removal of underwater weeds and related noxious water vegetation. Employees are required to operate boats, spray pumps and other equipment in controlling aquatic weeds. Work requires the mixing of chemicals to be used and placing of chemicals to obtain maximum weed control. Supervision is exercised over a helper who assists in the placing of chemicals in canals, ditches and other designated locations. Work is reviewed by a superior for achievement of desired results and completion of work assigned.

##### ILLUSTRATIVE TASKS

- Sprays and removes weeds, hyacinths and other noxious water vegetation from canals, ditches and canal banks.
- Mixes chemicals to be used in spraying operation; places emulsified chemicals on or near the bottom of the canal.
- Operates spray boat and other equipment used in the controlling of aquatic weeds.
- Prepares and maintains reports of activities and crew operations; maintains records of equipment and spray used.
- Contacts property owner and other persons in reference to spraying and treating noxious aquatic plant life.
- Conducts on the job training of new employees assigned to spray crew; instructs in the use of spray equipment and the proper handling of chemicals.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Considerable knowledge of the various types of chemicals used in the spraying of aquatic weeds and other noxious water vegetation.
- Knowledge of the equipment used in the spraying of aquatic weeds and other related vegetation.
- Knowledge of the occupational hazards and necessary safety precautions applicable to spray work.
- Some knowledge of effective supervisory techniques.
- Ability to operate spraying equipment, spray boat, pole truck and spray trailer.
- Ability to perform field assignments with a minimum of supervision.
- Ability to keep simple records and make reports.
- Ability to understand and transmit oral and written instructions.
- Physical strength and agility sufficient to work long hours out-of-doors and occasionally under adverse weather conditions.

NEW 10-72

#### Nature Of Work

This is specialized work in the spraying and mechanical removal of hyacinths, weeds and related vegetation from canals, ditches and canal banks.

## Human Resources Department

### Public Works Supervisor 1 (006046)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in road, bridge or canal maintenance or construction are required. Must pass the paving and excavating sections of the General Engineering Contractor's examination during the probationary period. Must possess a CDL/Class A with a tanker endorsement.

#### Job Specifications

##### NATURE OF WORK

This is supervisory and technical work in the maintenance and construction of various public works projects.

Employees in this class provide technical direction and field supervision to a staff of subordinates engaged in the maintenance and construction of diversified facilities, installations and structures. Responsibilities include coordinating employees, equipment and materials for projects, determining work methods and procedures, supervising field construction and maintenance work sites, and assuring that assignments are completed according to schedule and specifications. Duties require the use of some independent judgment in selection of work methods, scheduling employees and execution of work orders. Supervision is exercised over subordinate equipment operators, trades employees and semi-skilled laborers through inspection of work in progress and upon completion. Supervision is received from a technical supervisor who reviews work in progress and upon completion for compliance with plans, specifications and schedules.

##### ILLUSTRATIVE TASKS

Determines number and types of employees required for construction and/or maintenance assignments and assigns subordinates to work crews.

Reads plans and blueprints, and follows written and verbal instructions from supervisor in initiating construction work.

Requisitions equipment, materials and supplies required for assigned projects or maintains inventories as necessary.

Reviews work being performed by subordinates for accuracy in carrying out instructions, and for progress in completing assignments.

Supervises a bike-path construction crew in clearing the right-of-way, preparing base, final surface preparation and final surfacing; supervises an overlay crew in site preparation, traffic control, asphalt spreading and rolling; supervises an asphalt blanket crew in preparation of lots, clearing, base preparation and final surfacing.

Supervises and instructs subordinates in the use and operation of equipment including dumptrucks, oil distribution trucks, asphalt spread box truck and rollers; checks equipment for proper servicing and coordinates preventive maintenance.

Supervises subordinates engaged in bridge painting, repair and replacement of bridge railings, grass and vegetation maintenance, repair and replacement of guardrails, filling of pot holes, toll plaza facility maintenance, road shoulder maintenance and emergency repairs to bridges.

Supervises subordinates engaged in the maintenance, construction, repair and demolition of roads, taxiways, ramp areas, shoulders, culverts, storm sewers and drainage canals at various airport facilities.

Inspects roads and bridges for needed maintenance and responds to public complaints; responds to complaints and initiates action based upon inspections; responds to emergency calls concerning causeways after normal business hours.

Prepares daily work reports, accident reports on injured employees and other reports as required.

Communicates and enforces established safety measures and instructs subordinates in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of public works construction and maintenance methods and techniques and their application to various public works projects.

Considerable knowledge of the tools, equipment and materials used in public works construction and maintenance.

Knowledge of the operating and maintenance characteristics of light and heavy mobile equipment used in public works construction and maintenance.

Knowledge of supervisory principles and practices.

Knowledge of occupational hazards and safety precautions required in the area of assignment.

Knowledge of departmental policies and procedures.

Knowledge of the geographical layout of Metropolitan Dade County.

### Public Works Supervisor 1 (006046)

Ability to supervise subordinates in a manner conducive to full performance and high morale.  
Ability to read and interpret blueprints, schematics and diagrams.  
Ability to keep records and prepare reports.  
Ability to estimate employees, materials and equipment required for public works projects.  
Ability to understand and follow verbal and written instructions.  
Physical strength and agility sufficient to perform assigned duties.

REV 2-84

#### **Nature Of Work**

This is supervisory and technical work in the maintenance and construction of various public works projects.

## Human Resources Department

### Public Works Supervisor 2 (006047)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in heavy equipment operation, public works inspection, public works construction or public works maintenance to include one year of supervisory experience are required. Must possess a Driver license. Must obtain a CDL/Class A with tanker endorsement during the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and technical work in the maintenance and construction of various public works projects. Employees in this class provide technical direction and field supervision to a large staff of subordinates engaged in the maintenance and construction of diversified facilities, installations and structures. Responsibilities include coordinating a large and varied staff of employees, a wide variety of mobile equipment and required supplies for projects, determining work methods and procedures, supervising field construction and maintenance work sites often at dispersed geographical locations, and assuring that assignments are completed according to schedule and specifications. Duties require the use of independent judgment in selection of work methods, coordinating employees at various locations and execution of work orders. Supervision is exercised over equipment operators, trades employees and semi-skilled laborers frequently through subordinate supervisors. Supervision is received from a technical and administrative superior who reviews work through personal conferences, inspection of work in progress and upon completion, and written reports.

##### ILLUSTRATIVE TASKS

Plans and schedules numbers and types of employees required for construction and/or maintenance assignments; requisitions equipment, supplies and materials.

Reads plans and blueprints and lays-out construction projects; explains assignments to subordinates; reviews work performed by subordinates for accuracy in carrying-out instructions and for progress in completing assignments.

Schedules and supervises chemical weed control and spray crews; issues chemicals and maintains inventory; contacts citizens when spraying is being conducted near private property; maintains accurate records of areas sprayed with chemicals.

Schedules and assigns construction and maintenance work on water control dams and structures; assigns work to mechanical weed removal crews; assigns work for canal and ditch debris removal, vegetation maintenance and tree removal; supervises construction and maintenance of culvert crossings.

Supervises through a subordinate supervisor asphalt work around drains and pedestrian paths, preparation of walkways and their resurfacing, and preparation and overlaying of damaged roads.

Supervises construction crews for specialized construction including mini-dumps, drainage projects, shoulder work and parking lots.

Supervises road construction crews in the construction of paved roads including right-of-way clearing, road filling, base preparation, final surface preparation and final surfacing; supervises crews in the construction of rock roads and in their maintenance; supervises roadway patch crews and roadside debris removal crews.

Supervises crews engaged in shoulder maintenance and clean-up, right-of-way clearing and maintenance, lot clearing, roadway median and shoulder grass maintenance, and construction and maintenance of guard rails and barricades.

Supervises crews engaged in construction, renovation and maintenance of Dade County parks including coordinating employees, mobile equipment, tools, equipment and supplies.

Prepares daily work reports, accident reports, and other reports as required.

Communicates and enforces established safety measures and instructs subordinates in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of public works construction and maintenance methods and techniques and their application to various public works projects.

Considerable knowledge of the tools, equipment and materials used in public works construction and maintenance.

Considerable knowledge of the operating and maintenance characteristics of light and heavy mobile equipment used in public works construction and maintenance.

### Public Works Supervisor 2 (006047)

Considerable knowledge of supervisory principles and practices.  
Knowledge of occupational hazards and safety precautions required in the area of assignment.  
Knowledge of departmental policies and procedures.  
Knowledge of the geographical lay-out of Metropolitan Dade County.  
Ability to supervise a large staff of subordinates frequently in dispersed geographical locations, in a manner conducive to full performance and high morale.  
Ability to read and interpret blueprints, schematics and diagrams.  
Ability to coordinate work crews, equipment and materials in geographically separated areas.  
Ability to estimate employees, materials and equipment required for public works projects.  
Ability to keep records and prepare reports.  
Ability to understand and follow verbal and written instructions.  
Physical strength and agility sufficient to perform assigned duties.

#### Minimum Qualifications

High school diploma or GED. Three years of experience in heavy equipment operation, public works construction or public works maintenance to include two years of supervisory experience are required. Must possess a CDL/Class A.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and technical work with administrative responsibility in the maintenance and construction of various public works projects.

Employees in this class are responsible for planning, organizing and supervising large-scale maintenance and construction of diversified facilities, installations and structures. Responsibilities include establishing maintenance and construction priorities, providing for the effective utilization of employees, equipment and materials, reviewing work in progress and upon completion, and assuring that projects are completed in accordance with plans, instructions and specifications. Duties require the use of independent judgment in the large-scale coordination of employees, equipment and supplies to complete maintenance and construction projects. Supervision is exercised through subordinate supervisors over a varied staff of equipment operators, trades employees and semi-skilled laborers engaged in various phases of work. General supervision is received from an administrative superior who reviews work through personal conferences and reports and holds the incumbent responsible for achievement of maintenance and construction objectives.

##### ILLUSTRATIVE TASKS

Establishes repair and maintenance priorities and rearranges as necessary for the effective utilization of employees, equipment and materials. Requisitions supplies, equipment, parts and materials; assures adequate stock of supplies and equipment to complete required construction and maintenance assignments.

Supervises through subordinate supervisors, road construction, rock road construction, road repair and patching, road drainage, guard rail construction and repair, roadside debris removal, roadway mowing and clean-up, and specialized construction projects.

Supervises through subordinate supervisors, chemical weed control spraying, water control dam and structure construction and maintenance, mechanical weed control, canal and ditch debris removal and maintenance, culvert crossing construction and maintenance, and Miami River and Biscayne Bay clean-up activities.

Investigates and reports on conditions of roads or canals and drainage ditches; makes recommendations on required maintenance or repairs; estimates time, materials and numbers and types of employees required to perform and complete work.

Makes periodic checks and final inspections of work projects, assures work is completed in accordance with instructions, plans and specifications.

Responds to after-hours emergencies and assures that appropriate employees are dispatched to resolve problems.

Prepares and submits budget estimates; makes recommendations concerning staffing and equipment requirements.

Communicates and enforces established safety measures and regulations; instructs employees in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of public works construction and maintenance methods and techniques and their application to various public works projects.

Thorough knowledge of the tools, equipment and materials used in public works construction and maintenance.

Thorough knowledge of supervisory principles and practices.

Considerable knowledge of departmental policies and procedures.

Considerable knowledge of the operating and maintenance characteristics of light and heavy mobile equipment used in public works construction and maintenance.

Knowledge of the principles of management.

Knowledge of the occupational hazards and safety precautions of public works construction and maintenance work.

Ability to supervise a large staff of subordinates in a manner conducive to full performance and high morale.

Ability to coordinate employees, equipment and materials over a large geographical area to complete public works projects.

### Public Works Supervisor 3 (006048)

Ability to establish maintenance and construction priorities in the area of assignment.  
Ability to estimate time, employees, equipment and materials required to complete public works projects.  
Ability to prepare various reports and budget documents.  
Ability to read and interpret blueprints, schematics and diagrams.  
Ability to understand and follow verbal and written instructions.

### Bridge Supervisor 1 (006051)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in road or bridge maintenance, in a construction trade, or in electrical and hydraulic equipment maintenance are required; OR one year of experience as a crew leader or chief in a construction or maintenance trade. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is supervisory field work in supervising the operation, maintenance and repair of fixed and power operated bridges throughout the county.

An employee in this class is responsible for planning, assigning and reviewing the work of subordinates engaged in the operation of bascule, vertical lift and swing moveable bridges and the maintenance and repair of fixed bridges, bascule, vertical lift and swing moveable bridges. Emphasis of the work is on coordination of employees, materials and equipment in bridge operations and performing preventive maintenance, emergency and routine repairs, and making modifications to existing bridge structures. Supervision is exercised over skilled trades employees, repairers and other employees by assignment of work and inspection of work in progress and upon completion for adherence to prescribed standards and specifications. Supervision is received from a technical and administrative superior through personal inspections and conferences for satisfactory operation, maintenance and repair of all bridges.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate trades employees, repairers, and other employees engaged in painting, chipping, scraping steel beams and structures, rigging and setting scaffolding, repairing and replacing decking, handrails, wood barriers, maintaining and repairing bridge houses, window frames and doors, constructing and installing traffic gates, and performing welding and gunite preparation and application including removal of spalled and deteriorated parts of the bridge structure, sand blasting, re-rod installation and correct application of gunite.

Plans, assigns and reviews the work of trades employees engaged in repairing and installing switch panels, lights and circuits, installing reducing transformers, traffic warning and gate lights, adjusting electrical thruster brakes, replacing worn-out conduit and wire and assuring electrical inter-lock systems are in working order.

Periodically performs physical inspection of bridges to determine extent of repair or modifications required; assists engineers with inspections, examines blue prints and estimates cost of materials and labor necessary to complete work; prepares diagrams of work for subordinates.

Oversees equipment and vehicles used in bridge operation and maintenance; assures proper scheduling and preventive maintenance.

Oversees the construction and placement of temporary and permanent foot-bridges and fences associated with all types of bridges.

Responds, investigates and initiates action concerning citizen complaints regarding bridge maintenance problems; responds to the U.S. Coast Guard and citizens concerning bridge opening and closure problems.

Plans, schedules, assigns and reviews the work of Bridge Operators assigned to all bascule bridges on the Miami River and Biscayne Bay; schedules and provides training for bridge operators; maintains records regarding bridge openings.

Communicates, posts and enforces U.S. Coast Guard rules and regulations regarding bridges; coordinates, posts and enforces rules and regulations regarding restricted and special event bridge openings.

Requisitions supplies and materials necessary for bridge maintenance and repair.

Communicates and enforces established safety measures and regulations.

Confers with supervisor upon discovery of unusual equipment or maintenance problems; responds to emergencies involving failure of power bridge to operate properly and assures prompt repair.

Keeps records of time and materials required for jobs and submits reports; reviews work reports of subordinates.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the practices, methods, tools, equipment and materials used in the maintenance and repair of fixed and power operated bridges.

### Bridge Supervisor 1 (006051)

Considerable knowledge of the principles and theories of hydraulic, mechanical and electronic equipment as applied to the maintenance and repair of power operated bridges.

Considerable knowledge of the operating, repair and maintenance characteristics of power operated bridges.

Considerable knowledge of the occupational hazards and safety precautions required in the repair and maintenance of bridges.

Knowledge of supervisory principles and practices.

Ability to supervise a group of subordinate tradesmen, repairmen and other employees in a manner conducive to full performance and high morale.

Ability to coordinate work crews, equipment and materials in geographically separated areas.

Ability to interpret and work from simple blueprints, diagrams, sketches or construction plans.

Ability to accurately estimate quantities of materials and time required to complete bridge repair and maintenance jobs.

Ability to keep records and prepare reports.

REV. 3-84

### **Nature Of Work**

This is supervisory field work in supervising the operation, maintenance and repair of fixed and power operated bridges throughout the county.

### Food Service Worker 2 (006081)

#### Minimum Qualifications

Six months of experience as a Food Service Worker 1; or eighth grade and six months of experience in routine food preparation and food service work assisting cooks, dietitians, or other personnel engaged in food preparation in a home, hospital, cafeteria, or similar institutional food preparation environment are required. Applicants will be subject to an extensive screening process to include background investigation, fingerprint check and polygraph examination.

#### Job Specifications

##### NATURE OF WORK

This is food preparation and serving work in performance of more responsible tasks in county homes or institutions.

Work involves assistance to cooks, dietitians and other personnel in a variety of more difficult food preparation tasks such as mixing and baking various puddings, mixing gelatin desserts or sheet cakes, and preparation of various salads including special diet recipes. Employees are required to observe established sanitary standards in the preparing, handling and serving of food and in personal hygiene. Work is performed under the general supervision of cooks, dietitians or other supervisory personnel who inspect results obtained.

##### ILLUSTRATIVE TASKS

Performs a variety of food preparation tasks in the kitchen of a hospital or home; prepares and bakes rice, bread and other puddings; prepares gelatin desserts; mixes and bakes sheet cakes from cake mixes, and prepares various standard cake frostings.

Prepares a variety of fruit and vegetable salads; assembles cold plates for cafeteria.

Prepares desserts, salads and nourishments for various special diets according to standard recipes.

Order supplies for salad, baking or cold plate areas; assists cooks in preparation of soups and vegetables for luncheon or evening meals, or in preparation of breakfast meals.

Performs various cooking tasks in the absence of cooks assigned.

Cleans kitchen and dining rooms and kitchen equipment or utensils, as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles and practices of sanitation and personal hygiene as applied to food preparation and service.

Knowledge of the use and care of food service equipment and kitchen utensils.

Knowledge of food preparation and serving procedures in the unit of assignment.

Some knowledge of a variety of food preparation tasks on a volume basis.

Some knowledge of the requirements of cooking on a volume basis.

Ability to secure a Health card at time of appointment.

Ability to understand and follow oral and written instructions.

Ability to perform a variety of food preparation and assembly tasks.

Ability to work under conditions of high temperature.

REV 10-74

#### Nature Of Work

This is food preparation and serving work in performance of more responsible tasks in county homes or institutions.

### Cook 1 (006086)

#### Minimum Qualifications

Eighth grade. One year of experience in a large-scale food preparation environment is required.

#### Job Specifications

##### NATURE OF WORK

This is cooking of limited skill in the large scale production of meals in a county facility.

Employees in this class are responsible for performing various limited cooking assignments. Incumbents work from menus or instructions from supervisory cooks or dietitians. An additional responsibility includes supervision of a small group of food service workers performing related tasks of food preparation or serving, as assigned. Work is performed under close supervision of a supervisory cook or dietitian who gives instruction in meal preparation and reviews work in progress.

##### ILLUSTRATIVE TASKS

Prepares breakfast; cooks eggs, bacon, sausage, hot cereals and other foods as required.

Prepares short order foods; mixes and prepares soups, starches and entrees; cooks a variety of vegetables and cooks meats.

Places or supervises the placing of foods in steam table pans or containers to be used on tray lines or in the cafeteria, or to be carried by conveyors to go to patients; packs bulk food for cart delivery to hospital floors.

Makes puddings, jellios and other desserts; makes sandwiches or salad plates in periods of heavy workload; bakes simple pastries as assigned.

Operates standard cooking utensils and equipment such as mixing machines, steam cookers, toasters, food choppers, convection oven and microwave oven.

Receives instruction in the cooking of various meats and fowl in various ways, and mixing of gravies and sauces; receives instruction in the preparation of special diet foods.

Supervises and participates in the work of cleaning kitchens, refrigerators, storerooms and dining areas to meet sanitation standards.

Oversees and aids in the proper handling, packaging and storage of food stuffs and the meeting of deadlines for tray lines and cafeteria service.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of materials and methods used in preparation of food on a large scale, and the use and care of utensils and equipment.

Knowledge of standard recipes and cooking methods for various breakfast, luncheon and supper meals.

Knowledge of health hazards in food preparation and service and necessary precautionary measures.

Knowledge of sanitary requirements.

Some knowledge of general nutrition and diets.

Some knowledge of food menus, values, relative costs and portion control.

Ability to do simple cooking on a large scale.

Ability to work from written menus and standard recipes and adapt quantities for varying numbers of people.

Ability to operate standard cooking equipment and utensils for large scale food preparation.

Ability to supervise food service workers in a manner conducive to full performance and high morale.

Ability to follow oral and written instructions in exact detail.

Ability to work under conditions of high temperature and stress.

REV 10-77

#### Nature Of Work

This is cooking of limited skill in the large scale production of meals in a county facility.

## Maintenance Mechanic (006101)

### Minimum Qualifications

Eighth grade. One year of skilled automotive, heavy construction, and/or farm equipment maintenance and repair experience to include experience in engine repair is required. Must have own hand tools. Must possess a Driver license.

### Job Specifications

#### NATURE OF WORK

This is skilled work at the journeyman level in the maintenance and repair of buildings, machinery and mechanical equipment.

An employee in this class performs specialized mechanical work in a manual trade or as a skilled journeyman in more than one craft. Work involves the maintenance and repair of machinery and mechanical equipment such as pumps, engines, motors, pneumatic tubes and electrical apparatus used in a wide variety of public building structures. Employees work independently using handtools, power tools and various precision-measuring and testing instruments. Assignments may be given in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning machinery. Work is reviewed by a maintenance foreman who inspects work occasionally in progress and upon completion for compliance with instructions and serviceability of the equipment repaired.

#### ILLUSTRATIVE TASKS

Overhauls and maintains power mowing, sawing and pumping equipment; rebuilds fractional horsepower gasoline engines; uses special tools such as valve facers, reamers, cylinder hones, drills and grinders, gauges, micrometers, taps and dies.

Repairs short circuits and broken wires; installs or replaces electrical fixtures; repairs and replaces electric motors; repairs and replaces switches, relays, transformers and other electro-mechanical components in paging systems, pneumatic tube systems and other electrical communications systems.

Repairs the less complex hospital equipment; repairs blood pressure apparatus, chart racks, operating tables and similar medical apparatus. Does electric and acetylene welding, brazing and silver soldering; repairs, modifies and makes new installations of pipe fittings; performs skilled plumbing work on steam and water lines and related plumbing equipment.

Repairs and maintains a variety of laundry machinery and equipment such as washers, extractors, tumblers, dryers, flatwork ironers and related apparatus.

Repairs and opens defective locks, changes lock combinations, disassembles doorlocks, padlocks, combination locks, handcuffs; replaces worn or broken parts, changes tumblers for new combinations; fabricates new and duplicate keys, using key cutting machine; installs master lock system for an entire building center; makes repairs to jail electrical lock system, adjusts timers, line brushes selenoids, capacitors, resistors, rectifiers and related parts of transit tube system.

Examines form and texture of parts to detect imperfections; inspects worn parts to determine changes in dimensional requirements, uses rules, calipers, micrometers and similar measuring instruments.

Adjusts functional parts of devices and control instruments; uses hand tools, levels, plumb bobs and straightedges.

Occasionally sets up and operates lathe, drill press, threading machine, grinder and similar metalworking power tools.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods, materials, tools and practices used in a specialized trade or in the building, electrical or mechanical crafts.

Considerable knowledge of the occupational hazards and safety precautions of the building, electrical or mechanical trades.

Knowledge of the principles of mechanics.

Knowledge of the repair and maintenance characteristics of a wide variety of governmental building structures, mechanical equipment and powered machinery.

Ability to detect defects in machinery and equipment and to make the necessary repairs or adjustments.

Ability to work from oral or written instructions, from simple diagrams and sketches.

Ability to make simple time and materials estimates.

Skill in using a variety of standard hand tools, machines and power equipment used in a craft or in building and machinery repair work.

### Maintenance Mechanic (006101)

#### Nature Of Work

This is skilled work at the journeyman level in the maintenance and repair of buildings, machinery and mechanical equipment.

#### Minimum Qualifications

Eighth grade. Six months of experience servicing or maintaining truck equipment relating to heavy tire repair are required. Must obtain a CDL/Class A prior to the completion of the one-year probationary period. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in the routine and emergency road-call servicing of a variety of truck tires.

Employees in this class are responsible for various tasks in the standardized tire and wheel maintenance of County vehicular equipment. Duties include tire repair, wheel repair or refurbishment, removal and replacement of tire and wheel assemblies, maintaining routine records of servicing activities and rebuilding of tire and wheel assemblies. Work occasionally requires making minor mechanical adjustments to County vehicles which are typically not at the journeyman mechanic level. Supervision is received from a technical superior who periodically reviews work in progress and upon completion for satisfactory accomplishment of assigned responsibilities.

##### ILLUSTRATIVE TASKS

- Dismounts, breaks-down, repairs, builds-up and remounts tires and wheels.
- Operates wheel/tire rebuild machines.
- Services vehicle wheel and tire requirements.
- Changes and repairs tires, wheels and tubes; checks and adjusts air pressure.
- Cleans garage and work areas, and buildings, as required.
- Keeps routine records of servicing activities, as needed.
- Observes established safety practices and procedures.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Knowledge of basic recapping technology.
- Knowledge of the location, nomenclature and function of less complex parts of County mobile equipment.
- Knowledge of single and double-ring wheels.
- Knowledge of recordkeeping procedures in the area of assignment.
- Ability to operate computerized tire/wheel balancing equipment.
- Ability to operate heavy duty truck equipment.
- Ability to follow verbal and written instructions.
- Ability to adhere to established safety practices and procedures.
- Skill in the operation of heavy pneumatic wrenches.
- Skill in the operation of automated tire/wheel rebuild equipment.

NEW 6-91

#### Nature Of Work

This is semi-skilled work in the routine and emergency road-call servicing of a variety of truck tires.

### Aircraft Technician (006106)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in military or civilian aircraft maintenance and electrical avionics skills in the American Eurocopter AS350B-(2)(3), Bell helicopter models 206, 212, or 412, or similar military helicopters are required. A Federal Aviation Administration (FAA) Airframe and Powerplant Mechanic license and a FAA Inspector Authorization license are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled mechanical and technical work in the maintenance and repair of reciprocating and turbine powered aircraft and aircraft equipment.

Employees in this class are responsible for specialized diagnostic and mechanical work in all phases of repair, service and preventive maintenance of aircraft and aircraft engines to ensure air worthiness. Additional responsibilities include troubleshooting and repair of more difficult and sophisticated mechanical, electrical and auxiliary aircraft systems. An Aircraft Mechanic is also required to perform a variety of advanced tasks in repairing and maintaining component parts of various types of aircraft and aircraft engines in accordance with Federal Aviation Authority regulations and manufacturer's recommendations. The Aircraft Mechanic is charged with the efficient and orderly operation of the maintenance shop and with maintaining the necessary parts and equipment inventory. Work involves determining work methods and procedures, requisitioning needed parts, and keeping records of parts inventory and work completed. Work is performed in a largely independent manner with general supervision provided by a technical and administrative superior. Independent judgment is exercised in making decisions in accordance with technical knowledge possessed and existing departmental policies.

##### ILLUSTRATIVE TASKS

Confers with supervisor to plan daily work program, adjust schedule to meet fluctuations in maintenance needs.

Coordinates with supervisor the requisitioning, receipt, and storage of a variety of aircraft and aircraft engine parts, tools and the maintenance of the respective inventory records.

Provides for preventive maintenance scheduling of aircraft to assure that all equipment is serviced in accordance with Federal Aviation Authority regulations and manufacturer's recommendations.

Maintains various records pertaining to time and mileage, use of equipment, lubrication needs, replacement of parts, and repairs made on all aircraft equipment.

Estimates labor and parts required for proposed work; prepares and submits required information for cost accounting program.

Diagnoses, adjusts, repairs and maintains a variety of aircraft and aircraft engines.

Uses various types of shop equipment, precision instruments and specialized tools suited to the repair of aircraft and aircraft engines, both reciprocating and turbine.

Performs preventive maintenance functions to ensure proper aircraft operation; makes necessary adjustment to aircraft frame and power plant.

Troubleshoots and repairs when necessary the more difficult and sophisticated mechanical, electrical and auxiliary systems.

Repairs and replaces a variety of aircraft components and assemblies.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the methods, materials and tools of the aircraft mechanical trade.

Thorough knowledge of the operating and repair characteristics of all aircraft equipment in departmental use.

Thorough knowledge of the tools and equipment needed for repairs of reciprocating and turbine powered aircraft equipment.

Thorough knowledge of the occupational hazards and safety precautions of the trade.

Considerable knowledge of the principles and techniques of shop management in the aircraft trade.

Ability to diagnose defects and failures of aircraft equipment and make all necessary repairs.

### Aircraft Technician (006106)

Ability to keep detailed cost and job records.  
Ability to requisition all necessary aircraft engine parts and tools.  
Ability to read and interpret diagrams, sketches and blueprints.  
Ability to follow oral and written instructions.  
Skill in the care and use of tools, equipment and materials of the aircraft mechanical trade.

NEW 10-75

#### **Nature Of Work**

This is skilled mechanical and technical work in the maintenance and repair of reciprocating and turbine powered aircraft and aircraft equipment.

No Job Specification Available

**Nature Of Work**

This is skilled mechanical and technical work with supervisory responsibility in the maintenance and repair of reciprocating and turbine powered aircraft and aircraft equipment.

### Light Equipment Technician (006112)

#### Minimum Qualifications

Eighth grade. Two years of skilled experience in the diagnosis, test, replacement, repair, overhaul, and maintenance of diversified automotive and passenger vehicle equipment such as engines, transmissions, air-conditioning systems, ignitions, differentials, brakes, electrical systems, and other vehicular systems are required. Must possess a Driver license. Must possess or obtain an Automotive Service Excellence (ASE) Certificate for Servicing Motor Vehicle Air-Conditioning prior to the completion of the probationary period. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is technical work at the journeyman level in the diagnosis, repair and preventive maintenance of diversified automotive and passenger vehicle equipment.

Employees in this class perform skilled work in the repair and overhaul of mobile equipment, including automobiles, vans and trucks up to 10,000 pounds Gross Vehicle Weight. Work involves repairing and overhauling engines, transmissions, air-conditioning systems, ignitions, differentials, brakes, electrical systems and other vehicular systems. Related duties may include maintaining customer relations, entering information pertaining to work orders into a computer terminal, inspecting vehicles after commercial repair, and maintaining parts inventories. Supervision is received from a shop supervisor or other superior who reviews work for satisfactory performance of equipment repaired or maintained.

##### ILLUSTRATIVE TASKS

- Tests, inspects, and repairs vehicle emission equipment to comply with vehicle emission legislation.

- Diagnoses and repairs complete electrical systems, including electric drive motors and regenerative electric systems.

- Employs onboard computer systems and other external computerized diagnostic systems in the performance of repair and maintenance work.

- Inspects, diagnoses, repairs and overhauls brake systems, including Anti-lock Brake Systems (ABS).

- Diagnoses and repairs suspension and steering systems.

- Debriefs vehicle operators to understand driveability concerns and affect appropriate repairs.

- Performs some minor body work including removal and replacement of body parts; inspects vehicles after commercial repair; adjusts and aligns body parts and hardware, as required.

- Diagnoses and repairs automotive transmissions/transaxles.

- Orders repair parts and maintains adequate parts inventory.

- Diagnoses and repairs air-conditioning systems in compliance with current environmental regulations.

- Prepares and completes work orders; operates a computer terminal to enter information and research vehicle repair history in the automated Equipment Management System.

- Performs preventive maintenance, including complete unit inspections, changing fluids/filters, and adjustments; performs lubrications and repairs all defects, as required.

- Road tests and certifies equipment before returning to in-service status.

- Repairs flat tires and performs wait-jobs, as required.

- Cleans and maintains shop, tools, and shop equipment.

- Observes established safety practices and procedures.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Considerable knowledge of design characteristics of a wide variety of mobile equipment.

- Considerable knowledge of the operating characteristics and maintenance requirements of a variety of automotive equipment, vans, passenger vehicles and trucks.

- Considerable knowledge of modern diagnostic techniques used to detect defects in automotive equipment operation.

- Considerable knowledge of the repair and adjustment of mobile equipment parts, assemblies, components and operating systems.

### Light Equipment Technician (006112)

Knowledge of automotive tools, equipment and materials.

Knowledge of occupational hazards and safety precautions of automotive repair and maintenance work.

Ability to use modern devices and techniques to diagnose malfunctions in automotive equipment.

Ability to use automotive repair tools and equipment to perform preventive maintenance and effect difficult repairs.

Ability to perform complete preventive maintenance procedures.

Ability to diagnose, repair and overhaul engines, transmissions, air-conditioning systems, electrical systems, and other vehicular systems and subsystems.

Skill in automotive mechanics.

Skill in the diagnosis and testing of mobile equipment malfunctions.

Skill in the care and use of automotive tools and equipment.

### Light Equipment Technician Supervisor (006113)

#### Minimum Qualifications

High school diploma or GED. Five years of experience in the repair and maintenance of automotive equipment such as light trucks, lawnmowers or other small engine equipment are required. Must possess a Driver license. Must obtain a CDL/Class B during the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is skilled and supervisory mechanical work in the planning, assigning and inspecting of shop maintenance, overhaul and repair of a wide variety of automotive equipment and light trucks.

Employees in this class are responsible for planning, scheduling, assigning and inspecting all phases of automotive maintenance and repair work performed by subordinate journeyman mechanics, skilled and unskilled employees. Duties also include supervision of the motorcycle and police boat maintenance section of the mobile equipment facility. Incumbents must exercise independent judgment in implementing service orders, adapting materials and tools, and assigning personnel to accomplish required work on schedule. Supervision is exercised over journeyman mechanics, mechanic helpers, automotive servicemen and shop laborers. Work is reviewed by a technical and administrative superior through occasional inspection and conferences for satisfactory completion of daily workload schedules and proper functioning of equipment repaired.

##### ILLUSTRATIVE TASKS

Plans, schedules, assigns and inspects the work of a group of skilled automotive mechanics, trades helpers and assistants in the diversified maintenance and repair of various types of mobile equipment such as passenger vehicles, ambulances, motorcycles, light trucks and police boats.

Supervises and instructs automotive mechanics in the replacement, repair and installation of transmissions, differentials, generators and magnetos, voltage regulators, radiators and brakes; supervises paint and body work, completion of road tests and preventive maintenance checks.

Performs skilled automotive mechanic work in difficult repair, adjustment and rebuilding as needed.

Requisitions parts, gas, oil and grease; reviews time cards and work reports and maintains required records.

Communicates and enforces established safety measures and regulations.

Supervises a satellite repair facility engaged in the repair and maintenance of specialized light equipment; reviews work reports of subordinates; maintains stock, equipment usage, purchase and related records.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods, materials, tools and procedures in the automotive mechanic trade.

Considerable knowledge of the operating, repair and maintenance characteristics of modern light mobile equipment.

Considerable knowledge of the occupational hazards and safety precautions required in the repair and maintenance of mobile equipment.

Knowledge of the mechanical characteristics and maintenance requirements of motorcycles and boats used in police work.

Knowledge of repair facility records, procedures and inventory systems.

Knowledge of supervisory practices and procedures.

Ability to supervise a group of subordinate mechanics and skilled and unskilled personnel in a manner conducive to full performance and high morale.

Ability to diagnose and instruct subordinates in technical maintenance work.

Ability to keep simple shop records.

Skill in the diagnosis of technical maintenance problems and the use of various shop tools, equipment and machinery.

### Light Equipment Technician Supervisor (006113)

#### **Nature Of Work**

This is skilled and supervisory mechanical work in the planning, assigning and inspecting of shop maintenance, overhaul and repair of a wide variety of automotive equipment and light trucks.

### Heavy Equipment Technician (006114)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the maintenance, overhaul, and repair of heavy duty automotive or vehicular equipment or diesel powered construction equipment are required. Must possess a CDL/Class A.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the diagnosing, repair and preventive maintenance of diversified trucks and other heavy equipment.

Employees in this class perform skilled work in the repair and overhaul of waste trucks, trash trucks, dump trucks, fire rescue units, fire suppression units, fire rescue/suppression support units, water trucks, wreckers, garbage packers, trailers, tractors, forklifts, stake body trucks, light towers, trash cranes, refrigerated reefer trucks, sweepers, vactors, cement trucks, basket lifts, bush hogs, buses, boats, backhoes, pressure cleaners, welders, chainsaws, chippers, compost mixers, compressors, foggers, edgers, jack hammers, fuel trucks, bomb trucks, motorhomes, auger trucks, lube trucks, paddy wagons, step vans, spray rigs, and other equipment. Work involves diagnosing repairing and overhauling engines, transmissions, HVAC systems, ignitions, electrical systems, hydraulic systems, differentials, 5th wheels, brakes, hydrodynamic systems, fuel delivery systems, suspensions, steering, and other systems. Related duties may include maintaining customer relations, operating a computer terminal to enter work order information and research vehicle repair histories, inspecting vehicles after commercial repairs, new vehicle inspection and preparation, and maintaining parts inventories. Supervision is occasionally exercised over maintenance repairers, semi-skilled laborers and heavy truck tire repairers assisting in various phases of work. Supervision is received from a shop supervisor or other superior who reviews work for satisfactory performance of equipment repaired, overhauled or maintained.

##### ILLUSTRATIVE TASKS

- Tests, inspects and repairs vehicle emission equipment in compliance with vehicle emissions legislation.

- Diagnoses and repairs complete electrical systems, suspension and steering systems, and truck transmissions/transaxles.

- Employs onboard computer systems and external computerized diagnostic systems in the performance of repair, overhaul and maintenance work.

- Inspects, diagnoses, repairs and overhauls hydraulic and air brake systems, including Anti-lock Brake Systems (ABS).

- Debriefs vehicle operators to understand driveability concerns and affect appropriate repairs.

- Performs some minor body work, including removal and replacement of body parts; inspects vehicles after commercial repair; adjusts and aligns body parts and hardware, as required.

- Orders parts and maintains adequate parts inventory.

- Diagnoses and repairs air-conditioning systems in compliance with environmental legislation.

- Changes vehicle tires and wheels.

- Prepares and completes work orders; operates computer terminal to enter information and research vehicle repair history in the automated Equipment Management System.

- Performs preventive maintenance, including complete unit inspection, changing fluids and filters, and making adjustments; performs lubrication and repairs all defects.

- Operates, diagnoses and repairs fire suppression hydrodynamic systems.

- Adjusts, repairs and overhauls complete hydraulic systems on various truck applications.

- Inspects, diagnoses and repairs power take-off (PTO) systems.

- Diagnoses and repairs fossil fuel delivery systems, including natural gas (CNG), diesel fuel injection, and gasoline powered equipment.

- Operates, diagnoses and repairs aerial ladder equipment.

- Performs wait jobs, as required.

- Cleans and maintains shop, tools, and shop equipment.

- Performs repairs on highway roadside or remote sites when necessary.

- Road tests and/or certifies equipment before returning to in-service status.

- Inspects new equipment and assures contractual specifications have been met prior to vehicle acceptance.

- Observes established safety practices and procedures.

- Performs related work as required.

### Heavy Equipment Technician (006114)

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of design, repair and maintenance characteristics of assemblies, components and systems of a wide variety of heavy equipment applications.

Considerable knowledge of the hand tools and computerized diagnostic equipment needed for major and minor repairs to fossil fuel powered equipment.

Considerable knowledge of specialized equipment used on emergency response, public works, and solid waste collection and disposal vehicles.

Knowledge of the occupational hazards and safety precautions of heavy duty truck repair and maintenance work.

Ability to use modern devices, techniques and equipment to diagnose malfunctions in a wide variety of vehicles and their associated equipment.

Ability to diagnose, repair, maintain and overhaul a wide variety of heavy vehicles and specialized equipment.

Ability to read and understand service and parts manuals.

Ability to follow verbal and written instructions.

Skill in the diagnosis and testing of a wide variety of heavy duty trucks and associated specialized equipment.

Skill in heavy duty truck mechanics.

Skill in the care and use of tools and equipment used in the diagnosis and repair of heavy duty trucks and associated equipment.

#### **Nature Of Work**

This is skilled work at the journeyman level in the diagnosing, repair and preventive maintenance of diversified trucks and other heavy equipment.

### Utility Equipment Technician Supervisor (006116)

#### Minimum Qualifications

High school or GED. Three years of experience in the maintenance, overhaul, and repair of heavy duty automotive or vehicular equipment or diesel powered construction equipment are required. Must possess a CDL/Class A. NOTE: License requirement may vary depending upon equipment serviced and driven.

#### Job Specifications

##### NATURE OF WORK

This is skilled and supervisory mechanical work in the planning, assigning and inspecting of shop and field maintenance, overhaul and repair of a wide variety of heavy duty trucks, diesel powered construction equipment and related heavy mobile equipment.

Employees in this class are responsible for planning, scheduling, assigning and inspecting all phases of heavy equipment maintenance, repair, overhaul and fabrication work performed by subordinate journeyman mechanics and related shop employees. Duties include participation in maintenance and repair work as needed and fabrication of specialized parts for heavy mobile equipment. Incumbents must exercise independent judgment in implementing service orders, adapting materials and tools, and assigning personnel to accomplish required work on schedule. Supervision is exercised over journeyman mechanics, machinists, welders, maintenance repairers and related shop employees. Work is reviewed by a technical and administrative superior through occasional inspection and conferences for satisfactory completion of daily workload schedules and proper functioning of machinery and equipment overhauled and repaired.

##### ILLUSTRATIVE TASKS

Plans, schedules, assigns and inspects the work of a group of skilled mechanics and related shop personnel engaged in maintenance, overhaul and repair of a wide variety of heavy duty construction equipment and heavy duty trucks such as cranes, rollers, loaders, graders, bulldozers, draglines, amphibious equipment, garbage packers, trash trucks, heavy duty material dump trucks and similar equipment.

Supervises the overhaul of assemblies and parts such as six-speed automatic transmissions, conventional five-speed transmissions, single and two-speed rear axles, hydraulic systems, compressed air mechanisms, garbage packers and ejector systems, vacuum and electric control systems and components.

Supervises the overhaul of alternators, generators, magnetos, voltage regulators, distributors, carburetors, radiators, cooling systems, power storing assemblies and the installation of pistons, pistons sleeves and bearings.

Supervises the testing of various equipment in order to locate defects in the operation and as a check on completed overhaul and repairs before returning equipment for operational use.

Diagnoses causes of equipment failure and malfunction in difficult or unusual jobs; performs skilled and specialized work as needed in the repair, adjustment and rebuilding of equipment.

Communicates and enforces established safety measures and regulations.

Supervises and assists machinists in the fabrication of special equipment and parts requested by operating personnel as well as the welding work in the repair and fabrication of various types of equipment and body work.

Plans the ordering of specialized equipment and parts necessary in completing assigned jobs or in preventative maintenance.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the methods, material, tools and procedures in heavy automotive and heavy duty truck mechanics.

Thorough knowledge of hydraulics in the form of pumps, motors, and cams.

Thorough knowledge of the principles of both diesel fueled and gasoline internal combustion engines and the repair and maintenance of a wide variety of earth-moving and similar heavy construction equipment and heavy trucks.

Thorough knowledge of the occupational hazards and safety precautions of heavy equipment shop work.

Thorough knowledge of various testing equipment utilized to detect electrical and hydraulic problems.

Knowledge of supervisory practices and procedures.

Ability to plan, assign, inspect and coordinate the work of journeyman mechanics and other personnel in a manner conducive to full performance and high morale.

## Human Resources Department

#### Minimum Qualifications

High school graduate or GED. Four years of experience in diversified automotive fleet maintenance, fleet management or fleet procurement. Completion of coursework may substitute for the required experience on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is responsible mobile equipment management work involving fleet purchasing, maintenance and cost accounting for a county department.

The incumbent in this class is responsible for the effective planning, coordination and administrative utilization of all mobile equipment for the department. Work involves developing policies and procedures to be used in procuring and maintaining mobile equipment. Duties require the use of technical skill and independent judgment in analyzing mobile equipment management techniques and in recommending procedures to increase efficiency and economy. Supervision is exercised over subordinate personnel engaged in cost accounting and record maintenance. General supervision is provided by an administrative superior who reviews work primarily for conformity with departmental policy and management objectives.

##### ILLUSTRATIVE TASKS

Researches and evaluates modern trends in mobile equipment management including design and manufacture of special purpose vehicles.

Develops preventive fleet maintenance programs utilizing manufacturers' specifications; reviews the purchase of all mobile equipment.

Prepares contract specifications and assists in the analyzing of bids of the purchase of standard types of automotive equipment.

Maintains records for all mobile equipment purchases with careful analysis of expenditures for respective budget codes.

Provides intra-departmental allocation of vehicles, transfer of vehicles, and assignment for emergency situations.

Provides liaison with mobile equipment division to maintain an efficient preventive maintenance program.

Assists the insurance and safety unit on an accident review board involving departmental vehicles.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of all phases of large scale mobile equipment management.

Thorough knowledge of automotive equipment design, manufacturing and maintenance.

Thorough knowledge of large scale fleet maintenance management for various types of mobile equipment.

Considerable knowledge of current concepts and modern techniques used in fleet utilization and replacement.

Considerable knowledge of cost accounting as applied to vehicular fleet maintenance.

Ability to develop operating procedures and management systems to improve efficiency.

Ability to illustrate automotive engineering data and to prepare contract specifications.

##### NATURE OF WORK

This is technical work in the analysis of fleet equipment and maintenance programs in a large centralized mobile equipment operation. Employees in this class are responsible for performing a variety of technical work involving mobile equipment management, special equipment, purchasing, modification, design, pricing and vehicle retirement. Responsibilities include inspecting mobile equipment servicing operations, and performing research and analysis tasks in the evaluation of manufacturer's data, blueprints and specifications to be used in procuring and maintaining a wide variety of earth-moving equipment, passenger vehicles, police and fire mobile units and large capacity refuse hauling trucks. Duties require technical skill and independent judgment in analyzing currently used techniques and in recommending procedures to increase efficiency and economy. Supervision is received from an administrative superior who reviews work for technical quality of results and for achievement of desired objectives.

##### ILLUSTRATIVE TASKS

Researches modern trends in mobile equipment management including design modifications and manufacture of special purpose vehicles. Prepares contract specifications and analyzes bids for the purchase of standard and specialized types of automotive, material handling, personnel carriers and off-road equipment.

Conducts studies of fleet maintenance work; reviews and analyzes labor costs, work scheduling and quality control factors.

Inspects fleet preventive maintenance program utilizing manufacturer's specifications and automotive engineering principles; reviews the purchase of parts and maintenance supplies.

Prices equipment needs of various departments for budget preparation.

Reviews and inspects shop operations to solve problems involving scheduling of work and breakdowns of equipment.

Conducts bidders' facilities inspection to qualify bidder for technical competency and ability to comply with qualitative, quantitative and scheduling contractual requirements.

Performs duties in the interpretation monitoring and claims adjusting of manufacturer/dealer warranty programs.

Prepares equipment acceptance and title documentation.

Reviews equipment acceptance inspection procedures and qualifies documentation for conformity to specifications and county procurement procedures.

Prepares acceptance material for property management, equipment management system entry, accounts payable and finance.

Conducts equipment and material failure analyses, identifying causes and responsibility and recommends corrective action and prevention procedures.

Monitors the accounting and contractual requirement of T.C.B., T.C.L. and lease/purchase contracts.

Prepares mobile equipment rental/lease contracts; coordinates county departments' involvement in county wide contracts and monitors the application and effectiveness of contract specifications.

Organizes county agency and department approved requests for mobile equipment into common base contracts; advises the requesting user of the proper mechanical mating of accessories and functional attachments to the base vehicle.

Identifies vehicles and equipment subject to safety recalls.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the design, operating and maintenance characteristics of automotive equipment.

Considerable knowledge of automotive and heavy equipment repairs, preventive maintenance and overhauling procedures.

Considerable knowledge of technical specifications pertaining to automotive and heavy equipment, and to related equipment systems and accessories.

Knowledge of operations, facilities and policies of a large scale mobile equipment management operation.

Knowledge of automotive equipment purchasing methods and procedures, specification preparation and bid analysis.

Knowledge of current concepts and modern techniques used in vehicle utilization and replacement.

### **Fleet Management Analyst 1 (006126)**

Knowledge of cost accounting methodology as applied to vehicular fleet maintenance.

Ability to prepare contract specifications, tabulate and analyze bids.

Ability to develop operating procedures and management systems to improve efficiency.

Ability to communicate ideas effectively, verbally and in writing.

Ability to exercise discretion and judgment in implementing operating systems and procedures.

Ability to research technical information, evaluate data and prepare concise reports of findings.

Skill in the diagnosis and overhauling of automotive vehicular and related equipment.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible administrative and supervisory work in the management of County mobile equipment repair and maintenance activities.

Employees in this class are responsible for supervising, planning and directing the work of subordinate facility and shop supervisors, journeyman mechanics, and semi-skilled and unskilled workers engaged in the servicing, overhauling, repairing and maintaining of heavy and light mobile equipment. Responsibilities include managing multiple vehicle servicing operations, establishing and enforcing safety practices and procedures, monitoring revenues and expenditures, conducting financial analyses concerning trends and changes in service needs, establishing productivity goals and job standards, implementing procurement procedures for the purchase of services and commodities, and coordinating employees and equipment for countywide service projects. Incumbents exercise considerable independent judgment in planning and organizing fleet operations to achieve service goals and objectives. Supervision is exercised through subordinate supervisors over employees engaged in various phases of fleet servicing activities. General supervision is received from an administrative superior who reviews work through personal conferences and written reports for the professional management of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Plans, directs and coordinates the work of fleet facility and shop supervisors, journeyman mechanics, semi-skilled and unskilled employees engaged in supervising, or servicing, overhauling, repairing and maintaining heavy and light mobile equipment.

Evaluates staffing of fleet servicing facilities by job classifications and shifts to meet demand for fleet services.

Assists in the development of safety programs and disseminates safety information to supervisors and employees; enforces safety practices and procedures.

Monitors and projects fleet management revenues and expenditures; conducts financial analyses of service areas taking into consideration historical data, future trends and changes in service needs by users.

Develops and evaluates fees and charges to users; evaluates feasibility of using outside contractors for fleet repair work.

Oversees preparation of records for the timely collection of revenues including charges to users, warranty reimbursements, and other items.

Establishes and monitors productivity goals and job standards; develops and implements procedures to assure provision of effective fleet services.

Implements County procurement procedures for the purchase of services and commodities; maintains inventory and tracking of parts and equipment in service function areas.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Extensive knowledge of the principles and techniques of fleet management and administration.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of the methods, materials and tools used in the servicing, repair and maintenance of heavy and light mobile equipment.

Considerable knowledge of occupational hazards and safety precautions required in the repair and maintenance of mobile equipment.

Considerable knowledge of County procurement practices and procedures.

Considerable knowledge of cost accounting and equipment life cycle costing.

Ability to manage and direct geographically dispersed fleet serving operations to achieve established goals and objectives.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to analyze fleet management revenues and expenditures and make recommendations concerning user charges.

## Human Resources Department

##### NATURE OF WORK

This is advanced professional training work in the County's centralized fleet management operation.

An employee in this class is responsible for planning, conducting and coordinating training programs for Metro-Dade County mobile equipment technicians. Responsibilities include performing research on new and upcoming technology developed by vehicle manufacturers, developing county training programs, and teaching or coordinating a wide variety of training sessions. The incumbent exercises considerable independent judgment in the design, development and implementation of highly technical mobile equipment training programs. General supervision is received from an administrative superior who reviews work through conferences and written reports and holds the incumbent responsible for the continual improvement of fleet management technician skill levels.

##### ILLUSTRATIVE TASKS

Conducts and coordinates training programs for fleet management technicians including, gasoline engine driveability diagnostics, electronic fuel injection; computer controlled carburetion, emissions control systems, electronic ignition, diesel engine driveability diagnostics, gasoline and diesel engine mechanical malfunctions, repairs and adjustments, electrical system diagnostics, electronic systems diagnostics, use of diagnostic test equipment, electronically controlled transmissions, hydraulic systems, air brake systems, hydraulic brake systems and hybrid brake systems.

Conducts research into new and upcoming technology to develop in-house training programs for technicians; attends training sessions offered by Original Equipment Manufacturers.

Procures and evaluates video tapes for use by technicians or in group training sessions.

Evaluates current fleet management repair capabilities to determine where deficiencies exist and develop remedial training programs.

Establishes sources for the procurement of technical repair and maintenance data for vehicles.

Coordinates Original Equipment Manufacturers' provided training requirements for technicians prior to delivery of vehicles; coordinates training program content with Original Equipment Manufacturers.

Evaluates proposed shop repair equipment for simplicity of operation, durability and benefits versus costs; assists in development of specifications for equipment.

Conducts NIASE training sessions for fleet management technicians.

Maintains NIASE certifications in all automotive and heavy-duty truck areas.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of general adult educational theories and principles.

Thorough knowledge of current techniques, methods and practices of technical education.

Considerable knowledge of State of Florida motor vehicle technical and safety criteria.

Considerable knowledge of electronic theory as applied to automotive on-board computers, sensors and actuators.

Considerable knowledge of electrical theory as applied to starters, alternators, regulators, batteries, relays and switches.

Considerable knowledge of automatic theory as related to NIASE Technician Certification Examinations.

Considerable knowledge of electronic fuel injection, computer controlled carburetion, emission control systems and electronic ignition.

Ability to plan, implement and teach technical training programs.

Ability to present classroom instruction using techniques to achieve training objectives.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to prepare detailed technical specifications.

Ability to perform technical automotive-related research and prepare technical reports.

Skill in the repair and maintenance of automotive and heavy-duty equipment.

### Fleet Management Training Specialist (006135)

Skill in the diagnosis of gasoline and diesel engine malfunctions, brake and hydraulic system malfunctions, electrical and electronic system malfunctions, air conditioning malfunctions, and tire problems.

NEW 6-91

#### **Nature Of Work**

This is advanced professional training work in the County's centralized fleet management operation.

### Fleet Administrative Supervisor (006139)

#### Minimum Qualifications

Bachelor's degree in Industrial Management, Business Administration, Public Administration or a related field. Three years of experience in a large fleet management program to include management analysis and vehicular acquisition are required. A Master's Degree in Business or Public Administration or a business-related field may substitute for one year of the required experience.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible administrative work in fleet operations for the Fleet Management Division.

Employees in this class are responsible for supervising subordinate professional, technical, and administrative employees engaged in various aspects of fleet management operations. Responsibilities may include supervising the development of technical specifications for mobile equipment, commodity, and service contracts; preparing budget documents, automotive replacement analysis and purchase recommendations, addition of new vehicles, and disposal of surplus vehicles; development of an automated equipment management system and supervision of divisional management information systems. Incumbents exercise considerable independent judgment in the application of the principles of management to the administration of complex fleet operations. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Supervises, plans, and assigns the work of subordinate employees engaged in specification development, and bid evaluations for mobile equipment; prepares specifications and performs bid evaluations for commodity and service contracts.

Monitors vendor performance under contracts to assure that expenditure levels are in conformance with projections.

Researches and directs the recovery of funds from manufacturer/vendor programs as they relate to acquisition and/or disposal incentives, warranty, and total cost bid programs.

Monitors warranty tracking through an automated process to include entering and finalizing claims on manufacturer warranties, component warranties, and commercial repair warranties.

Supervises, plans, and assigns the work of subordinate employees engaged in the acceptance of new vehicles, and disposal of surplus vehicles annually.

Prepares and monitors vehicle trust fund budget; prepares annual projections of expenditures and revenues to assure sufficient funding for the continual acquisition and replacement of vehicles.

Performs various studies concerning complex data and concepts designed to enhance operation of the division, and improve utilization of various types of mobile equipment.

Establishes chargeback rates necessary to assure continuity in the vehicle replacement trust fund.

Supervises, plans, and assigns the work of subordinate employees involved in the development and implementation of divisional management information systems.

Proposes program improvements in the automated equipment management system, and works with data processing representatives to plan structural changes and identify any system inadequacies.

Monitors the automated fuel system to assure that computers are functioning properly and recording all pertinent data.

Provides both standardized and ad hoc reports from the equipment management system, for the division director, other divisional authorities, and other departments.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of large-scale mobile equipment management, manufacturer warranties, purchase and incentive programs.

Thorough knowledge of the policies and procedures involved in large-scale budget preparation.

Thorough knowledge of the principles of general management, public, and business administration and their application to governmental administration.

Thorough knowledge of applicable county, state, and federal laws, rules, and regulations pertaining to division operations.

Thorough knowledge of contract, and leasing practices, and methods in mobile equipment acquisition.

### **Fleet Administrative Supervisor (006139)**

Thorough knowledge of automated equipment management systems for a large fleet operation.  
Considerable knowledge of supervisory principles and practices.  
Considerable knowledge of the principles, practices, and methods of large-scale and diversified fleet management utilization.  
Ability to create and implement operating procedures and management systems to improve efficiency.  
Ability to plan and organize the work of subordinate employees in a manner conducive to full performance and high morale.  
Ability to write analytical/statistical reports which factually support recommended changes in policies or procedures.  
Ability to exercise judgement and discretion in devising, installing, and interpreting division, department, and County policies, rules, and regulations.  
Ability to establish and maintain effective working relationships with vendors, departmental personnel, and county officials.  
Ability to communicate clearly and concisely, verbally, and in writing, to groups and individuals.

### Driver-Messenger (006202)

#### Minimum Qualifications

High school diploma or GED. Must possess a Driver license. Must maintain a safe driving record and be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is routine vehicle operation and minor clerical work in a departmental messenger service.

Employees in this class are responsible for operating an automobile, van or similar vehicle to pick up and deliver mail, records, materials, equipment or other items. Responsibilities include operating motor vehicles between various County and vendor locations, performing minor vehicular maintenance and servicing, and performing routine clerical tasks. Work requires some manipulative skill and dexterity in operating mobile equipment safely while driving under varying road and weather conditions. Supervision is received from an administrative superior who reviews work for prompt and efficient delivery and pick up of various items and safe operation of the motor vehicle.

##### ILLUSTRATIVE TASKS

Operates a passenger vehicle, van, light truck or similar vehicle to deliver and pick up mail, packages, records, materials, equipment, documents and other supplies at various County and vendor locations.

Performs minor routine maintenance and service to vehicle including checking fluid levels, tire pressures and fuel levels; cleans interior of vehicle on a regular basis.

Performs routine clerical tasks including alphabetizing, sorting and filing materials, and answering the telephone in accordance with standard procedures.

Picks up requisitioned supplies and materials from vendors; purchases items using petty cash funds as required.

Acts as courier for the delivery or pick up of special, priority or confidential mail.

Provides transportation for County employees and officials for local work-related travel as required.

Completes route sheets and mileage reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the road network and geography of Dade County.

Knowledge of local traffic regulations.

Knowledge of defensive driving methods and techniques.

Knowledge of the location of County and vendor facilities.

Knowledge of the records, forms and reports required in the area of assignment.

Some knowledge of office practices and procedures.

Ability to operate an automobile, van or similar vehicle safely and efficiently.

Ability to understand and follow verbal and written instructions.

Ability to perform minor clerical tasks according to standardized procedures.

Skill in the operation of automotive equipment.

Physical strength and agility sufficient to perform assigned duties.

### Automotive Equipment Operator 1 (006205)

#### Minimum Qualifications

Eighth grade. Six months of experience operating light equipment such as tractors and trucks, dump trucks, water tank trucks, or similar equipment are required. Must possess a CDL/Class B. A driving performance test will be given at the time of interview.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of trucks and similar types of automotive equipment.

Employees in this class are responsible for operating dump and stake body trucks, water carriers, light tractors, vans, motorized sweepers, wreckers, pick up trucks, fork lifts and other vehicles used in varied operations throughout the County. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operation checks and routine preventive maintenance. Work requires some manipulative skill and dexterity in operating vehicles safely while driving under varying road and weather conditions. Supervision is received from a supervisor who reviews work in progress and upon completion for proper equipment operation and thoroughness in carrying out assigned tasks.

##### ILLUSTRATIVE TASKS

Drives dump truck, flatbed truck or other vehicle and transports labor crew, materials, supplies, tools and equipment to work sites; supervises laboring tasks in roadway patching, road shoulder and median maintenance, and weed cutting.

Operates light tractor with attachments used in mowing, drilling, grading beaches, removing seaweed, spreading fertilizer, sweeping, aerifying, and spraying grass in park areas.

Operates tank truck and oil distributor in roadway resurfacing and related maintenance; operates a roller to prepare parking lot, roadway or bicycle path surfaces.

Drives passenger bus to transport students and others; drives van and stake body vehicle to deliver building supplies, laundry and various materials.

Operates a sweeper tractor to remove refuse from roadways, parking lots and other areas.

Operates heavy duty wrecker equipped with crane and winch; hoists and tows disabled vehicle to repair shop.

May assist labor crew with assigned tasks or direct work of labor crew on landscape, roadway or other maintenance jobs.

Performs routine pre-operational checks and routine preventive maintenance of equipment; makes minor adjustments to equipment in the field.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the operational characteristics of medium-sized trucks and similar types of automotive equipment.

Knowledge of safe driving techniques and the occupational hazards of motorized equipment operation.

Knowledge of local traffic rules and regulations.

Some knowledge of the geography and road network of the metropolitan area.

Ability to operate an assigned vehicle in the prescribed manner.

Ability to detect improper functioning mechanical systems on an assigned vehicle.

Ability to make minor adjustments and to perform minor servicing of automotive equipment.

Skill in driving medium-sized trucks and similar automotive equipment.

#### Minimum Qualifications

Eighth grade. One year of experience operating medium and/or heavy-duty automotive or medium and/or heavy-duty construction equipment such as 10 cubic yard (or larger) dump trucks, bucket trucks, 40-foot flatbed with tractors, backhoes, root pruners, auger trucks, bobcats, forklifts, dozers or similar equipment is required. Must possess a CDL/Class A.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled work in the operation of large vehicles and similar types of public works equipment.

Employees in this class are responsible for operating tractor trailers, heavy duty road rollers, front end loaders, small bulldozers and other vehicles used principally for maintenance and construction purposes. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operational checks and routine preventive maintenance. Work requires skill and dexterity in using simultaneous control mechanisms on assigned vehicles. Supervision is received from a maintenance or construction supervisor who reviews work in progress and upon completion for proper equipment operation and thoroughness in carrying out assigned tasks.

##### ILLUSTRATIVE TASKS

Transports construction equipment using a low bed trailer; operates tractor trailer in local hauling tasks; loads and unloads vehicles as required.

Operates heavy duty road roller in resurfacing and roadway construction.

Operates front-end loader or small tractor rigged with hydraulic loading lift and back hoe digging shovel.

Operates amphibious vehicles used in spraying and removing vegetation from canals and waterways.

Drives truck and operates hydraulic aerial hoists used in tree maintenance; uses crane and winch attachments for loading and placing various equipment and materials.

May operate smaller earth-moving equipment such as bulldozers, graders and mobile hydrocranes.

Operates mowtrim or boom-mounted saw to trim roadside vegetation and canal banks.

Operates large dump truck to haul construction materials or debris.

Operates large street sweeper for road maintenance.

Operates a single bed trash truck with chipper attachment to cut back visual obstructions and hazardous roadside vegetation.

Performs routine pre-operational checks and routine preventive maintenance of equipment; makes minor adjustments to equipment in the field.

May assist labor crew with assigned tasks or direct labor crew on landscape or construction jobs.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the operational characteristics of large vehicles and larger types of automotive equipment.

Knowledge of large vehicles and public works equipment used for maintenance and construction purposes.

Knowledge of safe driving techniques and the occupational hazards of motorized equipment operation.

Knowledge of local traffic rules and regulations.

Some knowledge of the geography and road network of the metropolitan area.

Ability to operate an assigned vehicle in the prescribed manner.

Ability to detect malfunctions while operating heavy equipment.

Ability to make minor adjustments and to perform minor servicing of assigned automotive equipment.

Skill in the operation of heavy automotive and public works equipment.

#### Minimum Qualifications

Eighth grade. Two years of experience operating medium and/or heavy-duty automotive or medium and/or heavy-duty construction equipment are required. Must possess a CDL/Class A. A performance test will be given on some or all of the following equipment: lowboy, motorgrader, truck mounted hydraulic excavator, large construction roller, dozer, and truck loader. Successful completion of Public Works Department's Automotive Equipment Operator 3 Training Program.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of heavy duty earth-moving equipment.

Employees in this class operate large diesel-powered vehicles used in varied maintenance and construction tasks. Duties include the operation of equipment with complex control systems requiring a high degree of manipulative skill and dexterity. Incumbents are responsible for the safe and efficient operation of the equipment and for performing routine pre-operational checks and routine preventive maintenance. Supervision is received from a field supervisor who inspects work in progress and upon completion for effective equipment operation and compliance with engineering standards.

##### ILLUSTRATIVE TASKS

Operates road grader in roadway construction and maintenance work; builds road crown, slopes shoulders, spreads materials, blades drainage ditch; finishes work to grade.

Rigs and operates crane, dragline, backhoe, pile driver and similar power shovel equipment; drags, hoists, swings and dumps materials using clamshell and bucket attachments for digging, widening and cleaning waterways and drainage ditches.

Operates large hydraulic bulldozer to clear land for roadways, parking areas and other facilities.

Operates a large grade-all to clean and maintain ditches, provide uniform grade to canal banks, and for excavation in canal construction and maintenance.

Operates truck-mounted and crawler type excavating machines in the performance of a variety of construction and maintenance tasks.

Operates large beach scraper in cleaning and grading ocean park areas; removes seaweed, debris and refuse while sloping and redistributing sand.

Inspects equipment before starting; checks lubricants, cooling system, hydraulic and electrical systems; makes necessary minor adjustments; reports malfunctions to supervisor; field tests equipment after servicing.

May serve as a crew leader over a small field crew of equipment operators and laborers.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operating characteristics of heavy duty earth-moving equipment.

Considerable knowledge of the occupational hazards and safety precautions applicable to the operation of construction equipment.

Knowledge of basic maintenance requirements of heavy construction equipment.

Ability to detect malfunctions while operating heavy construction equipment.

Ability to make adjustments and to perform minor maintenance to heavy equipment.

Ability to perform earth work according to engineering specifications.

Skill in the operation of large earth-moving equipment.

### Automotive Equipment Operator 3 (006207)

#### Minimum Qualifications

Eighth grade. Must be able to lift and handle 50 pounds and work four ten-hour days and all holidays.

#### Job Specifications

##### NATURE OF WORK

This is heavy manual labor in the collection and disposal of refuse and recyclable material, including yard trash.

Employees in this class perform routine work as part of a crew in collecting garbage, refuse, recyclables, yard trash and other waste materials, and in transporting them to the designated disposal and recycling locations. Work is characterized by the necessity for considerable physical exertion and by close daily contact with unpleasant materials. Employees are expected to work out-of-doors regardless of weather. All work is closely supervised by the truck driver in charge of the crew.

##### ILLUSTRATIVE TASKS

Performs waste, recyclable and yard trash pickup at garbage disposal areas of commercial, residential, and other designated locations.

Performs curbside pickup in residential areas.

Uses pitchforks, shovels, and similar hand tools to pick up general refuse, garbage, recyclables, trash, and yard trash from curbside and other areas as instructed.

Rides with truck to disposal locations and/or recycling centers; assists truck operator and disposal personnel in off-loading.

Assists truck driver in fueling and checking all fluid levels of assigned truck, including spares; cleans out trucks, including cab interior, daily, upon route completion.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Ability and willingness to work with unpleasant waste materials.

Ability to use simple hand tools.

Sufficient physical strength and agility to lift, move, and carry very heavy objects.

Willingness to work under all conditions of weather.

REV 12-93

#### Nature Of Work

This is heavy manual labor in the collection and disposal of refuse and recyclable material, including yard trash.

### Trash Truck Driver 1 (006209)

#### Minimum Qualifications

One year of experience as a Waste Collector, Waste Attendant 1 or Waste Attendant 2 are required. Must possess a CDL/Class B or higher-rated license; OR one year of experience operating medium or heavy duty automotive, or construction equipment, such as a 10 cubic yard (or larger) dump truck, 40 yard roll-off truck, water tank truck, passenger buses or similar equipment are required. Must possess a CDL/Class B or higher-rated license.

#### Job Specifications

##### NATURE OF WORK

This is automotive equipment operation work in a residential refuse removal service or at a solid waste facility.

Employees in this class drive large capacity open carriers or similar vehicles used in transporting trash or ash to designate dumping sites throughout the metropolitan area. Incumbents are responsible for the safe and efficient operation of the truck as well as making the necessary maintenance checks. Work requires the use of defensive driving skills and sufficient stamina to operate large trucks in unfavorable weather conditions. Work involves exposure to dust, smoke, and adverse weather. Supervision is received from a field supervisor who assigns routes, schedules and equipment operational requirements.

##### ILLUSTRATIVE TASKS

Operates trash truck in the collection of trash and rubbish throughout the county.

Operates dump trucks in the hauling of fill or ash for use at sanitary fill sites.

Operates water truck, motor powered sweepers, and riding lawnmowers.

Transports refuse to designated sites; operates dumping control to empty vehicle.

Inspects equipment before starting, reports malfunctions to supervisor, field tests equipment after servicing, maintains cleanliness of equipment inside and outside.

Assists labor crew with assigned tasks.

Keeps record of refuse quantities removed.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the operational characteristics of dump trucks and similar types of automotive equipment.

Knowledge of safe driving techniques and the occupational hazards of motorized equipment operations.

Ability to operate the assigned vehicle in the prescribed manner.

Ability to detect improper functioning mechanical systems on the assigned vehicle.

Ability to follow prescribed instructions and work without constant supervision.

Skill in driving medium sized trucks.

REV 04-09

#### Nature Of Work

This is automotive equipment operation work in a residential refuse removal service or at a solid waste facility.

### Trash Truck Driver 2 (006211)

#### Minimum Qualifications

Continuous employment, permanent status and two (2) years of acceptable on-the-job performance as a Waste Attendant 1, Waste Attendant 2 or Waste Collector and successful completion of the Department's Trash Truck Driver 2 Training Program is required. Must possess a valid CDL/Class A.

OR,

Continuous employment, permanent status and two (2) years of acceptable on-the-job performance as a Trash Truck Driver 1 or Waste Truck Driver. Must possess a valid CDL/Class A.

OR,

Two (2) years of experience operating medium or heavy-duty automotive equipment, such as tractor-trailers, automated or manual garbage trucks, large dump trucks, passenger buses or similar equipment is required. Must possess a valid CDL/Class A license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of tractor trailers.

Employees in this class operate large carrier vehicles having a large gross vehicular weight when loaded. Incumbents transport solid waste from a transfer station to a designated disposal site in the metropolitan area. Incumbents are responsible for the safe and efficient operation of the equipment as well as making the necessary maintenance checks. Work requires skill and dexterity in operating large trucks on residential streets or public highways. Supervision is received from a supervisor who assigns schedules and advises on equipment operational requirements.

##### ILLUSTRATIVE TASKS

Operates a semi-tractor trailer in transporting solid waste to a designated site; operates hydraulic mechanism to expel contents of trailer at dump site.

Inspects equipment before starting, including safety checks and fluid levels, reporting malfunctions to supervisor.

Maintains a record of the number of loads transported, the time involved and the mileage.

Assists labor crew with loading tasks; administers minor first aid when necessary and reports injuries to the supervisor.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operational characteristics of large tractor trailers.

Considerable knowledge of safe driving techniques and the occupational hazards of large motorized equipment operations.

Some knowledge of the geography of the metropolitan area including road network and departmental facilities.

Ability to follow established safety procedures to assure safe equipment operation.

Ability to operate the assigned vehicle in the prescribed manner.

Ability to detect improperly functioning mechanical systems on the vehicle.

Ability to follow instructions and work without constant supervision.

Skill in the operation of heavy duty automotive equipment.

### Trash Truck Driver 2 (006211)

REV 4-81

#### **Nature Of Work**

This is skilled work in the operation of tractor trailers.

### Trash Crane Operator (006212)

#### Minimum Qualifications

One year of experience as a Trash Truck Driver 1, Trash Truck Driver 2 or Waste Truck Driver with Miami-Dade County is required. Must possess a CDL/Class A.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation of moderately heavy rubbish collection equipment.

Employees in this class are responsible for the safe and efficient operation of various hydraulic crane and front-end loader equipment used in a neighborhood refuse collection service. An employee in this class drives and operates the boom hoist or various small and medium sized wheel-mounted cranes rigged with clamshell buckets or operates a front-end loader with a bucket at the flat trash and recycling centers and throughout the streets and major roadways of the unincorporated metropolitan area. A trash crane operator is required to exercise considerable manipulative skill and dexterity in the operation of the equipment and to use caution in safeguarding nearby persons, property, and moving traffic. Some routine vehicle maintenance is required in order to sustain satisfactory equipment operation. Supervision is received from a district supervisor who inspects assigned routes for work thoroughness and investigates complaints.

##### ILLUSTRATIVE TASKS

Operates moderately complex hydraulic equipment in the collection, transfer and removal of trash, rubbish, and other acceptable refuse.

Drives a trash crane or similar equipment to and from the assigned collection route with accompanying refuse collection vehicles.

Drives a semi-tractor with lowboy to transport payload to and from assigned work sites with accompanying refuse collection vehicles.

Positions crane and loads deposited trash into an open waste vehicle by means of a suspended clamshell bucket.

Positions payload with selected bucket and pushes up trash; loads deposited trash into an open waste vehicle.

Cautions children and others who may hazardously gather in the collection area.

Examines working condition of equipment daily and performs routine service maintenance, adjusts controls, and connects buckets to boom when necessary; loads payload onto semi-tractor with lowboy, connects lowboy to tractor when necessary.

Answers questions from the public regarding collection schedules and acceptable refuse materials.

Acts as crew leader for truck drivers and laborers assigned to the route; keeps simple record of areas covered by collection equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operational characteristics of hydraulic cranes and front-end loaders used in refuse collection.

Considerable knowledge of the occupational hazards and safety precautions pertaining to heavy equipment operations.

Knowledge of the component parts, operating principles, and maintenance requirements of heavy equipment.

Knowledge of the local traffic ordinances with particular emphasis on heavy equipment movement.

Ability to detect needed repairs and to make necessary adjustments.

Ability to understand and carry out oral and written instructions and to work independently in the performance of routine duties.

### Trash Crane Operator (006212)

Ability to secure a Florida CDL/Class A License at time of appointment.

Ability to operate moderately heavy equipment skillfully, safely, and efficiently.

Skill in the operation of medium sized mobile cranes, semi-tractors with lowboy and front-end loaders.

Physical strength and agility sufficient to operate equipment under adverse weather conditions.

REV 12-93

#### **Nature Of Work**

This is skilled work in the operation of moderately heavy rubbish collection equipment.

### Waste Equipment Operator (006213)

#### Minimum Qualifications

Three years of experience as a Trash Truck Driver 1, Trash Truck Driver 2, Waste Truck Driver or Trash Crane Operator with Miami-Dade County are required. Must possess a driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in either the operation of heavy duty refuse moving equipment or an electric overhead crane.

Employees in this class operate large diesel-powered bulldozers, power shovels, heavy duty payloaders, backhoes, grizzlies, stationary compactors and overhead cranes used in sanitary land filling, regional transfer stations, waste shredding facilities and incinerator operations necessary for waste disposal. Incumbents are responsible for the proper operation of the equipment in efficiently plowing, excavating and hoisting refuse according to a prescribed filling plan. Work requires a high degree of manipulative skill and dexterity in operating equipment and performing the required maintenance and safety checks. Exposure to adverse weather, dusty conditions, smoke, and hazardous working conditions are often incurred. Supervision is received from a waste supervisor who lays out the land fill plan, inspects for proper equipment operation and condition of pit.

##### ILLUSTRATIVE SKILLS

Operates heavy duty bulldozer used to level fill for covering refuse at a solid waste disposal/recycling facility; checks for refuse combustion, extinguishes fire by trenching and spreading fill.

Operates heavy duty payloader at facility tipping floors and landfills for refuse loading, moving, and feeding purposes.

Operates backhoe at facility to pick up spilled refuse, to dig trenches, to clear jams and similar tasks.

Operates grizzly at facility to load and pack refuse into closed trailer.

Operates stationary compactor at facility to load and pack refuse into closed trailer.

Operates heavy duty disposal vehicle such as DJB to transport refuse or fill material at the job sites.

Operates various moving and compacting heavy equipment, such as trashmasters and road graders, to cover disposed refuse with dirt, rock, foam, or other suitable cover material.

Operates large heavy duty tractor type lawnmowers on landfills and landfill slopes.

Operates an electrically powered crane with clamshell bucket to transfer refuse from truck dumping to the incinerator, at the rate required for proper incinerator operation.

Rigs and operates dragline in the digging of cells for sanitary landfill operation at county dump sites, loads fill on trucks for removal from pit area.

Inspects equipment before starting, checks lubricants, cooling system, hydraulic and electrical system; makes necessary minor adjustments, reports malfunctions to supervisor, tests equipment after servicing.

Performs minor mechanical maintenance work on overhead crane; lubricates crane and bucket, adjusts crane brakes, changes cable, and makes minor electrical repairs.

Maintains cleanliness of exterior and interior of equipment.

Directs truck drivers to designated dumping site within the landfill area.

Reports to supervisors any possible illegal waste seen while operating equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operating characteristics of heavy duty refuse moving equipment.

Considerable knowledge of the safety requirements applicable to large diesel powered bulldozers and cranes.

Ability to detect malfunctions while operating heavy duty equipment.

Ability to make adjustments and to perform minor maintenance to assigned equipment.

Ability to follow oral instructions and to work without close supervision.

Skill in the operation of large earth moving equipment.

## Human Resources Department

Must possess a CDL/Class B or higher-rated license; OR one year of experience as a Trash Truck Driver 1 are required. Must possess a CDL/Class B or higher-rated license; OR two years of experience operating automated or manual garbage trucks are required. Must possess a CDL/Class B or higher-rated license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work involving the operation of moderately heavy trucks and labor crew supervision.

Employees in this class operate large capacity open and closed carrier vehicles in collecting garbage, trash, rubbish, yard trash, and other refuse and recyclables throughout the unincorporated area of the County. Employees supervise a small group of Waste Collectors engaged in collecting residential and commercial wastes, yard trash and recyclables. Work involves responsibility for the safe and efficient operation of motorized equipment and for the satisfactory completeness of routes and scheduled tasks. Work follows established routines and procedures and is subject to examination in progress and on completion by area supervisors.

##### ILLUSTRATIVE TASKS

Performs daily inspection of flatbed, packer, barrel, or other large capacity vehicle to assure that it is in safe operating condition; verifies presence of crew, reports absences to supervisor.

Transports crew to assigned area, drives slowly through residential and commercial streets, stops frequently to allow crews to collect and load garbage, rubbish, yard trash and recyclables, drives loaded truck to designated disposal area or recycling center, returns to collection area.

Directs crew members in lifting heavy objects and learning accesses to properties, times collectors in their duties, administers minor first aid and prepares crew time sheets, reports of injuries and recycling.

Keeps records of number of containers or garbage and recyclables collected at commercial and residential establishments; prepares written reports of unusual occurrences enroute, vehicle accidents and personal injuries; prepares maintenance reports indicating deficiencies noted in vehicle operation.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the operation and maintenance of flatbed, packer, barrel and similar trucks.

Knowledge of the occupational hazards and safety precautions required in waste collection.

Knowledge of the geography of the local metropolitan area.

Ability to operate heavy trucks and related hydraulic packing devices.

Ability to supervise a small laboring crew in a manner conducive to full performance and high morale.

Ability to keep simple records and to prepare reports.

REV 4-09

#### Nature Of Work

This is skilled work involving the operation of moderately heavy trucks and labor crew supervision.

### Heavy Duty Crane Operator 1 (006226)

#### Minimum Qualifications

Eighth grade. Two years of recent experience in operating mobile cranes or two years of recent experience in operating medium and/or heavy duty automotive and/or heavy duty construction equipment AND successful completion of a Mobile Crane Operator training course equivalent to that offered by the Crane Inspection and Certification Bureau with award of a Class II or higher Operator Certificate or equivalent mobile crane operator training course and certificate issued from another institute accredited by the U.S. Department of Labor under CFR Part 1919 (shore-based material handling devices) are required. Must possess a CDL/Class A. Tanker endorsement must be obtained prior to the completion of the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the safe and efficient operation of a variety of mobile cranes.

Employees in this class operate a variety of mobile cranes used in construction, canal dredging, debris removal and refuse collection. Duties include driving and operating a boom hoist of a medium-sized wheel-mounted crane rigged with clamshell buckets and large 20 ton wheel-mounted cranes which are operated over the road and off the road in performing assigned tasks. Considerable manipulative skill and dexterity is required to insure the safe operation of the equipment and in safeguarding nearby persons, property and moving traffic. Some routine vehicle maintenance including pre-operation checks, routine preventive maintenance, and minor field repair or adjustment to the equipment is required. Duties require the individual to work independently and provide direction for a crew of truck drivers or boat operators.

Supervision is received from a technical superior who reviews work for thoroughness and proper completion of assigned tasks.

##### ILLUSTRATIVE TASKS

Operates a wheel-mounted boom hoist trash crane; drives the vehicle over the road from one work location to another and to and from the yard; carefully picks-up roadside debris and loads into trash trucks.

Operates a 20 ton wheel-mounted mobile crane; drives crane over the road from one job location to another; picks-up vegetation deposited on canal banks and loads into trash trucks and dump trucks.

Operates 20 ton wheel-mounted mobile crane used in canal construction and maintenance; drives crane over the road and from one job location to another; drives to off road locations and sets up for work; dredges canals and loads debris and silt in dump trucks; uses crane to lift and properly place large pieces of culvert.

Performs routine pre-operation checks, routine preventive maintenance, minor field repair and adjustment, including changing of buckets and cables necessary to perform assigned tasks.

Exercises responsibility as crew leader and oversees the job movements including dispatching of debris filled trucks and operation of tow boats.

Observes and enforces established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operating characteristics of a variety of mobile cranes.

Considerable knowledge of the occupational hazards and safety precautions applicable to heavy equipment operation.

Considerable knowledge of the geography of Metropolitan Dade County.

Knowledge of the maintenance requirements applicable to a variety of mobile cranes.

Ability to work independently in the performance of assigned duties.

Ability to detect needed repairs and make minor adjustments to mobile cranes.

Ability to understand and follow verbal and written instructions.

Ability to enforce established safety practices and procedures.

Skill in the operation of a variety of mobile cranes.

Physical strength and agility sufficient to perform assigned duties.

## Human Resources Department

### Heavy Duty Crane Operator 2 (Trainee) (006227)

#### Minimum Qualifications

Eighth grade. Two years of experience in operating medium and/or heavy duty automotive and/or heavy duty construction equipment and completion of a 10-day Basic Crane Operation Skills training course equivalent to that offered by the Crane Inspection and Certification Bureau with an overall rating of four or above on Attendance Evaluation Sheet or an equivalent crane operation training course and overall rating issued by the U.S Department of Labor CFR Part 1919 (shore-based material handling devices) are required. Must possess a CDL/Class A. Tanker endorsement must be obtained prior to the completion of the trainee period.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the safe and efficient operation of a variety of mobile cranes with a capacity of fifteen tons or greater.

Employees in this class operate a variety of mobile cranes used in construction, canal dredging, debris removal and refuse collection. Duties include driving and operating a hydraulic or cable-type crane over the road and off the road in the performance of assigned tasks. Considerable manipulative skill and dexterity is required to assure the safe operation of the equipment and to safeguard nearby persons, property and moving traffic. Some routine vehicle maintenance including pre-operation checks, routine preventive maintenance and minor field repair or adjustment of equipment is required. Incumbents work independently and may serve as a crew leader in overseeing job site activities. Supervision is received from a technical superior who reviews work for proper completion of assigned tasks in accordance with departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Operates a hydraulic or cable-type mobile crane with a capacity of fifteen tons or greater; drives the vehicle over the road to and from work locations, from one work location to another, and along canal banks; sets up crane for work at both on-road and off-road locations.

Carefully picks up debris, silt or vegetation deposited along roadsides or canal banks and loads into trash trucks or dump trucks; carefully lifts and places large objects associated with roadway and canal maintenance or construction activities; carefully removes debris or obstructions from below water in canals or at culverts.

Carefully lifts large steel tow boats into or out of the water, and to or from the ground or their transport vehicle.

