Tremco CPG, Inc.
3735 Green Road
Beachwood, OH 44122

SCOPE:

This NOA is being issued under the applicable rules and regulations governing the use of construction materials. The documentation submitted has been reviewed and accepted by Miami-Dade County RER - Product Control Section to be used in Miami Dade County and other areas where allowed by the Authority Having Jurisdiction (AHJ).

This NOA shall not be valid after the expiration date stated below. The Miami-Dade County Product Control Section (In Miami Dade County) and/or the AHJ (in areas other than Miami Dade County) reserve the right to have this product or material tested for quality assurance purposes. If this product or material fails to perform in the accepted manner, the manufacturer will incur the expense of such testing and the AHJ may immediately revoke, modify, or suspend the use of such product or material within their jurisdiction. RER reserves the right to revoke this acceptance if it is determined by Miami-Dade County Product Control Section that this product or material fails to meet the requirements of the applicable building code.

This product is approved as described herein and has been designed to comply with the Florida Building Code including the High Velocity Hurricane Zone of the Florida Building Code.

DESCRIPTION: TremPly TPO Single Ply Roofing Systems over Concrete Decks.

LABELING: Each unit shall bear a permanent label with the manufacturer's name or logo, city, state and following statement: "Miami-Dade County Product Control Approved", unless otherwise noted herein.

RENEWAL of this NOA shall be considered after a renewal application has been filed and there has been no change in the applicable building code negatively affecting the performance of this product.

TERMINATION of this NOA will occur after the expiration date or if there has been a revision or change in the materials, use, and/or manufacture of the product or process. Misuse of this NOA as an endorsement of any product, for sales, advertising or any other purposes shall automatically terminate this NOA. Failure to comply with any section of this NOA shall be cause for termination and removal of NOA.

ADVERTISEMENT: The NOA number preceded by the words Miami-Dade County, Florida, and followed by the expiration date may be displayed in advertising literature. If any portion of the NOA is displayed, then it shall be done in its entirety.

INSPECTION: A copy of this entire NOA shall be provided to the user by the manufacturer or its distributors and shall be available for inspection at the job site at the request of the Building Official.

This NOA renews and revises NOA No. 22-0228.27 and consists of pages 1 through 38.

The submitted documentation was reviewed by Jorge L. Acebo.

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23

TABLE 1

<u>Product</u>	<u>Dimensions</u>	<u>Test Specification</u>	<u>Product Description</u>
TremPly TPO Cover Tape Heat-Welded	6" x 100'	Proprietary	Flashing strip manufactured from unreinforced Tremco TPO laminated to a six inch wide strip, half the strip with a self-adhered side and half the strip with a heat-weldable edge; used for edge metal details.
TremPly Max TPO Cover Tape Heat-Welded	6" x 100'	Proprietary	Flashing strip manufactured from unreinforced Tremco TPO designed for advanced protection against heat aging and UV degradation. Laminated to a six inch wide strip, half the strip with a self-adhered side and half the strip with a heat-weldable edge; used for edge metal details.
TremPly TPO Detailing Membrane	24" x 50'	Proprietary	Unreinforced flashing material manufactured from Tremco TPO.
TremPly Max TPO Detailing Membrane	24" x 50'	Proprietary	Unreinforced flashing material manufactured from Tremco TPO designed for advanced protection against heat aging and UV degradation.
TremPly TPO Flashing Strip	Various	Proprietary	Reinforced flashing membrane manufactured from Tremco TPO.
TremPly Max TPO Flashing Strip	Various	Proprietary	Reinforced flashing membrane manufactured from Tremco TPO designed for advanced protection against heat aging and UV degradation.
TremPly TPO Pourable Sealer Pocket	9" x 6" x 4" oval with 3" base flange	Proprietary	Pourable sealer pocket is molded with Tremco TPO compound to a nominal 70 mil thickness designed for waterproofing irregular shaped roof penetrations.
TremPly Max TPO Pourable Sealer Pocket	9" x 6" x 4" oval with 3" base flange	Proprietary	Pourable sealer pocket is molded from Tremco TPO designed for advanced protection against heat aging and UV degradation compounded to a nominal 70 mil thickness designed for waterproofing irregular shaped roof penetrations.

