THese doors are rated for large & small missile impact. Shutters are not required.

Series 525-11 Aluminum Inswing Entrance Door

Approval applies to single(x) and double(xx) inswing leaf doors See sheet 2 for design load capacities.

Doors approved for installations where water infiltration resistance is required.

This product has been designed and tested to comply with the requirements of the 2017 (6th Edition) Florida Building Code including high velocity hurricane zone (HVHZ).

1BY or 2BY wood bucks & buck fasteners by others, must be designed and installed adequately to transfer applied product loads to the building structure.

Anchors shall be corrosion resistant, spaced as shown on details and installed per manufacturer’s instructions. Specified embedment to base material shall be beyond wall dressing or stucco.

A load duration increase is used in design of anchors into wood only.

All shims to be high impact, non-metallic and non-compressible.

Materials including but not limited to steel/metal screws, that come into contact with other dissimilar materials shall meet the requirements of the 2017 Florida BCC. Code & adopted standards.

This product approval is generic and does not provide information for a site specific project, i.e. life safety of this product, adequacy of structure receiving the product and sealing around opening for water infiltration resistance, etc.

Conditions not shown in this drawing are to be analyzed separately, and to be reviewed by building official.