Performs all necessary pre-operation checks, routine preventive maintenance, minor field repairs and adjustments, including changing of buckets, cables or rigging necessary to perform assigned tasks.

Exercises responsibility as a crew leader and oversees job activities including dispatching of debris-filled trucks from the job site to the designated dump, and assuring the proper operation of tow boats by boat operators.

Observes and enforces established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operating characteristics of a variety of mobile cranes with a capacity of fifteen tons or greater.

Considerable knowledge of the occupational hazards and safety precautions applicable to heavy equipment operation.

Considerable knowledge of the geography of the metropolitan Dade County area.

Knowledge of the maintenance requirements applicable to variety of mobile cranes with a capacity of fifteen tons or greater.

Ability to work independently in the performance of assigned duties.

Ability to detect needed repairs and make minor adjustments to mobile cranes.

Ability to understand and follow verbal and written instructions.

Ability to observe and enforce established safety practices and procedures.

Skill in the operation of a variety of mobile cranes.

Physical strength and agility sufficient to perform assigned duties.

### Waste Service Clerk 1 (006301)

#### Minimum Qualifications

High school diploma or GED. One year of clerical experience in building and zoning, solid waste, customer service or permit and/or license processing is required.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical and public contact work in the maintenance of waste account records for residential and commercial properties in a county waste collection service.

Employees in this class are responsible for performing a variety of clerical duties in current maintenance of customer waste account records, provision of service to customers, and preparing data processing information. Duties require the operation of a cathode ray tube and microfiche viewers for which no previous training is required. Supervision is received from a clerical or administrative superior who observes operations, periodically reviews accounts and advises and assists with unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Initiates file maintenance cards for submission to data processing on all changes to individual property accounts including title changes in ownership, fees due on proration of initial fees on new accounts, plus and minus account adjustments, cancelling accounts, and adjustment in accounts on which a judgment has been ordered by the courts.

Receives and disposes of customer inquiries relating to computation of established waste fee charges, levying of penalties and judgment charges.

Screens building permits and final inspection reports to initiate new accounts or investigative action on property demolitions.

Operates cathode ray tube and microfiche viewers to obtain accurate information on legal descriptions, real estate folios, dates of sale and homestead exemption data.

Plots property by legal description of section maps to determine validity of waste fee assessments, pinpoint new developments under construction, and to verify number of improved properties being billed within certain blocks; requests property abstracts on name and title changes on questionable transactions.

Checks and updates account fee status, legal descriptions, use codes and payment history, and other items unique in the preparation for enforcement of waste fee cases in the courts.

Calculates excess charges from driver cards for monthly billing of commercial accounts as assigned; processes private hauler release forms for those commercial establishments requesting the services of a private contractor.

Checks and tabulates mortgage company payments during peak payment periods.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of standard office practices, methods and procedures.

Knowledge of legal descriptions, metes and bounds, and related means of locating property on sectional maps.

Knowledge of established procedures and work flow in the maintenance of customer waste account records.

Ability to meet and deal tactfully with property owners, attorneys and property closing agents.

Ability to learn and apply the operation of data processing terminal equipment and other office machinery as required.

Ability to clearly express and convey ideas in telephone or office communication.

Ability to follow written and oral instructions accurately.

Ability to complete assigned tasks with accuracy and speed.

### Waste Service Clerk 2 (006303)

#### Minimum Qualifications

High school diploma or GED. Two years of advanced clerical experience in building and zoning, solid waste, customer service, permit processing and/or license processing are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work in the creation, maintenance, and correction of waste account records for waste fees.

Employees in this class are responsible for establishing accounts, calculating refund amounts, cancelling payments and reapplying monies, and adjusting fees on waste service accounts. Duties require research into the property tax system, building and zoning records, section maps, and solid waste records. Incumbents exercise some independent judgment in identifying and clarifying complex problems and taking corrective measures. Supervision is received from an administrative superior who reviews work in progress and upon completion and assists with difficult or unusual problems.

##### ILLUSTRATIVE TASKS

Establishes accounts, identified through audits, which require calculation of backbillings; distinguishes between duplicate accounts and account mix-ups or those which require research to identify the correct folio; verifies that addresses, folio numbers, and legal descriptions match tax folio information.

Determines if payments have been made by a different party and when additional accounts should be created.

Assists abstracters in researching Redi Books, Section Maps, and property tax records.

Reviews routine reports of accounts with billing errors; calculates the billing or credit amount and takes corrective action.

Makes adjustments to waste collection fees based on research of customer records, property tax records, building and zoning information, and waste system records.

Calculates refund amounts, cancels payments, and prepares refund requests.

Answers inquiries from residential customers regarding billings; receives waste collection fees and provides receipts; prepares routine correspondence in response to customer inquiries; explains county code requirements and departmental procedures to customers.

Prepares delinquent accounts for the legal judgment process; handles customer inquiries; prepares certified mailings and related documents.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the Dade County property tax system, building and zoning procedures, and the solid waste billing system.

Considerable knowledge of office systems, equipment, and procedures.

Knowledge of research techniques pertaining to property tax records.

Knowledge of public relations, principles, and techniques.

Knowledge of arithmetic.

Knowledge of established policies and procedures concerning the maintenance of waste account records.

Ability to analyze waste account discrepancies and errors and take appropriate corrective action.

Ability to assist in researching Redi Books, Section Maps, and property tax records.

Ability to perform arithmetic calculations rapidly and accurately.

Ability to prepare routine correspondence.

Ability to exercise tact and diplomacy in dealing with waste service customers.

### Waste Radio Operator (006305)

#### Minimum Qualifications

High school diploma or GED. Six months of experience operating base station radio equipment in the dispatch and movement of a large volume of equipment in geographically dispersed areas are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized dispatch work operating radio and electronic transmitting equipment in a waste collection operation.

Employees in this class are responsible for operating radio and related equipment, dispatching work assignments and receiving reports from field employees. Duties include receiving telephone calls concerning waste service problems and requests, answering routine non-technical questions and performing related clerical duties on an assigned shift. Some independent judgment is required in handling waste service requests and coordinating efforts to resolve field problems. Supervision is received from an administrative superior who reviews work through personal observations and records for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Operates rotary telephone and two-way radio to coordinate communications between office and field units; coordinates the routing and scheduling of a large fleet of waste collection mobile units.

Maintains route maps and schedules of all vehicles; receives reports from field units concerning mechanical breakdowns; coordinates the dispatch of maintenance vehicles; records out-of-service time for disabled equipment and vehicles.

Receives reports of service problems and notifies the appropriate field units in order to resolve such problems.

Receives complaints concerning illegal dumping activity in unincorporated areas of the county and arranges for the inspection of such incidents by field enforcement employees.

Receives reports from field employees concerning disabled vehicles, accidents, emergencies, injuries and similar situations and relays information to the appropriate authority.

Prepares and maintains records of various information including vehicle and route assignments, availability of spare equipment, route completion times and unusual incidents occurring on assigned shift.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of radio transmitting techniques and procedures applied to the dispatch of mobile units.

Knowledge of departmental rules, regulations and procedures.

Knowledge of maps, routes, schedules and the areas serviced by the department.

Knowledge of recordkeeping procedures applicable to the area of assignment.

Ability to carry-out verbal and written instructions.

Ability to communicate effectively with office and field employees using telephone and two-way radio equipment.

Ability to discuss service requests with customers and explain departmental rules, regulations and procedures.

Ability to react quickly and calmly in emergency situations.

Ability to maintain records and prepare reports.

Ability to speak clearly using good diction in the expression of ideas and information.

### Waste Attendant 1 (006308)

#### Minimum Qualifications

Eighth grade. Three months of experience as a general laborer or helper are required. Some positions may require a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is manual work involving limited skills in maintenance and refuse collection tasks at various waste disposal facilities and trash transfer stations throughout Miami-Dade County.

Employees in this class perform tasks in the general maintenance of the various off-site trash transfer stations and their surrounding landscapes. Duties may also include custodial and light maintenance duties at the centralized waste pit locations. Occasional operation of light automotive equipment may be required. Work involves the use of hand tools and power tools for picking up refuse and for landscaping the surrounding areas. Employees in this class are responsible for the upkeep and efficient operation of the tools or equipment used. Instructions are usually received orally and routine tasks are performed with considerable independence, while more difficult work is performed under the supervision of a foreman. All work is subject to inspection while in progress and upon completion.

##### ILLUSTRATIVE TASKS

Uses brooms, pitchforks, rakes, shovels and similar handtools in order to pick up refuse and trash; shovels and levels sand in holes in the parkway created by trash cranes.

Instructs citizens in backing their vehicles in order to dump their trash; assists older and handicapped citizens in unloading trash from their vehicles.

Informs the public as to the procedures for dumping at the trash transfer stations both orally and through the use of instruction pamphlets; enforces rules governing the operation of the trash transfer stations.

Prunes, waters and cares for landscaping at the trash transfer stations; cuts grass, trims foliage and rakes trimmings; polices surrounding areas.

Washes and cleans interior and exterior of waste equipment and other county vehicles at the centralized waste pit locations.

Sweeps, washes down the tipping floor at the incinerator; assists maintenance crews in cleaning the furnace and the precipitator.

Cleans the crane; checks crane cable clamps and tightens them if necessary; cleans crane panels and motors.

Sprays pit with odor repellents and insecticides.

Assists in cleaning sump pumps and pug mill.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the occupational hazards and necessary safety precautions applicable to laboring work.

Ability to understand and follow oral and written instructions.

Ability to secure a Florida Chauffeur's license if required.

Skill in the operation of hand tools and power tools.

##### NATURE OF WORK

This is responsible administrative, work in planning and coordinating automotive equipment repair and maintenance activities for the Department of Solid Waste Management.

An employee in this class is responsible for coordinating and overseeing all General Services Administration (GSA) repairs and maintenance work to light and heavy mobile equipment inventory for the Department of Solid Waste Management. Responsibilities include making decisions jointly with (GSA) on the advisability of distributing specialized repair work to outside vendors in accordance with established contractual agreements. Considerable independent judgment is exercised in prioritizing and coordinating repair and maintenance work according to the vehicle requirements, and the availability of (GSA) ability to complete repairs and maintenance. General supervision is received from an administrative superior who reviews work for efficiency and effectiveness in achieving departmental goals and objectives.

##### ILLUSTRATIVE TASKS

Serves as a liaison between Solid Waste Management, GSA and contractors in overseeing all repairs and maintenance work to light and heavy mobile equipment performed by (GSA) and outside contractors.

Reviews the decision making process for equipment replacement, paying particular attention to equipment with high maintenance costs.

Reviews and maintains monthly invoices from (GSA) that include service charges for maintenance services.

Reviews repair work with GSA to determine the distribution of specialized repair work to outside vendors in accordance with established contractual agreements; considers such factors as total cost bid contracts, warranty, vendor workload and availability, and make of vehicle.

Conducts studies of fleet maintenance work; reviews and analyzes labor costs, work scheduling and quality control factors.

Prepares bid specifications for all major items to include the technical proposal for the purchase of fleet purchases.

Monitors warranty tracking through an automated process to include entering and finalizing claims on manufacturer warranties, component warranties and commercial repair warranties.

Develops means to reduce costs, including developing automated systems, integrated inventory management systems, automation of support services, value analysis, and total management principles.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of principles and practices of mobile equipment repair and maintenance scheduling and planning.

Thorough knowledge of automotive equipment design, manufacturing and maintenance.

Considerable knowledge of large scale fleet maintenance management for diversified types of equipment.

Considerable knowledge of equipment purchasing methods and procedures including specification preparation and bid analysis.

### Waste Supervisor 1 (006318)

#### Minimum Qualifications

Currently employed by Miami-Dade County with one year continuous acceptable full-time service as a Trash Crane Operator, Trash Truck Driver 1, Trash Truck Driver 2, Waste Equipment Operator, Waste Enforcement Officer 1, Waste Truck Driver, Waste Attendant 2, or Waste Plant Operator are required. Must possess a CDL/Class A.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the collection of waste and the enforcement of waste collection regulations in an assigned geographical district. Employees in this class are typically responsible for planning, assigning and supervising the work of a moderate sized group of employees engaged in trash and garbage collection activities over assigned routes within a district. Work includes responsibility for obtaining compliance with departmental waste collection regulations optimally utilizing crews and trucks, and for establishing satisfactory relations with the public served in the district. Incumbents exercise some independent judgment in establishing routes and making work assignments. Responsibilities may also include planning and coordinating the use of departmental mobile equipment for waste collection. Supervision is received from a technical superior by means of periodic field inspections, analysis of written reports and furnishing of assistance on unusual or difficult problems.

##### ILLUSTRATIVE TASKS

Supervises all garbage or trash collection work in an assigned district; gives instructions and advice on difficult collection or enforcement problems; arranges for vacation and sick relief.

Checks frequently with collection crews to insure work is proceeding according to schedules and to resolve any problems that have arisen; makes regular and routine checks throughout the district to insure that maximum utilization is being obtained from assigned vehicles and personnel.

Maintains satisfactory relations with the public served; investigates complaints; takes corrective action; explains provisions of county waste collection regulations.

Prepares periodic routine and special reports as required relating to field operations in assigned district.

Coordinates intra-departmental allocation of waste collection mobile equipment; assigns replacements for defective trucks; maintains liaison with mobile equipment personnel in maintaining and repairing vehicles; records vehicle assignments and maintenance activity.

Performs related work as required.

Considerable knowledge of the methods, operating rules and equipment used in waste collection.

Considerable knowledge of rules and regulations governing the enforcement of waste collection.

Knowledge of the design, operating characteristics and maintenance requirements of all typical waste collection equipment.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of mobile equipment fleet maintenance, replacement and management.

Knowledge of supervisory methods and practices.

Knowledge of hazards and safety precautions of the work.

Ability to plan and schedule work and supervise employees in a manner conducive to full performance and high morale.

Ability to understand and transmit oral and written instructions.

Ability to maintain effective public relations.

Ability to enforce applicable regulations firmly, tactfully and impartially.

Ability to make necessary inspections and to ascertain facts through investigative procedures.

Ability to prepare simple records and reports.

Knowledge of the road network of the local geographical area, including municipalities and unincorporated county areas.

Knowledge of supervisory principles and practices.

Ability to plan, assign and supervise the work of subordinate in a manner conducive to full performance and high morale.

Ability to deal firmly, courteously, tactfully and impartially with the public.

Ability to assemble data and prepare required records and reports.

Ability to safely and effectively supervise the operation of as well as operate a temporary chemical waste storage facility.

Physical strength and agility sufficient to perform assigned duties.

#### **Nature Of Work**

This is specialized supervisory work with some administrative responsibility in the operation of the Solid Waste Management Home Chemical Program.

## Human Resources Department

### PW&WM Enforcement & Collection Clerk (006327)

#### Minimum Qualifications

High school. Two years of clerical or public contact experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced clerical work assisting in the enforcement of regulations pertaining to the storage, collection and disposal of solid waste.

Employees in this class are responsible for performing a variety of clerical duties in support of the enforcement of solid waste ordinances and regulations. Duties include researching property ownership records and titles, receiving telephone inquiries, entering enforcement information into a computer system, preparing certified mailings, and operating a base station radio to communicate with field enforcement personnel. Work requires detailed knowledge of public records and documents pertaining to the ownership of real property. Supervision is received from an administrative superior who reviews work for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Inspects and examines public records to locate information on real property ownership and titles utilizing a computer terminal, Redi Maps and Section Maps; verifies that addresses, folio numbers and legal descriptions match tax folio information; enters results of enforcement actions into computer system.

Receives telephone inquiries concerning enforcement cases, County Code requirements and departmental procedures; prepares and routes assistance or action requests based upon telephone information or information provided by waste enforcement personnel in the field.

Prepares certified mailings of warning notices and tickets.

Uses a base station radio to provide instructions and information to field enforcement employees.

Accesses the State Tag and Corporate Information Computer system to obtain driver's license records, auto tag information, corporate entities and fictitious names to ensure that correct entity or property is cited.

Presents data gathered through research to waste enforcement personnel to assist in enforcement proceedings including notices of violation, civil citations, preparation of criminal complaints, and felony arrests where timely identification through driver's license records is necessary.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of legal processes and documents pertaining to the acquisition and transfer of real property, identification of the ownership of auto tags and corporate entities, and identification of fictitious names.

Knowledge of ordinances and regulations concerning solid waste storage, collection and disposal.

Knowledge of office practices and procedures.

Knowledge of public relations principles and techniques.

Knowledge of departmental policies and procedures pertaining to solid waste enforcement activities.

Ability to research a variety of public records to determine property ownership.

Ability to deal tactfully and diplomatically with the public.

Ability to access the State Tag and Corporate Information System to obtain relevant information on vehicle ownership and identify corporate entities.

Ability to operate a computer terminal and base station radio.

Ability to follow verbal and written instructions.

##### NATURE OF WORK

This is administrative and supervisory work in the enforcement of regulatory ordinances pertaining to the storage, collection and disposal of solid waste.

Employees in this class are responsible for supervising subordinates engaged in monitoring the storage, collection and disposal of solid waste by residential occupants, commercial establishments, private haulers and other individuals. Responsibilities include determining actions required in emergency or complex enforcement situations, advising and training subordinates in enforcement and investigative techniques, providing information on regulatory requirements and procedures, securing transfer stations, landfill sites and disposal facilities, and preparing a variety of reports. Independent judgment is exercised in the application of the provisions of pertinent ordinances to enforcement and compliance activities. Supervision is exercised over a staff of subordinate security guards, waste service representatives and/or enforcement officers through assignment of responsibilities and review of work for compliance with established procedures and practices, and effectiveness of enforcement activities. Supervision is received from an administrative superior who reviews work through conferences and reports for satisfactory achievement of enforcement objectives.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of security guards, waste service representatives and/or enforcement officers engaged in monitoring the activities of commercial establishments, private haulers, property owners, tenants and other individuals to assure proper storage, collection and disposal of solid waste.

Provides advice and assistance to subordinates in the enforcement of regulations, investigative methods and techniques, interpretation of ordinances and handling of complaints.

Supervises field inspections for compliance with administrative policies and procedures; reviews inspection reports for accuracy and completeness.

Reviews and investigates complex or difficult enforcement problems and recommends solutions; prepares court documents, attends court proceedings and testifies in cases where legal action is required.

Reviews security practices and procedures at transfer stations and landfill sites; develops and implements methods and procedures to assure proper security of assigned facilities; responds to emergencies and unusual occurrences after normal work hours.

Provides information to commercial establishments, private haulers, the general public and other governmental agencies concerning the storage, collection and disposal of solid waste; investigates alleged complaints, gathers information and evidence and determines if violations have occurred.

Prepares, maintains and submits a variety of narrative and statistical reports; completes various forms, schedules and correspondence.

Establishes and maintains effective working relationships with local police organizations, businesses and private waste haulers.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the ordinances, rules and regulations pertaining to the storage, collection and disposal of solid waste.

Considerable knowledge of the legal procedures related to the enforcement of solid waste storage, collection and disposal.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of investigative techniques and surveillance procedures used in the enforcement of local ordinances.

Considerable knowledge of public relations principles and techniques.

Knowledge of hazardous waste handling procedures and safety standards.

### Waste Enforcement Officer 2 (006329)

Ability to enforce provisions of local ordinances with firmness, tact and impartiality.

Ability to interpret and apply the provisions of the solid waste storage, collection and disposal ordinances and regulations.

Ability to supervise subordinates assigned to widely dispersed geographical locations in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with private haulers and officials of public and private organizations.

Ability to analyze complex enforcement problems and make effective recommendations for their resolution.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to ascertain facts through the application of investigative techniques.

Ability to prepare reports, forms, summaries, schedules and other documents.

### Division Director 1, PW&WM (Maintenance) (006332)

#### Minimum Qualifications

Bachelor's degree in Civil Engineering, Business or Public Administration or a related field. Five years of progressively responsible experience in the management of large scale industrial maintenance operations are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible administrative work in directing activities of the Solid Waste Management Maintenance Division.

An employee in this class is responsible for supervising and directing work in heavy industrial maintenance, repair and supply services for all solid waste disposal and collection facilities. Emphasis of the work is on the large-scale coordination of employees, equipment and materials used to perform industrial maintenance on equipment used in waste disposal facilities and related physical structures. The incumbent analyzes, reviews and consults superiors on new construction and meets with engineering personnel on major maintenance projects for all equipment and facilities in the Solid Waste Management Department. Considerable independent judgement is exercised and professional knowledge applied in planning, implementing and monitoring a comprehensive and complex maintenance program. Supervision is exercised through subordinate supervisors, over a large staff of skilled trades employees, clerical staff, helpers and other employees. General supervision is received from a professional superior who reviews work through personal conferences and written reports and holds the incumbent responsible for the effective operation of the solid waste disposal and collection maintenance program.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisory, technical, skilled and semi-skilled employees engaged in the repair, maintenance and installation of heavy industrial, mechanical and electrical equipment in all solid waste disposal and collection facilities, including physical plants, bulky waste stations and satellites.

Supervises the receipt, storage and delivery of required solid waste supplies and materials.

Prepares budget documents and recommendations concerning requirements for equipment, materials, supplies and employees; prepares projections for maintenance schedules.

Approves work schedules and machinery overhaul downtime in accordance with recommendations formulated by subordinate supervisors and engineers.

Establishes and maintains a training program to communicate safety practices and procedures and to train employees in technical maintenance knowledges and use of mobile equipment.

Advises supervisors on the progress of extended maintenance and preventive maintenance programs.

Meets with manufacturers, designers, engineers, consultants and contractors to discuss problems and modifications to equipment, machinery and physical facilities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; meets with administrators and County legal staff to review personnel matters; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance

Approves maintenance purchase requisitions; requests new and adjusts contractual amounts of blanket purchase orders as needed; cooperates with procurement for deliveries and special handling of materials; cooperates with purchasing in writing technical specifications for materials and equipment.

Supervises the implementation of a computerized maintenance program.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices and methods of large-scale and diversified maintenance management.

Thorough knowledge of maintenance operation of the Solid Waste Management Department.

Thorough knowledge of departmental policies, procedures and regulations.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the principles of personnel business management.

## Human Resources Department

### Transfer Station Superintendent (006339)

#### Minimum Qualifications

High school. Five years of experience in waste operations including experience in a supervisory capacity are required. Must obtain Transfer Station Operator certification from the Florida Department of Environmental Protection (FDEP) during the probationary period.

#### Job Specifications

##### NATURE OF WORK

This is administrative and supervisory work in the operation of a solid waste disposal transfer station.

Employees in this class are responsible for supervising the operation of a large waste transfer facility, a fleet of mobile equipment and a revenue receiving scalehouse. Emphasis of the work is on supervising a staff of subordinates, and coordinating employees, equipment and materials used to receive, process and transfer solid waste materials. Incumbents exercise independent judgment in the organization of work activities, in assuring the effective and efficient processing of solid waste materials, and in the enforcement of operational policies and procedures. Supervision is exercised through a subordinate supervisor, over a staff of equipment operators, vehicle operators and attendants. General supervision is received from an administrative superior who reviews work through personal conferences, observations and written reports for satisfactory operation of the transfer station.

##### ILLUSTRATIVE TASKS

Supervises, through a subordinate supervisor the receiving of solid waste, loading of transfer vehicles and transporting to disposal facilities; plans and reviews the work of subordinates assigned to the station and coordinates activities in support of transfer station operations.

Establishes operation timetables for the processing of solid waste.

Makes on-road inspections of drivers to insure that transfer vehicles are being operated in accordance with departmental policies and established requirements.

Supervises a scalehouse operation and monitors cash and coupon flow; provides revenue reports and prepares projections of future revenues.

Responds to questions and concerns from local vendors and municipal agencies using transfer station facilities.

Maintains records of loads, volume and material received at the station and transported to disposal facilities; prepares periodic reports as required.

Makes recommendations concerning equipment, materials, supplies and employees required for transfer station operations.

Communicates and enforces established safety measures and regulations; instructs employees in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the operation of a solid waste transfer station.

Thorough knowledge of the rules, regulations and procedures applicable to transfer station operations.

Considerable knowledge of the principles of management and public administration.

Considerable knowledge of supervisory principles and practices.

Knowledge of the principles of accounting.

Knowledge of public relations principles and techniques.

Ability to supervise a large staff of subordinates in a manner conducive to full performance and high morale.

Ability to deal tactfully and persuasively with superiors, subordinates, and officials of municipalities and private companies.

##### NATURE OF WORK

This is technical work supervising a major function of a solid waste disposal facility.

Employees in this class are responsible for supervising the multi-shift operation of a shredding and landfill function, hazardous materials incinerator activity, or other major function of a large solid waste processing plant. Responsibilities may include the coordination of employees, equipment and materials used to receive, process, transport and landfill large amounts of mixed municipal solid waste or coordination of the receipt, thermal processing and disposal of hazardous waste, or responsibility for other major activities of a solid waste disposal facility. Incumbents exercise some independent judgment in organizing work activities and in assuring efficient and effective waste processing within their area of responsibility. Supervision is exercised over technical, semi-skilled and unskilled employees through assignment and review of work. Supervision is received from an administrative superior who reviews work through personal conferences, observations and written reports for satisfactory operation of major functions of the facility.

##### ILLUSTRATIVE TASKS

Supervises the receiving of solid waste, shredding of separated material, loading of delivery vehicles and disposal at a landfill site.

Coordinates the activities of employees engaged in the operation of an advanced hazardous materials incinerator for the combustion of contaminated or hazardous waste.

Establishes processing and incineration requirements based on engineering specifications.

Assures that equipment is maintained in accordance with manufacturer's maintenance schedules.

Coordinates approval for use of the incinerator subject to regulatory agency guidelines.

Assists in establishing operation timetables for the processing of solid waste.

Communicates and enforces established safety measures and regulations; instructs employees in occupational hazards and safety precautions.

Establishes and maintains notification systems to identify backups in processing areas which may cause reduced processing or stoppage.

Maintains records and prepares reports concerning solid waste disposal activities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; counsels subordinates on job related problems; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of raw material to finished product processing in a solid waste disposal facility.

Considerable knowledge of the operating characteristics and maintenance requirements of incineration and mobile equipment.

Considerable knowledge of hazardous waste handling and incineration.

Considerable knowledge of the rules and regulations concerning the operation of incineration equipment.

Knowledge of thermal processing disposal techniques, chemistry and combustion engineering.

### **Solid Waste Landfill Superintendent (006347)**

Knowledge of supervisory principles and practices.

#### NATURE OF WORK

This is advanced responsible professional work in the management of environmental affairs for the Department of Solid Waste Management.

An employee in this class is responsible for supervising and managing SWM environmental affairs in areas of water quality, hazardous waste, ecology and air quality. Responsibilities include managing water quality activities to maintain departmental environmental permits, supervising a hazardous waste program, monitoring programs in the remediation and mitigation of South Florida ecosystems, and managing air quality programs for all solid waste facilities. The incumbent exercises considerable independent judgment in the management of departmental environmental programs and projects in accordance with established regulations and current environmental technological developments. Supervision is exercised over a staff of professional, technical and clerical subordinates with assigned responsibilities in various phases of environmental program management. General supervision is received from a professional superior who reviews work through personal conferences and written reports for achievement of departmental environmental affairs goals and objectives.

#### ILLUSTRATIVE TASKS

Supervises professional and technical subordinates in the management of a water quality program to maintain environmental permits and conditions at landfills, regional transfer stations, and trash and recycling centers in relation to surface water, groundwater and leachate; monitors sample collections, analysis of laboratory results, installation of new wells and monitoring equipment, and evaluation of soil contamination; administers laboratory contracts.

Develops and implements groundwater and surface water monitoring programs in accordance with permit conditions; provides final review and issues monitoring reports to environmental regulation agencies; supervises preparation and issue of contamination assessment plans; coordinates clean up activities of environmentally sensitive incidents.

Supervises subordinates in the management of a hazardous waste program including household chemical collection and waste oil collection programs, and a departmental collection center; oversees coordination of special collection events and fulfillment of disposal protocol.

Manages remediation, mitigation or other efforts pertaining to South Florida ecosystems through program monitoring; represents department in meetings concerning projects addressing environmental impact to flora and fauna.

Reviews and issues wildlife environmental impact reports on solid waste facilities and progress on mitigation.

Oversees environmental enhancement and mitigation projects pursuant to permit conditions.

Manages air quality efforts at all facilities, including odor and methane gas monitoring, sample collection, analysis of laboratory results, installation of monitoring equipment and review of engineering recommendations.

Oversees special projects and programs, environmental audits and research projects, as required.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the principles and practices of environmental administration.

Thorough knowledge of local, state and federal environmental regulations pertaining to solid waste management operations.

Thorough knowledge of scientific principles, theories and practices in environmental areas including, hydrology, water chemistry, toxicology and biology.

Considerable knowledge of techniques of scientific investigation and analysis.

Knowledge of supervisory principles and practices.

Ability to manage a variety of environmental programs pertaining to solid waste management operations.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

##### NATURE OF WORK

This is responsible administrative and supervisory work directing the operation of a solid waste disposal facility.

An employee in this class is responsible for supervising and coordinating the operation and maintenance of a major county solid waste disposal facility. Responsibilities include supervising the receipt, processing, transporting and landfill of large amounts of municipal solid waste, operation of a large shredding plant and hazardous materials incinerator, and supervising operation of a vehicle maintenance shop and scale house. The incumbent exercises considerable independent judgment and professional knowledge in assuring the smooth follow of solid waste from receipt through disposal in an environmentally safe and cost effective manner. Supervision is exercised through subordinate supervisors over a staff of technical skilled and unskilled employees engaged in various phases of facility operations. Supervision is received from a professional and administrative superior who reviews work through personal conferences and written reports, and holds the incumbent responsible for the efficient and effective operation of the solid waste disposal facility.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisory, technical, skilled and unskilled employees engaged in receiving solid waste, shredding of separated material, loading of delivery vehicles, disposing of solid waste at a landfill site, operation of an advanced hazardous materials incinerator, and other activities in support of the operation of a large solid waste disposal facility.

Supervises the operation and maintenance of facility mobile equipment and support employees.

Prepares budget documents and prepares recommendations concerning requirements for equipment, materials, supplies and personnel; prepares projections for utilization of facility.

Participates in conferences with commercial and municipal waste collection organizations to resolve problems and communicate changes in county policies and procedures.

Approves work schedules and machinery overhaul downtime in accordance recommendations formulated by subordinate supervisors.

Monitors incinerator afterburner and scrubber to assure release of a minimum of contaminants.

Establishes and maintains a continuous training program to communicate safety practices and develop technical knowledges of plant personnel to assist in the efficient and effective operation the facility.

Advises superiors on progress of machinery capacity usage, land area recovered by fill and incineration of unusual materials.

Meets with designers and contractors and discusses problems and modifications concerning off-road mobile transportation equipment, machinery, and physical facilities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of raw material to finished product processing solid waste disposal facility.

Thorough knowledge of the operating characteristics and maintenance requirements of incineration and mobile equipment.

Thorough knowledge of hazardous waste handling and incineration.

Considerable knowledge of the rules and regulations concerning the operation of incineration equipment.

Considerable knowledge of thermal processing disposal techniques, chemistry and combustion engineering.

Considerable knowledge of supervisory principles and techniques.

Knowledge of public relations principles and practices.

Knowledge of the principles of public and business administration.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to establish and maintain effective working relations with subordinates, superiors, department officials, and officials of private waste

Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and supervisory work in directing the Trash Division at the Department of Solid Waste Management.

An employee in this class is responsible for planning, directing, and supervising large-scale trash collection services for the residents of unincorporated Miami-Dade County. Responsibilities include the formulation of policies related to solid waste collections that ensure compliance with state and local laws regarding waste management activities, and the implementation of policy decisions and new regulations pertaining to solid waste collections. The incumbent exercises independent judgment and professional managerial knowledge in containing costs and maximizing utilization of equipment and personnel to provide appropriate collection service levels. Supervision is exercised through subordinate supervisors over an extensive staff of collection employees and equipment operator personnel. General direction is received from the Assistant Director who holds the incumbent responsible for the efficient and effective management of department trash collection and recycling activities.

##### ILLUSTRATIVE TASKS

Directs and supervises, through subordinate supervisors, large-scale operations providing trash collection services to the residents of unincorporated Miami-Dade County.

Plans operational strategies to ensure coordination of vehicles, equipment, materials, and supplies to maintain adequate service levels.

Develops policy and implements service strategies to achieve desired goals and objectives consistent with fiscal constraints.

Develops and recommends for appropriate capital equipment to meet departmental goals for service in trash collection activities.

Communicates and enforces established safety measures and regulations; instructs employees and supervisors in occupational hazards and safety precautions.

Directs development of divisional budgets and monitors expenditures for conformance to service and operational plans, goals, and objectives.

Coordinates trash and recycling collection, activities with other departmental divisions, including finance, information services, and service development.

Makes recommendations and decisions regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of management, public, and business administration.

Thorough knowledge of the organization and operation of trash collection and recycling activities in unincorporated Miami-Dade County.

Thorough knowledge of laws, rules, ordinances, and regulations pertaining to solid waste storage, collection, and disposal.

## Human Resources Department

#### Job Specifications

#### Nature Of Work

This is highly responsible professional managerial work in planning and directing activities of the Technical Services & Environmental Division of the Department of Solid Waste Management.

### Assistant Director, SWM Technical Services & Environmental Affairs (006394)

#### Minimum Qualifications

Bachelor's degree in Engineering or a related field. A minimum of five to ten years of progressively responsible administrative and engineering experience including five years in the solid waste field involving solid waste capital improvements, bond preparation and management, regulatory issues such as permitting of solid waste facilities and closure of superfund sites, planning and design of solid waste facilities, operation of waste-to-energy plants, and the development and implementation of recycling programs is required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible executive level work in planning and professional and administrative work directing engineering, environmental compliance and related functions for the Department of Solid Waste Management.

An employee in this class is responsible for planning, directing and coordinating departmental activities in capital improvement programs, engineering, environmental compliance, policy issues relating to solid waste, and operation of the County's Resources Recovery Facility. Responsibilities include overseeing the general management of the Engineering and Environmental Compliance Divisions, implementing capital improvement projects, developing environmental compliance policies and procedures, and administering the County's contract for the operation of the Resources Recovery Facility. The incumbent exercises extensive independent judgment and professional managerial expertise in directing a variety of departmentwide capital improvement, engineering, environmental compliance and procurement functions. Supervision is exercised through subordinate levels of managers and supervisors over a staff of professional, technical and clerical employees with assigned responsibilities in various phases of operation. General direction is received from the Deputy Department Director who holds the incumbent responsible for the attainment of desired objectives and for efficient and effective professional management of divisional operations.

##### ILLUSTRATIVE TASKS

Plans, directs and coordinates the work of professional, technical and clerical employees through subordinate levels of supervisors and managers.

Administers the contract for the operation and improvement of the County's Resources Recovery Facility; advises and assists the Department on Resources Recovery Facility contract negotiation issues.

Plans and implements capital improvement programs for the Department's facilities; develops capital budgets; negotiates technical disputes with contractors of capital improvement projects; assists the County Attorney in negotiation and settlement of construction-related disputes. Advises the Department Director on applicability of solid waste technologies.

Establishes environmental compliance policies for the Department; represents the Department in negotiations with regulatory agencies.

Assists the County Manager's Office in negotiating agreements on energy from solid waste; manages the procurement program for energy from landfill gas.

Assists the Department in the presentation of technical, engineering, and environmental issues to the Board of County Commissioners.

Plans and projects workload requirements and budgets for the Environmental Compliance and Engineering Divisions; negotiates Scope of Work and budget for consultant work.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Extensive knowledge of waste management technologies, the operation of waste-to-energy plants, and the development and implementation of recycling programs.

##### NATURE OF WORK

This is professional and administrative work in the management of building construction and renovation for the County.

Employees in this class are responsible for coordinating and monitoring the work of contractors and County personnel engaged in small to medium scale construction and renovation in a variety of County buildings and related facilities. Responsibilities include the management of several projects simultaneously in various phases of development including estimating costs, obtaining materials, scheduling County personnel, selection of contractors, construction management, inspection, and warranty administration. Incumbents exercise independent judgement in the application of the principles and practices of architectural planning, design and construction related to engineering knowledge and in the administration of assigned construction projects. General supervision is received from an administrative superior who reviews work through personal conferences and reports for satisfactory attainment of goals and objectives during the building process.

##### ILLUSTRATIVE TASKS

Coordinates the development of building construction or renovation projects with one or more agencies that will occupy the structure; arranges and conducts walk-throughs of facilities with user agency personnel; keeps user agencies informed of status, progress on work orders.

Plans priority of work orders; develops and reviews cost estimates; monitors building construction/renovation progress; prepares work order and purchase order changes.

Determines if work will be done in-house or contracted out; coordinates, schedules and conducts pre-construction meetings with contractors; monitors contractor's performance to assure satisfactory work and compliance with applicable codes, regulations and procedures; prepares performance reports on contractors and arranges for correction of defects by contractor during warranty period; recommends final acceptance of contractors' work on behalf of the County; reviews and approves invoices for payment.

Coordinates all equipment, materials and trades personnel required for job, and performs worksite supervision and inspection of work forces engaged in excavating, concrete pouring, tying steel reinforcements, installing elevators, electrical and air conditioning equipment, dredging, installing sewers and pumps, surveying, pile driving, laying asphalt, and other construction activities.

Reads and interprets blueprints, diagrams, sketches and other written instructions; instructs subordinates in interpreting and realizing plans. Conducts field inspections to assure adequacy of work and compliance with construction design and applicable regulations; provides technical advise to contractors; provides project status data to supervisor; inspects work for substantial completion and investigates user agency and contractor complaints; prepare punch lists.

Obtains building permits and develops materials lists; arranges and schedules delivery of materials to job site and arranges for security of materials, as required.

Maintains contracts with professional mechanical and electrical engineers, and other departmental professional staff for efficient scheduling and coordination of various phases of projects.

Maintains project administration records and files.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles, practices and methods of architectural planning, design, construction and related engineering work.

Knowledge of structural design, and air-conditioning, plumbing and electrical systems.

Knowledge of building materials, methods and construction systems.

Knowledge of building codes, laws, regulations and County design standards.

Knowledge of contracts, forms and procedures relative to building construction activities.

Knowledge of current construction costs.

Ability to develop and analyze programs of space requirements for a variety of building types.

Ability to understand architectural and engineering drawings and specifications related to building construction projects.

### Job Specifications

#### NATURE OF WORK

This is advanced technical work coordinating and supervising programming and systems applications for major service functions in a large computerized building management system.

An employee in this class is responsible for planning, assigning and reviewing the work of a staff of technical subordinates engaged in systems analysis, design, programming, and implementation of data gathering projects in support of a building management system. Responsibilities include the development of new or substantial modifications of existing building management systems and their methods and procedures, implementing of major changes in data gathering resources including equipment, staffing and organization, and development of basic changes in methods and techniques employed. Duties include developing and maintaining contacts with user departments, implementation of energy saving and building management applications without infringing on needs of cross-department users, reviewing specifications, setting computer controlled limits for operations and conditions throughout the jurisdiction of the central computerized management system, and establishing alarming criteria for conditions that fall outside parameters. The incumbent exercises considerable independent judgment in systems design, development, and problem resolution while using project management and engineering methodologies. General supervision is received from a technical and administrative superior who reviews work for achievement of goals and objectives.

#### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of a building management and data gathering unit consisting of building management operators and computer programmers engaged in the development of new computerized systems and/or the support of existing data gathering applications for an extensive computerized building management system.

- Prepares work plans and work schedules, and monitors progress of projects.

- Establishes and maintains effective communications with officials of other County departments.

- Coordinates building management system activities with other division units to ensure minimal disruption of existing production systems.

- Assists in the formulation of project objectives and system development requirements.

- Trains and assists programming staff with complex systems design problems and recommends remedial instruction and specialized training in advanced techniques; provides technical guidance and assistance to project staff.

- Assists in the development of test plans and analyzes results to direct or correct implementation of new or revised systems.

- Ensures that systems are designed and developed using the selected system development methodology and within established departmental standards.

- Keeps management and users informed on project progress and problems, including needed changes in schedule, resources, or product.

- Reviews control specifications to meet County requirements.

- Assists in the determination of budgetary requirements for programming unit and the applications for which the unit is responsible.

- Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

- Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

- Thorough knowledge of the theory and practice of computerized building management systems operations.

- Thorough knowledge of the design and capabilities of computer hardware and software as it relates to computerized building management systems.

- Thorough knowledge of systems analysis, computer programming, symbolic mathematics, business statistics and engineering.

- Thorough knowledge of control theory and practice.

### **Building Management Systems Superintendent (006436)**

Considerable knowledge of the principles of management.  
Knowledge of supervisory principles and practices.  
Ability to efficiently and effectively manage the operation of a complex computerized building management system.  
Ability to supervise a staff of technical subordinates in a manner conducive to full performance and high morale.  
Ability to design complex program logic and code in appropriate computer programming language.  
Ability to establish and maintain effective working relationships with subordinates, superiors and various County officials.  
Ability to communicate clearly and concisely, verbally and in writing.  
Ability to train subordinate technical employees in complex systems design techniques.  
Ability to analyze the results of system tests and to correct the implementation of new or revised systems.  
Ability to assist in the development of project objectives and to ensure system development according to departmental standards.

##### NATURE OF WORK

This is field and office work assisting in the management of large and complex county operated buildings.

Employees in this class are responsible for assisting a building manager by performing duties in monitoring service contracts and contractor performance, and in preparing and maintaining related records and reports. Emphasis of the work is on the inspection of facilities, grounds and waste management and pest control conditions for compliance with contractual agreements, investigating tenant complaints and maintaining service contracts and files in accordance with departmental and county regulations. Work is performed in accordance with established practices pertaining to county owned and operated buildings. Supervision is received from a building manager who reviews work through inspection of facilities, conferences and review of written records and reports.

##### ILLUSTRATIVE TASKS

Responds to tenant complaints, contacts tenants to investigate complaints and determines corrective action needed; completes necessary records, explains procedures, and determines physical condition of property; provides reports to building manager; conducts follow-up visits to assure compliance with recommendations for corrective action as required.

Contacts tenants to develop schedules for pest control services.

Periodically inspects facility noting conditions of grounds, structural adequacy, general cleanliness and appearance of building interior and trash deposit areas; drafts deficiency reports of discrepancies and deviation from contract specifications; reports maintenance needs and contractor's deficiencies to building manager.

Inspects renewal areas, orders removal of refuse and schedules grounds and building maintenance activities.

Maintains service contract files and records; submits daily inspection reports and project status reports as needed.

Reviews and validates contractor invoices.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of departmental policies, procedures and regulations governing building maintenance operations.

Knowledge of the basic maintenance requirements for large county owned or operated buildings.

Knowledge of landscape and waste management activities of large county owned or operated buildings.

Knowledge of county building codes as related to the operation and maintenance of safe structures.

Some knowledge of public and private agencies rendering assistance to the public.

Some knowledge of facility maintenance contractual agreements.

Ability to assist in the management of a variety of service contracts pertaining to building operations.

Ability to maintain property and tenant records including projected schedules.

Ability to achieve rapport and establish effective relationships with service contractors and tenants.

Ability to learn regulations and procedures used by tenant agencies.

Ability to perform assignments independently.

Ability to prepare clear and concise reports of field investigations.

This is field and office work assisting in the management of large and complex county operated buildings.

## Human Resources Department

### Building Management Assistant 2 (006439)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in monitoring building contract services or building maintenance are required.

#### Job Specifications

##### NATURE OF WORK

The is specialized work assisting in the management of operations and maintenance of the Metro-Dade County Stephen P. Clark Center.

An employee in this class is primarily responsible for coordinating deliveries and access to the building and food court from the loading dock during established operating hours. Responsibilities include coordinating delivery trucks into and out of the loading dock area, coordinating use of building moving equipment, controlling materials entering and leaving the building, maintaining dock areas, supervising "bus" personnel at the food court, performing some locksmith services, coordinating delivery and retrieval of recycling bins, responding to complaints by tenants, and inspecting completed work by contracted custodial, exterminating and landscape crews. Supervision is received from an administrative superior who reviews work through personal conferences and facility inspections for satisfactory assistance in building management activities.

##### ILLUSTRATIVE TASKS

Serves as dockmaster in charge of deliveries and access to the Stephen P. Clark Center and food court from the loading dock during established operating hours.

Plans and coordinates movements of delivery trucks into and out of the loading dock; coordinates use of building carting and moving equipment by delivery personnel or building tenants; notifies security guard at service elevator concerning deliveries to building floors.

Maintains control of materials entering and leaving the building in compliance with property removal pass policies.

Enforces parking time limits on delivery vehicles for building and food court tenants; maintains dock areas free of obstructions and arranges for temporary storage of goods as required.

Monitors and enforces compliance with flammable material handling precautions while handling loads in the loading dock area.

Monitors amounts of recycling materials being retrieved from the building and coordinates the delivery and retrieval of recycling bins.

Supervises "bus" personnel at the food court including payroll processing, and uniform, supply and chemical requirements;

Coordinates trash pick-up from the food court area, grease and fat disposal, and aluminum can recycling.

Performs some locksmith duties including re-keying locks, re-pinning cylinders, key issue and delivery, and key control.

Inspects completed work by contracted custodial, exterminating and landscape crews.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of loading dock operations, policies and procedures applicable to a large commercial office building.

Knowledge of departmental policies and procedures pertaining to building maintenance activities.

Knowledge of public and private organizations and agencies at the Stephen P. Clark Center.

Knowledge of security requirements and property removal policies pertaining to the Stephen P. Clark Center.

Knowledge of the occupational hazards and safety precautions required in loading dock operations including the safe handling of flammable materials.

Some knowledge of supervisory principles and practices.

Some knowledge of locksmithing.

Ability to coordinate complex loading dock operations to effect the smooth transition of deliveries to their receivers.

Ability to assist in the management of various service contracts pertaining to building operations.

Ability to effectively supervise food court service employees.

Ability to enforce compliance with loading dock policies and procedures.

Ability to inspect completed work by contracted custodial, exterminating and landscape crews.

### Building Management Assistant 2 (006439)

NEW 10-96

#### **Nature Of Work**

The is specialized work assisting in the management of operations and maintenance of the Miami-Dade County Stephen P. Clark Center.

### ISD Utility Plant Operator (006443)

#### Minimum Qualifications

High school diploma or GED. Two years of vocational or military trades experience with heavy industrial equipment related to refrigeration and power plants are required. Must possess a U.S. Environmental Protection Agency (EPA) Type 2 or 3 Universal Certificate or the ability to obtain a U.S. Environmental Protection Agency (EPA) Universal Certificate within 45 days of employment to handle chlorofluorocarbon (CFC) or hydrochlorofluorocarbon (HCFC) refrigerants. Must be able to perform arc welding and use an acetylene cutting torch.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the operation and maintenance of a cogeneration plant.

Employees in this class are responsible for the operation, maintenance and repair of machinery and mechanical and electrical equipment used in a large central utility plant. Emphasis of the work is on the operation of control panels and related equipment apparatus, repairing a variety of electrical and mechanical equipment and conducting preventive maintenance programs. Duties include the preparation and maintenance of various logs and records of utility plant operations. Supervision is received from a technical superior who reviews work for compliance with facility operational procedures and reviews operational records and reports.

##### ILLUSTRATIVE TASKS

Operates computer terminal to access data and information and command equipment on and off; operates high voltage switch gears, volt motors, starters and other electrical gears; operates electric and chilled water distribution networks as authorized and in accordance with prescribed procedures and efficiency standards for energy conservation.

Monitors and records instrument readings, power demand, fuel usage, alarms, equipment status and general operating conditions in the plant such as equipment failures and abnormalities.

Makes regular routine inspections of plant for leaks, hot spots or other abnormal occurrences; conducts casualty control repairs such as adjusting timers, solenoids, capacitors, resistors, rectifiers and related parts of industrial control systems; examines form and texture of parts to detect imperfections, inspects worn parts to determine changes in dimension requirements, uses rules, calipers, micrometers and similar measuring instruments; reads and interprets blueprints, adjusts functional parts of devices and control instruments; uses hand tools, levels, plumb bobs and straight edges.

Sets up and operates lathe, drill press, threading machine, grinder and similar metal working power tools; performs electric and acetylene welding, brazing and silver soldering; repairs, modifies and makes new installations of pipe fittings; performs plumbing work on steam and water

lines and related plumbing equipment; repairs and maintains a variety of equipment and machinery such as pumps, compressors, large control valves, overhead cranes and water treatment system.

Repairs short circuits and broken wires; installs and repairs electrical fixtures, electric motors, switches, relays, transformers and other electro-mechanical components; repairs water distribution systems and other electrical systems.

Conducts regular preventive and corrective maintenance on electric power generation and chill water machinery such as gas turbines, high pressure steam turbines, heat recovery boiler, large absorption chillers and auxiliary mechanical equipment such as pumps, motors and electrical apparatus.

Maintains operating logs, machinery history records and other reports pertaining to the operation of the plant.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operation and maintenance of a gas turbine power generation plant, high pressure boiler plant and large industrial utility plant.

Knowledge of the principles of mechanics, electricity, thermodynamics and hydraulics.

Knowledge of the methods, materials, tools and practices used in mechanical and electrical trades.

Knowledge of the engineering and operations terminology and standard operating procedures of a power generating plant.

Knowledge of the occupational hazards and safety precautions of utility plant operations.

Knowledge of departmental policies and procedures.

### ISD Utility Plant Operator (006443)

Ability to operate utility plant equipment.

Ability to maintain accurate records of utility plant operations, repairs and preventive maintenance procedures.

Ability to use a variety of tools and equipment.

Ability to detect defects in machinery and equipment and to make necessary repairs and adjustments.

Ability to work from verbal and written instructions, simple diagrams, and to make simple time and material estimates.

Skill in the use of standard hand tools, machines and power equipment.

NEW 10-86

#### **Nature Of Work**

This is skilled technical work in the operation and maintenance of a cogeneration plant.

### Construction Cost Estimator 2 (006453)

#### Minimum Qualifications

Bachelor's degree in Civil Engineering, Building Construction, Construction Management or a related field. Two years of construction cost estimating experience are required. Additional construction cost estimating experience may substitute for education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is professional field and office work in the inspection and cost estimation of capital projects.

Employees in this class are responsible for reviewing estimates prepared by consultants, calculating preliminary cost estimates for budgetary consideration and reviewing claims submitted by consultants in the construction of capital projects. Responsibilities include reviewing construction cost estimates at various stages of design completion, preparing estimates of proposed capital projects, reviewing change orders submitted by contractors, and providing estimating support in the analysis of construction claims. Incumbents exercise considerable independent judgment and technical expertise in construction cost estimating through all phases of capital projects from preliminary estimating through actual construction. Supervision is received from a professional superior who reviews work through personal conferences and written reports for technical competence and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

- Reviews construction cost estimates submitted by design consultants at various incremental stages in the final design of capital projects.
- Prepares order-of-magnitude estimates of proposed capital projects for budgetary consideration prior to the selection of a consultant.
- Reviews proposals submitted by contractors for change order work in support of change order negotiations.
- Provides estimating support in the analysis of construction claims.
- Performs cost analysis of proposed changes in accordance with established regulations and procedures.
- Performs conceptual estimates of proposed major capital projects such as future extensions of the MetroRail system.
- Conducts cost reviews of monthly consultant invoices to determine the allowability and reasonableness of proposed changes.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Thorough knowledge of the principles and practices of architectural planning, design, construction and related engineering work.
- Thorough knowledge of construction estimating including labor, materials, equipment and design alternatives.
- Thorough knowledge of construction inspection techniques required to accurately estimate cost of proposed construction.
- Thorough knowledge of the methods and techniques of the building trades.
- Considerable knowledge of architectural and engineering plans and specifications.
- Knowledge of local building codes and regulations.
- Ability to evaluate cost estimates submitted by design consultants during the final design of capital projects.
- Ability to prepare detailed and complex estimates of proposed capital projects.
- Ability to review proposals submitted by contractors for change orders and make effective recommendations concerning their validity.
- Ability to examine consultant invoices and determine the allowability and reasonableness of proposed changes.
- Ability to read and understand architectural and engineering plans and specifications.
- Ability to perform complex calculations.

### Job Specifications

#### NATURE OF WORK

This is specialized security work in protecting public property at a large county controlled-access facility.

Employees in this class are responsible for enforcing established security procedures and implementing emergency procedures on an assigned shift at a major controlled-access building complex. Duties include controlling public access to facility interior, observing and operating closed circuit television monitors and monitoring a fire alarm control system, an intrusion alarm system and an uninterruptible power system to maintain building security and safety. Work involves some responsibility for obtaining, receiving and dispatching information by telephone involving county maintenance and security problems. Incumbents exercise some independent judgment in the absence of immediate supervision in reacting to emergency situations. Supervision is received from an administrative superior who establishes work schedules and reviews work through personal observation and written reports for efficiency of security operations.

#### ILLUSTRATIVE TASKS

Works an assigned shift at the main entrance of a large controlled-access facility; greets visitors upon entering building and requests information regarding purpose of visit; calls or pages building personnel; issues visitor's badges and obtains identification from visitor, allows visitors to enter facility; collects visitors' badges and returns identification upon visitors' departure from building; prevents the public and unauthorized personnel from entering restricted areas.

Monitors facility security by observing and operating a group of closed circuit television monitors; observes various parts of the interior and exterior of the facility; operates monitors to focus on selected parts of the facility and to observe suspicious activities; operates a video tape recorder to record actions of suspicious persons.

Summons law enforcement officers in security emergency situations; dispatches private security guards serving on established interior and exterior patrols.

Monitors a fire alarm control system; upon activation proceeds to indicated area of fire and either aborts automatic fire suppression discharge or allows discharge to occur; uses a fire extinguisher to put out small fires; proceeds to electrical panels to throw circuit-breakers for areas affected by fire; summons fire department personnel.

Monitors an uninterruptible power system; upon activation of alarm, follows established procedures to verify system status and identify source of problem; proceeds to emergency generator area to verify positions of electrical switches and start emergency generators.

Monitors an intrusion alarm system connected to burglar alarm systems of various county buildings; notifies law enforcement officers of alarms and dispatches maintenance personnel if building has sustained an intrusion and must be secured.

Receives telephone calls if fire alarms are received on other county buildings; confirms address with fire department; informs maintenance personnel if building has sustained fire damage and must be secured.

Receives maintenance complaints during non-regular working hours regarding other county buildings; determines if problem can wait until regular working hours or if maintenance employees should be dispatched immediately; dispatches maintenance employees if necessary.

Answers telephone calls at facility switchboard.

Operates gate and audio controls in order to control site access during non-regular working hours.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the security policies, procedures and regulations used in protecting public property at a large controlled-access facility.

Considerable knowledge of the geography of a large controlled-access facility.

Considerable knowledge of procedures and actions required in a fire emergency.

Knowledge of the operations and activities of a large controlled-access facility.

Knowledge of the operating characteristics of various electronic security and communications devices.

Ability to enforce facility security regulations with firmness, tact and impartiality.

### Console Security Specialist 1 (006456)

Ability to react promptly and correctly in security and fire emergency situations.  
Ability to understand and carry out written and oral instructions.  
Ability to determine the seriousness of maintenance complaints and take appropriate action.  
Ability to maintain logs and prepare simple reports.  
Ability to operate various electronic security and communications devices.  
Physical strength and agility sufficient to perform assigned duties.

##### NATURE OF WORK

This is supervisory work in protecting and patrolling public and multi-purpose county buildings.

An employee in this class is responsible for supervising a staff of contract security guards engaged in protecting county facilities and property primarily during night hours. Emphasis of the work is on supervising a staff of contract security guards assigned to various locations through personal inspection, responding to burglar alarm calls to admit police to search premises, and preparing reports of shift activities and incidents. Supervision is exercised over contract security guards through personal observation either on foot or by vehicle. Supervision is received from an administrative superior who reviews work through written reports and personal conferences for satisfactory efficiency and effectiveness of security operations.

##### ILLUSTRATIVE TASKS

Confers with superiors to receive shift instructions and to report incidents and activities from previous shift.

Supervises contract security guards assigned to protect county buildings, machinery, records and vehicles from theft and vandalism; continually checks all posts to assure that appropriate security measures are being implemented.

Assures that departmental security policies and procedures are appropriately implemented during night hours.

Responds to burglar alarm calls from various county buildings and admits police officials to search premises.

Responds to verbal reports of unusual incidents or problems and assists in their resolution; assists other law enforcement agencies in investigations and emergencies as needed.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of locations of various multi-purpose county buildings, the nature of building operations and their inherent security risks.

Knowledge of modern security practices, techniques and methods of law enforcement.

Knowledge of the policies, regulations and procedures used in protecting and patrolling public property and multi-purpose county buildings.

Knowledge of supervisory principles and practices.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinate contract guards, superiors and police officials.

Ability to prepare reports and maintain records.

Ability to react promptly and appropriately in emergency situations.

Ability to enforce security firmly and impartially and with respect for individual rights.

Must be certified as a protection professional or its equivalent or obtain certification within six months of employment.

### Job Specifications

#### NATURE OF WORK

This is responsible supervisory security work in protecting public and multi-purpose county buildings. An employee in this class is responsible for the development and operation of a county facility security and property protection program. Emphasis of the work is on the preparation of specifications for security guard services, administration of guard service contracts, evaluating electronic security systems for use in protecting county facilities, investigating security incidents, and maintaining working relationships with local law enforcement agencies. Duties involve the use of considerable independent judgment in the application of established security practices and procedures and in the development of recommendations for improved security operations. Supervision is exercised over subordinate county security employees and a large staff of contracted guards. Supervision is received from an administrative superior through personal conferences, observation of security operations and review of written reports and who holds the incumbent responsible for the development and implementation of an effective security program.

#### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate county security employees and contracted guards engaged in protecting and patrolling county property and buildings.

Conducts research on security programs used by other governmental and private agencies; develops surveys and analyzes survey results for program features for applicability to county building security operations.

Develops and prepares written policies and procedures for the security program.

Prepares specifications for the contracting of guard and security services for county buildings.

Develops and prepares training programs for contract security service employees and for county security employees assigned to protect facilities.

Administers security guard service contracts applicable to multi-purpose county buildings; provides security services on all newly constructed county facilities after substantial completion of construction until takeover by using agency; provides security criteria for proposed new facility construction.

Evaluates the application of electronic security systems for county facilities, including the use of closed circuit television, sound detection equipment, smoke detectors, intrusion alarms and other related facility protection devices.

Assists building management personnel with security problems and the proper assignment of guard service personnel.

Assists local law enforcement agencies in the investigation of incidents such as burglaries and thefts occurring in county buildings; conducts internal investigations of security problems in shops, offices, stockrooms and warehouses; prepares reports of findings.

Develops special security arrangements as required for various activities that may be held in county facilities.

Provides advice to other county departments and agencies on security procedures such as building access and personal identification regulations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews employee performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of modern security practices, techniques and methods of law enforcement.

Thorough knowledge of the policies, regulations and procedures used in protecting and patrolling public property and multi-purpose county buildings.

Considerable knowledge of the sources and availability of current information on modern security developments.

Considerable knowledge of locations of various multi-purpose county buildings, the nature of building operations and their inherent security risks.

### ISD Security Chief (006460)

Knowledge of supervisory principles and practices.

Ability to evaluate present and future security requirements and make effective recommendations for appropriate action.

Ability to develop and implement an effective security training program.

Ability to establish effective working relationships with superiors, public officials and the public.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to enforce security firmly and impartially and with respect for individual rights.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to keep complete and accurate records and prepare reports.

### Pest Control Manager (006462)

#### Minimum Qualifications

Graduation from an accredited college or university with a Bachelor's degree in Entomology or a related field. Two years of experience in structural pest control are required. Must possess State of Florida certifications in Limited Structural Pest Control and Limited Lawn and Ornamental; or Commercial General Household Pest and Rodent Control and Commercial Lawn and Ornamental Pest Control. Experience in the management or administration of a Structural Integrated Pest Management program is preferred.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional and administrative work in the management and evaluation of pest control companies under contract to Metro-Dade County.

An employee in this class is responsible for organizing, implementing, and evaluating a comprehensive integrated pest management program for Metro-Dade County facilities designed for long-term pest suppression. Duties include coordinating work with facility managers, County officials, and pest control representatives to control insect and other pest infestations in County buildings, ensuring that County facilities are inspected to determine pest control needs, identifying structural features or personnel practices that may contribute to pest control problems, coordinating requests for pest control through contractors, investigating and solving pest control problems through Entomological or other consultation, and processing requisitions and invoices received from contractors. The incumbent exercises independent judgment in the application of knowledge of insect and pest identification, control techniques, and pesticide safety. Supervision is received from an administrative superior who reviews work for effective results in management of the comprehensive pest control program.

##### ILLUSTRATIVE TASKS

- Manages and evaluates various pest control companies under contract to Metro-Dade County.

- Establishes inspection programs for all buildings to evaluate pest control needs, ensures regular periodic building inspections, and establishes management plans for all facilities.

- Establishes an inspection and monitoring plan with contractors to locate infested areas using non-toxic methods such as traps to determine the existence of infestation problems.

- Establishes, maintains and evaluates a training program for building managers or custodians on integrated pest management techniques.

- Acquires and keeps insecticide labels and materials safety data sheets for all toxic products used in pest control in County buildings; keeps current on new concepts, methods and materials used in integrated pest management; provides contractors with lists of approved pesticides for use in County facilities.

- Maintains records and files of management plans for all buildings requiring service, work order requests, buildings serviced by pest control contractors, contractor inspections, purchase orders and invoices.

- Recommends and initiates corrective action for structural modifications necessary to exclude pests from entering buildings.

- Conducts monthly meetings with contractors to discuss problems and solutions to pest control problems.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Considerable knowledge of integrated pest management concepts and techniques.

- Considerable knowledge of the theories and principles of Entomology.

- Considerable knowledge of the identification of arthropods and rodents which cause nuisance and health problems in indoor facilities.

- Considerable knowledge of insecticides and rodenticides commonly used in pest control operations.

- Considerable knowledge of suppressive and non-chemical methods to deter and eliminate pests.

- Knowledge of the safe use of pesticides and rodenticides.

- Ability to manage an integrated pest management program to effectively control pests in Dade County facilities.

- Ability to establish and maintain effective working relationships with officials of County departments and private pest control contractors.

- Ability to evaluate the pest control needs of Metro-Dade County facilities.

##### NATURE OF WORK

This is advanced administrative work planning and scheduling repair and maintenance work in a large-scale property management function. An employee in this class is responsible for planning, scheduling and coordinating large volume repair and maintenance work directed toward an extensive number of county facilities. Emphasis of the work is on analyzing workload and employee availability, prioritizing requests, establishing a work schedule and adjusting schedules to meet changing priorities. Considerable independent judgment is exercised in prioritizing a large volume of repair and maintenance work according to the user's immediate requirements, availability of facilities and repair employees with the appropriate skills. Supervision is received from an administrative and technical supervisor who reviews work for efficiency and effectiveness.

##### ILLUSTRATIVE TASKS

Determines scope of work such as repair, maintenance or new construction; analyzes workload and personnel availability on a shop wide perspective and confers with trades supervisors.

Prioritizes and assigns time estimates; rejects work under certain circumstances such as job is too small, shop unable to accomplish due to lack of expertise or job is too large; advises agencies on alternatives to shop work.

Schedules workload and adjusts schedule to meet changing priorities.

Maintains work in progress file; updates file as work is received and completed.

Attends meetings with section heads and superiors to discuss schedules and workload.

Makes field visits to check on work in progress and nearing completion.

Reviews completed work requests to evaluate shop operations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of principles and practices of maintenance scheduling and planning pertaining to large-scale property management repair and maintenance work.

Considerable knowledge of the tool, equipment and materials of the building trades.

Considerable knowledge of the principles of management.

Knowledge of the repair and maintenance characteristics of county structures and equipment.

Knowledge of administrative policies and procedures, and contractual agreements utilized in a county structural and equipment repair facility.

Ability to prioritize large volume repair and maintenance work to produce the fullest utilization of employee availability, equipment and space available.

Ability to understand technical repair diagnoses and estimate time required to complete large volume repair and maintenance work.

Ability to determine the advisability of distributing specialized repair work to outside vendors.

Ability to estimate costs in term of labor, supplies and equipment.

Ability to keep accurate records and to prepare and submit reports.

### Public Housing Maintenance Supervisor (006467)

This is supervisory work in the maintenance, repair and landscaping of government owned or leased public housing facilities.

### Maintenance Supervisor (006468)

#### Minimum Qualifications

High school diploma or GED. Five years of skilled trades experience to include supervisory experience are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in directing maintenance personnel in a variety of duties.

Maintenance Supervisors plan, assign and supervise the work of trades personnel, maintenance mechanics, repairers, and laborers and often participates in the more difficult maintenance tasks. Work in this class involves supervising building, grounds and equipment maintenance for a county facility. Employees in this class require a high degree of skill and a broad knowledge of various trades including carpentry, painting, refrigeration, mechanical, electrical and other related maintenance work. Supervision is exercised over subordinates by assignment and inspection of work while in progress and upon completion for adherence to departmental standards. All work is performed under the supervision of a maintenance superintendent or administrative superior, but the employee exercises independent judgment concerning job priorities and methods and materials to be utilized in completing assigned tasks.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises maintenance personnel in a variety of duties which includes plumbing, masonry, carpentry, painting, electrical, refrigeration and other related maintenance work.

Personally performs the more skilled tasks as necessitated by workload.

Assists superiors in planning and implementing work projects and work methods.

Estimates time and materials required for proposed jobs; keeps records and submits requisition forms for supplies and materials.

Determines manpower needs for maintenance crews and assigns work accordingly.

Completes performance reports on subordinates and may conduct a continuous training program for maintenance personnel.

Institutes preventive maintenance programs.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of building, grounds and equipment maintenance.

Knowledge of the occupational hazards and appropriate safety rules and regulations applicable to maintenance work.

Knowledge of preventive maintenance procedures and techniques.

Knowledge of the tools, equipment, materials and practices of several of the building and mechanical trades.

Ability to plan, assign and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to follow oral and written instructions and work with a minimum of technical supervision.

Ability to keep records and prepare reports.

### Building Maintenance Supervisor (006469)

#### Minimum Qualifications

High school diploma or GED. Two years of experience supervising building maintenance operations or four years of experience as a building maintenance mechanic in an office building in excess of 40,000 square feet are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the construction, maintenance and repair of county buildings.

An employee in this class is responsible for coordinating and supervising construction and maintenance crews assigned to various structures throughout the metropolitan area. Work involves the assignment and review of trades foremen, journeymen, helpers and laborers working on varied projects within a major departmental maintenance and construction program. Work requires the ability to interpret engineering and mechanical drawings in order to layout and supervise projects designed by architectural or engineering superiors. Supervision is exercised over subordinate skilled and unskilled tradesmen by assignment and inspection of work in progress and upon completion for adherence to prescribed construction standards and building codes. Work is subject to review by a maintenance superior who offers assistance on unusual or difficult projects and inspects completed jobs for workmanship and compliance with completion schedules.

##### ILLUSTRATIVE TASKS

Plans, lays out, and assigns projects which have been approved by administrative superiors; directs through subordinates varied physical plant maintenance, modification and construction in such trades as carpentry, painting, plastering, electrical, plumbing, air conditioning and general maintenance work.

Directs periodic preventive maintenance checks on a wide variety of mechanical and electrical machinery and equipment.

Recommends extent and nature of building repairs and improvements; estimates labor and material requirements, checks and approves supply orders; selects equipment to be purchased.

Requisitions materials; maintains records; prepares and submits reports; recommends budgetary requirements.

Makes periodic field inspections at work sites; reassigns crews from one job to another, and confers with occupants on work scheduling.

Works closely with architectural staff to coordinate work projects with inspections and completion schedules.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of maintenance, repair, alteration and construction procedures and practices.

Considerable knowledge of the tools, equipment and materials of the building and mechanical trades.

Considerable knowledge of the occupational hazards and safety precautions applicable to maintenance and construction work.

Ability to plan, layout and assign the work of skilled tradesmen in a manner conducive to full performance and high morale.

Ability to supervise and coordinate work projects.

Ability to estimate costs in terms of labor, supplies and equipment.

Ability to keep accurate records and to prepare and submit reports.

#### NATURE OF WORK

This is advanced technical work in the management of County vertical and horizontal transportation equipment.

Employees in this class are responsible for assisting in the supervision and management of contract services for the repair, modernization and installation of vertical transportation systems, escalators, moving walks and other conveyance systems. Responsibilities include monitoring renovation and construction projects, assuring compliance of contractors with contract specifications and building codes, coordinating work to assure established schedules are met, assisting in the preparation of contract specifications, and preparing recommendations for improvements in equipment. Employees exercise considerable independent judgment and technical expertise in analyzing and resolving complex conveyance system problems. Supervision is received from a professional superior who reviews work for technical competence, effective contract management and satisfactory performance of related responsibilities.

#### ILLUSTRATIVE TASKS

Provides assistance in the management and supervision of contract services for elevators, escalators, moving walks, bridge cranes and other conveyance systems on County properties.

Monitors performance of contractors in the repair, installation, modernization and maintenance of conveyance systems; enforces adherence to contract specifications and applicable building codes; advises superiors of faulty workmanship and/or materials as needed.

Coordinates work of contractors to assure that schedules are met and recommends changes in work sequence to assure the projects are completed on a timely basis.

Assists in the preparation of contract specifications for elevator and escalator contracts to provide the lowest possible cost for the best possible equipment.

Maintains activity records on elevator and escalator repair, maintenance and inspection in accordance with County requirements and applicable Florida Statutes.

Testifies in court as an expert witness in cases involving accidents on elevators and escalators as required.

Reads and interprets engineering and mechanical drawings; analyzes and resolves complex technical problems with elevators and escalators to preclude recurrences.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the operating, repair and maintenance characteristics of various types and makes of elevators, escalators and other conveyance systems.

Considerable knowledge of local and state laws and regulatory codes pertaining to the design, construction, maintenance and repair of elevators and escalators.

Considerable knowledge of contract specifications for elevator and escalator repair, maintenance and installation.

Knowledge of the similarities and differences in elevator and escalator equipment provided by various manufacturers.

Knowledge of contract management and administration methods and techniques.

Ability to analyze and resolve complex repair and operational problems of elevators, escalators and other types of conveyance systems.

Ability to monitor contractors engaged in the repair, modification, maintenance and installation of conveyance systems to assure conformance with technical specifications and applicable laws and regulations.

Ability to assist in the preparation of technical contract specifications for elevator and escalator maintenance and installation contracts.

Ability to prepare activity reports and maintain records of elevator and escalator operations, maintenance and repairs.

Ability to testify in court as an expert witness.

Ability to read and interpret engineering and mechanical drawings.

#### Job Specifications

##### NATURE OF WORK

This is supervisory professional mechanical and electrical engineering work in the management of county vertical and horizontal transportation equipment.

Employees in this class are responsible for reviewing the performance of contractual firms providing maintenance, repair, construction or modification services for vertical and horizontal transportation equipment. Emphasis of the work is on supervising subordinate employees engaged in periodic inspections of systems, monitoring existing contracts, developing contract specifications, responding to requests for services from county departments and serving as a consultant on major repair or construction projects. Responsibilities include developing and reviewing operational costs and reviewing bid requests for compliance with contract specifications. Incumbents exercise considerable independent judgment and make complex technical decisions referring difficult problems and matters of policy to a professional superior. Supervision is exercised over subordinate employees engaged in the periodic inspection of vertical and horizontal transportation equipment. Supervision is received from a professional superior who reviews work for conformity with departmental practices, county ordinances and regulations.

##### ILLUSTRATIVE TASKS

Supervises, assigns and reviews the work of subordinate employees engaged in periodic field inspections.

Prepares detailed specifications for elevator service, maintenance and bridge crane contracts; develops levels of service, response time to emergencies, frequency of service and related contractual requirements.

Responds to requests for modifications or new construction projects; provides direction on operational feasibility and type of equipment necessary; provides engineering cost estimates and related computations; makes recommendations on difficult and complex engineering problems.

Monitors existing contracts for compliance with contractual, safety and other code requirements; approves invoices and reviews and approves modifications to contractual agreements.

Conducts periodic inspections to insure safe and efficient operation of county elevators, escalators, bridge cranes, stage lifts, conveyor systems, moving sidewalks and related equipment; monitors rated speed of units, adjustments to electric circuits and sequence of operations for compliance with manufacturer specifications and code requirements.

Reviews bid requests and inspects contractor files and other records to determine ability to fulfill contract specifications such as acquisition of parts, critical and noncritical response time; makes recommendations for award of contracts.

Serves as consultant on all major repairs, modifications and upgrade of elevators, escalators, bridge cranes, stage lifts, conveyor systems, moving sidewalks and related equipment.

Serves as consultant on construction projects; organizes maintenance and inspection schedules; provides continual review of construction phases.

Prepares budget projections and provides review of operational costs for maintenance and repair services.

Maintains records and prepares periodic reports of maintenance and repair services; compiles data for use in developing specifications and exploring cost saving alternatives; prepares resolutions for Commission approval.

Develops and schedules preventive maintenance programs.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and practices of mechanical and electrical engineering.

Thorough knowledge of the operating characteristics, maintenance requirements and specifications of different types and makes of vertical

### Manager, Signage & Design (006477)

#### Minimum Qualifications

Graduation from an accredited college or university with an Associate's degree in Graphic Arts, Interior Design or Architectural Design. Three years of experience in commercial arts, graphics, architectural or interior design are required.

#### Job Specifications

##### NATURE OF WORK

This is supervisory and administrative work in the management of a Countywide signage program for public facilities and buildings.

An employee in this class is responsible for the design, manufacture and installation of signage and graphics in County facilities, to assure general conformance and proper appearance. Responsibilities include reviewing signage requirements for County owned facilities, manufacturing signs using machinery and tools, developing bid specification and recommending bid awards, and supervising a staff of technicians and outside contractors. The employee works with considerable independence and is responsible for coordinating work with County officials and private-sector contractors. Supervision is exercised over a staff of technical subordinates engaged in manufacturing and installing signage. Supervision is received from a professional superior who reviews work for technical and administrative effectiveness of the signage program.

##### ILLUSTRATIVE TASKS

Reviews signage requirements of County facilities and designs signs and graphics in accordance with architectural standards and statutory guidelines where appropriate; designs interior workstation, overhead and directory signage; designs exterior signage (including neon signs); develops floor numbering systems in conjunction with signage plan.

Interprets, designs and executes temporary signage and graphics for elected officials, County executives, and other County administrators upon request.

Manufactures signs using vinyl die-cutting machine, kroy lettering machine and other tools of the trade.

Reviews architectural drawings for new buildings and specifies signage (interior and exterior) needs; works with project managers to ensure adequacy and conformance with County standards and statutory requirements.

Develops bid specifications (verbiage, colors, size, materials, installation, etc.); evaluates bids and recommends vendor award; prepares requisitions, develops cost estimates and budget for purchase of signage systems and materials.

Supervises the work of technical subordinates and outside contractors, including the manufacturing and installation of signage, assuring adherence to specifications.

Performs special projects such as logo designs and graphic wall images for public areas within County facilities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of graphic arts design principles, practices and techniques.

Thorough knowledge of the architecture and location of County-owned facilities and buildings.

Thorough knowledge of the goals and objectives of a Countywide signage program.

Knowledge of public relations principles and techniques.

Knowledge of supervisory principles and practices.

Knowledge of County procurement practices and procedures.

Knowledge of architectural and engineering plan and drawings.

Ability to supervise a Countywide signage program in conformance with applicable regulations and ordinances.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to review signage requirements of a wide variety of County facilities and design signs and graphics which meet architectural standards and statutory requirements.

Ability to prepare contract bid specifications and evaluate bid proposals.

Ability to express ideas clearly and concisely, verbally and in writing.

General supervision is received from a division director who holds the incumbent responsible for the efficient and effective management of assigned county building operations.

##### ILLUSTRATIVE TASKS

Plans, directs and supervises the work of subordinate building managers engaged in the operation, management and maintenance of large and complex multi-agency buildings managed by the General Services Administration.

Manages and supervises the activities of a service contract monitoring unit engaged in administering contracts on elevators and escalators, custodial services, general building maintenance, solid waste removal and other areas.

Develops operating costs for buildings and financial and administrative procedures; analyzes periodic reports concerning expenditures and revenues; prepares, submits and administers annual budget.

Supervises and manages various leases and contracts involving building management, construction and renovations, custodial and pest control services, utilities and other contracts.

Assures that real and personal property is managed in accordance with departmental regulations, rules and procedures; assures appropriate action is taken to prevent loss, damage or destruction.

Prepares reports, correspondence and studies pertaining to building operations, tenant space management needs, agreements, contracts and leases.

Conducts inspections of facilities and buildings to assure compliance with departmental policies and procedures; coordinates work with other divisional, departmental and county offices to assure support requirements are met; keeps informed on modern developments in physical plant operation and management.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles of business and public administration and their application to the management of extensive physical plant operations.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of contract and leasing principles and practices.

Considerable knowledge of budget preparation and administration policies and procedures.

Considerable knowledge of county personnel policies, procedures and practices.

Considerable knowledge of building construction, operation, costs and building support systems.

Ability to use professional knowledge of the principles of management and public administration to direct extensive physical plant

## Human Resources Department

### Manager, ISD Physical Plant (006491)

operation, management and maintenance activities.

Ability to supervise directly and through subordinate supervisors the activities of geographically dispersed building operations in a manner conducive to full performance and high morale.

Ability to delegate authority to subordinates necessary to complete responsibilities in varied activities.

Ability to exercise judgment and discretion in devising, installing and interpreting departmental and divisional policies, rules and procedures.

Ability to establish and maintain effective working relationships with subordinates, superiors and officials of various county offices and private business concerns.

Ability to develop accurate operational building management costs and to analyze costs, revenues and expenditures.

NEW 1-85

### **Nature Of Work**

This is advanced responsible professional work in the management of county buildings operated by the General Services Administration.

### Maintenance Repairer (006501)

#### Minimum Qualifications

Eighth grade. One year of experience performing semi-skilled maintenance and repair tasks or assisting with maintenance and repairs in any of a variety of the skilled trades is required. Must possess a Driver license. Must be able to lift 50 lbs.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in the performance of a variety of maintenance and repair tasks in one or more of the trades areas.

Employees in this class perform a variety of general maintenance work which approaches the journeyman level but does not require as high a degree of skill. Employees are frequently called upon to perform rough maintenance and repair work covering several building and mechanical trades areas. Assignments are usually received verbally and may be accompanied by sketches. Instructions are usually very specific as to the nature of the work to be done. A maintenance repairman may devise his own methods for accomplishing assigned tasks and may work with some independence, but all work is subject to inspection in process and upon completion by craftsmen, foreman, or other supervisory personnel.

##### ILLUSTRATIVE TASKS

Replaces defective light bulbs throughout a large building; cuts, threads and bends conduit pipe to sizes and lengths as required by electricians; replaces burned out fuses; cleans and lubricates desk fan; checks brushes on fan motors.

Makes general minor repairs to wood fixtures, ramps, ladders, and frames; assists in the installation of door locks, hinges, shelf brackets, sash chains, and other hardware fixtures; feeds lumber into power saws, planers, and joiners; operates power and manual tools to assist carpenters in cutting, fitting, assembling, and erecting wooden objects and structures.

Mixes plaster, mortar, and cement; slakes lime; assists journeyman engaged in building or repairing brick, stone, or tile walls and structures. Does rough painting, independently or under direction of journeyman or foreman; sands down furniture or other items to be painted; applies primer and finished coat using brush or spray gun; cuts glass to size and shape; inserts in windows using putty.

Assists in repair and overhaul of air conditioning and refrigeration equipment utilizing semi-skills of the electrical and plumbing trades.

Assists skilled automotive mechanics in taking down and reassembling automobiles, trucks, and tractors; makes minor repairs to automotive equipment under supervision of mechanics.

Installs and repairs street signs and asphalt channelization, using hand tools such as post hole digger, iron bar, and air hammer.

Assists plumbers by unstopping sinks, toilets, hand basins, sewer lines, and similar systems and facilities.

Erects scaffolding; loads and unloads materials, cleans tools and work area upon completion of project.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the standard tools, materials, methods, and practices of the trades areas to which assigned.

Knowledge of the occupational hazards and safety precautions of the work.

Ability to understand and follow oral and written instructions and to interpret and work from rough sketches

Ability to make rough estimates of time and material requirements.

Ability to develop skill in the use and care of the tools, materials, and equipment of the trades areas concerned.

REV 1-73

#### Nature Of Work

This is semi-skilled work in the performance of a variety of maintenance and repair tasks in one or more of the trades areas.

### Bridge Repairer (006502)

#### Minimum Qualifications

Eighth grade. One year of skilled experience in a construction trade is required. Must be able to swim. Must possess a CDL/Class B with a tanker endorsement.

#### Job Specifications

##### NATURE OF WORK

This is specialized manual work in a variety of tasks related to the maintenance and reconstruction of county bridges.

Employees in this class perform mechanical adjustments and repairs of bascule and fixed-span bridges. Work involves skilled use of a varied bridge equipment and tools. Duties require knowledge of safety measures and efficient work methods as well as ability to perform work under hazardous conditions. All work is supervised by foremen or other supervisors but employees are expected and required to be capable of performing work with a minimum of direct supervision.

##### ILLUSTRATIVE TASKS

Performs the more difficult tasks in bridge maintenance and construction; replaces or strengthens members; lays out, cuts, punches and drills new steel; scrapes, wire brushes and does other cleaning.

On concrete bridges, may demolish or repair existing structures; builds coffer dams; excavates and pours concrete, strips forms and finishes concrete.

Installs and repairs iron gates, hand rails, fences and expansion plates.

Does woodwork such as installing decking stringers, braces, hand rails, and headers on wooden bridges.

Rigs and erects scaffolding; works from special scaffolding over water at considerable heights.

Prepares surfaces for painting by use of sand blasting equipment, chisels and chipping hammers; mixes and applies red lead and heavy metallic base paint to bridge surfaces with brush or spray gun.

Loads and unloads materials and tools and performs a variety of other semi-skilled tasks as assigned.

Operates pumps, air compressors, electric hammers, paving breakers, electric drills; and operates saws, mechanical winches and hoists, and other tools and equipment of a similar nature as the job requires; splices wire and rope, repairs tackle, and does similar rigging work.

Repairs sump pumps; disassembles, cleans, replaces worn parts.

Repairs and adjusts bridge brakes, span locks, gate mechanisms, and drive linkage; changes bridge drive motors.

Applies lubrication to various mechanical parts of bridges with gun, can, spray, spatula and brush as required by particular mechanism.

Does a variety of road resurfacing on bridge approaches; resurfaces road edges; cleans grass from edges and aprons; cleans drain holes on bridges, and drains along right-of-way; fills expansion joints on bridges, aprons and curbs with tar; erects signs, posts and barricades where needed.

Operates power bridges on an emergency basis.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the materials, equipment and labor methods commonly employed in repairing, renovating or reconstructing wooden, concrete and steel bridges.

Considerable knowledge of the necessary precautions in rigging and in working at dangerous heights.

Knowledge of the methods, materials, tools and practices used in the painting of heavy timber and structural steel surfaces.

Ability to understand and carry out oral and written instructions.

Ability to swim.

Skill in the manipulation of ropes and equipment used in rigging.

Skill in the application of paint with brush or spray gun.

Skill in the use of common hand tools.

Sufficient physical strength and agility and freedom from disabling defects to do heavy manual work at heights.

### Bridge Repairer (006502)

This is specialized manual work in a variety of tasks related to the maintenance and reconstruction of county bridges.

### Maintenance Repairer-Automotive (006504)

#### Minimum Qualifications

Eighth grade. One year of experience assisting in automotive maintenance and repair work is required. Must possess a Driver license. Must have own hand tools. Must obtain a CDL/Class A prior to completion of the twelve months probationary period.