APPROVED ASSEMBLIES:

Membrane Type: TPO

Deck Type 3I: Concrete, Insulated

Deck Description: 2500 psi structural concrete

System Type A(1): Membrane adhered to adhered insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

One or more layers each of the following insulations.

<u>Base Insulation Layer</u>	<u>Insulation Fasteners (Table 3)</u>	<u>Fastener Density/ft²</u>
ISO 95+ GL, H-Shield Minimum 2" thick	N/A	N/A
<u>Top Insulation Layer</u>	<u>Insulation Fasteners (Table 3)</u>	<u>Fastener Density/ft²</u>
SECUROCK® Gypsum-Fiber Roof Board Minimum ¼" thick	N/A	N/A

Note: Each layer of insulation shall be adhered to the deck in full mopping of approved asphalt within the EVT range and at a rate of 20-40 lbs./100 ft².

OR

If the optional vapor barrier is not present then the insulation may be adhered with OlyBond 500® or OlyBond 500® Green Adhesive Fastener in ¾" ribbons spaced 12"o.c. Please refer to Roofing Application Standard RAS 117 for insulation attachment.

Membrane: TremPly TPO or TremPly Max TPO adhered to SECUROCK® Gypsum-Fiber Roof Board with TremPly Bonding Adhesive applied at a total rate of 1.67 gal./sq. per manufacturer's instructions, half of the adhesive is applied to the substrate and the other half is applied to the back surface of the roof cover. The 3" side laps are sealed with a 1.5" wide heat weld for automatic machine welding. Weld width shall be a minimum 2" width for hand welding. The top surface is broomed and is rolled with a water filled roller weighing a minimum of 250 lbs.

OR

TremPly TPO or TremPly Max TPO adhered to SECUROCK® Gypsum-Fiber Roof Board with TremPly TPO LV Bonding Adhesive applied at 0.91gal./sq. per manufacturer's instructions, half of the adhesive is applied to the substrate and the other half is applied to the back surface of the roof cover. The 3" side laps are sealed with a 1.5" wide heat weld for automatic machine welding. Weld width shall be a minimum 2" width for hand welding. The top surface is broomed and is rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design

Pressure: -247.5 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 11 of 38

Membrane Type: TPO

Deck Type 3I: Concrete, Insulated

Deck Description: 3000 psi structural concrete

System Type A(2): Membrane adhered to adhered insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

One or more layers each of the following insulations.

<u>Insulation Layer</u>	<u>Insulation Fasteners</u> <u>(Table 3)</u>	<u>Fastener</u> <u>Density/ft²</u>
ACFoam-II Minimum 1" thick	N/A	N/A

Note: Each layer of insulation shall be adhered to the deck in full mopping of approved asphalt within the EVT range and at a rate of 20-40 lbs./100 ft².

OR

If the optional vapor barrier is not present then the insulation is adhered to the deck using Olybond 500® or Olybond 500® Green applied in 1" wide beads spaced 12" o.c. Please refer to Roofing Application Standard RAS 117 for insulation attachment.

Membrane: One ply of TremPly TPO or TremPly Max TPO adhered to the insulation with TremPly Bonding Adhesive applied at a total rate of 1.67 gal./sq. half applied to the insulation and half applied to the underside of the membrane. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Or

One ply of TremPly TPO or TremPly Max TPO adhered to insulation with TremPly TPO LV Bonding Adhesive applied at a total rate of 0.91 gal./sq. Apply half the adhesive to the insulation and half to the underside of the membrane. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design

Pressure: -502.5 psf. (See General limitation #9)

Membrane: TremPly TPO or TremPly Max TPO adhered to SECUROCK® Gypsum-Fiber Roof Board with TremPly TPO LV Bonding Adhesive applied at 0.91 gal./sq. Half of the adhesive is applied to the substrate and the other half is applied to the back surface of the roof cover. The top surface is then broomed and rolled with a weighted roller. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design Pressure: -502.5 psf. (See General limitation #9)

NOA No.: 23-0522.02
 Expiration Date: 07/13/28
 Approval Date: 11/02/23
 Page 15 of 38

Membrane Type: TPO
Deck Type 3I: Concrete, Insulated
Deck Description: 2500 psi structural concrete
System Type A(6): Membrane adhered to adhered insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

One or more layers each of the following insulations.

