Product Control Advisory Fastener Listing Program

The Product Control Division is proud to announce that effective October 1, 2006 the Roofing Fastener Listing Program will begin. This new program will allow for better tracking of the approvals through a new database. It will allow maintaining and tracking of test reports, both current and expired. It will address Quality Control on said products by allowing random audits.

As originally discussed in the manufacturer's meeting held June 29, 2006, all roofing fastener and batten plate manufacturers which are currently listed in our approved roofing products list will be grandfathered in to the program and given a 1 year approval.

The listing Program details for the new and existing fasteners can be found on the checklist #0195: "Checklist for the certification listing of: Roofing Fasteners and Batten Plates" on the BCCO website under "forms".

The Product Control Division looks forward to the success of this program and appreciates the opportunity to continue serving the industry.