#### Job Specifications

##### NATURE OF WORK

This is technical work which approaches the journeyman level in the diagnosis, repair and preventive maintenance of a wide variety of fixed and mobile mechanical equipment. Emphasis of the work is on performing complete vehicle preventive maintenance, repairs of moderate complexity on breakdowns, providing field service on a variety of trucks, construction equipment and fixed equipment, and assisting journeyman mechanics in the completion of complex maintenance work. Supervision is received from mechanics or shop supervisors who review work in progress and upon completion for satisfactory repair and maintenance activities, and satisfactory assistance in complex repair and maintenance tasks.

##### ILLUSTRATIVE TASKS

- Performs complete vehicle preventive maintenance involving chassis/body lubrication, oil changes, filter replacements and inspection/evaluation of all operational systems of the vehicle.
- Performs repairs on breakdowns of moderate complexity such as lights, wiring, belts, hoses, cab components, brakes and hydraulics.
- Provides field service on a wide variety of trucks, construction equipment and fixed equipment.
- Assists journeyman mechanics in the completion of complex maintenance tasks.
- Changes tires, wheels and tracks; performs wait jobs, as required.
- Assists stockroom employees with inventory and farm-out transport.
- Cleans and maintains shop tools and shop equipment; performs shop related non-mechanical tasks and completes paperwork, as required.
- Observes established safety practices and procedures.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

- Knowledge of design characteristics of a wide variety of fixed and mobile equipment.
- Knowledge of vehicular preventive maintenance techniques and procedures.
- Knowledge of the repair and adjustment of mobile and fixed equipment parts, assemblies, components and operating systems.
- Knowledge of automotive tools, equipment and materials.
- Knowledge of the occupational hazards and safety precautions of automotive repair and maintenance work.
- Ability to use automotive repair tools and equipment to perform preventive maintenance and repairs of moderate difficulty.
- Ability to perform complete preventive maintenance procedures.
- Ability to change tires and wheels on mobile equipment.
- Ability to provide effective assistance to journeyman mechanics in complex repair tasks.
- Ability to follow verbal and written instructions.
- Skill in automotive mechanics.
- Skill in the care and use of automotive tools and equipment.

NEW 10-93

#### Nature Of Work

This is technical work which approaches the journeyman level in the diagnosis, repair and preventive maintenance of a wide variety of fixed and mobile mechanical equipment.

### Locksmith (006506)

#### Minimum Qualifications

Eighth grade. One year of experience as a locksmith is required. Must possess a Driver license. Completion of a certified locksmith trade school training program may substitute for three months of the required experience. Must be able to work rotating shifts, weekends and holidays, and respond to emergency call backs. Successful candidates must be bonded and possess own hand tools.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation and repair of locks and in making keys.

Employees in this class are responsible for the installation, alteration, servicing and repair of a variety of locks. Duties include the repair and opening of mechanical and electrical locks, making keys and changing lock combinations using a variety of handtools and special equipment. An additional responsibility includes the fabrication of parts for the repair of obsolete locks. Assignments may be received in the form of verbal or written instructions. Supervision is received from a maintenance superior who reviews work for the satisfactory performance of equipment installed or repaired.

##### ILLUSTRATIVE TASKS

Repairs and opens defective locks; changes lock combinations; disassembles door locks, padlocks, combination locks and handcuffs; replaces worn or broken parts; changes tumblers for new combinations.

Uses lockpick to open locks where no key is available.

Makes repairs to jail electrical lock system; adjusts timers, line brushes, solenoids, capacitors, resistors, rectifiers and related parts of lock system.

Fabricates parts for repair of obsolete locks using drill press, lathe, grinders and special handtools.

Installs master key floor and building lock systems; works with journeyman trades employees in the installation of locks in wood and metal doors.

Makes new and duplicate keys using key cutting machine.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the practices, methods, materials and tools of the locksmith trade.

Considerable knowledge of the occupational hazards and safety precautions of the locksmith trade.

Knowledge of the repair and maintenance characteristics of a wide variety of mechanical and electrical locks.

Knowledge of the necessary equipment for the fabrication or repair of locks and other locking devices.

Ability to install, alter, repair and maintain a variety of mechanical and electrical locks.

Ability to work from sketches, diagrams and plans.

Ability to understand and follow verbal and written instructions.

Ability to make simple estimates of time and materials.

Skill in the use and care of the tools, machinery and equipment of the locksmith trade.

#### Nature Of Work

This is skilled work at the journeyman level in the installation and repair of locks and in making keys.

### Carpenter (006508)

#### Minimum Qualifications

Eighth grade. Two years of skilled carpentry experience are required. Must possess a Driver license and own hand tools.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the construction, maintenance and repair of concrete or wooden articles, equipment and structures.

Employees in this class are responsible for performing skilled carpentry tasks in accordance with standard trade practices. Work involves skilled hand and bench carpentry duties including the operation of power-driven wood-working machinery. Assignments may be made verbally or consist of written instructions, sketches, diagrams or blueprints. Supervision may occasionally be exercised over various trades helpers who assist in various phases of carpentry work. Supervision is received from a technical or administrative superior who periodically inspects work in progress and upon completion for satisfactory application of carpentry skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Performs general carpentry work in the construction, remodeling, alteration and maintenance of buildings, floors, roofs, stairways, NEF and drywall partitions, plexiglass, doors, windows, screens, wood fixtures and furniture.

Repairs tables, shelves, benches and cabinets; builds concrete forms; lays sub-flooring and does sheathing.

Install partitions to include metal and wood framing members, hang and finish drywall.

Place reinforcing bars or welded wire mesh for concrete slabs, beams, and reinforced masonry.

Performs skilled bench work in a carpenter shop operating power saws, joiners, wood lathes, planers, and boring, sanding and mortising machines; uses and maintains hand carpentry tools.

Prepares estimates of time and material requirements for assigned tasks; keeps simple records.

Reads and interprets blueprints, diagrams, sketches and other written instructions.

Observes established safety practices and procedures.

Supervises various semi-skilled and unskilled trades helpers assigned to assist with various phases of carpentry work.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the carpentry trade.

Considerable knowledge of the types, qualities and uses of various woods.

Considerable knowledge of the occupational hazards and safety precautions of the carpentry trade.

Knowledge of blueprints and construction plans.

Ability to prepare estimates of time and materials required for carpentry assignments.

Ability to operate a variety of power-driven wood-working machinery.

Ability to inspect lumber for grade and quality.

Ability to follow verbal and written instructions.

Ability to create forms for reinforcing concrete work and concrete slabs.

Ability to read and interpret blueprints, sketches and diagrams.

Ability to instruct and direct various semi-skilled and unskilled helpers in the performance of carpentry assignments.

Skill in the operation of carpentry tools and equipment.

Skill in carpentry.

**Carpenter (006508)**

### Carpenter Supervisor (006509)

#### Minimum Qualifications

Eighth grade. Three years of experience as a skilled carpenter are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the construction, maintenance, alteration and repair of wooden articles, equipment and structures.

Employees in this class are responsible for planning, assigning and reviewing the work of journeyman carpenters and skilled and unskilled employees performing carpentry and related tasks in accordance with standard trade practices. Duties include determining work methods and procedures, frequent participation in carpentry assignments, and assuring the quality of completed work. Assignments may be verbal or consist of written instructions, sketches, diagrams or blueprints. Supervision is exercised over a staff of journeyman carpenters, and skilled and unskilled helpers through periodic inspection of work in progress and upon completion for satisfactory application of carpentry skills and adherence to job specifications. Supervision is received from a technical or administrative superior who reviews work through personal inspections, conferences and written reports for timely completion of carpentry projects, quality of work and adherence to job specifications and applicable codes and regulations.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of journeymen carpenters and skilled and unskilled helpers engaged in the construction, alteration, remodeling, maintenance and repair of buildings, partitions, floors, stairways, bleacher stands, concrete forms, furniture, doors, windows and other articles, equipment and structures.

Receives and reviews carpentry assignments; reads and interprets blueprints, diagrams, sketches and other written instructions; prepares written instructions for subordinates.

Prepares estimates of time and material requirements for assigned jobs; maintains time and work records and prepares and submits reports.

Inspects carpentry work in progress and upon completion for quality and for adherence to job specifications and instructions.

Supervises the receiving, storing and cutting of lumber; maintains records of the use of lumber and other materials; requisitions equipment, materials and supplies.

Performs skilled benchwork in a carpenter shop; operates power saws, joiners, planers, wood lathes and boring, mortising and sanding equipment; directs activities of craftsmen and helpers in the shop.

Provides advice and assistance to journeyman carpenters in work methods and procedures and in selection of materials.

Communicates and enforces established safety measures and regulations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the standard practices, methods, tools and materials of the carpentry trade.

Thorough knowledge of the types, qualities and uses of various woods.

Thorough knowledge of the occupational hazards and safety precautions of the carpentry trade.

Considerable knowledge of blueprints and construction plans.

Knowledge of supervisory principles and practices.

Ability to supervise journeyman carpenters and helpers in a manner conducive to full performance and high morale.

Ability to prepare accurate estimates of time and materials required for carpentry assignments.

Ability to operate a variety of power-driven wood-working machinery.

Ability to communicate and enforce established safety measures and regulations.

Ability to inspect lumber for grade and quality.

Ability to follow verbal and written instructions.

Ability to read and interpret blueprints, sketches and diagrams.

Skill in operation of carpentry tools and equipment.

Skill in carpentry.

### Electrician (006510)

#### Minimum Qualifications

Eighth grade. Must possess a Miami-Dade County Certificate of Competency as a Journeyman Electrician. Must possess a CDL/Class B and have own tools.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, alteration, maintenance and repair of electrical systems, equipment and fixtures.

Employees in this class are responsible for performing skilled electrical tasks in accordance with standard electrical trade practices. Duties include working independently with considerable latitude in determining methods of work and using specialized tools and testing instruments of the electrical trade. Assignments may be verbal or consist of sketches, blueprints and electrical diagrams. Employees are frequently assisted by various skilled and unskilled trades helpers who assist in various phases of electrical work. Supervision is received from a technical or administrative superior who inspects work upon completion for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Maintains and repairs sterilizers, heaters, fans, floor scrubbers, circulating pumps, kitchen machinery and equipment, electrical motors and generators, laundry machinery and equipment and other electrical equipment throughout various County operations.

Installs, repairs and replaces electrical conduit, electrical wire, transformers, switches, electrical panels, fixtures and other electrical equipment for buildings, security and area lighting.

Repairs motors, flasher units, time clocks, relays, switches, control boxes and fuse boxes.

Locates and corrects power failures and motor trouble on electrically operated machinery, apparatus and systems.

Occasionally performs electrical work on refrigeration equipment; repairs, reconditions, modifies, replaces and installs equipment to refrigerate air and water.

Performs electrical work on moveable bridges such as repairing electrical motors and controllers, installing traffic warning and gate lights, installing and repairing switch panels, lights and electrical circuits, and replacing worn-out conduit and wire.

Reads and interprets sketches, blueprints and electrical diagrams.

Observes established safety practices and procedures applicable to the electrical trade.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the electrical trade.

Considerable knowledge of the principles and theory of electricity.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work on high voltage electrical systems and equipment.

Knowledge of blueprints and electrical diagrams.

Knowledge of local electrical codes effective in the County.

Ability to install, repair, maintain and alter a variety of electrical equipment and systems.

Ability to follow verbal and written instructions.

Ability to read and interpret blueprints, sketches and electrical diagrams.

Skill in the care and use of standard tools, equipment and testing instruments of the electrical trade.

Skill in the diagnosis of electrical malfunctions.

Skill in the electrical trade.

**Electrician (006510)**

### Electrician Supervisor (006512)

#### Minimum Qualifications

High school diploma or GED. Must possess a Miami-Dade County Certificate of Competency as a Master Electrician. Two years of experience as a licensed Journeyman Electrician are required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the installation, alteration, maintenance and repair of electrical systems, equipment and fixtures. Employees in this class are responsible for planning, assigning and reviewing the work of journeyman electricians and trades helpers performing electrical and related duties in accordance with standard trade practices. Emphasis of the work is on providing technical direction to subordinates, planning work methods and procedures for small and large-scale projects, coordinating electrical work at a variety of geographically separated locations, and participating in electrical installation, modification and repair assignments. Work is performed with considerable independent judgment regarding project requirements and technical phases of electrical work. Large-scale and complex assignments are generally accompanied by electrical blueprints and diagrams. Supervision is exercised over a staff of journeyman electricians, and skilled and unskilled helpers through periodic inspection of work in progress and upon completion for adherence to job specifications and satisfactory performance of equipment installed, repaired or maintained. Supervision is received from a technical or administrative superior who reviews work through personal inspections, conferences and written reports for timely completion of electrical projects, quality of work and adherence to job specifications and applicable codes and regulations.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of journeyman electricians and skilled and unskilled trades helpers engaged in the installation, alteration, maintenance and repair of electrical systems and equipment; lays out and explains jobs to be done; recommends working procedures and instructs subordinates in new techniques; provides on-site supervision and inspects completed work for satisfactory performance of installed or repaired equipment and adherence to applicable electrical codes and regulations.

Participates as required in running conduit, pulling wire, installing circuits, repairing a wide variety of electrically operated equipment, and other electrical assignments.

Assists administrative and technical superiors in planning new construction and major modifications and repairs; provides technical advice concerning electrical phases of proposed projects; provides technical inspection and review of electrical work performed under contract.

Prepares electrical schematic wiring diagrams for electrical projects; consults with engineering personnel regarding new construction and advises on installations of electrical equipment and systems; analyzes electrical load factors and makes modifications to prevent faults.

Supervises and participates in the installation, maintenance and reconstruction of a large variety of specialized electrical equipment used in hospitals and other specialized county operations.

Develops schedules and supervises a preventive maintenance program; assures that all electrical apparatus and equipment is oiled, lubricated and serviced as required.

Estimates time and materials required for proposed jobs; keeps records and submits reports; requisitions equipment, materials and supplies.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the standard practices, methods, tools and materials of the electrical trade.

Thorough knowledge of the occupational hazards and safety precautions of the electrical trade and of work on high voltage electrical systems and equipment.

Considerable knowledge of the principles and theory of electricity.

Considerable knowledge of electrical blueprints and diagrams.

Considerable knowledge of local electrical codes effective in the county.

Knowledge of supervisory principles and practices.

Ability to supervise a staff of journeyman electricians and trades helpers in a manner conducive to full performance and high morale.

Ability to install, repair, maintain and alter a variety of electrical equipment and systems.

Ability to locate defects in electrical equipment and systems.

### Electrician Supervisor (006512)

Ability to coordinate work at various geographically dispersed locations.  
Ability to understand and follow verbal and written instructions.  
Ability to read and interpret electrical blueprints and diagrams.

### Mason (006515)

#### Minimum Qualifications

Eighth grade. One year of skilled experience in general masonry work to include cement finishing and tile setting is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the construction, repair and maintenance of masonry buildings, structures and facilities.

Employees in this class are responsible for performing skilled masonry tasks in accordance with standard trade practices. Work involves constructing and testing forms for placement of concrete, pouring and finishing concrete, laying bricks, concrete blocks, glass block and applying and trimming mortar. Duties are performed with considerable independence in accordance with job specifications and work orders, and assignments are generally accompanied by sketches and diagrams. Employees may be assisted by various skilled and unskilled trade helpers who assist in various phases of masonry work. Supervision is received from a technical or administrative superior who periodically inspects work in progress and upon completion for satisfactory application of masonry skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Measures distance from reference points and marks guidelines on working surface to lay out work; determines the vertical and horizontal alignment of course using specialized masonry tools and equipment.

Constructs and tests forms in preparation for pouring cement; assists in pouring quantities of concrete for foundations and reinforcements; operates a concrete pump device to apply spray as required.

Applies cement grout to patch surfaces; mixes mortar and points bricks; manipulates trowel, floats and screeds on poured concrete to secure a specified finish; operates vibrators or rotary finishers.

Lays bricks, stone, concrete blocks, glass block, and applies and trims mortar according to prepared drawings and plans.

Prepares surfaces for plastering; replaces broken metal or wooden lathes, chips out broken plaster, concrete or tile; mixes plaster according to standard formula.

Applies tile to walls, floors and ceilings according to specified designs; sprinkles dry cement on fresh concrete sub-floor and sets tile; replaces dislodged tile blocks; fills spaces between tiles by troweling grout over surface of set tile and cleans surface of finished tile; applies plaster coat and layer of cement to walls and taps tile blocks with trowel handle into mortar.

Prepares estimates of time and materials required for masonry assignments.

Performs a variety of unskilled and semi-skilled tasks in allied building trades.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the masonry trade including stone work, plastering, cement finishing and tile setting.

Considerable knowledge of the occupational hazards and safety precautions of the masonry trade.

Considerable knowledge of the various types of mortar.

Knowledge of masonry construction standards.

Ability to prepare estimates of time and materials required for masonry assignments.

Ability to follow verbal and written instructions.

Ability to read and interpret sketches and drawings.

Skill in the manipulation and operation of masonry tools and equipment.

Skill in masonry.

REV 04-09

#### Nature Of Work

### Painter (006516)

#### Minimum Qualifications

Eighth grade. Two years of experience painting building structures or facilities are required. Must possess a Driver's license. Must be able to work from scaffolding at heights and near water hazards.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the painting of County buildings, fixtures and equipment.

Employees in this class are responsible for performing skilled painting tasks in accordance with standard trade practices. Work involves the preparation of surfaces and materials for painting, occasional hazardous assignments requiring the use of scaffolding, and application of paint to a variety of surfaces using a brush or spray gun. Duties require individual skilled performance in accordance with established trade practices and assignments may be verbal or consist of written job orders. Supervision is received from a technical or maintenance supervisor who periodically inspects work in progress and upon completion for satisfactory application of painting skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Prepares surfaces to be painted by removing dirt, scales, rust, old paint, grease, and other materials; scrapes, sands and applies sizing.

Mixes and matches paints and stains using the proper proportions of pigment, base and thinner.

Applies paint to interiors and exteriors of buildings and to special institutional, general building or other furniture and equipment; operates spray gun and uses brushes.

Occasionally does staining; uses brushes or rags, or dips objects into various stains; stains shelving, benches, tables and cabinets prior to lacquering or varnishing.

Rigs and erects scaffolding; hauls and erects ladders.

Occasionally performs a variety of other tasks closely related to painting assignments; applies waterproofing to building walls; cuts old caulking compounds and inserts new; cuts glass for windows, doors and picture frames, and removes and replaces broken glass.

Repairs bad spots in furniture; applies paint remover; neutralizes spots with alcohol, sands and makes minor repairs to equipment and apparatus.

Observes established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the painting trade.

Considerable knowledge of the types, qualities and uses of various paints and stains.

Considerable knowledge of the occupational hazards and safety precautions of the painting trade.

Ability to work at considerable heights on scaffolding.

Ability to understand and follow verbal and written instructions.

Ability to mix paints and stains in the proper proportions.

Skill in the use and operation of spray guns, paint brushes and other equipment of the painting trade.

Skill in mixing paints and matching and blending colors.

Skill in painting.

REV 11-94

#### Nature Of Work

This is skilled work at the journeyman level in the painting of County buildings, fixtures and equipment.

### Spray Painter (006517)

#### Minimum Qualifications

Eighth grade. Two years of painting experience to include spray painting of fixtures, furniture, structures, vehicles, parts, or mechanical equipment are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in spray painting fixtures, furniture, signs and mechanical equipment.

Employees in this class prepare, paint and reassemble a wide variety of surfaces and equipment. Work involves spray booth, paint shop and field assignments involving transportation of equipment and supplies to construction and maintenance job locations. Employees receive assignments both orally and through written job orders with work inspected by a foreman while in progress and upon completion.

##### ILLUSTRATIVE TASKS

Prepares surfaces to be painted; removes dirt, scales, rust, old paint, grease and other materials; scrapes and sands; applies sizing.

Fills cavities and dents with putty to attain smooth surface; selects and mixes coating liquid to produce desired color, according to specifications using paddle or mechanical mixer.

Work involves cleaning grease and dirt from surfaces, using materials such as lacquer thinner, turpentine, soap and water; applies masking tape over parts and areas that are not to be coated; fills cavities and dents with putty to attain smooth surface.

Applies paint by regulating sprayer valves and nozzle to obtain desired width and pressure of spray.

Cleans spraying equipment and brushes with solvent; makes minor repairs to equipment and other apparatus.

Coats areas inaccessible to hand sprayer, using brush.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods, materials, equipment, tools and practices involving spray painting.

Considerable knowledge of the preparation and work involved necessary for spray painting.

Considerable knowledge of the hazards and safety precautions of the work.

Knowledge of the methods used to mix, match and blend paints, enamels and other materials used in spray painting.

Ability to operate specialized paint equipment to obtain desired results according to established procedures.

Ability to understand and follow oral and written instructions.

Skill in the use and care of paint brushes, spray guns and other equipment of the painting trade.

REV 2-71

#### Nature Of Work

This is skilled work at the journeyman level in spray painting fixtures, furniture, signs and mechanical equipment.

### Painter Supervisor (006518)

#### Minimum Qualifications

High school diploma or GED. Five years of experience in painting building structures of facilities are required.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the painting of county buildings, fixtures and equipment.

Employees in this class are responsible for planning, assigning and reviewing the work of journeyman painters and skilled and unskilled helpers performing painting and related tasks in accordance with standard trade practices. Emphasis of the work is on providing technical direction to subordinates, planning work methods and procedures for a variety of painting assignments, coordinating work at a variety of geographically separated locations, and participating in various painting assignments. Duties are performed with independent judgment regarding technical phases of work, and in assuring that painting methods and practices adhere to established standards. Assignments may be verbal or consist of written job orders. Supervision is exercised over a staff of journeyman painters, and skilled and unskilled helpers through periodic inspection of work in progress and upon completion for satisfactory application of painting skills and adherence to job specifications. Supervision is received from a technical or administrative superior who reviews work through personal inspections, conferences and written reports for timely completion of painting projects, quality of work, and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of journeyman painters and skilled and unskilled trades helpers engaged in preparing surfaces and materials for painting, mixing paints and stains, and applying paint to interiors and exteriors of buildings, and furniture and equipment. Supervises the inspection and preparation of surfaces for painting; lays out and explains jobs to be done; recommends working procedures; provides on-site supervision and inspects completed work for satisfactory application of painting skills and adherence to job specifications; personally performs skilled work in interior and exterior painting.

Supervises the mixing and matching of paints and stains to conform with existing or specified colors, and the glazing, varnishing and staining of furniture.

Communicates and enforces established safety practices and procedures.

Prepares accurate estimates of time and materials required for proposed jobs; keeps records of labor and material costs; requisitions equipment, materials and supplies.

Develops, mixes and submits for approval color and finish samples of materials to be used in various painting projects.

Operates a motor vehicle to transport subordinates, materials and supplies to various job locations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the standard practices, methods, tools and materials of the painting trade.

Thorough knowledge of the types, qualities and uses of various paints and stains.

Thorough knowledge of the occupational hazards and safety precautions of the painting trade.

Knowledge of supervisory principles and practices.

Ability to supervise subordinate journeyman painters and helpers in a manner conducive to full performance and high morale.

Ability to prepare accurate estimates of time and materials required for painting assignments.

Ability to coordinate work at various geographically dispersed locations.

Ability to understand and follow verbal and written instructions.

Ability to work at considerable heights on scaffolding.

Ability to mix paints and stains in proper proportions.

Skill in the use and operation of spray guns, paint brushes and other equipment of the painting trade.

Skill in mixing paints and matching and blending colors.

Skill in painting.

### Painter Supervisor (006518)

REV 5-81

#### **Nature Of Work**

This is skilled supervisory work in the painting of county buildings, fixtures and equipment.

### Plasterer (006525)

#### Minimum Qualifications

Eighth grade. Two years of experience in plastering are required.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the alteration, maintenance and repair of plastered surfaces.

Plasterers repair and maintain plastered surfaces and plaster ornaments throughout county properties. Duties require the ability to lay out work from building plans and involve frequent work from scaffolding. Assignments are received in oral or written form and are frequently accompanied by rough sketches or complete building plans. Work is done under general supervision and is usually inspected by a maintenance superior for adequacy and for conformance with instructions or specifications.

##### ILLUSTRATIVE TASKS

Prepares surfaces for plastering; replaces broken metal or wooden lathes; chips out broken plaster, concrete or tile; mixes plaster according to standard formula.

Applies plaster to walls and ceilings; spreads plaster over lathes with trowel; smooths plastered surfaces to desired finish.

Molds and installs ornamental plaster panels and turns, shaping them by hand, using templates or fabricated molds; applies coat of plaster to wall and presses trim into position.

Does plaster patching where walls or ceiling are cracked or deteriorated; and prepares surface for painters.

Occasionally does other masonry work such as repairing broken and worn out asphalt tile floors, cement finishing, concrete repairing and brick laying.

Installs asbestos insulation and acoustic blocks.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of methods, materials, tools and practices used in the plastering trade.

Considerable knowledge of the occupational hazards and safety precautions of the work.

Ability to estimate time and materials required for specific assignments.

Ability to understand and follow oral and written instructions, sketches and building plans.

Ability to work from ladders and scaffolds.

Ability to work with and from templates and molds.

Skill in the use and care of the tools and materials of the plastering trade.

#### Nature Of Work

This is skilled work at the journeyman level in the alteration, maintenance and repair of plastered surfaces.

### Plumber (006527)

#### Minimum Qualifications

Eighth grade. Must possess a Miami-Dade County Certificate of Competency as a Journeyman Plumber. Must possess a Driver license and own hand tools.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, maintenance and repair of plumbing systems, fixtures and accessories. Employees in this class are responsible for performing skilled plumbing tasks in accordance with standard trade practices. Duties include determining work methods and required materials, cutting and installing pipes, performing a variety of plumbing repair and maintenance tasks, and utilizing specialized tools and testing instruments of the plumbing trade. Assignments may be verbal or consist of blueprints, sketches or diagrams. Employees are frequently assisted by various skilled and unskilled trades helpers who assist in various phases of plumbing work. Supervision is received from a technical or administrative superior who periodically inspects work in progress and upon completion for satisfactory performance of equipment, compliance with job specifications and adherence to applicable codes and regulations.

##### ILLUSTRATIVE TASKS

Cuts openings in walls for pipes; bends pipes to needed contours; cuts, reams and threads pipe; cuts and installs pvc pipe and polyethylene tubing to specifications.

Installs, maintains and repairs valves, faucets, bathtubs, sinks, lavatories, sewers, vents, drinking fountains, water heaters and other fixtures.

Installs irrigation systems including pumps, pressure tanks, sprinklers, sprinkler controls and connectors.

Pours molten solder over joints and spreads and tapers solder.

Maintains piping systems by opening clogged drains with plungers or other devices; snakes-out pipes and fixtures; replaces washers on leaky faucets; tests for leaks by filling pipe with water under pressure and checking fall pressure with gauges.

Installs pipe and hoses on fire trucks, spray trucks and other specialized equipment and apparatus.

Repairs, replaces and checks high and low pressure steam boilers; blows down and flushes boilers; checks, repairs and replaces safety devices and controls as necessary; flushes and cleans boilers, storage and return tanks, hot water heaters and similar equipment.

Reads and interprets blueprints, sketches and diagrams.

Prepares estimates of time and materials required for plumbing assignments.

Observes established safety practices and procedures.

Operates and uses specialized plumbing tools and equipment such as ratchet cutters, reamers, electric and gasoline powered sewer snakes, pipe wrenches, chain wrenches and pipe vices.

Assigns tasks to various skilled and unskilled helpers assisting in various phases of plumbing work.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the plumbing trade.

Considerable knowledge of the flows, pressures and capacities of water tanks and lines.

Considerable knowledge of applicable local plumbing codes effective in the county.

Considerable knowledge of the occupational hazards and safety precautions of the plumbing trade.

Knowledge of blueprints and plumbing diagrams.

Ability to install, repair and maintain plumbing systems, fixtures and accessories.

Ability to locate defects in plumbing fixtures, systems and equipment.

Ability to follow verbal and written instructions.

Ability to read and interpret blueprints, sketches and diagrams.

Ability to prepare time and material estimates for plumbing assignments.

Skill in the care and use of standard tools, equipment and testing devices of the plumbing trade.

Skill in the diagnosis of plumbing malfunctions.

Skill in the plumbing trade.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the installation, maintenance and repair of plumbing systems, fixtures, equipment and accessories. Employees in this class are responsible for planning, assigning and reviewing the work of journeyman plumbers and trades helpers performing plumbing and related duties in accordance with standard trade practices. Emphasis of the work is on providing technical direction to subordinates, planning work methods and procedures for small and large-scale projects, coordinating plumbing work at a variety of geographically separated locations, and participating in plumbing installation, repair and maintenance tasks. Assignments may be verbal or written, and accompanied by blueprints, sketches and diagrams. Work is performed with considerable independent judgment regarding project requirements and technical phases of plumbing work. Supervision is exercised over a staff of journeyman plumbers and trades helpers through periodic inspection of work in progress and upon completion for adherence to job specifications and satisfactory performance of equipment repaired, installed or maintained. Supervision is received from a technical or administrative superior who reviews work through personal inspections, conferences and written reports for timely completion of plumbing projects, quality of work and adherence to job specifications and applicable codes and regulations.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of journeyman plumbers and skilled and unskilled trades helpers engaged in the installation, maintenance and repair of plumbing systems, fixtures, equipment and accessories; lays out and explains jobs to be done and recommends working procedures; provides on-site supervision and inspects completed work for satisfactory performance of installed or repaired equipment or fixtures, and adherence to applicable plumbing codes and regulations.

Participates as required in skilled tasks in laying out, installing, repairing and maintaining plumbing fixtures and systems.

Supervises the installation, maintenance and repair of valves, faucets, bathtubs, sinks, lavatories, closet valves, bowls, urinal tanks, flush pipes, drinking fountains, water heaters, irrigation systems and other systems, equipment and fixtures.

Supervises a wide variety of plumbing and steam fitting maintenance and reconstruction work at county hospitals and other county institutional operations; supervises the maintenance and repair of specialized equipment and apparatus.

Receives and resolves complaints concerning water service and plumbing problems.

Assists administrative and technical superiors in planning new construction and major modifications; provides technical advice concerning plumbing phases of proposed projects.

Estimates time and materials required for proposed jobs; keeps records and submits reports; requisitions equipment, materials and supplies.

Communicates and enforces established safety practices and procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the standard practices, methods, tools and materials of the plumbing trade.

Thorough knowledge of the flows, pressures and capacities of water tanks and lines.

Thorough knowledge of applicable local plumbing codes effective in the county.

Thorough knowledge of the occupational hazards and safety precautions of the plumbing trade.

Considerable knowledge of blueprints and plumbing diagrams.

Knowledge of supervisory principles and practices.

Ability to supervise a staff of journeyman plumbers and trades helpers in a manner conducive to full performance and high morale.

Ability to install, repair and maintain plumbing systems, fixtures, accessories and equipment.

Ability to locate defects in plumbing fixtures, systems and equipment.

Ability to read and interpret blueprints, sketches and diagrams.

### Plumber Supervisor (006528)

Ability to follow verbal and written instructions.

Ability to coordinate plumbing work at various geographical locations.

Ability to prepare accurate estimates of time and materials required for plumbing assignments.

Skill in the care and use of standard tools, equipment and testing devices of the plumbing trade.

Skill in the diagnosis of plumbing malfunctions.

Skill in the plumbing trade.

REV 5-81

#### **Nature Of Work**

This is skilled supervisory work in the installation, maintenance and repair of plumbing systems, fixtures, equipment and accessories.

### Refrigeration-AC Mechanic (006532)

#### Minimum Qualifications

Eighth grade. Must possess a Miami-Dade County Certificate of Competency as a Journeyman in General Mechanical or Journeyman in Air-Conditioning. Must possess a Type II or Universal certification from an EPA recognized certification program in refrigerant transition and recovery service practices in accordance with EPA 40 CFR, Part 82, Subpart F, Section 608 of the 1990 Clean Air Act Amendment. Applicants will be subject to an extensive background investigation, fingerprint check and polygraph examination.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, maintenance and repair of heating, ventilation, air conditioning and refrigeration equipment.

Employees in this class are responsible for servicing air conditioning systems and units, cold storage plants, chillers, refrigerators, water cooling systems and related equipment utilized in a wide variety of County facilities and buildings. Employees work independently using handtools, power tools and various precision measuring and testing instruments. Assignments may be in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning equipment. Work is reviewed by a maintenance supervisor who inspects work occasionally in progress and upon completion for compliance with instructions and for satisfactory operation of equipment repaired, installed or maintained.

##### ILLUSTRATIVE TASKS

Overhauls and services air conditioning and refrigeration units by repairing, replacing or adjusting worn or broken parts on condensers, compressors and water and vacuum pumps; tests equipment for refrigerant leaks.

Repairs or adjusts valves, piping connections, fittings and couplings by bolting, riveting, welding, soldering and brazing, using hand tools, acetylene torch, prestolite torch and drill press.

Removes motors and pumps, replaces shafts and bearings, repacks and reinstalls; replaces, repairs and recalibrates thermostats and humidistats; adjusts expansion valves; adjusts or changes belts; replaces gaskets, hinges and hardware.

Sets airflow controls to suit occupants by adjusting splitters, dampers, diffusers and fan speeds; removes, cleans and replaces strainers and filters; rebuilds, repairs and paints wood and metal cooling towers and fans; adds appropriate chemicals to water towers to prevent rust and corrosion.

Starts equipment, observes operation and reads gauges and instruments such as volt-ohm meters; determines temperature, velocity and humidity factors using air and water temperature gauges; adjusts mechanisms such as valves, controls and pumps to control level of fluid, pressure and temperature; bleeds contaminants from system and charges with specified amount and type of refrigerant; checks gauges and makes periodic preventive maintenance inspections.

Assists supervisor in planning modifications and new installation projects, preparation of specifications, and in major overhauling and reconditioning jobs utilizing blueprints, engineering specifications and knowledge of refrigerant systems.

Maintains simple job records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the practices, methods, materials, test instruments and tools commonly utilized in the repair and service of various types of heating, air conditioning and refrigeration equipment.

Considerable knowledge of the mechanical operation and repair characteristics of various kinds of cooling equipment.

Considerable knowledge of the occupational hazards and safety precautions of the work.

Knowledge of the principles of mechanics.

Ability to detect defects in machinery and to make the necessary repairs or adjustments.

Ability to work from verbal or written instructions, simple diagrams and sketches.

Skill in the care and use of tools and equipment essential for the repair of food, water and air refrigerating equipment.

#### Minimum Qualifications

Eighth grade. Must possess a Universal Certificate of Completion in a Refrigerant Transition and Recovery Certification Program recognized by the Environmental Protection Agency (EPA). Must possess a Miami-Dade County Certificate of Competency as a Master Mechanic in Refrigeration and/or Air-Conditioning. Applicants will be subject to an extensive background investigation, fingerprint check and polygraph examination.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the operation, maintenance and repair of varied types of refrigeration equipment.

The Refrigeration Mechanic Foreman plans, coordinates and supervises work incidental to the installation, repair, maintenance and servicing of refrigerators and refrigeration equipment and component parts in food refrigeration, air conditioning units and plants, and water cooling systems. Duties may include the supervision of a cold storage plant providing space allocations for a variety of perishable products. The Foreman consults with the users of the equipment to determine the exact nature of services required or malfunctions noted. Supervision and assistance are given to subordinate mechanics in diagnosing and planning repair and installation work. Job assignments are received in oral or written form from a maintenance superintendent or from an administrative superior. Completed jobs are primarily supervised through the satisfactory performance of the equipment and satisfaction of the clientele served.

##### ILLUSTRATIVE TASKS

Lays out, assigns and directs the work of mechanics on overhaul and repair work to air conditioning, water cooling, and food refrigeration systems and equipment; maintains records and submits reports of materials, costs and charges.

Supervises the operation of a cold storage plant including the maintenance of the mechanical equipment, allocation of locker space and dealing with business representatives using the services of the plant.

Consults with administrative and supervisory personnel regarding new installations and modifications of existing systems; and in the preparation of specifications for work to be done on contract; consults with nursing and medical personnel regarding the special requirements of surgery, maternity, nursery and other specialized medical units.

Inspects all products to be stored to ascertain condition and quantity.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the practices, methods, equipment, materials and tools of the refrigerating and air conditioning trades.

Thorough knowledge of the mechanical operation and repair characteristics of various brands and kinds of refrigeration equipment.

Thorough knowledge of the interrelationship of other trades to the work of refrigeration and air conditioning.

Thorough knowledge of the occupational hazards and safety precautions of the work.

Knowledge of the spoilage characteristics of a variety of perishable products.

Knowledge of effective supervisory techniques.

Ability to make effective sketches of work to be done.

Ability to initiate invoices for services provided.

Ability to plan, lay out and supervise the work of skilled mechanics in a manner conducive to full performance and high morale.

Skill in the use and care of the tools and equipment of the refrigeration trade.

## Landfills System Mechanic (006536)

### Minimum Qualifications

Three years of experience in the repair, maintenance and operation of pumping systems, generators, leachate or irrigation systems are required.

### Job Specifications

#### NATURE OF WORK

This is skilled work at the journeyman level in the installation, repair and maintenance of complex mechanical landfill systems.

Employees in this class are responsible for the installation, repair and maintenance of complex mechanical landfill systems used for purposes of irrigation, odor control, gas recovery, dust control, leachate collection and litter control. Duties involve installing, repairing and maintaining equipment including pumps, electrical motors, industrial sprinklers, pipes, fences and all component parts of landfill systems. Related work includes operating vehicular equipment such as bulldozers, backhoes, front-end loaders, dump trucks, water trucks and fire trucks. Supervision is received from a technical and administrative superior who reviews work through conferences, personal observations and written reports for satisfactory completion of assigned responsibilities.

#### ILLUSTRATIVE TASKS

Installs, maintains and repairs complex mechanical landfill systems including industrial vacuum pumps, electric motors, industrial sprinklers and pipes; greases, changes oil and filters; overhauls pumps; replaces components including timers, electric motors, pumps, gauges and valves.

Monitors leachate in manholes, valves and pumps; checks levels and activates valve system to control level as necessary.

Monitors landfill irrigation systems and gas recovery systems; positions industrial sprinklers on and around landfill; ensures rotation of water canon; checks working face of landfill for dust control and moves sprinklers as necessary by disconnecting hoses, attaching to vehicular equipment, moving to the next area and reconnecting; checks gas pipes for flame and re-lights as necessary.

Reads meters and pressure gauges pertaining to landfill systems; determines breakdowns or malfunctions, leachate levels, rain gauge levels, pump hour usage, and general operating conditions of electrical and mechanical equipment; generates reports.

Monitors and maintains odor control system in the shredder facility and on the landfill; refills drums with chemicals; assures that electric timer motor and blower are in proper operating condition.

Installs, maintains and repairs litter control fences at the landfill and other locations.

Maintains, cleans and repairs tools and equipment used in the performance of assigned duties.

Assists in extinguishing landfill or other fires through placement of industrial sprinklers, or operating fire truck or other heavy equipment.

Observes established safety practices and procedures pertaining to landfill systems repair and maintenance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of tools, equipment, methods and materials of the mechanical and electrical trades.

Considerable knowledge of the design and operating characteristics of complex mechanical landfill systems.

Considerable knowledge of the repair and maintenance of various types, makes and models of heavy duty industrial pumps, gauges and other secondary components of landfill systems.

Considerable knowledge of the occupational hazards and safety precautions applicable to the repair, installation and maintenance of industrial equipment used in landfill operating systems.

Knowledge of the records, forms and reports required in the area of assignment.

Ability to install, repair and maintain a variety of complex landfill systems equipment.

Ability to operate a variety of heavy equipment.

Ability to detect by inspection worn, defective, or improperly adjusted parts or assemblies used in landfill operations.

Ability to read and follow diagrams, blueprints and schematics.

Ability to tabulate numerical information and prepare reports.

Ability to understand the environmental impact of landfill systems failures.

Ability to plan material requirements for simultaneous repair and routine maintenance work.

### Waste Plant Mechanic (006537)

#### Minimum Qualifications

High school. Two years of experience in the installation, repair and maintenance of large stationary industrial motors and other mechanical equipment are required. Must possess a CDL/Class B. Must possess own hand tools.

#### Job Specifications

##### NATURE OF WORK

This is skilled journeyman level work in the maintenance, repair and installation of a variety of heavy industrial mechanical equipment in a large waste disposal plant and in waste transfer facilities.

Employees in this class are responsible for the repair, maintenance and installation of heavy industrial mechanical equipment associated with shredder mills, conveyors, compactors and fixed waste mechanical equipment. Equipment includes pumps, compressors, duct work, pipe line, hydraulic components, gear boxes and facility mechanical equipment at waste disposal and waste transfer facilities. Duties include working with Waste Plant Electricians in the installation of electrical motors and proper shaft alignment. Employees work independently or oversee a crew of subordinate maintenance employees and use specialized hand tools, power tools and precision measuring and testing equipment. Supervision is received from a technical and administrative superior who makes general assignments and more detailed assignments when tasks involve new or difficult problems, and reviews work in progress and upon completion for satisfactory operation of equipment repaired, maintained or installed.

##### ILLUSTRATIVE TASKS

Maintains, repairs and replaces components of shredder mills, conveyors and compactors, including conveyor rollers, conveyor belts, bearings, sprockets, chains, motors, shredder hammers, shredder hammer pullers and shredder fogging systems.

Inspects, replaces and installs new valve seats in pumps, pistons and valves in hydraulic equipment associated with compactors and facility mechanical equipment, reduction gears and air compressors.

Diagnoses, inspects and repairs bearings, centrifugal pumps and keeps seal rings in proper condition; oils bearings, makes and maintains proper alignment of pumps and motors; inspects and repairs rubber connections in couplings, gear reducers and chain drives.

Inspects, maintains and repairs mechanical equipment associated with the physical plant at waste disposal and transfer facilities including fire sprinkler system lines, heads and pumps, air conditioning equipment, plumbing, and emergency power generation equipment motors.

Oversees a crew of subordinate maintenance employees in the accomplishment of complex and difficult assignments; directs, leads and performs tasks with assigned maintenance crew.

Performs assigned preventive maintenance on facility and plant equipment in accordance with maintenance directives.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the construction, design and adjustment of heavy industrial mechanical equipment used in a large waste disposal plant and in waste transfer facilities.

Considerable knowledge of the methods and techniques used in the installation, repair and maintenance of heavy industrial equipment.

Considerable knowledge of the tools, equipment and supplies used in the installation, adjustment, repair and maintenance of mechanical equipment uses in a large waste disposal plant and in waste transfer facilities.

Considerable knowledge of the occupational hazards and safety precautions applicable to the repair, maintenance and installation of heavy industrial mechanical equipment.

Considerable knowledge of the operating characteristics and maintenance requirements of mechanical equipment in the area of assignment.

Considerable knowledge of the principles of mechanics and hydraulics.

Ability to detect by inspection, worn, defective or improperly adjusted part or assembly in a large variety of machinery.

Ability to work from blueprints, pencil sketches and other written instructions.

Ability to follow verbal instructions.

Ability to repair, maintain, adjust, and install a large variety of mechanical equipment.

Ability to keep work records and make reports of materials used and work performed.

Ability to repair, maintain, adjust and install a large variety of mechanical equipment.

Skill in the diagnosis of equipment malfunctions.

Skill in the use of hand tools, power tools, precision test equipment and shop equipment.

#### Minimum Qualifications

Must possess a Miami-Dade County Certificate of Competency as a Journeyman Electrician. Two years of experience at the journeyman level in the maintenance and repair of electronic and electrical systems or equipment are required. Must possess a CDL/Class B.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled journeyman work in the maintenance, repair and installation of both high and low voltage electrical and electronic systems and equipment in a modern solid waste disposal facility.

Employees in this class perform skilled electrical and electronic repair tasks in accordance with standard practices of the electrical and electronic trade, including responsibility for performing special work required for high voltage electrical equipment and controls. Work requires a knowledge of the mechanical and operational aspects of equipment and its installation. Incumbents use special electrical tools such as voltmeters, ammeters, insulation testing meters, industrial analyzers, ground testers and also use special equipment necessary for the maintenance of large electrical motors. Assignments are made either orally or through written orders and may be accompanied by diagrams and blueprints. Technical supervision is received from a superior on unusual or difficult operational problems and work is evaluated by satisfactory performance of equipment repaired or maintained.

##### ILLUSTRATIVE TASKS

Installs, maintains and repairs a variety of electronic controls such as current/voltage scale indicators and controllers, computer set stations, solid state modular controls, single case recorders, servo drive systems, servo amplifiers, temperature indicator panels and sending units; inspects and monitors all components for leakage and impending breakdown.

Installs, maintains and repairs electronic controls for electrostatic precipitators, including primary and secondary live voltage and amperage, printed circuit modules, transformers, collector plates and discharge wires.

Installs, maintains and repairs bridge crane components including control contractors, rectifier panels, continuity sensing units, signal converters, tachometer continuity and limit panels, pneumatic and hydraulic timing controls; removes, reclines and adjusts holding and closing of bridge and trolley brakes.

Installs, maintains and repairs both high and low voltage electric motors, motor starters, contractors and all types of industrial wiring and lighting.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of standard practices, methods, tools and materials of the electrical and electronic trade.

Considerable knowledge of the installation, alteration, repair and maintenance of both high and low voltage electrical and electronic systems and equipment in modern solid waste disposal facilities.

Knowledge of local and national electrical codes.

Knowledge of the hazards of the trade and of appropriate precautionary measures, particularly as they pertain to work on high voltage electrical systems and equipment.

Knowledge of the operating principles and repair techniques applicable to electronic equipment.

Ability to locate and adjust defects in electrical and electronic systems and equipment.

Ability to work from electrical diagrams and blueprints, and to understand and effectively carry out oral and written instructions.

Ability to make appropriate estimates of time and materials.

Ability to follow electrical wiring diagrams on low and medium voltage motor controllers and circuit breakers.

Skill in the care and use of standard and special electrical tools and testing equipment.

##### NATURE OF WORK

This is skilled manual work at the journeyman level in the design and lettering of signs, posters, show cards and various pictorial displays. Employees in this class are responsible for a variety of sign painting and lettering. Work involves the use of freehand lettering, stencils, silk screens and other painting processes. Additional work includes the cutting of mitre boards for use in silk screen frames, sanding and preparing surfaces for painting. Work assignments are received in the form of sketches, oral or written instruction from a maintenance supervisor who reviews work upon completion for satisfactory appearance and conformance with specifications.

##### ILLUSTRATIVE TASKS

Hand letters a variety of signs, laying out and cutting film for silk screen processing; cutting mitre boards for silk screen frames. Makes original drawings, cutting paper stencils for hand lettering used in gold leaf lettering, signs for building and parking signs, desk plates and special signs and posters. Prepares signs for advertising displays for resale merchandise, murals, cartoon work, cut-outs for displays and other related painting work. Letters and numbers automobile equipment, boats, concession trailers, using striping brush and masking tape. Makes a variety of informational and directional signs; letters office doors and signs for affixing to buildings and equipment. Does some commercial art work in designing special signs and posters. Mixes, matches and blends paints, enamels and other materials used in sign painting. Maintains records of supplies used in daily work; requisitions materials and supplies as needed. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods and materials used in the sign painting trade.  
Considerable knowledge of the proper methods of preparing surfaces for painting.  
Considerable knowledge of the equipment and techniques used in sign painting such as silk screen, air brush, spray gun, sanding machine and vacuum applicators.  
Ability to design signs and do hand lettering.  
Ability to interpret request work from sketches; cut special stencils for a variety of signs, posters and pictorial displays.  
Ability to design and build frames to be used in silk screen processing.  
Ability to arrange opaque letters for desired design of photographic stencils.  
Skill in the blending and mixing of paints for desired colors.  
Skill in the use of hand tools and other equipment used in sign painting.

### Job Specifications

#### NATURE OF WORK

This is skilled journeyman level work in the maintenance, repair, overhaul and operation of large stationary diesel engines and auxiliary equipment.

Employees in this class perform specialized mechanical work in the maintenance, repair, overhaul and operation of large diesel engines on an assigned shift at a county facility which requires an uninterruptable power supply. Employees work independently using specialized tools and various testing instruments specially suited to diesel repair. Supervision may occasionally be exercised over a small group of semi-skilled employees engaged in repair and overhaul work. Supervision is received from an administrative superior who reviews work through maintenance records and personal observations for effectiveness of maintenance and operation of equipment.

#### ILLUSTRATIVE TASKS

Diagnoses, adjusts, repairs and overhauls large stationary diesel engines, generators and auxiliary equipment.

Repairs, pump-tests and gauges injection nozzles; repairs and adjusts fuel pump governors, compression valves, engine governors, clutches, right angle drives and other related equipment.

Checks, replaces and fits new camshaft bearing and timing gears; inspects and replaces worn accessory spring drive gears, springs and guides.

Replaces, cleans and overhauls engine lubricating oil pumps, water pumps, turbocharger, lube oil pumps and speed increaser lube oil pumps; cleans, inspects and overhauls turbochargers.

Checks shaft alignment; repairs and cleans air starting distributor systems; maintains starting batteries, battery charging systems and status; obtains and records hydrometer readings, adds water and checks connections.

Keeps records of engine maintenance work performed, operation time and other related activities; requests and maintains supplies of replacement parts.

Starts, operates, stops and adjusts large diesel engines and their auxiliaries according to load demands and characteristics; reads meters, gauges and other recording and indicating devices showing operating conditions.

Makes adjustments to provide most satisfactory engine and auxiliary equipment operation; makes continual inspections of the engines and auxiliaries to which assigned.

Checks fuel supply, cooling water, exhaust temperatures and lubricating oil consumption; makes operating adjustments, keeps machinery clean and maintains a continuous operating record of each engine and auxiliary.

Assures diesel engines interface with emergency generators and air-conditioning chiller units.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the construction, design, repair, adjustment and operation of large diesel engines and their auxiliaries.

Considerable knowledge of the usual types of mechanic's tools and equipment as well as special tools used in the repair and maintenance of diesel engines.

Considerable knowledge of the operation of electric generators, motors, large blowers, air-compressors and large pumps and valves.

Knowledge of the operation of air-conditioning chiller systems.

Ability to recognize unsatisfactory operating conditions as shown by meters, gauges, indicating and measuring devices, and abnormal engine sounds.

Ability to act quickly in making necessary changes or adjustments as needed.

Ability to detect by inspection any worn, defective or improperly adjusted diesel part or assembly.

Ability to follow oral and written instructions.

Ability to keep accurate records of repair, maintenance and operation of diesel engines and their auxiliaries.

Skill in the diagnosis of defects and failures of large diesel engines and their auxiliary equipment.

## Human Resources Department

### Power Systems Technician (006550)

Skill in the use of specialized diesel repair tools and testing instruments.

NEW 10-79

#### **Nature Of Work**

This is skilled journeyman level work in the maintenance, repair, overhaul and operation of large stationary diesel engines and auxiliary equipment.

### Security Alarm Specialist (006551)

#### Minimum Qualifications

High school diploma or GED. Must possess a Miami-Dade County Certificate of Competency as a Burglar Alarm Electrical Specialist. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the installation, alteration and repair of intrusion and fire alarm systems in county buildings. An employee in this class is responsible for performing specialized skilled electrical tasks in accordance with standard trade practices pertaining to intrusion and fire alarm systems. Duties include working independently with considerable latitude in determining methods of work, and using specialized tools and testing instruments of the electrical trade. Assignments may be verbal or consist of sketches, blueprints and electrical diagrams. Employees are frequently assisted by various skilled and unskilled trades helpers who assist in various phases of work. Supervision is received from an administrative superior who holds the incumbent responsible for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Installs, maintains and repairs a variety of intrusion and fire alarm systems in a variety of county buildings.  
Studies county buildings and facilities and prepares recommendations concerning the development of the best methods of intrusion protection.  
Analyzes intrusion detection systems in county buildings and facilities and identifies and corrects faults in installation.  
Supervises the activities of various skilled or unskilled trades helpers who assist with various phases of work.  
Utilizes various tools of the electrical and electronic trade in the performance of assigned duties.  
Reads and interprets sketches, blueprints and electrical diagrams.  
Observes established safety practices and procedures applicable to the electrical trade.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the modern equipment and technology of the intrusion detection and fire alarm system industry.  
Considerable knowledge of the standard practices, methods, tools and materials of the electrical trade.  
Considerable knowledge of the principles and theory of electricity.  
Considerable knowledge of the occupational hazards and safety precautions of the electrical trade.  
Knowledge of blueprints and electrical diagrams.  
Knowledge of local electrical codes effective in the county.  
Ability to install, repair, maintain and alter a variety of intrusion and fire alarm systems.  
Ability to locate defects in a variety of intrusion and fire alarm systems.  
Ability to follow verbal and written instructions.  
Ability to read and interpret blueprints, sketches and electrical diagrams.  
Skill in the care and use of standard tools, equipment and testing instruments of the electrical trade.  
Skill in the diagnosis of electrical malfunctions.  
Skill in the electrical trade.

NEW 10-81

#### Nature Of Work

This is skilled work at the journeyman level in the installation, alteration and repair of intrusion and fire alarm systems in county buildings.

### Security Alarm Specialist Supervisor (006552)

#### Minimum Qualifications

Graduation from an accredited high school. GED or high school equivalence is acceptable. A current valid Master Burglar Alarm Installer's Certificate or a current valid Dade County Certificate of Competency as a Master Electrician is required. Must possess a valid Driver license. Knowledge and experience with burglar alarm systems are required.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the installation, alteration, maintenance and repair of electronic intrusion alarm systems, equipment, fixtures and receivers.

An employee in this class is responsible for planning, assigning and reviewing the work of journeyman alarm technicians and private contract assistants engaged in electrical alarm system installation and maintenance. Emphasis of the work is on providing technical direction to subordinates, participating in electrical assignments, advising administrative superiors on the most effective type of burglar alarm system, and determining security alarm system needs and project requirements. The employee designs blueprints and specifications as the nature of the job-site requires, and trains, assists and monitors reports of support staff responsible for recording alarm responses. Supervision is exercised over skilled craftsmen, unskilled helpers and contract assistants through inspection of work in progress and upon completion, for satisfactory performance of alarm systems, equipment, fixtures and receivers installed, repaired or maintained. Supervision is received from an administrative superior who reviews work through personal inspections, systems' effectiveness to prevent burglaries, cost, and project completion time.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of journeyman alarm technicians and trades employees engaged in the installation, alteration, maintenance and repair of intrusion-alarm systems; lays out and explains jobs to be done; recommends working procedures and instructs employees in new techniques; provides on-site supervision, and inspects completed work for proper installation and function of alarm system.

Applies for construction permits when applicable.

Participates as required in installation and maintenance work.

Attends police and security seminars to keep abreast of the latest technical innovations in security work.

Advises administrative supervisors in planning new alarm systems, both in existing facilities and those under construction; provides technical advice and inspects alarm construction done under contract.

Designs blueprints and specifications as the nature of the job-site requires.

Supervises and participates in the installation and maintenance of a large variety of specialized equipment associated with the safety and security of a County building including card-reader locks, intercoms, electric door-releases, and closed-circuit television.

Develops systems that assure all equipment remains in good working condition and continues to communicate with the Central Station.

Estimates time and materials required for proposed jobs; keeps records, submits reports and prepares requisitions.

Reviews activity sheets, service tickets and unit time sheets of alarm technicians for accuracy; makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Writes letters of certification to local police departments confirming that alarm systems meet city "false alarm" standards.

Communicates with Southern Bell telephone installers to arrange interface of alarm controls and telephone switchboards.

Trains Console Security Specialists responsible for manning receivers at the end of all intrusion alarms; devises forms used to record alarms and responses; reviews forms to assure that all alarms are reporting accurately.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of standard practices, methods, tools and materials of the electrical trade.

Thorough knowledge of the principles and usage of all types of alarm sensors, and methods of alarm transmission by line-seizure, direct-wire, or McCullough-loop systems.

Considerable knowledge of Fire Department life-safety codes for fire exit doors for various municipalities.

Knowledge of architectural drawings, floor plans and blueprints.

### Security Alarm Specialist Supervisor (006552)

Knowledge of the duties of Console Security Specialists in the Central Station where alarm signals are received.

Knowledge of supervisory principles and practices.

Ability to supervise a staff of journeyman alarm installers in an efficient fashion, in widely scattered locations.

Ability to design simple forms for Console Security Specialists to use in listing signal activity.

Ability to design an effective burglar alarm system for a particular building, and to accurately estimate the cost, in labor and materials, to install it.

Ability to troubleshoot any alarm system, and locate and repair malfunctions.

Ability to return to duty at any hour of the night to repair an intrusion alarm in a burglarized building.

Skill in the use of all hand tools of the electrical trade.

NEW 10-88

#### **Nature Of Work**

This is skilled supervisory work in the installation, alteration, maintenance and repair of electronic intrusion alarm systems, equipment, fixtures and receivers.

## Human Resources Department

---

### Security Alarm Systems Supervisor (006553)

#### **Minimum Qualifications**

Graduation from an accredited high school. GED or high school equivalence is acceptable. One year of experience in the correctional security and life safety systems is required. A current valid Master Burglar Alarm Installer's Certificate or a current valid Dade County Certificate of Competency as a Master Electrician is required. Must possess a valid Driver license. Knowledge and experience with burglar alarm systems are required.

#### **Job Specifications**

#### **Nature Of Work**

This is advanced specialized supervisory work in the protection of public and private property within a county facility.

### Welder (006560)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in gas, electric and tungsten inert gas welding in the horizontal, vertical, overhead and flat positions including layout and fabrication are required. Must possess a certificate issued by affiliates of and/or by the American Welding Society. Must possess a CDL/Class B. Must possess own hand tools. Must be able to lift and handle items weighing up to 50 pounds.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the cutting and welding of metallic articles, parts, structures and equipment.

Employees in this class are responsible for the application of trade skills to a variety of welding, brazing and metal cutting tasks on ferrous and non-ferrous metals. Duties include the fabrication of some metallic items, maintaining and performing minor repairs to welding equipment, and occasionally operating a motor vehicle to perform field work. Assignments may be received verbally or through written instructions, blueprints or diagrams. Incumbents exercise considerable independent judgment in the selection of methods and procedures to produce desired results. Supervision is received from a technical or administrative superior who reviews work in progress and upon completion for satisfactory application of welding skills and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Preheats and cleans metals; lays out, cuts and fits materials for welding; selects proper welding heat and proper types and sizes of electrodes for correct penetration and strength of welded metals.

Operates acetylene or electric arc welding equipment in the performance of cutting and welding tasks on machinery and equipment such as truck and automotive bodies, steam and plumbing systems, pump and engine parts, dragline buckets, dozer blades and tracks, loader buckets and other similar machinery and apparatus; performs horizontal, vertical, overhead and flat welding.

Operates various tools and equipment used in welding repair procedures including air wrenches, sheet metal shears and brakes, hoist, drill presses and lift trucks.

Participates in the manufacture of specialized machinery and apparatus for various construction and repair activities.

Brazes, solders and coats non-ferrous metals; performs silver and lead soldering.

Assists in the design of a variety of specialized equipment and builds equipment according to job specifications.

Occasionally does blacksmithing including the manufacturing of eye bolts, braces, angle brackets and similar items.

Occasionally operates a motor vehicle to transport portable welders and acetylene burning-welding equipment to field construction sites.

Cleans, stores, maintains and makes minor repairs to welding equipment.

Adheres to established safety practices and procedures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of methods, practices and techniques of welding.

Considerable knowledge of the care and use of the tools of the welding trade.

Considerable knowledge of the occupational hazards and safety precautions required in the operation of acetylene or electric arc welding equipment.

Considerable knowledge of the properties of ferrous and non-ferrous metals used in welding work.

Ability to understand and follow verbal and written instructions.

Ability to read simple sketches, diagrams and blueprints.

Ability to operate welding equipment and to perform a variety of welding assignments.

Skill in welding.

Skill in the operation of welding equipment.

Physical strength and agility sufficient to perform assigned duties.

### Welder (006560)

REV 12-94

#### **Nature Of Work**

This is skilled work at the journeyman level in the cutting and welding of metallic articles, parts, structures and equipment.

### Electronic-Electrical Equipment Technician 1 (006572)

#### Minimum Qualifications

Eighth grade. One year of experience in the installation, maintenance, troubleshooting, and repair of electronic equipment is required.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the installation, adjustment, maintenance, modification and repair of traffic signals, electronic control mechanisms, radio and related communications equipment.

Employees in this class are responsible for the maintenance and repair of a variety of stationary and mobile radio transmitting and receiving equipment, traffic signals and various electronic control mechanisms. Work involves application of the principles and techniques of electronic and electrical repairs and adjustments on automatic and electronic traffic control devices, radio and associated communications equipment. Employees follow prescribed methods and procedures but are expected to exercise independent judgment regarding the more routine phases of repairs and adjustments. Instructions relating to work assignments may be oral or written and may be accompanied by sketches, blueprints and electrical diagrams. Supervision is received from a technical superior who reviews work by the satisfactory performance of the equipment installed, maintained or repaired.

##### ILLUSTRATIVE TASKS

Maintains and repairs a variety of electronic and automatic traffic control devices, including controllers, informational signs, neon signs, pedestrian signals, vehicle pressure detectors, radar detectors, radio transmitters and receivers, and other specialized devices.

Installs conduit and duct work and electrical cable of various types in the operation of traffic control signals; assists and supervises in the installation of concrete, steel, aluminum and wood poles for use of automatic and electronic traffic control devices.

Performs on-site maintenance and repairs to traffic signals, including bulb changes, controller lubrication, checking of points and pads for proper working order; times or re-times traffic signal controllers; does troubleshooting work relative to the maintenance of transmission and distribution lines.

Installs, adjusts and maintains medium high and ultra high frequency alternating and direct current radio receivers, transmitters and auxiliaries according to diagrams, drawings and sketches; installs and tests special equipment such as antennae, frequency monitors, microphones, cables and electrical interference suppressors.

Installs and repairs two way radio, public address, intercomms, closed circuit television, automatic control clock systems, airport weather instruments, toll gate equipment and special fire and police alarm systems.

Tests faulty equipment and applies knowledge of functional operation of electronic-electrical units and systems to diagnose cause of malfunction.

Tests electronic components and circuits to locate defects using instruments such as oscilloscopes, signal generators, ammeters and voltmeters.

Replaces defective components and wiring and adjusts mechanical parts using handtools and soldering iron.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and theories of electronic equipment as applied to the operation and maintenance of radio receiving and transmitting equipment.

Considerable knowledge of the principles and theories of electrical equipment as applied to traffic controllers, count summators, analog computers and other automatic and electronic traffic control devices.

Considerable knowledge of the standard tools, materials, methods and practices of the electrical trade.

Considerable knowledge of the practices, methods, tools, equipment and materials used in the repair, testing, maintenance and replacement of radio receiving and transmitting equipment.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of the work with high voltage.

Knowledge of precision test equipment such as digital frequency measuring equipment, oscilloscopes and precision voltage and current measuring devices.

Knowledge of the proper types of splicing used for both overhead and underground circuiting.

Knowledge of the weights and strains permissible and amount of rake required in traffic signal poles, based on pole size and loading

### Electronic-Electrical Equipment Technician 1 (006572)

conditions.

Some knowledge of the principles of microwave radio transmission.

Ability to interpret and work from technical sketches, blueprints and electrical circuitry diagrams.

Ability to identify causes of malfunctions and to repair or replace faulty parts and equipment.

Ability to climb considerable heights.

Skill in the care and use of standard tools, equipment and testing devices of the electrical-electronic trade.

NEW 10-69

#### **Nature Of Work**

This is skilled technical work in the installation, adjustment, maintenance, modification and repair of traffic signals, electronic control mechanisms, radio and related communications equipment.

### Electronic-Electrical Equipment Technician 2 (006573)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the installation, troubleshooting, maintenance and repair of electronic equipment and systems to include automated control panels and the calibration and maintenance of electronic and pneumatic instruments are required. Applicants will be subject to an extensive screening process to include background investigation, fingerprint check and polygraph examination.

#### Job Specifications

##### NATURE OF WORK

This is limited supervisory or independent technical work in the installation, adjustment, maintenance, modification of traffic signals, electronic control mechanisms, radio and related communications equipment.

Employees in this class supervise, layout, assign and participate in the work of skilled technical subordinates involving a variety of stationary and mobile radio transmitting and receiving equipment; traffic signals and various electronic control mechanisms. Work involves advanced application of the principles and techniques of electronic and electrical repairs and adjustments on automatic and electronic traffic control devices, radio and associated communications equipment. Employees exercise independent judgment in determining systems and job requirements regarding the various technical phases of repair, installation, modification and maintenance. Instructions are received in the form of work orders, with the job detailing and planning left to the discretion of the incumbent. Work is performed under the general direction of a technical superior who occasionally inspects work during process and upon completion for compliance to specifications and standards.

##### ILLUSTRATIVE TASKS

Supervises subordinates in the use of a variety of traffic signal equipment including electronic testers, radar testers, computers, master controllers, shop tools and other specialized devices.

Supervises the installation of conduit and duct work and electrical cable of various types in the operation of traffic control signals; supervises the installation of concrete, steel, aluminum and wood poles for the use of automatic and electronic traffic control devices.

Supervises on-site maintenance and repairs to traffic signals, planned maintenance and service programs; checks for operation, determines operational needs; installs special equipment such as electro-mechanical, solid state, detection devices, time clocks and special relays.

Supervises, lays out, assigns work of subordinate technicians, and personally participates in the more difficult phases of installation, adjustment, repair and maintenance of medium high and ultra high frequency alternating and direct current radio equipment, public address systems, closed circuit television, automatic control clock systems, airport weather instruments and special fire and police alarm systems.

Makes complete overhauls of signal timers, including adjusting, repairing and replacing parts and converting obsolete equipment to conform with present traffic engineering design and construction standards.

Performs periodic frequency checks as required by the Federal Communications Commission to insure that transmitting equipment is broadcasting within the limits of assigned frequencies.

Installs timing and phasing on traffic signals per specifications, investigates timing and phasing complaints, makes minor modifications to equipment as necessary.

Tests tubes, using an oscilloscope, for correct wave forms; checks alignment using signal and audio generator; makes voltage and resistance checks on electronic controllers; manually synchronizes traffic lights by setting dials at predetermined points.

Makes recommendations to superiors for the improvement of radio and sound communications systems.

Estimates time and materials required for proposed jobs; maintains records and submits various reports; requisitions for supplies and equipment.

Prepares and maintains operating and special reports as required by the Federal Communications Commission.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electricity, radio and sound as applied to the operation and maintenance of radio receiving and transmitting, sound, and closed circuit television equipment and systems.

Thorough knowledge of the principles and theories of electricity as applied to traffic controllers, count summators, analog computers, radar detectors and electrical circuitry and other automatic and electronic traffic control devices.

### **Electronic-Electrical Equipment Technician 2 (006573)**

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and work with high voltage.  
Considerable knowledge of the practices, methods, tools and equipment used in the repair, testing, maintenance and replacement of radio receiving and transmitting, sound and closed circuit television equipment and systems.  
Considerable knowledge of the standard tools, materials, methods and practices of the electrical trade.

Knowledge of precision test equipment such as digital frequency measuring equipment, oscilloscopes and precision voltage and current measuring devices.

Knowledge of the principles of microwave radio transmission.

Knowledge of the weights and strains permissible and amount of rake required in traffic signal poles, based on pole size and loading conditions.

Ability to supervise the repair, testing, maintenance and installation of a variety of radio receiving, transmitting and related equipment.

Ability to plan, assign, review and supervise the work of skilled technicians in the repair, maintenance, construction and installation of traffic control devices.

Ability to interpret and work from technical diagrams, schematics and blueprints.

Ability to prepare and maintain records and reports pertaining to the installation, maintenance and repair of work performed.

Ability to plan and supervise the work of subordinates in a manner conducive to full performance and high morale.

Skill in the use and operation of tools and equipment used in traffic signal and sound system repair work.

NEW 10-69

#### **Nature Of Work**

This is limited supervisory or independent technical work in the installation, adjustment, maintenance, modification of traffic signals, electronic control mechanisms, radio and related communications equipment.

### Electronic-Electrical Equipment Supervisor (006574)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in the installation, troubleshooting, maintenance and repair of electronic equipment and systems (such as UHF and VHF radio communications equipment, CATVs, CCTVs, public address systems, synchronized clocks or electronic traffic control devices) are required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in coordinating and inspecting the installation, modification and repair of traffic signals, electronic control mechanisms, and radio receiver-decoder units.

Employees in this class plan, assign and coordinate the work of skilled technical subordinates servicing a variety of traffic signals, controllers, radio-decoder units, and other electronic control mechanisms. Work involves the planning, supervising and technical direction necessary for traffic signal installation, modification, maintenance and repair of automatic and electronic traffic equipment. Additional responsibilities may include contact with representatives of public utility companies, state officials and contractors to coordinate repairs and new installations. Employees exercise considerable independent judgment in determining systems and job requirements regarding technical phases of repair, installation, modification and maintenance. Instructions are received in the form of blueprints and work orders, with detailed planning and review of completed projects the responsibility of the incumbent. Work is reviewed by a technical superior through the satisfactory completion of work schedules and the satisfactory operation of equipment.

##### ILLUSTRATIVE TASKS

Coordinates activities of all subordinate work crews in planning and giving technical direction involving traffic signal installation, modification, maintenance and repair.

Gives on-site supervision to hazardous or unusual work assignments; may participate as needed in installation involving unusual or difficult technical problems; works with superiors in planning new construction and major modification of equipment.

Assigns and directs crews to job sites; reads and checks blueprints before distribution to crews; assists technicians with any technical problems that might arise involving assigned project.

Plans daily work schedules; suggests working procedures; instructs in new techniques and use of rental equipment such as cranes, ditching machines, and paving equipment.

Coordinates with public utility companies regarding priority of installation of concrete poles and traffic signalizations; calls meetings of utility personnel at the time installations are to be made; notifies companies when installations are completed.

Assists in special circuitry designs for more complex signal installations; interprets blueprints for changes in or planning of special circuitry. Develops, schedules and supervises the performance of a preventive maintenance program providing for servicing, cleaning, synchronizing and testing of traffic signal equipment.

Estimates time and materials required for proposed jobs; reviews time sheets and work reports, trouble reports and service calls; as needed prepares progress reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electricity as applied to traffic controllers, count summators, analog computers, radar detectors and electrical circuitry and other automatic and electronic traffic control devices.

Thorough knowledge of the occupational hazards and safety precautions of the electrical trade and work with high voltage.

Thorough knowledge of the practices, methods, tools and equipment used in the repair, maintenance, testing and replacement of automatic and electronic traffic signal equipment.

Considerable knowledge of precision test equipment such as digital frequency measuring equipment, oscilloscopes and precision voltage and current measuring devices.

Considerable knowledge of the weights and strains permissible and amount of rake required in traffic signal poles.

Knowledge of recent developments, current literature and sources of information in the field of traffic signalization.

Ability to interpret and work from technical sketches, blueprints and electrical circuitry diagrams.

## Human Resources Department

## Construction Field Representative (006601)

### Minimum Qualifications

Bachelor's degree in Architecture, Building Construction, Engineering or a related field. Three years of experience inspecting, reviewing or supervising the construction of commercial architectural projects are required. A State of Florida Professional Engineer license or State of Florida General Contractor's license may substitute for required education.

### Job Specifications

#### NATURE OF WORK

This is professional and technical work in the field inspection of building construction projects.

Employees in this class review construction documents and inspect the construction of major building projects from the design phase through completion of construction and guarantee period. Primary responsibilities include assuring that the work being inspected is constructed in accordance with the requirements of the contract documents, reviewing plans and specifications, preparing field inspection reports and monitoring construction progress. Employees exercise considerable independent judgment in the application of architectural principles and practices and related engineering knowledges. Supervision is received from a professional and administrative superior who reviews work through written reports, joint on-site inspections and personal conferences for conformance with departmental policies and technical quality.

#### ILLUSTRATIVE TASKS

Reviews construction drawings and specifications, from the design phase through final completion, to become thoroughly familiar with the plans and specifications for the work to be inspected, and to recommend changes, additions and corrections which may be advantageous to the design and/or use of materials.

Attends pre-construction meetings and assists in review of Schedule of Values and Construction Progress Charts.

Observes contractor's work to assure compliance with contract documents, approved shop drawings, all applicable building codes, standards and approved practices for quality control; writes inspection reports that include recording the day's events, events that took place since the last inspection report, contractor's activities, instructions given the contractor, and any agreements made.

Issues field orders, if required, to clarify drawings and specifications of work that will not increase or decrease the contract amount; rejects work for non-conformance.

Monitors all testing performed in the field including soil test borings and compaction tests, and concrete slump tests; monitors special testing in the laboratory, if required.

Monitors project progress in relation to construction schedule, and reports all unacceptable work before it develops into an expensive and time consuming operation; follows up and reports on the correction of defective work to be corrected by the contractor.

Monitors maintenance of as-built drawings and verifies variations in the work from the latest drawings and specifications.

Assists in scheduling and conducting field meetings with project consultant, contractor and County personnel.

Assists in the evaluation of the cost of materials and labor for revisions, additions and changes to the contract; assists in solving minor field design problems through recommendation and coordination with the Project Management Team.

Assists in requisition meetings, and verifies amount of work completed for conformance to Contractors' Request for Payment.

Prepares and maintains a Project Record Book containing the description of each field inspection visit, time, site, and weather conditions.

Assists in inspections at Substantial Completion, Final Completion and One-Year Guarantee Periods; assists in the preparation of

Consultants' and Contractors' Performance Evaluation Reports.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and practices of architectural planning, design, construction, and related engineering work.

Considerable knowledge of applicable building codes, laws, regulations, and County design standards.

Considerable knowledge of building materials and methods of construction.

Considerable knowledge of County standards, contracts, forms, and procedures, relative to construction management.

Knowledge of structures, air conditioning, plumbing, and electrical systems.

Knowledge of current construction costs.

Ability to read and comprehend the contract documents and recognize if construction work inspected conforms to such documents.

Ability to recognize existing construction conditions, anticipate problems in advance of their occurrence, and report errors, violations, or

### Construction Field Representative (006601)

problems for corrective action.

Ability to concurrently inspect several projects in various phases of construction for conformance with contract documents.

Ability to comprehend and interpret construction schedules.

Ability to express ideas clearly and concisely, verbally and in writing, and maintain continuity of project inspection records to fully reflect inspections performed.

Ability to establish and maintain effective working relationships with supervisors, consultants, representatives of using agencies and contractors.

NEW 1-84

#### **Nature Of Work**

This is professional and technical work in the field inspection of building construction projects.

## Construction Manager 1 (006610)

### Minimum Qualifications

Bachelor's degree in Architecture, Engineering, Construction Management, or related field. Three years of experience in the design, construction or management of construction projects are required. A State of Florida Professional Engineer license, State of Florida Registered Architect license, certificate issued by State of Florida or Miami-Dade County as a General Contractor's, General Building Contractor or General Engineering Contractor's, or Certificate of Eligibility in General Engineering or General Building may substitute for the required education. Must be able to work a permanent or rotating shift schedule to include nights, weekends and holidays. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

### Job Specifications

#### NATURE OF WORK

This is professional and administrative work in the management of building construction projects for the county.

Employees in this class are responsible for authorizing and monitoring the work of architectural and engineering consultants and contractors engaged in the design and construction of a variety of county buildings and related facilities. Emphasis of the work is on the management of various projects through all phases of development including planning, consultant selection, design management, selection of contractor, construction management, inspection and warranty administration. Incumbents exercise independent judgment in the application of the principles and practices of architectural planning, design, construction and related engineering knowledges. Supervision is received from a professional and administrative superior who reviews work through personal conferences and reports for satisfactory attainment of goals and objectives during all phases of the building construction process.

#### ILLUSTRATIVE TASKS

Assists consultants and county agency officials in the development of building construction projects; issues work orders to consultants, surveyors and testing labs; verifies consultant's invoices and recommends payment; reviews consultant's plans and specifications at various stages of development for conformance to program and design standards, completeness and accuracy; suggests changes, additions and corrections; monitors consultant's cost estimates; schedules, attends and writes reports of meetings with consultants and county agency representatives.

Coordinates bid advertisements, printing and distribution of plans and specifications to bidders; schedules and assists in conducting pre-bid conferences; assists in evaluating bids and making recommendations for award of contract.

Assists in coordinating the signing of contracts with contractors; schedules and assists in conducting pre-construction meetings with consultants, contractors and sub-contractors.

Originates Notices to Proceed to contractors and work orders to consultants and testing labs; reviews and recommends approval of periodic requisitions, invoices and supporting data from contractors, consultants and testing labs; reviews field inspection reports.

Assists in the preparation of schedules and monitors construction progress; keeps user agencies informed; assists in the preparation of change orders to contract; keeps records of contingency allowance and consultant's payments.

Assists in the inspection of projects for substantial completion and prepares list of any deficiencies; prepares performance reports on contractors and consultants; arranges for correction of defects by contractor during warranty period; schedules and conducts inspection at end of warranty period and assures correction of defects.

Qualifies the department as general contractor and obtains building permits

Maintains project administrative records and files.

## Construction Manager 1 (006610)

Performs related work as required.

### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, practices and methods of architectural planning, design and construction and related engineering work.

Considerable knowledge of structural design and air-conditioning, plumbing and electrical systems.

Considerable knowledge of building materials, methods and construction systems.

Considerable knowledge of building codes, laws, regulations and county design standards.

Considerable knowledge of contracts, forms and procedures relative to building construction activities.

Knowledge of current construction costs.

Ability to develop and analyze programs of space requirements for a variety of building construction projects.

Ability to understand architectural and engineering drawings and specifications related to building construction projects.

Ability to review and suggest changes, additions and corrections in the plans and specifications of construction projects.

Ability to interpret pertinent laws and regulations and enforce compliance with building designs and construction schedules.

Ability to inspect projects under construction for conformance to contract documents.

Ability to establish and maintain effective working relationships with consultants, contractors, supervisors and departmental officials.

Ability to express ideas clearly and concisely, verbally and in writing.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional and administrative work in the management of building construction projects for the county.

Employees in this class are responsible for authorizing and monitoring the work of architectural and engineering consultants and contractors engaged in the design and construction of a variety of complex county buildings and related facilities. Work differs from that found in the Construction Manager 1 class in that these positions require more advanced architectural and engineering knowledges and incumbents are assigned a variety of complex and difficult building construction projects involving complex structural, electrical or mechanical features. Responsibilities include the management of several projects simultaneously in various phases of development including planning, consultant selection, design management, selection of contractor, construction management, inspection and warranty administration. Incumbents exercise considerable independent judgment in the application of the principles and practices of architectural planning, design and construction, related engineering knowledges and in the administration of assigned building construction projects. General supervision is received from a professional and administrative superior who reviews work through personal conferences and reports for satisfactory attainment of goals and objectives periodically during the building construction process.

##### ILLUSTRATIVE TASKS

Assists consultants and county agency officials in the development of complex and difficult building construction projects; issues work orders to consultants, surveyors and testing labs; reviews and verifies consultant's invoices and approves payment; reviews consultant's plans and specifications at various stages of development for conformance to budget funding, program and design standards, completeness and accuracy; suggests changes, additions and corrections; monitors consultant's cost estimates; schedules, attends and writes reports of meetings with consultants and county agency representative.

Coordinates the development of building construction projects with several agencies that will occupy the structure; develops conceptual plan which resolves conflicts between agencies over space allocations; resolves conflicts with individual agencies over budgetary costs and relative space that would be provided; resolves conflicts between consultant's plans and plans of the several agencies.

Coordinates bid advertisements, printing and distribution of plans and specifications to bidders; schedules and conducts pre-bid conferences with contractors and consultants on complex building construction projects; evaluates bids and makes recommendations for award of contract; attends pre-bid conferences.

Coordinates signing of contracts with contractors; schedules and conducts pre-construction meetings with consultants, contractors and sub-contractors.

Originates Notices to Proceed to contractors and work orders to consultants and testing labs; reviews and approves periodic requisitions, invoices and supporting data from contractors, consultants and testing labs; reviews field inspection reports.

Monitors building construction progress; keeps user agencies informed; prepares change orders to contract; keeps records of contingency allowance and consultant's payments.

Inspects projects for substantial completion and prepares list of any deficiencies.

### Construction Manager 2 (006611)

Prepares performance reports on contractors and consultants; arranges for correction of defects by contractor during warranty period; schedules and conducts inspection at end of warranty period and assures correction of defects; recommends final acceptance of facility on behalf of the county.

Qualifies the department as general contractor and obtains building permits.

Maintains project administrative records and files.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices and methods of architectural planning, design and construction and related engineering work.

Thorough knowledge of structural design, and air-conditioning, plumbing and electrical systems.

Thorough knowledge of building materials, methods and construction systems.

Thorough knowledge of building codes, laws, regulations and county design standards.

Thorough knowledge of contracts, forms and procedures relative to building construction activities.

Considerable knowledge of current construction costs.

Ability to develop and analyze programs of space requirements for a variety of complex building types.

Ability to understand complex architectural and engineering drawings and specifications related to complex building construction projects.

Ability to review and suggest changes, additions and corrections in detailed plans and specifications of construction projects.

Ability to interpret pertinent laws and regulations and enforce compliance with building designs and construction schedules.

Ability to inspect complex projects under construction for conformance to contract documents.

Ability to establish and maintain effective working relationships with consultants, contractors, supervisors and departmental officials.

Ability to simultaneously manage several complex projects in various phases of development.

Ability to analyze bids and make recommendations for award of contract.

Ability to conduct meetings with consultants, contractors and representatives of user agencies.

Ability to express ideas clearly and concisely, verbally and in writing.

##### NATURE OF WORK

This is advanced professional and administrative work with supervisory responsibility in the management of building construction projects for the county.

Employees in this class are responsible for planning, assigning and reviewing the work of a professional staff of Construction Managers. Emphasis of the work is on the development and implementation of policies and procedures to assure success in the monitoring of the work of architectural and engineering consultants and contractors engaged in the design and construction of a variety of complex county buildings and related facilities. Responsibilities include analyzing special conditions or circumstances which arise on projects, assisting subordinates with unusual or difficult solutions to complex building construction problems and assisting in the establishment of division objectives. Incumbents exercise considerable independent judgment in the application of the principles and practices of architectural planning, design and construction, related engineering knowledges and in the administration of a variety of building construction projects. General supervision is received from a professional and administrative superior who holds incumbents responsible for effective work planning and progress and for the quality of professional results through personal conferences and performance reporting.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of subordinate Construction Managers engaged in monitoring the work of architectural and engineering consultants and contractors engaged in the design and construction of a variety of complex county buildings and related facilities; establishes policies and procedures for processing consultants' invoices, requisitions and purchase order contracts and for use of testing laboratories; establishes guidelines for reviewing consultants' plans and specifications; conducts meetings with consultants, user agencies and contractors; establishes design guidelines and construction standards for projects; assists subordinates with unusual or difficult solutions to complex building construction problems.

Develops policies and procedures to receive, analyze and incorporate construction suggestions from various county departments and the user agency for building construction projects.

Establishes policies and procedures to satisfy required conditions prior to advertising for bids; determines if pre-bid conferences are required, and if so, explains to bidders specific conditions which may affect bid prices such as site conditions, other contracts and existing buildings; evaluates bids and makes recommendations for award of contract.

Assists subordinates in unusual circumstances where special commitments are required of the contractor prior to contract signing.

Insures compliance with policies and procedures prior to execution of change orders; reviews change proposal requests and advises on establishing priorities for the initiation of change orders.

Establishes standards and procedures for substantial completion and final acceptance inspections and reviews inspections; assists in final determination of project completion and recommends final acceptance of facility on behalf of the county; reviews projects for positive and negative features for benefit of future projects.

Formulates policies for warranty administration; screens complaints during the warranty period and delegates assignments for correction; consults with subordinates on solutions to special problems during warranty periods that are not the responsibility of the contractor and must

### Construction Manager 3 (006612)

be solved by means outside the original contract.

Performs special investigations, sites analyses and feasibility studies as required.

Qualifies the department as general contractor and obtains building permits.

Participates in the development of policies to select competent and responsible consultants and contractors; recommends consultant and contractor performance suitability based on previous evaluations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave; evaluates and rates employee performance/

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices and methods of architectural planning, design and construction and related engineering work.

