Product Control Advisory Metal Roofing Jobsite Forming and/or Rolling Fee Schedule Clarification

In an effort to continue to help the metal roofing industry comply with existing product approval requirements provisions, as well as maintain current NOA's, the Miami-Dade County's Product Control Section is offering the following clarification to the fee schedule for new or existing Jobsite Forming/Rolling Fabricators.

New Submittal - Application Fee of \$4000

The new NOA's filed by fabricators will be allowed up to 6 spin off files to cover the deck types and panel profiles approved in the association. (\$4000 → 7 NOA's)

Renewal Submittal - Application Fee of \$4000

The fabricators seeking renewals of their current or expired NOA's will be allowed up to 6 spin off files to cover all the deck types and panel profiles with current master file approvals. (\$4000 → 7 NOA's)

Revision Submittal – Hourly Rate Fee of \$75/hour

Requested revisions are considered editorial in nature since the technical review occurs with the Master File's revision. Revisions to a Master File will result in a new Master File number.

If you have any questions, please contact this office at 786-315-2590.

Thank you.