<u>Insulation Layer</u>	<u>Insulation Fasteners (Table 3)</u>	<u>Fastener Density/ft²</u>
SECUROCK® Gypsum-Fiber Roof Board Minimum 1/4" thick	N/A	N/A

Note: Insulation shall be adhered to the deck with Tremco Low Rise Foam Insulation Adhesive (BG) or Tremco LR Adhesive in 1" ribbons spaced 12"o.c. Please refer to Roofing Application Standard RAS 117 for insulation attachment.

Membrane: TremPly TPO or TremPly Max TPO adhered to SECUROCK® Gypsum-Fiber Roof Board with TremPly WB Bonding Adhesive is roller applied to the underside of the membrane and to the substrate at a combined 0.84 gal./sq. The adhesive is allowed to become tacky to touch and the roof cover is applied to the substrate. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250lbs.

**Maximum Design
Pressure:** -112.5 psf. (See General limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23

Membrane Type: TPO
Deck Type 3I: Concrete, Insulated
Deck Description: 2500 psi structural concrete
System Type A(7): Membrane adhered to adhered insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

One or more layers each of the following insulations.

Insulation Layer	Insulation Fasteners (Table 3)	Fastener Density/ft²
ISO 95+ GL, ISO 95+ GL Tapered Minimum 0.5" thick	N/A	N/A

Note: Insulation shall be adhered to the deck with OlyBond 500® or OlyBond 500® Green in 0.75" - 1" ribbons spaced 12"o.c. Please refer to Roofing Application Standard RAS 117 for insulation attachment. The base layer or top layer of insulation of multi-layer constructions may be either tapered or flat profiled. Intermediate layers of insulation (when present) are flat profiled.

Membrane: TremPly TPO or TremPly Max TPO adhered with TremPly WB Bonding Adhesive is roller applied at a total rate of 0.84 gal./sq. One quarter of the adhesive is applied to the back of the roof cover and three quarters of the adhesive is applied to the substrate.
OR
TremPly TPO or TremPly Max TPO adhered with TremPly Bonding Adhesive rolled applied to both the substrate surface and the underside of the membrane at a rate of 1.67 gal./sq. total. The top surface is then broomed and rolled with a weighted roller.
OR
TremPly TPO FB or TremPly Max TPO FB is fully adhered to with TremPly WB Bonding Adhesive applied to the substrate at the rate of 0.84 gallons per square. Then the fleece back membrane is rolled into the wet adhesive. Laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design Pressure: -292.5 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23

 Expiration Date: 07/13/28
 Approval Date: 11/02/23
 Page 26 of 38

Membrane Type:	Single Ply, TPO
Deck Type 3I:	Concrete Insulated
Deck Description:	2500 psi structural concrete
System Type C:	All insulation is loose laid with preliminary attachment to roof deck. Membrane is subsequently mechanically fastened through insulation to the roof deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

One or more layers of any of the following insulations.

<u>Base Insulation Layer</u>	<u>Insulation Fasteners (Table 3)</u>	<u>Fastener Density/ft²</u>
ISO 95+ GL, ACFoam-II, H-Shield, ENRGY 3 Minimum 0.5" thick	N/A	N/A
<u>Top Insulation Layer (Optional)</u>	<u>Insulation Fasteners (Table 3)</u>	<u>Fastener Density/ft²</u>
Structodek® High Density Fiberboard Roof Insulation, H-Shield HD, DensDeck® Roof Board, SECUROCK® Gypsum-Fiber Roof Board, SECUROCK® Glass-Mat Roof Board Minimum 0.5" thick	N/A	N/A

Insulation Note: All insulation layers shall be simultaneously, preliminarily secured with the RhinoBond® membrane fasteners installed as described below for membrane attachment. Please refer to Roofing Application Standard RAS 117 for insulation attachment requirements.

RhinoBond® Tread Safe Plate Note: The total insulation thickness shall be 2.0" minimum when using RhinoBond TreadSafe Plates (TPO & PVC). A 5/8" diameter pilot hole is required when using RhinoBond TreadSafe Plates (TPO & PVC) with wood fiber or gypsum top layer insulation.