Thorough knowledge of structural design, and air-conditioning, plumbing and electrical systems.

Thorough knowledge of building materials, methods and construction systems.

Thorough knowledge of building codes, laws, regulations and county design standards.

Thorough knowledge of contracts, forms and procedures relative to building construction activities.

Thorough knowledge of current construction costs.

Considerable knowledge of the principles of management, public and business administration and their application to the administration of government activities.

Considerable knowledge of supervisory principles and practices.

Ability to plan, organize and supervise the work of a staff of subordinate professional employees in a manner conducive to full performance and high morale.

Ability to exercise judgment and discretion in devising and installing policies and procedures for the administration of building construction projects.

Ability to delegate the authority to subordinates necessary to complete responsibilities in building construction projects.

Ability to understand complex architectural and engineering drawings and specifications related to complex building construction projects.

Ability to interpret pertinent laws and regulations and enforce compliance with building designs and construction schedules.

Ability to establish and maintain effective working relationships with consultants, contractors, supervisors and departmental officials.

Ability to analyze bids and make recommendations for award of contract.

Ability to conduct meetings with consultants, contractors and representatives of user agencies.

#### NATURE OF WORK

This is advanced technical and administrative building maintenance work for the Library Department.

An employee in this class is responsible for performing inspections of library buildings to identify potential maintenance problems, supervising all contracted maintenance service contracts, contacting outside agencies and other County departments to arrange for contracted services, and determining contract specifications for preparation of contract bids. Related duties include developing a database of library buildings for the preparation of long-range capital refurbishment plans, and developing preventive maintenance plans for library facilities and installed equipment. The incumbent exercises independent judgment and applies technical building maintenance knowledges to the management of departmental maintenance activities. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for the satisfactory management of the departmental building maintenance program.

#### ILLUSTRATIVE TASKS

Conducts field audits and inspections of library buildings and their mechanical and electrical systems to identify areas of potential maintenance problems.

Supervises all contracted maintenance service contracts; prepares reports describing outstanding maintenance, repairs and replacements needed to comply with contract requirements.

Contacts outside agencies and other County departments to arrange contract services for the Library Department.

Contacts outside agencies and equipment manufacturers for copies of drawings, equipment manuals and record data required for contract specifications needed for preparation of contract bids.

Develops a database of library buildings from information obtained from field audits and inspections to prepare and administer a long-range capital refurbishment plan for each building.

Reviews, monitors, and develops preventive maintenance plans for library facilities and installed equipment.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of physical plant maintenance principles, practices and techniques.

Considerable knowledge of the various building trades including construction, modification and repair methods and techniques.

Knowledge of facilities maintenance, repair, and preventive maintenance requirements of Library Department buildings.

Knowledge of building maintenance inspection techniques sufficient to detect faulty workmanship or materials and compliance with plans and contract specifications.

Knowledge of County procurement practices and procedures.

Knowledge of methods and techniques of contract specification preparation.

Ability to accurately access physical plant maintenance characteristics through field inspection techniques.

Ability to supervise contracted maintenance services and ensure all work is in compliance with contract specifications.

Ability to develop preventive maintenance plans for a variety of public facilities and installed equipment.

Ability to obtain relevant contract specification information for the preparation of contract bids.

Ability to manage and administer contracts for the maintenance and repair of public buildings and building equipment.

#### **Nature Of Work**

This is advanced technical and administrative building maintenance work for the Library Department.

### Library Attendant (007103)

#### Minimum Qualifications

High school diploma or GED. One year of experience in clerical, public contact or security work is required.

#### Job Specifications

##### NATURE OF WORK

This is routine work in safeguarding staff, patrons, property, equipment and materials in the Miami-Dade Public Library System.

Employees in this class are responsible for guarding and protecting property from possible loss by fire, theft and vandalism, and ensuring the safety of staff and patrons at a library facility, including escorting them to their vehicles if necessary. Duties include making periodic inspections of the building and grounds to ensure that facilities are properly secured and assisting the Branch Manager with the opening and closing of the facility. Assignments may involve providing patrons with general information, answering the telephone, performing routine circulation functions, receiving shipments and a variety of routine tasks. Independent judgement or discretion is required, with non-routine matters being referred to the immediate supervisor. General supervision is provided by a branch or department manager who reviews work for conformance to established policies and procedures.

##### ILLUSTRATIVE TASKS

Maintains close observation of patrons and determines that they are conducting themselves in accordance with library policies and procedures; in cases of violation or disturbances, attempts to effect a settlement or notifies supervisor on duty; examines library materials to determine that they have been authorized for removal.

Makes routine inspections of all parts of the building including roof, windows, doors, equipment and library grounds to insure they are properly secured and in good working condition. Assists in the opening and closing procedures.

Assists branch manager in dealing with emergency situations as outlined in the library system's Policies and Procedures Manual.

Assists patrons by providing routine information and directions; conducts routine circulation functions; empties outside book drops and returns materials to the library building for processing.

Sorts, distributes and processes incoming/outgoing mail, receives shipments of library materials, equipment and supplies; assists in setting-up and straightening up program areas.

Performs related lower level duties as required.

##### KNOWLEDGE, ABILITIES AND SKILLS

Knowledge of security and safety procedures applicable to the area of assignment.

Knowledge of public relations principles and techniques.

Some knowledge of library circulation procedures.

Some knowledge of office practices and procedures.

Ability to conduct physical inspections of library facilities to ensure the safety of staff and patrons.

Ability to operate common fire equipment and recognize fire hazards.

Ability to deal tactfully, courteously and diplomatically with patrons of the library system.

Ability to react calmly and quickly in emergencies.

Ability to keep simple records and make routine reports.

##### NATURE OF WORK

This is responsible mobile equipment management work involving fleet purchasing, maintenance and cost accounting for a county department.

The incumbent in this class is responsible for the effective planning, coordination and administrative utilization of all mobile equipment for the department. Work involves developing policies and procedures to be used in procuring and maintaining mobile equipment. Duties require the use of technical skill and independent judgment in analyzing mobile equipment management techniques and in recommending procedures to increase efficiency and economy. Supervision is exercised over subordinate personnel engaged in cost accounting and record maintenance. General supervision is provided by an administrative superior who reviews work primarily for conformity with departmental policy and management objectives.

##### ILLUSTRATIVE TASKS

Researches and evaluates modern trends in mobile equipment management including design and manufacture of special purpose vehicles. Develops preventive fleet maintenance programs utilizing manufacturers' specifications; reviews the purchase of all mobile equipment. Prepares contract specifications and assists in the analyzing of bids of the purchase of standard types of automotive equipment. Maintains records for all mobile equipment purchases with careful analysis of expenditures for respective budget codes. Provides intra-departmental allocation of vehicles, transfer of vehicles, and assignment for emergency situations. Provides liaison with mobile equipment division to maintain an efficient preventive maintenance program. Assists the insurance and safety unit on an accident review board involving departmental vehicles. Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of all phases of large scale mobile equipment management.  
Thorough knowledge of automotive equipment design, manufacturing and maintenance.  
Thorough knowledge of large scale fleet maintenance management for various types of mobile equipment.  
Considerable knowledge of current concepts and modern techniques used in fleet utilization and replacement.  
Considerable knowledge of cost accounting as applied to vehicular fleet maintenance.  
Ability to develop operating procedures and management systems to improve efficiency.  
Ability to illustrate automotive engineering data and to prepare contract specifications.  
Ability to communicate ideas effectively orally and in writing.  
Ability to research technical information, evaluate data and prepare reports on findings.

#### Minimum Qualifications

High school. Three years of experience in library work to include experience in child or young adult library services are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced specialized paraprofessional library work in children's services for the Miami-Dade Public Library System.

Employees in this class are responsible for supervising and operating a children's department in a public library, including programming, planning, promoting, and implementing children's activities. Responsibilities may include analyzing collection development needs and selecting appropriate library materials, planning and preparing for displays and exhibits, assisting in the bibliographic maintenance of the library database, assisting children with book choices, answering questions from teachers and parents, providing reader's advisory services, and serving as library branch supervisor in the manager's absence. Incumbents exercise some independent judgment in the operation of a children's department and in assisting the branch manager in a variety of library activities. Supervision may be exercised over subordinate non-professional staff members engaged in providing various public library services. Supervision is received from a professional superior who reviews work for the effective operation of the children's department and satisfactory assistance in general library operation.

##### ILLUSTRATIVE TASKS

Supervises children's department in a branch library including planning, promoting, coordinating and implementing storytelling programs, other library activities, and school outreach efforts.

Provides reader's advisory services, answers reference questions, and assists patrons in the use of library facilities and resources.

Assumes responsibility for supervising a branch library in the absence of the branch manager.

Analyzes collection development needs and selects appropriate library materials.

Charges and discharges books and other library materials; issues library cards; receives fines for overdue items; prepares monthly statistical reports and weekly deposits.

Processes and links children's and young adult materials.

Maintains an awareness of current library issues and trends affecting children's services; reads professional literature and attends workshops.

Assists and trains library employees in library operations, rules, and regulations.

Performs related lower level work as required.

#### CHILDREN'S SERVICES SPECIALIST

##### KNOWLEDGE, ABILITIES AND SKILLS

Considerable knowledge of programming, planning, promoting and implementing children's library services.

Considerable knowledge of children's literature and library materials.

Considerable knowledge of library policies and procedures concerning operation of a children's department.

Knowledge of general library policies, procedures, methods, and techniques.

Knowledge of library circulation, cataloging, and information technology.

Knowledge of effective techniques of dealing with children and young adults in a public library environment.

Knowledge of supervisory principles and practices.

Ability to work patiently and effectively with children.

Ability to supervise operation of a branch library in the absence of the library branch manager.

Ability to make decisions in accordance with library policies and procedures.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional administrative work for the Miami-Dade County Library Department.

An employee in this class oversees the daily operations of support services for the Library Department. Responsibilities include management of all personnel related functions; facility related preventative maintenance, repair and renovation work for all library buildings; transportation services for all library facilities; and the development and administration of a system-wide public safety program to assure the safety and security of patrons and staff at all library facilities. The incumbent exercises considerable independent judgment and sound administrative and organizational practices to assure that operations are effective and resources are efficiently used. Supervision is exercised through subordinate managers over a staff of professional, technical, clerical and trades personnel engaged in various support services for the department. Supervision is received from an administrative superior who holds the incumbent responsible for the achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, organizes and directs all activities of the Personnel Unit to include payroll, compensation, labor management, recruitment, benefits, retirement, worker's compensation and liability claims, training, discipline, affirmative action and interpretation of local, state and federal employment and discrimination law.

Develops and implements personnel policies and procedures; monitors current local ordinances, county policies and state and federal employment laws for compliance; represents the department at hearings and court trials; reviews affirmative action plans and provides assistance with discipline, EEOC issues and unions.

Plans, organizes and directs all activities of the Maintenance Unit to include utilizing staff and contracted services to conduct preventive maintenance, minor repairs and major renovations at all library buildings; monitors the performance of contractors performing janitorial and lawn maintenance; conducts facility inspections to determine areas of need and develop short, intermediate and long term plans to address those needs.

Monitors maintenance work, either in-house or contracted; approves remodeling requests and authorizes encumbrance of funds; meets with Library, county and municipal officials to review renovation projects.

Writes state and other construction grants for library projects; serves as library liaison to GSA and CICC in administering library projects funded under the General Obligation Bond.

Plans, organizes and directs all activities of the Transportation Unit responsible for the daily delivery of library materials and correspondence within all library facilities and outside the library system; the removal and discarding of old books, furniture and equipment to the county store as needed; and providing assistance to the Maintenance Unit with major renovations requiring the removal and/or replacement of content.

Reviews routes to improve the delivery system and handles special projects involving construction or renovations.

Plans, organizes and directs all activities of the Public Safety Unit to include utilizing staff and contracted guards; developing and administering a system-wide program to assure the safety and security of patrons and staff at all facilities; and the investigation of accidents or illegal activity to determine if changes or implementations of procedures or policies are needed to mitigate liability or future incidents.

**Library Support Services Administrator (007193)**

## Human Resources Department

---

### Assistant Director, Library (007197)

#### Minimum Qualifications

Bachelor's degree. A minimum of five to nine years of professional experience to include fiscal management, budget development, project management and legislative analysis is required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing operational or administrative activities for the Miami-Dade Library Department.

An employee in this class is responsible for directing a variety of complex divisions, offices, or specialized sections such as technical support and collections, support services and marketing media relations, community outreach and program services, library branches and youth services and capital expansion plan operations for the department. Responsibilities include developing short and long-range goals, and establishing priorities. The incumbent exercises considerable independent judgment in the management of a wide variety of functions and in the resolution of complex administrative problems. Supervision is exercised through subordinate levels of executives, managers, and supervisors over a staff of professional, technical and clerical subordinates assisting in various phases of operations. General direction is received from the Department Director who holds the incumbent responsible for the professional management of departmental operations and achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Prepares proposed and final budgets for the department for presentation to budget committees, the County Administrator, and the County Commission.

Exercises primary operational and administrative control over a specified group of divisions, offices, and sections of the County's governmental operations.

Coordinates the activities of the department and its subdivisions with other County departments; and when necessary, with comparable organizations in other public and private jurisdictions.

Defines operational goals and objectives; recommends and implements organizational and administrative changes.

Reviews existing organizational patterns, work relationships, space, equipment, and manpower utilization; promotes effective operations through standardization, improvement, simplification and installation of new operating systems.

Directs and coordinates diversified departmental personnel management activities, including employee recruitment and selection, interviewing and screening, payroll and benefits, grievances and disciplinary actions, and safety administration.

Approves remodeling requests; reviews quality assurance measures; reviews work completed by maintenance staff and contractors and meets with county officials to monitor and approve major construction projects.

Directs departmental fiscal activities, accounting and purchasing functions, and department-wide computer services.

Develops marketing campaigns to ensure full utilization of library resources by residents and ensures the effective implementation of public relations efforts aimed at enhancing the image of the library system and Miami-Dade County.

Plans, organizes and directs the operations of Art Services and Exhibitions, Programming, Special Services and Community Outreach; serves as the department's liaison at meetings held by community groups, municipalities, and county, state and federal governmental agencies lobbying for library issues; prepares and presents library related items for placement on the BCC agenda; works with county administrators to promote better working relations and lobbies for issues critical to the Library System.

Develops new library services for the community; evaluates community needs towards providing improvement in services to meet the needs of various cultural, ethnic and social groups who use the branches; coordinates with other county departments as well as municipal

### Assistant Director, Library (007197)

government's issues dealing with branches such as parking and landscaping.

Formulates and administers the Library's system-wide collection development and budget; manages and oversees collection development, technical services and automated services; develops procedures and oversees the selection of materials conducted by the branches, main library and purchasing committees; oversees system-wide acquisitions, cataloging, processing and linking of all library materials both in-house and by vendors.

Reviews and approves requests for hardware, software and services at all branches and departments and prepares and implements future computer systems; oversees the planning of system-wide staff training on all aspects of library services as well as training for the public in the use of library resources; oversees the implementation of the Library Department's Strategic Plan.

Directs departmental operations in financial reporting and budgeting; provides project management for the implementation and progress of the Library's Capital Plan; oversees construction and development; coordinates preparation and processing of property acquisitions, property agreements and permitting; provides periodic updates on the progress of the Library's Capital Plan to the County Manager's Office and Board of County Commissioners (BCC); prepares and coordinates legislative items to be submitted to the BCC.

Reviews and evaluates departmental policies and procedures; ensures adherence to various rules and regulations.

Meets with various supervisors and managers to resolve financial and administrative matters; advises superiors on administrative policy and procedure issues; coordinates administrative and financial activities with other County departments and agencies. Conducts meetings with division directors to establish, review and coordinate procedures to assure compliance with applicable policies, codes and regulations; oversees divisional budget preparation and reviews monthly financial reports for compliance with budgetary appropriations.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the principles and practices of public and business administration.

Thorough knowledge of the principles and practices of marketing and public relations.

Thorough knowledge of basic budgetary principles and procedures.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of the principles of library administration, collection trends in urban public libraries and library automation.

Considerable knowledge of library services, process and issues.

Considerable knowledge of local, state and federal governmental agencies' processes and funding sources.

Knowledge of local communities and issues that may impact library services, operations or funding.

Ability to exercise judgment and discretion in establishing, applying and interpreting departmental policies and procedures.

Ability to initiate and install administrative programs and procedures and to evaluate their effectiveness.

Ability to direct the operation of assigned county divisions and programs.

### Director of Libraries (007199)

#### Minimum Qualifications

Master's degree in Library Science or related program from an ALA accredited graduate school or equivalent. A minimum of six to ten years of responsible professional and supervisory experience in professional library work with experience in the administration of a large public library system is required.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible executive level work in planning and directing the activities of a county library system.

An employee in this class is responsible for directing and supervising the provision of library services to the public, assuring the protection of books, papers and property of the library system and planning improvements in public library services. Emphasis of the work is on planning library service programs, developing short and long-range goals and objectives, evaluating the effectiveness of library services, meeting with a variety of public and private organizations to determine public needs, and resolving library operational problems. The incumbent exercises an extensive degree of originality, judgment and professional managerial knowledge in the formulation of departmental policies and in directing geographically dispersed library operations. Supervision is exercised through subordinate executives and supervisors over professional librarians, administrative, technical and clerical employees with assigned responsibilities in various phases and locations of library activities. General direction is received from the County Manager who holds the incumbent responsible for the efficient and effective provision of public library services and for the professional management of departmental operations.

##### ILLUSTRATIVE TASKS

Directs and supervises the operation of a county library system providing a variety of library services to the public at the main library and at a large number of branch and regional library facilities.

Evaluates library operations, programs and services and assesses their effectiveness in meeting the needs of the public; directs the development of plans to provide for future services; monitors technological developments related to the improvement of public library systems.

Coordinates departmental operations with other county executives and with senior county management to assure the provision of services required from other county agencies and to plan and review library policies and activities.

Formulates acquisition and book selection policies, policies for collection development and reference services and regulations and procedures for lending and retrieval of materials.

Supervises annual budget preparation and administration of departmental fiscal activities; attends budget meetings and hearings to justify proposed expenditures.

Plans, develops and initiates library service programs; determines divisional and departmental objectives and evaluates progress toward meeting goals; redirects priorities as necessary.

Plans and attends periodic meetings with library supervisory staff to discuss and resolve library problems, receive reports prepared by subordinates and inform employees of new policies and procedures.

Serves in an advisory capacity to the Library Advisory Board; presents reports on operations of library system, suggests policy changes and receives and evaluates suggestions for policy changes from the Board; makes recommendations on all matters brought before the Board.

Supervises a library capital improvements program; reviews construction plans, plans furniture arrangements and drafts specifications, inspects library buildings under construction and plans and coordinates moves to new facilities.

Represents the county library system to the media and various local groups and organizations; meets with the public to receive suggestions concerning library operations and requests for special services.

Makes decisions regarding hiring, discipline and promotion of subordinates; reviews performance reports prepared by subordinates and rates employee performance; exercises authority for departmental personnel actions consistent with collective bargaining agreements, county personnel rules and all other applicable rules and regulations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of modern methods of library administration.

### Director of Libraries (007199)

Extensive knowledge of the informational needs and needs for library services of communities throughout the county.

Thorough knowledge of the principles of public and business administration.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of professional library principles, practices and procedures.

Thorough knowledge of applicable local laws, ordinances and regulations pertaining to the operation of a county library system.

Ability to use advanced professional knowledge of the principles of management and public administration to formulate departmental policy and control department activities.

Ability to plan, organize and supervise, through subordinates executives and supervisors, the work of subordinates in a manner conducive to full performance and high morale.

Ability to delegate the authority to subordinates necessary to complete responsibilities in various library activities.

Ability to evaluate the impact of alternative possible courses of action on departmental operations and evaluate circumstances of a new or unprecedented nature.

Ability to devise and install departmental rules, regulations and procedures.

Ability to establish and maintain effective working relationships with senior county management and officials of other public and private organizations and the public.

Ability to determine if departmental standards are being met and to redirect priorities as necessary.

### **Nature Of Work**

This is highly responsible executive level work in planning and directing the activities of a county library system.

### Park Service Aide (007202)

#### Minimum Qualifications

High school diploma or GED. Three months of experience in customer contact, recreation, or general labor are required. Must be able to work days, nights, holidays, and weekends on a varied work schedule. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is advanced recreational and related work in organizing and conducting a variety of recreational activities at county park and recreation facilities.

Employees in this class are responsible for assisting in the organization, preparation and leadership of a variety of indoor and outdoor recreation activities such as games, sports and crafts for various age groups of an assigned recreation facility. Duties include maintenance or custodial work and collection of fees and retail sales. Employees work with greater independence than those in the next lower class in conducting activities within the general recreation program. Supervision is received from a superior who reviews work in progress and upon completion for satisfactory performance of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Organizes, teaches and leads various age groups in general organized recreation activities such as team games and sports, arts and crafts, camping and nature lore, folk dancing, community singing and informal story telling.

Supervises the issue and collection of play equipment including bats, balls and rackets; officiates at athletic events; prepares and maintains reports of recreation activities.

Lines, drags and prepares ball fields for sports activities.

Maintains order in the facility by observing the play habits of participants and anticipating and stopping unacceptable conduct; insures that safety practices are adhered to; renders first aid for cuts and bruises.

Collects fees for various recreation programs or classes; makes over-the-counter sales of various items; collects money and makes change; dispenses gasoline; prepares routine daily reports for supervisor's review.

Sets up simple displays of revenue/concession merchandise; cleans and restocks shelves; assists with monthly inventories.

Performs routine maintenance and custodial work such as fixing signs, cleaning bathrooms, removing litter, watering fields and cleaning concession areas.

Acts as night watchman by turning lights on and off, making rounds to preserve security and anticipating and stopping unacceptable conduct; serves as a pool lifeguard as necessary.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the principles, practices and techniques of public recreation and park maintenance, including the activities which comprise a community recreation program.

Knowledge of the rules of instruction in the fundamentals of a variety of team and individual sports.

Knowledge of the principles and techniques of first aid.

Knowledge of the safety precautions applicable to the area of assignment and of effective precautionary measures.

Knowledge of the facilities and equipment used in indoor and outdoor recreational activities.

Knowledge of retail sales procedures and use of a cash register.

Knowledge of routine maintenance procedures.

Ability to lead and instruct games and other recreational activities.

Ability to recognize and prevent dangerous situations from arising.

Ability to establish and maintain effective working relationships with various age group participants and the public.

Ability to prepare simple inventory reports and keep routine records.

Ability to administer basic first aid.

Ability to perform minor maintenance.

Ability to operate a standard cash register and make simple arithmetic computations.

Skill in a variety of sports, crafts and games.

### Park Attendant (007215)

#### Minimum Qualifications

Eighth grade. One year of experience in grounds and turf maintenance to include the maintenance and operation of landscape equipment is required. Must possess a Driver license. Must be able to work days, nights, holidays, and weekends on a varied work schedule.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled manual work in the maintenance and repair of park facilities and in rendering services to park users and patrons of park facilities.

Employees in this class perform a variety of tasks of a light to moderately heavy manual nature which are necessary to properly maintain and operate public parks, beaches, playgrounds, amusement rides, dockage, boat rentals, and other facilities and concession areas. Work requires meeting the general public and following prescribed departmental rules in providing for their needs. All work is done according to standardized and prescribed policies, rules and regulations. Regular and special assignments are outlined by a superior who reviews work through personal inspection. On routine or repetitive assignments, instructions are usually not given unless there is some change in the routine of work to be performed.

##### ILLUSTRATIVE TASKS

Performs a variety of park maintenance work not requiring the skilled performance of a given craft or trade including repair of buildings, tables, fire places, and BBQ grills, utility installations, tools and equipment; maintains grounds, golf courses, swimming and beach areas, roads, trails, restrooms, playgrounds, athletic fields, and other areas; performs custodial work as required.

Performs a variety of gardening work not requiring the skilled application of professional gardening techniques; seeds, hoes, cultivates, and gives general care to lawns and grounds; removes dirt, rubbish, weeds, leaves, and other refuse from grounds; prunes shrubs and trees, cuts and edges grass, using hand and power operated machinery, such as chain saws, monofilament trimmers, mowers, blowers, sprayers, edgers, aerators, and manlifts.

Occasionally operates flatbed or similar type of automotive equipment within the park areas; however, vehicle operation is an incidental phase of the duties performed.

Meets with the public and gives information regarding the various park facilities and the rules and regulations regarding their use; gives information regarding park flora and related information; collects necessary fees, assigns parking, playing, picnicking, and other areas.

Gives a variety of assistance to Dock Masters; assists with invoices, registers boats and collects dockage fees, rents skiffs, operates small and large hoists, sells a variety of merchandise, serves in bait and tackle shops, gives information pertaining to marine life, weather and tide conditions, gives general maintenance to boats and dockage facilities, provides fuels and other services as required.

Operates a variety of amusement rides, operates live pony rides; assists in domestic animal care.

Keeps simple records of product sales and services used by patrons.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Some knowledge of the care of flowers, trees, shrubs, and turf grasses.

Some knowledge of animal and plant life of the area.

Some knowledge of the techniques and equipment of grounds and building maintenance work.

Ability to meet the public effectively to give information regarding park facilities and regulations and to ensure the safety and welfare of visitors.

Ability to follow verbal and written instructions and to keep simple records.

Ability to perform effectively in an assigned dockage or marine area.

Skill in the use, operation, and care of hand and power tools, hoists, automotive equipment, and the less complex grounds keeping equipment.

Physical strength and agility sufficient to perform moderately heavy manual labor out-of-doors and occasionally under adverse weather conditions.

High school diploma or GED. One year of experience in the care and use of various types of firearms is required. Must possess a Driver license. Must be able to work days, nights, holidays, and weekends on a varied work schedule.

#### Job Specifications

##### NATURE OF WORK

This is specialized technical and maintenance work in the operation of a County firearms range.

Employees in this class are responsible for maintaining order and discipline on a firearms range, instructing range patrons in the care and use of firearms, and performing a variety of maintenance work in the care and upkeep of range facilities, buildings and grounds. Incumbents are expected to be competent in the care and use of various hand and shoulder firearms and to be knowledgeable of the latest instructional and safety practices concerning the use of firearms. Maintenance responsibilities include mowing and fertilizing grass, picking up trash, and cleaning restrooms and range buildings. Supervision is received from a range manager who prepares work assignments and range schedules, reviews work for technical quality and inspects the general appearance of the range for completion of maintenance responsibilities.

##### ILLUSTRATIVE TASKS

Maintains order and discipline among shooters on the firing range; assists groups during matches and shooting programs.

Instructs range patrons in the care, use and basic safety practices concerning a variety of firearms such as shotguns, pistols and small bore rifles.

Cleans, maintains and adjusts County owned range weapons.

Maintains machines used in range operation and oils, cleans and adjusts as necessary.

Mows lawns, banks, firing back-stops and grounds; fertilizes grass as needed, prunes shrubs and trees, collects trash from grounds and parking lots, and disposes of garbage.

Maintains mowing equipment by changing oil and grease.

Cleans and maintains offices, restrooms and other range buildings.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of range safety practices on a firearms range.

Considerable knowledge of the operational characteristics and maintenance requirements of typical hand and shoulder firearms.

Considerable knowledge of safety precautions required in handling firearms.

Knowledge of modern instructional methods pertaining to the care and use of firearms.

Knowledge of the standard rules and regulations of a firearms range.

Some knowledge of the care of flowers, shrubs, trees and small buildings.

Ability to enforce range safety regulations firmly, tactfully and courteously.

Ability to instruct range patrons in the care and use of firearms.

Ability to maintain effective customer relations with range patrons.

Ability to operate, maintain and make simple repairs to power lawn mowers and ground maintenance equipment.

Skill in the care and use of firearms.

#### Nature Of Work

This is specialized technical and maintenance work in the operation of a County firearms range.

## Range Master (007218)

### Minimum Qualifications

High school diploma or GED. Six years of experience in park and recreation, revenue or retail operations to include one year of administrative or supervisory experience in the operation of a firearms shooting range are required. College coursework may substitute for the operations experience on a year-for-year basis to a maximum of four years. Must possess a Driver license. Must possess certification as a Firearms Instructor by the National Rifle Association, State of Florida, United States Military or other unit of government, or obtain certification as a Firearms Instructor within the probationary period.

### Job Specifications

#### NATURE OF WORK

This is responsible supervisory work in the management of a County firearms range.

An employee in this class is responsible for the supervision and management of Trail Glades Range consisting of pistol, rifle, trap and skeet, sporting clay and range safety operations. Responsibilities include supervising the overall operation of the facility with emphasis on total firearms and personal safety of the general public, enforcing established rules and regulations, conducting periodic inspections to determine maintenance and equipment requirements, supervising the retail sale of supplies and equipment, promoting and organizing special shooting events, and preparing budget estimates and operating reports. The incumbent exercises considerable independent judgment in ensuring the personal safety of the general public and in managing operations in accordance with established policies and procedures. Supervision is exercised over subordinate supervisors and range employees engaged in maintaining range facilities, providing assistance to the public, enforcing range safety, and operating a proshop. General supervision is received from an administrative superior who reviews work through personal observations and conferences, and written reports for effective facility management and quality of service to the shooting public.

#### ILLUSTRATIVE TASKS

Supervises subordinate supervisors and range employees engaged in operating a proshop, assisting the general public, enforcing range safety regulations, and maintaining range facilities and equipment; schedules assignments and hours of work for range employees.

Supervises and manages facility operations with emphasis on total firearms and personal safety of the general public as required by established rules, regulations and procedures.

Conducts periodic inspections to determine equipment and physical plant maintenance requirements.

Supervises operation of proshop; ensures accurate cash and sales records, and fee collections; determines appropriate inventory levels for stock; makes recommendations for changes in fees and prices of items for resale.

Explains safety policies and procedures to the public and to range employees; provides general information as required.

Promotes and organizes various shooting activities for the shooting public.

Conducts training sessions in person or through knowledgeable organizations concerning changes in gun laws and other subjects.

Prepares annual budget for the facility and periodic operating reports.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of range safety practices on a firearms range.

Thorough knowledge of safety precautions required in the handling of firearms.

Considerable knowledge of the operating characteristics and maintenance requirements of typical hand and shoulder firearms.

Considerable knowledge of the principles of management as they apply to the management of a public service facility.

Considerable knowledge of retail sales management.

Considerable knowledge of firearms, ammunition, reloading components and related supplies and equipment.

Considerable knowledge of Florida gun laws and requirement of the Bureau of Alcohol, Tobacco and Firearms.

Knowledge of supervisory principles and practices.

### **Range Master (007218)**

Knowledge of purchasing practices and procedures.

Ability to manage a firearms range in accordance with departmental policies and procedures and established range safety practices and procedures.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, superiors and the public.

Ability to enforce range safety practices firmly and tactfully.

Ability to maintain records and repair operational reports.

Skill in the care and use of firearms.

### Concession Attendant (007221)

#### Minimum Qualifications

Eighth grade. One year of experience in public contact work to include cash handling experience is required. Must be able to work days, nights, holidays, and weekends on a varied work schedule.

#### Job Specifications

##### NATURE OF WORK

This is retailing and related clerical work serving the public in a park facility or attraction.

Employees in this class are responsible for attending a concession, selling a variety of merchandise and performing related clerical duties in a park facility or attraction. Duties may include selling admission tickets or merchandise, preparing daily cash reports, conducting periodic stock inventories, and performing a variety of routine office tasks. Work differs from the next lower class in that incumbents work with greater independence and perform a wider variety of duties. Supervision is received from a superior who reviews work for satisfactory completion of assigned duties.

##### ILLUSTRATIVE TASKS

Operates a cash register at a museum, marina, park, Metrozoo, or other park facility; sells admission tickets, collects money or accepts credit card payments, makes change for customers and issues receipts.

Assists visitors by providing information on facility attractions and activities.

Sets up concession stands or operates a small store; sells a variety of merchandise; purchases products for resale or for use at the facility; stocks and restocks shelves; cleans and maintains concession area and stockroom.

Answers telephone and responds to inquiries for general facility information, including directions, park operating hours, rules, procedures and restrictions.

Maintains group facility reservation books for park facilities, schedules field trips for school groups makes campground reservations.

Performs routine office tasks including, filing, preparing requisitions, maintaining office supplies, distributing mail and making photocopies.

Conducts periodic inventories of merchandise for resale.

Prepares daily sales transaction reports.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of routine storekeeping methods and retail sales procedures.

Knowledge of the operation of a standard cash register.

Knowledge of basic public relations techniques.

Knowledge of operations and activities at the park facility or attraction of assignment.

Some knowledge of office practices and procedures.

Ability to operate a standard cash register and make change quickly and accurately.

Ability to maintain simple inventory and sales records.

Ability to perform a variety of routine clerical or office tasks.

Ability to understand and follow verbal and written instructions.

### Park Enforcement Specialist (007222)

#### Minimum Qualifications

High school diploma or GED. One year of law enforcement experience as a police officer or correctional officer; two years of military law enforcement experience with an honorable discharge; or three years of full-time experience in park and recreation services or as a private security guard are required. Must possess a Driver license. Must be able to work days, nights, holidays, and weekends on a varied work schedule. Must be able to stand, walk, drive a vehicle, and ride a bicycle for extended periods of time. Must obtain a State of Florida Class "D" Security Officer license and obtain certification in CPR and First Aid during the first six months of employment and maintain certifications for continued employment.

#### Job Specifications

##### NATURE OF WORK:

This is security and enforcement work in protecting and patrolling public and private property at the County Parks facilities.

Employees in this class perform security enforcement work on an assigned shift to safeguard property and ensure the safety of persons at the County Parks. Duties include patrolling Park property on foot and by vehicle to prevent theft, pilferage, vandalism, fire, trespassing, accidents, property damage, misuse and abuse of equipment and ensure the safety of patrons and employees while on Park property. Work is performed independently in accordance with detailed instructions and regulations and occasionally involves an element of personal danger. Supervision is received from senior security enforcement personnel who make daily assignments and review work performance through personal observation and written incident reports.

##### ILLUSTRATIVE TASKS:

Patrols natural areas, neighborhood, community, regional and metropolitan parks, golf courses, marinas, trail glades range, campgrounds, pools, tennis center, auditoriums and parking lots.

Protects natural areas managed by the Parks Department, prevents unauthorized entry and detects violations of established security measures regulations and procedures.

Stands guard at gate entrances and permits entrance to only authorized persons and vehicles; prevents unauthorized persons or stops suspicious persons from entering restricted areas or after hours.

Questions identities and nature of activities at any Park facility; checks identification under chapter 26 parks rules and regulation; controls and directs traffic using the flow of traffic with maximum safety. Summons law enforcement officers and assists in investigations, arrests, and emergencies. Operates mobile radio equipment, intercommunication devices, and patrol vehicles.

Prepares incident reports and logs in accordance with departmental rules, regulations, and procedures. Enforces Chapter 26, [parks & recreations] Chapter 30 [traffic & motor vehicles] and Florida statutes section 403.413 [litter law]. Issues citations for violations of County Ordinances.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS:

Knowledge of the policies, regulations, and procedures used in protecting and patrolling public property at a major metropolitan park system or facility.

Knowledge of the geography of the parks operating areas including road network, users, and, facilities. Knowledge of the operations and activities at a major park system.

Ability to enforce county parks ordinances and security regulations with firmness, tact, and impartiality.

Ability to react promptly and correctly in emergency situations.

Ability to understand and carry out written and oral instructions.

### Marina Attendant (007240)

#### Minimum Qualifications

Eighth grade. One year of experience in marina operations to include experience in grounds maintenance, dock maintenance, customer service, computerized clerical applications, and/or cash handling is required. Must possess a Driver license. Must be able to work days, nights, weekends and holidays on a varying work schedule.

#### Job Specifications

##### NATURE OF WORK:

This is responsible manual and clerical work assisting with the operations of the Miami-Dade County's marinas and dockage facilities.

Employees in this class are responsible for assigning berths or moorings to boat owners; recording the assignments; collecting the established fees; inspecting the facilities and enforcing the marina's rules and regulations. Work may also include the operation of a boat to transport persons to and from a mooring area. The incumbents exercise some independent judgment in making decisions within the limits of established policies and procedures. Responsibility is assumed for designated areas or functions within the marina in the absence of the Marina's Manager or the Assistant Manager. Work assignments and general supervision is received by the Marina's Manager or other designated supervisor, who reviews work through personal inspection.

##### ILLUSTRATIVE TASKS:

Assists in the marina(s) and/or dockage facilities by performing complex office management duties and assisting with the functional supervision of clerical, maintenance and custodial personnel.

Meets arriving yachts and assists in berth assignments and related procedures including the execution of dockage agreements.

Communicates with Customs and Immigration in matters relating to yachts arriving from foreign ports.

Ensures the efficient and safe operations of mechanical equipment at a Marina facility.

Supervises and ensures the adherence to the safety rules and regulations of local, state or federal agencies.

Provides weather reports and related conditions for boating in the area as required.

Performs related work as required.

##### KNOWLEDGE, ABILITIES AND SKILLS:

Considerable knowledge of the operation and maintenance requirements of docks and related facilities.

Considerable knowledge of nautical terms and marine customs.

Some knowledge of marine safety and marine radio communications procedures.

Some knowledge of federal regulations pertaining to pleasure craft operations.

Ability to handle and operate small boats (up to 40' in length)

Ability to recognize maintenance needs and to supervise routine maintenance and clerical procedures established for the facility.

Ability to establish and maintain effective relationships with the marine patrons and subordinates.

Ability to swim.

Ability to maintain a log or record of yacht dock activity and operation.

Ability to prepare written reports.

Sufficient skill in boat handling to be of assistance to a skipper in docking and undocking.

Ability to operate small equipment including pressure cleaners, weed eaters, chain saws and lawn mowers.

#### Nature Of Work

This is responsible manual and clerical work assisting with the operations of the Miami-Dade County's marinas and dockage facilities.

### Tennis Court Attendant (007241)

#### Minimum Qualifications

High school or GED. Six months of experience in tennis court maintenance work are required. Must obtain a State of Florida Department of Agriculture and Consumer Services Pesticides, Herbicides and Insecticides certification prior to the completion of the probationary period. Must be able to work days, nights, holidays, and weekends on a varied work schedule.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled and skilled work in the maintenance and repair of variously surfaced tennis courts.

Employees in this class maintain and repair variously surfaced tennis courts in accordance with established professional standards. Duties include detecting problems and making repairs, performing daily maintenance of tennis court surfaces, clearing courts of debris and trash, maintaining automatic water systems, installing or replacing nets and windscreens, replacing top dressings and repairing holes, replacing line stripes on clay courts, and applying chemicals and fertilizers. Supervision is received from an administrative superior who reviews work through personal observations and conferences for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Maintains and repairs variously surfaced tennis courts; detects problems and makes necessary adjustments or repairs to keep tennis courts in top professional playing conditions at all times.

Performs daily maintenance of tennis court surfaces including clay courts and the monitoring of the watering system, dragging, replacing clay and brushing lines; cleans courts of debris including trash, rocks, leaves, sand and dirt particles, and loose turf particles.

Maintains automatic water systems; adjusts and repairs watering pipes, canisters, floats, and timing devices on clay and grass courts; replaces top dressing as needed.

Installs, replaces or adjusts nets and windscreens; replaces top dressing, repairs holes, and replaces line stripes on clay courts.

Performs daily maintenance of grass courts; applies chemicals and fertilizers under supervision.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the repair and maintenance characteristics of variously surfaced tennis courts.

Knowledge of the methods and materials required in the repair of tennis court surfaces.

Knowledge of irrigation systems used for watering of tennis courts.

Knowledge of departmental policies and procedures.

Knowledge of chemicals and fertilizers required for the maintenance of grass tennis courts.

Ability to maintain and repair variously surfaced tennis courts in accordance with departmental procedures.

Ability to detect improperly functioning mechanical systems used in tennis court operations.

Ability to follow verbal and written instructions.

Ability to operate equipment used in tennis court maintenance and repair activities.

Ability to apply chemicals and fertilizers in the prescribed manner.

Skill in the operation of close tolerance mowing equipment.

NEW 10-96

#### Nature Of Work

This is semi-skilled and skilled work in the maintenance and repair of variously surfaced tennis courts.

### Turf Equipment Mechanic (007245)

#### Minimum Qualifications

High school diploma or G.E.D. Two years experience in maintenance and/or repair of various types of turf equipment, such as lawnmowers, weed eaters, chainsaws, and three and four cylinder engines. Must possess CDL B license and own hand tools.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level in the maintenance and repair of landscaping and turf maintenance machinery and mechanical equipment.

An employee in this class performs specialized mechanical work in the diagnosis, repair and preventive maintenance of a wide variety of diesel and gasoline powered turf equipment. Work involves the overhaul and maintenance of machinery and mechanical equipment such as lawnmowers, weed eaters, chainsaws, and low horsepower engines used in maintaining park lands. Employees work independently using handtools, power tools and various precision-measuring and testing instruments. Assignments may be given in the form of sketches, diagrams or written instructions and may involve locating defective parts or determining the cause of malfunctioning machinery. Work is reviewed by a maintenance supervisor who inspects work occasionally in progress and upon completion for compliance with instructions and serviceability of the equipment repaired.

##### ILLUSTRATIVE TASKS

Overhauls and maintains various types of cutter deck units; replaces cutter housings; rebuilds blade spindle units; repairs and maintains PTO gear box units; sharpens and replaces mower blades.

Performs equipment preventive maintenance, including changing fluids and lubricants, and the inspection of suspensions and steering systems.

Repairs and maintains diesel and gasoline engines and their components, including engine rebuilding, inspection and maintenance of fuel systems, carburetor fuel line and fuel injector cleaning and maintenance; repairs injection pumps; maintains cooling systems; replaces hoses; repairs radiators; and performs pressure checks.

Overhauls and maintains two-cycle type turf equipment such as weed eaters, blowers, chainsaws, pole saws, hedge trimmers, edgers and field markers; maintains low horsepower (3-12 hp) four-cycle engines; performs tune-ups; orders and receives parts using parts manuals.

Adjusts, repairs and overhauls hydraulic systems including rebuilt hydraulic pumps; pressure checks hydraulic lines.

Diagnoses and repairs turf equipment safety systems to ensure compliance with OSHA standards; tests and replaces safety switches using OMS meter and other testing procedures; performs upkeep on wire harness components; reads wire schematics.

Overhauls and maintains various power take-off systems (PTO), including drive shafts and gearboxes.

Overhauls three and four wheel drive scooters; performs tune-ups brake work, engine and transmission repairs; inspects and sharpens cutting blades using blade grinding equipment; repairs and maintains ignition and charging systems; changes tires and wheels; performs minor welding repairs; prepares and completes repair orders per the work assignment.

Uses special tools such as valve facers, reamers, cylinder hones, drills and grinders, gauges, micrometers, taps and dies.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the methods, materials, tools and practices used in specialized mechanical craft.

### **Turf Equipment Mechanic (007245)**

Considerable knowledge of the occupational hazards and safety precautions of the mechanical trade.

Knowledge of the principles of mechanics.

Knowledge of the repair and maintenance characteristics of a wide variety of mechanical equipment and powered machinery.

Ability to detect defects in machinery and equipment and to make the necessary repairs or adjustments.

Ability to work from oral or written instructions, from simple diagrams and sketches.

Ability to make simple time and materials estimates.

Skill in using a variety of standard hand tools, machines and power equipment used in machinery repair work.

NEW 12-06

#### **Nature Of Work**

This is skilled work at the journeyman level in the maintenance and repair of landscaping and turf maintenance machinery and mechanical equipment.

### Horticultural Assistant (007248)

#### Minimum Qualifications

Eighth grade. One year of experience in interior plant maintenance is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is routine manual work in plant nursery and office environments for the Park and Recreation Department.

Employees in this class are responsible for the satisfactory performance of duties necessary for the proper growth and maintenance of sungrown and shadehouse grown container plants, and the installation and maintenance of interior plants in various locations. Supervision is received from a technical or administrative superior, although routine and repetitive tasks are accomplished under general supervision.

##### ILLUSTRATIVE TASKS

Performs potting of containerized plants.

Waters, fertilizes and weeds containerized plants.

Mixes and applies pesticides.

Identifies, selects, loads and installs interior plants in office settings.

Follows up maintenance and rotation of interior plants.

Inspects plants for signs of diseases, insects or cultural problems.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of good watering, fertilizing and other cultural practices for the proper growth and maintenance of foliage and sungrown containerized plants.

Knowledge of proper user of pruners, portable sprayers and other hand tools used in container nursery and interior plant maintenance.

Knowledge of interior plant names.

Ability to operate an automobile, pick-up truck and small garden tractor.

Ability to properly care for sungrown and shadehouse grown container plants.

Physical strength and agility sufficient to perform assigned duties.

NEW 6-91

#### Nature Of Work

This is routine manual work in plant nursery and office environments for the Parks and Recreation Department.

### Tree Trimmer (007250)

#### Minimum Qualifications

Eighth grade. Six months of experience in trimming large trees and other large plants are required. Must possess a CDL/Class B. A performance test will be given at the time of interview. Position requires working at considerable heights and operating bucket trucks and related power equipment such as stump grinders, chippers, and chainsaws.

#### Job Specifications

##### NATURE OF WORK

This is manual landscape maintenance work in the pruning and general care of shade and ornamental trees in parks and along roadways.

Employees in this class perform a variety of semi-skilled tasks in cutting away dead and broken tree limbs, removing excess tree foliage, and applying preservatives to cut surfaces. Responsibilities include operating aerial boom trucks, hydraulic lift equipment, dump trucks and branch chipper equipment. Employees follow established safety practices and procedures in working at tree-top elevations in aerial equipment and in close proximity to overhead utility wires. Supervision is received from a maintenance supervisor who inspects work in progress and upon completion for satisfactory application of tree trimming techniques.

##### ILLUSTRATIVE TASKS

Climbs trees using spike shoe attachments or extension ladder, or reaches work area using a truck-mounted hydraulic hoist; uses chain saws, shears and other cutting implements to remove branches that are broken, dead or intruding upon private properties, right-of-way and parking areas.

Trims trees for clearance of overhead utility wires and street lighting and to protect park patrons from injury.

Removes fallen trees from roadways and park areas; operates a stump grinder to grind stumps to below grades; trims branches to preserve visibility of traffic control devices and to improve landscape appearance.

Sprays trees with chemical agents to kill harmful insects, blights and parasites; sprays trees with fertilizers and other nutritive elements; applies insect-killing substances with brushes to trunk of trees; performs minor tree surgery not requiring special training.

Removes rotted cavity from trunks of trees, cleans and paints, and occasionally cements and sets drains to prevent further decay.

Does routine servicing and simple maintenance work to machinery and equipment; cleans saws and makes minor adjustments to motors.

Drives aerial boom truck to and from work locations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the standard methods, materials and tools used in pruning and maintaining shade and ornamental trees.

Knowledge of the occupational hazards and safety precautions of working at tree-top elevations and near overhead utility wires.

Knowledge of various species of local trees and their growth characteristics.

Ability to understand and follow verbal instructions.

Ability to operate aerial boom trucks, hydraulic lift equipment, dump trucks, stump grinders and branch chipper equipment.

Ability to work at heights.

Ability to observe and follow established safety practices and precautions.

REV 11-94

#### Nature Of Work

This is manual landscape maintenance work in the pruning and general care of shade and ornamental trees in parks and along roadways.

### Parks Sound Technician (007252)

#### Minimum Qualifications

High school or GED. One year of skilled experience in the design and installation of sound, lighting and power systems is required. Must possess a Certificate of Competency as a Journeyman Electrician.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work in the design, installation and maintenance of sound, lighting and power systems.

An employee in this class is responsible for the design, installation, operation and maintenance of public address systems, power distribution systems and sound/lighting systems for various concerts and special events. Duties include installation of electrical systems at various park facilities, assisting networks and local television and radio stations during special events, preparing and reviewing bids for sound and electronic work, and billing outside agencies for services. Supervision may be exercised over work crews and trades helpers. Supervision is received from a technical superior who reviews work for satisfactory operation of sound, lighting and power systems.

##### ILLUSTRATIVE TASKS

Designs, builds, operates and maintains public address systems for various concerts and special events.

Designs and installs large temporary power distribution systems, and landscape and general lighting for special events.

Designs, installs and maintains sound and lighting, intercom and electrical systems for theaters, auditoriums, pools, stadiums, ball parks, offices and other park facilities.

Coordinates work with networks, local television and radio stations to design and install video and phone lines, power for satellite transceivers, production trucks and associated support systems; maintains during special events and advises outside agencies on system design and installation.

Installs, repairs, modifies and replaces electrical circuiting and wiring at various parks and other facilities.

Prepares and reviews bids for County sound, electric and electronic work; reviews performance of equipment on a periodic basis; trains and supervises work crews as required; prepares invoices to outside agencies for services rendered.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the standard practices, methods, tools and materials of the electrical-electronic trade.

Considerable knowledge of public address, power distribution and sound/lighting systems.

Considerable knowledge of the occupational hazards and safety precautions of work on high voltage electrical systems and equipment.

Knowledge of local electrical codes effective in the County.

Knowledge of County bid practices and procedures.

Ability to design, install, operate and maintain public address, power distribution and sound/lighting systems.

Ability to install, repair, modify and maintain a variety of electrical equipment and systems.

Ability to locate defects in electrical equipment and systems.

Skill in the diagnosis of electrical malfunctions.

Skill in the electrical trade.

This is specialized work at the journeyman level in the daily maintenance and repair of park and recreation facilities.

## Landscape Architectural Drafter 2 (007257)

### Minimum Qualifications

High school or GED . One year of experience in landscape architectural drafting is required.

### Job Specifications

#### NATURE OF WORK

This is advanced technical work in landscape architectural drafting, requiring use of standard instruments and/or use of a computer aided drafting and design system.

Employees in this class act as principal assistants to professional landscape architects in performing a variety of the more responsible and technical drafting and office landscape architectural tasks. Work requires a considerable knowledge of landscape architecture. Supervision may be exercised over a staff of skilled technical subordinates through a review of work in progress and upon completion. All work is subject to check in progress and upon completion by a professional superior.

#### ILLUSTRATIVE TASKS

Performs final drafting on a wide variety of plans designed by landscape architects including master plans, planting plans, grading plans and layout plans.

Prepares base maps, perspective sketches and elevations as needed to augment and clarify the presentation of various plans.

Prepares landscape architectural working drawings including site plans, elevation sections and details.

Prepares rendered plans and sketches using a wide variety of graphic techniques and media.

Performs a variety of calculations related to grading and site development including area, cut and fill, and plant and material quantities.

Checks and gives preliminary review to the work of subordinate drafting personnel to assure accuracy and completeness.

Uses standard drafting instruments or a computer aided drafting and design system.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, practices and techniques of landscape architectural drafting.

Knowledge of mathematics through trigonometry.

Knowledge of general construction specifications and blueprints.

Knowledge of supervising principles and practices.

Ability to perform technical computations, to make estimates and to compile data in appropriate formats.

Ability to plan and supervise the work of technical assistants in a manner conducive to full performance and high morale.

Ability to make difficult and technical landscape architectural drawings.

Ability to prepare graphic renderings of landscape architectural drawings, sketches and maps used in presentations.

Ability to use or learn to use a computer aided drafting and design system.

Ability to understand, follow and transmit complex oral and written instructions.

Skill in the use of drafting instruments and equipment and various graphic media.

NEW 10-88

### Nature Of Work

Must be able to work days, nights, holidays, and weekends on a varied work schedule. Continued employment requires meeting all physical standards, successfully completing performance test and maintaining all required certifications.

#### Job Specifications

##### NATURE OF WORK

This is skilled water safety work in preventing accidents and injuries at a public bathing beach or swimming pool.

Employees in this class are responsible for safeguarding patrons at a County bathing beach or swimming pool by preventing injury or loss of life through drowning and for administering first aid or artificial respiration. Work is performed in accordance with departmental rules and regulations governing the public use of swimming areas or pools, and by recognized practices of water safety. Supervision is received from a technical superior who makes work assignments and reviews work for orderliness and rule enforcement by visual inspection.

##### ILLUSTRATIVE TASKS

Maintains order and discipline among bathers and other persons at an assigned county swimming area or pool.

Rescues bathers in distress; applies resuscitation and administers first aid when necessary.

Operates a rescue boat to patrol the swimming area in the enforcement of rules and regulations and also in the rescue of persons in distress.

Assists pool managers in pool procedures such as inspection of rescue equipment and collection of water samples for tests; when assigned assists in the teaching of swimming classes or other aquatic programs.

Maintains general appearance and cleanliness of beach area or pool when able to do so without distraction from lifeguarding.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of approved water rescue methods and specific first aid techniques.

Ability to learn rules and regulations relating to pool, park, and beach activities rapidly and to exercise tact, firmness, and good judgment in enforcing such rules and regulations.

Ability to prevent dangerous situations from arising, to recognize emergencies, and to take effective action.

Skill in pool and surf swimming, lifesaving, and first aid.

Physical strength and agility and freedom from disabling defects; and ability to meet prescribed physical standards.

### Beach Safety Manager (007270)

#### Minimum Qualifications

Bachelor's degree in Park Management, Recreation, Business Administration, Public Administration or a related field. Three years of experience in responsible supervisory lifeguarding work in a beach swimming area are required. Additional experience may substitute for the required education on a year-for-year basis up to a maximum of two years.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and administrative work managing lifeguarding and beach safety operations at a Metro-Dade County operated public beach.

Employees in this class are responsible for supervising lifeguard services, coordinating beach operations, and performing various administrative duties at a public beach facility. Emphasis of the work is on assuring the safety of beach patrons through the provision of lifeguard services, maintaining beach areas in a safe and clean manner, and assuring the maintenance of positive relations with the public. Duties include budgetary preparation and administration, lifeguard training and new equipment evaluation. Incumbents exercise independent judgment in enforcing local ordinances and beach safety rules in effect at county public beaches. Supervision is exercised over supervisory lifeguard personnel with assigned lifeguarding responsibilities. Supervision is received from an administrative superior who reviews work for the safe and efficient management of beach safety activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate lifeguard personnel engaged in enforcing local ordinances regarding water safety and public beach usage, responding to emergencies, and promoting the general welfare of beach patrons.

Responds to and resolves complaints from beach patrons on conduct of lifeguards, beach regulations, and beach maintenance.

Responds to emergencies and incidents occurring at the public beach facility.

Prepares and administers beach safety budget; requisitions equipment, materials and supplies; prepares reports of operations.

Updates beach operations training manual and programs to maintain proficiency in lifesaving techniques and first aid methods.

Conducts routine safety checks of beach equipment, lifeguard facilities and grounds; evaluates and tests new equipment for use in lifesaving operations.

Meets with civic groups, municipal officials and the media to provide information on beach operations; represents department at lifesaving, first aid, water safety programs, and clinics.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of laws, ordinances, procedures, and regulations pertaining to the use of public beach facilities.

Considerable knowledge of beach safety principals, practices, and techniques.

Considerable knowledge of tools, equipment, and supplies used in beach safety.

Considerable knowledge of occupational hazards and safety precautions required in beach safety operations.

Knowledge of supervisory principles and practices.

Knowledge of public relations principles and techniques.

Knowledge of budget preparation and reporting procedures.

Ability to supervise a staff of lifeguards and supervisors in a manner conducive to full performance and high morale.

### Purchasing Specialist (007272)

#### Minimum Qualifications

High school diploma or GED. Three years of large-scale purchasing and contract management experience involving a variety of commodities are required.

#### Job Specifications

##### NATURE OF WORK

This is specialized work administering and managing the procurement process of commodities and services for the Miami-Dade County.

Employees in this classification are responsible for specialized specific contract development and compliance, as well as fiscal adherence. Responsibilities typically include managing and administering contracts and one-time requisitions/contracts and processing small purchase orders. Employees in this classification may exercise supervision over subordinate staff through the assignment of work. General supervision is received from an administrative superior who reviews work for conformity with established administrative and departmental policies and attainment of desired objectives through conferences and review of reports of operations.

##### ILLUSTRATIVE TASKS

Develop methods and strategies to ensure goods and services are available to facilitate operation of the department.

Coordinate with various end users to establish needs, including modifications to specifications and annual dollar requirements.

Researches sole source vendors, obtains required documentation and prepares justifications for the General Services Administration (GSA), Department of Procurement Management (DPM) or Board of County Commissioners (BCC) action; meet with GSA and DPM staff to complete specialized purchasing requirements for the department.

Reviews various other contracts which may be required by end users to meet department needs including reviewing state contracts or other county contracts.

Coordinates the overall usage of small purchase orders to ensure that the commodity assignments do not exceed the designated amount for the fiscal year.

Respond to departmental inquiries as to proper methods for purchases and interpretation of contracts; provides memoranda to staff as to contract usage; works with end users to analyze their needs, specifications and dollar requirements.

Request allocations and issue releases for purchase orders through ADPICS; print and mail purchase order releases to the awarded vendor.

Maintain on going communication with GSA and DPM to secure contracts.

Develop training programs and facilitate the required training for storeroom staff and other departmental liaison representatives related to purchasing procedures used to facilitate proper contract management.

Perform other related functions such as emergency purchases during critical times such as hurricanes or other types of emergencies.

Perform related work as required.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of large-scale procurement methods, practices and procedures.

Considerable knowledge of federal, state and local laws, rules, regulations and ordinances effective in governing the purchase of commodities and services.

##### NATURE OF WORK

This is highly responsible professional managerial work in planning and directing historic restoration activities for the Park and Recreation Department.

An employee in this class is responsible for overseeing the assessment, salvage, documentation, reconstruction and restoration of historical sites and structures, and the operation and restoration of the Charles Deering Estate. Responsibilities include directing the preservation and restoration of historical sites and structures, supervising all phases of construction management for restoration projects, issuing permits and certificates of appropriateness and digging, and administering all contracts with historic restoration and archeological survey consultants. Related duties include participating in all planning processes related to historic structures and developing policies which affect the acquisition, restoration and operations of historical properties. The incumbent exercises considerable independent judgment in the restoration and rehabilitation of local historical sites. Supervision is exercised over professional, semi-skilled and security employees engaged in restoration activities or serving in support capacities. General direction is received from the Deputy Department Director who holds the incumbent responsible for effective management of the Charles Deering Estate and administration of historic restoration projects.

##### ILLUSTRATIVE TASKS

Supervises and coordinates the work of subordinate employees engaged in restoration planning, design and construction activities or serving in support capacities.

Coordinates work with organizations and agencies involved in the restoration of historical sites and structures, including the Interior Department, Dade County Historic Preservation Board, and other applicable public agencies; maintains contacts with various private non-profit organizations.

Coordinates restoration work among various public agencies, public and private sector providers, and private professional and technical consultants.

Provides recommendations to senior department management on matters pertaining to the appropriate restoration options available for targeted sites and structures.

Oversees and participates in the planning and design phases of restoration including working with departmental staff and outside consultants on all aspects of reconstruction, rehabilitation and restoration; participates in the preparation of plans and specifications, cost estimating, bidding procedures, preparation of contract documents, and the securing of permits.

Supervises and participates in the implementation of the construction phases of historic preservation including architectural, structural, environmental components and retrofitting modern mechanical, plumbing, heating, electrical and air conditioning systems into historic structures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of local, state and national historic preservation programs and agencies.

Thorough knowledge of local, state and national regulatory processes affecting historic restoration and rehabilitation.

Thorough knowledge of local historical styles, materials and methods of construction.

### Intragovernmental Affairs Coordinator (007298)

#### Minimum Qualifications

Bachelor's degree in Park and Recreation Administration, Business Administration, Public Administration, Communications or a related field. Four years of professional experience in agenda coordination, office management, technical writing, public relations or a related field are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible intragovernmental administrative work for the Park and Recreation Department.

An employee in this class is primarily responsible for coordinating departmental agenda processes and preparing agenda items for consideration by the Board of County Commissioners. Responsibilities include preparing agenda items for the review and action of the Park and Recreation and Arts Committee, serving in a liaison capacity to the staff and members of the Board of County Commissioners, coordinating work with the County Manager's Office concerning agenda items and other departmental projects, and representing the department at all meetings of the Board of County Commissioners. The incumbent exercises considerable independent judgment in the effective management of departmental agenda processes and in dealing with a variety of elected and appointed County officials. Supervision is exercised over professional and clerical employees with assigned responsibilities in various phases of intragovernmental affairs activities. General supervision is received from an administrative superior who holds the incumbent responsible for the professional management of departmental intragovernmental affairs.

##### ILLUSTRATIVE TASKS

Conducts research and prepares all Park and Recreation agenda items for review and action by the Board of County Commissioners; assures that all agenda items are properly written and in accordance with established guidelines.

Serves in a liaison capacity to the staff and members of the Board of County Commissioners and the County Manager's Office concerning agenda items and other departmental projects.

Supervises subordinate professional and clerical employees assisting in various aspects of intragovernmental administration.

Represents the Park and Recreation Department at all meetings of the Board of County Commissioners.

Conducts research and prepares all agenda items for review and action by the Park and Recreation and Arts Committee at regular monthly meetings.

Researches and prepares responses to inquiries from the Board of County Commissioners and the County Manager's Office concerning departmental projects, citizen complaints and other issues.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the principles of management and public administration.

Thorough knowledge of public relations principles and techniques.

Thorough knowledge of executive protocol and the proper order of etiquette in dealing with appointed and elected public officials.

Thorough knowledge of agenda items which are submitted to the Board of County Commissioners and Commission Committees.

Considerable knowledge of policies and procedures pertaining to the preparation of agenda items for the Board of County Commissioners.

Considerable knowledge of required formats for agenda items.

Knowledge of supervisory principles and practices.

Ability to deal tactfully and diplomatically with a variety of elected and appointed public officials.

Ability to review and prepare agenda items in accordance with established policies and procedures.

Ability to represent the department before various conferences, meetings and committees.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

##### NATURE OF WORK

This is administrative and specialized recreation work in assisting in the development and direction of a specialized phase of the county recreation program.

Work involves responsibility for planning, developing and coordinating a specialized activity of high organization and wide participation for the county recreation program. The incumbent assists the Recreation Superintendent in developing and administering the specialized activity as a compliment to the overall program. Work includes analysis of existing facilities and utilization of present recreation resources and planning for future developments of the specialty within budgetary limitations. The employee exercises considerable initiative and independent judgment gained through prior experience in the field for which employed, in promoting, organizing and supervising the specialty at an operational level. Supervision is exercised directly or indirectly over subordinate Recreation Center Directors, instructional and related personnel. Administrative supervision is received from the Recreation Superintendent and District Recreation Supervisor, who reviews work primarily for attainment of desired recreation objectives.

##### ILLUSTRATIVE TASKS

Plans, organizes and directs the promotion and administration of a specialized phase of the recreation program including music, arts and crafts, dramatics, special events and pageants, pre-school, boy's and men's activities, girl's and women's activities, aquatics, camping and nature study, and related special activities requiring a high degree of organization.

Confers with Center Directors and instructional personnel in planning the effective use and future development of special activity; prepares program procedures and conducts classes for instructional personnel on program methods; gives advice and assistance on unusual or difficult problems.

Prepares an overall budget for the specialty with special statistical and narrative reports as supporting information.

Conducts continuing research and related studies in the field assigned and recommends action to be taken to meet the needs of his jurisdiction.

Demonstrates and explains techniques, procedures, materials and equipment associated with the specialty.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices, procedures and techniques of the special recreation activity or activities in the field for which employed.

Considerable knowledge of principles, practices and procedures of public recreation, including an understanding of the current activities which make up a community recreation program.

Considerable knowledge of the facility, equipment and personnel requirements needed to staff the specialized activity on a wide geographical basis.

Ability to plan, supervise and direct the activities of a moderate sized group of recreational personnel in a manner conducive to full performance and high morale.

Ability to work with and obtain the cooperation of civic groups and the general community.

Ability to prepare and submit reports.

#### Job Specifications

##### NATURE OF WORK

This is specialized and supervisory retail sales work in managing the daily operation of a small public service and revenue producing facility in a specific geographical area.

Employees in this class are typically responsible for the daily operation of a small facility engaged in the sale of a moderate variety of food, beverage, sundry, and confectionary items or golf services. Emphasis is on the efficient and effective utilization of methods and procedures applicable to successful retail sales activities. Work involves considerable public contact and over-the-counter selling. Supervision is exercised over subordinate employees engaged in food, beverage, sundry and confectionary preparation and sales. General supervision is received from an administrative superior or facility manager who reviews operations through field inspection, written and verbal directives and staff conferences to determine conformance with departmental policies, procedures and objectives.

##### ILLUSTRATIVE TASKS

Supervises greenskeeping and landscaping activities at a small golf course; collects required fees and maintains appropriate records; determines requirements of planting and mowing for the facility to insure proper maintenance for patron use.

Manages daily operation of a food service facility; assigns, schedules and reviews work of subordinates; insures accurate recording of cash receipts and sales transactions; orders necessary items for operational needs; maintains appropriate physical inventories.

Investigates customer requests in order to improve service and increase sales.

Inspects equipment to determine maintenance needs; supervises custodial maintenance; insures proper sanitation of food preparation, storage and service areas.

Participates in any and all activities of the facility as necessary due to work load.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of departmental procedures and policies.

Knowledge of the principles and practices of sanitation and personal hygiene as applied to food preparation, storage and service.

Knowledge of food preparation and the use and care of food service equipment and related utensils.

Knowledge of principles and practices of retail sales as related to food or golf services.

Knowledge of golf course operations including greenskeeping, pro-shop sales and scheduling of play.

Knowledge of rules and etiquette of golf.

Knowledge of growth characteristics and effective disease treatment of various types of trees, grasses and plant life indigenous to South Florida golf courses.

Knowledge of principles and practices of supervision.

Ability to supervise work of subordinates in a manner conducive to full performance and high morale.

Ability to maintain accurate cash sales and receipt records.

Ability to estimate for and secure appropriate inventories.

Ability to establish and maintain effective working relationships with subordinates, vendors and the general public.

Ability to operate equipment utilized in the facility's daily operations.

Skill in the use of special motorized golf course equipment.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in management of a large and complex revenue-producing public service facility. Employees in this class are responsible for management and supervision of operational and maintenance needs of a major revenue-producing facility heavily utilized by the public and generating substantial income. Primary emphasis is on the effective and efficient utilization of supplies, staff and equipment in providing quality service to a large number of patrons. Work also involves interpretation and implementation of departmental policies and procedures required for an efficient leisure type service operation. Incumbents exercise considerable judgment and initiative in solving operational and maintenance problems. Supervision is exercised over subordinate facility managers and support personnel engaged in restaurant service, golf course operation and maintenance, or special technical services. General supervision is received from an administrative superior who reviews plans and procedures to determine the quality and efficiency of operations and service to the public.

##### ILLUSTRATIVE TASKS

Supervises subordinate facility manager and support personnel engaged in the purchasing, preparation, storage and serving operations of a large full-service restaurant and bar.

Plans menus for breakfasts, luncheons, dinners and short orders; plans and directs catering and banquet services for the facility; determines proper portion control for all meals and beverages served; analyzes and adjusts menus according to patron desires.

Supervises subordinate managerial and support personnel engaged in operation and maintenance of an 18-hole regulation golf course; schedules employee work assignments to meet patron demands for use of the facility; reviews work for conformance to departmental procedures and objectives.

Conducts analyses to determine operational efficiency in relation to customer satisfaction; analyzes and recommends alternative methods and practices to increase sales through customer use; resolves customer complaints.

Insure maintenance of accurate cash and sales records and fee collections.

Determines and plans short and long range maintenance requirements; prepares bid specifications for new equipment specific to the assigned facility.

Develops and implements procedures to increase employee productivity.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of departmental policies and procedures.

Thorough knowledge of methods and techniques used in all aspects of golf course pro-shop operation, equipment sales and landscape maintenance.

Thorough knowledge of the chemicals and equipment used in golf course landscape maintenance.

Thorough knowledge of golf course design, construction, turf maintenance, golf rules and etiquette of play.

Thorough knowledge of methods and techniques used in all aspects of large restaurant and bar operation and maintenance.

Considerable knowledge of the planning and implementing of various golf programs and tournaments.

Considerable knowledge of menu preparation and planning.

Considerable knowledge of health precautions necessary in large scale food preparation and service.

Considerable knowledge of the principles and practices of supervision.

Knowledge of State, Federal and local laws regulating the purchase and sale of alcoholic beverages.

Knowledge of pricing of products to increase sales and revenue.

Knowledge of bookkeeping principles and practices.

##### NATURE OF WORK

This is professional and supervisory work with administrative responsibility in the management of moderately complex metropolitan parks or a community service zone.

Employees in this class are responsible for supervising the operation of moderately complex metropolitan parks or community service zones with moderately complex recreation programs and facilities such as ballfields, tennis centers, recreation centers, handball courts, pools and parks. Emphasis of the work is on planning and supervising the work of subordinate park and recreation managers, zone or park maintenance, revenue producing activities, and program development and administration. Duties include program planning and implementation, community meetings, coordination of moderately complex special events, and maintenance activities. Work is performed with considerable independence of action in accordance with departmental rules, regulations and program policy. Supervision is exercised over subordinate park and recreation supervisors, maintenance supervisors, and recreational specialists engaged in recreational programming and facility maintenance. Supervision is received from a senior park and recreation supervisor who reviews work for achievement of desired objectives through periodic zone or facility inspections, personal conferences and written reports.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate park and recreation managers engaged in supervising recreation and maintenance programs consisting of organized athletic events, games, instructional classes and facility maintenance.

Coordinates activities of roving crews engaged in landscape maintenance procedures such as pruning, transplanting of large plant materials or tree removal; reviews work orders for repair of equipment or facilities; evaluates needs for renovation or replacement of facilities or equipment.

Coordinates diversified program events in a community service zone or metropolitan park; directs subordinate staff engaged in organizing competitive team sports activities; schedules special events.

Assists subordinates in program administration at a group of neighborhood parks or a small metropolitan park; provides assistance with difficult or unusual problems; coordinates safety and energy conservation programs.

Organizes and supervises recreational programs to satisfy community interests and needs; conducts tournaments in various athletic events; participates in rules committee work; develops programs in handicraft or dancing; handles publicity and awards to promote interest and participation.

Coordinates the activities of a number of roving crews assigned to a maintenance district; inspects parks, determines maintenance procedures; prepares reports and monitors budget expenditures.

Attends conferences and workshops to exchange information; develops new services and coordinates efforts with other agencies to reduce duplication of services.

Participates in policy development, recommends new methods, programs and equipment and develops procedures to increase recreation and maintenance efficiency.

Prepares annual budget estimates and monitors expenditures; requisitions equipment and supplies and prepares periodic reports.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### Job Specifications

##### NATURE OF WORK

This is professional and supervisory work with administrative responsibility in the management of a large metropolitan park or a complex community service zone.

Employees in this class are responsible for supervising the operation of large metropolitan parks or complex community service zones with complex recreation programs and facilities such as stadiums, lakes, atoll pools, equestrian centers, marinas, tennis centers, ballfields and handball courts. Emphasis of the work is on planning and supervising the work of subordinate park and recreation managers, complex zone maintenance, revenue producing activities, and program development and administration. Duties include program planning and implementation, community meetings, coordination of complex special events and complex maintenance activities. Work is performed with considerable independence of action within the scope of departmental rules, regulations and program policy. Supervision is exercised over subordinate park and recreation supervisors, maintenance supervisors and recreational specialists engaged in recreational programming and facility maintenance. Supervision is received from a senior park and recreation supervisor who reviews work for achievement of desired objectives through periodic zone or facility inspections, personal conferences and written reports.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate park and recreation supervisors engaged in supervising specialized programs in moderately complex metropolitan parks.

Plans and develops recreation program framework; delegates program planning tasks to subordinate managers and coordinates program implementation; evaluates program effectiveness and makes recommendations to superiors concerning changes in program objectives. Assists subordinates in program administration at a complex or moderately complex metropolitan park; provides assistance on unusual or difficult problems; coordinates and monitors safety and energy conservation programs.

Meets with community leaders to discuss overall recreation needs; discusses program deficiencies and conducts large-scale publicity campaigns to promote program interest and participation; handles sensitive or unusual community criticisms.

Attends conferences and workshops to exchange information, develop new services and coordinate efforts with other agencies to reduce duplication of services.

Participates in policy development; recommends new methods, programs and equipment; develops procedures to increase recreation and maintenance efficiency.

Prepares annual budget estimates and monitors expenditures; requisitions equipment and supplies and prepares periodic reports.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of principles, practices and techniques of public park and recreation operations.

Thorough knowledge of the various activities which make up a comprehensive recreation program and of the equipment requirements of all common recreation activities.

Thorough knowledge of maintenance requirements of parks, playgrounds, athletic fields, pool facilities and other recreational facilities.

Thorough knowledge of the safety hazards inherent in the use of the types of complex facilities to which assigned and of necessary precautionary measures.

Considerable knowledge of community characteristics and particular programming needs.

Considerable knowledge of animal, fish and plant life found in the park and surrounding area.

#### NATURE OF WORK

This is specialized management work in park and recreational facility operations.

Employees in this class research and plan park and recreational development, assist supervisory staff with administrative and operational functions and analyze departmental services to insure efficiency and economy. Work involves research, investigation, inspection and report writing to present recommendations and proposals for management information and departmental action. Duties require the exercise of independent judgment and initiative in studying diversified park and recreational activities and in applying management principles to serve the public effectively. Indirect supervision is exercised over facility supervisors through training and assisting in operational techniques and in determining requirements and standards for public service. Work is subject to review through conferences, inspections and analysis of unit operating reports to determine efficiency, public acceptance and conformity with departmental policy.

#### ILLUSTRATIVE TASKS

Compiles and analyzes data necessary for planning and locating park and recreational facilities; utilizes information on population, land valuation, road network, zoning and master plan projection for the metropolitan area.

Trains and assists facility supervisors with inventory selection, pricing, equipment utilization and maintenance; prepares specifications for revenue merchandise and contractual services.

Assists a principle administrative superior with activities in budget administration cost reduction, equipment replacement programming, personnel requirements, maintenance and construction control and field studies to implement new methods and procedures.

Conducts briefing and conferences to disseminate departmental policies, new procedures and regulations to park managers and recreation center directors; explains directives and discusses techniques for utilization, maintenance and improvement of various services and facilities for the public.

Answers correspondence, gathers necessary information from operating units of the park and recreation program, submits reports and recommendations to administrative staff.

Investigates matters referred by the public; determines the feasibility of establishing various art and craft programs, community recreation services, camping and nature study activities.

Relieves facility supervisors during peak demand periods, assists with supervision and training of attendants and recommends needs to division superintendent.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles of management and their application to governmental services.

Considerable knowledge of the techniques and methods of administering a large and diversified public park and recreational program.

Knowledge of the operating and maintenance requirements of varied facilities, equipment and activities typically used in sports, recreation and park programs.

Knowledge of the techniques used to gather information through research, investigation and inspection.

Ability to analyze operating problems and to implement procedures to improve efficiency and economy.

Ability to prepare and submit precise reports and recommendations on varied activities within the area of assignment.

Ability to conduct relations with the public in a courteous and tactful manner.

Ability to project the operating requirements for new and expanded public services in varied park and recreational programs.

##### NATURE OF WORK

This is specialized management services work in park and recreation administration.

Employees in this class research, plan and execute diversified and responsible assignments in site location, facility development, financial analysis, feasibility studies and similar projects related to the operation and expansion of a comprehensive park, cultural, zoological and recreational program for the metropolitan area. Work involves responsibility for compiling and evaluating data from varied sources, developing comprehensive reports and recommendations, supervising the implementation of new operating procedures and measuring the effectiveness of results. Duties require the application of specialized experience and training in park or recreation administration as well as the use of considerable independent judgment in determining the most efficient and economical procedures to be carried out. Supervision may be exercised over subordinate administrative, departmental specialists and clerical staff by assignment and review of work upon completion. General supervision is provided by a management superior who reviews work through conferences and written reports to determine the feasibility of recommendations and the effectiveness of administrative activities carried out.

##### ILLUSTRATIVE TASKS

Serves as principal assistant to the chief administrative officer; prepares leases, contracts, bid proposals, equipment specifications, bid analysis reports, insurance liability claim reports and similar documents required by the department.

Serves as administrative assistant to the assistant department head; conducts independent field studies of operating problems pertaining to citizen complaints, analysis of new products and equipment and requests for services from other governmental agencies.

Performs varied assignments in all operating facilities of a major departmental division; assumes responsibility for directing the parks division, in absence of the superintendent; coordinates major functions of the division, administers division budget, expedites work orders and reassigns personnel as required.

Devises and implements procedures for the collection of research data needed in the planning of facility location, public services and future expansion.

Researches sources of state and Federal financial assistance available for park, recreational, landscaping and cultural facilities to be located within the metropolitan area.

Assists in the development of the metropolitan area park and recreation master plan; confers with other governmental agencies engaged in planning, zoning and building subdivision control.

Meets with civic and neighborhood groups to explain departmental policies and programs; determines the recreational interests and needs of the particular area.

Assists in determining programs to be financed through franchise fund bond issue projects.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles of management and their application to the administration of governmental affairs.

Considerable knowledge of the methods and procedures of public park and recreation administration.

Considerable knowledge of research techniques and the various sources of available information in the assigned field.

Knowledge of the operating and maintenance requirements of varied public facilities, equipment and supplies typically used in sports, recreational and park programs.

Knowledge of the basic concepts of urban planning as applied to park and recreational facilities.

Knowledge of the basic concepts of administrative analysis and office management.

Ability to exercise judgment and discretion in establishing, applying and interpreting departmental policies and procedures.

Ability to initiate and install administrative programs and procedures and to evaluate their effectiveness.

Ability to research information, evaluate data and prepare concise reports on varied operating activities.

Ability to carry out effective public relations with varied groups and individuals.

Ability to supervise professional and supporting personnel in a manner conducive to full performance and high morale.

### Deering Estate Natural Resources Program Manager (007351)

#### Minimum Qualifications

Bachelor's degree in Biological Sciences. Three years of professional experience in biological resources fieldwork to include the study of conservation of historic and archeological resources are required. Must possess an Arborist certification.

#### Job Specifications

##### NATURE OF WORK

This is supervisory professional biology work with administrative responsibility in biological programs in the conservation and management of natural areas and landscaped grounds of the Deering Estate for the Park and Recreation Department.

An employee in this class supervises and coordinates biological programs related to the conservation and management of natural, historic, cultural and architectural resources found within the natural areas of the Deering Estate. Responsibilities include coordination of environmental, biological, archeological and preservation programs, planning of comprehensive evaluation studies, and administrative duties in the requisition of materials and recommendation of new procedures. Typical assignments are broad in scope with considerable opportunity for exercising independent judgment and making complex decisions. Supervision is exercised over a group of professional and technical employees. General supervision is received from a professional superior employee who reviews results for conformity with departmental policies, practices and regulations and for attainment of desired objectives.

##### ILLUSTRATIVE TASKS

Plans, designs and supervises biological programs in the conservation and management of natural areas and landscaped historic grounds in accordance with the landscape plan of the Deering Estate.

Supervises and guides professional, technical and administrative assistants by delegation of assigned projects and review of completed work for quality of results.

Assists in developing ecotourism programs compatible with site resources to provide regional, national and international opportunities for learning.

Plans and coordinates educational programs for college level students, post-graduate students and adult programs on natural areas in conjunction with higher public and private educational institutions. Develops seminars, workshops and training sessions for technical specialist, staff and the general public on Deering Estate resources.

Directs the preservation and protection of natural areas containing endangered species, historic ground and archaeological resources and directs complex microbiological investigations seeking to determine impact from exotic species.

Directs and participates in the development of grant applications related to resource management and oversee the management of grant funded projects.

Updates and develops field and laboratory procedures; develops quality control techniques, analyzes sampling and testing procedures.

Purchases needed materials for the Deering Estate natural areas.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the science of biology in the areas of assignment, including basic principles and techniques of biological investigation and analysis.

Thorough knowledge of current trends and research in terrestrial, aquatic and marine biology in tropical environments.

Considerable knowledge of laws, regulations, ordinances, procedures and guidelines required for the protection and restoration of environmentally sensitive ecosystems.

Considerable knowledge of the protection and restoration of archaeological and fossil sites.

Ability to organize and direct complex biological programs in a manner conducive to full performance and high morale.

Ability to plan, conduct and evaluate research, experiments and studies.

Ability to establish and maintain good public relations through contacts with individuals, organizations and representatives of other agencies.

Ability to develop improved quality control, sampling and testing techniques.

Ability to express ideas clearly and concisely, orally and in writing.

### Tennis Facility Manager (007353)

#### Minimum Qualifications

Bachelor's degree in Sports Administration, Business Administration, Public Administration, Park and Recreation Management, or a related field. Three years of experience in the supervision and management of a large sports complex are required. Additional experience in sports administration or park and recreation management or a related field may substitute for required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is responsible supervisory work in the management of the Crandon Park Tennis Center.

An employee in this class is responsible for the management, supervision, programming and maintenance of a large tennis center and stadium complex. Responsibilities include the effective and efficient utilization of staff and equipment in providing quality service to a large number of patrons, interpreting and applying departmental policies and procedures required for efficient leisure services operations, overseeing scheduling of events to be held in the stadium facility, and maintaining working relationships with various tennis organizations and the public. The incumbent exercises considerable independent judgment in solving operational, programming and maintenance problems. Supervision is exercised over subordinate supervisors and support employees engaged in various phases of operations. General supervision is received from an administrative superior who reviews work for effective management of the tennis center and quality of service to the public.

##### ILLUSTRATIVE TASKS

Supervises subordinate supervisors and support employees engaged in tennis facility service, clubhouse operation and maintenance, purchasing, special technical services, pro shop sales, and maintenance of clay, hard courts and grass courts.

Plans tennis programs, clinics, tournaments and clubhouse rental.

Oversees the maintenance and scheduling of events to be held in the stadium facility.

Schedules employee work assignments to meet demands of patrons for use of the facility.

Markets tennis activities and available facilities to the public including appropriate tennis organizations and potential corporate clients.

Develops facility goals and objectives, and long-range plans for the development of tennis operations and activities.

Assures maintenance of accurate cash and sales records and fee collections; develops annual operating budget for facility.

Evaluates short and long-range maintenance requirements; prepares bid specifications for new equipment specific to the facility.

Analyzes customer satisfaction with facility operations, makes recommendations for alternatives to increase sales through patron use, and resolves customer complaints.

Establishes and maintains effective working relationships and administers pertinent terms of contractual agreements between the Lipton Championship and the United States Tennis Association.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the operational and maintenance requirements of a large and complex tennis center and stadium complex.

Thorough knowledge of techniques and equipment used in landscape and tennis court maintenance.

Thorough knowledge of the planning and implementation of tennis programs and tournaments.

Considerable knowledge of tennis court design, construction, turf, clay and hard-court maintenance.

Considerable knowledge of tennis rules and etiquette.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of public relations principles and techniques.

Ability to manage and supervise the operation and maintenance of a large tennis center and stadium complex.

Ability to establish and maintain effective working relationships with subordinates, superiors, the public, and representatives of private tennis organizations.

Ability to maintain revenue, inventory and activity records.

### Horticultural Specialist (007354)

#### Minimum Qualifications

High school diploma or GED. One year of experience in interior landscaping to include supervisory experience is required. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in landscaping for County offices and facilities.

An employee in this class supervises a small staff and participates in the design and maintenance of interior landscape projects.

Responsibilities include supervision of a subordinate staff engaged in cultivating, installing and maintaining indoor landscape materials, and may include supervising the operation of landscape equipment and the maintenance of a container nursery. Related duties consist of applying pesticides and insecticides, requisitioning various materials, and training employees in indoor plant care. Supervision is received from an administrative superior who reviews work for completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of a staff of equipment operators, semi-skilled laborers and laborers assisting in interior plant installation and maintenance.

Occasionally supervises the operation of mowers, tractors, edgers and other equipment, and the maintenance of a container nursery.

Supervises and participates in plant cultivation, identification, propagation, acclimation and rotation.

Supervises and participates in planting, transplanting, fertilizing and cutting flowers and plants, removing weeds, diagnosing and controlling plant diseases, and the application of pesticides and insecticides to combat insects, fungi, parasites and other pests.

