NOTICE OF ACCEPTANCE (NOA)

**Aeicor Metal Products, Inc.
450 West McNab Road
Ft. Lauderdale, Fl 33309**

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed by the BCCO and accepted by the Building Code and Product Review Committee to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The BCCO (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BCCO reserves the right to revoke this acceptance, if it is determined by BCCO that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein, and has been designed to comply with the South Florida Building Code, 1994 Edition for Miami-Dade County or Florida Building Code.

DESCRIPTION: 1” Snap Cap-Metal Roofing System

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA consists of pages 1 through 5.

The submitted documentation was reviewed by Frank Zuloaga, RRC

**NOA No.: 01-0820.02
Expiration Date: 06/07/06
Approval Date: 01/10/02

SYSTEM APPROVAL:

- System:** SS-4-12 Snap Cap & CP-4-12
- Deck Type:** Wood, Non-insulated
- Deck Description:** New Construction $\frac{19}{32}$ " or greater plywood or wood plank.
- Slope Range:** 2": 12" or greater
- Maximum Uplift Pressure:** The maximum allowable uplift pressure for the 12 $\frac{3}{4}$ " wide panels shall be **-85.0 psf.**
- Deck Attachment:** In accordance with applicable building code, but in no case shall it be less than # 8 x 2" long screws spaced 6" O.C. In re-roofing, where the deck is less than $\frac{19}{32}$ " thick (Minimum $\frac{15}{32}$ "") the above attachment method must be in addition to existing attachment.
- Underlayment:** Minimum underlayment shall be an ASTM D 226 Type II installed with a minimum 4" side-lap and 6" end-laps. Underlayment shall be fastened with corrosion resistant tin-caps and 1 $\frac{1}{4}$ " annular ring-shank nails, spaced 6" o.c. at all laps and two staggered rows 12" o.c. in the field of the roll.
- Panel Clips:** Panels shall be installed with approved clips, attached to substrate with one corrosion resistant #8-14 screws of sufficient length to penetrate through the sheathing $\frac{3}{16}$ " at a spacing not to exceed 12" o.c. Once the clips are secured in place, the clip tabs are folded over and the snap cap is applied along the full length of the seam.
- Valleys:** Valley construction shall be in compliance with RAS 133 and with the current published installation instructions and details in Aeicor Metal Roofing Installation Manual.
- Fire Barrier Board:** For class A or B fire rating, install minimum $\frac{1}{4}$ " thick Georgia Pacific "Dens Deck" (with current NOA) or minimum 4mm thick of Tritex, RocRoof (with current NOA) or $\frac{5}{8}$ " water resistant type X gypsum sheathing with treated core and facer.
- Metal Panels and Accessories:** Install the "SS-4-12 Snap Cap Panel & CP-4-12" and accessories in compliance with the current published installation instructions and details in Aeicor Metal Roofing Installation Manual. Flashing, penetrations, valley construction and other details shall be constructed in compliance with RAS 133.

- System:** SS-4-12 Snap Cap & CP-4-12
- Deck Type:** Steel, Non-insulated
- Deck Description:** New Construction 22 ga. type B steel roof deck.
- Slope Range:** 2": 12" or greater
- Maximum Uplift Pressure:** The maximum allowable uplift pressure for the 12- ¾ " wide panels shall be **-97.5 psf.**
- Deck Attachment:** Minimum 22 gage type B steel deck fastened to steel supports at a maximum span of 5 feet o.c. Steel deck shall be fastened with minimum 5/16" puddle welds with 1 7/8" weld washer at a maximum spacing of 6" o.c. Side laps shall be fastened with #10 x ¾" HH TEK screws.
- Fire Barrier Board:** ¼" Dens Deck fastens to steel deck with approved insulation fasteners & 3" steel plate at a density of 1:4ft in accordance with RAS 117.

For class A or B fire rating, install minimum ¼" thick Georgia Pacific "Dens Deck" (with current NOA) Insulation shall be attached to decking with Insta-stik Roofing adhesive ¾" to 1" minimum wide beads of adhesive space 12" o.c.
- Underlayment:** A single layer of any Miami Dade County Product Control Approved self-adhered with a 4" overlap is fully adhered to Dens Deck.
Or
An ASTM D 226 type II installed with a minimum 4" side-lap and 6" en-laps. Underlayment fastened with approved insulation fasteners and plates. Spaced 12" o.c. on the laps and two rows spaced 24" o.c. in the field of roll.
- Panel Clips:** Panels shall be installed with approved clips, attached to substrate with one corrosion resistant #8 Wafer Head TEK screws of sufficient length to penetrate the bottom flute a minimum of ¾" at a maximum spacing of 6 inches o.c. Once the clips are secured in place, the clip tabs are folded over and the snap cap is applied along the full length of the seam.
- Valleys:** Valley construction shall be in compliance with RAS 133 and with the current published installation instructions and details in Aeicor Metal Roofing Installation Manual.
- Metal Panels and Accessories:** Install the "SS-4-12 Snap Cap Panel & CP-4-12" and accessories in compliance with the current published installation instructions and details in Aeicor Metal Roofing Installation Manual. Flashings, penetrations, valley construction and other details shall be constructed in compliance with RAS 133.

SYSTEM LIMITATIONS

1. Fire classification is not part of this acceptance, refer to current Approved Roofing Materials Directory for fire ratings of this product.
2. Increased design pressures at perimeter and corner areas, in compliance with applicable building code, may be met through rational analysis by increasing the number of attachment points in these areas. The maximum fastener spacing noted in the "Systems Description" section of this approval shall not be exceeded. All rational analysis computation shall be prepared, signed and sealed by a Florida registered Professional Engineer, Registered Architect, or Roof Consultant.
3. Panels shall be roll formed in continuous lengths from eave to ridge. Maximum lengths shall be as described in Roofing Application Protocol RAS 133.
4. All panels shall be permanently labeled with the manufacturer's name and/or logo, and the following statement: "Miami-Dade County Product Control Approved. All clips shall be permanently labeled with manufacturer's name, and/or logo, and/or model."
