NOTICE OF ACCEPTANCE (NOA)

BASF Corporation
1703 Crosspoint Avenue
Houston, TX 77054

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed by Miami-Dade County Product Control Section and accepted by the Board of Rules and Appeals (BORA) to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Section (In Miami-Dade County) and/or the AHJ (in areas other than Miami-Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. BORA reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Section that this product or material fails to meet the requirements of the applicable building code. This product is approved as described herein, and has been designed to comply with the Florida Building Code, including the High Velocity Hurricane Zone.

DESCRIPTION: Comfort Foam & Spraytite 178 Series Spray Polyurethane Foam Adhesive

APPROVAL DOCUMENT: Engineering Report & Drawings titled BASF Corporation "Comfort Foam 178 Series & Spraytite 178 Series" Spray Polyurethane Foam Adhesive, sheets 1 through 6 of 6, dated 10/19/10, prepared by C-Buck, Inc., Engineering, signed and sealed by James L. Buckner, P.E., bearing the Miami-Dade County Product Control approval stamp with the Notice of Acceptance number and approval date by the Miami-Dade County Product Control Section.

MISSILE IMPACT RATING: None

LABELING: Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA consists of this page 1 and evidence page E-1, as well as approval document mentioned above.

The submitted documentation was reviewed by **Carlos M. Utrera, P.E.**

Limits of Evaluation:

This product is limited to compliance with the evaluation criteria and properties evaluated as listed above.

Evaluated Uses:

Structural:

COMFORT FOAM® 178 Series & SPRAYTITE® 178 Series as evaluated in this report may be used for supplemental attachment of roof plywood deck to rafters/truss top chords (dimensional lumber). This product may be used for supplemental wind resistance in new construction or for enhancing the wind uplift resistance on existing structures.

Product Description:

General:

COMFORT FOAM® 178 Series & SPRAYTITE® 178 Series are a two-component, closed-cell, spray-applied, rigid, polyurethane foam plastic. COMFORT FOAM® 178 Series & SPRAYTITE® 178 Series are produced in the field by combining an isocyanate component A with a resin-based component B. This spray foam adhesive provides wind uplift resistance when applied directly to the junction of the roof plywood deck and the roof rafter/truss top chords. The SPFcc adhesive fillet is applied to both sides of the roof rafter/truss top chords.

Evaluation Components to be Adhered:

Roof Deck:

Type: - Per FBC Section 2322.2
- 15/32" Minimum Thickness, on Existing Buildings.

Rafter/Truss Top Chord:

Function: Typically Roof Rafter or Wood Truss Top Chord
Type: Dimensional Lumber
Specific Gravity: 0.42 Minimum
Size: Nominal 2" x 4" Minimum
Spacing: 24 in. o.c. (As Tested and Evaluated)

(Design of components is outside the scope of this evaluation)

Product Assembly Performance:

Wind Resistance Properties

Allowable Design Uplift Resistance:

Resistance **- 125 PSF**
Standard: TAS 202 – 94

Based on Rafters/Roof Truss Top Chords Spacing of 24" o.c.

Approved as complying with the Florida Building Code
Date 03/31/2011
NOA# 10-0304.02
Miami Dade Product Control
By

Cyclic Wind Loading:

Results: Passed
Standard: TAS 203 – 94

Physical Properties:

Properties:	Standards	Value
Water Absorption (% by volume)	ASTM D2842	0.60%
Dimensional Stability (% by volume)		
At 158° F, ambient R.H. 28 days	ASTM D2126	5.75%
Water Vapor Permeability (@ 1" SPF)	ASTM E96	1.36 perm-inch
Compressive Strength	ASTM D1621	22 psi
Tensile Strength	ASTM D1623	84.8 psi
Shear Strength	ASTM C273	48.2 psi
Closed Cell Content	ASTM C2856	96.3%
Flame Spread Index	ASTM E84	25
Smoke Developed Index	ASTM E84	350
Self-Ignition Temperature	ASTM D1929	925° F

Note: The Physical properties listed above are presented as typical average values as determined by accepted ASTM test methods and are subject to normal manufacturing variation.

General Installation Method:

- Surface Preparation:
  All surfaces intended to receive the spray foam must be dry, clean, secure, and free of any oils, grease, or other contaminant(s) that may disrupt adhesion. Remove sawdust and other debris from areas intended to receive the spray foam by blowing with compressed air or vacuuming with a shop vacuum. Check surfaces with moisture detection strips or other reliable method(s) to verify dryness. Spray equipment shall be capable of delivering the proper volume ratio of 1:1 of isocyanate (component A) and resin (Component B) at adequate temperatures and spray pressures.

- Application Method:
  Apply the spray foam using a "picture framing" technique. Foam must cover at least 3-inches of the rafter member and 3-inches of the roof deck. The resulting triangular cant, at least 3-inches high and 3-inches wide, will cover the joint between the rafter member and the underside of the roof deck. Apply this cant in 2 to 3 passes allowing each pass to fully expand and cool (approximately 5 - 10 minutes) before the next application.

- Install the system in compliance with the evaluated installation method(s). The installation method(s) described herein have been evaluated to address the scope of the evaluation. Refer to manufacturer's installation instructions as a supplemental guide for application.

  (Refer to installation method on Page 8 of this evaluation report.)

Limitations of Use:

Spray Foam Adhesive shall be installed by a BASF qualified spray foam applicator trained in the process and application of SPF systems as well as the plural component polyurethane dispensing equipment.

Fire Classification is not part of this acceptance. Refer to a current Approved Roofing Materials Directory for fire ratings of this product.

This product may be used for supplemental attachment of roof plywood deck to rafters/truss top chords

This product may be used for code plus wind resistance in new construction or for enhancing the wind uplift resistance on existing structures.

Code Compliance:

The product assembly described herein has demonstrated compliance with the Florida Building Code 2007, HVHZ, Standards TAS 202–94 and TAS 203–94.

Identification:

Each individual unit shall bear a permanent label with the manufacture's name or logo, city, state and following statement: Miami-Dade County Product control Approved", unless otherwise noted.