Prepares layouts and installs plants for assigned areas of responsibility; experiments with new plants, products and techniques.

Plans and conducts training sessions on indoor plant care for various departments.

Requisitions equipment, materials and supplies required for work assignments; trains employees in proper use of equipment and materials; prepares a daily supervisor report and completes other forms and reports as required.

Communicates and enforces established safety measures and instructs subordinates in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of indoor landscaping and container nursery methods and techniques.

Knowledge of supervisory principles and practices.

Knowledge of plant diseases and pests.

Knowledge of pesticides and insecticides used to combat pests and preserve plants.

Knowledge of established safety practices and procedures.

Some knowledge of the operating characteristics and maintenance requirements of equipment used in landscape work.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to keep records and prepare routine reports.

Ability to recognize plant diseases and pests.

Skill in the use of landscape equipment and garden tools.

Physical agility sufficient to perform assigned duties.

NEW 1-84

### Horticulturist (007355)

#### Minimum Qualifications

Bachelor's degree in Horticulture or related field. Two years of experience in the development and operation of a horticultural program in a governmental program or commercial enterprise are required.

#### Job Specifications

##### NATURE OF WORK

This is professional and supervisory work in the development of a horticultural program in the Park and Recreation Department. An employee in this class is responsible for developing a department-wide horticultural program to assure the growth and healthy development of non-turf plant materials at the various metropolitan parks, community parks and other park facilities. Responsibilities include supervising field and container nursery operations, reviewing horticultural matters with a variety of department officials, purchasing horticultural materials and coordinating plant material propagation and acquisition activities. Supervision is exercised over a staff of supervisors, equipment operators, semi-skilled and unskilled laborers engaged in various phases of the program. Supervision is received from a technical and administrative superior who reviews work for effective on-going development and implementation of the horticulture program through personal conferences, written reports and observation of field activities.

##### ILLUSTRATIVE TASKS

Supervises through a subordinate supervisor an extensive plant and tree and tree nursery operation including pruning and transplanting of trees and shrubs, pruning and trimming of trees, and weed control in the field and container nurseries.

Develops a comprehensive department-wide horticulture program to assure the growth and healthy development of plants, trees shrubs and other non-turf materials.

Consults with a variety of park and recreation officials concerning horticultural matters pertaining to their respective areas of responsibility.

Analyzes horticultural needs and purchases horticultural materials for nursery and field operations.

Works with landscape architects and landscape supervisors in the selection, propagation and installation of plant material; reads landscape plans prepared by landscape architects and determines horticultural materials required and physical arrangement of landscaping; assists in installation and authorizes substitution of horticultural materials or relocations as needed.

Coordinates plant material propagation and acquisition with other horticultural programs of other jurisdictions.

Examines horticultural materials to determine the presence of plant and tree diseases and pests.

Prepares a variety of reports, forms and requisitions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the theory, principles and practices of modern Horticulture.

Considerable knowledge of park and recreation landscape operations.

Considerable knowledge of the location and nature of park and recreation horticultural areas and facilities.

Considerable knowledge of plant and tree diseases and pests.

Considerable knowledge of the operation of extensive plant and tree nurseries.

Knowledge of supervisory principles and practices.

Knowledge of established safety practices and procedures.

Ability to develop and implement a comprehensive horticultural program.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to recognize plant and tree diseases and pests.

Ability to keep records and prepare reports.

Ability to express ideas clearly and concisely, verbally and in writing.

### Landscape Architect 2 (007358)

#### Minimum Qualifications

Bachelor's degree in Landscape Architecture. Must possess a State of Florida Landscape Architect license and have three years of professional experience in landscape architecture; OR Must be licensed as a Landscape Architect in another state, which would include having passed the Landscape Architecture Registration Examination (LARE), with three years of professional experience in landscape architecture. Must obtain a State of Florida Landscape Architect license within the one year probationary period. Must possess a Driver license. Applicants qualifying for employment with the Miami-Dade Aviation Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification and such other procedures as may be mandated by federal law. The security clearance required by the federal law is a continuing condition of employment.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional landscape design work with some supervisory responsibility in the preparation of plans, drawings, and specifications for the functional and ornamental development of parks, recreational and related areas.

Work involves the applications of advanced professional knowledge and site planning skills to the design, construction and inspection of varied engineering and landscaping projects. Considerable independent judgement and creativity is exercised in determining the comprehensive park and recreational design for a project area and in finalizing work plans, specifications and cost estimates for site preparation and landscaping work. Work may involve the coordination of survey crews, construction forces and design personnel engaged in major construction and modification work. Supervision is occasionally exercised over subordinate professional landscape design and drafting personnel by providing advice and assistance on unusual or difficult assignments. A professional superior reviews work primarily for compliance with completion schedules and general departmental policy.

##### ILLUSTRATIVE TASKS

Supervises the design, construction and maintenance and development of landscape projects throughout the parks system; makes preliminary surveys; lays out general plans, assigns design details to an assistant; reviews final plans; draws up contracts; acts as County representative in dealings with private contractors; inspects contractual work.

Supervises and schedules work for land survey party in the laying out of parking areas, roads, utilities, drainage systems, sanitary systems; supervises plane table surveys to record utilities and structures throughout the parks systems.

Performs varied landscape architectural work in such areas as golf courses, beaches and hammocks, nature trails, swimming pools, picnic areas, parkways, marinas, camp sites and similar facilities having specialized landscape requirements.

Exercises professional judgment in developing planting policies and programs, and in coordinating the nursery stock supply with future planting needs.

Confers with architectural and engineering staff to coordinate all phases of structural, excavation, design, construction and inspection work on force account and contractual projects.

Submits comprehensive recommendations for the acquisition of lands for park development including land use plans; prepares narrative reports and justification for recommendations which may include sketches, renderings, and photographic overlays.

Maintains up-to-date plans on each project as modifications and adjustments are made in policy and general use planning.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and practices of landscape architecture.

Considerable knowledge of the principles and practices of civil engineering.

Considerable knowledge of the plant life of the local area including ornamental and hybrid species.

Knowledge of the theory, principles and practices of horticulture, entomology and plant pathology.

Ability to make engineering and related mathematical computations.

Ability to take charge of engineering or survey projects in field or office and to obtain adherence to plans and specifications.

Ability to make cost and material estimates for projected construction.

Ability to review, revise, and prepare plans and designs for a wide variety of park facilities.

### Landscape Architect 2 (007358)

Ability to communicate ideas clearly and concisely, orally and in writing.

Ability to plan, schedule, and supervise the work of professional, technical and clerical subordinates in a manner conducive to full performance and high morale.

Skill in drawing architectural and excavation plans.

NEW 10-64

#### **Nature Of Work**

This is advanced professional landscape design work with some supervisory responsibility in the preparation of plans, drawings, and specifications for the functional and ornamental development of parks, recreational and related areas.

### Landscape Architect 3 (007359)

#### Minimum Qualifications

Bachelor's degree in Landscape Architecture. Five years of professional landscape architecture experience are required. Must possess a State of Florida Landscape Architect license.

#### Job Specifications

##### NATURE OF WORK

This is responsible landscape design work with some administrative responsibility in the supervision of the plans and designs section of a large metropolitan area department of parks and recreation.

The Landscape Architect 3 is responsible for coordinating the total program of park and recreation site selection and development, landscape design, preliminary engineering improvements, and preparation of plans and specifications and inspection of work. Work responsibility also includes determining functional space requirements, elevations and preliminary design for all proposed structures, which are prepared in a manner compatible with the purpose of the park site and the natural environment of the area. Considerable discretion and independent judgment are exercised in presenting comprehensive park and recreation development plans to the highest levels of department management. Supervision is exercised over professional landscape architects, drafters and engineering subordinates through assignment and review of work projects and by personal participation in unusual or highly complex design problems. Work is reviewed by the director of the department primarily for the attainment of desired objectives and conformance with general administrative policy.

##### ILLUSTRATIVE TASKS

Supervises, through subordinate professional staff, the development of plans, specifications and landscaping designs for all existing and proposed park and recreational facilities.

Recommends the use of force account or competitive bid award for proposed work projects; draws contract agreement, recommends contractor to receive bid, inspects work for compliance with specifications.

Participates in interdepartmental conferences on matters pertaining to the development of a master plan for land use, property acquisition, sub-division regulation, neighborhood improvement, zoning control, and conservation of natural scenic beauty.

Confers with high level departmental officials to discuss matters of site acquisition, expansion of facilities and major modifications of existing park and recreational areas.

Researches horticultural and botanical sources of information to revise and improve quality and species of nursery stock and landscaping materials.

Recommends structural and architectural features to be utilized in construction plans; interprets park and recreational requirements into functional structural designs and submits to County Engineer.

Supervises the preparation of final working plans for park area excavation, disposition of fill, survey work, grading, irrigation systems and local drainage improvements.

Prepares preliminary budget request for the work unit;

recommends staff changes, the purchase of equipment and supplies and the development of operating procedures for the department.

Assists other County departments on all phases of landscape design and matters related to area beautification.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the principles and practices of landscape architecture.

Extensive knowledge of the plant life of the local area including ornamental and hybrid species.

Considerable knowledge of the principles and practices of civil engineering.

Considerable knowledge of the theory, principles and practices of horticulture, entomology and plant pathology.

Considerable knowledge of current trends, research projects and sources of information in the field of landscape architecture.

Ability to make engineering and related mathematical computations.

Ability to make cost and material estimates for projected construction.

Ability to plan, schedule and supervise the work of professional, technical and clerical subordinates in a manner conducive to full performance and high morale.

Ability to render professional review to comprehensive plans for park and recreation site development and utilization.

##### NATURE OF WORK

This is supervisory landscaping and grounds maintenance work at various county properties and installations.

Employees in this class supervise and participate in landscaping and grounds maintenance activities at metropolitan parks, community parks, roadway median strips and other locations. Duties include supervising a small staff engaged in the operation of landscape and grounds maintenance equipment, picking up trash, planting landscape materials and fertilizing trees and shrubs according to prescribed instructions. Supervision is exercised over a crew of equipment operators, attendants, laborers, and may include volunteer or contract workers, and prison inmates. Supervision is received from a technical or administrative superior who reviews work for proper landscaping techniques and proper care and maintenance of assigned areas.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of equipment operators, laborers, attendants, volunteer and contract workers, and prison inmates, engaged in landscaping and grounds maintenance activities at metropolitan parks, community parks, roadway median strips and other locations; supervises and inspects the work of private firms under contract to perform landscape maintenance in specific areas.

Supervises and participates in the operation of mowers, tractors, edgers and other equipment, picking up trash, raking leaves, removing weeds, planting landscape materials, fertilization, and controlling of insect pests and turf diseases.

Supervises and participates in propagating, cutting, planting, transplanting and fertilizing trees, shrubs, flowers and plants according to detailed instructions.

Requisitions equipment, materials and supplies required for work assignments; trains employees in proper use of equipment and materials.

Prepares a daily supervisors report and completes other forms and reports as required.

Supervises the application of pesticides and insecticides to trees, shrubs, grasses, flowers and plants to combat insects, fungi, parasites and other pests.

Communicates and enforces established safety measures and instructs subordinates in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of landscape gardening and grounds maintenance methods and techniques.

Knowledge of supervisory principles and practices.

Knowledge of the operating characteristics and maintenance requirements of equipment used in landscape work.

Knowledge of the geography of Metropolitan Dade County.

Knowledge of plant, tree and grass diseases and pests.

Knowledge of pesticides and insecticides used to combat pests and preserve trees, shrubs and grasses.

Knowledge of established safety practices and procedures.

Knowledge of ballfield maintenance including dragging ballfields, adding clay, and other maintenance requirements.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to keep records and prepare routine reports.

Ability to recognize plant, tree and grass diseases and pests.

Ability to obtain a Public Operator's Pesticide Applicator license from the State of Florida.

Skill in the use of landscape tools and equipment.

Physical agility sufficient to perform assigned duties.

#### Job Specifications

##### NATURE OF WORK

This is supervisory landscape and grounds maintenance work with some technical responsibility at various county properties and installations.

Employees in this class supervise a moderate-sized staff and participate in landscaping and grounds maintenance activities at metropolitan parks, community parks, roadway median strips and other locations. Duties frequently include the supervision of several crews engaged in landscape and grounds maintenance over a large geographical area. Incumbents generally supervise landscape and grounds maintenance of a combination of large metropolitan parks, community parks, special activity parks, and roads and trails which are equal to a large area of acreage. Employees exercise some independent judgment and decision making within their assigned responsibilities. Supervision is exercised over a staff of equipment operators, technicians, and laborers, which may include volunteer and contract workers and prison inmates, and occasionally subordinate supervisors. Supervision is received from a technical or administrative superior who reviews work for completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Supervises a moderate-sized staff of subordinate equipment operators, attendants, technicians, laborers, volunteer and contract workers, and prison inmates frequently split into two or more crews responsible for landscape and grounds maintenance activities covering a large geographical area; supervises and inspects the work of private firms under contract to perform landscape maintenance in specific areas.

Supervises a less extensive staff and a smaller geographical area where strict requirements for intensive landscaping and maintenance of beautified areas open to the public exist, and where tasks may include frequent mowing, edging, weeding, spraying, hedge trimming, watering, cleaning and restoration.

Supervises and participates in the work of a moderate to large sized staff of subordinates in a landscaping construction activity including tree planting, relocation, root pruning, sodding, seeding on a project-by-project basis; consults with landscape architects in the interpretation of landscape plans and in coordinating the installation of plant materials.

Plans and supervises landscape renovation projects and the establishment of new landscape or turf areas.

Supervises the application of pesticides and insecticides to trees, shrubs, grasses, flowers and plants to combat insects, fungi, parasites and other pests.

Supervises the work of a specialized crew of tree trimmers and laborers engaged in trimming, pruning, and removing trees over an extensive geographical territory.

Continually reviews landscape and grounds maintenance needs of assigned areas of responsibility.

Requisitions equipment, materials and supplies required for work assignments.

Prepares a daily supervisors report and completes other forms and reports as required.

Communicates and enforces established safety measures and instructs subordinates in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of landscape gardening and grounds maintenance methods and techniques.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of plant, tree and grass diseases and pests.

Considerable knowledge of pesticides and insecticides used to combat pests and preserve trees, shrubs and grasses.

Considerable knowledge of the park facilities and landscape and grounds maintenance requirements of the area of assignment.

### Landscape Supervisor 2 (007363)

Considerable knowledge of the specialized techniques used in landscape construction including tree planting, relocation and root pruning.  
Knowledge of the operating characteristics and maintenance requirements of equipment used in landscape work.  
Knowledge of established safety practices and procedures.  
Knowledge of ballfield maintenance including dragging ballfields, adding clay, and other maintenance requirements.  
Ability to supervise subordinates in a manner conducive to full performance and high morale.  
Ability to recognize plant, tree and grass diseases and pests.  
Ability to apply specialized landscape techniques and methods to landscape construction work.  
Ability to keep records and prepare routine reports.  
Ability to supervise the safe application of pesticides and insecticides.  
Ability to review landscape and grounds maintenance needs and initiate required actions.  
Ability to obtain a Public Operator's Pesticide Application license from the State of Florida.

Skill in the use of landscape tools and equipment.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and technical landscape and grounds maintenance work at various county properties and installations. Employees in this class supervise a large staff of subordinates, frequently through subordinate supervisors, engaged in landscaping and grounds maintenance activities at metropolitan parks, community parks, roadway median strips and other locations. Some employees may be assigned responsibilities for landscape construction activities or for supervision of an extensive county plant and tree nursery operation. Incumbents generally supervise landscape and grounds maintenance of a combination of large metropolitan parks, community parks, special activity parks and roads and trails which are equal to an extensive area of acreage. Employees exercise independent judgment in scheduling crews and equipment and in determining work methods and procedures. Supervision is exercised generally through subordinate supervisors, over a staff of equipment operators, attendants, technicians and laborers, and may include volunteer and contract workers, and prison inmates, frequently dispersed to several separate geographical locations. Supervision is received from a technical or administrative superior who reviews work for completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Supervises a large staff of subordinates, frequently through subordinate supervisors and composed of several separate crews, responsible for landscape and grounds maintenance covering an extensive geographical area; supervises and inspects the work of private firms under contract to perform landscape maintenance in specific areas.

Supervises a less extensive staff and a moderate to large-sized geographical area where requirements exist for intensive landscaping and grounds maintenance due to high public visibility or heavy public usage.

Supervises a moderate to large-sized staff of subordinates in various landscape construction, grounds maintenance and forestry activities on a project-by-project basis including insecticide and herbicide usage, fertilization of nursery and in-field plantings, controlled burning, exotic vegetation control, and exhibit and convention display.

Supervises an extensive county plant and tree nursery operation including pruning and transplanting of trees and shrubs, pruning and trimming of trees and weed control in the field and container nursery; consults with landscape architects in the selection of proper plant materials for various landscape construction projects.

Plans and supervises landscape renovation projects and the establishment of new landscape or turf areas.

Supervises the application of pesticides and insecticides to trees, shrubs, grasses, flowers and plants to combat insects, fungi, parasites and other pests.

Continually reviews landscape and grounds maintenance needs of assigned areas of responsibility.

Requisitions equipment, materials and supplies required for work assignments; trains employees in proper use of equipment and materials.

Prepares a daily supervisors report and completes other forms and reports as required.

Communicates and enforces established safety measures and instructs subordinates in occupational hazards and safety precautions.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of landscape gardening and grounds maintenance methods and techniques.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of the specialized techniques used in landscape construction including tree planting, relocation and root pruning.

Thorough knowledge of the operation of an extensive plant and tree nursery.

Considerable knowledge of plant, tree and grass diseases and pests.

Considerable knowledge of pesticides and insecticides used to combat pests and preserve trees, shrubs and grasses.

Considerable knowledge of the park facilities, and landscape and grounds maintenance requirements of the area of assignment.

### Landscape Supervisor 3 (007364)

##### NATURE OF WORK

This is specialized technical and supervisory work in park landscaping, parks engineering construction and the construction of public park and recreation facilities.

A Parks Maintenance Supervisor gives technical direction and field supervision in a wide variety of skilled functions required in the development and maintenance of park beautification, public works construction and maintenance, and the alteration and construction of a variety of structures throughout the county parks. The employee used independent judgment in determining methods and procedures of work and is responsible for the quality of the completed work. Assignments are received in oral or written form and are often accompanied by sketches, diagrams and blue-prints. Conferences are held with administrative superiors on planting policies and programs and the landscaping needs of the park system. Work is subject to inspection and review while in process and upon completion by the Parks Maintenance Chief, through field inspections, personal conferences and review of written reports.

##### ILLUSTRATIVE TASKS

Supervises, assigns and checks the work of skilled foremen and laborers engaged in such activities as: pruning, propagating, spraying, planting and transplanting, cultivating, and mulching trees and plants; supervises the operations of the nursery and arboretum.

Diagnoses plant and tree diseases and prescribes treatment; coordinates nursery stock with landscaping needs; assists in the planning and preparation of landscaping specifications, estimates costs of labor and materials.

Conducts continuous inspection program on all trees and plants to ascertain amount and type of fertilizer, weed killer, fungicide, insecticide, and irrigation requirements; provides for systematic maintenance of all landscaping through park system.

Supervises maintenance and construction jobs in the field; coordinates men and equipment on such activities as: filling and grading new park areas, roadway construction, driving piling in marina areas, clearing and dredging boat channels, digging garbage pits, setting electric poles, maintaining beaches, and constructing underground water lines, boat ramps and sea walls.

Coordinates equipment maintenance and repair with shop foreman in order to effect efficient scheduling with field crews; supervises pouring pre-cast concrete materials in the shop for use in the field.

Supervises skilled tradesmen in plumbing, electrical, refrigeration, carpentry, painting and masonry work in a variety of construction, alteration and repair activities in park structures.

Estimates costs of construction jobs, orders necessary materials and supplies; lays out work from plans and specifications, assigns jobs to trades foremen, and inspects completed jobs.

Participates in administrative staff conferences, conducts in-service training, prepares preliminary budget requests, and recommends the purchase of new material and supplies used in maintenance and construction work.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles, practices and procedures of landscaping forestry.

Considerable knowledge of the methods, tools and practices used in the propagation, planting, transplanting, digging and cultivation of nursery stock.

Considerable knowledge of the methods and practices of treating plants and trees for blights, fungi, insects, parasites and diseases peculiar to subtropical climates.

Considerable knowledge of the optimum conditions for growing all types of nursery stock, shrubs, plants, flowers and trees in a subtropical climate.

Considerable knowledge of the practices and techniques of public works construction and maintenance and the equipment typically used.

Considerable knowledge of the principles, methods, materials and equipment common to building construction.

Knowledge of the occupational hazards and the safety precautions of maintenance and construction work.

Knowledge of the applicable legal and administrative regulations relative to new building construction.

Ability to coordinate the large scale use of men, equipment and materials in geographically separated areas.

### Beach Maintenance Supervisor (007368)

#### Minimum Qualifications

High school. Four years of experience on beach maintenance operations to include supervisory experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and technical work in the maintenance of county beaches.

An employee in this class is responsible for supervising the maintenance of county beaches, and the repair and maintenance of related structures and facilities. Responsibilities include supervising county and contractual employees engaged in the maintenance of geographically separated county beaches, planning and scheduling beach maintenance work, determining and providing for equipment and supply requirements, and maintaining responsible contacts with various governmental agencies which have an interest in proper beach maintenance. Duties require the use of independent judgment in selecting work methods, scheduling maintenance work at a variety of locations and in supervising a geographically dispersed work force. Supervision is exercised through subordinate supervisors over a staff of equipment operators and attendants. Supervision is received from an administrative superior who holds the incumbent responsible for effective beach maintenance activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of a staff of supervisors, equipment operators, attendants, and contracted employees located at various beach locations, engaged in beach maintenance and in the maintenance and repair of beach structures and facilities.

Plans, organizes and establishes schedules for beach maintenance including sand contouring, erosion control, sand sifting and rock removal.

Plans, organizes and sets schedules for beach cleaning including placing trash receptacles, emptying trash receptacles, removal of litter to disposal site, removal and disposition of seaweed and removal and disposition of flotsam.

Determines equipment, supply and personnel requirements in support of maintenance operations; tests equipment, recommends modifications and develops specifications; maintains inventory of equipment, supplies and materials.

Monitors cost control system, table of organization, forecast of utilization of part-time employees and contracted labor records to assure efficient conduct of the maintenance operation.

Maintains contacts with various city and county agencies that are interested in proper beach maintenance; investigates, resolves or reports upon a variety of daily inquiries; coordinates maintenance work with beach safety units and security and law enforcement agencies.

Enforces established safety practices and procedures.

Plans, organizes and supervises maintenance and repair of structures and facilities on beaches including seawalls, signs, lifeguard stations, shelters and benches; schedules repair work as required.

Establishes a preventive maintenance and repair schedule for all heavy equipment including bulldozers, graders, sand shifters, trucks and tractors utilized in the maintenance operation; provides and operates maintenance base stations where equipment is located, stored, secured and serviced.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of beach maintenance principles, practices and techniques.

Considerable knowledge of the tools, equipment and materials used in beach maintenance and in the repair and maintenance of beach structures.

Considerable knowledge of the operating and maintenance characteristics of heavy mobile equipment used in beach maintenance.

Considerable knowledge of supervisory principles and practices.

Knowledge of the impact of surf and weather action on beach areas.

Knowledge of occupational hazards and safety precautions required in beach maintenance operations.

Ability to supervise a large staff of subordinates, in dispersed geographical locations, in a manner conducive to full performance and high morale.

Ability to establish and maintain schedules for beach maintenance and structural repair operations.

High school diploma or GED. Three years of experience in animal husbandry at a zoological park are required. Must possess a Driver license. Must be able to work days, nights, holidays, and weekends on a varied work schedule.

#### Job Specifications

##### NATURE OF WORK

This is advanced animal caretaker work with some supervisory responsibility at the Metropolitan Zoo.

Employees in this class are responsible for the supervision and performance of animal feeding and custodial care of a variety of creatures. Work involves the performance of the more technical animal care tasks in an assigned area, performing specialized animal care tasks, training animals for use in shows or presentations, and participating in cleaning and inspection of exhibit areas. Advice and assistance is provided to subordinate zookeepers in the routine care and feeding of animals. Supervision is received from a superior who coordinates assignments and inspects work for completeness of results.

##### ILLUSTRATIVE TASKS

Assists superiors in the performance of specialized animal care including baby and immature animal care, and medical care; assists in animal handling not of a routine nature, requiring knowledge of specific animal behavior.

Trains animals for use in shows or presentations; provides special animal handling and assistance in educational and research projects.

Provides advice and assistance to other employees and participates in routine inspections of assigned exhibit areas; monitors the health and safety conditions of creatures; removes harmful foreign objects from exhibit areas; checks to assure exhibit areas are escape proof and that special devices are in working condition.

Supervises and assists in cleaning exhibit areas, night sleeping compartments and surrounding areas; depending on nature of exhibit, cleans, rakes, scrubs, and applies any necessary sterilizing agents.

Prepares food for creatures; insures that correct portions of food and any additives were weighed as necessary.

Discusses with supervisors any observed peculiarities in behavior, appearance, gait or other conditions which may be early evidence of veterinary problems.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the custodial care and general habits of typical animals.

Considerable knowledge of animal handling and training techniques.

Knowledge of the food likes and dislikes of assigned animals.

Knowledge of custodial care requirements for keeping a variety of creatures.

Some knowledge of supervisory principles and practices.

Ability to train assigned animals.

Ability to present animal shows and presentations.

Ability and willingness to work with wild, delicate and, occasionally, dangerous creatures.

Ability to deal courteously and tactfully with the public.

Ability to perform specific custodial and minor veterinary care requirements of assigned creatures.

#### Nature Of Work

This is advanced animal caretaker work with some supervisory responsibility at the Metropolitan Zoo.

### Zoo Commissary Keeper (007403)

#### Minimum Qualifications

Eighth grade. One year of experience in a feed store or diet preparation in an animal facility or zoo is required. Must be able to lift 50 pounds.

#### Job Specifications

##### Nature of Work

This is specialized commissary work in the Metropolitan Zoo.

Employees in this class assemble food items needed for diet of various animals as directed by supervisory personnel. The incumbent is responsible for receiving items for everyday or special diets, storage of received or prepared items, sanitation of commissary, and diet preparation and delivery of food for animals at Miami Metro Zoo. Supervision is received from a superior who provides instructions on food requirements and commissary cleanliness; and reviews work for satisfactory completion of assignments.

##### Illustrative Tasks

Responsible for the accurate preparation of approximately 100 animal diets (individual produce diets); includes measuring, weighing, or counting items to obtain amount of all individual diet items and specialized cutting of each item based on animal needs.

Sorts and stores items on shelves, in bins, or in refrigerated storage room of commissary.

Ensures quality control, proper rotation and washing of all produce items.

Maintains the cleaning and sanitation of the produce station; cleans, disinfects work station and all tools, sweeps floors and ensures that the good hygiene is maintained throughout the work day.

Sets up and breakdowns produce station.

Delivers food to specific animal areas.

Performs related work as required.

##### Knowledge, skills and abilities

General knowledge of animal nutrition and food quality.

General Knowledge of cleaning supplies and usage.

Ability to keep clear and accurate written records.

Ability to lift a minimum of 50 pounds, push and hold equipment, tools, supplies, and debris; and work in adverse weather conditions.

#### Nature Of Work

This is specialized commissary work in the Metropolitan Zoo.

### Zoological Supervisor (007405)

#### Minimum Qualifications

High school diploma or GED. Four years of experience with mammals, reptiles and/or birds in a zoological park or related facility to include one year of supervisory experience are required. Coursework in Zoology, Biology, Ecology or related field may substitute for the required experience on a year-for-year basis to a maximum of two years. Must possess a Driver license.

#### Job Specifications

##### NATURE OF WORK

This is supervisory animal caretaker work in a major geographic zone of the Metropolitan Zoo.

Employees in this class are responsible for the supervision of animal care in a major animal zone, combining a variety of mammals, birds, reptiles and amphibians. Duties involve custodial responsibility and performance of the more technical aspects associated with feeding and health care of captive wildlife. Supervision is exercised over subordinate animal custodial employees engaged in routine and specialized tasks. Supervision is received from a professional superior who develops and assigns work projects, and reviews work through personal conferences and observations for achievement of desired results.

##### ILLUSTRATIVE TASKS

Plans, assigns and supervises the work of subordinate animal custodial employees in the routine cleaning and care of animals and exhibit areas; conducts inspections of the geographic area of responsibility to assure that health and safety conditions for animals are maintained; assures that all special equipment is in working order.

Assists in the coordination of special project work scheduled to be performed in the incumbent's geographic area, such as research and educational projects; carries out instructions of administrative and professional employees pertaining to or involving animals in the incumbent's area of assigned responsibility.

Supervises and participates in the rendering of medical care as directed by a professional veterinary superior; assists in the performance of specialized animal care, including baby and immature animal care.

Inspects prepared animal food for correct portions and proper balance of ingredients and additives.

Assists in the planning and preparation of the budget for the geographic area of responsibility; prepares requisitions for equipment, materials and supplies.

Makes recommendations regarding hiring, discipline and promotion of subordinates; schedules daily work routine of subordinate animal care employees; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the custodial care and general habits of typical animals.

Considerable knowledge of animal handling and training techniques.

Considerable knowledge of the food likes and dislikes of assigned animals.

Knowledge of supervisory principles and practices.

Some knowledge of budget preparation procedures.

Ability and willingness to work with wild, delicate and, occasionally, dangerous creatures.

Ability to perform custodial and minor veterinary care requirements of assigned creatures.

Ability to deal courteously and tactfully with the public.

Ability to plan, assign, coordinate and supervise the work of others in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with other employees, supervisors and professional and administrative department officials.

Ability to understand and follow written and verbal instructions.

#### NATURE OF WORK

This is specialized administrative work in the development and implementation of animal related programs for the Metropolitan Zoo. Employees in this class are responsible for participating in the development and field implementation of animal management, propagation and conservation programs for a taxonomically assigned portion of the animal collection. Some employees in this class may be responsible for a public education program for the zoo. Duties involve the monitoring of program progress as it relates to assigned animal group. Supervision is exercised through subordinate supervisors over specialized employees who carry out programs as instructed. Supervision is received from a professional and administrative superior who assigns work and reviews through personal conferences and observations for achievement of desired results.

#### ILLUSTRATIVE TASKS

Participates in the development and implementation of various programs designed for a taxonomically similar portion of the animal collection, such as mammals, amphibians, birds, reptiles or invertebrates; monitors field implementation of animal management, propagation and conservation projects.

Assists professional superiors in research and development of specific animal diets, health programs, initial animal intake and quarantine procedures; researches and records specific animal habits for breeding and handling needs.

Assists in the development of and maintains recordkeeping procedures for animal inventory, genealogy, ISIS and other records; develops breeding files for use in animal propagation.

Monitors overall care of exhibits; assures proper use of chemicals in exhibit areas.

Conducts breeding loan transactions; applies for breeding permits; maintains records of breeding permits, studbook registration and breeding loan agreements; conducts commercial transactions of animals, such as purchases, sales, trades and exchanges.

Develops a variety of materials for conducting an extensive public education program for the zoo and outside facilities; plans, edits and supervises publication of educational materials, such as pamphlets and booklets; prepares slides, posters and other illustrative devices for specialized educational programs.

Assists in planning and preparation of the budget as it relates to assigned duties.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the custodial care and general habits of assigned animal groups, such as mammals, amphibians, birds, reptiles or invertebrates.

Thorough knowledge of research procedures for the development of programs for the care and breeding of assigned animals.

Thorough knowledge of procedures and practices relating to animal management, propagation and conservation projects for a taxonomically similar group of animals.

Thorough knowledge of journalistic principles and practices in the development of a specialized public education program, including planning, composing, editing and publication of educational material. Considerable knowledge of chemicals and their use in animal exhibit areas.

Knowledge of budget preparation procedures.

Knowledge of supervisory principles and practices.

Ability to apply knowledge of animal management, propagation and conservation procedures to develop a comprehensive program for a taxonomically similar group of animals.

Ability to maintain record systems for animal inventory, genealogy, ISIS, studbook registration and breeding loan agreements.

Ability to plan, compose, and edit informational and educational material for specialized programs.

Ability to plan, organize and conduct informational programs.

Ability to plan, assign, coordinate and supervise the work of others in a manner conducive to full performance and high morale.

This is highly responsible professional managerial work in planning and directing the operation of the Metrozoo.

An employee in this class is responsible for supervising directly or through subordinate supervisors, the management, operation and maintenance of the Metrozoo. Responsibilities include coordination and supervision of all operational activities, including construction, administration, concessions, animal management, maintenance and security. Duties include making recommendations and decisions concerning animal management, budget appropriations, developing and implementing long-range planning, and monitoring revenues and expenditures to provide services at minimum cost. The incumbent exercises extensive independent judgment and professional managerial knowledge in directing all Metrozoo operations. Supervision is exercised over professional, administrative and specialized employees directly or through subordinate supervisors with responsibilities in the various phases of zoo activities. General supervision is received from the Deputy Department Director who holds the incumbent responsible for the professional management of all Metrozoo operations.

##### ILLUSTRATIVE TASKS

Provides direction and supervision through subordinate supervisors to professional and specialized employees engaged in providing an overall animal management program, veterinary services, security services, maintenance and landscape services, promotions and concessions.

Coordinates and supervises construction activities for animal displays, patron services and facilities; participates in the development of concepts and final design of facilities with construction staff; approves scheduling of construction with regard to animal welfare.

Participates in the conceptual development and makes final approval on marketing and promotional strategies related to the zoo.

Develops and establishes zoo service objectives; directs the planning, scheduling and coordination of projects; reviews progress of all projects through reports prepared by supervisors and conferences with subordinates; assists in the resolution of difficult and unusual problems.

Supervises the study and analysis of the conditions, public demands and trends affecting zoo activities; develops long-range planning to meet future needs in animal management, public facilities and programs.

Establishes and maintains cooperative planning and working relationships with various public and private organizations and volunteer groups; assists such groups in fund raising activities, educational programs and membership campaigns to benefit the zoo; coordinates programs using volunteers in zoo activities.

Prepares and supervises the preparation of budget estimates and justifications; controls and accounts for expenditure of operational funds; reviews and makes recommendations for revision of various fees and charges; oversees the operation of a variety of concessions leased to outside organizations.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the principles and practices of administration of a zoo.

Extensive knowledge of the goals and objectives of a major zoo operation.

Thorough knowledge of procedures and practices relating to an overall animal management program.

Considerable knowledge of the principles of public and business administration.

Considerable knowledge of applicable local, state and federal laws, rules and regulations pertaining to animal care operations.

Considerable knowledge of landscaping and maintenance requirements of a major zoo and its facilities.

Considerable knowledge of budget preparation and monitoring procedures.

Considerable knowledge of supervisory principles and practices.

This is highly responsible executive level work in planning and directing the activities of the Vizcaya Museum and Gardens.

An employee in this class is responsible for planning, directing and supervising the operation, management and maintenance of Vizcaya Museum and the Claire Mendel Gallery of Art. Responsibilities include coordination and supervision of all operational activities. Duties include serving as liaison with support groups; monitoring compliance with museum association standards ensuring national accreditation and congressional designation as a national historic landmark and designation on the National Register of Historic Places. The incumbent exercises considerable independent judgment and professional managerial knowledge in directing all museum operations. Supervision is exercised over managerial, supervisory, professional, and specialized employees with responsibilities in the various phases of museum activities. General supervision is received from the Deputy Department Director who holds the incumbent responsible for the professional management of all museum operations.

#### ILLUSTRATIVE TASKS

Directs, through subordinate managers, the business operations of the Vizcaya Museum and Gardens; oversees lease negotiations.

Plans, conducts and oversees marketing and public relations activities; monitors advertising expenditures; reviews all advertising promotions; represents the museum at cultural and social events.

Directs, through subordinate supervisors, the development and implementation of an orchid program and maintenance of formal gardens at the Vizcaya Museum; oversees the construction of orchid display garden and propagation facilities.

Directs and supervises educational and exhibit activities for the museum; oversees the training of volunteers; plans and supervises all restoration and preservation activities for the museum.

Directs, through subordinate supervisors, the work of security employees engaged in patrolling and protecting public property at Vizcaya Museum and Gardens; ensure conformance with established security and safety policies and procedures.

Ensures conformance with the standards of the American Association of Museums and the Secretary of Interior to ensure national accreditation and the museum's designation on the National Register of Historic Places; ensures the museum's Congressional Designation as a national historic landmark.

Establishes and maintains cooperative planning and working relationships with various public and private organizations and volunteer groups; assists such groups in activities to benefit the museum.

Prepares and supervises the preparation of budget estimates and justifications; controls and accounts for expenditure of operational funds; reviews and makes recommendations for revision of various fees and charges; oversees the operation of revenue-producing activities at the museum.

Encourages employee development through participation in training programs, educational classes and professional seminars and organizations.

Makes recommendations and decisions regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews performance reports prepared by subordinates and rates employee performance.

### Digital Information Specialist (007801)

#### Minimum Qualifications

#### Job Specifications

No Job Specification Available

#### Nature Of Work

### Bus General Helper (008001)

#### Minimum Qualifications

Eighth grade. Three months of experience with materials, methods and equipment used in automotive cleaning are required. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is heavy manual work in the maintenance and cleaning of vehicles for a public transit system.

Employees in this class perform heavy manual work which generally requires the use of cleaning devices needed to properly maintain those vehicles. Work is usually closely supervised and performed under the immediate direction of an employee of a higher classification, however, many tasks may be routine and repetitive in nature and accomplished under general supervision.

##### ILLUSTRATIVE TASKS

Prepares wash rack for washing buses; washes and cleans entire bus interior and exterior, bus parts and bus engine.

Sweeps out buses, dusts seats and operates dash, mops floors and cleans bus windows.

Cleans garage work areas as needed; sweeps and removes refuse and paper from transit grounds and buildings.

Uses a variety of air hoses, suction cleaners, vacuums and other cleaning devices.

Assists craftsmen in carrying material or tools when necessary.

Changes tires in an emergency.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Some knowledge of the materials, methods and equipment typically used in automotive or bus cleaning work.

Some knowledge of the operation and routine care of a variety of automatic cleaning devices.

Ability to make minor repairs and adjustments to automatic cleaning equipment.

Ability to understand and follow oral and written instructions.

Sufficient physical strength and agility to perform heavy manual work in the use of cleaning and vehicle washing equipment and performing other related tasks.

NEW 10-74

#### Nature Of Work

This is heavy manual work in the maintenance and cleaning of vehicles for a public transit system.

### Bus Hostler (008002)

#### Minimum Qualifications

High school diploma or GED and three months of experience servicing automotive equipment; or current employment in the County service as a Bus General Helper with three months of semi-skilled experience; or current employment as a Miami Dade Transit Bus Operator are required. Must possess a CDL/Class B with Air Brakes and Passenger Endorsements or proof of passing the General Knowledge, Air Brakes, and Passenger Endorsements for the CDL. As a condition of continued employment, the applicant must successfully pass the vehicle skills test that includes the pre-trip inspection, basic controls and road test; and must obtain a CDL Class B with Air Brakes and Passenger endorsements before the end of the training period. The MDT classification of Bus Hostler performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in servicing, lubricating and maintaining vehicles for a public transit system. Employees in this class are responsible for a highly standardized maintenance program which includes tire repair, lubrication and general garage duties. Primary tasks of the job are concerned with the servicing and maintenance of buses. Work includes maintaining routine records of activities performed and materials used. Instructions are usually received orally and routine tasks are performed with considerable independence while more difficult work is performed under the supervision of a foreman or a skilled craftsman. All work is subject to inspection while in progress and upon completion.

##### ILLUSTRATIVE TASKS

Fuels transit vehicles and checks water, oil, battery and tires; adds water, oil and air if needed; drains air tanks.  
Makes visual inspection of transit vehicles for accident damage, broken glass, burned out lights; reports any damage, defects or malfunctioning parts to proper authority.  
Changes tires in the garage and, when necessary, on the road.  
Drives bus through automatic wash rack; washes engines, bus units and bus interiors; washes exterior of bus with hand brush if necessary.  
Parks bus in a designated parking area.  
Cleans garage and parking areas and performs other related cleaning, sweeping, mopping or dusting duties.  
Operates service trucks and fork lift.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the location, nomenclature and function of the less complex parts of transit equipment.  
Knowledge of the types, grades and uses of standard automotive lubricants.  
Knowledge of the materials, methods and equipment typically used in automotive maintenance work.  
Ability to supply automotive equipment with oil, water and fuel.  
Ability to drive a bus.  
Ability to understand and follow oral and written instructions.  
Skill in the repair of tires and tubes.  
Skill in the servicing of automotive equipment.  
Sufficient physical strength and agility to change and repair tires and to do similar automotive servicing and general maintenance work.

NEW 10-74

#### Nature Of Work

This is semi-skilled work in servicing, lubricating and maintaining vehicles for a public transit system.

**Bus Hostler (008002)**

### Bus Maintenance Technician (008006)

#### Minimum Qualifications

High school diploma or GED. Satisfactory completion of four (4) Occupational Completion Points in Heavy Duty Truck and Bus Mechanics program from a Florida Department of Education Vocational School Certification Program as outlined in the Florida Department of Education curriculum framework or equivalent is required. Must obtain a CDL/Class B with Air-brake Testing and Passenger (P) Endorsement during the Miami-Dade Transit Mechanic Training Program. OR High school diploma or GED. Three years of experience as an auto mechanic, diesel mechanic, truck mechanic or bus mechanic are required. A performance test will be given at the time of interview. Must possess proof of passing the General Knowledge Test of the Commercial Driver License. As a condition of continued employment, must obtain CDL/Class B with Passenger (P) Endorsement and Air-brake Testing within the probationary period. A Certificate of Completion in Heavy Duty Truck and Bus Mechanics from a Florida Department of Education Vocational School Certification Program or equivalent may substitute for the required experience and the performance test. All trainees must obtain a Type II or Universal certification from an EPA recognized certification program in refrigerant transition and recovery service practices in accordance with EPA 40 CFR, Part 82, Subpart F, under Section 608 of the 1990 Clean Air Act Amendment within the probationary period. The MDT classification of Bus Maintenance Technician performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled mechanical work at the journeyman level in the maintenance, repair, and overhaul of transit equipment. Employees in this class perform advanced skilled mechanical work in all phases of maintenance, repair, and overhaul of diesel and gasoline engines and auxiliary equipment. Work involves a variety of advanced tasks in the analysis, diagnoses, testing, adjustment, repair, and maintenance of component parts of transit equipment, as well as the analysis, diagnosis and repair of more difficult mechanical, electrical, and auxiliary equipment. Employees work independently using a variety of shop equipment, precision testing and measuring instruments, and specialized tools required for transit equipment repair. Incumbents may provide technical training and direction in the performance of duties to lower-level mechanics and helpers. Supervision is received from a technical supervisor who reviews work in progress and upon completion for achievement of operational requirements.

##### ILLUSTRATIVE TASKS

- Prepares and maintains records of maintenance and repair work on transit vehicles and equipment.
- Analyzes, diagnoses, adjusts, repairs, and overhauls a variety of diesel and gasoline engines and auxiliary equipment.
- Performs a variety of preventive maintenance functions to ensure proper operation of transit equipment.
- Accomplishes the more difficult aspects of diagnosing, repairing, and removing more sophisticated mechanical, electrical, and auxiliary systems.
- Makes road-service calls.
- Performs complete engine overhauling on all transit equipment components.
- Diagnoses, repairs, removes, and replaces all transit equipment components and assemblies.
- Diagnoses, repairs, removes, and replaces worn or damaged parts.
- Calibrates to designated specifications those units which require settings or adjustments.
- Uses various types of shop equipment, precision testing and measuring instruments and specialized tools required for the diagnosis, repair and maintenance of transit equipment.

- Directs lower-level mechanics in the performance of their duties and provides technical training.

- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

### **Bus Maintenance Technician (008006)**

Considerable knowledge of the operating characteristics of diesel and gasoline engines and auxiliary equipment.  
Considerable knowledge of the repair and maintenance requirements of transit vehicles, assemblies, and component parts.  
Considerable knowledge of the operating principles of diesel and gasoline engines.  
Considerable knowledge of shop equipment, precision testing and diagnostic instruments, and specialized tools required for the repair and maintenance of transit equipment.  
Knowledge of recordkeeping requirements pertaining to the repair and maintenance of transit equipment.  
Knowledge of the occupational hazards and safety precautions required in mechanical repair work.  
Ability to analyze, diagnose, repair, maintain, and overhaul a variety of diesel and gasoline engines and auxiliary equipment.  
Ability to make field repairs on transit equipment using portable repair tools.  
Ability to prepare and maintain records of mechanical repair and maintenance work.  
Ability to follow verbal and written instructions.  
Ability to train lower-level mechanics in mechanical repair work.  
Skill in the diagnosis, repair, and maintenance of mechanical equipment.  
Physical strength and agility sufficient to perform assigned duties.

REV 11-92

#### **Nature Of Work**

This is advanced skilled mechanical work at the journeyman level in the maintenance, repair, and overhaul of transit equipment.

### Bus Body Technician (008010)

#### Minimum Qualifications

High school diploma or GED. Three years of paint and body repair experience in the field of transit bus, school bus, and/or truck/heavy equipment are required. Must possess proof of having passed the General Knowledge Test of the Commercial Driver License (CDL) at time of application. As a condition of continued employment, must obtain a CDL/Class B with air-brake and passenger endorsement by the completion of the probationary period. The MDT classification of Bus Body Technician performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) drug and alcohol regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled journeyman work in the repair and replacement of body and fender components, and the surface preparation and painting of transit operating vehicles.

Employees in this class perform complex and specialized tasks in repairing, replacing and rebuilding transit vehicle bodies including repairing interior surfaces and furnishings, and preparing and painting exterior and interior surfaces. Additional responsibilities include troubleshooting and repairing more difficult and sophisticated body work, resolving painting problems and fabricating replacement or modification body components. Employees work independently using general and specialized hand and power tools and various precision instruments especially suited for transit vehicle repair and painting work is usually performed in a spray booth or paint shop. Supervision and technical guidance may be exercised over subordinate journeymen and helpers. General supervision is received both orally and through written job orders from a foreman or other supervisor who reviews work in progress and upon completion for established operational requirements.

##### ILLUSTRATIVE TASKS

Rebuilds, replaces, repairs and paints bus bodies, fenders, panels, grills, advertising equipment, interior panels, furniture, flooring and destination equipment; removes dents and straightens door panels, quarter panels, and fenders; straightens frames and wheels with presses and other equipment.

Welds and solders radiators, torque coolers, seats, windows, and vehicle body and frame components.

Troubleshoots and repairs the more difficult body and fender damages; fabricates replacement panels and parts for repairs and modifications of buses; troubleshoots the more difficult problems encountered in painting a variety of transit equipment; repairs air and fuel lines and damaged wires.

Develops mixes and submits to superiors for approval all color and finish samples of materials to be used; prepares surfaces to be painted, removing dirt, scales, rust, old paint, grease and other materials; scrapes, sands and applies sizing; smooths surfaces using various methods; applies masking tape over parts and areas that are not to be coated.

Applies paint to interiors and exteriors of a variety of bus equipment using a spray gun or brush; regulates sprayer valves and nozzle to obtain desired with the pressure of spray; coats areas inaccessible to hand sprays with brush; cleans spraying equipment and brushes with solvent; makes minor repairs to equipment and apparatus.

Occasionally paints interiors and exteriors of transit facilities and transit signs with spray gun or brush.

Cuts and installs window glass for bus windows.

Estimates cost of repairing and painting accident damages.

Assists in training and supervision of subordinate journeymen and helpers.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, methods and practices used in vehicle body repair and painting trades.

Thorough knowledge of the tools, equipment and materials used in the vehicle body repair and painting trades.

Thorough knowledge of the occupational hazards and safety precautions of the work.

Some knowledge of effective supervisory techniques.

### **Bus Body Technician (008010)**

Ability to diagnose damages and unusual problems and work needed in order to properly repair and paint transit vehicles.

Ability to operate specialized paint equipment to obtain desired results according to established procedures.

Ability to supervise and train a small group of subordinate journeymen and helpers in all aspects of the trade.

Ability to follow oral and written instructions.

Skill in the use and care of tools and equipment used in body repair and painting.

Skill in matching of paint, color and finishes.

Sufficient physical strength and agility to perform bus body repair work.

NEW 10-78

#### **Nature Of Work**

This is advanced skilled journeyman work in the repair and replacement of body and fender components, and the surface preparation and painting of transit operating vehicles.

### Transit Painter (008019)

#### **Minimum Qualifications**

Eighth grade. Two years of experience in painting building structures, building facilities or equipment are required. Must possess CDL/Class B. This position may require working from scaffolding at heights and/or near water hazards. Must be currently employed as a Miami-Dade Transit employee in a classification represented by the Transport Workers Union, Local 291. The MDT classification of Transit Painter performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### **Job Specifications**

#### **Nature Of Work**

This is skilled work at the journeyman level in the painting of Transit buildings, fixtures and equipment.

## Transit Facilities Equipment Technician (008021)

### Minimum Qualifications

The MDTA classification of Transit Facilities Equipment Technician performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol regulations.

Preference will be given to applicants in the Transport Workers Union bargaining unit.

### Job Specifications

#### NATURE OF WORK

This is skilled work at the journeyman level in the maintenance and repair of transit facility buildings and various mechanical support equipment.

Employees in this class perform specialized mechanical work in a manual trade or skilled craft. Work involves the maintenance and repair of machinery and mechanical equipment such as pumps, engines, motors and electrical apparatus as well as maintenance and repair of the physical plant of transit facilities. Employees work independently using hand tools, power tools and various precision measuring and testing instruments. Assignments are usually received verbally and may be accompanied by sketches, blueprints or schematic drawings, and may involve locating defective parts or determining the cause of malfunctioning machinery. Incumbents may devise their own methods for accomplishing tasks and work independently but all work reviewed by a foreman who inspects for compliance with instructions and serviceability of equipment repaired.

#### ILLUSTRATIVE TASKS

Maintains and makes repairs or alterations to transit support equipment such as pneumatic, hydraulic and electrical bus lifting systems, equipment hoists, bus washing equipment, shop air compressors and emergency electrical generator systems; diagnoses operating problems, disassembles equipment, repairs or replaces parts and reassembles; tests operation of equipment after repair.

Repairs short circuits and broken wires; installs or replaces electrical fixtures; repairs and replaces electric motors; repairs and replaces switches, relays, transformers and other electro-mechanical components.

Does electric and acetylene welding and brazing and silver soldering; repairs, modifies and makes new installations of pipe fittings; performs skilled plumbing work on steam and water lines and related plumbing equipment.

Does general carpentry work in the construction, alteration and maintenance of buildings, floors, roofs, stairways, partitions, doors, windows, screens, wood fixtures and furniture; builds concrete forms.

Examines form and texture of parts to detect imperfections; uses rules, calipers, micrometers and similar measuring instruments; adjusts functional parts of devices and control instruments; uses hand tools, levels, plumb bobs and straight edges.

Occasionally sets up and operates lathe, drill press, threading machines, grinder and similar metal working power tools; sets up and operates power saws, planers and joiners and similar woodworking power tools.

May supervise and inspect work in process and finished work of subordinate utilitymen.

Makes estimates of time and material required for assigned tasks and keeps simple records; assists foremen in coordinating work projects and schedules.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of maintenance, repair, alteration and construction procedures and practices for transit support equipment.

Considerable knowledge of the methods, materials, tools and practices used in a specialized trade or in the building, electrical or mechanical crafts.

Considerable knowledge of the occupational hazards and safety precautions of the building, electrical or mechanical trades.

Knowledge of the principles of mechanics.

Knowledge of the repair and maintenance characteristics of a wide variety of transit support equipment, mechanical equipment and transit building structures.

Ability to detect defects in machinery and equipment and makes necessary repairs and adjustments.

Ability to work from oral and written instructions, simple diagrams, blueprints and schematic drawings.

Ability to make simple time and materials estimates.

Skill in using a variety of standard hand tools, measuring instruments, machines and power equipment used in a craft or in building and machinery repair work.

## Human Resources Department

### Transit Facilities Equipment Technician (008021)

NEW 10-78

#### **Nature Of Work**

This is skilled work at the journeyman level in the maintenance and repair of transit facility buildings and various mechanical support equipment.

#### **TRAINING PROCESS:**

A limited number of trainee positions will be available. Applicants in the MDT TWU bargaining unit positions, who meet the requirements listed above, will be selected by seniority based upon the number of available trainee positions. Those selected will enter the classification of Transit Facilities Mechanic in Trainee status. Classroom and on-the-job training will last approximately nine (9) months. A written examination will be given at the end of the training. Trainees who pass the test will have completed training successfully. MDT TWU bargaining unit employees (trainees) who successfully complete the training program will be placed by seniority order, with probationary status, into available vacancies. MDT TWU bargaining unit employees completing the training program but not placed, will return to their former classification. They will be placed on a waiting list and will receive preference by seniority order for future available Transit Facilities Mechanic positions. The eligibility list and waiting list will remain valid as set forth in the Personnel Rules for the Classified Service. In accordance with labor protective agreements, Miami-Dade Transit Department employees in certain represented positions will be given preference for these positions. Submit applications online at [www.miamidade.gov/jobs/](http://www.miamidade.gov/jobs/) from \_\_\_\_\_ through \_\_\_\_\_.

### Transit Welder (008022)

#### Minimum Qualifications

High school diploma or GED. Three years of experience in MIG, TIG, gas, electric, and shielded metal arc (covered electrode) welding in the horizontal, vertical, overhead and flat positions to include layout and fabrication are required. Must possess a certificate issued by affiliates of and/or by the American Welding Society (AWS) in flat, vertical, horizontal, and overhead welding (6G). Must possess a CDL/Class B. Must possess own hand tools. The MDTA classification of Transit Welder performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations.

#### Job Specifications

#### Nature Of Work

This is skilled work at the journeyman level in the cutting and welding of metallic articles, parts, structures and equipment.

## Human Resources Department

### Bus Maintenance Control Clerk (008031)

#### Minimum Qualifications

High school diploma or GED. Two years of experience performing advanced clerical functions involving numerical record keeping and Microsoft Excel are required. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced and specialized clerical work in maintenance of various bus repair and accident records for a county transit system. Employees in this class perform a variety of clerical duties in the maintenance of bus repair, overhaul and accident records and initiation of repair orders. Work involves compiling road call services on individual buses, initiation of repair orders, maintaining detailed records of bus units replaced, repaired or overhauled, posting bus unit changes and completing accident cost records. Incumbents also assist in various responsible personnel record keeping tasks. Work is performed under general supervision of a technical supervisor who spot checks completed work for accuracy and thoroughness.

##### ILLUSTRATIVE TASKS

Maintains daily records of bus road service calls together with bus operators' defect summaries; notes those buses using excessive oil or having several road calls or defect summaries, and completes repair order cards for use by foremen.

Checks daily bus repair order cards and posts to coach record cards any unit changes made on buses such as generators, alternators or pumps; files repair order cards by bus number.

Completes request forms for estimated cost of bus damage repairs from submitted bus diagrams and accident sheets; types invoice billings upon receipt of completed estimates; maintains records of accident dates, estimated cost and final actual costs of repairs.

Compiles monthly reports of maintenance work completed on buses.

Completes required personnel forms for employment, separations and disciplinary actions as assigned, according to established personnel procedures; assists employees in completing required forms to change insurance coverage or savings bond allotments; types minor employee injury report forms from information obtained; refers employees for medical treatment as needed and types major injury reports.

Computes total work time for employees and posts time cards according to established procedures as assigned.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of transit system office procedures covering bus maintenance, repair and overhaul record keeping.

Considerable knowledge of transit system office procedures covering bus accident and repair cost record keeping.

Considerable knowledge of clerical processes in the maintenance of a variety of transit system bus records.

Knowledge of established personnel record procedures.

Ability to understand and carry out oral and written instructions.

Ability to review records carefully and initiate repair order requests as needed.

Ability to complete arithmetic computations accurately and with reasonable speed.

Ability to complete various personnel forms and records with accuracy and thoroughness.

Skill in typing at a reasonable rate of speed.

#### Nature Of Work

This is advanced and specialized clerical work in maintenance of various bus repair and accident records for a county transit system.

Must take and pass a data entry skills test of 86 net key strokes per minute.

## Human Resources Department

### Transit Facilities Maintenance Control Clerk (008032)

#### Minimum Qualifications

High school or GED. Two years of advanced clerical experience involving numerical recordkeeping are required. Coursework may substitute for the required experience on a month-for-month basis. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

This is advanced specialized clerical work in processing and maintaining rail, metromover and metrobus maintenance records in a public transportation system.

Employees in this class perform routine and advanced clerical tasks in the processing and maintenance of records of rail, metromover and metrobus equipment and in the initiation of repair orders. Duties include compiling repair records on equipment, initiating repair orders for scheduled, unscheduled and preventive maintenance, maintaining detailed records of equipment replaced, repaired or overhauled, and entering and retrieving information from a computerized information system. Responsibilities include checking and verifying non-routine maintenance data for preparation of maintenance reports. Supervision is received from a technical or administrative superior who periodically reviews work for accuracy and thoroughness and assists with difficult problems.

#### ILLUSTRATIVE TASKS

Enters and retrieves maintenance information from a computerized information system and assists a technical supervisor in the maintenance and update of computerized equipment maintenance records; disseminates information to various work units and sections as required.

Checks, prepares and issues repair orders and posts to all rail, metromover and metrobus facility equipment records any repairs/changes made on the equipment; files repair orders as instructed.

Compiles reports of all maintenance work completed on all facility equipment for rail, metromover and metrobus areas.

- Conduct research and compiles data for non-analytical reports.

- Completes job estimates, work plans and work completion records; completes request forms for estimated cost of repair damage to rail, metromover and metrobus facility equipment.

- Reviews and maintains an extensive recordkeeping system relating to maintenance activities, cost estimates, accident dates, personnel roster, and attendance records according to established procedures.

- Types both draft and final form correspondence of a technical nature as well as memos, letters, maintenance procedures, maintenance directives, component evaluations and modifications as required in support of operations.

- Obtains employee injury report forms and refers employees for medical treatment as needed; answers telephone and performs other office clerical duties.

- Records employee timecards and prepare PARS; initials final line-up schedule.

- Performs related work as required.

- Considerable knowledge of policies and procedures pertaining to the processing and maintenance of metrorail, metromover and metrobus maintenance records.

- Considerable knowledge of transportation system office procedures concerning maintenance recordkeeping.

- Considerable knowledge of the records, reports and forms used in rail, metromover and metrobus maintenance activities.

- Knowledge of the operation of computerized equipment used to enter and retrieve information concerning rail, metromover and metrobus maintenance records.

- Knowledge of business arithmetic.

- Ability to complete various clerical processes regarding maintenance records accurately and quickly.

- Ability to follow verbal and written instructions.

- Ability to review maintenance records and initiate repair order requests.

- Ability to operate standard keyboard typing equipment, calculators and related office equipment.

- Ability to detect and correct clerical errors in narrative and statistical documents.

- Ability to maintain effective working relations with supervisors and other employees.

- Ability to complete arithmetic computations quickly and accurately.

- Ability to enter and retrieve information using a computerized information system.

NEW 06-2000

### Transit Facilities Maintenance Control Clerk (008032)

NEW 1-85

#### **Nature Of Work**

This is advanced specialized clerical work in processing and maintaining rail, metromover and metrobus maintenance records in a public transportation system.

Must take and pass a data entry skills test as part of the application process with a minimum score of 59 keystrokes per minute. Photo identification is required to take the data entry skills test.

### Transit Facilities Repairer (008033)

#### Minimum Qualifications

High school diploma or GED. One year of experience performing semi-skilled maintenance and repair tasks or assisting with maintenance and repairs in any of a variety of the skilled trades is required. Must possess a Driver license. The MDTA classification of Transit Facilities Repairer performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration's (FTA) drug and alcohol regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the maintenance and repair of transit buildings and facilities applying knowledge of one or more of the building or mechanical trades.

Employees in this class perform a variety of plant maintenance work which approaches the journey or technician level but does not require as high a degree of skill and for which jobs are not expected to have the finished quality normally expected at the journey or technician level of assignment. Employees are routinely called upon to perform rough maintenance and repair work covering several buildings and mechanical trade areas. Assignments are received verbally or in writing, and may be accompanied by rough sketches. Incumbents may devise their own methods of accomplishing assigned tasks and may work with some independence of action. All work is subject to inspection in process and upon completion by craftsmen, foremen, or other supervisory personnel.

##### ILLUSTRATIVE TASKS

Replaces defective light bulbs throughout transit facilities; measures, cuts, threads and bends conduit sizes and lengths as required by electricians; replaces burned out fuses; installs or replaces electrical fixtures; performs minor soldering repairs; cleans and lubricates desk and floor fans, checks and replaces brushes on fan motors.

Makes general repairs to wood fixtures, ramps, ladders and frames; assists in the installation of door locks, hinges, shelves, brackets, sash chains, and other hardware fixtures; replaces damaged door knobs; sets guides and feeds lumber into power saws, planers and joiners; operates power and hand tools to assist carpenters in cutting, fitting, assembling and erecting wooden objects and structures.

Prepares surfaces to be painted; removes dirt, scales, rust, old paint and grease; scrapes and sands; applies sizing; mixes paint and does minor level painting on interiors and exteriors of transit facilities under direction of journeyman, technician or foreman; repairs bad spots in furniture, applies paint remover, sands and scrapes furniture and stains or paints as required, using brush or spray gun; cleans brushes and spray guns; cuts glass to size and shape and inserts in window frames using putty.

Prepares surfaces for plastering; replaces broken metal or wooden lathes; chips out broken plaster, concrete or tile; mixes plaster according to standard formula; does plaster patching where walls or ceilings are cracked and deteriorated and prepares surfaces for painting; carries tools and materials and generally assists masons or plasterers in building or repairing brick, stone, or tile walls and plastered structures.

Unstops sinks, toilets, hand basins and sewer lines; cuts openings in walls for pipes; measures, cuts and bends pipes per instructions; assembles tools and materials and generally assists journeymen plumbers.

Operates street painting equipment in striping and marking transit yard and garage facilities, employee parking areas and other related areas; using directions and sketches, marks areas for painting, mixes and applies paints, and cleans equipment after use.

Erects scaffolding; loads and unloads materials; cleans tools and work area upon completion of projects.

Performs related work as required.

### Transit Facilities Repairer (008033)

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the standard tools, materials, methods and practices of the trade areas to which assigned.

Knowledge of the occupational hazards and safety precautions of the trades areas to which assigned.

Ability to understand and follow oral and written instruction and to interpret and work from rough sketches.

Ability to make rough estimates of time and material requirements.

Skill in the use and care of tools, materials, and equipment of the assigned trade areas.

NEW 03-07

#### **Nature Of Work**

This is skilled work in the maintenance and repair of transit buildings and facilities applying knowledge of one or more of the building or mechanical trades.

## Human Resources Department

### Bus Stock Clerk (008035)

#### Minimum Qualifications

High school diploma or GED. Must have successfully passed the General Knowledge Test for the CDL/Class B. One year of experience in a warehouse or stockroom environment is required. As a condition of continued employment, a CDL/Class B with air-brake testing must be obtained within the one year probationary period. Must be able to work various shifts, weekends and holidays. The MDTA classification of Bus Stock Clerk performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is technical and advanced clerical work in the receipt, storage and issuance of bus parts, tools, materials, and supplies in a public transportation system.

Employees in this class perform a variety of manual and clerical tasks in the receipt, storage, and issuance of bus parts and other materials and supplies in a public transportation system. Duties include verifying and documenting materials received, preparing correspondence, reports and memoranda, issuing items in response to requisitions, monitoring stock, and assisting with physical inventories. Incumbents are required to move heavy material, lift boxes and climb ladders, as necessary, and operate forklifts and drive trucks. Supervision is received from a senior supply official who reviews work for adherence to established policies, procedures and standards.

##### ILLUSTRATIVE TASKS

Receives shipments and verifies quantity and quality of materials; documents receipt of products and maintains required files and records. Composes and types letters, reports and internal memoranda related to vendor correspondence, uniform reports, defective material receipts, vendor return authorizations, backorders, requisition follow-up, poor on-time vendor performances, and related matters.

Issues items in response to authorized requisitions and records transactions on manual records or by entering information into a computer terminal.

Monitors stock on-hand and requisitions materials in short-supply; verifies the issuance and receipt of tools and uniforms; assists with physical inventories.

Moves heavy materials, lifts boxes, and climbs ladders, as necessary; rearranges storage areas, builds shelving, and stocks material in assigned locations; packages material for shipment and arranges for transportation; pulls and stages stock for internal distribution.

Operates forklifts, drives trucks, and automotive equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of warehousing and inventory practices in a public transportation supply operation.

Knowledge of types, sizes, grades, and nomenclature of diesel equipment and other materials in the area of assignment.

Knowledge of safety practices and procedures applicable to warehousing and distribution of transit system supplies and materials.

Knowledge of recordkeeping procedures, forms, and reports in the area of assignment.

Ability to receive, store, and issue a variety of bus parts, tools, supplies, and materials.

Ability to compose and type a variety of internal and external correspondence.

Ability to perform routine arithmetic calculations quickly and accurately.

Ability to operate a computer terminal.

Ability to operate forklifts and drive trucks and automotive equipment.

Physical strength and agility sufficient to perform assigned duties.

### Transit Revenue Collector (008042)

#### Minimum Qualifications

High school diploma or GED. Must possess a CDL/Class B or provide proof of having passed the General Knowledge Test for the CDL/Class B with a permit to drive. As a condition of continued employment, must obtain a CDL/Class B with Air-brake Testing no later than two (2) weeks from the commencement of the probationary period. Must be able to drive a 15-ton truck and perform field work consisting of lifting and collecting cashboxes weighing up to 60 pounds each. Must be able to work various shifts, evenings, weekends and holidays. Applicants will be subject to a thorough background investigation which will include a polygraph examination. The MDTA classification of Transit Revenue Collector performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Regulations. In accordance with a labor protective agreement, Miami-Dade Transit Agency employees in certain represented classifications will be given preference for these positions. If vacancies are available after all MDTA Transport Workers Union (TWU) Bargaining Unit employees are placed, applicants from outside the MDTA TWU bargaining unit will be selected for positions based upon a structured interview. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is manual labor with some clerical responsibility handling large amounts of coins and currency for the Miami-Dade County Transit Agency.

Employees in this class are responsible for removing coin boxes and inserting coin boxes in fare collection equipment. Duties require the lifting of full coin boxes with a weight of approximately 40 pounds each and pushing a revenue cart containing a quantity of boxes weighing approximately 1,000 to 1,200 pounds. Additional duties include taking register readings, posting to the Rail Revenue Room daily report, daily collection of user-friendly currency, and servicing bill-changer and other fare collection/vending equipment. Supervision is received from an administrative superior and is subject to observation by a variety of transit operations employees.

##### ILLUSTRATIVE TASKS

Inserts into entry gate, audit register card and tasks cash readings; posts cash readings to the Rail Revenue Daily Report.

Removes full coin boxes and replaces with empty coin boxes; posts full and replacement coin box numbers on Rail Revenue Daily Report.

Empties ticket dump containers, periodically.

Transports and secures all full coin boxes and rail revenue daily reports to the revenue Room.

Checks user-friendly boxes when servicing to assure all seals are in place; reports damaged or missing seals immediately; Reports all damaged user-friendly stands, currency boxes and missing currency plungers to superior for replacement.

Empties each user-friendly box and places currency in numbered lockable bag; transports and secures all locked bags to Revenue Room.

Empties bill-changer machines of all currency, places in numbered lockable bags, transports to Revenue Room, and secures.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of procedures used in processing transporting and securing large quantities of coin and currency.

### **Transit Revenue Collector (008042)**

Knowledge of bill-changers, user friendly boxes and modern fare collection equipment.

Ability to lift weights up to 40 pounds and to push a revenue cart weighing 1,000 to 1,200 pounds.

Ability to work in a high security environment.

Ability to work various shifts.

Ability to read, understand and follow security procedures.

Ability to service bill-changers and other fare collection equipment.

Ability to pass a police background evaluation analysis prior to employment.

Physical strength and agility sufficient to perform assigned duties.

### Bus Operator (008050)

#### Minimum Qualifications

High school diploma or GED. Must possess proof of having passed the General Knowledge, Air-brake and Passenger Transport Testing of the CDL.

FOR THOSE WHO SUCCESSFULLY PASS THE WRITTEN EXAMINATION THE FOLLOWING MUST BE PRESENTED WHEN SCHEDULED FOR AN ORIENTATION.

PROOF OF EDUCATION such as high school diploma or GED;

PROOF OF HAVING PASSED the general knowledge, Airbrake and Passenger Transport Testing.

Preference will be given to Miami-Dade County employees.

ACCEPTABLE PHOTO IDENTIFICATION such as Driver license, State Issued Identification Card, Certificate of Naturalization, or Passport;

PROOF OF HAVING PASSED THE GENERAL KNOWLEDGE, AIR-BRAKE, AND PASSENGER TRANSPORT TESTING OF THE COMMERCIAL DRIVER LICENSE (CDL);

PROOF OF ELIGIBILITY FOR VETERAN'S PREFERENCE, IF APPLICABLE:

Applicants requesting Veterans' Preference must submit Veterans' Preference documents at the time of application. Preference will be given to veterans and spouses of veterans, when applicable. Those claiming this preference must submit documentation of eligibility for preference, such as a copy of a DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility from the armed force(s) (Army, Navy, Air Force, Marine Corps, and/or Coast Guard of the United States). The DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility documents must include wartime dates of service and an "honorable" discharge. In addition to the DD214 (Member-4), Certificate of Discharge, and Statement of Eligibility, those who are claiming preference as a disabled veteran must provide a recent letter (within one year) from the Department of Veteran's Affairs or Department of Defense stating the percentage of their service-connected disability. All veterans are required to complete a Veteran's Preference Claim Form at the time of application. Photo identification is required at the time of application.

As a condition of continued employment, trainees must obtain a CDL/Class B with Passenger Transport Endorsement and complete all requirements of the Bus Operator Training Program, including attendance and punctuality. The entire driving record (including State, and current/previous employers) of all applicants will be reviewed. The hiring department, based on established standards, may request to remove from the Eligible List the name of any applicant with a poor driving history. Drivers applying for these positions are required to have no more than three points on their driving record during the 36 months prior to the time of appointment to the County service. Applicants will be subject to a screening process including, but not limited to structured interviews, background checks and employment verification to include attendance and disciplinary records. Experience transporting passengers is preferred. All applicants must satisfactorily complete a stringent physical examination including drug and alcohol screening, meet minimum standards for hearing and binocular, monocular and color vision. Eyeglasses are permitted. Applicants selected for the training opportunity will be required to attend a mandatory information session. Bus Operator Trainees new to Miami-Dade County service will receive a trainee pay rate of \$14.18 per hour

### Bus Operator (008050)

during the training period. After training, Bus Operators will earn a starting pay rate of \$14.93 per hour. Current Miami-Dade County employees appointed to Bus Operator Trainee will receive a minimum trainee pay rate of \$14.18 per hour during the training period; some trainee rates may be higher depending upon current pay rate and/or date of hire into Miami-Dade County service. After training, normal promotion or demotion pay adjustments will apply. The MDTA classification of Bus Operator performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) regulations. Must be able to work weekends, holidays and various shifts.

#### Job Specifications

##### NATURE OF WORK

This is vehicle operation work in transporting passengers of a public transit system.

Employees in this class operate forty-foot, diesel or alternate fuel passenger buses over prescribed routes within the metropolitan area. Bus operators are responsible for the safety of their passengers and the vehicle operated as well as for completing the assigned route according to the prescribed time schedule. Duties involve collection and accountability for passenger fares according to an established rate schedule. Work requires the use of defensive driving skills and the courteous application of standard operating procedures, rules, and regulations of the Metro-Dade Transit Agency. Supervision is received from communications dispatchers, and a field operations supervisor who observes and evaluates driving practices, and who investigates traffic accidents, public complaints and related matters pertaining to passenger service and operator efficiency.

##### ILLUSTRATIVE TASKS

Picks up assigned route materials from the dispatcher, including route and schedule cards, trip sheet, and transfer pad.

Starts vehicle, checks and adjusts equipment for proper operating condition; inspects body of coach for unreported damage; checks the operation of the wheelchair lift; performs a pre-trip inspection.

Proceeds to starting point of assigned route, checks time schedule and begins to board passengers at designated bus zones.

Manually operates four-position door lever for both front and rear doors; issues transfers upon request, checks meter, and monthly transit passes.

Answers passenger questions concerning connecting routes, passenger discharge zones, schedules, fares, and provides general information as requested.

Records required information digitally via electronic farebox entries; makes reports of any unusual incident; reports to dispatch via radio.

Submits written reports on traffic accidents, passenger injury, vehicle or equipment malfunction, and service complaints.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Knowledge of the operating characteristics and service checks for diesel powered passenger and alternate fuel buses.

Knowledge of defensive driving techniques and the safety precautions applicable to passenger bus transportation.

Knowledge of the prescribed rules and regulations of the local public transit system.

Knowledge of the primary, secondary, and arterial road networks of the local metropolitan area.

Ability to assist passengers in a courteous manner.

Ability to detect malfunctions in a vehicle and submit reports.

Ability to follow prescribed instructions and to work without constant supervision.

Ability to employ defensive driving skills in the operation of a passenger bus.

Skill in the operation of passenger buses.

REV 3-93

#### Nature Of Work

This is vehicle operation work in transporting passengers of a public transit system.

### **Bus Operator (008050)**

The written examination will evaluate the ability to follow written instructions based on Bus Operations' rules, regulations, procedures, safe driving practices, passenger relations, report writing and basic math computation. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of 1/2 (.50) point per year of continuous, satisfactory, full-time service in the County to a maximum credit of ten years of service or five points. A supplemental Bus Operator Informational Handout containing a list of additional requirements for initial and continued employment will be distributed at the time of application.

APPLICANTS MUST ACCESS [WWW.MIAMIDADE.GOV/ERD/TEST](http://WWW.MIAMIDADE.GOV/ERD/TEST) OR CALL (305) 375-JOBS (OPTION 2) FOR WRITTEN TEST DATE, TIME, AND LOCATION AFTER MAY 21, 2007 AND TEST RESULTS AFTER JULY 13, 2007. Doors to the test facility will close promptly at the time indicated. No one will be admitted for registration after the doors to the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination.

### Transit Electronic Technician/Laboratory (Trainee) (008052)

#### Minimum Qualifications

Currently employed as a Miami-Dade Transit Agency employee in a classification represented by the Transport Workers Union, Local 291 to be eligible for the examination. Must possess a Driver license. Proof of education and work experience to meet minimum qualifications must be presented and will be verified. The MDT classification of Transit Electronic Technician/Laboratory performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work in the inspection, diagnosis, modification, repair and maintenance of electrical, electronic, radio and communications components, performed in an electronic laboratory.

Employees in this class are required to apply advanced principles and techniques of electronic and electrical repairs and adjustments on train control, radio, communications, fare collection, traction power, Metromover and fire/intrusion components and associated equipment.

Incumbents are required to maintain precise records of all work. Employees exercise independent judgment in determining job requirements regarding the various technical phases of repair, installation, modification and maintenance. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory performance.

##### ILLUSTRATIVE TASKS

Maintains and repairs a variety of electrical, electronic, radio, communications and electro-mechanical devices.

Repairs and adjusts two-way radio, public address, intercom, closed-circuit television, fare gate equipment and fire/intrusion components.

Troubleshoots and repairs train control, traction power and Metromover protection and logic systems.

Tests faulty equipment in laboratory and applies knowledge of functional operation of electronic-electrical units and systems to diagnose cause of malfunction.

Tests electronic components, printed circuit boards and circuits to locate defects using instruments such as oscilloscopes, signal generators, chart recorders, frequency counters, digital and analog multimeters, in-circuit testers, etc.

Replaces defective components and wiring and adjusts mechanical parts using hand tools and soldering iron.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and theories of electricity and electronics as applied to road and rail transit equipment and vehicles.

Considerable knowledge of the standard practices, methods, tools and materials of the electrical and electronic trades.

Considerable knowledge of a variety of electronic and electrical equipment and components such as motors, transformers, resistors, capacitors, coils, relays, filters and printed circuit boards.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work in a public transportation system.

Ability to perform electronic and electrical diagnosis and record data.

Ability to read and interpret electronic schematics and blueprints.

Ability to read and understand relay logic.

Ability to work a variety of hours and emergency shifts, as required.

Ability to follow verbal and written instructions.

Skill in the diagnosis and repair of electrical and electronic malfunctions.

Skill in the electrical-electronic trade.

### Transit Electronic Technician/Laboratory (Trainee) (008052)

REV 8-91

#### **Nature Of Work**

This is advanced skilled technical work in the inspection, diagnosis, modification, repair and maintenance of electrical, electronic, radio and communications components, performed in an electronic laboratory.

The written examination will be based on information contained in the authorized Transit Electronic Technician/Laboratory Trainee pre-examination study package. The study package will ONLY be distributed to 100 applicants based on classification seniority. Once the 100 applicants have been selected, they will be notified and study packages will be available at the Lehman Center, East Mezzanine Training Center, 6601 NW 72nd Avenue between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday only. All study materials must be returned to the MDT Human Resources Training section within one week after the exam, in the original condition received. If any portion of the study package is lost, damaged or stolen, report it immediately to the Human Resources Training Section at (305) 889-6713. Employees shall be held accountable for the safekeeping of MDT study materials. The loss or damage of MDT study materials as a result of negligence or willful misconduct will subject employees to the appropriate administrative action. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of 1/2 (.50) point per year of continuous full-time service in the County service to a maximum credit of ten years of service or five points. Submit applications online at [www.miamidade.gov/jobs/](http://www.miamidade.gov/jobs/) from \_\_\_\_\_ through \_\_\_\_\_. ADDITIONAL INFORMATION: Selected applicants will be placed in trainee status based on classification seniority. Upon successful completion of the approximately ten (10) months of classroom and structured on-the-job training, trainees will be placed in probationary status for one (1) year. 1. Those who successfully complete the training program will be placed into vacant positions in probationary status. Placement will be made in classification seniority order. 2. Employees who successfully complete the training program, but for whom there are no available vacancies, will return to their former assignments. They will be placed on a waiting list and will receive preference by classification seniority order for future Transit Electronic Technician/Laboratory positions. The eligible list and the waiting list will remain valid as set forth in the Personnel Rules for the Classified Service.

### Guideway Inspection Specialist (Trainee) (008054)

#### Minimum Qualifications

Eighth grade. Six months of experience performing maintenance and repair tasks involving the use of mechanical or construction tools and equipment are required. Must possess a Driver license. Only currently employed as a Miami-Dade Transit Agency employee in a classification represented by the Transport Workers Union, Local 291 are eligible for the examination. The MDT classification of Guideway Inspection Specialist performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is skilled guideway inspection and repair work for the Metro-Dade Transit Agency.

Employees in this class are responsible for performing a variety of track inspection and repair tasks in the maintenance of track work and other related structures. Duties include walking tracks, performing track inspection tasks, making emergency repairs and observing safety rules and regulations. Employees work variable hours, perform duties while exposed to various weather conditions and under traffic conditions which are generally considered dangerous. Work requires considerable physical effort and stamina. Supervision is received from a technical superior who reviews work for thoroughness of inspection and repair tasks, and for observance of established safety practices and procedures.

##### ILLUSTRATIVE TASKS

Walks tracks assigned, performing track inspection tasks according to procedures; makes emergency repairs to track and guideway as required; observes all established safety rules and regulations.

Performs minor maintenance on tools used.

Removes and replaces track plates and tie rods; cuts track bolts with cold chisel when replacing rail joints.

Assists with the placement of rails and special work.

Receives and transmits messages using telephone or radio.

Performs work in the frog and sail shop, fabricating, repairing or preparing various tracks and related components for installation into rail system.

Prepares written reports of inspections and actions taken on defects.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of the maintenance requirements of ballasted and direct fixation track.

Knowledge of the tools, equipment and material used in the repair of track work and other structures.

Knowledge of established safety procedures, rules and regulations.

Ability to walk up to ten miles per day on an elevated guideway under rail traffic conditions.

Ability to perform a variety of manual tasks under continuous exposure to various weather conditions.

Ability to identify track, third rail and other guideway defects.

Ability to work from verbal and written instructions.

Ability to prepare written reports of inspections and actions taken on defects.

Physical strength and agility sufficient to perform assigned duties.

### **Guideway Inspection Specialist (Trainee) (008054)**

This is skilled guideway inspection and repair work for the Miami-Dade Transit Agency.

**TRAINING PROCESS:** A limited number of trainee positions will be available. Applicants in the MDTA TWU bargaining unit positions, who meet the requirements listed above, will be selected by classification seniority based upon the number of available trainee positions. Those selected will enter the classification of Guideway Inspection Specialist in trainee status. Classroom and on-the-job training will last approximately seven (7) weeks. A written examination will be given at the end of the training. Trainees who pass the test will have completed the training successfully. MDTA TWU bargaining unit employees (trainees) who successfully complete the training program will be placed by classification seniority order, with probationary status, into available vacancies. MDTA TWU bargaining unit employees (trainees) completing the training program but not placed, will return to their former classification. They will be placed on an eligible list and will receive preference by seniority order for future available Guideway Inspection Specialist positions. The eligible list will remain valid as set forth in the Personnel Rules for Classified Service. In accordance with labor protective agreements, Miami-Dade Transit employees in certain represented positions will be given preference for these positions. Submit applications online at [www.miamidade.gov/jobs/](http://www.miamidade.gov/jobs/) from Tuesday, February 2, 2010 through Tuesday, February 16, 2010.

### Rail Vehicle Machinist (008056)

#### Minimum Qualifications

Three years of experience as a skilled machinist are required. Completion of a vocational or trade school training program in machine or engine/air-brake shop operation and maintenance may substitute for required experience to a maximum of two years. The MDTA classification of Rail Vehicle Machinist performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is skilled work at the journeyman level operating machine tools in the repair, fabrication and machining of rail vehicle machinery and equipment.

Employees in this class perform duties in precision turning, grinding, planning and shaping of metals, predominantly steel, copper and aluminum, to a very fine surface finish of twelve microinch and tolerances of .0002 inch. Responsibilities include setting up and operating heavy tracing lathes, a 40 inch Universal Boring Mill, a 400 ton hydraulic press, and other types of metal-working machines. Employees use independent judgment in determining work methods on particular assignments. Supervision is received from a maintenance superior who reviews work for satisfactory repair, fabrication and machining of rail vehicle machinery and equipment.

##### ILLUSTRATIVE TASKS

Sets up tracer lathes (up to 48 inch swing), boring mills (up to 48 inch), and high-tonnage presses for fabrication and assembly of vehicle parts; sets up pneumatic testers for testing overhauled pneumatic valves and actuators; sets up testers and calibrates hydraulic, pneumatic and mechanical instruments; applies knowledges of materials, shop practices, shop mathematics, layout and machining processes.

Prepares orders, relevant data and graphs as required for critical components such as wheel assemblies and brake components; makes parts, tools and mechanical devices for experimental purposes, such as solving problems related to work-holding arrangements, materials, machine setting, tools and new parts testing.

Uses portable hardness tester to measure BHN and RHN of parts and materials such as steel wheels; does simple heat treatment of machined and worked parts; performs mechanical repairs and inspection of rail vehicle mechanical systems in accordance with specifications; sets up full-load testing of compressors and motors.

Verifies limits and fits with precision mechanical instruments, micrometers (hole type), dial indicators, oscillographs, and digital gauges; does calibration of pneumatic and hydraulic instruments with deadweight testers; positions and screws parts on surface plate/work table utilizing vises, V-blocks, and angle plates; uses hand tools such as files, scrapers and wrenches to fit and assemble parts to assemblies/mechanisms.