Membrane: TremPly TPO or TremPly Max TPO is secured with RhinoBond Insulation Plates (TPO & PVC) or RhinoBond TreadSafe Plates (TPO & PVC) and #14 Roofgrip fasteners. Stress plates and fasteners are placed on a 24" x 24" grid and fasteners are driven through the insulation and into the roof deck. The roof cover is bonded to stress plates using the RhinoBond® Portable Bonding Tool per manufacturer’s installation instructions. Weighted cooling magnets are placed over the bonded membrane/plates for a minimum of 45 seconds. Side laps are minimum 3" wide and sealed with minimum 1.5" wide heat welds for automatic machine welding. Weld width shall be minimum 2" for hand welding.

Maximum Design Pressure: -60 psf. (See General limitation #7)

Membrane Type: TPO

Deck Type 3I: Concrete, Insulated

Deck Description: 2500 psi structural concrete

System Type D(1): Membrane mechanically attached over preliminary fastened insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

One or more layers of any of the following insulations.

<u>Insulation Layer</u>	<u>Insulation Fasteners (Table 3)</u>	<u>Fastener Density/ft²</u>
ISO 95+ GL, H-Shield, AC Foam-II Minimum 1" thick	N/A	N/A

Note: Insulation is preliminary attached, at a minimum application rate of two fasteners per board for insulation boards having no dimension greater than 4 ft., and four fasteners for any insulation board having no dimension greater than 8 ft.

OR

All insulation shall be adhered to the deck in full mopping of approved asphalt within the EVT range and at a rate of 20-40 lbs./100 ft². Please refer to Roofing Application Standard RAS 117 for insulation attachment.

Membrane: TremPly TPO or TremPly Max TPO attached to the deck through the preliminary attached insulation as specified below.

Fastening: Membrane is mechanically attached using #14 Roofgrip fasteners and OMG 2-3/8" Barbed XHD Plates, OMG 2 in. Barbed Plates or OMG Eyehook Accuseam Plates spaced 6" o.c. within minimum 6" wide laps. Laps are spaced at maximum 114" o.c. and sealed with a minimum 1.5" wide heat weld.

Maximum Design

Pressure: -52.5 psf. (See General Limitation #7)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 28 of 38

Membrane Type: TPO

Deck Type 3I: Concrete, Insulated

Deck Description: 2500 psi structural concrete

System Type D(2): Membrane mechanically attached over preliminary fastened insulation.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

One or more layers of any of the following insulations.

<u>Insulation Layer</u>	<u>Insulation Fasteners (Table 3)</u>	<u>Fastener Density/ft²</u>
ISO 95+ GL, H-Shield, AC Foam-II Minimum 1.5" thick	N/A	N/A

Note: Insulation is preliminary attached, at a minimum application rate of two fasteners per board for insulation boards having no dimension greater than 4 ft., and four fasteners for any insulation board having no dimension greater than 8 ft.

OR

All insulation shall be adhered to the deck in full mopping of approved asphalt within the EVT range and at a rate of 20-40 lbs./100 ft². Please refer to Roofing Application Standard RAS 117 for insulation attachment.

Membrane: TremPly TPO, TremPly Max TPO, TremPly TPO FB or TremPly Max TPO FB attached through the preliminary attached insulation as specified below.

Fastening #1: Membrane is mechanically attached using #14 Roofgrip fasteners and OMG 2-3/4" Super XHD Barbed Plates spaced 12" o.c. within minimum 6" wide laps. Laps are spaced at maximum 114" o.c. and sealed with a minimum 1.5" wide heat weld.
(Maximum Design Pressure –45 psf. See General Limitation #7)

Fastening #2: Membrane is mechanically attached using #14 Roofgrip fasteners and OMG 2-3/4" Super XHD Barbed Plates spaced 6" o.c. within minimum 6" wide laps. Laps are spaced at maximum 114" o.c. and sealed with a minimum 1.5" wide heat weld.
(Maximum Design Pressure –60 psf. See General Limitation #7)

Fastening #3: Membrane is mechanically attached using #14 Roofgrip fasteners and OMG 2 in. Barbed Plates, OMG 2-3/8" Barbed XHD Plates or OMG Eyehook Accuseam Plates spaced 6" o.c. within minimum 6" wide laps. Laps are spaced at maximum 91.5" o.c. and sealed with a minimum 1.75" wide heat weld.
(Maximum Design Pressure –60 psf. See General Limitation #7)

Maximum Design Pressure: See Fastening Options Above

Membrane Type: TPO

Deck Type 3: Concrete, Non-Insulated

Deck Description: 2500 psi structural concrete

System Type F(1): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Membrane: TremPly TPO FB adhered to structural concrete deck.

