ATTENTION PERMIT APPLICANTS

Your Replacement of a Sanitary Line May Be Obtained under New Plumbing Category for faster permit issuance.

Effective Monday, April 13, 2015, if you are proposing a replacement of a sanitary line, you can obtain a Plumbing Permit under Category 0025. The permitting process more efficient and less costly.

As a condition for obtaining this permit, you must agree to abide by the standard slab cut repair detail provided by Miami-Dade County and available in the forms bin at the Permit Records Section. Additionally, a special inspector will be required for the trench backfill and concrete-slab repair.

When applying, please complete the Plumbing and Gas Fee Sheet (blue form), include the standard Miami-Dade County detail, and the completed special inspector form.

For more information, please contact the Permit Records Section at 786-315-2100.

Thank you.