In repair shop, dismantles precision pneumatic valves and actuators, cleans and inspects parts, reassembles and does test coding with AB type testing racks; machines and undercuts small DC motor armatures; dismantles, cleans, inspects and refits compressor assemblies to tolerances in procedures; repairs and maintains, according to blueprints and other specifications, shop machinery and equipment; dismantles machinery, relines spindles, adjusts clutches and replaces worn parts; repairs broken parts using brazing, soldering and welding equipment; shrink-fits bushing, sleeves, rings, liners, gear and wheel to specified items using heating equipment.

Reads and interprets blueprints, sketches, complex procedures or other descriptive materials for parts to be fabricated, fitted and installed; assembles layouts in accordance with provided dimensions and tolerance, components to be fabricated/machined.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of machine shop practices and procedures, shop mathematics, and precision measuring instruments.

Considerable knowledge of occupational hazards and safety precautions for all types of metal-working machines.

Knowledge of the operating characteristics and maintenance requirements of a wide variety of machine and hand tools.

Ability to read, interpret and use diagrams, sketches, blueprints and manufacturer's maintenance instructions.

Ability to efficiently use precision measuring instruments such as micrometers, calipers, height gauges, hardness testers, mechanical oscillographs.

### Rail Vehicle Machinist (008056)

Ability to develop parts from general descriptions or sketches.  
Ability to troubleshoot and repair shop equipment.  
Ability to work with limited supervision.  
Ability to communicate effectively and produce simple written reports.  
Ability to deal courteously with others, including machinery and vehicle equipment vendors.  
Ability to work variable hours.  
Skill in the machinist trade.

REVISED 11-2-2007

#### **Nature Of Work**

This is skilled work at the journeyman level operating machine tools in the repair, fabrication and machining of rail vehicle machinery and equipment.

Three years of experience as a skilled machinist are required. Completion of a vocational or trade school training program in machine or engine/air-brake shop operation and maintenance may substitute for required experience to a maximum of two years. The MDTA classification of Rail Vehicle Machinist performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

**TRAINING PROCESS:** A limited number of trainee positions will be available. Applicants in the MDT TWU bargaining unit positions, who meet the requirements listed above, will be selected by classification seniority based upon the number of available trainee positions. Those selected will enter the classification of Rail Vehicle Machinist in trainee status. Classroom and on-the-job training will last approximately twenty-six (26) weeks. A written examination will be given at the end of the training. Trainees who pass the test will have completed training successfully. MDT TWU bargaining unit employees (trainees) who successfully complete the training program will be placed by classification seniority order, in probationary status into available vacancies. MDT TWU bargaining unit employees (trainees) completing the training program but not placed, will return to their former classification. They will be placed on a waiting list and will receive preference by classification seniority order for future available Rail Vehicle Machinist positions. The eligibility list and waiting list will remain valid as set forth in the Personnel Rules for the Classified Service. In accordance with labor protective agreements, Miami-Dade Transit Department employees in certain represented positions will be given preference for these positions.

Must present photo identification at the time of application. Employment applications accepted at The Center for Employment Application, 140 West Flagler Street, Suite 105, Miami, Florida from 8:30 am to 4:00 pm on Monday, September 3, 2007 to Friday, October 5, 2007.

### Rail Technician/Train Control (008060)

#### Minimum Qualifications

The MDTA classification of Rail Technician/Train Control performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work in the inspection, repair, installation and maintenance of train control equipment.

Employees in this class are responsible for inspecting, repairing, troubleshooting, installing and maintaining train control equipment on as assigned shift in a public transportation system. Work involves the advanced application of the principles and techniques of electrical and electronic repairs and adjustment to modern train control equipment including mini-bonds, rail connections, signals, track switching machines and motor circuit controls. Employees exercise some independent judgment in the various technical phases of repair, installation, modification and adjustment. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Performs preventive or emergency maintenance of train control equipment on an assigned shift.

Inspects, tests, troubleshoots, repairs and replaces mini-bonds and rail connections.

Inspects, tests, troubleshoots, repairs and replaces signals for dim-outs and black-outs.

Inspects, tests, troubleshoots, repairs and replaces track switching machines for loose and broken bolts and switch adjustments; adjusts track switching machines and motor circuit controls.

Inspects, tests, troubleshoots, repairs and replaces power frequency and loop track circuits for continuity of wiring.

Uses oscilloscopes and frequency counters to identify specific areas of deficiency; uses voltmeters to determine circuit trouble on hard-wire logic circuits.

Observes established safety practices and procedures applicable to the electrical trade and to work in a public transportation system.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles and theories of electricity and electronics as applied to train control equipment.

Considerable knowledge of the mechanical and electrical functioning of train control equipment.

Considerable knowledge of the standard practices, methods, tools and materials of the electronic trade.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work in a public transportation system.

Knowledge of precision test equipment such as oscilloscopes and frequency counters.

Ability to diagnose and repair defects on hard-wire logic circuits.

Ability to diagnose and repair defects on audio frequency electronic track circuits.

Ability to read and understand the positioning of relays.

Ability to work a variety of hours and emergency shifts as required.

Ability to inspect, install, repair and maintain a variety of train control equipment.

Ability to follow verbal and written instructions.

Skill in the diagnosis of electrical and mechanical malfunctions.

Physical strength and agility sufficient to perform assigned duties.

NEW 1-83

#### Nature Of Work

This is advanced skilled technical work in the inspection, repair, installation and maintenance of train control equipment.

### **Rail Technician/Train Control (008060)**

TRAINING PROCESS: A limited number of trainee positions will be available. Applicants in the MDT TWU bargaining unit positions who meet the requirements listed above will be selected by classification seniority based upon the number of available trainee positions. Those selected will enter the classification of Rail Technician/Train Control in Trainee Status. Classroom and on-the-job training will last approximately fourteen (14) weeks. A written examination will be given at the end of the training. Trainees who pass the test will have completed training successfully. MDT TWU bargaining unit employees (trainees) who successfully complete the training program will be placed by classification seniority order with probationary status into available vacancies. MDT TWU bargaining unit employees (trainees) completing the training program but not placed will return to their former classification. They will be placed on an eligible list and will receive preference by classification seniority order for future available Rail Technician/Train Control positions. The eligibility list will remain valid as set forth in the Personnel Rules for the classified service. In accordance with labor protective agreements, Miami-Dade Transit Department employees in certain represented positions will be given preference for these positions.

### Rail Technician/Traction Power (008061)

#### Minimum Qualifications

The MDT classification of Rail Technician/Traction Power performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work in the inspection, repair, installation and maintenance of traction power equipment.

Employees in this class are responsible for inspecting, repairing, troubleshooting, installing and maintaining traction power equipment on an assigned shift in a public transportation system. Work involves the advanced application of the principles and techniques of electrical and electronic repairs and adjustments to traction power equipment including high-voltage AC and DC cables, high-voltage transformers, traction power rectifiers and control wiring. Employees exercise some independent judgment in the varied technical phases of repair, installation, modification and adjustment. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Performs preventive and routine maintenance tasks on traction power equipment including 15KV AC switchgear, 700 volt DC switchgear, and rectification equipment.

Performs emergency and corrective maintenance as required to maintain safety and reliability of equipment.

Inspects, tests and repairs or replaces circuit breakers and/or breaker contacts.

Inspects traction power equipment for loose, broken or worn hardware; tests, repairs or replaces as necessary.

Inspects wet cell batteries for improper output or other malfunctions; tests, repairs or replaces as necessary.

Uses electronic test equipment, digital and analog multimeters in order to identify specific problem areas and institute corrective action.

Troubleshoots basic electrical circuits.

Inspects, maintains and repairs annunciator system.

Inspects, maintains and repairs 15KV transformers and buss ducts.

Maintains work areas in a neat and safe manner.

Observes established safety procedures and practices applicable to the electrical trade and to work in a public transportation system.

Reads and interprets various blueprints and schematic drawings.

Performs standby duty for mainline peak revenue service support.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the principles and theories of electricity and electronics as applied to traction power equipment.

Considerable knowledge of the mechanical and electrical functioning of traction power equipment.

Considerable knowledge of the standard practices, methods, tools and materials of the electronic trade.

Considerable knowledge of the occupational hazards and safety precautions of the electrical trade and of work in a public transportation system.

Knowledge of precision electronic and electrical test equipment.

Knowledge of utility power distribution systems.

Ability to inspect, install, repair and maintain traction power equipment.

Ability to diagnose and repair defects in high-voltage cables, high-voltage transformers and other traction power equipment.

Ability to work a variety of hours and emergency shifts as required.

Ability to follow verbal and written instructions.

Ability to read, interpret and understand blueprints and schematic drawings.

Skill in the diagnosis of electrical and mechanical malfunctions.

### Rail Technician/Traction Power (008061)

REV 8-94

#### **Nature Of Work**

This is advanced skilled technical work in the inspection, repair, installation and maintenance of traction power equipment.

Two years of general electrical and electronic experience to include experience on transformers, high and low voltage, A/C and D/C power systems, batteries, and proficiency in reading schematics and wiring diagrams are required. Must possess Phase 1 of CDL.; or Certificate of Completion in Electronic Technology from an accredited Florida Department of Education Vocational School Certificate Program or comparable certification and one year of electronic repair experience are required. Must possess Phase 1 of CDL.; or Associate of Science degree in Electronic Technology from an accredited college or university will substitute for all required experience. Must possess Phase 1 of CDL. The MDTA classification of Rail Technician/Traction Power performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

**TRAINING PROCESS:** A limited number of trainee positions will be available. Applicants in the MDT TWU bargaining unit positions who meet the requirements listed above will be selected by classification seniority based upon the number of available trainee positions. Those selected will enter the classification of Rail Technician/Traction Power in Trainee Status. Classroom and on-the-job training will last approximately thirteen (13) weeks. A written examination will be given at the end of training. Trainees who pass the test will have completed training successfully. MDT TWU bargaining unit employees (trainees) who successfully complete the training program will be placed by classification seniority order with probationary status into available vacancies. MDT TWU bargaining unit employees (trainees) completing the training program but not placed will return to their former classification. They will be placed on a waiting list and will receive preference by classification seniority order for future available Rail Technician/Traction Power positions. The waiting list will remain valid as set forth in the Personnel Rules for the classified service. In accordance with labor protective agreements, Miami-Dade Transit employees in certain represented positions will be given preference for these positions. Must present photo identification at the time of application. Employment applications accepted at the Center for Employment Application, 140 West Flagler Street, Suite 105, Miami, Florida 33130. Applications accepted from Monday, November 1, 2004 through Tuesday, November 16, 2004, Monday through Friday, 8:30 a.m. to 4:00 p.m.

### Rail Maintenance Worker (008063)

#### Minimum Qualifications

The MDTA classification of Rail Maintenance Worker performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is heavy manual work involving limited skills in various maintenance and construction tasks in a public transportation system. Employees in this class perform laboring tasks requiring some acquired skills in the use of air tools, hydraulic tools, gasoline-powered tools and other construction and maintenance related equipment. Duties may include general maintenance work on tracks, structures and in the right-of-way, cleaning functions, and assisting in the installation and repair of equipment and facilities. Routine tasks are performed with some independence and more difficult work is performed under the supervision of a skilled technician or supervisor. Work is reviewed in progress and upon completion for satisfactory performance of assigned tasks and duties.

##### ILLUSTRATIVE TASKS

Performs laboring tasks on the aerial and ballasted sections of the right-of-way.  
Removes loosened pavement around track work needing repair or replacement; loads rubble on trucks or work trains, unbolts tie-rods and bolts, installs track plates, cleans switches and lubricates track.  
Assists in handling and assembling track materials.  
Digs trenches for retaining walls and foundations, cleans out floor drains, mixes concrete and performs routine landscaping tasks.  
Assists in installing and repairing shop equipment, overhead doors, hydraulic lifts, cleaning boilers and repairing and installing fences.  
Sweeps, mops and machine cleans rail stations and approaches, including traction power areas, train control rooms, and public restrooms.  
Operates various transportation system vehicles as required.  
Observes established safety practices and procedures applicable to laboring work in a public transportation system.  
Operates air tools, hydraulic tools, gasoline-powered tools and other construction and maintenance related equipment.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of power tools and equipment used in construction and maintenance activities.  
Knowledge of the occupational hazards and safety precautions applicable to laboring work in a public transportation system.  
Ability to read and write.  
Ability to understand and follow verbal and written instructions.  
Ability to operate power tools and equipment.  
Ability to operate various transportation system vehicles.  
Ability to work from ladders and other height reaching devices.  
Ability to work a variety of hours and emergency shifts as required.  
Skill in the use of power tools and equipment.  
Physical strength and agility sufficient to perform assigned duties.

### Rail Maintenance Worker (008063)

NEW 1-83

#### **Nature Of Work**

This is heavy manual work involving limited skills in various maintenance and construction tasks in a public transportation system.

### Track Repairer (008064)

#### Minimum Qualifications

The MDT classification of Track Repairer performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is semi-skilled work in the performance of a variety of track maintenance and repair tasks in a public transportation system. Employees in this class perform semi-skilled tasks in the repair, maintenance and construction of trackwork, busways, loading platforms and other related structures. Duties include operating hand tools and machinery related to track repair work, removing and replacing track plates, ties and tie rods, and assisting with the placement of rails. Routine tasks are performed with some independence and more difficult work is performed under the supervision of a superior. Work is reviewed in progress and upon completion for satisfactory performance of assigned tasks and duties.

##### ILLUSTRATIVE TASKS

- Performs semi-skilled tasks in the repair, maintenance and construction of trackwork, busways, loading platforms and related aerial structures.
- Operates and performs minor maintenance on hand tools and machines related to track repair work including impact machines, rail saws and rail drills.
- Inspects trackwork for defects such as broken bolts and loose brackets.
- Removes and replaces track plates, ties and tie rods.
- Assists with the placement of rails.
- Receives and transmits messages by radio or telephone.
- Performs welding and grinding tasks as required.
- Mixes and applies concrete and asphalt, installs drainage pipes and digs ditches as required.
- Works in a frog (steel shop) and rail shop fabricating and repairing various track and related components for installation.
- Observes established safety practices and procedures applicable to track maintenance and repair work in a public transportation system.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Considerable knowledge of standard tools, materials, techniques and practices as applied to track repair and maintenance work.
- Considerable knowledge of the occupational hazards and safety precautions applicable to track maintenance and repair work in a public transportation system.
- Ability to operate hand tools and machinery used in track repair and maintenance activities.
- Ability to follow verbal and written instructions.
- Ability to work a variety of hours and emergency shifts as required.
- Ability to operate landline telephone and radio devices.
- Ability to work in a steel or rail shop as necessary.
- Ability to perform minor maintenance on hand tools and other equipment.
- Skill in the use of hand tools and related equipment.
- Physical strength and agility sufficient to perform assigned duties.

NEW 1-83

#### Nature Of Work

This is semi-skilled work in the performance of a variety of track maintenance and repair tasks in a public transportation system.

**TRAINING PROCESS:** A limited number of trainee positions will be available. Applicants in the MDTA TWU bargaining unit positions, who meet the requirements listed above, will be selected by classification seniority based upon the number of available trainee positions.

## Human Resources Department

### Track Repairer (008064)

Those selected will enter the classification of Track Repairer in trainee status. Classroom and on-the-job training will last approximately eight (8) weeks. A written examination will be given at the end of training. Trainees who pass the test will have completed the training successfully. MDTA TWU bargaining unit employees (trainees) who successfully complete the training program will be placed, by classification seniority order, in probationary status into available vacancies. MDTA TWU bargaining unit employees (trainees) completing the training program but not placed, will return to their former classification. They will be placed on an eligible list and will receive preference by classification seniority order for future available Track Repairer positions. The eligible list will remain valid as set forth in the Personnel Rules for Classified Service. In accordance with labor protective agreements, Miami-Dade Transit Agency employees in certain represented positions will be given preference for these positions. Applicants requesting Veterans' Preference must submit Veterans' Preference documents and complete a Veteran's Preference Claim Form at the time of application. Photo identification, such as a Driver license is required at the time of application. Employment applications are accepted at the Center for Employment Application, 140 West Flagler Street, Suite 105, Miami, Florida 33130 from Monday, January 3, 2005 through Tuesday, January 18, 2005 from 8:30 a.m. to 4:00 p.m., Monday through Friday.

### Rail Structural Repairer (008065)

#### Minimum Qualifications

The MDT classification of Rail Structural Repairer performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work in the inspection and repair of rail related structures.

Employees in this class perform skilled tasks in the repair and maintenance of rail related structures, including stations, aerials, piers and girders. Duties include resurfacing concrete, refinishing surfaces, welding, strengthening weakened sections, painting aerial structures and operating a variety of power tools. Employees exercise some independent judgment in the various technical phases of repair, inspection and maintenance of rail structures. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory repair and maintenance of rail structures.

##### ILLUSTRATIVE TASKS

Inspects track and rail structures including stations, aerials, piers and girders to determine their serviceable condition.

Makes necessary repairs to rail and rail related structures including the resurfacing of concrete, refinishing surfaces, repair of fencing, strengthening of weakened sections and painting of aerial structures.

Performs general carpentry work and skilled welding.

Operates various power tools and hi-rail equipment; rigs cranes and materials for movement.

Performs tasks at heights and during varying weather conditions.

Coordinates work related activities with work trains and other rail crews and equipment as necessary; maintains communications with central control as required.

Responds to emergency situations as required.

Prepares written reports of findings and actions taken to make appropriate repairs.

Observes established safety practices and procedures applicable to the structural repair trade and to work in a public transportation system.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the rail and rail related tools, materials, techniques and practices as applied to rail structural repair and rail maintenance work.

Considerable knowledge of the occupational hazards and safety precautions applicable to structural repair and maintenance work in a public transportation system.

Considerable knowledge of the specialized methods and techniques required to inspect and maintain rail structures including aerials, and steel and concrete stress indicators.

Knowledge of the methods, techniques and practices of welding.

Ability to follow verbal and written instructions.

Ability to prepare written reports on observations and required actions.

Ability to work a variety of hours and emergency shifts as required.

Ability to operate a variety of power tools and hi-rail equipment.

Ability to communicate effectively, verbally and in writing.

Ability to work at heights.

Skill in the use of power tools and equipment.

Skill in welding.

Physical strength and agility sufficient to perform assigned duties.

### Rail Structural Repairer (008065)

NEW 1-83

#### **Nature Of Work**

This is advanced skilled technical work in the inspection and repair of rail related structures.

### Track Equipment Operator (008066)

#### Minimum Qualifications

The MDT classification of Track Equipment Operator performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is skilled work in the operation and maintenance of track and related support equipment.

Employees in this class operate large pieces of heavy equipment and perform related tasks in the maintenance and construction of trackwork, busways, loading platforms and other public transportation facilities. Duties include operating a pettibone speed swing and attachments, switcher-crane, utility vehicles and other hi-rail equipment. Related tasks include performing minor maintenance on equipment as well as occasionally performing major maintenance, repair and overhaul work. Employees in this class are required to exercise a considerable degree of manipulative skill and dexterity in the operation of heavy equipment and caution in safeguarding persons and property during equipment operation. Supervision is received from a technical superior who reviews work in progress and upon completion for effective equipment operation, proper repair and maintenance work, and adherence to established safety procedures.

##### ILLUSTRATIVE TASKS

Operates large pieces of heavy equipment including pettibone speed swing and its attachments, switcher-cranes, utility vehicles, hi-rail dump trucks, Motor Car-Diesels and related hi-rail heavy equipment.

Performs tasks in the maintenance and construction of track and structure work, busways, loading platforms and other facilities.

Performs minor maintenance on equipment including lubrications and adjustments; occasionally performs major repair and overhaul work as assigned.

Installs and removes various attachments to assigned vehicles.

Receives and transmits messages by telephone and radio.

Rigs loads to be lifted or moved from one place to another.

Performs track switching and train coupling operations as required.

Coordinates work with work train and other support equipment in performing assigned tasks as necessary.

Performs tasks in the frog (steel shop) and rail shop as required.

Operates vehicles on roadways as necessary.

Observes established safety practices and procedures applicable to the operation of a variety of heavy equipment and to work in a public transportation system.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operating characteristics and safety precautions required in the operation of a variety of heavy equipment.

Considerable knowledge of the occupational hazards and safety precautions applicable to heavy equipment operation in a public transportation system.

Considerable knowledge of the methods and techniques of rigging loads to be lifted and moved from one location to another using heavy equipment.

Knowledge of the geographical layout of the rapid-rail system.

Ability to safely and effectively operate a variety of heavy equipment.

Ability to repair and maintain a variety of heavy equipment.

Ability to install and remove various attachments to assigned equipment.

Ability to coordinate work with related support equipment.

Ability to operate telephone equipment and radio devices.

Ability to work a variety of hours and emergency shifts as required.

Ability to follow verbal and written instructions.

Skill in the operation of heavy equipment.

### Track Equipment Operator (008066)

Physical strength and agility sufficient to perform assigned duties.

NEW 1-83

#### **Nature Of Work**

This is advanced skilled technical work in the inspection and repair of rail related structures.

If vacancies are available after all MDTA TWU bargaining unit employees are placed, applicants from outside the MDTA TWU bargaining unit will be selected for trainee positions based upon a structured interview.

### Rail Vehicle Electronic Technician (008068)

#### Minimum Qualifications

The MDT classification of Rail Vehicle Electronic Technician performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work in the inspection, repair and maintenance of rail vehicle electronic equipment.

Employees in this class are responsible for inspecting, diagnosing, testing and repairing various electronic systems, sub-systems and components used in rail vehicles in a public transportation system. Work involves the advanced application of the principles and techniques of electronic repair to rail vehicle electronic equipment and related test units including automatic train operation equipment. Employees exercise some independent judgment in the various technical phases of repair, diagnosis and testing. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Follows written procedures and inspects, troubleshoots, diagnoses and repairs various electronic systems, sub-systems and components used in rail vehicles.

Conducts preventive maintenance inspections and maintains heavy rail car electrical/electronic onboard equipment including the control logic for the propulsion and automatic train operation systems, high voltage converter, motor control boxes, semi-conductor boxes, traction motors, electrical/pneumatic couplers, HVAC systems, front end circuits and trainline circuits.

Uses test equipment to perform preventive maintenance including multimeters, ammeters, oscilloscopes, power supplies, pressure transducers, chart recorders, dial indicators, refrigeration test gauges, vacuum pumps, door testers, motor control box testers, converter testers, ATO simulators, and propulsion logic simulators.

Troubleshoots and repairs electrical and electronic onboard propulsion systems equipment including the propulsion system logic (CPU), automatic train operation equipment (ATO logic), semi-conductor box, motor control box, line switch box, control circuits for the propulsion system, controls for electrical rectification, HVAC control circuits, trainline circuits, electro/pneumatic couplers, door controls, HVAC equipment and front end controls.

Reads and interprets schematic diagrams, wiring diagrams and rail vehicle electronic operation manuals.

Evaluates equipment malfunction reports.

Monitors mainline for service disruptions; works under the guidance of Central Control during revenue service hours to resolve service disruptions or equipment malfunctions.

Reports all system faults and any repeat failures to supervisor; responds to emergencies caused by electronic systems breakdowns.

Performs minor servicing to traction motors; dismantles and services DC motors; inspects and cleans; changes bearings, seals, brushes and brush holders; tests repaired motors prior to returning to service.

Rebuilds electrical and electronic components such as line switches, field controllers, power/brake controllers, electro/pneumatic couplers, thyristers and power diodes.

Participates in training programs and instructs employees in electric/electronic repairs.

Observes established safety practices and procedures applicable to the electronic trade and to work in a public transportation system.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the principles and theories of electronics as applied to rail vehicle electronic equipment.

Considerable knowledge of functions of electronic/electrical systems, subsystems, components and printed circuit boards used in rail vehicles.

Considerable knowledge of the standard practices, methods, tools and materials of the electronic trade.

Considerable knowledge of the occupational hazards and safety precautions of the electronic trade.

Knowledge of precision test equipment such as multimeters, ammeters and oscilloscopes.

Ability to diagnose, repair or replace defective electronic equipment used in rail vehicles.

### **Rail Vehicle Electronic Technician (008068)**

Ability to read and understand schematic diagrams, wiring diagrams and rail vehicle electronic operation manuals.  
Ability to work various shifts.  
Ability to follow verbal and written instructions.  
Ability to use electronic diagnostic testing devices.  
Ability to keep accurate records and prepare reports.  
Skill in the inspection, diagnosis and repair of electronic malfunctions.

REV 9-94

#### **Nature Of Work**

This is advanced skilled technical work in the inspection, repair and maintenance of rail vehicle electronic equipment.

### Rail Vehicle Cleaner (008069)

#### Minimum Qualifications

The MDT classification of Rail Vehicle Cleaner performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is manual work in the maintenance and cleaning of rail vehicles in a public transportation system.

Employees in this class perform manual work to maintain rail vehicles in a clean and sanitary condition. Duties include cleaning the interior and exterior of rail vehicles and assisting in maintaining the cleanliness of shop areas. Work is routine and generally repetitive in nature. Supervision is received from a supervisor who reviews work in progress and upon completion for satisfactory performance of assigned duties.

##### ILLUSTRATIVE TASKS

Sweeps and mops vehicle interior; removes debris left in vehicle by passengers.  
Cleans vehicle windows; removes graffiti from vehicles.  
Inspects vehicles for personal property left by passengers and releases lost items to supervisor.  
Reports damage or unusual conditions such as broken windows or loose seats to supervisor.  
Assists in cleaning and maintaining cleanliness of shop areas, as required.  
Observes established safety procedures and practices.  
Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Some knowledge of cleaning equipment and materials used in rail vehicle cleaning work.  
Some knowledge of established safety procedures and practices.  
Some knowledge of departmental procedures concerning lost items.  
Ability to understand and follow verbal and written instructions.  
Ability to work various shifts.  
Ability to read and write English.  
Physical strength and agility required to perform assigned duties.

NEW 1-83

#### Nature Of Work

This is manual work in the maintenance and cleaning of rail vehicles in a public transportation system.

### Rail Vehicle Mechanic (008071)

#### Minimum Qualifications

The MDT classification of Rail Vehicle Mechanic performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled mechanical work at the journeyman level in the repair and maintenance of rail vehicle mechanical equipment.

Employees in this class perform skilled mechanical work in all phases of maintenance, repair and overhaul of rail vehicle mechanical equipment. Duties include the repair, overhaul and maintenance of wheel and axle assemblies, friction brakes, traction motors, gear boxes and rail vehicle interior equipment. Related duties include operating various pieces of machine shop equipment and welding equipment. Employees work independently in accordance with diagrams, sketches, operations manuals and maintenance instructions. Supervision is received from a technical superior who reviews work in progress and upon completion for satisfactory performance of equipment installed, repaired or maintained.

##### ILLUSTRATIVE TASKS

Inspects, troubleshoots, tests and repairs heavy mechanical equipment on rail vehicles; removes wheel and axle assemblies, traction motors, gear boxes, brake actuators, compressors, and HVAC condenser compressor assemblies.

Operates overhead cranes, forklifts, pneumatic tools and torque wrenches for the removal and replacement of rail vehicle mechanical equipment.

Observes vehicle mechanical systems and devices in operation to detect failures, determine causes and implement corrective action.

Reads and follows diagrams, sketches, vehicle operation manuals, and vehicle maintenance instructions.

Conducts preventive maintenance inspections and effects repairs including the cleaning, washing and replacement of AC coils, equipment box covers, collector assemblies and traction motor filters; inspects and replaces couplers and draft gear, current collectors, trucks and suspensions, friction brakes, interior seating, windows, interior panels, flooring and doors.

Conducts daily inspections of the fleet of rail vehicles for any dragging equipment, defective wheels or brake shoes, leaking HVAC condenser assemblies, and defective air compressors.

Records fleet mileage weekly in accordance with instructions.

Operates welding equipment and performs welding on machinery and equipment.

Participates in training programs and instructs helpers in mechanical repair and maintenance tasks.

Observes established safety practices and procedures in the performance of mechanical work and in work in a public transportation system.

Performs related work as required.

8071

#### RAIL VEHICLE MECHANIC (Cont'd)

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of mechanics and the mechanical trade.

Considerable knowledge of the tools and equipment used in the mechanical repair and maintenance of rail vehicle mechanical equipment.

Considerable knowledge of the operating characteristics and maintenance requirements of rail vehicle mechanical equipment.

Knowledge of the occupational hazards and safety precautions of mechanical repair work, welding and machine shop equipment operations.

Knowledge of methods and techniques of welding.

Knowledge of methods, practices, tools and equipment of the mechanical trade.

Ability to diagnose, repair and maintain a variety of rail vehicle mechanical equipment.

Ability to read and interpret diagrams, drawings and vehicle operations manuals.

Ability to understand and follow verbal and written instructions.

### **Rail Vehicle Mechanic (008071)**

- Ability to work various shifts.
- Ability to use tools, equipment and materials of the mechanical trade.
- Skill in the diagnosis and repair of mechanical equipment.
- Skill in welding.
- Skill in the care and use of power-driven machinery.
- Physical strength and agility sufficient to perform assigned duties.

#### **MINIMUM QUALIFICATIONS**

One year of mechanical experience in the repair and maintenance of heavy transport vehicles and equipment; graduation from a standard high school or the equivalent.

REV 07-08

#### **Nature Of Work**

This is advanced skilled mechanical work at the journeyman level in the repair and maintenance of rail vehicle mechanical equipment.

**TRAINING PROCESS:** A limited number of trainee positions will be available. Applicants in the MDT TWU bargaining unit positions, who meet the requirements listed above, will be selected by classification seniority based upon the number of available trainee positions. Those selected will enter the classification of Rail Vehicle Mechanic in trainee status. Classroom and on-the-job training will last approximately sixteen (16) weeks. A written examination will be given at the end of the training. Trainees who pass the test will have completed training successfully. MDT TWU bargaining unit employees (trainees) who successfully complete the training program will be placed by classification seniority order, in probationary status into available vacancies. MDT TWU bargaining unit employees (trainees) completing the training program but not placed, will return to their former classification. They will be placed on a waiting list and will receive preference by classification seniority order for future available Rail Vehicle Mechanic positions. The waiting list will remain valid as set forth in the Personnel Rules for the Classified Service. Must present photo identification at the time of application. Employment applications accepted at the Center for Employment Application, 140 West Flagler Street, Suite 105, Miami, Florida from 8:30 a.m. to 4:00 p.m. on Monday, October 18, 2004 to Friday, November 5, 2004.

### Train Operator (008073)

#### Minimum Qualifications

This is varied rail vehicle operation and public contact work in a public transportation system. Duties include working on an elevated guideway, operating and preparing rail vehicles for routine passenger service, and/or returning vehicles to storage areas.

Twelfth grade education/High school diploma or GED is required. Must possess a valid Florida Driver license. The MDT Train Operator classification performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. First opportunity will be given to applicants in the Transport Workers Union bargaining (TWU) unit. Miami-Dade County employees appointed to Train Operator Trainee will receive a minimum trainee rate during the training period. Some trainee rates may be higher depending upon current pay rate and/or date of hire into the County service. After training, normal promotional pay adjustments will apply. Upon completion, trainee must receive a passing score on training. Proof of education to meet minimum qualifications will be verified.

#### Job Specifications

##### NATURE OF WORK

This is varied rail vehicle operation and public contact work in a public transportation system. Duties include working on an elevated guideway, operating and preparing rail vehicles for routine passenger service, mainline testing and special events and to return vehicles to storage areas. Additional responsibilities may include assignments to rail stations for the purpose of providing passengers with information and assisting them with safety and comfort. Employees assigned to vehicle storage areas may be responsible for preparing vehicles for passenger service through a pre-departure testing procedure or returning vehicles to storage. Employees are responsible for operating rail vehicles in accordance with established departmental rules, regulations, procedures and safety practices. Supervision is received from a supervisor who reviews work for conformance with applicable rules and regulations and for efficiency in the performance of passenger service and other related duties.

##### ILLUSTRATIVE TASKS

Prepares rail vehicles for passenger service or storage and reports any damage, defect or equipment malfunctions to the appropriate supervisor.

Performs predeparture testing using established departmental procedures.

Operates rail vehicle for routine passenger service in accordance with established departmental rules, regulations, procedures and safety practices.

Observes the right-of-way during rail vehicle operation and watches for obstructions, damaged equipment or other hazards which might interfere with the safe passage of trains; reports these circumstances to proper authority promptly.

Communicates to passengers at rail stations a variety of information such as the name of the next rail station enroute, reasons for delays and other responses to passenger inquiries.

Promptly reports to proper authorities any abnormal conditions or actions, legal or illegal that may interface with the safety and comfort of passengers.

Prepares and submits to supervisor all necessary reports such as trip cards, defect cards, passenger comments and reports of unusual occurrences.

Operates controls for elevators, escalators, fare collection boxes and station lighting.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operating rules, regulations, procedures and safety practices applicable to rail vehicle operation.

Considerable knowledge of the geographical layout, facilities, and passenger service operations of the rail transportation system.

Considerable knowledge of emergency procedures in a rail transportation system.

Knowledge of the operating characteristics of rail vehicles.

### Train Operator (008073)

Knowledge of public relations principles and techniques.  
Knowledge of hazards which might interfere with the safe passage of trains.  
Knowledge of records, forms and reports applicable to the area of assignment.  
Ability to safely operate rail vehicles and rail vehicular equipment.  
Ability to deal courteously and tactfully with the public.  
Ability to react promptly and correctly under emergency conditions.  
Ability to work various hours and emergency shifts.  
Ability to operate portable and stationary radio communications equipment.  
Ability to read and interpret information from electronic gauges.  
Ability to distinguish colors one from another.  
Ability to operate rail vehicles at heights.

NEW 1-83

#### **Nature Of Work**

This is varied rail vehicle operation and public contact work in a public transportation system.

The pre-training examination will evaluate the ability to follow written instructions regarding operating rules and procedures, safety practices and emergency procedures, passenger service operations, operating characteristics of a rail vehicle, public relations, the safe passage of vehicles, and radio communications. Those applicants that qualify on the pre-examination will be placed by classification seniority order into trainee positions. Applicants must apply online at [www.miamidade.gov/jobs/](http://www.miamidade.gov/jobs/) on the Online Employment Application Site from Wednesday, March 31, 2010 through Wednesday, April 14, 2010. **APPLICANTS WILL BE NOTIFIED VIA E-MAIL OF THE DATE, TIME AND LOCATION OF THE PRE-TRAINING EXAMINATION.** Additionally, employees will be notified by MDT Personnel. The doors to the test facility will close promptly at the time indicated. No one will be admitted for registration after the doors to the test facility have been closed. Promptness is required. Photo identification, such as a Driver's license, is required to be admitted to the written examination. **NO CELLUAR PHONES OR ANY OTHER ELECTRONIC DEVICES ARE PERMITTED IN THE TEST FACILITY.**

**TRAINING PROCESS:** A limited number of trainee positions will be available. Applicants in the MDT TWU bargaining unit positions, who meet the requirements listed above, will be selected by classification seniority based upon the number of available trainee positions. Those selected will enter the classification of Train Operator in trainee status. Classroom and on-the-job training will last approximately nine (9) weeks. A post-training examination will be given at the end of training to evaluate what was learned in the training. Trainees who pass the test will have completed the training successfully. MDT TWU bargaining unit employees (trainees) who successfully complete the training program and a Train Operator Trainee Physical Dexterity Assessment will be placed by classification seniority order, in probationary status into available vacancies. Trainees will be placed on a waiting list and will receive preference by classification seniority order for future available Train Operator positions. Attendance records and disciplinary history will be reviewed. MDT TWU bargaining unit employees (trainees) completing the training program but not placed, will return to their former classification. The waiting list will remain valid as set forth in the Personnel Rules for the Classified Service.

### Rail Stock Clerk (008074)

#### Minimum Qualifications

High school diploma or GED. Must possess proof of passing the General Knowledge Test of the CDL/Class B. As a condition of continued employment, a CDL/Class B with Air-Brake testing must be obtained prior to the completion of the probationary period. The MDT classification of Rail Stock Clerk performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is technical and advanced clerical work in the receipt, storage and issuance of parts, tools, materials and supplies for heavy and light-rail transit systems.

Employees in this class perform a variety of manual and clerical tasks in the receipt, storage, and issuance of rail parts and other materials and supplies for heavy and light-rail transit systems. Duties include verifying and documenting materials received, preparing correspondence, reports and memoranda, issuing items in response to requisitions, monitoring stock, and assisting with physical inventories. Incumbents are required to move heavy material, lift boxes, and climb ladders, as necessary, and operate forklifts and drive trucks. Supervision is received from a senior supply official who reviews work for adherence to established policies, procedures, and standards.

##### ILLUSTRATIVE TASKS

Receives shipments and verifies quantity and quality of materials; documents receipt of products and maintains required files and records.

Composes and types letters, reports and internal memoranda related to vendor correspondence, uniform reports, defective material receipts, vendor return authorizations, backorders, requisition follow-up, poor on-time vendor performance, and related matters.

Issues items in response to authorized requisitions and records transactions on manual records or by entering information into a computer terminal.

Monitors stocks on hand and requisitions materials in short supply; verifies the issue and receipt of tools and uniforms; assists with physical inventories.

Moves heavy materials, lifts boxes and climbs ladders, as necessary; rearranges storage areas, builds shelving and stocks material in assigned locations; packages material for shipment and arranges for transportation; pulls and stages stock for internal distribution.

Operates forklifts, drives trucks, and automotive equipment.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of warehousing and inventory practices in a heavy and light-rail transit system supply operation.

Knowledge of types, sizes, grades and nomenclature of heavy and light-rail parts, equipment and supplies.

Knowledge of safety practices and procedures applicable to warehousing and distribution of rail system supplies and materials.

Knowledge of recordkeeping procedures, forms, and reports in the area of assignment.

Ability to receive, store, and issue a variety of rail parts, tools, supplies and materials.

Ability to compose and type a variety of internal and external correspondence.

Ability to perform routine arithmetic calculations quickly and accurately.

Ability to operate a computer terminal.

Ability to operate forklifts and drive trucks and automotive equipment.

Physical strength and agility sufficient to perform assigned duties.

### Rail Stock Clerk (008074)

#### **Nature Of Work**

This is technical and advanced clerical work in the receipt, storage and issuance of parts, tools, materials and supplies for heavy and light-rail transit systems.

Must take and pass a typing skills test with a score of 20 words per minute. Photo identification is required to take the typing skills test.

### Rail Maintenance Clerk (008076)

#### Minimum Qualifications

High school diploma or GED. Six months of clerical work experience are required. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical work processing and maintaining rail maintenance records in a rail transportation system.

Employees in this class perform routine clerical tasks in the maintenance of records pertaining to rail vehicles, train control communications, traction power and track maintenance equipment. Duties include sorting work orders in numerical order, computing totals of fuel, lubricants and oil used, comparing fuel disbursed from pumps with meter readings, posting rail vehicle and rail equipment mileage and performing related clerical duties. Additional work may involve assignment to personnel recordkeeping tasks or assistance in rail equipment repair and accident recordkeeping. Incumbents operate standard office equipment. Supervision is received from a technical or administrative supervisor who reviews work for accuracy and thoroughness.

##### ILLUSTRATIVE TASKS

Places work orders in numerical order by section; computes totals of fuel, gas and oil used by non-electrically powered vehicles; totals amounts of lubricants and oils used by each rail vehicle or other equipment; searches for errors or makes corrections.

Posts daily mileage for each rail vehicle on a monthly mileage record board; posts accumulated mileage for preventive maintenance; posts total hours in revenue service and/or operation; completes maintenance related reports.

Computes daily and monthly totals of fuel, oil and lubricants consumed by rail maintenance equipment; computes total work time for employees according to established personnel record procedures, as assigned.

Keeps various activity and production records which may involve assembling reports from other sections of the division.

Types correspondence generally of a maintenance nature including maintenance procedures, forms, component evaluations and modifications.

Completes or assists other employees in completing personnel forms as assigned, according to established procedures; obtains and types employee injury report forms and refers employees for medical treatment as needed.

Answers telephone and performs other general office clerical duties.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of departmental policies and procedures pertaining to the processing and maintenance of rail maintenance records.

Knowledge of transportation system office procedures concerning rail maintenance recordkeeping.

Knowledge of the records, reports and forms used in rail maintenance activities.

Knowledge of business arithmetic.

Ability to follow verbal and written instructions.

Ability to operate standard keyboard typing equipment, calculators and related office equipment.

Ability to maintain effective working relations with supervisors and other employees.

Ability to complete arithmetic computations quickly and accurately.

Ability to complete various clerical processes regarding rail maintenance records quickly and accurately.

NEW 1-85

#### Nature Of Work

This is specialized clerical work processing and maintaining rail maintenance records in a rail transportation system.

Must take and pass a typing skills test with a minimum score of 20 WPM. Photo identification is required to take the typing skills test.

### Rail Maintenance Control Clerk (008077)

#### Minimum Qualifications

High school diploma or GED. One year of clerical work experience is required. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced specialized clerical work in processing and maintaining rail maintenance records in a rail transportation system. Employees in this class perform routine and advanced clerical tasks in the processing and maintenance of records of rail equipment, overhaul and accident records, and in the initiation of repair orders. Duties include compiling road repair records on individual rail vehicles or equipment, initiating repair orders for scheduled, unscheduled and preventive maintenance, maintaining detailed records of rail equipment replaced, repaired or overhauled, completing accident cost records, and entering and retrieving information from a computerized information system. Responsibilities include checking and verifying non-routine maintenance data for preparation of maintenance reports. Supervision is received from a technical or administrative superior who periodically reviews work for accuracy and thoroughness and assists with difficult problems.

##### ILLUSTRATIVE TASKS

Enters and retrieves maintenance information from a computerized information system and assists a technical supervisor in the maintenance and update of computerized equipment maintenance records; disseminates information to various work units and sections as required.

Checks and issues repair orders and posts to all rail equipment record cards any repairs/changes made on the equipment; files repair orders cards as instructed.

Completes request forms for estimated cost of rail equipment damage repairs; types invoice billings upon receipt of completed estimates; maintains records of accident dates, estimated cost and final actual costs of repairs.

Compiles report of maintenance work completed on all rail equipment.

Researches and compiles data for non-analytical reports.

Completes job estimates, work plans and work completion records.

Reviews and maintains an extensive recordkeeping system relating to maintenance activities, personnel roster, attendance records, updating manuals and general filing.

Computes total work time for employees and posts time cards according to established procedures as assigned.

Types both draft and final form correspondence of a technical nature as well as memos, letters, maintenance procedures, maintenance directives, component evaluations and modifications as required in support of operations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of policies and procedures pertaining to the processing and maintenance of rail maintenance records.

Considerable knowledge of transportation system office procedures concerning rail maintenance recordkeeping.

Considerable knowledge of the records, reports and forms used in rail maintenance activities.

Knowledge of the operation of computerized equipment used to enter and retrieve information concerning rail maintenance records.

Knowledge of business arithmetic.

Ability to complete various clerical processes regarding rail maintenance records accurately and quickly.

Ability to follow verbal and written instructions.

Ability to review maintenance records and initiate repair order requests.

Ability to operate standard keyboard typing equipment, calculators and related office equipment.

Ability to detect and correct clerical errors in narrative and statistical documents.

Ability to maintain effective working relations with supervisors and other employees.

Ability to complete arithmetic computations quickly and accurately.

Ability to enter and retrieve information using a computerized information system.

### Metromover Technician (Trainee) (008082)

#### Minimum Qualifications

High school diploma or GED. One year of technical school coursework in Electronics is required. Three years of journeyman level maintenance experience on transit vehicles and related electrical, electronic, hydraulic and pneumatic support systems; OR High school diploma or GED. Three years of experience as a technician in the electronics field to include of analog and digital circuits, and solid state electronics are required; OR High school diploma or GED. Three years of experience at the journeyman level in air-conditioning, hydraulic/pneumatic systems, brakes and suspensions are required. One year of journeyman level electronic or mechanical experience in a transit-related field may substitute for the required year of technical school education; or One additional year of technical school education may substitute for one of the three years of experience. Must possess a valid driver's license. The MDTA classification of Metromover Technician performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced skilled technical work in the maintenance and repair of Metromover vehicles, wayside systems, central control systems and related equipment.

Employees in this class perform skilled electronic, electrical, mechanical and electro-mechanical tasks in the inspection diagnosis, repair and maintenance of Metromover vehicles, wayside systems and central systems. Responsibilities include troubleshooting, determining causes of failure and completing complex repairs, performing modifications and retrofits, performing corrective and preventive maintenance, and inspections and adjustments to system components of electronic, electrical, mechanical, electro-mechanical, hydraulic and pneumatic equipment, utilizing procedures, manuals, drawings and schematics. Employees exercise independent judgment in the diagnosis and repair of complex maintenance problems and provide advise and direction to other technicians in the performance of work assignments. Supervision is received from a technical supervisor who periodically reviews and inspects work in progress and assists with difficult or unusual problems.

##### ILLUSTRATIVE TASKS

Performs preventive maintenance on Metromover vehicles, wayside systems, central control systems, electrical, mechanical and pneumatic equipment and components, in accordance with established procedures and schedules.

Performs corrective maintenance on Metromover vehicles, wayside systems, central control systems, electrical, mechanical and pneumatic equipment and components involving the repair or replacement of defective parts utilizing established procedures, manuals, drawings and schematics.

Troubleshoots, diagnoses and repairs complex problems on Metromover vehicles, wayside systems, central control systems equipment and components.

Provides direction, assistance and advise to other technicians.

Responds to system failures to recover vehicles and restore system operations; assists passengers during system failure or in emergencies.

Operates vehicle and wayside systems in manual mode.

Maintains tools, equipment and work areas in a clean and orderly manner.

Prepares various reports, forms and logs as required.

Observes established safety practices and procedures.

Inspects work of other technicians to assure work is done correctly.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the principles of electronics, electricity, mechanics, hydraulics, and pneumatics

## Human Resources Department

### Metromover Technician (Trainee) (008082)

Considerable knowledge of the operating characteristics and maintenance requirements of Metromover vehicle systems including propulsion, ATO, doors, HVAC, brakes, and communications.

Considerable knowledge of the operating characteristics and maintenance requirements of Metromover wayside systems, including PDS, ATO, and guideway switches.

Considerable knowledge of the occupational hazards and safety precautions applicable to the area of assignment.

Considerable knowledge of Metromover vehicle equipment maintenance schedules and priorities.

Knowledge of the standard methods, tools and materials used in the area of assignment.

Ability to diagnose, repair and replace complex defective equipment used in a Metromover system.

Ability to read and understand schematics, blueprints, drawings and maintenance instructions.

Ability to work independently with a minimum of supervision.

Ability to prepare reports, forms and logs.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to communicate clearly, using radio equipment.

Ability to work various shifts as required.

Ability to work at heights.

Skill in the diagnosis, repair and preventive maintenance of electrical and mechanical systems.

Skill in the use of tools and test equipment used in corrective and preventive maintenance of Metromover systems.

NEW 6-91

#### Nature Of Work

This is advanced skilled technical work in the maintenance and repair of Metromover vehicles, wayside systems, central control systems and related equipment.

**WRITTEN EXAMINATION:** The written examination will evaluate knowledge of electronics, electricity, motors, mechanics, hydraulics, pneumatics, air conditioning (HVAC), brakes and standard methods, tools, and materials. The written examination will be based on information contained in the authorized Metromover Technician Trainee pre-examination study package. The study package will ONLY be distributed to 100 applicants based on classification seniority. Once the 100 applicants have been selected, they will be notified and study packages will be available at the Lehman Center, East Mezzanine Training Center, 6601 NW 72nd Avenue between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday only. All study materials must be returned to the MDT Human Resources Training section within one week after the exam, in the original condition received. If any portion of the study package is lost, damaged or stolen, report it immediately to the Human Resources Training Section at (305) 889-6713. Employees shall be held accountable for the safekeeping of MDT study materials. The loss or damage of MDT study materials as a result of negligence or willful misconduct will subject employees to the appropriate administrative action. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of .50 points per year of continuous, full-time service in the County service to a maximum credit of ten years of service or five points. Applicants requesting veterans' preference must submit veterans' preference documents at the time of application. Employment applications accepted at: Center for Employment Application, 140 West Flagler Street, Suite 105, Miami, Florida 33130 from Monday, March 28, 2005 through Monday, April 11, 2005 from 8:30 a.m. to 4:00 p.m. Monday through Friday. Applicants will be notified of the location, date and time of the examination via U.S. Mail. The doors to the test facility will be closed at the end of the scheduled registration time, which will be indicated on the notification. No one will be admitted for registration after the doors of the test facility have been closed. Promptness is required. Photo identification, such as a Driver license, is required to be admitted to the written examination. **ADDITIONAL INFORMATION:** Selected applicants will be placed in trainee status based on classification seniority. Upon successful completion of the appropriate 20 weeks of classroom and structured on-the-job training, trainees will be placed in probationary status for one (1) year. Those who successfully complete the training program will be placed into vacant positions in probationary status. Placement will be made in classification seniority order. Employees who successfully complete the training program, but for whom there are no available vacancies, will return to their former assignments. They will be placed on a waiting list and will receive preference by classification seniority order for future Metromover Technician vacancies. The eligible list and the waiting list will remain valid as set forth in the Personnel Rules for the Classified Service. This is advanced technical work on Metromover vehicles, wayside, and related equipment in Miami-Dade Transit. Responsibilities include inspecting, troubleshooting, repairing and maintaining vehicles, train control, traction power, communications, and computer systems equipment. Other duties include working on elevated guideways and equipment with 24 VDC up to 600 VAC three-phase electrical circuits.

### Transit Electronic Technician (008083)

#### Minimum Qualifications

High school diploma or GED. One year of experience in the installation and maintenance of electronic farebox or faregate equipment, two-way mobile communications equipment, or other electronics and electromechanical devices and equipment is required. The MDT classification of Transit Electronic Technician performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Must possess a valid Class E Florida Driver license. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is skilled technical work in the installation, inspection, replacement, maintenance and minor repair of electronic, electrical, and electromechanical equipment used in support of a public transportation system.

Employees in this class install, replace, maintain and conduct repairs on fare boxes, revenue island receivers, safes and other kinds of revenue collection equipment, and may install, remove and replace mobile radio units, destination signs, alarms or similar equipment installed in County vehicles and at transit field locations. Duties include troubleshooting and diagnosing defective equipment, making equipment adjustments, and replacing modules or circuit boards to ensure that equipment remains operations. Work requires the application of electronic, electrical and electromechanical principles and practices, the use of test equipment and hand tools. Supervision is received from a technical supervisor who sets job priorities, provides technical support, and reviews work in progress for compliance with proper installation and maintenance procedures and for the satisfactory functioning of equipment installed, maintained or repaired.

##### ILLUSTRATIVE TASKS

Installs, maintains, replaces, and conducts repairs on fare boxes, revenue island receivers, portable fare box and fare collection equipment, entry and exit gates, transfer dispensers, bill changers, safes, and other revenue collection equipment.

Installs, removes and replaces electronic equipment such as mobile radio units, destination signs, recorders, alarms, video equipment; tags and transports defective equipment to the repair shop.

Corrects revenue equipment malfunctions and service problems caused by coin jams, ticket jams, bent coins, etc.

Performs preventive maintenance and corrective maintenance to include disassembling, cleaning, and assembling parts; making mechanical adjustments; removing and replacing mechanical and electromechanical parts, modules, assemblies, and electronic circuit boards.

Reads and interprets various schematics, diagrams, blueprints, technical publications, and manufacturers' manuals.

Utilizes various test methods and test equipment such as analog and digital volt and ohm meters, oscilloscope, logic analyzer and micrometer and calipers to diagnose problems.

Performs pre-installation inspections to identify scope of work.

Assists in resolving operational problems.

Work performed, and observes safety practices and procedures.

Receives equipment defect reports from all sources. Repairs work orders, reports and documents.

Recommends changes to improve operational efficiency.

### Transit Electronic Technician (008083)

Inventories and stocks needed material, supplies, and equipment; restocks equipment with tickets and transfer paper.

Performs related duties as assigned.

#### KNOWLEDGE, SKILLS, AND ABILITIES:

Knowledge of the principles and theories of electronics and electricity.

Knowledge of the practices, methods, tools, and materials of the electronics and electrical trades.

Knowledge of the operating characteristics of electronic fareboxes and electronic destination signs.

Knowledge of automotive electrical systems.

Knowledge of the occupational hazards and safety precautions relating to the installation and replace vehicular radio systems and related transit electronic and electromechanical equipment.

Ability to troubleshoot and identify malfunctions in electronic systems. Ability to use electronic test equipment and mechanical tools.

Ability to read, interpret and work from technical manuals, blueprints, and electronic and electrical schematic diagrams.

Ability to communicate clearly and concisely orally and in writing.

Ability to work a variety of hours and emergency shifts, as required.

Skill in the electronic-electrical trade.

Skill in the use of standardized tools.

##### NATURE OF WORK

This is highly skilled technical work in the maintenance, testing, repair, and modification of digital RF communications systems, 802.11(x) wireless data networks, GPS based vehicle location/tracking equipment, remote vehicle monitoring, electronic and electromechanical graphic signage, multichannel digital voice recording systems, and other computerized electronic and communications equipment used in support of a public transportation system.

Employees in this class are responsible for maintaining, troubleshooting, testing, repairing and modifying radio data base station equipment, communications consoles, mobile and hand-held radios, destination signs, vehicle Public Address systems and related equipment. Duties include testing complex equipment, diagnosing problems, and making adjustments, repairs and modifications to equipment and digital electronic circuit boards. Work requires the application of advanced digital electronics and communications principles, practices and techniques, the use of a variety of shop test equipment, and the use of hand and bench tools. Employees exercise independent judgment in the various technical phases of troubleshooting and diagnose, and in shop I field maintenance and repair activities. Supervision is received from a Supervisor who provides technical support and reviews completed work and special work projects for satisfactory results.

##### ILLUSTRATIVE TASKS

Installs, removes, maintains, repairs and programs data radio base station equipment including 802.11(x) wireless computer networks, computer aided dispatch/automated vehicle location (CAD/AVL), consoles, radio controllers (CC3), computers and data circuits, mobile radio systems, vehicle logic units with global positioning satellite receivers, vehicle Public Address systems, transit control heads (TCH), vehicle onboard telephone intercom, vehicle communications control unit (CCU), vehicle alarm interface and mobile data terminal and onboard data networks.

Maintains, troubleshoots, modifies, and repairs equipment such as hand-held radios, voice recorders, and graphic signs to the component level; reprograms microprocessor based equipment. Utilizes a variety of tools and specialized test equipment such as oscilloscope, digital and analog multimeter, logic analyzer, time division reflectometer/optical time domain reflectometer (TDR/OTDR), spectrum analyzer, sound pressure meter, communications analyzer, and personal computer to diagnose equipment defects and to make repairs.

Reads and interprets various schematics, diagrams, blueprints, technical publications, and manufacturers' manuals.

Provides assistance and support to technicians engaged in installing or replacing communications equipment or resolving other technical problems or malfunctions.

Makes recommendations to improve operational efficiency.

Prepares written reports as needed, completes work orders on assignments, documents work performed, and observes safety I practices and procedures.

Performs other duties as assigned.

##### KNOWLEDGE, ABILITIES AND SKILLS

Considerable knowledge of the principles and practices of electricity and electronic theory to include analog and digital electronics and microprocessor controlled equipment.

Considerable knowledge of the standard practices, methods, tools and materials of the electronic and electrical trades.

Considerable knowledge of the communication principles and practices to include amplitude modulator (am), frequency modulation (FM), pulse code modulation (PCM), phase shift keying (PSK), frequency shift keying (FSK), quadrature amplitude modulator (QAM), time division multiple access TDMA), bit error ratio (BER), simulcast systems, amplitude and jitter distortion.

### Transit Electronic Technician/Radio (Trainee) (008084)

Considerable knowledge of the use precision electronic test equipment.  
Considerable knowledge of the electronic and electromechanical function of transit destination signs and communications equipment.  
Knowledge of the principles and theories of microwave radio transmission and reception.  
Ability to read, interpret and work from technical schematics, blueprints, circuit diagrams and manuals.  
Ability to identify the nature of malfunctions in communication equipment with appropriate diagnostic tests.  
Ability to identify weaknesses in transit communications systems and make ameliorating recommendations.  
Ability to assist other technicians in troubleshooting and repairs.  
Ability to work a variety of hours and emergency shifts as required.  
Skill in the diagnostic and repairs of electrical and electronic malfunctions.  
Skill in the use of hand tools, bench tools, and precision electronic test equipment.  
Skill in the use and repair of personal computers.  
Skill in the electronic-electrical trade.

Rev. 02/24/2005

### Transit Electronic Technician/Systems (008085)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in the diagnosis, repair, and maintenance of analog and digital communications equipment or in the maintenance and repair of electronic and electrical equipment are required. The MDTA classification of Transit Electronic Technician/Systems performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Must possess a Driver license. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

#### Nature Of Work

This skilled technical work in the installation, maintenance, modification and repair of complex telecommunications infrastructure equipment.

**WRITTEN EXAMINATION:** The written examination will be based on information contained in the authorized Transit Electronic Technician/Systems Trainee pre-examination study package. The study package will ONLY be distributed to 100 applicants based on classification seniority. Once the 100 applicants have been selected, they will be notified and study packages will be available at the Lehman Center, East Mezzanine Training Center, 6601 NW 72nd Avenue between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday only. All study materials must be returned to the MDT Human Resources Training section within one week after the exam, in the original condition received. If any portion of the study package is lost, damaged or stolen, report it immediately to the Human Resources Training Section at (305) 889-6713. Employees shall be held accountable for the safekeeping of MDT study materials. The loss or damage of MDT study materials as a result of negligence or willful misconduct will subject employees to the appropriate administrative action. Seniority points will be added to the score of Miami-Dade County employees qualifying on the competitive examination at the rate of 1/2 (.50) point per year of continuous full-time service in the County service to a maximum credit of ten years of service or five points. Submit applications online at [www.miamidade.gov/jobs/](http://www.miamidade.gov/jobs/) from \_\_\_\_\_ through \_\_\_\_\_. **ADDITIONAL INFORMATION:** Selected applicants will be placed in trainee status based on classification seniority. Upon successful completion of the approximately ten (10) months of classroom and structured on-the-job training, trainees will be placed in probationary status for one (1) year. 1. Those who successfully complete the training program will be placed into vacant positions in probationary status. Placement will be made in classification seniority order. 2. Employees who successfully complete the training program, but for whom there are no available vacancies, will return to their former assignments. They will be placed on a waiting list and will receive preference by classification seniority order for future Transit Electronic Technician/Systems positions. The eligible list and the waiting list will remain valid as set forth in the Personnel Rules for the Classified Service.

### Rail Structural Inspection Specialist (008097)

#### Minimum Qualifications

High school diploma or GED. Six months of experience in the inspection of bridges, guideways or comparable structures; or high school diploma or GED. One year of experience performing repairs of concrete or steel structures are required. Must possess a Driver license. The MDTA classification of Rail Structural Inspection Specialist performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. This is skilled structural inspection work performing detailed inspections to determine the operational safety of Metrorail and Metromover structures. Duties include inspecting girders and piers, identifying structural defects, and accurately record findings. Must be able to work on lifting equipment at heights up to 80 feet, near live third rail, and in small closed spaces inside box girders. Preference will be given to applicants in the Transport Workers Union bargaining unit. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is skilled structural inspection work for the Metro-Dade Transit Agency.

Employees in this class are responsible for performing detailed inspections of Metrorail and Metromover structures to assure that their conditions is operationally safe. Duties include inspecting girders and piers, identifying structural defects, accurately recording findings, and observing safety rules and regulations. Employees perform duties while exposed to various weather conditions and under traffic conditions which are generally considered dangerous. Supervision is received from a professional superior who reviews work for thoroughness of inspections, accuracy in their recording, and for adherence to establish safety practices and procedures.

##### ILLUSTRATIVE TASKS

Performs inspections of Metrorail and Metromover structures, including pre-stressed concrete girders, hammerhead caps, standard piers and steel girders, to assure operational safety.

Operates binoculars, comperators, cameras and thermometers in the performance of inspections.

Identifies structural defects and uses sketches or drawings to outline problems and their locations; uses some drafting equipment; codes blueprints for identification of cracks, honeycomb areas, rust spots, and other conditions.

Inspects repair and maintenance work completed by work crews on Metrorail and Metromover structures.

Observes established safety rules and regulations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of inspection methods and techniques pertaining to pre-stressed concrete girders, hammerhead caps and other Metrorail and Metromover Structures.

Considerable knowledge of safety rules and regulations pertaining to the area of assignment.

Knowledge of rail structural maintenance and repair processes.

Knowledge of the tools, equipment and materials used in the inspection of rail structures.

Knowledge of information contained on blueprints.

Ability to inspect a variety of rail structures, correctly identify defects, and accurately record findings.

Ability to use rail structural inspection equipment in the inspection of rail structures.

Ability to distinguish colors.

Ability to read and interpret blueprints and structural drawings.

Ability to prepare detailed and accurate inspection sheets.

#### **Nature Of Work**

This is skilled structural inspection work for the Miami-Dade Transit Agency.

## Transit Supervisor (008102)

### Minimum Qualifications

Completion of three years of acceptable on-the-job performance as a Bus Operator with Miami-Dade County is required. The MDTA classification of Transit Supervisor performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

### Job Specifications

#### NATURE OF WORK

This is supervisory work in field operations for the Miami-Dade Transit Agency.

Employees in this class are responsible for direct supervision of assigned Bus Operators and for coordinating and controlling operations on all bus routes through radio and personal contact with Bus Operators. Duties include observing and supervising Bus Operators and bus operations in a geographical zone, providing information to Bus Operators, responding to inquiries of bus passengers at major route junctions, initiating reports of damage to vehicles or injuries to passengers at accident scenes, and assisting Bus Operators in loading passengers and departing terminals and other loading points in a timely manner. Incumbents work within the scope of established departmental rules, regulations and procedures, but exercise independent judgment in handling emergency problems arising in the field. General direction is received from a superintendent who reviews work for compliance with departmental policies and procedures.

#### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of Bus Operators to ensure compliance with departmental rules and regulations.

Provides information to the public pertaining to routes, schedules, transfers, transfer points, location description, fares, and other data related to transit operations; responds to a variety of requests for transit information and location of public buildings, churches, schools and other structures.

Maintains route maps and schedules of departures and arrivals; estimates route distances and calculates intermediate arrival times.

Answers and refers inquiries from the public concerning other transit services such as lost-and-found, charter services and advertising.

Contacts Bus Operators on assigned runs to give special instructions and render any assistance that may be required.

Compiles reports on accidents at the scene, including photographs, measurements, sketches, witness statements; renders first-aid to any injured, cooperates with law enforcement agencies investigating accident; may transport injured persons to a hospital.

Coordinates the removal and replacement of buses having mechanical difficulty in the field; supervises the transfer of passengers and rescheduling of run to maintain adequate service.

Conducts field surveys to determine passenger load factors, time interval of runs, adequacy of service, and proper location of bus zones; observes traffic movements and flow to assist scheduling.

Assists the public at major route junctions or in the operation of charter, shuttle, and other high density special service runs.

Provides continuous inspection of operator driving methods to ensure compliance with departmental safety regulations.

Assists instructors with training reports on new operators; maintains surveillance for unsafe acts or conditions that might result in accident or injury.

Resolves differences between operators and passengers within assigned zone.

Coordinates field operations involving special events and emergency service.

### Transit Supervisor (008102)

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operating characteristics of passenger buses.

Considerable knowledge of schedules, routes, forms, regulations and procedures used in transit operations.

Considerable knowledge of accepted methods and techniques of safe driving with particular emphasis on passenger-carrying vehicles.

Considerable knowledge of departmental rules, regulations and procedures, including fare and transfer policy.

Knowledge of practices and procedures of radio communications.

Knowledge of various techniques used in determining load factors, time points, headways, running and recovery time, and adequacy of route service.

Knowledge of arterial and secondary road networks of the local metropolitan area, county geography, street layout, points of interest, and restrictions on traffic.

Knowledge of supervisory principles and practices.

Ability to make rapid and accurate arithmetic computations.

Ability to understand and carry out written and verbal instructions.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to speak clearly and concisely in person, over a telephone, public address system and radio communication equipment.

Ability to keep accurate records.

Ability to prepare and submit accurate reports.

Ability to enforce rules and regulations with firmness, tact and impartiality.

Ability to react quickly and calmly in emergencies and make sound decisions.

### Transit Dispatcher (008104)

#### Minimum Qualifications

Three years of acceptable on-the-job performance as a Bus Operator with Miami-Dade County on or before the examination date are required. The MDTA classification of Transit Dispatcher performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is specialized clerical work dispatching bus operators to assigned routes and vehicles operated in a public transportation system.

An employee in this class is responsible for the assembly and distribution of trip sheets, schedule cards, transfers and similar forms used in operating bus service and in accounting for passenger volume, mileage recorded and fares collected. The Transit Dispatcher is also responsible for setting up all runs, checking availability of operators and for posting the assignment board. The employee works within the scope of established departmental rules, regulations and procedures but exercises independent judgment in coordinating efforts to resolve field problems. Work is performed under the general direction of a transportation division superintendent who issues policy and procedure orders from the director of transportation.

##### ILLUSTRATIVE TASKS

Assigns all regular runs and trippers to bus operators on assigned shift, inspects trip sheet upon completion of run and places materials in the proper location for the following day.

Rotates assignments to the extra board and replaces regular operators for vacation, absences and tardiness.

Accounts for transfers disbursed to operators and assures adequate supply of all transit operations forms.

Receives phone calls from operators in the field, notifies the appropriate law enforcement agency on accidents and robberies, and instructs the operator as to proper procedure to follow.

Coordinates the dispatch of a supervisor and maintenance vehicle in cases of mechanical breakdown and processes meter repair changes.

Performs as a cashier on assignment, receives and counts money and makes out deposit slip and secures funds in a safe.

Gives information to the public relative to routes, schedules, lost and found, and directions to points of interest.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of the operational characteristics of passenger buses.

Considerable knowledge of the schedules, routes, forms, regulations, and procedures used in transit dispatching.

Knowledge of the principles and practices of cashiering.

Knowledge of office practices and procedures.

Ability to make rapid and accurate arithmetic computations.

Ability to understand, interpret and effectively carry out written and oral instructions.

Ability to react quickly and calmly in emergencies.

Ability to keep simple records accurately.

#### Job Specifications

##### NATURE OF WORK

This is technical work with supervisory responsibility in the preparation, analysis, and presentation of data used in public transportation system scheduling.

Employees in this class are responsible for supervising and participating in the work of compiling, organizing, and presenting a variety of complex data required for the development of comprehensive schedules to assure efficient and economical public transportation service.

Duties include participating in strategy development, supervising subordinate Transit Schedule Makers, preparing new or adjusted schedules, cutting individual runs, implementing a variety of line-ups, obtaining data from other departmental operations necessary for schedule production, developing personnel rosters for other departmental entities, and auditing, correcting, and modifying line-up products.

Incumbents exercise considerable independent judgment in the application of complex transportation scheduling practices to the production of transit system schedules. Supervision is exercised over a staff of Transit Schedule Makers who assist with various phases of office and field work. Supervision is received from an administrative superior who reviews work for efficient and effective schedule production within establish transit scheduling policies, guidelines and procedures.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate Transit Schedule Makers engaged in compiling, organizing, and presenting a variety of complex data required for the development of public transit schedules.

Meets with a variety of departmental officials to plan scheduling strategies, receive information necessary for schedule production, determine scheduling implications of plans, proposals and union issues, and to assure proper implementation of transportation system schedules.

Prepares new or adjusted schedules through analyzing, updating and generating documents pertaining to service areas, route patterns, alignments and distances; revenue service beginning and ending times and frequency; trip blocking, trip recovery times, vehicle requirements, garage allocation and deadheading, and route interlining and crew and crew relief alternatives; assures schedules conform with requirements of collective bargaining agreement, federal, state and local laws, and established scheduling practices.

Cuts individual runs by types and combines daily operator assignments to create weekly runs, assign days-off, and create relief runs.

Implements line-ups for bus, rail, police, revenue agents, telephone information agents, and fare collectors.

Prepares necessary audits, corrections and modifications to line-up products to assure integrity of data in the Transit Operations System.

Develops personnel rosters for other areas of the department and customizes results to fulfill particular needs.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, practices, and procedures of public transportation scheduling.

Thorough knowledge of collective bargaining agreements and federal, state and local regulations concerning public transportation work rules and vehicle operation.

Thorough knowledge of the geography and road network of Dade County.

Thorough knowledge of the computerized Run Cutting System (SAGERUNS) and rostering.

Considerable knowledge of the Computer-aided Mini-Scheduler Transit Scheduling System (TSS).

Considerable knowledge of the interrelationships of transit scheduling systems and their effects on reports and related programs.

Knowledge of supervisory principles and practices.

Ability to apply the principles, practices, and procedures of transit schedule making to the development, adjustment, and implementation of

##### NATURE OF WORK

This is advanced responsible supply work supervising warehousing activities of public transportation maintenance and repair facilities. Employees in this class are responsible for supervising the purchasing, receipt, storage and issue of a large variety of diesel passenger bus and automotive supplies and equipment in a twenty-four hour per day warehousing operation. Emphasis of the work is on planning the work of subordinates, reviewing methods and procedures for handling large quantities of supplies, conferring with departmental officials concerning supply requirements, drafting detailed technical specifications, and performing related administrative duties. Considerable independent judgment is exercised in interpreting the supply requirements of technical employees and in determining warehousing methods and procedures. Supervision is exercised over a large staff of supervisory, specialized and clerical employees with assigned responsibilities in various phases of supply activities. General supervision is received from an administrative superior who reviews work through personal conferences, written reports and personal observations for efficient and effective warehousing and related operations.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate supervisors and warehouse employees engaged in purchasing, receiving, storing, issuing and inventorying a large and varied stock of technical equipment and supplies required for maintenance and repair of public transit buses and departmental automotive equipment in a 24 hour per day warehousing operation.

Develops methods and procedures for requisitioning, receiving, storing, issuing and recording materials, equipment and supplies; evaluates effectiveness of established procedures and prepares and implements recommendations for improvements in warehousing and distribution activities.

Confers with maintenance and operating employees regarding required equipment and supplies; conducts research and drafts detailed technical specifications; reviews and evaluates bids.

Trains subordinates in warehousing procedures, inventory controls and equipment nomenclature; advises technical employees and supervisors of problems in requisitioning and obtaining supplies.

Plans and implements efficient storage methods and allocations of storage space; assures security of warehouse stock.

Consults with manufacturers representatives and transit officials concerning stock planning, equipment modifications, parts interchangeability and requisitioning procedures; coordinates activities with vendors and suppliers to assure optimum delivery and service to department.

Supervises annual inventory of all stock items, periodic cycle counting of various supplies and maintenance of perpetual inventory on a computer system and resolves inventory discrepancies.

Verifies receipt and issuance of supplies and through the accounts payable process approves invoices for payment; prepares routine and special reports concerning stock receipt and issue, fuel supplies and other matters.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of warehousing operations, policies and procedures of a public transportation repair and maintenance facility.

Thorough knowledge of the various kinds, grades, types and use of a large variety of diesel passenger bus and automotive supplies and equipment.

## Human Resources Department

---

### Transit Purchasing & Stores Supervisor (008120)

Considerable knowledge of departmental policies, rules, regulations and procedures.

Considerable knowledge of inventory control techniques and county purchasing and requisitioning procedures.

Knowledge of specification writing and bid analysis.

Knowledge of supervisory principles and practices.

Knowledge of accounting principles and practices.

Ability to supervise a group of subordinates in a manner conducive to full performance and high morale.

Ability to keep complex records, supervise inventories and prepare routine and special reports utilizing automated data processing.

Ability to establish and maintain effective working relationships with vendors, subordinates, superiors and departmental officials.

Ability to research and develop technical detailed specifications for diesel and automotive supplies and equipment.

Ability to communicate clearly and concisely, verbally and in writing.

### Transit Mechanic Shop Supervisor (008127)

#### Minimum Qualifications

Two years of experience in the maintenance and repair of diesel engines or equipment, transmissions, air-conditioning systems, electrical systems, brake systems or other vehicular systems are required. Must possess a CDL/Class B and an EPA 608 Type II or Universal certification from an approved refrigerant transition and recovery certification program as required by 40 CFR Part 82, Subpart F under Section 608 of the 1990 Clean Act Amendment within six months of employment. The MDTA classification of Transit Mechanic Shop Supervisor performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is skilled and supervisory mechanical work in the coordination and inspection of varied maintenance, repair and overhaul of diesel powered motor coaches.

A Transit Mechanic Shop Supervisor is responsible for planning, scheduling, assigning and inspecting all phases of automotive maintenance work performed on a single shift at a Transit Authority regional fleet repair facility. Emphasis of the work is on the efficient management of shop personnel, mechanical tools and automotive parts and supplies. Supervision is exercised over subordinate automotive mechanics, spray painters, body repairmen and crews of semi-skilled and unskilled helpers. Independent judgment is required in coordinating the work in order to comply with vehicle assignment schedules, however, operating rules and procedures specify the manner in which the work will be carried out. Overall performance is reviewed by the Superintendent of Maintenance through observation of shop activities, review of operational reports and the continuing effectiveness of the maintenance operation.

##### ILLUSTRATIVE TASKS

Supervises the maintenance and repair of diesel passenger buses and other automotive equipment in a central garage or branch repair facility; supervises the maintenance, repair, rebuilding and painting of all public transit vehicles and accessories including fare meters, upholstered interiors, seats, glass installation and air conditioning.

Confers with subordinates mechanics regarding work load and technical maintenance matters; trains and assists subordinates in repair and installation procedures.

Receives work requests, assigns work according to priority and facilities available; supervises performance of mechanics; road tests equipment and approves completed work.

Examines equipment in the field and shop, approves replacements and major repairs, recommends the purchase of parts and service equipment.

Assists in the design, construction and modification of special equipment and maintenance devices.

Inspects work in progress and reviews service records, work orders, parts requisitions and man-hour reports; assists mechanics engaged in maintenance operations; receives verbal and written reports from Bus Operators concerning vehicle defects and general performance.

Prepares daily schedules of buses available for limited or full service and equipment to be held for servicing.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and procedures of public passenger vehicle overhaul, maintenance and repair shop management.

Thorough knowledge of the methods, materials and tools of automotive mechanics.

Considerable knowledge of the operating and repair characteristics of modern diesel passenger buses and related automotive vehicles.

Considerable knowledge of occupational hazards and safety precautions required in the work.

Knowledge of the basic shop records keeping system used in a fleet cost accounting program.

Knowledge of Transit Authority operating rules and procedures.

Ability to plan, assign, inspect and coordinate the work of journeymen, bus mechanics, bodymen, spray painters, helpers and shop laborers.

Ability to diagnose defective equipment and parts malfunctions in diesel powered automotive vehicles.

Ability to understand, interpret and effectively carry out oral and written policies, regulations and instructions.

##### NATURE OF WORK

This is skilled supervisory work in the painting of county buildings, fixtures and equipment.

Employees in this class are responsible for planning, assigning and reviewing the work of journeyman painters and skilled and unskilled helpers performing painting and related tasks in accordance with standard trade practices. Emphasis of the work is on providing technical direction to subordinates, planning work methods and procedures for a variety of painting assignments, coordinating work at a variety of geographically separated locations, and participating in various painting assignments. Duties are performed with independent judgment regarding technical phases of work, and in assuring that painting methods and practices adhere to established standards. Assignments may be verbal or consist of written job orders. Supervision is exercised over a staff of journeyman painters, and skilled and unskilled helpers through periodic inspection of work in progress and upon completion for satisfactory application of painting skills and adherence to job specifications. Supervision is received from a technical or administrative superior who reviews work through personal inspections, conferences and written reports for timely completion of painting projects, quality of work, and adherence to job specifications.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of journeyman painters and skilled and unskilled trades helpers engaged in preparing surfaces and materials for painting, mixing paints and stains, and applying paint to interiors and exteriors of buildings, and furniture and equipment. Supervises the inspection and preparation of surfaces for painting; lays out and explains jobs to be done; recommends working procedures; provides on-site supervision and inspects completed work for satisfactory application of painting skills and adherence to job specifications; personally performs skilled work in interior and exterior painting.

Supervises the mixing and matching of paints and stains to conform with existing or specified colors, and the glazing, varnishing and staining of furniture.

Communicates and enforces established safety practices and procedures.

Prepares accurate estimates of time and materials required for proposed jobs; keeps records of labor and material costs; requisitions equipment, materials and supplies.

Develops, mixes and submits for approval color and finish samples of materials to be used in various painting projects.

Operates a motor vehicle to transport subordinates, materials and supplies to various job locations.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the standard practices, methods, tools and materials of the painting trade.

Thorough knowledge of the types, qualities and uses of various paints and stains.

Thorough knowledge of the occupational hazards and safety precautions of the painting trade.

Knowledge of supervisory principles and practices.

Ability to supervise subordinate journeyman painters and helpers in a manner conducive to full performance and high morale.

Ability to prepare accurate estimates of time and materials required for painting assignments.

Ability to coordinate work at various geographically dispersed locations.

Ability to understand and follow verbal and written instructions.

Ability to work at considerable heights on scaffolding.

Ability to mix paints and stains in proper proportions.

Skill in the use and operation of spray guns, paint brushes and other equipment of the painting trade.

Skill in mixing paints and matching and blending colors.

#### Minimum Qualifications

Bachelor's degree. Two years of experience in data collection, statistical analysis or analysis of fleet equipment and maintenance programs are required. Additional related experience may substitute for the required education on a year-for-year basis. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and technical work analyzing transit vehicle and related component performance, as well as planning and scheduling the repair and overhaul of transit vehicles and related component parts.

Employees in this class are responsible for analyzing transit vehicle and related component performance, and for planning and scheduling major maintenance work within specific areas at a transit maintenance facility. Emphasis of the work is on analyzing system-wide vehicle, equipment and component performance data; analyzing repair work to be performed; identifying performance trends and potential equipment or maintenance deficiencies; conferring with technical supervisors on workloads and technical repair matters; selecting repair work to be performed; preparing workload schedules; and monitoring work progress. Employees may be required to close and move county-issued records boxes for storage. Considerable independent judgment is exercised in the analysis and scheduling of transit repair activities and in the application of specialized transit technical knowledge to vehicle repair and component performance problems. Supervision is exercised over a staff of technical and clerical subordinates who assist with job estimates, work plans and work completion reports. General supervision is received from a technical and administrative superior who reviews work for efficiency and effectiveness of work scheduling and planning.

##### ILLUSTRATIVE TASKS

Receives and reviews defect and repair requests for specific categories of repairs at a transit maintenance facility; generates documentation and performance data to identify trends indicating need for maintenance improvements; confers with technical supervisors and superiors concerning shop workloads and technical repair and maintenance matters.

Analyzes workloads, availability of skilled employees, workspace and special technical requirements, and selects and prioritizes repair and maintenance related work.

Prepares and monitors workload schedules including projections on available technicians for major repairs and reviews compliance with projected target dates; revises schedules as required.

Prepares requests for parts for repairs and coordinates repair work with supply employees and officials.

Assists technical supervisors with short-term scheduling for effective day-to-day shop management. Monitors work progress by comparing completion rates with schedules and advise superiors of jobs requiring expediting.

008132

##### TRANSIT MAINTENANCE PRODUCTION COORDINATOR (Cont'd)

Supervises and coordinates job assignments for technical/clerical employees engaged in processing maintenance records; reviews work and payroll records for reporting accuracy; supervises the updating and maintenance of vehicular repair records.

### Transit Yard Supervisor (008133)

#### Minimum Qualifications

High school diploma or GED. Two years of experience in transit operations in a large-volume bus facility are required. Proof of education and work experience to meet minimum qualifications must be presented and will be verified. The MDTA classification of Transit Yard Supervisor performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in transit yard operations in a public transportation system.

Employees in this class are responsible for supervising and coordinating the work of subordinates engaged in fueling buses, cleaning the interiors of buses and driving buses through an automatic wash rack to clean exteriors of buses. Responsibilities include assigning tasks to subordinates, verifying bus locations in the yard, inspecting fuel island and wash rack equipment, monitoring fueling and cleaning operations, conducting visual inspections of buses for unusual damage, recording defects in bus equipment, and conducting safety meetings to assure conformance with established safety practices and procedures. Supervision is exercised over a staff of subordinates with assigned tasks in the fueling, cleaning and parking of buses. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for efficient transit yard operations and adherence to departmental rules and regulations.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinates engaged in fueling buses, cleaning the interiors and exteriors of buses, and parking buses in accordance with the parking plan.

Inspects shop and yard areas to determine which buses require fueling; completes servicing work orders and verifies location of buses the yard.

Inspects fuel island and wash rack equipment to verify that all equipment is functioning properly and safely; monitors supplies required for bus fueling and cleaning operations.

Properly records any defects reported by fuelers or hostlers; conducts visual inspections of buses for unusual damage or safety problems.

Conducts meetings with subordinates to provide information on safety rules and regulations or changes in policies or procedures.

Monitors fueling and interior bus cleaning operations; develops schedules for interior cleaning; inspects and approves all buses cleaned by contracted cleaning service providers.

Verifies correct parking of all buses as required by division parking plan.

Checks fuel tickets for correct amount of fueling, hubodometer readings, hostler and fueller badge numbers and correct pump number.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of transit yard organization and operations.

Considerable knowledge of supervisory principles and practices.

### Transit Facilities Supervisor (008135)

#### Minimum Qualifications

High school diploma or GED. One year of supervisory experience in building maintenance and construction is required. Must possess a Miami-Dade County Certificate of Competency in a building, electrical, mechanical or plumbing maintenance trade. Must possess a CDL/Class B; or Must obtain a Miami-Dade County Certificate of Competency in a building, electrical, mechanical or plumbing maintenance trade within one year of appointment. Must possess a CDL/Class B. The MDTA classification of Transit Facilities Supervisor performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in directing maintenance personnel in the construction, maintenance and repair of transit buildings and associated maintenance equipment.

Employees in this class are responsible for planning, assigning, coordinating and directing the work of construction and maintenance crews assigned to various transit facilities. Work involves the assignment and review of trades foremen, journeymen, helpers and laborers working on varied projects within a major departmental maintenance and construction program. Incumbents exercise a high degree of skill and a broad knowledge of various trades including carpentry, painting, refrigeration, mechanical, electrical and other related maintenance work, and the ability to interpret engineering and mechanical drawings in order to lay out and supervise projects designed by architectural or engineering superiors. Supervision is exercised over subordinates by assignment and inspection of work in progress and upon completion for adherence to prescribed standards. Work is subject to review by a maintenance superior who offers assistance on unusual or difficult projects and inspects completed jobs for workmanship and compliance with completion schedules.

##### ILLUSTRATIVE TASKS

Plans, lays out and assigns projects which have been approved by administrative superiors; directs varied physical plant maintenance, modification and construction in such trades as carpentry, painting, plastering, electrical, plumbing, air conditioning and general transit maintenance work.

Directs periodic preventive maintenance checks on a wide variety of mechanical and electrical machinery and equipment.

Recommends extent and nature of building repairs and improvements; estimates labor and material requirements, checks and approves supply orders; selects equipment to be purchased.

Requisitions materials; maintains records; prepares and submits reports; recommends budgetary requirements.

Makes periodic field inspections at work sites; reassigns crews from one job to another.

Works closely with maintenance staff to coordinate work projects with inspections and completion schedules.

Prepares performance evaluations; discusses work-related problems with employees; conducts on-the-job training of any new employees; holds meetings with staff to explain new or revised instructions; approves employee leave.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Considerable knowledge of maintenance, repair, alteration, and construction procedures and practices of transit equipment.

Considerable knowledge of the tools, equipment and materials of the building and mechanical trades.

Considerable knowledge of the occupational hazards and safety precautions applicable to transit maintenance, repair and construction work.

Knowledge of preventive maintenance procedures and techniques.

Knowledge of supervisory practices and procedures.

Ability to plan, assign and supervise the work of subordinates in a manner conducive to full performance and high morale.

Ability to follow oral and written instructions and work with a minimum of technical supervision.

Ability to plan and supervise various construction, maintenance and repair work so as to meet schedules.

Ability to carry out effective preventive maintenance checks on a wide variety of machinery and equipment.

