Subject: Project Review & Analysis - E13-MDAD-02

SBD is currently reviewing the subject project for the recommendation of CBE Measures; please clarify/confirm

Following, which will assist in the effective review of the same:

- i. Are there any portion of the **TC (4.01 @ 80%)**, identified for the prime, that can be performed by a sub-consultant? No, all sub-consultant work has been identified in sub-categories 3.02, 3.02A, 3.03 and 11.00.
- ii. Are there any minimum or special requirements that are associated with this solicitation (for the prime; or subs; or both)?
Yes, a minimum of ten (10) years of cumulative experience in developing and maintaining a Pavement Management System (PMS) for airports of equal size and complexity to MIA.
- iii. Are there any conditions and/or project related concerns that would preclude this project from being considered for a CBE Set-Aside? Yes, this particular project has a high degree of specialization as it relates to the evaluation, analysis, and recommendations for remediation of airfield pavement systems including runways, taxiways, taxilanes and aprons. In addition to the experience required the selected firm must provide staffing capability to perform year-round pavement inspections at all five (5) MDAD County owned and operated airports.

At your earliest convenience please provide a response.

Advise as to any "errors, omissions, and/or misunderstanding".

Regards,

Vivian O. Walters, Jr.