Fastening: Membrane is fully adhered to a structural concrete deck with TremPly WB Bonding Adhesive roller applied to the concrete at the rate of 0.84 gallons per square or (0.34 Liter/meter squared). Then the fleece back membrane is rolled into the wet adhesive. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design

Pressure: -300 psf. (See General Limitation #9)

Membrane Type: TPO
Deck Type 3: Concrete, Non-Insulated
Deck Description: 2500 psi structural concrete
System Type F(2): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Membrane: One ply of TremPly TPO FB or TremPly Max TPO FB adhered with Tremco Low Rise Foam Insulation Adhesive applied in 1" wide beads spaced 6" o.c. or OlyBond 500 applied in a spatter pattern at 0.318 gal./sq. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design Pressure: -502.5 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 31 of 38

Membrane Type: TPO

Deck Type 3: Concrete, Non-Insulated

Deck Description: 2500 psi structural concrete

System Type F(3): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Membrane: One ply of TremPly TPO FB or TremPly Max TPO FB adhered with Tremco Low Rise Foam Insulation Adhesive (BG) or Tremco LR Adhesive applied in 1" wide beads spaced 6" o.c. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design Pressure: -502.5 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 32 of 38

Membrane Type: TPO

Deck Type 3: Concrete, Non-Insulated

Deck Description: 2500 psi structural concrete

System Type F(4): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Note: If the optional vapor barrier is not present the concrete deck shall be primed with ASTM D 41 asphalt primer and allowed to dry prior to application of membrane.

Membrane: One ply of TremPly TPO FB or TremPly Max TPO FB fully adhered in approved asphalt at an application rate of 20-40 lbs./sq. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design

Pressure: -390 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 33 of 38

Membrane Type: TPO

Deck Type 3: Concrete, Non-Insulated

Deck Description: 2500 psi structural concrete

System Type F(5): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Membrane: One ply of TremPly TPO FB or TremPly Max TPO FB adhered with Tremco Low Rise Foam Insulation Adhesive, Tremco Low Rise Foam Insulation Adhesive (BG), Tremco LR Adhesive or Millennium One-Step Foamable Adhesive in $\frac{3}{4}$ - 1" ribbons spaced 12"o.c. or OlyBond 500 applied in a spatter pattern at 0.318 gal./sq. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design Pressure: -60 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 34 of 38

Membrane Type: TPO

Deck Type 3: Concrete, Non-Insulated

Deck Description: 2500 psi structural concrete

System Type F(6): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Membrane: One ply of TremPly TPO FB or TremPly Max TPO FB adhered with Millennium One-Step Foamable Adhesive in $\frac{3}{4}$ - 1" ribbons spaced 6"o.c. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design

Pressure: -492.5 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 35 of 38

Membrane Type: TPO
Deck Type 3: Concrete, Non-Insulated
Deck Description: 2500 psi structural concrete
System Type F(7): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Membrane: One ply of TremPly TPO FB or TremPly Max TPO FB adhered with Tremco Low Rise Foam Insulation Adhesive, Tremco Low Rise Foam Insulation Adhesive (BG), Tremco LR Adhesive or Millennium One-Step Foamable Adhesive in $\frac{3}{4}$ - 1" ribbons spaced 4"o.c. or OlyBond 500 applied in a spatter pattern at 0.318 gal./sq. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design Pressure: -337.5 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23
Page 36 of 38

Membrane Type: TPO

Deck Type 3: Concrete, Non-Insulated

Deck Description: 2500 psi structural concrete

System Type F(8): Membrane adhered directly to deck.

All General and System Limitations apply. Roof accessories not listed in Table 1 of this NOA are not approved and shall not be installed unless said accessories demonstrate compliance with prescriptive Florida Building Code requirements and are field fabricated utilizing the approved membranes listed in Table 1.