Ability to estimate costs accurately in terms of labor, supplies, and equipment.

Ability to keep accurate records and to prepare and submit complete reports.

Bachelor's degree;

or High school diploma or GED and three years of mass transportation experience in the resolution of operational problems related to scheduled services, equipment failures, loss of power, and other service disruptions to include one year of experience in a supervisory capacity are required. Completion of 60 semester credits may substitute for the two years of mass transportation experience. Experience in the Transit Instructor classification will be credited as supervisory experience;

or High school diploma or GED. Four years of experience as a Train Operator are required;

or High School diploma or GED. A minimum of two years of satisfactory job performance as a Rail Traffic Controller is required.

The MDT classification of Rail Traffic Controller performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is specialized rail traffic management work in a rail transportation system.

Employees in this class are responsible for assisting in the safe and efficient control and operation of a rail transit system. Responsibilities include monitoring the status of systems and devices through Central Operations Center display consoles, operating various controls and equipment, and taking corrective actions personally or directing other employees or operating units to initiate appropriate actions. Duties include monitoring and controlling the distribution of electrical power to the Third Rail, preparing detailed reports, maintaining precise records, and responding to public inquiries concerning problems or complaints. Employees exercise some independent judgment within established guidelines and operating procedures. Supervision is received from a technical and administrative superior who reviews work for effective control of rapid transit operations and for conformance with departmental policies and procedures.

##### ILLUSTRATIVE TASKS

Operates a Train Control Console; supervises the arrival and departure of trains at stations, terminals and rail yards to maintain proper headway; initiates corrective action as required.

Monitors status of various systems and devices including interlockings, AC electric and traction power systems, heating, ventilation, air conditioning, pumps, fire alarms, and intrusion alarms; operates control console to correct rail system alarm conditions in accordance with prescribed procedures; confers with supervisor on adverse conditions, reported malfunctions or in cases where remedial procedures are not established.

Maintains two-way radio communications with Rail Attendants, supervisors and maintenance crews; directs attendants to take specific actions in emergency situations; coordinates work with supervisors concerning equipment and/or passenger problems and with maintenance employees working on wayside equipment and devices.

Monitors and exercises control over movements of non-revenue vehicles on the mainline; monitors and directs all manual movements of trains on the mainline when this type of movement is required; directs attendants to reroute or extend runs as necessary; requests additional vehicles for special or emergency situations.

Maintains two-way communications with various system employees; receives reports concerning accidents, disabled vehicles, sick or injured passengers, fare collection problems and other occurrences; requests appropriate assistance according to operating procedures.

Operates peripheral equipment including tape decks and system teleprinter networks; keeps records and completes daily reports of rail operations.

Tests and operates contact rail associated power cable distribution systems, substation equipment and emergency trip station facilities;

### **Rail Traffic Controller (008160)**

analyzes failures in support systems and equipment, identifies causes of equipment failure and recommends methods of corrective action.  
Performs related work as required.

#### **KNOWLEDGES, ABILITIES AND SKILLS**

Considerable knowledge of various departmental rules and regulations, rapid rail operating procedures, and Federal regulations pertaining to the safe operation of a rail transportation system.

Knowledge of rapid transit control systems, traction power distribution network, support system configurations, current train routes and operation of rapid transit vehicles.

Knowledge of the operating characteristics of Train-Control Consoles and peripheral equipment used in monitoring system operation and controlling movements of trains.

Knowledge of emergency situations and procedures in a rail transportation system.

Knowledge of records and reports required in a rail transit system.

Some knowledge of supervisory principles and practices.

Ability to react promptly and correctly under emergency conditions.

Ability to operate a Train-Control Console and supervise the safe arrival and departure of trains at stations, terminals and rail yards.

Ability to coordinate work with and direct the work of other rapid transit system employees engaged in system operations.

Ability to analyze power distribution failures in systems and recommend corrective action.

Ability to evaluate facts, exercise good judgment, take appropriate actions and document actions taken, particularly in stress situations.

Ability to communicate effectively, verbally and in writing.

Ability to deal courteously and tactfully with other system employees.

This is specialized rail traffic management work in a rail transportation system.

## Human Resources Department

### Chief Supervisor, Rail Traffic Control (008161)

#### Minimum Qualifications

High school diploma or GED. Two years of satisfactory performance as a Rail Traffic Controller are required or five years of experience in a mass transit or a rail transportation operational environment requiring the resolution of operational problems related to scheduled services, equipment failures and other service disruptions are required. Completion of college level coursework from an accredited college or university may substitute for the required experience on a year-for-year basis. The MDTA classification of Chief, Supervisor, Rail Traffic Control performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations.

#### Job Specifications

##### NATURE OF WORK

This is supervisory and administrative rail traffic management work in a rail transportation system.

An employee in this class is responsible for planning, directing and coordinating rail transportation activities at a Central Operations Center. Responsibilities include supervising a staff of subordinates engaged in the safe and efficient control and operation of a rail transit system, developing operating rules, regulations and procedures, enforcing safety practices, analyzing the efficiency of control center operations, and implementing contingency plans. Considerable independent judgment is exercised in assuring the safe and efficient control and operation of the rail transportation system. Supervision is exercised over a staff of subordinate specialized and clerical employees. Supervision is received from an administrative superior who reviews work through personal observations and written reports for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate rail traffic controllers engaged in the safe and efficient control and operation of a rapid transit system, operating various controls and equipment, monitoring status of systems and devices, and taking or directing corrective actions. Plans and supervises activities of the Central Control Operations Center; establishes rules, regulations and procedures for efficient central control operations.

Enforces established safety policies and procedures; reviews problem areas to determine the need for changes to improve safety procedures and practices.

Implements contingency plans, making necessary changes to scheduled service during disruptions or other emergencies to minimize the length of delays and discomfort to passengers.

Supervises and coordinates communications from the Central Operations Center to supervisors, passengers on trains and in stations, and to other operational employees.

Maintains effective working relationships with police and fire departmental administrators and employees.

Formulates work schedules and assignments to subordinates; estimates staffing and material requirements and prepares recommendations.

Analyzes efficiency of Central Center Operations and develops recommendations for improvements.

Reviews reports prepared by subordinates and prepares operational and administrative reports.

Assists in the development and implementation of appropriate training programs.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of various departmental rules and regulations, rapid rail operating procedures, and Federal regulations pertaining to the safe operation of a rail transportation system.

Considerable knowledge of rapid rail transit system functions, operating regulations and scheduling techniques.

Considerable knowledge of rapid transit control systems, traction power distribution networks, support system configurations, current train routes and operation of rapid transit vehicles.

Considerable knowledge of the operating characteristics of train control consoles and related equipment.

Considerable knowledge of rail transit system policies and procedures.

### Chief Supervisor, Rail Traffic Control (008161)

Considerable knowledge of emergency situations and the implementation of required contingency plans.  
Knowledge of the structure and function of other county departments involved during transit operation interruptions.  
Knowledge of supervisory principles and practices.  
Ability to plan, assign and review the work of subordinates in a manner conducive to full performance and high morale.  
Ability to react promptly and correctly under emergency conditions.  
Ability to supervise the activities of a Central Control Operations Center in a rail transportation system.  
Ability to establish and maintain effective working relationships with subordinates, superiors and officials of other county departments.  
Ability to analyze efficiency of Central Control Operations and make effective recommendations for improvements.  
Ability to coordinate Central Control Operations Center activities with other departmental operations and other county departments.  
Ability to devise and install new and revised methods and procedures.  
Ability to communicate clearly and concisely, verbally and in writing.  
Ability to deal tactfully and effectively with county officials, employees and the public.

### Rail Supervisor (008163)

#### Minimum Qualifications

Currently employed by Miami-Dade County as a Train Operator with permanent status immediately preceding the examination date. Must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period to be eligible for the examination. The MDT classification of Rail Supervisor performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in rail operations in a rail transportation system.

Employees in this class are responsible for supervising Rail Attendants engaged in transit operations, and rail facilities including guideway, station platforms, station structures and equipment. Duties include supervising activities concerning mainline rail operations, monitoring operation of vehicles, investigating passenger, employee, or rail vehicle accidents and providing roving supervision of rail structures. Some independent judgment is required in solving problems related to safe and efficient operations on the mainline and at station platforms. Supervision is exercised over Rail Attendants assigned to train operation or station work. Supervision is received from a technical and administrative superior who reviews work for satisfactory supervision and monitoring of rail operations activities.

##### ILLUSTRATIVE TASKS

Supervises Rail Attendants assigned to vehicular operation or transit station work; supervises the movement of trains on the mainline.

Monitors the operation of vehicles and performs troubleshooting techniques to determine the nature of vehicular defects; reports problems to proper authority for resolution.

Observes arriving and departing rail vehicles for display of visual vehicle defects; performs minor maintenance to correct minor problems; reports defects, delays or violations of operating rules and procedures.

Responds to emergency conditions on mainline operations as required.

Provides roving supervision of the guideway, station platforms, station structures, and equipment for departure from normal conditions.

Performs periodic checks of Rail Attendant's knowledge of operating and safety rules and procedures; assists in the training of Rail Attendants in operating rules and vehicular operation.

Maintains a working knowledge of passenger vehicle, rail yard, mainline, stations and terminal operations.

Investigates passenger, employee or rail vehicle accidents, reporting information to supervisor; prepares written reports concerning accidents.

Operates wayside switch machines as required.

Makes recommendations regarding hiring, discipline and promotion of subordinates; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the operating rules, regulations, procedures, and safety practices applicable to rail vehicle operation.

Considerable knowledge of mainline transit operations, rail facilities, and passenger service operations of a rail transportation system.

Considerable knowledge of emergency procedures applicable to rail operations activities.

Knowledge of the operating characteristics of rail vehicles, rail vehicle equipment, and equipment utilized at station platforms and structures.

Knowledge of supervisory principles and practices.

Knowledge of public relations principles and techniques.

Knowledge of emergency situations and applicable procedures in a rail transportation system.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to enforce established rules and procedures concerning the safe and efficient operation of rail vehicles.

## Human Resources Department

### Rail Supervisor (008163)

Ability to react promptly and correctly under emergency conditions.  
Ability to detect malfunctions in rail vehicle equipment and equipment associated with station platforms and structures.  
Ability to investigate and document passenger, employee or rail vehicle accidents.  
Ability to communicate clearly and concisely, verbally and in writing.  
Ability to exercise good judgment, evaluate facts and effectively document actions taken.

NEW 1-85

#### **Nature Of Work**

This is supervisory work in rail operations in a rail transportation system.  
The written examination will evaluate knowledge of Miami-Dade Transit (MDT) rules, regulations, procedures, safety, supervisory practices and report writing.

Copies of the Reading List and study materials are available at the Dadeland South supervisors' booth from 4:30 a.m. to 10:00 p.m., at the Palmetto Station supervisors' booth from 5:00 a.m. to 9:00 p.m. and at the Lehman Center Yard Tower, 24 hours a day from Monday, May 17, 2010 until Friday, July 16, 2010.

Seniority points will be added to the score of employees qualifying on the competitive examination at the rate of 0.02308 per pay period of continuous, satisfactory, full-time service in the class indicated on this announcement to a maximum credit of ten years of service or six points.

Only those individuals deemed unqualified to take the examination will be notified in writing by Miami-Dade County, Human Resources.  
**APPLICANTS DEEMED QUALIFIED WILL RECEIVE NO FURTHER NOTIFICATION AND ARE TO PROCEED TO THE EXAMINATION AS SCHEDULED.**

As a condition of employment, applicants qualifying for positions requiring a Commercial Driver License (CDL) will be required to sign a Release of Controlled Substances and Alcohol Test Information Form.

Applicants claiming veterans' preference must provide the required information in the Veterans' Preference section of the employment application, prove eligibility, and request the preference within the specified time period. In accordance with Florida Statutes, Veterans' Preference documents must be submitted on time and will not be accepted on the day of the written examination. Copies of your documents must be received by Human Resources no later than Thursday, June 3, 2010. Copies should be marked to show the job posting number and classification for which you are claiming preference. Veterans' Preference documents may be submitted in one of the following ways: Email to [vets@miamidade.gov](mailto:vets@miamidade.gov), fax to (305) 679-VETS (7545), or mail or hand-deliver to Miami-Dade County, Human Resources, Recruitment, Compensation and Testing Division, 111 NW 1 Street, Suite 2020, Miami, FL 33128-1906.

Applicants must apply online at [www.miamidade.gov/jobs/](http://www.miamidade.gov/jobs/) on the Online Employment Application Site from Monday, May 17, 2010 through Monday, May 31, 2010.

**LOCATION OF EXAMINATION:** Holiday Inn-University of Miami, Alhambra Room, 1350 South Dixie Highway, Coral Gables, FL 33146. **Date of examination:** Saturday, July 17, 2010. **Registration time:** 8:30 a.m. to 9:00 a.m. Doors to the testing facility will be closed promptly at 9:00 a.m. No one will be admitted for registration after the doors to the test facility have been closed. Photo identification, such as a Driver license, is required to be admitted to the examination. Make-up requests must be submitted in writing through the applicant's chain of command to Miami-Dade County, Human Resources, Testing and Validation Section, prior to the written examination. **NO CELLULAR PHONES ARE PERMITTED IN THE TEST FACILITY.**

### Rail Yard Master (008164)

#### Minimum Qualifications

Three years of experience as a Train Operator are required. Employees must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period;

Two years of mass transportation operational experience in a bus, rail, peplemover, or related passenger services environment to include one year as a supervisor or Transit Instructor are required. Employees must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period;

or Associate's degree. Two years of mass transportation operational experience in a bus, rail, peplemover, or related passenger services environment are required. Employees must have achieved an overall rating of satisfactory or above on the performance evaluation covering the most recent rating period.

Employees may be required to work split shifts. The MDTA classification of Rail Yard Master performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is specialized rail yard dispatching work in a rail transportation system.

Employees in this class are responsible for coordinating, monitoring and directing all rail vehicle movements in a rail yard area. Duties include routing trains over switches, issuing Train Orders for the safe movement of work vehicles, coordinating work with various supervisory employees related to vehicle availability and train movements, and controlling the traction power system within the rail yard and test tracks. Independent judgment is exercised in assuring the safe and efficient control and operation of rail vehicles in the rail yard area and in entering the mainline. Supervision is received from a technical and administrative superior who reviews work for effective control and coordination of rail yard operations.

##### ILLUSTRATIVE TASKS

Controls all rail operations within rail yard storage and shop areas; assures proper routing of trains over switches using established operating rules and safety precautions and procedures to facilitate train movements.

Coordinates yard operations with supervisors concerning inspection requirements, schedule requirements and vehicle availability.

Coordinates yard operations with operational supervisors concerning train movements and entry of work vehicles on the mainline.

Exercises responsibility for the issuance of Train Orders governing the safe movement of work vehicles over mainline or yard tracks.

Assists in the training of new employees as required.

Controls the traction power system within the yard and test tracks, and all emergency telephones and fire alarms.

Coordinates work with supervisors relative to the proper and timely assignment of Rail Attendants to specific trains in the storage area, prior to their placement into passenger service.

Maintains a variety of logs and records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the operating rules, regulations, procedures, and safety practices applicable to rail yard train movements.

Considerable knowledge of rail yard transit operations and yard and shop facilities.

Considerable knowledge of controls and equipment used for track and traction-power within a rail yard.

Knowledge of emergency situations and applicable procedures for rail yard operations.

Knowledge of logs and records required in the area of assignment.

### **Rail Yard Master (008164)**

Ability to direct train movements in a rail yard safely and efficiently according to established operating rules and regulations.  
Ability to react promptly and correctly under emergency conditions.  
Ability to coordinate work with other transit system employees engaged in rail yard shop operations.  
Ability to operate controls and equipment used in rail yard operations.  
Ability to keep accurate logs and records.  
Ability to communicate clearly and concisely, verbally and in writing.

### Rail Vehicle Cleaner Supervisor (008167)

#### Minimum Qualifications

High school diploma or GED. One year of experience in the supervision of custodial or janitorial work is required. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in the maintenance and cleaning of rail vehicles in a rail transportation system.

An employee in this class is responsible for planning, assigning and reviewing the work of subordinates engaged in sweeping and mopping vehicle interiors, removing debris, cleaning vehicle windows, removing graffiti, and performing general cleaning of vehicle interior equipment. Responsibilities include making assignments in accordance with work volume and available work force, instructing subordinates on proper work methods and techniques, monitoring progress of work, and inspecting rail vehicles prior to their return to revenue service. Supervision is exercised over a staff of subordinate employees engaged in the cleaning of rail vehicles. Supervision is received from an administrative superior who reviews work through personal conferences, written reports and personal observations for satisfactory completion of rail maintenance and cleaning responsibilities.

##### ILLUSTRATIVE TASKS

Estimates rail vehicle cleaning requirements and organizes assignments for the daily cleaning of rail vehicles.

Directs and instructs employees in proper work methods and techniques; monitors progress and quality of tasks being performed.

Supervises the work of subordinates engaged in removing debris, gum, graffiti and foreign matter from rail vehicles.

Assures that windows, panels, seat backs, stainless steel and ceilings are cleaned in accordance with established procedures.

Supervises the sweeping and mopping of vehicle interiors prior to their return to revenue service.

Inspects work in progress and upon completion; checks exterior of rail vehicles for damage, stickers and graffiti which would require corrective action.

Completes required records, forms and reports concerning rail vehicle cleaning activities.

Assures that rail vehicle cleaning activities are accomplished in accordance with departmental policies and procedures and established safety practices.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of departmental policies and procedures pertaining to rail vehicle cleaning activities.

Considerable knowledge of cleaning equipment and materials used in rail vehicle cleaning work.

Considerable knowledge of supervisory principles and practices.

Knowledge of safety practices and procedures required in the cleaning of rail vehicles.

Knowledge of the records, forms and reports required in rail vehicle cleaning operations.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to direct the cleaning of rail vehicles in accordance with departmental policies and procedures.

Ability to estimate labor requirements for the cleaning of rail vehicles.

Ability to instruct subordinates in proper work methods and practices.

Ability to prepare records, forms and reports required in the area of assignment.

Ability to establish and maintain effective working relationships with subordinates and superiors.

#### Job Specifications

##### NATURE OF WORK

This is skilled supervisory work in the maintenance of rail vehicles in a rail transportation system.

Employees in this class are responsible for supervising the inspection, testing, diagnosis and repair of rail vehicles, equipment and components. Emphasis of the work is on supervising a staff of technical subordinates, planning and scheduling repair and maintenance work, identifying causes of equipment failures and recommending procedures to prevent recurrence, enforcing safety rules and regulations, and coordinating of maintenance activities with representatives of private and public agencies, and with equipment and service contractors. Employees exercise independent judgment in the diagnosis of rail vehicle and equipment malfunctions and in the technical phases of repair and maintenance activities. Supervision is received from a technical and administrative superior who reviews work for satisfactory completion of work assignments and satisfactory operation of rail vehicles, equipment and components.

##### ILLUSTRATIVE TASKS

Supervises the inspection of equipment in service to determine the operating conditions of rail vehicles, equipment and components; assures that safety tests and visual checks of equipment are properly completed and that appropriate reports are prepared by inspection employees.

Supervises "running and road" repairs at terminals, yards, and other locations; assures that inspection employees accurately identify causes of malfunctions or equipment failures and make appropriate adjustments or repairs to keep trains in service and on schedule.

Supervises periodic detailed pit inspections of rail vehicles to evaluate their operating condition to determine if shop repairs are required; prepares work assignments for car inspection employees at various locations.

Instructs employees in work methods and techniques and monitors the progress and quality of work; trains new employees in rail car inspection, testing and servicing activities as well as overhaul and major corrective repair work, including wheel truing; monitors the progress of trainees and prepares periodic progress reports.

Estimates work volumes and the need for tools and equipment; reviews maintenance planning system reports and evaluates the performance of inspection activities.

Identifies causes of excessive equipment failures and recommends inspection and servicing procedures to prevent recurrence; investigates improved inspection methods and techniques, making recommendations for implementation.

Interprets maintenance manuals, schematics and repair orders.

Responds in the event of serious equipment failures; notifies superiors of important occurrences and need for assistance.

Analyzes and troubleshoots car equipment systems and component failures as necessary, to identify causes of unusual equipment failures; determines if road repairs are feasible or if equipment must be removed from service; oversees the conduct of standard test procedures to locate faults or check the proper operations of repaired or new equipment.

Requisitions parts, tools and materials to repair rail vehicles; signs repair reports.

Prepares a variety of reports as necessary.

Enforces safety rules, regulations and procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electricity and electronics as applied to rail vehicles, equipment and components.

Thorough knowledge of the repair and maintenance characteristics and requirements of rail vehicles and related equipment.

Considerable knowledge of the principles and theories of mechanics, hydraulics, pneumatics, heating and air conditioning applicable to rail vehicular equipment.

### **Rail Vehicle Maintenance Supervisor (008168)**

Considerable knowledge of rail transportation operational plans and procedures.  
Considerable knowledge of occupational hazards and safety precautions applicable to rail vehicle repair and maintenance.  
Knowledge of supervisory principles and practices.  
Knowledge of precision electronic and electrical test equipment.  
Knowledge of blueprints, diagrams and schematics.  
Knowledge of records, reports and forms used in the area of assignment.  
Ability to supervise subordinates in a manner conducive to full performance and high morale.  
Ability to diagnose complex equipment malfunctions and direct corrective measures.  
Ability to read and understand technical blueprints and schematics.  
Ability to determine the extent of equipment malfunctions and make decisions concerning removal of rail vehicles from service.  
Skill in the diagnosis of a variety of mechanical and electrical malfunctions.

##### NATURE OF WORK

This is skilled supervisory work in the inspection, repair, installation and maintenance of traction power equipment.

Employees in this class are responsible for supervising the work of skilled technicians in the routine and emergency maintenance of AC and DC traction power equipment in a rail transportation system. Emphasis of the work is on supervising technical subordinates, periodic inspections of electrical power facilities, planning and scheduling repair and maintenance work, enforcing safety rules and regulations, and coordinating work with respect to maintenance programs, schedules and production activities. Employees exercise independent judgment in determining traction power system requirements concerning technical phases of repair, maintenance and installation. Supervision is exercised over a staff of Rail Technicians assigned to various phases of traction power inspection, repair, maintenance and installation work. Supervision is received from a technical and administrative superior who reviews work through satisfactory completion of work assignments and satisfactory operation of traction power equipment.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate technicians engaged in the inspection, repair, maintenance and installation of traction power equipment in a rail transportation system.

Supervises the inspection, preventive maintenance, repairs, retrofit and adjustment of traction power equipment including AC and DC switch gear, rectifiers, transformers, and JPSS rooms.

Enforces established safety rules, regulations and procedures.

Coordinates traction power work with systems engineering, operations, field test employees and private consultants in the resolution of complex maintenance difficulties.

Responds to vehicular and power emergencies such as delays or accidents, as required.

Determines maintenance priorities and assigns technicians accordingly; trains subordinates in traction power maintenance procedures and tasks.

Coordinates material and equipment requirements to assure availability as required.

Coordinates work with maintenance control employees with respect to maintenance programs, schedules and production.

Assists in the evaluation of failure reports and daily maintenance reports.

Assists in the inspection of new installations for construction; witnesses systems test of new installations; supports testing of trains and equipment.

Performs periodic inspections of electrical power facilities to assure conformance with maintenance standards, and recommends adjustments to maintain schedules as necessary.

Inspects and evaluates standard high voltage electrical power circuits used by the rail transportation system for the traction power and auxiliary power switch gear, uninterrupted services and related circuits.

Assists in the development of maintenance procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and technical work with administrative responsibility in the maintenance and repair of rail structures and track systems.

Employees in this class are responsible for supervising, planning and coordinating the maintenance and repair of rail structures and track and guideway systems in a rail transportation system. Emphasis of the work is on supervising a staff of subordinates, assisting with complex and difficult technical problems, planning and developing maintenance programs and procedures, and reviewing work in progress and upon completion. Incumbents exercise independent judgment in the coordination of employees, equipment and materials in technical phases of repair and maintenance activities. Supervision is exercised over a staff of equipment operators, technicians and semi-skilled employees engaged in the repair and maintenance of rail structures and track systems. Supervision is received from a technical and administrative superior who reviews work for satisfactory completion of work assignments and satisfactory repair and maintenance activities.

##### ILLUSTRATIVE TASKS

Supervises equipment operators, technicians and semi-skilled employees in the inspection, repair and maintenance of rail structures and track and guideway systems; supervises the operation of structure maintenance and track maintenance equipment.

Analyzes complex or difficult structural and construction problems and track maintenance problems; develops recommendations for repair and maintenance activities to assist in their resolution.

Assures equipment, materials and supplies are available for various crew assignments; reviews work in progress and upon completion; trains subordinates in structure or track repair and maintenance.

Enforces established safety rules and regulations.

Coordinates structural or track repair and maintenance activities with appropriate operational or maintenance units; schedules preventive maintenance work.

Participates in the evaluation of structural or track work to be accepted for operations and of new equipment to be acquired for structural or track repair and maintenance activities.

Recommends inspection procedures and guidelines for structures or track and guideway for undertaking corrective measures in emergency situations without interruption to normal rail operations service, when feasible.

Responds to emergency conditions as required.

Prepares and completes various reports, forms and documents.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of structural design and maintenance characteristics of the rail guideway system including piers, girders and caps.

Thorough knowledge of the equipment, tools and supplies used in structural or track maintenance and repair in a rail transportation system.

Thorough knowledge of track work design and maintenance characteristics of continuous welded rail.

Considerable knowledge of the occupational hazards and safety precautions required in rail structural or track repair and maintenance work.

Considerable knowledge of rail transportation operating rules and procedures.

Knowledge of supervisory principles and practices.

Knowledge of the records, forms and reports used in the area of assignment.

## Human Resources Department

---

### Rail Structure and Track Supervisor (008180)

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to coordinate employees, equipment and materials in geographically separated locations to complete rail repair and maintenance work.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to distinguish specific colors.

Ability to analyze complex structural or track maintenance problems and assist in their resolution.

Ability to establish and maintain effective working relations with employees, supervisors and rail officials.

Ability to prepare various reports and documents.

Skill in the use of hand tools, power tools and heavy equipment.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible supervisory work in the maintenance and repair of rail structures and track systems.

An employee in this class is responsible for technical and administrative supervision, planning and coordinating the maintenance and repair of rail structures and track and guideway systems. Emphasis of the work is one supervising through subordinate supervisors a large staff, inspecting and resolving complex technical problems, establishing maintenance and repair priorities, assuring the adequate use and availability of equipment, materials and supplies, and reviewing work in progress and upon completion. Considerable independent judgment is exercised in the technical phases of repair and maintenance work and in the development of maintenance programs and priorities.

Supervision is exercised through subordinate supervisors over a staff of equipment operators, technicians and semi-skilled employees engaged in the repair and maintenance of rail structures and track systems. General supervision is received from an administrative superior who holds the incumbent responsible for efficient and effective rail structure and track maintenance operations.

##### ILLUSTRATIVE TASKS

Supervises through subordinate supervisors a staff of equipment operators, technicians and semi-skilled employees in the inspection, repair and maintenance of rail structures and track and guideway systems; supervises the operation of structure maintenance and track maintenance equipment.

Inspects or supervises the inspection of girders, piers and track and guideway equipment to ascertain problems and assure structures and equipment are safe and operational.

Establishes repair and maintenance priorities; investigates structure or track and guideway equipment conditions and determines necessary repairs, whether conditions warrant continued operations, or whether work can be accomplished by scheduled work crews or requires immediate action.

Established and enforces safety rules and procedures.

Inspects work in progress and upon completion; assures

work orders are executed in a timely and efficient manner; requisitions equipment, materials and supplies; prepares various periodic and special reports as required.

Coordinates structural or track repair and maintenance activities with appropriate operational or maintenance units; assists rail shop supervisors in track and shop work.

Prepares work orders; outlines, sketches or draws representations detailing specific problems and their locations; outlines work required, work sequences and required materials and supplies.

Reviews inspection procedures and supervises the implementation of procedures for correcting conditions in emergency circumstances; participates in the inspection of structural facilities to be accepted from contractors.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of structural design and maintenance characteristics of prestressed concrete girders, hammerhead caps, standard piers and other rail transportation system structures.

Extensive knowledge of track and guideway design and maintenance characteristics of continuous welded rail.

Thorough knowledge of the occupational hazards and safety precautions required in rail structural or track repair and maintenance work.

Thorough knowledge of rail transportation operating rules and procedures.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the equipment, tools and materials used in structural or track and guideway maintenance and repair.

Considerable knowledge of the records, forms and reports used in the area of assignment.

## Human Resources Department

---

### Chief Supervisor, Rail Structural Maintenance (008181)

Considerable knowledge of departmental policies, practices and procedures

Ability to inspect, interpret and analyze failure trends related to structural and track and guideway maintenance work.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to prepare reports, forms and documents applicable to the area of assignment.

Ability to plan and prioritize structural or track and guideway maintenance and repair functions.

Ability to coordinate employees, equipment and materials in geographically separated locations to complete rail repair and maintenance work.

Ability to distinguish specific colors.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to establish and maintain effective working relationships with employees, supervisors and various rail officials.

Ability to develop and implement maintenance and repair policies and procedures.

NEW 1-85

#### **Nature Of Work**

Bachelor's degree in Electrical Engineering or Mechanical Engineering and three years of supervisory experience in rail vehicle maintenance, inspection and repair are required; or High school diploma, GED, or vocational school with formal training in mechanical, electrical, electromechanical, hydraulic and air-conditioning systems and seven years of experience in rail vehicle maintenance, inspections and repair to include to three years at a supervisory level are required. Shift work is required. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and administrative work in the mechanical maintenance of rail vehicles and related equipment in a rail transportation system.

An employee in this class supervises through subordinate supervisors the diagnosis, testing, inspection, repair and mechanical maintenance of rail vehicles and associated equipment. Responsibilities include general supervision of rail vehicle mechanical maintenance and repair activities, enforcement of safety practices and procedures, preparation of budgetary estimates and requests, coordination of preventive maintenance scheduling, and participation in investigations of equipment failures and accidents involving rail vehicles. The incumbent exercises considerable independent judgment in the development and implementation of rail vehicle mechanical maintenance programs and activities. Supervision is exercised through subordinate supervisors over a staff of technicians and related employees engaged in the diagnosis, repair and maintenance of rail vehicles and related equipment. Supervision is received from a technical and administrative superior who evaluates work for efficiency and effectiveness of rail vehicle repair and maintenance activities.

##### ILLUSTRATIVE TASKS

Supervises through subordinate supervisors the work of subordinate technicians engaged in the diagnosis, testing, inspection, repair and mechanical maintenance of rail vehicles and associated equipment.

Provides instruction to supervisors and employees concerning work methods and techniques; monitors quantity and quality of work in progress.

Assures that employees receive training in rail vehicle equipment and related procedures.

Participates in development of budgetary forecasts, staff estimates and material requirements; monitors budget to assure that funds are expended effectively.

Prepares estimates of workload volumes and the need for tools and equipment; coordinates preventive maintenance program scheduling.

Enforces established safety practices and procedures.

Participates in the investigation of equipment failures and accidents involving rail vehicles.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the principles and theories of mechanics, hydraulics and pneumatics as applied to rail vehicles and associated equipment.

Thorough knowledge of rail vehicle mechanical repair and maintenance requirements.

Thorough knowledge of the operating characteristics of mechanical, hydraulic and pneumatic rail vehicle equipment.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of occupational hazards and safety precautions applicable to rail vehicle repair and maintenance.

Considerable knowledge of rail vehicle preventive maintenance programs and scheduling.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to develop and implement effective rail vehicle maintenance programs.

Ability to prepare budgetary forecasts, staff estimates and material requirements.

## Human Resources Department

#### **Nature Of Work**

This is advanced supervisory and administrative work in the mechanical maintenance of rail vehicles and related equipment in a rail transportation system.

### Track Shop Supervisor (008183)

#### Minimum Qualifications

High school diploma, GED, or vocational training in construction, welding or related field. Two years of experience in varied phases of equipment maintenance such as inspection, lubrication and repairs to heavy and light equipment, and track repair to include rail cutting, welding, drilling, guideway cleaning and replacing rail tracks are required. Must possess a CDL/Class A. The MDTA classification of Track Shop Supervisor performs safety-sensitive functions and is subject to the provisions of the Federal Transit Administration (FTA) Drug and Alcohol Regulations. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and technical work in the supervision of a track shop in a rail transportation system.

Employees in this class are responsible for supervising technical and semi-skilled employees engaged in the repair and maintenance of track and guideway equipment, and in the operation of track shop equipment. Responsibilities include assuring availability of equipment, materials and supplies, training subordinates in shop repair methods and machine operation, enforcing safety practices and procedures, coordinating production schedules and requirements with other rail officials, and assisting in the development of maintenance programs. Some independent judgment is exercised in the technical phases of track and guideway repair in meeting production requirements. Supervision is exercised over a staff of technicians and semi-skilled employees engaged in the repair of rail equipment and in the operation of shop machinery. Supervision is received from a technical and administrative superior who reviews work for completion of repair assignments in conformance with production requirements.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinate technicians and semi-skilled employees engaged in the repair and maintenance of track and guideway equipment.

Coordinates track shop production requirements with operational employees to assure availability of track and guideway equipment for scheduled or unscheduled repairs and maintenance.

Requisitions equipment, materials and supplies; assures equipment and materials are available for repair and maintenance work.

Trains subordinates in track and guideway equipment repair and track shop machine operation; enforces safety practices and procedures.

Supervises loading and unloading of equipment; supervises periodic inventories of tools and materials.

Assists in the development, implementation and modification of effective track maintenance programs.

Participates in the evaluation of track work to be accepted for operations, and of new equipment to be acquired for track maintenance activities.

Makes recommendations for inspection procedures and implements procedures for corrective measures in emergency situations without interruption to normal train operations when feasible.

Responds to emergency conditions as required.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the operating characteristics and maintenance requirements of track and guideway equipment.

Considerable knowledge of the operation and maintenance of hydraulic, diesel, gasoline and pneumatic equipment and tools.

Considerable knowledge of track work design and the problems associated with the maintenance of continuous welded rail.

Considerable knowledge of the occupational hazards and safety precautions applicable to track shop operations.

Knowledge of rail transportation operating rules and procedures.

Knowledge of supervisory principles and practices.

Ability to inspect, detect and resolve complex track and guideway equipment malfunctions.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to operate a variety of track shop equipment.

### Track Shop Supervisor (008183)

Ability to distinguish specific colors.

Ability to train subordinates in track shop methods and equipment operation.

Ability to assist in the development and implementation of track maintenance programs.

Ability to coordinate track shop production to assure availability of track and guideway equipment.

Skill in the use of hydraulic, diesel, gasoline and pneumatic equipment and tools.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and administrative work in the repair and maintenance of track and various guideway systems in a rail transportation system.

An employee in this class supervises through subordinate supervisors the inspection, repair and maintenance of track and various guideway systems including power rail. Responsibilities include general supervision of track maintenance and repair activities, enforcement of safety practices and procedures, preparation of budgetary estimates and requests, development of track maintenance plans and procedures, and coordination of track maintenance activities with other transit operations. The incumbent exercises considerable independent judgment in the development and implementation of effective track maintenance programs to assure safe and operational condition of track and guideway areas. Supervision is exercised through subordinate supervisors over a staff of repair specialists and related employees engaged in the inspection, repair and maintenance of track and guideway systems. Supervision is received from a technical and administrative superior who evaluates work for efficiency and effectiveness of track repair and maintenance activities.

##### ILLUSTRATIVE TASKS

Supervises through subordinate supervisors the work of subordinate track repair specialists, equipment operators and semi-skilled employees engaged in the inspection, repair and maintenance of track and various guideway systems including power rail.

Establishes track repair and maintenance priorities; develops and initiates track maintenance plans, programs and procedures.

Assists in the development and implementation of training programs pertaining to track maintenance and repair.

Participates in development of budgetary forecasts, staff estimates and need for new equipment.

Inspects or supervises the inspection of tracks, third rail systems and all appurtenances, guideway and adjacent areas to determine their safe and operational condition.

Enforces established safety practices and procedures.

Monitors work in progress and upon completion; coordinates track repair and maintenance activities with other rail operations.

Details specific problems and their locations; diagnoses, identifies and develops methods and procedures for failures related to equipment, repairs or materials.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the structural design and maintenance characteristics of trackwork and related guideway systems.

Thorough knowledge of the repair and maintenance requirements of continuous welded rail, various guideway systems and power rail.

Thorough knowledge of the equipment, tools and supplies used in track maintenance and repair activities.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of occupational hazards and safety precautions applicable to track repair and maintenance activities.

Considerable knowledge of rail transportation operating rules and procedures.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to develop and implement effective track repair and maintenance programs.

Ability to prepare budgetary forecasts, staff estimates and material requirements.

##### NATURE OF WORK

This is skilled supervisory work in the maintenance and repair of Metromover vehicles and related equipment.

Employees in this class are responsible for supervising the inspection, diagnosis, repair and maintenance of Metromover vehicles and related wayside and central systems. Emphasis of the work is on supervising a staff of technical subordinates, planning and scheduling repair and maintenance work, diagnosing the causes of equipment failures and developing procedures to prevent recurrence, enforcing safety practices and procedures, and coordinating Metromover maintenance activities with rail officials and representatives of equipment and service contractors. Employees exercise independent judgment in technical phases of repair and maintenance activities and in the development and implementation of maintenance programs and schedules. Supervision is exercised over a staff of technical subordinates involved in the inspection, repair, adjustment and maintenance of Metromover vehicles and related equipment. Supervision is received from a technical and administrative superior who reviews work for satisfactory operation of Metromover vehicles, wayside equipment and central systems.

##### ILLUSTRATIVE TASKS

Supervises the inspection, diagnosis, adjustment, repair and maintenance of Metromover vehicles, wayside equipment and central systems including electrical, mechanical, electro/mechanical, hydraulic and pneumatic areas.

Determines operating condition of Metromover vehicles, equipment and components; assures that safety tests are properly completed and that appropriate reports are prepared by subordinates.

Assures that subordinates accurately identify causes of malfunctions or equipment failures and make appropriate adjustments or repairs to keep vehicles in service and on schedule.

Instructs employees in work methods and techniques and monitors the progress and quality of work; develops and implements training programs in vehicular, wayside, and central system maintenance and repair.

Estimates work volumes and need for tools and equipment; develops and implements procedures, practices and improvements in maintenance programs and in work scheduling.

Diagnose's complex and difficult problems with equipment, systems and components to identify causes of failure and develops improved methods and techniques to prevent recurrence.

Requisitions equipment, materials and supplies; prepares a variety of reports, forms and logs as required.

Enforces established safety practices and procedures.

Coordinates Metromover maintenance activities with other rail officials and with representatives of equipment and service contractors.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles of electronics, electricity, mechanics, hydraulics and pneumatics as applied to a Metromover system.

Thorough knowledge of Metromover vehicular and equipment maintenance schedules and priorities.

Thorough knowledge of the operating characteristics and maintenance requirements of a wide variety of Metromover equipment.

Considerable knowledge of schematics, blueprints and diagrams.

Considerable knowledge of the occupational hazards and safety precautions applicable to Metromover maintenance operations.

Knowledge of supervisory principles and practices.

Knowledge of the standard methods, tools and materials used in Metromover repair and maintenance operations.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

##### NATURE OF WORK

This is advanced supervisory and administrative work in the maintenance of Metromover vehicles, components, traction power equipment, train control, and communications equipment.

Employees in this class supervise, through subordinate supervisors, the diagnosis, repair, testing, inspection, and maintenance of Metromover vehicles, and station wayside equipment. Emphasis of the work is on the general supervision of subordinate supervisory and skilled personnel who perform repair and maintenance activities, enforcement of safety practices and procedures, development of preventing maintenance programs and schedules, preparation of budget estimates and requests, and development of performance standards. Considerable independent judgement is exercised in the development and implementation of Metromover vehicle, train control, communications and traction power repair and maintenance, and associated training programs. Supervision is received from an administrative superior who evaluates work for efficiency and effective maintenance of Metromover vehicles, wayside equipment, central systems and related equipment, and repair activities.

##### ILLUSTRATIVE TASKS

Supervises the daily inspection of equipment to determine the operating condition of Metromover vehicles, equipment and components. Assures daily safety tests and visual checks of equipment are properly completed and appropriate reports are prepared by subordinate inspection employees.

Supervises Metromover periodic inspections, and test programs of fixed facilities.

Supervises "running and road" repairs at Metromover Maintenance facilities.

Assures the Metromover technicians accurately identify causes of malfunctions or equipment failures and make appropriate adjustments or repairs to keep trains in service and on schedule.

Supervises the major repair, overhaul and rebuilding of vehicles and subassemblies supporting the car systems.

Instructs supervisors and employees in work methods and techniques and monitors the progress and quality of work; assures the training of new employees in Metromover inspections, testing and servicing activities.

Enforces safety policies and maintenance procedures; develops and advises on proper work methods and techniques.

Estimates work volume and the need for personnel, tools and equipment; coordinates work with maintenance control employees with respect to maintenance programs and shop scheduling and production.

Identifies causes of excessive equipment failure and recommends inspection and servicing procedures to prevent recurrence.

Participates in the investigation of equipment failures and accidents involving transit equipment; responds to emergencies, and assists in the removal of disabled cars from tracks.

Prepares budget forecasts, staff estimates and material requirements, including the need for new equipment.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Plans and supervises the inspection, diagnosis, adjustment, repair and maintenance of Metromover vehicles, wayside equipment and central systems including electrical, mechanical, electro-mechanical, hydraulic and pneumatic areas.

Develops and implements training programs in vehicular, wayside, central system, traction power and train control maintenance and repair.

Diagnosis complex and difficult problems regarding equipment, systems and components to identify causes of failure and develops improved methods and techniques to prevent recurrence.

Requisitions equipment, materials and supplies; prepares a variety of reports, forms and logs as required.

Supervises the inspection, prevention maintenance, repairs, retrofit and adjustment of traction power equipment including AC switchgear, rectifiers and transformers.

## Human Resources Department

### Chief Supervisor, Metromover (008189)

Performs periodic inspections of electrical power facilities to assure conformance with maintenance standards, and recommends adjustments to maintain schedules as necessary.

Supervises the inspection, preventive maintenance, repairs, retrofit and adjustment of train control equipment including audio frequency track circuits, track switch interlocking, etc.

Reviews failure reports and daily maintenance reports. Develops improved methods and techniques to prevent recurrence.

Supervises the periodic inspections of wayside facilities to assure conformance with maintenance standards, and recommends adjustments to maintain schedules as necessary.

Inspects and evaluates standard vital and non-vital circuits used by the rail transportation system for the safety-critical audio frequency track and related circuits.

Performs related work as required.

#### KNOWLEDGE, ABILITIES AND SKILLS

Thorough knowledge of the principles and theories of electricity and electronic as applied to traction power, train control, communication, and rail vehicular equipment in a Metromover (light rail) system.

Thorough knowledge of the repair and maintenance requirements of traction power, train control, communication, and rail vehicular equipment in a Metromover (light rail) system.

Thorough knowledge of the operating characteristics of mechanical, electrical and electronic traction power, train control, communications and rail vehicular equipment in a Metromover (light rail) system.

Thorough knowledge of occupational hazards and safety precautions applicable to traction power, train control, communications and rail vehicular equipment.

Thorough knowledge of applicable rules, regulations and procedures concerning traction power, train control, communications and rail vehicle equipment.

Thorough knowledge of the principles and theories of electronics, electricity, mechanics, hydraulics, Pneumatics, heating and air-conditioning as applied to rail vehicles and related equipment.

Thorough knowledge of rail operational plans and procedures.

Considerable knowledge of departmental policies, regulations and procedures.

Knowledge of the standard methods, tools and materials used in Metromover repair and maintenance operations.

Knowledge of precision electronic and electrical test equipment.

Knowledge of supervisory principles and practices.

Ability to coordinate and implement an effective traction power, train control, communications and rail vehicle repair maintenance program.

Ability to diagnose complex equipment malfunctions and direct corrective measures.

Ability to use independent judgment in the development and implementation of maintenance programs and activities.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to prepare budget documents and a variety of reports and forms.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to read and understand technical blueprints, diagrams and schematics.

Ability to read and understand contract specifications and procedures.

Skill in the diagnosis of a variety of mechanical and electrical malfunctions.

#### Job Specifications

##### NATURE OF WORK

This is advanced supervisory and administrative work in track and guideway maintenance in a rail transportation system.

An employee in this class is responsible for supervising the inspection, repair and maintenance of rail transportation system guideway and direct fixation track construction. Emphasis of the work is on reviewing inspection reports, enforcing safety practices and procedures, prioritizing repair work, and developing track and guideway surveys. Duties include conducting inspections on repair work, developing procedures for guideway inspection, and preparing work sketches for repairs. The employee exercises considerable independent judgement in the development and implementation of guideway and track maintenance activities. Supervision is exercised over a staff of subordinates engaged in track and guideway inspection and repair. Supervision is received from a technical and administrative superior who evaluates work for efficiency and effectiveness of track and guideway repair and maintenance activities.

##### ILLUSTRATIVE TASKS

Plans, assigns and reviews the work of subordinates engaged in track and guideway inspection, repair and maintenance.

Reviews inspection and track reports, checks field conditions reported and recommends appropriate repairs; prioritizes work and develops work schedules.

Walks track on a daily basis performing certification inspections on repair works.

Develops tracks and guideway surveys including gauge, level, profile, line and clearance.

Develops procedures for guideway inspections.

Trains subordinates in safety procedures and enforces safety practices.

Performs periodic front and rear riding inspections to detect rough riding conditions.

Prepares accurate work sketches for repairs; maintains report file on all work orders.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of track and guideway design and maintenance characteristics of continuous welded rail.

Thorough knowledge of the occupational hazards and safety precautions required in track repair and maintenance work.

Thorough knowledge of rail transportation operating rules and procedures.

Thorough knowledge of the equipment, tools and materials used in track maintenance and repair.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the records, forms and reports used in track guideway repair and maintenance.

Ability to conduct track and guideway surveys including track level and gauge, third rail height and gauge, string lining of curves, rail and girder profiles using transit levels and rods.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to enforce established safety practices and procedures.

Ability to inspect, interpret and analyze failure trends related to track and guideway maintenance work.

Ability to plan and prioritize track maintenance and repair functions.

Ability to distinguish specific colors.

Ability to develop and implement track and guideway maintenance and repair policies and procedures.

##### NATURE OF WORK

This is routine clerical and manual work processing various currency denominations collected daily in the Metrorail and Metrobus system. Employees in this class manually sort various currencies by denomination, straightening currency that is folded or crumpled. Duties require lifting full currency containers with a weight of approximately thirty pounds each. Additional responsibilities include performing related clerical duties. Close Supervision is received from an administrative superior who reviews work in progress and upon completion for satisfactory performance of assigned responsibilities.

##### ILLUSTRATIVE TASKS

- Obtains from the Vault Custodian, currency that has been collected on the previous day.
- Places collected currency on currency counting table for processing; opens lockable bag using key issued by Vault Custodian, if required.
- Manually sorts currency, if necessary.
- Straightens currency that is folded or crumpled.
- Stacks currency by denomination, face-up in loose bundles.
- Affixes pre-gummed paper straps to currency that has been counted and recorded.
- Assists in numbering encoded fare media (transit passes) and/or separating encoded fare media and inserting same into protective envelopes, as assigned.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Knowledge of procedures used in processing large quantities of currency.
- Knowledge of currency denominations.
- Ability to work in a high security environment.
- Ability to work rotating weekday schedules and on Saturdays.
- Ability to lift containers full of currency weighing up to thirty pounds each.
- Ability to manually straighten-out folded and crumpled currency with speed and dexterity.
- Ability to pass a police background evaluation analysis prior to employment.
- Ability to submit to random polygraph testing when required.
- Physical strength and agility sufficient to perform assigned duties.

### Transit Safety Specialist (008205)

#### Minimum Qualifications

Bachelor's degree in Industrial Engineering, Risk Management, Safety Engineering or related field. One year of professional administrative experience in industrial or vehicular safety or accident prevention or loss prevention is required. Additional experience may substitute for the required education on a year-for-year basis. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK:

This is professional and specialized field and office work in an employee industrial safety and vehicle accident prevention program in a public transportation system. Employees in this class are responsible for performing a variety of complex duties in support of a loss control program for a large metropolitan transit agency. Emphasis of the work is on conducting periodic inspections of transit facilities, buildings, grounds and equipment, preparing reports containing findings and recommendations, investigating industrial accidents, and providing training courses for employees and supervisors to prevent on-the-job injuries. Incumbents are responsible for performing assigned duties in conformance with local, state and Federal requirements. Supervision is received from an administrative superior through personal conferences and review of written reports for satisfactory completion of assigned responsibilities.

##### ILLUSTRATIVE TASKS:

Conducts inspections of transit facilities, buildings, grounds and equipment to determine compliance with established safety standards and to assure that accident prevention techniques are being fully implemented. Prepares written reports of field injuries and discusses findings and recommendations with supervisors and other departmental officials to assure that accident prevention techniques are being fully implemented. Prepares written reports of field injuries and discusses findings and recommendations with supervisors and other departmental officials to assure correction of unsafe conditions. Performs investigations of industrial accidents occurring at transit facilities which cause damage to transit properties and injuries to transit employees; determines causes of accidents and develops recommendations for appropriate action to prevent recurrences. Conducts educational safety training courses for transit employees in proper safety practices, first aid, and in the safe operation of transit vehicles and equipment. Advises supervisors of conditions which are unique to transit properties which have the potential of resulting in large monetary losses. Prepares periodic reports on safety program organization, cost and other subjects as required by local, state, and federal guidelines and regulations. Makes recommendations concerning new and improved safety equipment for transit facilities and vehicles. Maintains contacts with local, state, and national safety organizations and keeps informed on current developments in the safety field. Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS:

Considerable knowledge of loss prevention practices, procedures, and techniques used in varied employment situations and equipment operations in a transit environment. Considerable knowledge of the objectives of a transit loss control program. Considerable knowledge of standard safety equipment and safe driving methods. Considerable knowledge of hazardous working conditions and equipment operations in a public transportation system. Knowledge of local, state, and federal safety requirements pertaining to a public transportation system. Ability to detect hazardous working conditions inherent in transit operations. Ability to establish and maintain effective working relationships with supervisors and other departmental officials. Ability to express information and ideas, clearly, and concisely, verbally, and in writing. Ability to enforce loss prevention policies, procedures, and regulations. Ability to analyze vehicular and industrial accidents and make effective recommendations to prevent recurrence. NEW 10-81

### Transit Safety Officer (008207)

#### Minimum Qualifications

Bachelor's degree in Industrial Engineering, Civil Engineering, Electrical Engineering, Safety Engineering or related field. Two years of professional experience in industrial safety, quality assurance, facility safety inspections or investigating accidents are required. Additional experience in industrial safety, quality assurance, facility safety inspections or investigating accidents may substitute for the required education on a year-for-year basis. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional and technical work in transit system safety for the Miami-Dade Transit Agency.

Employees in this class are responsible for performing complex safety engineering and administration duties in the development of transit system loss prevention programs. Responsibilities include developing and administering accident prevention programs; managing, and implementing a transit construction safety manual; supervising and participating in the production of plans and specifications for new transit facilities; applying computer programs to industrial engineering and transit safety functions; and analyzing safety-related aspects of plans, designs; and transit operations. The incumbent exercises considerable independent judgment and technical expertise in the application of industrial engineering techniques to transit system safety programs and operations. Supervision is received from a professional superior who reviews work for achievement of desired loss prevention goals and objectives.

##### ILLUSTRATIVE TASKS

Develops and administers an accident prevention program based on the analysis of accident investigations indicating causes of the most frequent and costly accidents resulting in vehicle damage and employee or public injury; develops recommendations for training curricula design.

Manages and implements the administration of an MDTA construction safety manual, including conduct of on-site inspections, audits, and technical management of industrial/construction safety consultants.

Supervises and participates in the production of plans and specifications for modifications and new transit facilities, buildings, and construction components of new transit systems, for compliance with safety regulations; attends and evaluates various tests conducted by consultants and engineers.

Participates in the preparation and utilization of computer programs and their application to industrial engineering and transit safety functions; oversees preparation of reports and instructs program-users in their use.

Supervises and participates in the implementation of data collection, complex analysis and recommendations of industrial/construction safety consultants concerning safety related aspects of plans, designs, methods, and rules of operation which impact life-endangering systems such as the third-rail, Automatic Train Protection system, and vehicle functioning systems.

Conducts specialized surveys and studies, and prepares recommendations; consults with public officials and industrial representatives concerning the elimination of safety hazards; develops proposals for corrective measures and performs follow-up investigations.

Supervises the implementation of transit safety projects, programs, and modifications to existing systems which investigations and audits have shown to be unsafe or not in compliance with federal, state and local regulations.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles, theories and practices of industrial engineering.

## Human Resources Department

### MDT Parking Enforcement Specialist (008210)

#### Minimum Qualifications

High school diploma or GED. One year of experience in code enforcement work or in the operation and maintenance of parking facilities. Must possess a Driver license and a Parking Enforcement Specialist Certificate.

#### Job Specifications

##### NATURE OF WORK

This is routine parking enforcement work for the Metro-Dade Transit Agency.

Employees in this class are responsible for performing a variety of duties in support of MDTA parking operations at departmental public parking facilities. Work includes providing directions and information to patrons, assuring parking facility control, enforcing compliance with parking regulations, patrolling parking facilities and issuing citations to offenders. Duties are performed according to established rules and procedures and employees attend court proceedings and testify in court as necessary. Work requires some tact and diplomacy in dealing with MDTA patrons and the public. Supervision is received from a specialized supervisor who reviews work for effective enforcement activities.

##### ILLUSTRATIVE TASKS

Conducts random checks of rail stations in accordance with MDTA Parking Post Orders.

Supplements police enforcement activities by issuing citations to offenders of parking laws and regulations.

Initiates or coordinates work with police officials to assure removal and impoundment of illegally parked vehicles.

Makes thorough inspections of parking facilities to assure efficient and effective parking operations.

Patrols parking areas and reports disturbances, suspicious persons and suspicious circumstances to appropriate authorities.

Monitors MDTA areas, ground transportation movement and public use of facilities for compliance with regulations; observes parking facilities through closed-circuit television system.

Attends court proceedings and testifies in court as necessary.

Patrols MDTA parking facilities and assists motorists as required.

Investigates complaints of abandoned cars on MDTA right-of-way or property; completes forms to initiate removal and contacts contractor to pick-up cited vehicles for removal and disposal.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of departmental rules, regulations and procedures governing MDTA parking facility operations.

Knowledge of legal requirements and forms pertaining to the issuance of citations to offenders of parking laws and regulations.

Knowledge of public relations principles and techniques.

Knowledge of MDTA operations, properties, right-of-way, buildings and access roadways.

Ability to enforce parking regulations with firmness, tact and impartiality.

Ability to provide routine information to the public.

Ability to operate automotive equipment in a safe manner.

Ability to testify in a court-of-law.

Ability to patrol parking facilities and recognize suspicious persons or circumstances.

High school diploma or GED. One year of bookkeeping experience; completion of one-year business school program of instruction in computer accounting and bookkeeping; or completion of six semester credits in Accounting is required. Applicants will be subject to a thorough background investigation including a polygraph examination. Must be able to work various shifts, evenings, weekends and holidays and lift items and/or equipment weighing up to 50 pounds.

#### **Job Specifications**

#### **Nature Of Work**

This is specialized clerical work in the application of elementary bookkeeping principles to the maintenance of accounting or fiscal records.

### Transit Revenue Processing Supervisor 1 (008216)

#### Minimum Qualifications

High school diploma and GED. Two years of experience in bookkeeping and processing large quantities of currency are required. Must be able to work flexible and rotating schedules including nights, holidays and weekends. Must be able to work under tight security procedures. Applicants will be subject to a thorough background investigation which will include a polygraph exam. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work in transit fare processing and control.

Employees in this class are responsible for supervising subordinate employees in a transit fare processing unit. Responsibilities may include supervising the preparation of bank deposits, processing of currency, fare media production, numbering and packaging, accounting for currency and coins collected daily, ensuring vault room security, processing of bus and rail coins and tokens, or change fund management. Supervision is exercised over a staff of currency processing, cash handling, and clerical employees performing assigned duties in various phases of fare processing and control. Supervision is received from an administrative superior who reviews work for compliance with established departmental policies, procedures, and regulations.

##### ILLUSTRATIVE TASKS

Supervises cash handlers and currency processors in the counting and storage of all bus and rail currency and checks.

Prepares daily bank deposit and reports of revenues deposited; verifies support documentation and bill of lading for bank deposit.

Supervises subordinates responsible for operating computerized coin counting equipment, token wrapping machines and electronic weight scales to process and count coins and tokens collected daily in the bus and rail system.

Verifies that all currency in bus mobile safes and cashboxes is extracted according to fare processing procedures.

Supervises the production, numbering, and packaging of fare media used in the rail system; ensures proper operation of encoding machines to accept magnetically encoded fare media; reviews daily encoder log books to ensure readings and quantities are properly recorded after each production run; prepares reports and ensures security procedures are followed.

Supervises the receiving, counting, and accountability of currency and coins collected from bill changers, and entering of audit register readings in the change fund management computer system to provide for reconciliation of funds and bill changers.

Exercises responsibility for the custody and control of all cash temporarily stored in the vault prior to preparation of the bank deposit.

Conducts periodic inventories of all cash, tokens, and other valuables; prepares reports and correspondence as required.

Develops unit schedules and work assignments; ensures that subordinates adhere to established security, safety, and operational policies and procedures.

Makes recommendations regarding hiring and discipline of subordinates; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of departmental security, safety and operating rules, regulations, policies and procedures pertaining to transit revenue processing and control.

Knowledge of supervisory principles and practices.

Knowledge of the principles of accounting.

Knowledge of business arithmetic.

Knowledge of records, reports, and forms used in transit revenue processing and control.

Knowledge of office equipment used in transit revenue processing and fare media production.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to supervise transit revenue processing operations in accordance with strict security and operational policies and procedures.

Ability to prepare complex reports and forms concerning transit fare processing activities.

Ability to make rapid and accurate mathematical calculations.

Ability to ensure complete accountability of all transit revenues in transit fare processing.

Additional experience may substitute for required education on a year-for-year basis. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is supervisory and administrative work in transit fare processing and control.

An employee in this class is responsible for supervising, through subordinate supervisors, the daily receiving, processing, accounting, and custody of all transit collected fares and other revenues, and the preparation of bank deposits and supporting documents. Responsibilities include supervising the preparation of bank deposits, processing of currency, fare media production, numbering and packaging, accounting for currency and coins collected, ensuring vault room security, processing of bus and rail coins and tokens, and change fund management. Supervision is exercised over a staff of subordinate supervisors engaged in supervising currency processors, cash handlers, and clerical employees with assigned responsibilities in various phases of operations. Supervision is received from an administrative superior who reviews work for compliance with established departmental policies, procedures, and regulations.

##### ILLUSTRATIVE TASKS

Supervises and directs fare processing and control activities, including cash processing and change fund management functions; monitors video equipment and conducts surveillance of areas where revenues are processed, and reports irregularities or security violations.

Supervises cash processing in currency processing and coin counting operations; audits all reports pertaining to all currency, coin and checks for deposit; prepares computer reports for all revenues deposited, bank deposit documents, and reports of collection forms.

Supervises the operation of the change fund management system, including daily dispensation of funds to revenue collectors for replenishment of bill changers; prepares computer reports and balances daily change funds.

Provides for custody, control and accountability of all funds, tokens, and other valuable items stored in the vault room; administers a key control system for providing access to storage of funds.

Ensures that subordinate staff follow established fare processing and control procedures; audits and revises accounting systems and procedures for internal control; prepares a variety of management reports regarding funds deposited.

Prepares annual budget for currency and coin counting equipment and replacement parts, uniforms, and supplies.

Ensures that all foreign coins are periodically submitted to vendors for currency translation at established rate of exchange.

Monitors the sorting of mutilated currency and submittal to U.S. Department of Treasury for redemption at applicable value.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of departmental security, safety and operating rules, regulations, policies, and procedures pertaining to transit revenue processing and control.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the records, reports, and forms used in transit revenue processing and control.

Knowledge of the principles of accounting.

Knowledge of business arithmetic.

Knowledge of office management principles and practices.

Ability to supervise, through subordinate supervisors, the work of subordinates in a manner conducive to full performance and high morale.

Ability to recognize security irregularities and violations in a high security environment.

Ability to prepare complex reports and forms concerning transit fare processing activities.

Ability to make rapid and accurate mathematical calculations.

Ability to ensure complete accountability of all transit revenues in transit fare processing.

##### NATURE OF WORK

This is specialized work in property management and contract administration for the Metro-Dade Transit Agency.

Employees in this class are responsible for performing varied property management duties in the development of agreements and leases for the use of transit properties and in the management of contracted services for transit buildings and facilities. Responsibilities include developing and negotiating permit agreements and leases for the use of transit properties by private concerns, conducting field inspections of transit facilities to oversee the performance of private contractors for various services, reviewing and approving contractor invoices for payment, and assisting in the development of specifications for service contracts. Duties require the application of real estate and contract management knowledges to assure compliance with terms of leases or contracts. Supervision is received from an administrative superior who reviews work for effectiveness in administration of property management responsibilities.

##### ILLUSTRATIVE TASKS

Develops and negotiates permit agreements and leases for the use of transit properties by private concerns; monitors compliance with terms of agreements.

Conducts daily inspections of Metrorail and Metromover stations and facilities to monitor the performance of security, janitorial, waste collection, landscape maintenance and exterminating contractors.

Conducts field inspections of Metrobus facilities, sites and park and ride lots to monitor performance of janitorial, trash collection, landscape maintenance, exterminating, floormat, portolet and bulk bus soap contractors.

Administers contracts for bus towing, bus flat tire repair, and interior bus cleaning.

Reviews and approves invoices from janitorial, security, waste collection, exterminating, dust control, landscape maintenance, golf cart repair, parking and other contractors.

Prepares contractor performance reports; conducts meetings with service contractors.

Assists in developing specifications for various service contracts.

Maintains records and prepares correspondence to service contractors.

Researches and coordinates payment of real estate taxes for special assessments on transit properties.

Administers various transit advertising contracts.

Coordinates maintenance of transit real estate records.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of real estate practices, terminology, contracts and lease agreements.

Considerable knowledge of the principles and practices of contract administration.

Considerable knowledge of property management and building maintenance practices and procedures.

Knowledge of the location and use of various transit properties and facilities.

Knowledge of the terms and conditions of various permits, contracts and lease agreements pertaining to the use and maintenance of transit properties.

Knowledge of the records, forms and reports required in the area of assignment.

Ability to monitor the performance of contractors providing various services to the department and assure that work is performed in accordance with contract specifications.

Ability to monitor the use of transit properties to assure compliance with the provisions of permits and leases.

Ability to maintain records and prepare correspondence and reports.

Ability to provide effective assistance in the development of specifications for contracted services.

Ability to establish and maintain effective working relationships with superiors, private contractors and a variety of departmental officials.

Two years of experience in the negotiation of leases, management of real property or property management contract administration are required. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and supervisory work in property management and contract administration for the Metro-Dade Transit Agency.

An employee in this class is responsible for supervising varied property management functions in the development of agreements and leases for the use of transit properties and the management of contracted services for transit buildings and facilities. Responsibilities include overseeing the work of contractors for services at Metrorail and Metromover facilities, reviewing and approving contractor invoices for payment, initiating contractual change orders, developing technical specifications for maintenance service contracts, and preparing resolutions and memorandums for the Board of County Commissioners pertaining to departmental contracts. The incumbent exercises considerable independent judgment in monitoring contractors and assuring that work is performed in accordance with departmental requirements. Supervision is exercised over a staff of subordinates engaged in various aspects of leasing and property management functions. Supervision is received from an administrative superior who reviews work through personal conferences and written reports for satisfactory completion of property management and contract administration activities.

##### ILLUSTRATIVE TASKS

Supervises the work of subordinates engaged in developing and negotiating agreements and leases for the use of transit properties, conducting field inspections of transit properties, and assisting in the development of contract specifications.

Oversees the work of security, janitorial, landscape maintenance, exterminating and waste collection contractors for Metrorail and Metromover stations and Metrorail and Metromover maintenance facilities.

Reviews and approves janitorial, security, elevator and escalator, exterminating, waste collection and maintenance service contractor invoices for payment.

Initiates change orders to increase or decrease the scope and/or costs of contracts.

Initiates resolutions and memorandums for approval of contracts, maintenance agreements and formal bid waivers by the Board of County Commissioners.

Develops technical specifications for maintenance services and conducts meetings with contractors.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of real estate practices, terminology, contracts and lease agreements.

Thorough knowledge of the principles and practices of contract administration.

Thorough knowledge of property management and building maintenance practices and procedures.

Considerable knowledge of the terms and conditions of various permits, contracts and lease agreements pertaining to the use and maintenance of transit properties.

Knowledge of the records, forms and reports required in the area of assignment.

Knowledge of supervisory principles and practices.

Ability to monitor the performance of contractors providing various services to the department and assure that work is performed in accordance with contract specifications.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, superiors and representatives of private contractors.

Ability to monitor the use of transit properties to assure that work is performed in accordance with contract specifications.

Ability to prepare resolutions and memorandums for approval by the Board of County Commissioners.

Ability to communicate clearly and concisely, verbally and in writing.

### MDT Property Management Supervisor (008266)

NEW 10-94

#### **Nature Of Work**

This is advanced administrative and supervisory work in property management and contract administration for the Miami-Dade Transit Agency.

### Transit Planner 2 (008271)

#### Minimum Qualifications

Bachelor's degree in Planning, Geography, Public Administration, Business Administration, or related field. Three years of professional experience in transit or transportation planning, urban planning, transit operations management, or transportation engineering is required. Must possess a driver's license. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is professional transit planning work in a public transportation system.

Employees in this class conduct a variety of complex studies and perform administrative duties in the planning of bus service changes, additions and improvements. Responsibilities include analyzing bus service problems for potential changes, evaluating circumstances and suggestions for feasibility, cost and impact, attending conferences with representatives of public agencies and private business concerns regarding public transportation services, preparing technical recommendations for lineups, and managing operator route reporting processes. Employees exercise independent judgment on technical matters and in the application of professional planning methods to transit planning assignments. Some supervision may be exercised over activities concerning research or development of information from field investigations. Supervision is received from a professional superior who reviews work for effectiveness in the analysis and research of difficult or complex transit planning analyses and studies.

##### ILLUSTRATIVE TASKS

Analyzes suggestions from various sources for changes, additions and improvements in public transportation services; analyzes changes necessary for system lineups and operational feasibility; projects patronage and formulates cost projections; establishes service guidelines for proposed lineup changes; prepares proposed route maps and schedule guidelines; prepares analyses of proposed changes; designs route guides and prepares comment sheets and notifications.

Analyzes complaints and change requests for locations of bus stops; participates and assists in field investigation of change requests; ascertains site feasibility and analyzes bus stops for route changes; makes final decisions concerning improper locations, participates in site selection process for bus shelters and approves final plans; establishes and maintains a computerized physical location file for all bus stop locations.

Contacts other county departments and departmental operations concerning various issues such as repairing of layover zones, reinstallation of bus stops or reconstructed streets, legal issues and planning functions.

Attends and participates in meetings and conferences with private consultants regarding shopping center bus stops and street reconstruction; attends conferences with various private organizations requesting service extensions and develops recommendations.

Supervises field investigation activities as assigned; provides training, prepares work schedules, reviews completed assignments; coordinates field work with planning staff requirements.

Manages and coordinates operator route report processes; receives, processes, tracks and responds to operator route reports; conducts research, schedules field investigations, participates in field investigation of operational problems as necessary; contacts various public agencies to resolve or clarify problems and develops recommendations for public transportation system changes.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the theory, principles, practices and methods of transit planning in a large metropolitan area.

Thorough knowledge of research techniques and statistical methods as applied to transit planning activities.

Considerable knowledge of the policies, goals and objectives of a transit planning and service development function.

Considerable knowledge of the principles, practices and techniques of modern urban planning.

Knowledge of public relations principles and techniques.

Knowledge of recent developments, current literature and sources of information concerning transit planning functions.

Knowledge of the geography of Metropolitan Dade County including arterial and secondary roadways.

Ability to plan, design and develop complex transit planning studies and analyses.

Ability to organize and analyze complex information and formulate effective recommendations for the solution to problems.

Ability to conduct research and analyze field data necessary to the analysis of transit planning projects.

### Transit Planner 2 (008271)

Ability to express ideas and information, clearly and concisely, verbally and in writing.

Ability to establish and maintain effective working relations with superiors and officials of public and private organizations.

Ability to coordinate the work of subordinate technical employees in research and field investigations.

NEW 1-85

#### **Nature Of Work**

This is professional transit planning work in a public transportation system.

## Human Resources Department

### Transit Planning Section Supervisor (008273)

#### Minimum Qualifications

Bachelor's degree in Planning, Geography, Public Administration, Business Administration, or related field. Five years of professional experience in transit or transportation planning are required. Additional experience in transit operations may substitute for the required education on a year-for-year basis to a maximum of two years. #### Job Specifications

##### NATURE OF WORK

This is advanced professional supervisory and technical work in transit service planning and scheduling for the Metro-Dade Transit Agency.

Employees in this class are responsible for planning, assigning and reviewing the work of subordinates engaged in various transit service planning and scheduling activities. Responsibilities include designing operationally feasible transit plans, conducting transit service monitoring and evaluation functions, directing departmental market research activities, coordinating transit service planning with other divisions and outside agencies, implementing programs for the transportation disadvantaged, maintaining a complete and accurate customer information system database, supervising implementation of group trip and prototype vehicle programs, directing planning of passenger facilities and locations, and resolving day-to-day transit service delivery problems. Incumbents exercise considerable independent judgment in managing a variety of transit service planning and scheduling activities. Supervision is exercised over a staff of professional, technical and clerical employees with assigned responsibilities in various phases of transit planning operations. Supervision is received from a professional and administrative superior who reviews work through personal conferences and written reports for technical accuracy and effectiveness of transit service planning activities.

##### ILLUSTRATIVE TASKS

Directs the design of operationally feasible transit plans including analyzing transit data, identifying and prioritizing transit service needs, developing cost-effective plans, determining resource requirements, coordinating plan implementation, and presenting plans at community meetings.

Supervises transit service monitoring and evaluation functions; develops and maintains bus and rail data collection programs.

Supervises market research activities; determines market research objectives and directs the design of market research projects; reviews research projects in progress.

Coordinates short-range transit service planning with other County transportation plans and projects.

Develops transit service policies for the transit system which are consistent with the department's strategic plan and the transit development program.

Supervises the development, administration and evaluation of transportation service programs for the transportation disadvantaged; develops financial and program recommendations; ensures required reports are completed on a timely basis; makes recommendations concerning legislative changes to programs.

Supervises maintenance of the customer information system data base; ensures the use of proper methods to correct and update computer program data.

Ensures the coordination of group trips and transportation disadvantaged service programs to maximize their effectiveness and efficiency.

Supervises subordinates responsible for monitoring and maintaining data in a prototype vehicle program.

Develops recommendations for location of bus stops, bus bays, bus shelters and benches, park-ride lots, and similar passenger facilities.

Resolves day-to-day transit service delivery problems including turning problems, safety hazards, signage problems, rough roads and need for passenger facilities.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the principles, practices, techniques and procedures of public transit scheduling.

Thorough knowledge of the geography of metropolitan Dade County including road network, residential, commercial and industrial locations.

### Paratransit Eligibility Supervisor (008283)

#### Minimum Qualifications

High school. One year of experience in determining eligibility for specialized programs and working with handicapped, disabled and elderly individuals is required. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is supervisory work with administrative responsibility in determining eligibility for special transportation services.

An employee in this class is responsible for planning, assigning and reviewing the work of clerical subordinates assigned to the special transportation services certification unit. Emphasis of the work is on supervising certification unit operations, providing assistance with difficult problems, monitoring the tracking system and interview processes, providing policy and procedural guidance to the staff, and preparing a variety of periodic reports. The incumbent exercises some independent judgment in implementing established procedures, interpreting departmental policies, and in dealing tactfully and diplomatically with handicapped, disabled and elderly customers. Supervision is exercised over a staff of clerical subordinates engaged in determining eligibility of individuals for special transportation services. Supervision is received from an administrative superior who reviews work for effective supervision and operation of the certification unit.

##### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of clerical subordinates assigned to the certification unit engaged in determining eligibility of individuals under current ordinances and regulations for special transportation services.

Reviews files to ensure information is correct and documented; signs letters approving or disapproving applicants for special transportation services; oversees maintenance of manual and automated files and tracking system; monitors interview process and appointments to ensure applicants are seen promptly.

Provides policy and procedural guidance to staff in the handling of specific issues and provides interpretations of policies regarding eligibility for special transportation services.

Intercedes directly with applicants, family members, and physicians as necessary to resolve problems; works with other paratransit staff members to resolve transportation pick-up and drop-off problems for applicants.

Prepares monthly statistical reports, including applicants certified and denied, approval reasons, age categories, and related information; prepares special reports and correspondence as required; maintains "no-show" log and incorporates information into monthly reports.

Periodically assists with interviews and assists in contacting physicians and medical facilities to determine degree of disability and ability to use conventional transportation services.

Attends periodic conferences and meetings concerning new or revised special transportation policies or procedures; revises unit procedures as necessary to improve operations.

Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of laws, regulations, and ordinances pertaining to eligibility criteria for special transportation services.

Considerable knowledge of the special transportation needs of the handicapped, disabled and elderly.

Knowledge of supervisory principles and practices.

Knowledge of public relations principles and techniques.

Knowledge of modern office management practices and procedures.

Knowledge of various anatomical and physiological conditions and limitations of the differently-abled.

Some knowledge of medical terminology.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to determine if applicants for special transportation services meet eligibility criteria.

#### Job Specifications

##### NATURE OF WORK:

This is a highly responsible and supervisory work in equal employment opportunity, Disadvantaged Business Enterprise Administration and directing labor management activities for Miami-Dade Transit.

An employee in this class is responsible for formulating and recommending the Miami-Dade Transit's (MDT) labor relations policy strategy, interpreting labor contracts, 13 (c) agreements and other labor policies and procedures, managing, directing, supervising and implementing MDT equal employment opportunity and affirmative action programs, and supervising the departmental Disadvantaged Business Enterprise program. Responsibilities include supervising and conducting complex and sensitive equal employment opportunity investigations; preparing and supervising the compilation of a variety of reports and formulating recommendations concerning equal employment opportunity complaints; advising departmental management on affirmative action goals and objectives; overseeing and participating in contract negotiations with collective bargaining groups; monitoring collective bargaining contracts in accordance with Florida statutes and the intent of agreed upon terms and conditions; coordinating labor management activities for the department; and supervising the operations of the departmental Disadvantaged Business Enterprise program to assist disadvantaged groups in participating in Agency construction projects. Supervision is exercised over a staff of professional and clerical subordinates with assigned responsibilities in equal employment opportunity activities, labor relations or Disadvantaged Business Enterprise management. General supervision is received from the Director, Miami-Dade Transit who holds the incumbent responsible for the professional management of assigned responsibilities and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS:

Directs and supervises the management of the department's labor relations functions; develops contract language and collective bargaining proposals; plans and supervises the departmental preparation process for contract and 13 (c) agreement negotiations; oversees the implementation and administration of arbitration awards, settlement agreements and letters of understanding; monitors employment hiring practices, policies and procedures and administrative functions to ensure conformity with contractual obligations; chairs labor/management committee meetings between MDT and AFSCME, TWU, and GSAF.

Functions as the department's liaison to labor unions, Employee Relations Department, County Attorney's Office and other transit properties regarding labor issues; provides technical assistance to executives, managers, and supervisors on issues related to labor contracts and other issues that affect bargaining unit personnel.

Supervises, coordinates and directs the development and implementation of departmental equal employment opportunity and affirmative action program designed to assure equal employment opportunity for minorities, women, physically disabled, and veterans.

Prepares annual equal employment opportunity and affirmative action reports for submittal to the U.S. Department of Transportation, Federal Transit Administration, Office of Civil Rights, and the county's Fair Employment Practices Office.

Oversees and supervises complex and sensitive equal employment opportunity investigations involving allegations of discrimination; directs the preparation of comprehensive and thorough investigative reports.

Develops and formulates policy statements concerning techniques for implementing departmental equal employment opportunity, affirmative action, and Disadvantaged Business Enterprise programs.

Serves as appeal officer for the Agency's Special Transportation Services (STS) program; reviews and rules on the denial of eligibility certification requests.

### Chief, MDT Office of Civil Rights and Labor Relations (008309)

Conducts research and prepares formal correspondence and reports on a variety of labor management issues for members of the Board of County Commissioners, County Manager's Office, MDT Director, or Assistant Directors; participates in meetings and seminars as MDT's labor management representative.

Directs the preparation of divisional budget; monitors expenditures.

Makes recommendation and decisions regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS:

Extensive knowledge of established local and federal laws, rules and regulations pertaining to equal employment opportunity, affirmative action programs, and labor relations activities.

Extensive knowledge of Federal Transportation Administration Disadvantaged Business Enterprise policies, procedures, and regulations.

Extensive knowledge of Miami-Dade Transit Agency equal employment opportunity, affirmative action and Disadvantaged Business Enterprise goals and objectives.

Extensive knowledge of the provisions of various collective bargaining agreements between the county and various public employee unions and associations.

Extensive knowledge of personnel management theories, principles and practices.

Thorough knowledge of established procedures for the investigation and resolution of equal employment opportunity and affirmative action complaints.

Thorough knowledge of negotiating strategies and techniques.

Thorough knowledge of the organization and operation of Miami-Dade Transit.

Thorough knowledge of the principles and practices of management, public and business administration.

Thorough knowledge of private/public sector labor relations.

Ability to supervise, direct and coordinate Miami-Dade Transit equal employment opportunity, affirmative action, and Disadvantaged Business Enterprise programs.

Ability to conduct comprehensive equal employment opportunity investigations and prepare thorough investigative reports.

Ability to prepare a variety of narrative and statistical reports for a variety of local and federal agencies.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to establish and maintain effective working relationships with subordinates, superiors, and a variety of public and private officials.

Ability to understand and interpret provisions of a variety of collective bargaining agreements.

Ability to conduct research and analyze complex issues.

### Chief, MDT Office of Civil Rights and Labor Relations (008309)

Ability to understand and create complex and comprehensive (legally bidding) documents.

Ability to provide effective testimony in legal proceedings.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to communicate effectively and in writing.

NEW 03-07

#### **Nature Of Work**

This is a highly responsible and supervisory work in equal employment opportunity, Disadvantaged Business Enterprise Administration and directing labor management activities for Miami-Dade Transit.

### Transit Administrative Coordinator (008310)

#### Minimum Qualifications

Bachelor's degree. One year of transit administrative experience is required. Additional related experience may substitute for required education on a year-for-year basis. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced administrative and public relations work for the Metro-Dade Transit Agency.

An employee in this class is responsible for performing a variety of public relations and administrative duties in support of departmental public relations programs. Responsibilities include serving as a liaison to community-based organizations, participating in community meetings and activities, preparing original articles for the community newsletter, making presentations to community groups on current transit issues, monitoring budget forecasts and expenditures, and assisting in budget preparation. The incumbent exercises some independent judgment in maintaining and enhancing community perceptions of local transit services and activities. Supervision is received from the department director who reviews work through personal conferences and written reports for effective assistance in departmental public relations activities.

##### ILLUSTRATIVE TASKS

Serves as a liaison between MDTA and community-based organizations; organizes community involvement meetings and coordinates agency participation; prepares and disseminates meeting notices and informational packages; maintains detailed and current community leaders' list; attends, coordinates and assists at public meetings.

Represents the department at meetings, workshops and conferences related to public participation in transit activities; maintains a speaker's bureau membership to inform community-based organizations about local and national transit activities.

Conducts interviews and writes original articles for the community newsletter; identifies sources of contributions to the newsletter; assists with layout and design, establishes schedules for submitting articles, and assures that copy is printed and ready for timely distribution.

Prepares articles on the Transit Coalition for submission to national transit publications and publications of other transit coalitions.

Monitors budget forecasts and expenditures; assists in planning and preparation of budget documents.

Prepares monthly briefing paper for distribution to departmental staff on community activities and makes presentations to community groups on current transit issues.

Performs related work as required

##### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of journalistic principles, practices and techniques.

Considerable knowledge of public relations principles and techniques.

Considerable knowledge of news writing and modern publicity methods and techniques.

Considerable knowledge of sources of information concerning local and national transit activities.

Knowledge of the principles of management and public administration.

Knowledge of budget preparation and administration.

Ability to assemble and write interesting and informative articles for newsletters and industry publications.

Ability to organize and coordinate transit agency participation at meetings of local community groups.

Ability to establish effective working relationships with superiors, departmental supervisors, and other public and private officials.

Ability to represent the transit agency at various workshops, meetings and conferences.

Ability to communicate clearly and concisely, verbally and in writing, to groups and individuals.

### Manager, MDT Facilities Maintenance (008320)

#### Minimum Qualifications

Bachelor's degree in Engineering, Business Administration, Public Administration or related field. Three years of supervisory experience in the construction, management and maintenance of a physical plant operation are required. Additional related experience may substitute for the required education on a year-for-year basis. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced professional and administrative work in the management and maintenance of Metrobus transit facilities. An employee in this class is responsible for management and supervision of Metrobus transit facility buildings and grounds. Emphasis of the work is on supervising and coordinating the maintenance and repair of large and complex geographically dispersed transit facilities, and grounds. Related responsibilities include preparation and monitoring of facilities maintenance budget, management of custodial services, assuring environmental compliance, removal of graffiti, bus stop sign installation and maintenance, and arrangement of preventive maintenance programs. The employee exercises a considerable degree of originality, judgment and professional managerial knowledge in the application of principles and practices of industrial technology and plant maintenance engineering.

##### ILLUSTRATIVE TASKS

- Directs maintenance, environmental engineering and craft maintenance of transit facilities.
- Administers professional, technical, trades-related planning for safety, security and preventive maintenance of buildings.
- Resolves operational problems and improves techniques and procedures.
- Oversees facility maintenance, design, engineering and construction.
- Monitors building security maintenance and various contract and leasing activities.
- Manages various administrative activities related to facilities, including warehousing, physical inventory, and procurement of equipment, tools and supplies.
- Supervises contract and leasing of real property and negotiations to lease property for County use, and leasing of County property to other organizations.
- Directs work of supervisors, contractors and maintenance mechanics to assure adherence to schedules and quality standards.
- Supervises preventive maintenance program and makes recommendations for plant equipment repair and improvement; estimates time, labor and materials required for jobs; maintains records and prepares reports; inspects and approves supplies, selects equipment for purchase and recommends equipment modifications.
- Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.
- Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Thorough knowledge of the principles of industrial technology and plant maintenance engineering.
- Thorough knowledge of the nature, purposes and operations of Metrobus transit facilities.
- Thorough knowledge of building construction, operation, costs and building support systems.
- Considerable knowledge of supervisory principles and practices.
- Considerable knowledge of contract and leasing principles and practices.
- Considerable knowledge of the principles of management and public administration.
- Ability to use professional knowledges of industrial technology and management to direct extensive Metrobus physical plant repair and maintenance activities.
- Ability to supervise geographically dispersed physical plant operations.
- Ability to supervise subordinates in a manner conducive to full performance and high morale.
- Ability to establish and maintain effective working relationships with subordinates, superiors, and officials of various county offices and private business concerns.

Bachelor's degree in Electrical Engineering or Computer Engineering. Three years of experience maintenance planning and schedule development, the maintenance of advanced electronic/electrical control and drive systems, bus and rail vehicles, and communications systems are required. A Master of Science degree in Electrical Engineering with a concentration in Electronics may substitute for one year of the required experience. Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible professional engineering work in varied engineering disciplines in field testing rapid transit system equipment and systems.

