- **Cone of Silence**
- **Billing and Payments**
- **Design/Build Approach**
- **Streamlining Procurement**
- **Equitable Distribution Program**
- **Permitting Processes**
- **Small Business Participation**
- **Legislative Initiatives**

If you are an engineer, architect or a contractor, you are invited to participate in an *Industry Forum* and partner with Miami-Dade County in finding new and better ways to move forward public capital programs. Mayor Carlos Alvarez wants to hear from you. How can we work more efficiently with your organization?

Miami-Dade's roster of capital projects is large, totaling \$2 billion annually, with work ongoing at the airport, seaport, water/sewer, public works and a dozen other capital departments. It is our goal to work as effectively as possible with our partners in the building trades and professions. The current economic climate makes it imperative!

The Office of Capital Improvements, together with the County's capital departments, will provide you with an update of what's on the drawing board. This will be an opportunity to hear from you on how we can better interface with the industry from concept to concrete. To attend, please RSVP alic@miamidade.gov prior to April 28 or call 305-375-2724.

OFFICE OF CAPITAL IMPROVEMENTS