Membrane: One ply of TremPly TPO FB or TremPly Max TPO FB fully adhered with OlyBond 500 applied in a spatter pattern at 0.318 gal./sq. applied in a spatter pattern at 3.75 lbs./sq. The laps are heat welded a minimum 1-1/2" width for automatic machine welding. Weld width shall be a minimum 2" in width for hand welding. The membrane is then rolled with a water filled roller weighing a minimum of 250 lbs.

Maximum Design Pressure: -497.5 psf. (See General Limitation #9)

NOA No.: 23-0522.02
Expiration Date: 07/13/28
Approval Date: 11/02/23

CONCRETE DECK SYSTEM LIMITATIONS:

1. If mechanical attachment to the structural deck through the lightweight insulating concrete is proposed, a field withdrawal resistance testing shall be performed to determine equivalent or enhanced fastener patterns and density. All testing and fastening design shall be in compliance with Testing Application Standard TAS 105 and Roofing Application Standard RAS 117 and/or RAS 137, calculations shall be signed and sealed by a Florida Registered Engineer, Architect, or Registered Roof Consultant.

GENERAL LIMITATIONS:

1. Fire classification is not part of this acceptance, refer to a current Approved Roofing Materials Directory for fire ratings of this product.
2. Insulation may be installed in multiple layers. The first layer shall be attached in compliance with Product Control Approval guidelines. All other layers shall be adhered in a full mopping of approved asphalt applied within the EVT range and at a rate of 20-40 lbs./sq., or mechanically attached using the fastening pattern of the top layer
3. All standard panel sizes are acceptable for mechanical attachment. When applied in approved asphalt, panel size shall be 4' x 4' maximum.
4. An overlay and/or recovery board insulation panel is required on all applications over closed cell foam insulations when the base sheet is fully mopped. If no recovery board is used the base sheet shall be applied using spot mopping with approved asphalt, 12" diameter circles, 24" o.c. or strip mopped 8" ribbons in three rows, one at each side lap and one down the center of the sheet allowing a continuous area of ventilation. Encircling of the strips is not acceptable. A 6" break shall be placed every 12' in each ribbon to allow cross ventilation. Asphalt application of either system shall be at a minimum rate of 12 lbs./sq. **Note: Spot attached systems shall be limited to a maximum design pressure of -45 psf.**
5. Fastener spacing for insulation attachment is based on a Minimum Characteristic Force (F') value of 275 lbf., as tested in compliance with Testing Application Standard TAS 105. If the fastener value, as field-tested, are below 275 lbf. insulation attachment shall not be acceptable.
6. Fastener spacing for mechanical attachment of anchor/base sheet or membrane attachment is based on a minimum fastener resistance value in conjunction with the maximum design value listed within a specific system. Should the fastener resistance be less than that required, as determined by the Building Official, a revised fastener spacing, prepared, signed and sealed by a Florida Registered Engineer, Architect, or Registered Roof Consultant may be submitted. Said revised fastener spacing shall utilize the withdrawal resistance value taken from Testing Application Standards TAS 105 and calculations in compliance with Roofing Application Standard RAS 117.
7. Perimeter and corner areas shall comply with the enhanced uplift pressure requirements of these areas. Fastener densities shall be increased for both insulation and base sheet as calculated in compliance with Roofing Application Standard RAS 117 and/or RAS 137. Calculations prepared, signed and sealed by a Florida registered Professional Engineer, Registered Architect, or Registered Roof Consultant **(When this limitation is specifically referred within this NOA, General Limitation #9 will not be applicable.)**
8. All attachment and sizing of perimeter nailers, metal profile, and/or flashing termination designs shall conform with Roofing Application Standard RAS 111 and applicable wind load requirements.
9. The maximum designed pressure limitation listed shall be applicable to all roof pressure zones (i.e. field, perimeters, and corners). Neither rational analysis, nor extrapolation shall be permitted for enhanced fastening at enhanced pressure zones (i.e. perimeters, extended corners and corners). **(When this limitation is specifically referred within this NOA, General Limitation #7 will not be applicable.)**
10. All products listed herein shall have a quality assurance audit in accordance with the Florida Building Code and Rule 61G20-3 of the Florida Administrative Code.

END OF THIS ACCEPTANCE