Employees in this class are responsible for directing field testing of train control systems, electro-mechanical and electronic communications systems or traction power systems in a rapid transit system. Responsibilities include solving complex electro-mechanical/electronic problems discovered during normal maintenance inspections of station, wayside and communications equipment, and providing emergency failure analysis, drawing changes, and other engineering determinations. Employees exercise considerable independent judgment in the application of professional engineering knowledges to troubleshooting of engineering problems in the area of assignment, and in dealing with other engineering groups as necessary. General supervision is received from a professional and administrative superior who holds the incumbent responsible for professional quality of work and achievement of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Reviews system maintenance data and assists in the evaluation of system reliability and maintainability; assists in the evaluation of maintenance failure reports and systems test data; coordinates work with production coordinators in the review and analysis of data.

Supports train control, communications or traction power operations by providing field engineering assistance as required; participates as needed in installation involving unusual or difficult technical problems; works with supervisors in planning new installations or major modifications of equipment; provides technical direction to supervisors on engineering problems that arise involving assigned projects.

Determines the need for system modification and/or design changes; monitors and verifies train control, communications, or traction power circuit design changes and documentation; assists in special circuitry designs for more complex train control, communications or traction power equipment installations.

Develops and reviews maintenance procedures and reviews maintenance test data; schedules train control, communications or traction power tests and assures adherence to test procedures.

Develops maintenance schedules for train control, communications, and traction power equipment.

Monitors and researches all failure reports to improve on reliability of equipment.

Monitors, supports and reviews all maintenance data on the ATP system associated with rail vehicles.

Assists superiors in the development of a centralized maintenance planning organization for prevention and non-routine maintenance scheduling and workload planning.

Monitors construction and assists in the resolution of problems as necessary; witnesses installation and testing of new construction and train control, communications or traction power equipment.

Performs on-site inspections and analysis in the rail system and evaluates system readiness.

Develops start-up schedules for train control, communications or traction power equipment installation and testing.

Monitors normal and emergency maintenance on equipment and maintains records and tests as required; prepares periodic and special reports as required.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of mechanical, electrical and electronic equipment and its' function in traction power, communications, or train control systems in a rapid transit system.

Thorough knowledge of AF-400 track circuits and related train control, communications or traction power subsystems.

Thorough knowledge and understanding of interfaces with regard to installation and maintenance of traction power, communications or train

### MDT Field Test Engineer (Electrical) (008358)

control systems.

Thorough knowledge of the principles and theories of electricity and electronics as applied to the operation and maintenance of train control, traction power or communications systems.

Thorough knowledge of the practices, tools, methods and equipment used in the repair, testing, maintenance and replacement of equipment in the area of assignment.

Thorough knowledge of precision test equipment including frequency measuring, equipment oscilloscopes, and precision voltage and current measuring devices.

Ability to analyze and diagnose complex engineering problems in traction power, communications or train control electro/mechanical and electronic equipment and systems.

Ability to perform complex engineering analyses and make comprehensive recommendations on engineering problems.

Ability to design and prepare complex engineering plans and specifications for rapid transit system equipment and systems.

Ability to read and understand complex contract specifications and procedures.

Ability to understand and evaluate contractor test data submittals.

Ability to read and understand blueprints, diagrams and schematics.

Ability to work varied shifts.

Ability to prepare and maintain records pertaining to the installation, testing, maintenance and repair of equipment and systems.

Skill in the use of precision engineering instruments and equipment.

Proof of education and work experience to meet minimum qualifications must be presented and will be verified.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible technical and supervisory work in planning and directing activities of the Miami-Dade Transit Communications and Electrical Systems Division.

An employee in this class is responsible for planning, directing and supervising a tri-modal integrated communications system for Metrobus, Metromover and Metrorail, and for directing field testing of train control systems, electro-mechanical and electronic communications systems for traction power systems in a rapid transit system. Responsibilities include developing and implementing preventive maintenance programs, overseeing the design and preparation of technical plans and specifications for the acquisition of communications and electro-mechanical systems, directing the solving of complex electro-mechanical and electronic problems discovered during normal maintenance inspections of station, wayside and communications equipment, providing emergency failure analysis, drawing changes, and other engineering determinations and dealing with regulatory agencies involved in communications and electrical issues. The incumbent exercises considerable independent judgment and technical expertise in providing for effective and reliable tri-modal integrated communications and electronic systems. Supervision is exercised over a staff of technical, professional and clerical employees engaged in various phases of divisional operations. General direction is received from an executive who holds the incumbent responsible for efficient and effective transit communications, and electrical engineering operations.

##### ILLUSTRATIVE TASKS

Supervises through subordinate supervisors the work of technical employees engaged in the installation, diagnosis, repair and maintenance of transit communications systems including radio and dispatch systems, video communications systems, transmission systems linking the rail guideway with central control, public address systems, destination signs, fare collection equipment and telephone switching systems.

Develops and establishes divisional policies and procedures for the repair and maintenance of Metrobus, Metromover and Metrorail communications and fare collection equipment; develops and implements preventive maintenance programs for radio systems, fare collection equipment and datacom/telecom systems.

Oversees the review of system maintenance data and directs the evaluation of system reliability and maintainability.

Supervises through engineers and supervisors the planning of new installations or major modifications of equipment; provides technical oversight to supervisors and engineers on engineering problems that arise involving assigned projects; directs the monitoring and verification of train control, communications, or traction power circuit design changes and documentation.

Develops start-up schedules for train control, communications or traction power equipment installation and testing.

Establishes and implements processes, procedures and guidelines for the repair control and reporting of equipment and systems requiring corrective action in the rail electronics laboratory; assures documentation for materials, parts, equipment, testing and repairs.

Supervises and directs the development of plans and technical specifications for new electronic systems.

Provides technical expertise in the resolution of complex technical problems to assure operational integrity and continuity of transit communications systems.

Oversees the preparation of the divisional budget; supervises the preparation of grant requests; monitors expenditures and overtime usage.

### **Chief, MDTField Test Engineering and Electronic Systems (008361)**

Plans and directs technical training for subordinates; maintains contacts with regulatory agencies and other County departments to resolve transit communications issues and problems.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### **KNOWLEDGE, ABILITIES AND SKILLS**

Extensive knowledge of the theories, principles and practices of electrical and electronic engineering.

Extensive knowledge of the design and operation of transit communications systems including radio and video systems, fare collection equipment, transmission systems, destination signs, and public address systems.

Extensive knowledge of mechanical, electrical and electronic equipment and its function in traction power, communications, or train control systems in a rapid transit system.

Thorough knowledge of current information and modern developments in transit communications engineering.

Thorough knowledge of laws and regulations pertaining to the design and operation of radio communications systems.

Thorough knowledge of AF-400 track circuits and related train control, communications or traction power subsystems.

Thorough knowledge and understanding of interfaces with regard to installation and maintenance of traction power, communications or train control systems.

Thorough knowledge of the principles and theories of electricity and electronics as applied to the operation and maintenance of train control, traction power or communications systems.

Through knowledge of the practices, tools, methods and equipment used in the repair, testing, maintenance and replacement of train control, traction power or communications equipment.

Knowledge of budget preparation and administration.

Ability to analyze and diagnose complex engineering problems in traction power, communications or train control electro/mechanical and electronic equipment and systems.

Ability to plan, direct and coordinate diversified transit communications activities and functions.

Ability to supervise and prepare complex engineering plans and specifications for transit communications systems.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to analyze transit communications operations and achieve divisional goals and objectives.

Ability to communicate clearly and concisely, verbally and in writing.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible professional work with supervisory responsibility in a transit system safety and assurance program for the Metro-Dade Transit Agency.

An employee in this class is responsible for providing assistance in planning and directing a transit system safety and assurance program for Metrobus, Metromover and Metrorail transportation systems, and contracted provider services. Responsibilities include reviewing plans for new construction or modifications to existing transit facilities, preparing specifications for safety-related procurements, performing system safety engineering analyses, participating in the development of transit operating and maintenance rules and procedures, conducting accident investigations and facility inspections, and participating in the development of safety program documents for all phases of safety administration. The incumbent exercises considerable independent judgment and technical expertise in identifying and resolving unsafe actions during design, operations and maintenance of the various transportation systems. Supervision is exercised over professional subordinates engaged in various phases of system safety and assurance activities. General supervision is received from a professional superior who reviews work for provision of effective assistance in planning, implementing, coordinating and directing a comprehensive system safety and assurance program.

##### ILLUSTRATIVE TASKS

Reviews and analyzes plans, drawings, specifications and calculations for new construction or modification to existing transit facilities and for construction projects adjacent to transit properties.

Prepares specifications for safety-related procurements and facility or equipment modifications; participates in technical proposal and design reviews; performs system safety engineering analyses and calculations to verify adequacy of designs.

Participates in the development of transit operating and maintenance rules and procedures; develops safety rules, procedures and awareness programs.

Reviews, interprets and applies local, state and federal safety requirements concerning public transportation systems including regulations pertaining to occupational hazards, hazardous material laws, and rules regarding bus and rail vehicles.

Reviews and participates in the development of safety training programs for departmental operating and maintenance employees and training in maintenance procedures for equipment.

Supervises or conducts accident investigations, facility inspections and site surveys; conducts safety and quality assurance audits; provides expert testimony in court as required.

Provides training to subordinates in hazard analysis techniques and accident investigations; oversees consultants assigned to safety projects.

Participates in the development of system safety, safety certification, construction safety and other safety program documents; prepares reports for state and federal agencies on the status of safety programs.

Evaluates hazards which could result in death or serious injury; develops corrective measures and verifies acceptable implementation.

Prepares agendas for safety committee meetings; assists in budget preparation; develops capital projects and equipment budgets.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of industrial safety theories, principles and practices.

Thorough knowledge of the design, construction, testing, operations and maintenance of all transit agency transportation systems.

Thorough knowledge of all local, state and federal requirements for transit system safety and transit safety training.

Thorough knowledge of transit safety equipment and transportation safety practices applicable to all transit agency transportation systems.

Considerable knowledge of laws and regulations pertaining to the safe operation of local transportation systems.

Considerable knowledge of hazardous working conditions and equipment operations in all transit agency transportation systems.

### MDT System Safety Supervisor (008365)

Considerable knowledge of accident and incident investigative methods and techniques.

Ability to provide effective assistance in the development of an integrated transit safety and assurance program for all Metro-Dade Transit Agency transportation systems.

Ability to detect hazardous conditions in all phases of transit system design, construction, testing, operations and maintenance.

Ability to assure that transit agency transportation systems comply with all safety rules, laws, ordinances, regulations, policies and procedures.

Ability to investigate accidents and incidents, identify their causes, and recommend appropriate corrective actions to prevent recurrence.

Ability to prepare a variety of reports concerning safety measures and issues.

Ability to establish and maintain effective working relationships with superiors, subordinates and a variety of local, state and federal officials.

Ability to communicate clearly and concisely, verbally and in writing.

##### NATURE OF WORK

This is highly responsible professional and managerial engineering work in planning and directing activities of the Transit Design and Engineering Division of the Miami-Dade Transit Agency.

An employee in this class is responsible for planning, coordinating and directing design and engineering of transit facilities including environmental engineering and bridge inspection and analysis. Responsibilities include negotiation and administration of engineering services contracts, review and approval of transit design criteria, supervision of the preparation of construction contract documents, review and approval of consultant's invoices, coordination of work with utility companies, direction of environmental remediation and contamination prevention programs, and supervision of the bridge inspection program for Metrorail and Metromover guideway structures. The incumbent exercises extensive independent judgment and technical expertise in managing design and engineering activities in accordance with transit design criteria and applicable codes and regulations. Supervision is exercised through subordinate supervisors over professional, technical and clerical employees serving in transit engineering or related support capacities. General direction is received from a senior executive who holds the incumbent responsible for the achievement of transit design and engineering goals and objectives.

##### ILLUSTRATIVE TASKS

Supervises the design and engineering of transit facilities including track, passenger stations, parking garages, and maintenance and storage buildings.

Supervises the design and engineering of transit-related systems including power, train control, fare collection, communications, and fire detection and prevention.

Directs subordinates in the preparation of construction contract documents related to transit projects for compliance with design criteria, scheduling, budgetary considerations, and applicable codes, laws and regulations at the local, state and federal levels.

Reviews, revises and updates design criteria applicable to transit design and engineering projects.

Directs bridge inspection and structural analysis program for Metrorail and Metromover guideway structures including inspections, preparation of remedial action plans and preparation of final reports at the end of inspection cycles.

Directs technical design reviews of consultant submittals at various levels of completion to assure final delivery complies with all requirements and scheduling considerations.

Conducts meetings to review status of projects, establish priorities, assign design review items for resolution by engineering staff, and conclude active items.

Analyzes and reviews consultant cost proposals for requested engineering services and conducts negotiations concerning fees.

Monitors construction phases of projects and supervises remedial designs, checking of shop drawings, and resolution of problems and questions originating with the contractor.

Issues work orders to consultants and reviews and approves invoices.

Supervises the environmental remediation program and contamination prevention program.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the theories, principles and practices of architecture and civil engineering.

Extensive knowledge of the principles and practices of transit design, engineering and construction.

Thorough knowledge of building materials, engineering cost estimates, construction systems and construction contracts.

### **Chief, MDT Engineering Division (Engineering Design) (008384)**

Thorough knowledge of building codes, laws and regulations pertaining to the design and construction, operation and inspection of transit facilities.

Considerable knowledge of supervisory principles and practices.

Considerable knowledge of the principles of management and public administration.

Ability to plan, direct and coordinate transit design and engineering, environmental engineering, and bridge inspection and structural analysis activities to achieve departmental goals and objectives.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to apply advanced principles of civil and transit engineering to transit design and engineering activities.

Ability to understand and interpret complex architectural and engineering drawings, specifications and contracts pertaining to transit design and engineering projects.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to interpret and comply with applicable codes, laws and regulations concerning transit facility design and engineering projects.

REVISED 01/98

### Job Specifications

#### NATURE OF WORK

This is advanced responsible secretarial and related clerical work for a division head or an exempt executive official in the County service.

Employees in this class perform a variety of complex secretarial and clerical duties for division directors or other comparable executive officials within the County organization. Emphasis of the work is on the performance of advanced secretarial duties requiring considerable knowledge of the executive's responsibilities and an understanding of the policies, programs, procedures and regulations in effect in the area of assignment. Duties typically include arranging for and attending conferences, independently answering inquiries where there is established policy or precedent action, taking and transcribing dictation, composing and typing correspondence and performing research to compile data for special reports and other purposes. Incumbents utilize a variety of office skills and considerable judgment in relieving the executive of administrative details. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work for accomplishment of desired objectives. General supervision is received from a division director or an executive official who reviews work for satisfactory performance of executive secretarial duties and for attainment of desired goals and objectives.

#### ILLUSTRATIVE TASKS

Performs secretarial and clerical duties for a division director or other comparable executive official; commits supervisor's time in making appointments and maintains calendar; maintains supervisor's itinerary and makes travel and hotel arrangements as required.

Arranges for and attends various conferences and meetings; informs participants and provides background information; serves as recording secretary at conferences, board meetings and staff consultations; takes official minutes and prepares reports of proceedings; follows through on actions required as a result of conferences.

Takes and transcribes dictation which may vary by subject matter including legal, technical, financial or other specialized terminology; takes verbatim transcript from telephone calls or in conferences as requested.

Opens, screens and distributes mail; marks important parts of instructions, orders and regulations for executive, and organizes mail according to priorities; maintains control of correspondence flow through office; insures that report deadlines are met and that all information distributed is complete.

Composes correspondence from verbal instructions of superior, and independently drafts replies to inquiries; reviews correspondence prepared by others for superior's signature to ensure correct grammar, format and completeness.

Receives and screens telephone calls and visitors; responds to requests for information by answering questions where there are established policies or regulations, or precedent actions taken by supervisor.

Plans, assigns and reviews the work of subordinate clerical employees engaged in typing reports, correspondence and other documents, filing, and performing a variety of other clerical duties; provides training in procedures and methods in the organization of assignment.

Researches and compiles data from a variety of sources in connection with special reports, budget preparation and other matters; assembles material for supervisor's reply to correspondence demanding superior's personal attention.

Keeps various activity and production records; types various activity reports, requisitions, work orders and personnel forms; composes reports on caseloads, workloads or other subjects as delegated; authorizes expenditures from petty cash; requisitions office supplies; performs arithmetic calculations for budget requests and other matters.

### CITT Administrative Secretary (008404)

Establishes and maintains office filing systems; reorganizes files as required; establishes subject matter files for superior; purges files of unnecessary items according to established policies and procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of executive secretarial methods, techniques and procedures.

Thorough knowledge of general office procedures, practices and equipment.

Considerable knowledge of the operation to which assigned including its policies, procedures, regulations, organization and workflow.

Considerable knowledge of executive protocol and the proper order of etiquette in conducting secretarial activities with responsible county and other officials.

Considerable knowledge of business English, spelling and arithmetic.

Considerable knowledge of the structure and function of various county departments.

Knowledge of supervisory principles and practices.

Ability to establish and maintain an effective working secretarial relationships with an executive official.

Ability to take and transcribe dictation at a high rate of speed.

Ability to operate typewriters, personal computers and other office machines with accuracy and speed.

Ability to develop and maintain effective working relationships with subordinates, superiors and a variety of county and other officials.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to establish and revise office policies and procedures.

Ability to research and develop information from a variety of sources.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

NEW 10/98

#### **Nature Of Work**

This is advanced responsible secretarial and related clerical work for a division head or an exempt executive official in the County service.

Must take and pass a typing skills test with a score of 40 net WPM. Photo identification is required to take the typing skills test.

## Human Resources Department

---

### CITT Senior Executive Secretary (008406)

#### Minimum Qualifications

High school diploma or GED. Four years of advanced secretarial Experience are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced and highly responsible executive secretarial and related clerical work for a Department Director or comparable executive official.

Employees in this class perform a variety of complex secretarial and clerical duties. Emphasis of the work is on the performance of advanced secretarial duties requiring a thorough knowledge of assigned areas of responsibilities and an understanding of established policies, programs, procedures and regulations. Duties typically include handling highly confidential matters for immediate supervisor, ensuring departmental compliance with County protocol requirements for various documents and reports, arranging for and attending conferences, independently answering inquiries where there is established policy or precedent action, taking and transcribing dictation, composing and typing correspondence and performing research to compile data for special reports and other purposes. Incumbents utilize a variety of office skills and considerable independent judgment in relieving supervisor of administrative details and in managing the office. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work for accomplishment of desired objectives. General supervision is received from a Department Director or comparable executive official who reviews work for satisfactory performance of executive secretarial duties and for attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Performs executive secretarial duties for the Department Director or comparable executive official; commits time in making appointments and maintains calendar; maintains itinerary and makes travel and hotel arrangements as required.

Handles highly confidential matters for submission to senior County management; oversees the preparation of major policy documents affecting departmental operations.

Monitors the Agenda of the Board of County Commissioners for department-related items and informs Director and appropriate senior departmental executives.

Ensures compliance with County policies and procedures, legal deadlines and other requirements for correspondence, legal advertising, certifications and other documents.

Prepares or coordinates the preparation of resolutions, contracts, professional service agreements and reports for presentation to the Board of County Commissioners and its subcommittees.

Follows protocol guidelines in reviewing various written submissions from operating divisions to ensure compliance with department and County requirements; monitors the timely response to correspondence from senior County management and other County officials.

Arranges for and attends various conferences and meetings; informs participants and provides background information; serves as recording secretary at conferences, board meetings and staff consultations; takes official minutes and prepares reports of proceedings; follows through on actions required.

Takes and transcribes dictation which may vary by subject matter including legal, technical, financial or other specialized terminology; takes verbatim transcript from telephone calls or in conferences as requested; operates personal computer and other computerized office equipment.

Manages the Department Director's office; opens, screens and distributes mail; marks important parts of instructions, orders and regulations, and organizes mail according to priorities; maintains control of correspondence flow through office.

### Director, Miami-Dade Transit (008499)

#### Minimum Qualifications

A Bachelor's degree and ten years of progressively responsible leadership, managerial and supervisory experience in a large urban/suburban transit agency are required. A Master's degree is desirable.

#### Job Specifications

##### NATURE OF WORK

This is highly responsible executive level work in directing the complex and varied activities of Miami-Dade Transit.

An employee in this class is responsible for directing, planning, and coordinating operations of a modern countywide urban public transportation system including Metrorail, Metromover, bus operations, paratransit services, and related administrative and support functions. Responsibilities include directing, through subordinate levels of executives, heavy rail operations and maintenance, Metromover operations and maintenance, transit engineering and construction activities, bus transportation operations and maintenance, Special Transportation Services, and a variety of financial, administrative and operational support activities. The incumbent exercises an extensive degree of independent judgment and professional managerial knowledge in the administration of a large and complex urban transportation system providing varied public transportation services. Supervision is exercised through subordinate levels of executives, managers and supervisors over a large, diversified and geographically dispersed staff of professional, operational, technical, administrative and clerical employees. General direction is received from the County Manager who holds the incumbent responsible for the professional management of departmental operations and the achievement of established transportation goals and objectives.

##### ILLUSTRATIVE TASKS

Plans, directs and coordinates, through subordinate executives, departmental administrative and support functions including financial services, employee relations, labor relations, leasing and joint development, management information systems, materials management, intergovernmental relations, marketing and communications, paratransit operations, public services, and service planning and scheduling. Directs and coordinates, through subordinate executives, Metrorail and Metromover operations including facilities maintenance, rail track and guideway maintenance, transportation operations, and rail and Metromover vehicle maintenance.

Directs and supervises, through subordinate executives, transit engineering functions including communications, transit systems development, design and engineering, project control, and transit system construction.

Directs and supervises, through subordinate executives, bus operations including bus maintenance, dispatching, and bus transportation operations.

Establishes departmental programs, functions and direction; sets goals and objectives and monitors their achievement; evaluates transportation services and assesses their effectiveness in meeting the needs of the citizens of Miami-Dade County.

Reviews organizational patterns, work relationships, and staff responsibilities; structures the organization of the department to effectively achieve organizational goals.

Attends meetings, conferences and seminars involving local, state and national transportation issues.

Meets with executive, supervisory and administrative employees to discuss and resolve budgetary issues, transit operation and maintenance problems, legislative developments, and other items.

Coordinates transportation operations with other County departments, elected officials, and other local, state and federal agencies to enhance service to the traveling public.

Makes decisions regarding hiring, discipline and promotion of subordinates; exercises authority for departmental personnel actions consistent with collective bargaining agreements, County personnel rules, and all other applicable rules and regulations.

Performs related work as required.

## Human Resources Department

---

### Director, Miami-Dade Transit (008499)

#### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of the organization, interrelationships and operations of the Miami-Dade Transit.

Extensive knowledge of the mission, goals and objectives of the department in providing quality transportation services within budgetary constraints.

Extensive knowledge of the principles of general management, business and public administration.

Thorough knowledge of supervisory principles and practices.

Thorough knowledge of local, state and federal regulations pertaining to transit operations and maintenance.

Thorough knowledge of the public transportation needs of the Miami-Dade County area.

Thorough knowledge of public relations principles and techniques.

Ability to apply advanced professional knowledge of the principles of management, business and public administration in directing, supervising and coordinating a large and complex public transportation system.

Ability to plan, organize, direct and coordinate, through various levels of executives, managers and supervisors, the work of subordinates in a manner conducive to full performance and high morale.

Ability to delegate the authority to subordinates necessary to complete responsibilities in varied departmental activities.

Ability to communicate clearly and concisely, verbally and in writing, to groups and individuals.

Ability to establish and maintain effective working relationships with senior County management, elected officials, and officials of other local, state and national organizations.

Ability to exercise judgment and discretion in devising, installing and interpreting departmental and County policies, rules and regulations.

Ability to effectively evaluate the impact of alternative possible courses of action on transportation operations, future developments and circumstances of a new or unprecedented nature.

Ability to determine if departmental standards are being met and to redirect priorities as necessary.

### Chief Protocol-Recognition Specialist (008573)

#### Minimum Qualifications

Bachelor's degree. One year of experience in journalism, public relations and/or writing and editing is required. Additional experience may substitute for the required education on a year-for-year basis.

#### Job Specifications

##### NATURE OF WORK

This is responsible clerical work supporting government protocol services for the Miami-Dade County Chairperson's Office and the Board of County Commissioners.

Employees in this class perform a range of responsible clerical duties including, assisting in preparing written items for special presentations before the Board of County Commissioners, processing protocol and proclamation request forms and back-up information received by the Office of the Mayor and the Board of County Commissioners, assisting in the maintenance and inventory of all office supplies and products, distributing documents and preparing monthly reports outlining official documents requested by the County Commission Office. Work includes assisting an administrative superior by performing routine office management functions or specialized operational or clerical activities under general supervision. The incumbent is responsible for the proper performance of independent work decisions based on experience and knowledge of departmental operations but refers policy, difficult technical or procedural matters to a superior for resolution. Work is assigned and reviewed by an administrator or superior who reviews work for general administrative effectiveness by personal observation, review of written work product and by providing assistance in matters of policy interpretation.

##### ILLUSTRATIVE TASKS

Assists in preparing written items for special presentations at Board of County Commissioners' meetings and other government events; provides information and guidance on protocol procedures and practices to county staff and citizens.

Processes protocol document request forms and back-up information received by the County Mayor's Office and Commissioners' Office; distributes copies of request to staff for completion of requested information; proofreads documents; collects and make copies of official proclamation documents and places county seal on documents.

Prepares reports detailing number of official documents requested by County Commissioners' Office; files copies of all protocol documents processed by the Office; maintains an inventory of all documents prepared and supplies and items used; orders office supplies.

Contacts county departments and ensures that representatives are present at Board of County Commissioners for protocol presentations; prepares on an emergency basis, protocol documents that are requested by the Mayor or Commissioners; ensures that all protocol documents have been finalized for presentation.

Assists with personnel activity, including preparing time sheets.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of protocol policies and procedures.

Thorough knowledge of modern office practices, procedures and equipment.

Considerable knowledge of the principles of office management, and the procedural requirements of the department assigned.

Considerable knowledge of business English and spelling.

## Human Resources Department

---

### Chief Protocol-Recognition Specialist (008573)

Knowledge of office practices and procedures.

Ability to understand and carry out moderately complex oral and written instructions.

Ability to make minor decisions in accordance with procedures, laws and regulations and to apply these to work problems.

Ability to make arithmetic computations accurately with reasonable speed.

Ability to meet and deal effectively with the general public and to use tact and good judgment.

#### NATURE OF WORK

This is responsible clerical work supporting government protocol services for the Miami-Dade County Chairperson's Office and the Board of County Commissioners.

Employees in this class perform a range of responsible clerical duties including, assisting in preparing written items for special presentations before the Board of County Commissioners, processing protocol and proclamation request forms and back-up information received by the Office of the Mayor and the Board of County Commissioners, assisting in the maintenance and inventory of all office supplies and products, distributing documents and preparing monthly reports outlining official documents requested by the County Commission Office. Work includes assisting an administrative superior by performing routine office management functions or specialized operational or clerical activities under general supervision. The incumbent is responsible for the proper performance of independent work decisions based on experience and knowledge of departmental operations but refers policy, difficult technical or procedural matters to a superior for resolution. Work is assigned and reviewed by an administrator or superior who reviews work for general administrative effectiveness by personal observation, review of written work product and by providing assistance in matters of policy interpretation.

#### ILLUSTRATIVE TASKS

Assists in preparing written items for special presentations at Board of County Commissioners' meetings and other government events; provides information and guidance on protocol procedures and practices to county staff and citizens.

Processes protocol document request forms and back-up information received by the County Mayor's Office and Commissioners' Office; distributes copies of request to staff for completion of requested information; proofreads documents; collects and make copies of official proclamation documents and places county seal on documents.

Prepares reports detailing number of official documents requested by County Commissioners' Office; files copies of all protocol documents processed by the Office; maintains an inventory of all documents prepared and supplies and items used; orders office supplies.

Contacts county departments and ensures that representatives are present at Board of County Commissioners for protocol presentations; prepares on an emergency basis, protocol documents that are requested by the Mayor or Commissioners; ensures that all protocol documents have been finalized for presentation.

Assists with personnel activity, including preparing time sheets.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of protocol policies and procedures.

Thorough knowledge of modern office practices, procedures and equipment.

Considerable knowledge of the principles of office management, and the procedural requirements of the department assigned.

Considerable knowledge of business English and spelling.

### Assistant Protocol Specialist (008574)

Knowledge of office practices and procedures.

Ability to understand and carry out moderately complex oral and written instructions.

Ability to make minor decisions in accordance with procedures, laws and regulations and to apply these to work problems.

Ability to make arithmetic computations accurately with reasonable speed.

Ability to meet and deal effectively with the general public and to use tact and good judgment.

Ability to promote and maintain effective departmental and public relations.

Ability to prepare correspondence, operational and statistical tabulations and reports.

Ability to communicate effectively, orally and in writing.

Skill in typing accurately from rough draft, plain copy or dictation machines at a reasonable rate of speed.

### State Coordinator (008618)

#### Minimum Qualifications

Bachelor's degree with major coursework in public administration, political science, business administration or a related field and a minimum of two years experience in the legislative process required.

#### Job Specifications

##### NATURE OF WORK

This position requires a detail oriented professional with strong communication and advocacy skills to represent Miami-Dade County's State Legislative Delegation and promote their State legislative initiatives.

The person in this position must serve as the liaison between the Miami-Dade County Commission and the twenty-five members of the Miami Dade County Legislative Delegation. This person must be able to identify and prioritize legislative issues of interest to the Delegation; as well as plan and coordinate meetings to discuss pending legislation with all interested parties. The person in this position reports to the Director of Intergovernmental Affairs and receives general direction from the Chair of the Miami-Dade Delegation. The Director will seek input from the Delegation Chair on the hiring of this coordinator and also in evaluating the quality and quantity of the work of the individual in that position.

##### ILLUSTRATIVE TASKS

The person in this position must be able to efficiently and competently execute the following tasks:

- Performs research on proposed legislation as requested by the Chairman of the Delegation and/or its Members.
- Organizes public hearings to provide opportunities for the general public to present specific issues before the legislative delegation.
- Provide written and verbal reports in response to inquiries from legislative members, press, and the general public.
- Organize, develop and prepare agendas for Delegation meetings.
- Works closely with Appropriation staff in monitoring appropriation requests by Miami-Dade County
- Represent the Chairman of the Delegation as needed in meetings.
- Serve as a press secretary for the Delegation Chairman, organizing press conferences, writing press releases.
- Review commission agendas and convey pertinent items to members of the Delegation.
- Develop and maintain relationships with members of the Legislature, County Commission. County officials, other delegations to the state government and related associations with mutual interests.
- Attend County and State Legislature hearings
- Build and maintain relationships with local, regional and statewide committees and leaders for the purpose of communicating and advocating the County's legislative interests.
- Serve as a key legislative correspondent and liaison, ensuring accurate, timely and thorough presentation of the County's policy positions to legislators and their associates.
- Attend hearings and proceedings and review publications, agendas and registers for the purpose of tracking state legislative activities.
- Monitor initiatives, programs, communications, reports and legislation issued by commissioners, the Mayor, the County Manager and department directors relating to state legislative matters.
- Assist and facilitate meetings with County administrators, Commissioners, and delegations to the state legislature to discuss and present issues relating to state legislative matters.
- Assist in ensuring Commissioners or department level officials are notified of and available at state legislative hearings and proceedings for the purpose of presenting or discussing issues critical to Miami-Dade County.
- Assist and participate in the planning and coordination of visits to Tallahassee by Commissioners, the Mayor, the County Manager or department level officials.
- Serve as a liaison with caucuses that include other large counties and municipalities.
- Generates regular and intermittent reports detailing legislative activities and advocacy activities relating to pending legislation.

##### KNOWLEDGES, ABILITIES AND SKILLS

- Thorough knowledge of the state legislative process.
- Considerable knowledge of the principles of public administration.
- Considerable knowledge of the interrelationships between governmental entities.

### State Coordinator (008618)

Considerable knowledge of state programs, laws and regulatory requirements.  
Considerable knowledge of the structure, functions and organization of Miami-Dade County government.  
Ability to plan, coordinate and facilitate advocacy activities.  
Ability to effectively communicate the Delegation and the County's interests before elected and appointed officials.  
Ability to conduct research and prepare written reports and analysis.  
Knowledge of the legislative process.  
Knowledge of Florida state government, legislative rules, and procedures.  
Ability to communicate effectively, concisely, verbally, and in writing.  
Ability to deal tactfully and courteously with the demands of the public, press, elected officials and lobbyists.  
Ability to conduct meetings and to make presentations.  
Ability to process large amounts of information from diverse sources and to integrate that information into logical format for presentation in reports, documents and other written materials.  
Ability to be resourceful and act independently.  
Ability to understand House and Senate rules, regulations, and policies.

Nov. 2008

### **Nature Of Work**

Position requires frequent travel to Tallahassee especially during the state legislative session, Incumbents must be able to spend a greater part of the legislative session in Tallahassee during this time period every year.

#### NATURE OF WORK

This is highly responsible professional and administrative work in planning and directing governmental activities for an assigned district Commissioner.

An employee in this class is responsible for supervising, coordinating and directing the day-to-day administrative operations of a Commissioner's office. Responsibilities include, directing office staff and ensuring the execution of goals and objectives as identified by the Commissioner, overseeing the preparation of the district's operating budget, coordinating with county staff the BCC agenda process, reviewing district organizational and staffing plans to ensure that they are consistent with designated objectives, directing the preparation of news releases and media interviews on behalf of the Commissioner's Office, and recommending modifications to district office procedures, as necessary.

Incumbents exercise considerable independent judgment in directing numerous professional operational issues to ensure the goals as set forth by the assigned Commissioner are being met. Supervision is received from the Commissioner, who holds the incumbent responsible for effectiveness in the preparation, administration and monitoring of complex administrative issues and for adherence to policies and procedures and for attainment of desired objectives.

#### ILLUSTRATIVE TASKS

Plans, directs and supervises the day-to-day administrative operations of a Commission district office; oversees the preparation and subsequent review of specialized budget documents; periodically analyzes budget status by monitoring expenditure reports.

Assigns, directs and supervises the implementation of designated special projects as directed by the Commissioner; meets with staff to offer direction and to ensure adherence to stated project objectives.

Directs and reviews the preparation of constituent correspondence; ensures appropriate staff members are assigned to calendared community events.

Supervises the preparation of news releases on behalf of the district Commissioner; prepares talking points for the Commissioner; coordinates media interviews with office staff.

Assists with coordinating the BCC agenda process; ensures agenda items are placed on calendar for hearing; reviews the dissemination of agendas to various county departments; coordinates Commissioner's calendar with secretarial staff.

Oversees government protocol functions, to include directing the writing of governmental proclamations, commendations, and certificates of appreciation, salutations, scrolls, sympathy resolutions and other government documents, as requested by elected and county officials.

Serves as a liaison to the Mayor's Office, County Manager's Office, and other BCC offices on numerous special projects and BCC operational issues.

Assists the Commissioner with initiating and coordinating countywide special projects; serves as duty officer for Commissioner in the event of an emergency.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews employee performance reports prepared by subordinates; rates employee performance.

##### NATURE OF WORK:

This is administrative work in performing various administrative activities in a central administrative division or special program in a county department or agency. Employees in this class are responsible for performing various administrative duties in assisting departmental management in carrying out required administrative operations. Duties or combination of duties performed vary, depending on the department to which assigned. Some incumbents in the class perform specialized duties of a staff nature relating to a specific program. Employees are assigned duties such as cost analysis and control, budget preparation and expenditure control, purchasing and inventory work, methods and procedure studies, report or grant proposal preparation and personnel administration. Incumbents exercise some independent judgment in devising and installing new work methods, interpreting rules, regulations and procedures and in making recommendations to superiors. Supervision may be exercised over clerical and technical employees who assist in various phases of administrative operations. Supervision is received from an administrative superior who reviews work for attainment of desired management objectives and conformity with established administrative and departmental policies and procedures through conferences, personal inspections and review of reports.

##### ILLUSTRATIVE TASKS:

Assists in planning and preparing divisional or project budgets; insures adherence to budget procedures and guidelines; reviews completed budget documents for format, accuracy of budget codes and computations; monitors budget forecasts and expenditures for departmental projects and activities; prepares periodic budget reports. Supervises clerical subordinates engaged in preparation of invoices and billings for equipment or services, issuance of purchase orders and requisitions, reconciliation of computer reports and related clerical activities; provides training to employees in new procedures required with automated accounting and reporting systems. Coordinates the maintenance of various accounting records such as cash and surety bonds; audits departmental financial records to obtain data for management reports relative to budget control, purchasing standards, stores and equipment inventory control or improvements in operational efficiency; recommends procedures for collection and reporting of data on departmental programs in cost analysis and revenue producing activities; accounts for costs and reviews revenue summaries to assure revenues are properly collected. Analyzes financial, procurement and administrative procedures for simplification and improvement in efficiency; analyzes purchase orders to determine requirements; checks requisitions for completeness and accuracy; writes specifications and requisitions and assists in selection of bids for departmental equipment or supplies. Interviews applicants for employment to determine qualifications; provides information to applicants regarding career county employment; requests eligible lists and coordinates panel interviews for departmental positions; processes affirmative action complaints from employees through appropriate channels. Assists in the supervision of clerical subordinates engaged in processing departmental personnel actions; discusses work related problems with employees; coordinates departmental personnel activities with federal funded employment programs as necessary. Conducts assigned research, procedural or administrative studies and prepares narrative and statistical reports, proposing courses of action; reviews workload reports from operating segments for conformance with department instructions; audits program records reflecting client or patron workloads for conformance with departmental instructions and accuracy of computations. Makes recommendations regarding hiring, discipline, and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance. Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS:

Considerable knowledge of the principles of general management and their application to governmental administration. Considerable knowledge of research techniques and the sources and availability of current information applicable to the area of assignment. Knowledge of budget preparation procedures and reporting requirements. Knowledge of departmental, legal, administrative, and procedural regulations. Knowledge of the principles and procedures of modern office administration. Knowledge of basic accounting principles, practices, and procedures. Knowledge of the use of data processing and cost accounting systems. Knowledge of the principles, practices, and procedures of public personnel administration. Knowledge of supervisory principles and practices. Ability to analyze administrative problems and make sound recommendations as to their solution. Ability to supervise the work of subordinates in a manner conducive to full performance and high morale. Ability to understand and carry out complex oral and written instructions. ##### NATURE OF WORK

This is responsible professional work in assisting the Commissioner's Director of Policy & Legislation and the Commissioner's Chief of Staff in the area of legislative support services.

Employees in this class perform a range of legislative support services monitoring, researching, effectively communicating and writing on public policy and legislative matters that are of concern to the assigned Commissioner and district constituents. Duties include conferring with the assigned Commissioner and Commissioner's Chief of Staff on legislative and policy ideas; identifying significant local public policy issues and their connection to existing or proposed legislation; corresponding with and receiving input from the County Attorney's Office, other Commission staff and concerned parties on upcoming or proposed legislative matters; and generating draft resolutions, ordinances and amendments for the assigned Commissioner and Chief of Staff. Incumbents exercise independent judgment, discretion and initiative in facilitating review and legislative draft preparation activities. General direction is received from an assigned Commissioner, Chief of Staff and Director of Policy & Legislation who evaluate work for quality of results in the effective development of policy and legislative proposals.

##### ILLUSTRATIVE TASKS

Briefs Commissioner, Chief of Staff and Director of Policy & Legislation on pertinent and/or specific items that come before the Commission on various agendas, meetings, and workshops.

Drafts written resolutions, ordinances and amendments on behalf of Commissioner with the assistance of appropriate County staff.

Conducts research on pertinent district issues and works closely with County Attorney's Office and Chief of Staff in order to assure that Commissioner's staff is acting within the law and in compliance with applicable County and/or State charter (i.e. - sunshine law, gift law, etc.).

Drafts proposals of ideas and plans issued by Commissioner and utilizes those ideas and plans in the drafting of proposed resolutions, ordinances and amendments. Works closely with the Director of Policy & Legislation.

Monitors and conducts ongoing research of public policy and local issues; assesses potential to improve, modify or enhance existing ordinances/resolutions with the aim of improving quality of life as well as the productive and responsive management of County government as deemed appropriate by the Commissioner.

##### KNOWLEDGE, SKILLS AND ABILITIES

Considerable knowledge of executive protocol and order of etiquette in dealing with various elected and appointed County officials.

Considerable knowledge of Commission legislative processes.

Considerable knowledge of the structure, functions and organization of Miami-Dade County government.

Considerable knowledge of the relationships among the various County departments and agencies.

Knowledge of research and writing principles and practices.

Knowledge of the principles of public administration.

#### NATURE OF WORK

This is advanced and highly responsible executive secretarial and related clerical work for the office of the Commission Auditor.

Employees in this class perform a variety of complex secretarial and clerical duties. Emphasis of the work is on the performance of advanced secretarial duties requiring a thorough knowledge of assigned areas of responsibilities and an understanding of established policies, programs, procedures and regulations. Duties typically include handling highly confidential matters for immediate supervisor, ensuring departmental compliance with County protocol requirements for various documents and reports, arranging for and attending conferences, independently answering inquiries where there is established policy or precedent action, taking and transcribing dictation, composing and typing correspondence and performing research to compile data for special reports and other purposes. Incumbents utilize a variety of office skills and considerable independent judgment in relieving supervisor of administrative details and in managing the office. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work for accomplishment of desired objectives. General supervision is received from the Department Director or comparable executive official who reviews work for satisfactory performance of executive secretarial duties and for attainment of desired goals and objectives.

#### ILLUSTRATIVE TASKS

Performs executive secretarial duties for the Department Director or comparable executive official; commits time in making appointments and maintains calendar; maintains itinerary and makes travel and hotel arrangements as required.

Handles highly confidential matters for submission to senior County management; oversees the preparation of major policy documents affecting departmental operations.

Monitors the Agenda of the Board of County Commissioners for department-related items and informs Director and appropriate senior departmental executives.

Ensures compliance with County policies and procedures, legal deadlines and other requirements for correspondence, legal advertising, certifications and other documents.

Prepares or coordinates the preparation of resolutions, contracts, professional service agreements and reports for presentation to the Board of County Commissioners and its subcommittees.

Follows protocol guidelines in reviewing various written submissions from operating divisions to ensure compliance with department and County requirements; monitors the timely response to correspondence from senior County management and other County officials.

Arranges for and attends various conferences and meetings; informs participants and provides background information; serves as recording secretary at conferences, board meetings and staff consultations; takes official minutes and prepares reports of proceedings; follows through on actions required.

Takes and transcribes dictation which may vary by subject matter including legal, technical, financial or other specialized terminology; takes verbatim transcript from telephone calls or in conferences as requested; operates personal computer and other computerized office equipment.

Manages the Department Director's office; opens, screens and distributes mail; marks important parts of instructions, orders and regulations, and organizes mail according to priorities; maintains control of correspondence flow through office.

Composes correspondence from verbal instructions and independently drafts replies to inquiries.

## Commission Auditor Senior Executive Secretary (008651)

Receives and screens telephone calls and visitors; responds to requests for information by answering questions where there are established policies or regulations, or precedent actions taken by Director.

Plans, assigns and reviews the work of subordinate clerical employees engaged in typing reports, correspondence and other documents, filing, and performing a variety of other clerical duties; provides training in procedures and methods in the organization of assignments.

Researches and compiles data from a variety of sources in connection with special reports, budget preparation and other matters; assembles material for reply to correspondence demanding Director's personal attention.

Keeps various activity and production records; types various activity reports, requisitions, work orders and personnel forms; composes reports on caseloads, workloads or other subjects as delegated; authorizes expenditures from petty cash; requisitions office supplies; performs arithmetic calculations for budget requests and other matters.

Maintains office filing systems; reorganizes files as required; establishes subject matter files; purges files of unnecessary items according to established policies and procedures.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

### KNOWLEDGES, ABILITIES AND SKILLS

Extensive knowledge of executive secretarial methods, techniques and procedures.

Extensive knowledge of general office procedures, practices and equipment.

Thorough knowledge of executive protocol and the proper order of etiquette in conducting secretarial activities with responsible County and other officials.

Thorough knowledge of the department to which assigned including its policies, procedures, regulations, organization and work flow.

Thorough knowledge of the responsibilities of a Department Director and the relationships with elected representatives, senior County management, other Department Directors and officials and the public.

Considerable knowledge of business English, spelling and arithmetic.

Considerable knowledge of the structure and function of various County departments.

Considerable knowledge of public relations principles and techniques.

Knowledge of supervisory principles and practices.

Ability to establish and maintain an effective working secretarial relationship with a Department Director, Senior Assistant to the County Manager or comparable executive official..

Ability to take and transcribe dictation at a high rate of speed.

Ability to operate typewriters, personal computers and other computerized office equipment with accuracy and speed.

### **Commission Auditor Senior Executive Secretary (008651)**

Ability to develop and maintain effective working relationships with subordinates, elected representatives and their staff, senior County management, and a variety of other County and private officials.

Ability to express ideas clearly and concisely, verbally and in writing.

Ability to establish and revise office policies and procedures.

Ability to research and develop information from a variety of sources.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

##### NATURE OF WORK

This is advanced and responsible professional legislative analysis work in the Office of the Commission Auditor.

Employees in this class serve in an advanced capacity monitoring, analyzing and reporting on all events, public policy and legislative matters of interest in support of assigned committees of the Board of County Commissioners. Duties include overseeing the work of lower level legislative analysis staff carrying out projects for assigned committees; reviewing the work of and providing advice and guidance to lower level legislative analysts; corresponding with and receiving input from other Office of the Commission Auditor staff, the Commission and its staff, County administrators and the County Attorney's Office; providing objective and critical analyses, reports and briefings to the Commission; and facilitating special analysis projects directly relating to work of assigned committees. Employees in this class serve as a senior legislative correspondent, ensuring accurate, timely and thorough analysis of critical issues, and completion of a wide range of special analysis assignments. Incumbents exercise considerable independent judgment, discretion and initiative in facilitating analysis and reporting activities. General direction is received from an administrative superior who evaluates work for quality of results in the effective analysis of legislative matters.

##### ILLUSTRATIVE TASKS

Conducts research and policy analyses to assist the Commission in formulating and developing legislation and public policy. Maintains awareness of local, state and national current events and literature that may have implications for the Board of County Commissioners.

Provides objective and critical analyses of proposed legislation and of public policy issues for the Board of County Commissioners, including analyses of large, complex issues requiring support from lower level legislative analysts. Makes preliminary determinations of impact of proposed legislation on the County; projects costs, increased or lost revenue, and potential impact to County policies or programs as a result of legislation or regulatory changes. Provides timely, accurate and thorough written and oral reports and briefings.

Coordinates the provision of legislative analysis support to several committees of the Commission. Reviews the work of and provides guidance and mentoring to lower level legislative analysts assigned to their committees and/or projects. Encourages continued professional development of lower level analysts.

Assists the Chief Legislative Analyst in development of project definitions, work plans and staff assignments.

Corresponds and communicates effectively, and coordinates projects, with other Office of the Commission Auditor legislative staff and with the chairperson and members of the Commission and their staff. Effectively participates on individual projects and as a team member on joint projects.

Assembles documentation and generates reports detailing analysis of legislative and public policy issues for review by the Commission. Provides timely, accurate and thorough written and oral reports for the Commission. Briefs the Commission on pending legislative or policy matters.

Communicates effectively with County administrators, the County Attorney and other department or agency officials in carrying out legislative staff functions.

Performs a range of administrative tasks in support of Office of Commission Auditor activities.

Performs related work as required.

##### NATURE OF WORK

This is advanced professional auditing work for the Board of County Commissioners with some supervisory responsibility in the audit of various financial operations in county departments, external government organizations having contractual relationships with the county, and audit assignments of commercial firms doing business with Miami-Dade County.

Employees in this class perform more complex auditing assignments in various staff and operating agencies, departments and in external organizations, or serve as team leaders in the conduct of small-scale routine audits. Incumbents may also be assigned to assist professional superiors in the conduct of special auditing assignments of considerable complexity. Work differs from that found in the Assistant Auditor class in that the positions require more advanced professional knowledge of auditing theory and practices and the application of a greater degree of professional judgment in the disposition of accounting problems which arise. Emphasis may be assigned to a variety of departments and agencies or may specialize in audits of specifically assigned federally funded programs. Some incumbents are engaged in audits of firms that have contracts or franchises with the county. Supervision is received from a professional superior who reviews statements and reports and evaluates work for quality of results and adherence to professional auditing standards and program guidelines.

##### ILLUSTRATIVE TASKS

Supervises subordinate personnel in conducting audits of fiscal records of county departments; personally audits more difficult fiscal records; reviews and corrects records of audits for subordinate personnel; prepares or supervises preparation of final reports, summaries and supporting information together with analytical statements.

Conducts and supervises audits of outside firms that have franchises with the county, as assigned; conducts and supervises audits of outside agencies that are funded by federal grants; reviews compliance of firms and agencies with federal, state and local laws, rules, regulations and guidelines.

Determines whether county organizational units and applicable external organizations are performing their planning, custodial, accounting or control activities in compliance with policies, procedures, standards, laws and regulations, and in a manner consistent with objectives and standards of administrative practices and applicable federal, state and local laws and ordinances.

Performs audit assignments typically involving complete segments of audit programs involving manual accounting systems or generally automated systems.

Reviews incurred costs, forward pricing or bid proposals, progress payment requests, reimbursement claims, overhead costs, price redeterminations; termination claims, defective pricing reviews, purchasing, estimating and accounting surveys, and other miscellaneous audits and contract administration assignments.

Develops audit programs and contacts contractor/ subcontractor personnel to explain purpose of the audit and to obtain audit information.

Determines or assists in determining the direction, theory, thrust and scope (approach) of audit.

Obtains, analyzes, and appraises evidential data as a basis for an informed and objective opinion on the adequacy and effectiveness of the system and the efficiency of performance of the activities being reviewed and on the adequacy of outside commercial firms, franchisers, or concessioners representations.

### **BCC Associate Auditor (008656)**

Makes, or assists in making, oral or written presentations to management during and at the conclusion of the examinations, after approval by the supervising auditor, discussing deficiencies and recommending corrective actions.

Prepares formal written reports, as requested, expressing opinions on the adequacy and effectiveness of the system and the efficiency with which activities are carried out.

Appraises, or assists in appraising, the adequacy of corrective actions taken to improve deficient conditions.

Assists superior in the conduct of more complex assignments such as those of an investigative nature.

Prepares summaries, schedules and supporting information for phases of audits assigned.

Performs related work as required.

#### **KNOWLEDGES, ABILITIES AND SKILLS**

Considerable knowledge of generally accepted accounting principles, public finance administration and internal control systems and their methods and application to the development, installation and audit of governmental accounting systems.

Considerable knowledge of the special principles, practices and procedures of auditing with reference to public finance and governmental accounting.

Considerable knowledge of established audit program guidelines applicable to audits assigned.

Considerable knowledge of established audit program guidelines applicable to audits assigned.

Considerable knowledge of federal, state and local laws, rules, regulations and guidelines relating to financial records of county departments and agencies funded by federal grants.

Knowledge of the organization and operating activities of departments and agencies funded by federal grants.

Knowledge of supervisory practices and procedures.

Ability to plan organize and direct efforts to achieve audit objectives.

Ability to understand, interpret and implement auditing policies, goals and programs.

Ability to exercise judgment and discretion in making sound auditing decisions.

Ability to apply policies and procedures specified in audit program guidelines for various departments and agencies.

Ability to prepare more complex accounting reports and statements.

Ability to promote and maintain effective departmental and public relations.

Ability to maintain and objective attitude in the conduct of audits.

Ability to perform detailed work involving written and numerical data.

Ability to make arithmetic calculations rapidly and accurately.

### BCC Associate Auditor (008656)

#### NATURE OF WORK

This is highly responsible and professional administrative work in supervising, planning, organizing and implementing various administrative activities of the Office of the Board of the County Commissioners and the Office of the Commission Auditor.

An employee in this class is responsible for supervising, planning, organizing and implementing diversified administrative activities, to include coordinating and monitoring the Board of County Commissioners' budget, administering all personnel office activities, and overseeing and approving procurement and financial requests. Assignments are broad in nature with considerable opportunity for the exercise of independent judgment. Supervision is exercised over professional and clerical employees who assist in various phases of administrative and clerical operations. General direction is received from an administrative superior who evaluates work for adherence to county policies and attainment of desired goals and objectives through personal conferences and review of reports of operations.

#### ILLUSTRATIVE TASKS

Plans and coordinates the day-to-day administrative operations of the Board of County Commissioners, BCC Office of Commission Auditor and BCC Office of Intergovernmental Affairs; prepares and coordinates office budget requests; provides superiors with budget histories and pertinent information on forecasts; reviews preparation of specialized budget documents; periodically analyzes budget status by monitoring monthly expenditure reports; and prepares and processes transactions, periodic adjustments and transfers.

Supervises maintenance of inventory controls; reviews and controls procurement processes; reviews purchase requisitions; assures availability of funds for expenditures; reviews and prepares contract bid specifications; and purchases office equipment, materials and supplies.

Coordinates and supervises office fiscal activities; approves payments for invoices for completed work by assuring compliance with contract terms, laws, rules and regulations; approves journal entries and adjustments prepared by subordinates; explains variations in expense projections to superiors; supervises accounts established for reimbursement from various sources; analyzes travel expense reports and reconciles monthly expenditure reports.

Supervises personnel activities including employment, personnel records and payroll; authorizes leave and overtime.

Assists the Chairperson of the Board of County Commissioners with initiating and coordinating countywide special projects.

Serves as a liaison to the County Manager's Office, Office of Strategic Business Management, Finance, GSA, ERD and ETSD on numerous special projects and BCC operational issues.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; reviews employee performance reports prepared by subordinates; rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of the principles of general management, public and business administration and their application to governmental administration.

Thorough knowledge of applicable state, federal and county laws, rules and regulations pertaining to departmental operations.

Thorough knowledge of the principles of public personnel administration and of county personnel policies and procedures.

## Human Resources Department

##### NATURE OF WORK

This is highly responsible professional and administrative work in planning and directing activities for the Office of Intergovernmental Affairs.

An employee in this class is responsible for coordinating intergovernmental relations activities at the federal, state and local levels on behalf of the Miami-Dade County Board of County Commissioners. Responsibilities include preparing federal and state legislative packages, coordinating meetings between the Board and the County's legislative delegations, reporting to the Board regarding the filing and progress of current bills and appropriations and providing recommendations regarding any legislative action that may benefit Miami-Dade County. The incumbent exercises considerable independent judgment in formulating and directing numerous promotional and public relations activities to ensure the goals as set forth by the commission are being met. General direction is received from the Board of County Commissioners who holds the incumbent responsible for the effective administration of the legislative affairs of the office.

##### ILLUSTRATIVE TASKS

Coordinates the County's intergovernmental relations at the federal, state, and local levels.

Manages the County's federal and state governmental representation and consulting services contracts.

Prepares annual federal and state legislative packages in a timely manner for the Board's consideration and approval and inform the Board of all issues affecting the County.

Develops and submits to the Board an annual timetable for the preparation, consideration and approval of the federal and state legislative packages to allow the Board sufficient time to review and approve such packages.

Meets with the Board during each board meeting while the congressional session and the Florida Legislature are in session and meeting in committee; otherwise meets with the Board on a monthly basis.

Coordinates meetings and facilitates relationships between the Board and the Miami-Dade County state and federal legislative delegations no less than once each quarter pursuant to Resolution No. 1060-93.

Advises the Board, Mayor, County Manager and County Departments of the filing, progress and amendment of bills, appropriations, and legislative reports and projects that may affect the County.

Discusses and recommends any affirmative legislative action that may benefit the County given the current legislative trends and dynamics, including actions related to both substantive legislation and appropriations.

Makes decisions regarding hiring, discipline and promotion of subordinates; reviews performance reports prepared by subordinates and rates employee performance.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Thorough knowledge of the mission, goals and objectives of the Board of County Commissioners.

Thorough knowledge of federal, state and local legislative processes.

## Human Resources Department

---

## Deputy Director, Department of Cultural Affairs (008919)

### Minimum Qualifications

### Job Specifications

#### NATURE OF WORK

This is highly responsible executive level work in assisting with the planning and coordinating cultural programs for the Miami-Dade Department of Cultural Affairs.

An employee in this class is responsible for assisting the Department Director in the development, implementation and operation of cultural affairs activities in support of cultural programs, non-profit organizations, individual artists, and audiences comprised of local residents and visitors. Responsibilities include developing planning and program evaluation systems, interacting with members of the Cultural Affairs Council advisory board, maintaining contacts with officials of various public and private organizations at the local, regional, national and international levels, directing public information activities, preparing and administering an annual budget, and analyzing community-wide organizational structures and relationships within the cultural affairs area. The incumbent exercises considerable independent judgment in effectively coordinating cultural affairs services in a complex non-profit cultural community. General direction is received from the Department Director who holds the incumbent responsible for providing effective assistance in achieving cultural affairs program goals and objectives.

#### ILLUSTRATIVE TASKS

Supervises the work of subordinate professional employees engaged in a variety of cultural affairs activities including competitive grants program administration, public information production and dissemination, provision of technical assistance to individuals and organizations, and interaction with elected officials and representatives of various County departments.

Assists in the analysis and development of goals and objectives of the Cultural Affairs Council; analyzes policies and makes recommendations concerning pertinent legislative matters; oversees public relations activities.

Develops and maintains contacts with a wide variety of local, state, federal and regional public and private agencies to create a working network for the coordination of cultural services and resources.

Coordinates an ongoing interactive public planning process; identifies key issues and needs; develops coalitions of organizations and individuals to implement cultural affairs projects; initiates special projects and model programs to address areas of priority attention or opportunity.

Identifies sources of funding for cultural affairs; applies for and administers public and private sector grants.

Attends board meetings of the Cultural Affairs Council and its subcommittees and develops procedures for effective operations.

Represents the Cultural Affairs Council on boards, task forces and committees involved in issues related to cultural affairs.

Reviews and analyzes current Cultural Affairs Council programs and initiatives and makes recommendations to improve effectiveness.

Develops and oversees evaluation and monitoring processes pertaining to cultural affairs organizations and activities; advises constituents on administrative and program management issues and solutions to problems.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

## Human Resources Department

---

### Deputy Director, Department of Cultural Affairs (008919)

Thorough knowledge of the goals and objectives of community local arts agencies and cultural arts agencies pertaining to the development, coordination and implementation of support to the non-profit cultural community.

Thorough knowledge of local, state, regional, federal and private agencies involved in cultural affairs activities.

Thorough knowledge of public relations principles and techniques.

Thorough knowledge of the sources and availability of current information and resources pertaining to cultural affairs problems, issues and solutions.

Considerable knowledge of the principles of public and business administration.

Knowledge of supervisory principles and practices.

Ability to effectively assist in planning and directing a comprehensive cultural affairs program for the local metropolitan area.

Ability to interact effectively with cultural constituents, professional and volunteer representatives of major organizations, community groups, and individual artists.

Ability to establish and maintain effective working relationships with subordinates, superiors and a variety of public and private officials.

Ability to analyze organizational structures and interagency relationships and make sound recommendations for improvement.

Ability to communicate clearly and concisely, verbally and in writing.

Ability to identify and obtain sources of funding for cultural affairs activities.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

#### MINIMUM QUALIFICATIONS

Bachelor's Degree in Fine Arts, Arts Administration, Humanities or related field. Nine years of professional experience in the management of cultural affairs programs are required.

## Airport Buyer (009019)

### Minimum Qualifications

High school diploma or GED. Two years of experience in large-scale purchasing to include purchasing commodities and services through a bidding process are required.

### Job Specifications

#### NATURE OF WORK

This is specialized work in the purchase of assigned commodities in a central procurement operation of the county.

Employees in this class are responsible for purchasing various items in assigned commodity groups for one or more departments. Emphasis of the work is on review of requisitions, preparation of bid invitations, analysis of bids, recommendation of awards and preparation of purchase orders. Duties include communication with vendors and departmental officials on purchasing, shipping, receiving and invoicing problems and processes. Some employees in this class perform procurement work in a hospital facility and may be assigned to purchase of certain groups of commodities, such as hospital drugs. Incumbents must apply knowledge of specifications of frequently purchased commodities, sources of supply, current prices and market trends in the timely purchasing of a large volume of goods. Supervision is received from a technical or administrative superior who reviews work progress and completed work to assure conformance with established policies and procedures.

#### ILLUSTRATIVE TASKS

Reviews purchase requests; contacts departmental officials to clarify amounts or nature of items requested; refers to current supply catalogues and other references for sources of supply.

Reviews specifications used as the basis for bids on all commodities within an assigned commodity group.

Obtains competitive bid quotations from vendors; maintains mailing lists of vendors; tabulates and analyzes bids to determine lowest and best bidders; prepares purchase orders; maintains files of vendors to whom bids have been sent.

Makes studies and collects data on current market conditions to keep informed on market trends; interviews salesmen regarding ordering of supplies.

Schedules delivery dates and follows-up on delayed deliveries.

Selects and purchases a limited variety of merchandise items for resale.

Performs related work as required.

#### KNOWLEDGES, ABILITIES AND SKILLS

Knowledge of large scale purchasing methods and procedures in an assigned commodity grouping.

Knowledge of federal, state and local laws, rules, regulations and ordinances effective in governing the purchase of commodities and services.

Knowledge of specifications, grades, qualities, supply sources and market factors of commodity categories frequently required by departments in the area of assignment.

Knowledge of departmental policies, rules and regulations regarding the purchase of assigned commodity groupings.

Knowledge of methods used in maintaining accurate and systematic procurement records.

Ability to analyze and process a large volume of procurement records and to perform a variety of related clerical work.

## Human Resources Department

---

### Airport Buyer (009019)

Ability to obtain and interpret market prices and trends and apply these to procurement problems.

Ability to maintain effective relationships with departmental officials and vendors.

Ability to prepare invitations to bid and to tabulate and analyze bids.

Ability to communicate effectively, verbally and in writing.

### Seaport Passenger Safety Officer (009021)

#### **Minimum Qualifications**

High school diploma or GED. Applicants qualifying for employment with the Miami-Dade Seaport Department will be subject to extensive security screening, including but not limited to fingerprint checks, employment verification, and other such procedures as may be mandated by federal, state, or local requirements. All employees of Miami-Dade Seaport Department who work in secure unescorted access areas are required by federal law to have a Transportation Worker Identification Credential (TWIC) Card. All future Seaport security personnel must obtain a TWIC card prior to employment. The security clearance required by federal law is a continuing condition of employment.

#### **Job Specifications**

#### **Nature Of Work**

This is part-time paraprofessional work assisting sworn police personnel and performing security related duties.

## W & S Geographical Information Specialist (009022)

### Minimum Qualifications

Bachelor's degree. One year of experience in an architectural or engineering environment to include experience in identifying and referencing points such as manholes, line sections, valves, and inner connections is required.

### Job Specifications

#### NATURE OF WORK

This is advanced technical and administrative work with supervisory responsibility in the field analysis of water and sewer systems.

An employee in this class is responsible for supervising and participating in the research and analysis of field findings concerning locations and conditions of water and sewer systems. Responsibilities include assembling database information for incorporation into the computerized Geographic Information System, conducting research and analyzing field reports to produce accurate information on the location and nature of water and sewer facilities, supervising the updating of atlases, and relaying information to other departmental work units to effect repairs where they are found necessary. The incumbent exercises considerable independent judgment in identifying differences between existing drawings of acquired water and sewer facilities and actual structures in the field. Supervision is exercised over a field survey crew engaged in the field inspection and documentation of water and sewer facilities. Supervision is received from an administrative superior who reviews work for achievement of established goals and objectives.

#### ILLUSTRATIVE TASKS

Researches and analyzes television inspection reports to substantiate and compare field findings on pipelines, elevations, laterals, sizes of pipes, dimensions and distances, condition of water and sewer systems, and the location of not yet identified sanitary ducts and covered manholes, valves, force mains and pump stations.

Prepares corrected reports of findings including preparation of redrawn maps for engineering, identification of broken down systems for repair, and development of pump station and sewer line profile data for appropriate systems analysis officials.

Incorporates field survey findings into existing database to update information including pump stations systems data and manhole attributes, and verification of amount and direction of sewage flow.

Corrects, updates, verifies and improves departmental atlases; identifies discrepancies pertaining to manhole identification and submits corrections; conducts field investigations and inspections to compare and verify sketches; resketches schematics to show corrections; checks and verifies various aspects of departmental maps including sewer line flow direction, elevations, number of tie-in lines, diameters, laterals and conditions.

Supervises field employees engaged in field surveying of water and sewer systems, and employees engaged in research, verification and correction of atlases.

Makes recommendations regarding hiring, discipline and promotion of subordinates; authorizes leave and overtime; evaluates and rates employee performance.

Performs related work as required.

#### KNOWLEDGES, ABILITIES, AND SKILLS

Considerable knowledge of the principles, practices and techniques of engineering drafting.

Considerable knowledge of construction plans, blueprints, drawings and schematics.

Considerable knowledge of the principles of civil engineering as they relate to topographic surveying.

Considerable knowledge of all above-ground and below-ground water and sewer field facilities.

Considerable knowledge of research techniques and the sources and availability of pertinent information concerning water and sewer systems.

Knowledge of supervisory principles and practices.

Ability to conduct research and analyze field reports to identify differences between existing drawings of acquired water and sewer facilities and actual structures in the field.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to prepare accurate and detailed reports of field survey findings for use by engineering, maintenance and administrative employees.

Ability to incorporate field survey findings into the Geographical Information System database.

Society of Human Resource Management (SHRM) certification is highly desired.

### Job Specifications

#### NATURE OF WORK

This is advanced responsible professional and administrative work directing countywide human resources activities.

The Director is responsible for the development of human resources strategic initiatives and management of all county human resources activities, and the administration and interpretation of county personnel policies and procedures, statutory provisions and federal regulations dealing with employment law. Responsibilities include managing, supervising, and coordinating a variety of centralized countywide human resources services which include: payroll and information management, compensation, recruitment, employee development, labor management and employee benefits. The incumbent exercises extensive independent judgment in the application of advanced principles of personnel administration in the management of diversified human resources activities, and in the enforcement and interpretation of rules for the classified service. Supervision is exercised over executive, professional, technical and clerical subordinates with assigned responsibilities in various phases of division operations. General direction is received from senior management who holds the incumbent responsible for providing effective achievement of operational goals and objectives.

#### ILLUSTRATIVE TASKS

Plans, directs and coordinates through executives and supervisors the management of recruitment and employment screening activities including advertising for County positions, processing all recruitments and eligibility determinations, and advising departmental representatives of recruitment policies and procedures.

Plans, directs and coordinates through executives and supervisors the management and implementation of layoff, retention and recall activities in accordance with County's Personnel Rules for the Classified Service, Layoff Procedures Manual, and applicable provisions of the collective bargaining agreements.

Plans, directs and coordinates through executives and supervisors the administration and processing of the County payroll, recording of leave and attendance, processing of payroll deduction and benefit transactions, handling of personnel and medical records, and directing the administration of employee physical examination and drug/alcohol testing programs.

Plans, directs and coordinates through executives and supervisors the work of staff engaged in a variety of complex classification and compensation activities including job analysis, organizational studies, job specification development and market salary analysis. Supervises and directs the preparation, revision and maintenance of the Miami-Dade County Pay Plan.

Plans, directs and coordinates through executives and supervisors the development, administration, validation and security of testing materials, and the testing of applicants for employment and promotion in the County service.

Plans, directs and coordinates through executives and supervisors, employee development activities including the planning, implementing, and evaluating of new and revised countywide training and employee development programs offered to County departments.

Plans, directs and coordinates through executives and subordinate personnel the negotiation and administration of ten collective bargaining agreements, management of collective bargaining grievances, disciplinary appeals and management of the county's substance abuse program.

Directs the countywide appeals functions including career service grievances, service connected disability appeals, classification appeals, performance evaluation appeals, job abandonment appeals, unemployment compensation appeals and disciplinary appeals.

Plans, directs and coordinates through subordinate executives and supervisors the work of staff engaged in administering employee benefit

##### NATURE OF WORK

This is advanced responsible secretarial and related clerical work for a division head or an exempt executive official in the County service.

Employees in this class perform a variety of complex secretarial and clerical duties for division directors or other comparable executive officials within the County organization. Emphasis of the work is on the performance of advanced secretarial duties requiring considerable knowledge of the executive's responsibilities and an understanding of the policies, programs, procedures and regulations in effect in the area of assignment. Duties typically include arranging for and attending conferences, independently answering inquiries where there is established policy or precedent action, taking and transcribing dictation, composing and typing correspondence and performing research to compile data for special reports and other purposes. Incumbents utilize a variety of office skills and considerable judgment in relieving the executive of administrative details. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work for accomplishment of desired objectives. General supervision is received from a division director or an executive official who reviews work for satisfactory performance of executive secretarial duties and for attainment of desired goals and objectives.

##### ILLUSTRATIVE TASKS

Performs secretarial and clerical duties for a division director or other comparable executive official; commits supervisor's time in making appointments and maintains calendar; maintains supervisor's itinerary and makes travel and hotel arrangements as required.

Arranges for and attends various conferences and meetings; informs participants and provides background information; serves as recording secretary at conferences, board meetings and staff consultations; takes official minutes and prepares reports of proceedings; follows through on actions required as a result of conferences.

Takes and transcribes dictation which may vary by subject matter including legal, technical, financial or other specialized terminology; takes verbatim transcript from telephone calls or in conferences as requested.

Opens, screens and distributes mail; marks important parts of instructions, orders and regulations for executive, and organizes mail according to priorities; maintains control of correspondence flow through office; insures that report deadlines are met and that all information distributed is complete.

Composes correspondence from verbal instructions of superior, and independently drafts replies to inquiries; reviews correspondence prepared by others for superior's signature to ensure correct grammar, format and completeness.

Receives and screens telephone calls and visitors; responds to requests for information by answering questions where there are established policies or regulations, or precedent actions taken by supervisor.

Plans, assigns and reviews the work of subordinate clerical employees engaged in typing reports, correspondence and other documents, filing, and performing a variety of other clerical duties; provides training in procedures and methods in the organization of assignment.

Researches and compiles data from a variety of sources in connection with special reports, budget preparation and other matters; assembles material for supervisor's reply to correspondence demanding superior's personal attention.

Keeps various activity and production records; types various activity reports, requisitions, work orders and personnel forms; composes reports on caseloads, workloads or other subjects as delegated; authorizes expenditures from petty cash; requisitions office supplies; performs arithmetic calculations for budget requests and other matters.

##### NATURE OF WORK

This is advanced responsible administrative and supervisory work in directing central depository operations for the Clerk of the Circuit & County Courts.

An employee in this class is responsible for planning, assigning, and reviewing the work of subordinates engaged in daily operations and activities of the central depository section. Responsibilities include monitoring the collection of large amounts of funds for custodial parents and State of Florida Child Support Enforcement in accordance with Florida Statutes and Dade County Ordinances, maintaining responsible contacts with the State Attorney's Office, and ensuring the efficient and expeditious disbursement of funds to custodial parents in compliance with State of Florida Statutes regarding child support. The incumbent exercises considerable independent judgment in managing central depository operations and coordinating work with the State Attorney's Office, judiciary, and public. Supervision is exercised over a staff of subordinates engaged in customer service activities, levying child support judgments, processing new suits, and performing related supporting tasks. General supervision is received from a professional superior who holds the incumbent responsible for efficient and effective central depository operations.

##### ILLUSTRATIVE TASKS

Plans, assigns, and reviews the work of subordinate central depository staff engaged in a variety of operations and activities, including providing customer services to the public, maintaining office operations, levying child support judgments, and processing new suits.

Directs daily operations of the central depository unit; monitors the collection of large amounts of funds for custodial parents in accordance with Florida Statutes and Dade County Ordinances.

Develops and implements frequent new procedures in accordance with Florida Statutes and/or Rules of Court; conducts periodic review of procedures for compliance, assists in the assessment and development of revisions to automated systems to ensure compliance with legislative changes.

Prepares monthly reports of central depository activities; reviews and modifies reports prepared by subordinate staff; coordinates and assists with special projects to enhance efficiency of central depository operations.

Serves in a liaison capacity with judges, hearing officers, attorneys, State Attorney's Office, and other depositories throughout the State of Florida.

Exercises signatory responsibility for disbursement of budgeted funds.

##### NATURE OF WORK

This is technical and administrative work assisting in the coordination and administration of Emergency Management and Homeland Security programs in the Department of Emergency Management & Homeland Security.

Employees in this class are responsible for assisting Emergency Management & Homeland Security personnel in the development of plans and procedures as they relate to each phase of emergency management. Independent decision-making and a familiarity of the phases of emergency management is required to develop and implement projects and for program maintenance. Much of this work will involve coordinating activities with municipal, county, regional, state, federal, volunteer and other community partners.

Employees in this class are expected to use independent judgment to coordinate and manage assignments with little or no supervision, though all critical decisions are referred to an administrative superior for direction. Supervision is received from an administrative superior who will evaluate the effectiveness of assignments and activities through personal conferences and written reports.

##### ILLUSTRATIVE TASKS:

Assists local, regional, and state partners with planning, training, and outreach relating to Emergency Management and Homeland Security programs.

Assists local, regional, and state partners with planning, training, and outreach relating to Southeast Regional Domestic Security Task Force (RDSTF-SE) programs.

Develops and delivers Emergency Management and Homeland Security education/training to a variety of audiences.

Assumes project responsibility for conducting the activities of contracts and grant programs.

Develops and maintains databases and develops written procedures and reports.

Provides assistance to an administrative superior in specially assigned areas of Emergency Management and Homeland Security; and assists and advises on matters pertaining to programs or projects assigned.

Conducts special studies/assessments in conjunction with a project; analyzes data and makes recommendations based upon findings.

Performs related work as required.

##### KNOWLEDGE, ABILITIES AND SKILLS:

Knowledge of the principles, practices and concepts of emergency management and homeland security.

Knowledge of local, state, and federal emergency management agencies, organizations and operations.

Knowledge of the principals of management and public administration; to include standard practices in local government.

#### NATURE OF WORK

This is advanced responsible secretarial and related clerical work for a division head or an exempt executive official in the County service.

Employees in this class perform a variety of complex secretarial and clerical duties for division directors or other comparable executive officials within the County organization. Emphasis of the work is on the performance of advanced secretarial duties requiring considerable knowledge of the executive's responsibilities and an understanding of the policies, programs, procedures and regulations in effect in the area of assignment. Duties typically include arranging for and attending conferences, independently answering inquiries where there is established policy or precedent action, taking and transcribing dictation, composing and typing correspondence and performing research to compile data for special reports and other purposes. Incumbents utilize a variety of office skills and considerable judgment in relieving the executive of administrative details. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work for accomplishment of desired objectives. General supervision is received from a division director or an executive official who reviews work for satisfactory performance of executive secretarial duties and for attainment of desired goals and objectives.

#### ILLUSTRATIVE TASKS

Performs secretarial and clerical duties for a division director or other comparable executive official; commits supervisor's time in making appointments and maintains calendar; maintains supervisor's itinerary and makes travel and hotel arrangements as required.

Arranges for and attends various conferences and meetings; informs participants and provides background information; serves as recording secretary at conferences, board meetings and staff consultations; takes official minutes and prepares reports of proceedings; follows through on actions required as a result of conferences.

Takes and transcribes dictation which may vary by subject matter including legal, technical, financial or other specialized terminology; takes verbatim transcript from telephone calls or in conferences as requested.

Opens, screens and distributes mail; marks important parts of instructions, orders and regulations for executive, and organizes mail according to priorities; maintains control of correspondence flow through office; insures that report deadlines are met and that all information distributed is complete.

Composes correspondence from verbal instructions of superior, and independently drafts replies to inquiries; reviews correspondence prepared by others for superior's signature to ensure correct grammar, format and completeness.

Receives and screens telephone calls and visitors; responds to requests for information by answering questions where there are established policies or regulations, or precedent actions taken by supervisor.

Plans, assigns and reviews the work of subordinate clerical employees engaged in typing reports, correspondence and other documents, filing, and performing a variety of other clerical duties; provides training in procedures and methods in the organization of assignment.

Researches and compiles data from a variety of sources in connection with special reports, budget preparation and other matters; assembles material for supervisor's reply to correspondence demanding superior's personal attention.

Keeps various activity and production records; types various activity reports, requisitions, work orders and personnel forms; composes reports on caseloads, workloads or other subjects as delegated; authorizes expenditures from petty cash; requisitions office supplies; performs arithmetic calculations for budget requests and other matters.

## Human Resources Department

#### NATURE OF WORK

This is advanced and responsible professional work with supervisory responsibility managing a major program or function in a county department or agency.

Employees in this class are responsible for managing the planning, research, design, development and evaluation of a major departmental program or function. Some incumbents in the class perform advanced and responsible administrative work of comparable scope in a specialized staff capacity. Incumbents are typically located at the division head level or as full assistants to an assistant director of a department. Employees are typically engaged in formulating, developing, implementing, conducting, supervising and monitoring programs, procedures, and operational initiatives; formulating departmental policies and procedures; and establishing organizational goals and performance measures. Assignments are broad in scope with considerable latitude for the exercise of independent judgment and application of management and/or technical knowledge and skills. General direction is received from an administrative superior who evaluates work for adherence to departmental policies and attainment of desired goals and objectives through personal conferences and review of reports of operations.

#### ILLUSTRATIVE TASKS

Coordinates complex administrative duties with department-wide responsibility; serves as project manager over specialized projects and program coordinator; develops and negotiates large contracts, grant proposals and budgets; develops and implements departmental and program policies, procedures and revisions; administers various research and feasibility studies.

Assists in the development of a department's operating budget including production of actual budget documents; conducts monthly analysis of budgetary expenditures and prepares complex financial reports for the department director and assistant directors; plans, assigns and review the work of subordinate staff engaged in various accounting activities; conducts meetings with assistant directors to ensure financial viability of the department; acts as the budget liaison between the department and the Office of Strategic Business Management (OSBM); ensures that all procurement expenses are charged to correct line-items and expenditure authority is granted for those purchases; coordinates accounting activities with the Finance Department and OSBM; develops and implements new and revised financial policies and procedures to include training of accounting staff and other departmental staff on new procedures.

Plans, assigns and reviews the work of professional and clerical subordinates engaged in the preparation, monitoring and processing of the department's agenda items; coordinates orientation workshops concerning the agenda process for departmental staff; coordinates the agenda process among departmental units; reviews committee meeting results to ensure agenda items are placed on the appropriate agenda; proofreads each agenda item and official agendas to ensure completeness and accuracy; supervises the distribution of agenda packages; reviews results concerning agenda items and prepares follow up report.

Plans, assigns and reviews the work of subordinate professional staff engaged in researching government, corporate and foundation grant opportunities and developing relationships within the grant making community and writing and compiling grant applications to secure funding; administers grant funds by overseeing relationships with funders and all grant reports, ensuring matching-fund and other grant requirements are met.

### Labor Relations Manager (009960)

#### Minimum Qualifications

Bachelor's degree and a minimum of three years of progressively responsible experience in labor relations or advanced personnel administration are required.

#### Job Specifications

##### NATURE OF WORK

This is advanced responsible work in the negotiation and administration of collective bargaining agreements for the Internal Services Department.

Employees in this class are responsible for the negotiation and administration of a variety of complex collective bargaining agreements between the County and various public employee unions and associations. Responsibilities include research and preparation for negotiating sessions, conferring with various County officials in the formulation of contract proposals, conducting negotiations through the completion of final agreements, and administration of collective bargaining contracts in accordance with the intent of agreed upon terms and conditions. Additional responsibilities include processing grievances, assisting in the preparation of unresolved disputes to final and binding arbitration, and advising County officials on contract language interpretations and contract administration matters. Incumbents exercise an extensive degree of independent judgment and professional knowledge in the negotiations and administration of collective bargaining agreements and related labor relations matters. Supervision may be exercised over subordinate clerical employees through assignment of tasks and review of completed work. General supervision is received from a professional superior who reviews work through personal observations and conferences for thoroughness in completing assigned responsibilities.

##### ILLUSTRATIVE TASKS

Performs research to assist in determining the County's bargaining position prior to initiating negotiating sessions with various public employee unions and associations; attends meetings and confers with a variety of County officials for the purpose of gathering data for draft proposals regarding new, modified or amended contract articles.

Formulates and prepares contract proposals for negotiations and reduces contract proposals to appropriate contractual language.

Conducts negotiations with public employee unions and associations for the purpose of negotiating collective bargaining agreements covering the salaries, fringe benefits, and other terms and conditions of employment of union represented employees; conducts negotiations through completion of final agreements.

Exercises responsibility for the preparation and presentation of impasse proceedings before a Special Master appointed by the Public Employee Relations Commission, as required.

Administers completed contracts including conducting initial training classes for County officials on new contracts and advising on all contract language interpretations and all phases of contract administration.

Processes grievances and assists in the preparation and presentation of unresolved disputes to final and binding arbitration; testifies in grievance arbitration cases as required.

Confers with representatives of public employee unions and associations regarding contract administration and interpretation.

Advises county departmental officials on appropriate procedures for initiation of progressive disciplinary actions.

Performs related work as required.

##### KNOWLEDGES, ABILITIES AND SKILLS

Thorough knowledge of State statutes and applicable sections of the Code of Miami-Dade County pertaining to labor relations activities.

##### NATURE OF WORK

This is professional and supervisory work in veterinary medicine for the Metro-Dade County Metrozoo.

An employee in this class is responsible for providing diagnostic, clinical and surgical medical services to the Metrozoo animal collection. Responsibilities include implementing an effective preventive medicine program, supervising hospital and quarantine staff, teaching veterinary preceptors, providing gross pathology services, and providing other veterinary services including neonatal care, nutritional consultation, health certification and staff education. The incumbent exercises considerable independent judgment and technical expertise in applying the principles of veterinary medicine to the care of the Metrozoo animal collection. Supervision is exercised over subordinates assisting in various phases of veterinary services activities. General direction is received from a professional superior who reviews work through personal conferences and written reports for achievement of established goals and objectives.

##### ILLUSTRATIVE TASKS

Develops and implements preventive medicine programs for the Metrozoo animal collection including quarantine procedures, health screenings, parasite control, neonatal care, vaccination programs, shipping procedures and dental care.

Provides diagnostic and medical care services, inpatient and outpatient medical care and treatment, and anesthesia and surgical services for the Metrozoo animal collection.

Provides restraint and immobilization services for the handling and transporting of animals.

Maintains a working clinical and surgical facility and a pharmacy of necessary drugs and medical supplies used at the zoo.

Provides gross pathology and histopathology services for animals dying at the zoo.

Provides nutritional recommendations for the animal collection and supervises the rearing of neonates being hand-raised.

Provides necessary testing and health certificates for shipping animals, and laboratory services.

Conducts educational programs for veterinary students and serves as an educational resource for zoo employees and other zoological institutions to improve zoological collections.

Supervises a hospital and quarantine staff; provides health screenings and preventive medicine programs for zoo employees.

Maintains a complete and accurate medical records database for the Metrozoo animal collection.

Provides twenty-four hour seven-day per week emergency veterinary coverage for Metrozoo.

Performs related work as required.

##### KNOWLEDGES, ABILITIES, AND SKILLS

Extensive knowledge of the theories, principles and practices of veterinary medicine.

Thorough knowledge of wild and zoo animal medicine including immobilization techniques, surgical procedures and preventive medicine.

Thorough knowledge of the composition of the animal collection at Metrozoo.

Thorough knowledge of the organization and operation of a veterinary hospital facility in a zoological institution.

Thorough knowledge of current literature and developments in the care and transport of zoo animals.

Knowledge of supervisory principles and practices.

Ability to apply the principles and practices of veterinary medicine to the care and maintenance of animals in a zoological institution.

Ability to develop and implement preventive medicine programs for the Metrozoo animal collection.

Ability to supervise subordinates in a manner conducive to full performance and high morale.

Ability to communicate clearly and concisely, verbally and in writing, to groups and individuals.

Ability to apply proper restraint and anesthesia to prevent injuries to animals and/or employees when animals must be examined or transported.

Ability to keep informed on current developments in zoological animal care and preventive medicine.
