The Cookson Company  
1901 South Litchfield Road  
Goodyear, AZ 85338

SCOPE:  
This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed and accepted by Miami-Dade County RER-Product Control Section to be used in Miami-Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ). This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Section (In Miami-Dade County) and/or the AHJ (in areas other than Miami-Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. RER reserves the right to revoke this acceptance, if it is determined by Miami-Dade County Product Control Section that this product or material fails to meet the requirements of the applicable building code. This product is approved as described herein, and has been designed to comply with the Florida Building Code, including the High Velocity Hurricane Zone.

DESCRIPTION: Steel Rolling Door up to 14'-5" Wide (50 FPS Impact)

APPROVAL DOCUMENT: Drawing No. ES-16-55-TCCI, titled “14'-5" Wide 65 PSF 50 FPS Non-Insulated Rolling Steel Door”, sheets 1 through 6 of 6, dated 09/10/2014, with revision A dated 03/27/2015, prepared by The Cookson Company, dated 01/12/18, signed and sealed by Shawn Patrick Kelley, P.E., bearing the Miami-Dade County Product Control Revision stamp with the Notice of Acceptance number and Expiration date by the Miami-Dade County Product Control Section.

MISSILE IMPACT RATING: Large and Small Missile Impact Resistant

LABELING: A permanent label with the manufacturer’s name or logo, one of the 3 manufacturing addresses on drawings, model number, the positive and negative design pressure rating, indicate impact rated if applicable, installation instruction drawing reference number, approval number (NOA), the applicable test standards, and the statement reading ‘Miami-Dade County Product Control Approved’ is to be located on the door’s side track, bottom angle, or inner surface of a panel.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official. This NOA revises NOA # 15-0112.05 and consists of this page 1 and evidence page E-1 and E-2, as well as approval document mentioned above.

The submitted documentation was reviewed by Carlos M. Utrera, P.E.

NOA No. 18-0125.03  
Expiration Date: July 9, 2020  
Approval Date: April 19, 2018

NOTICE OF ACCEPTANCE: EVIDENCE SUBMITTED

1. EVIDENCE SUBMITTED UNDER PREVIOUS NOA’s

A. DRAWINGS “Submitted under NOA # 15-0112.05”
   1. Drawing No. ES-16-55-TCCI, titled “14’-5” Wide 65 PSF 50 FPS Non-Insulated Rolling Steel Door”, sheets 1 through 6 of 6, dated 09/10/2014, with revision A dated 03/27/2015, prepared by The Cookson Company, signed and sealed by Joseph H. Dixon, Jr., P.E.

B. TESTS “Submitted under NOA # 15-0112.05”
   1. Test reports on 1) Uniform Static Air Pressure Test, Loading per FBC, TAS 202-94
      2) Large Missile Impact Test per FBC, TAS 201-94 (Level ‘E’)
      3) Cyclic Wind Pressure Loading per FBC, TAS 203-94
      4) Forced Entry Test, per FBC, TAS 202-94
      5) Tensile Test per ASTM E8-08,
      along with marked-up drawings and installation diagram of C20 Roll-up Garage Doors, prepared by Intertek/Architectural Testing, Inc., compliance letter and Test Report No. D1278.03-109-18, dated 01/29/2014, with revision 1 dated 03/25/2015, signed and sealed by Michael D. Stremmel, P.E.

C. CALCULATIONS “Submitted under NOA # 15-0112.05”

D. QUALITY ASSURANCE
   1. Miami-Dade Department of Regulatory and Economic Resources (RER)

E. MATERIAL CERTIFICATIONS
   1. None.

F. STATEMENTS “Submitted under NOA # 15-0112.05”

   2. Statement letter of no financial interest issued by Joseph H. Dixon, Jr., P.E., dated 01/01/2015, signed and sealed by Joseph H. Dixon, Jr., P.E.

E – 2
Hood support, when required

Roll-up mechanism not included in this approval. Must be certified by an independent testing agency if required.

Notes:
1. This roll-up door system is designed in accordance with the Florida building code, as a large missile impact resistant system.
2. Positive and negative design pressure calculations shall be performed for specific jobs in accordance with ASCE 7 minimum design loads for buildings and other structures. Wind loads determined for openings shall be less than or equal to door design pressures noted below.
3. The details and specifications shown herein represent the products tested for uniform static air pressure in conformance with Dade county protocols TAS 201, 202 and 203. Positive design load = 65 PSF. Negative design load = 65 PSF.
5. Superimposed loads on the jambs from this door are designated as F1, F2, and F3 herein. Contractors shall have Florida registered professional engineer verify adequacy of building structure to resist superimposed load F1, F2, and F3.
6. All welding shall be performed by qualified welders in accordance with AWS specifications, latest edition. All welding electrodes shall conform to AWS A5.1, Grade E70. Minimum welding process shall be arc welding AWS E7014 or Mig welding AWS ER70S-6.
7. Anchor notes:
   A. Embedment depth does not include stucco finish.
   B. Anchors shall be installed in accordance with manufacturers specifications.
8. Door may be installed on the inside or outside of an exterior wall.
9. A 33% increase in allowable stress has not been used in the design of this product.
10. Slide bolts are not required for windload resistance. Slide bolts are only required on push up operated units for forced entry resistance. Locking is to be provided by others or as cylinder locks by the Cookson Company.
11. Endlock windlocks and windlocks are secured to each end of alternating slats with 3 1/4 rivets per end resulting in continuous slat windlock support.
12. Guide assembly and bottom bar are to be protected from corrosion with polyester powder coating when not minimum G90 galvanized steel or stainless steel.

Product Revised

as complying with the Florida Building Code
