Request for Price Quotation (RPQ) No. 20130272
Push-Button Contract for Traffic Signal
Improvements (South)

RECOMMENDATION

Departmental Contract Measure Recommendation: Trade Set-Aside

Engineer's Opinion of Probable Construction Costs: \$487,029.53

Community Workforce Program (CWP): In accordance with Miami-Dade County Code §2-1701 as amended by County Ordinance No. 13-66, the minimum require Miami-Dade County wide CWP Goal will be applicable to this contract. The Contractor must submit a Workforce Plan to the Miami-Dade County Internal Services Department, Small Business Development Division through the Department within 15 days of notification of award of the Contract; the Contractor may utilize persons from any DTA's within the project boundaries to meet the workforce goal. The County will not enter into the contract until it receives the contractor's Workforce Plan and deems the Plan acceptable.

BACKGROUND

Under the direction of the PWWM, improvements are being made to enhance pedestrian safety and accessibility at some of the busiest intersections in Miami-Dade County.

Enhanced pavement marking for pedestrian crosswalks, wheelchair ramps, pedestrian signals, mast arm replacements, traffic signal installations, traffic signal relocations, improved traffic signal timing and new signs at many of the intersections are among the upgrades now in place. The changes are designed to better integrate motorist and pedestrian activity and to reduce the speed of traffic at intersections where pedestrians cross.

Project Title:

Push-Button Contract for Traffic Signal Improvements (South)

Standard Industrial Code (SIC):

17-Construction – Special Trade Contractors

Estimated Project Cost:

\$487,029.53

Funding Source:

RIF

Bonding Requirements: Bid Bond– 5% of base bid amount
Performance Bond- 100% of Contract Award Amount

Method of Award: Line Item

RPQ No.: 20130272

RPQ Title: Push-Button Contract for Traffic Signal Improvements (South)

Scope of Work

- A. Work under this Contract includes furnishing of all supervision, labor, materials, tools, equipment and performing all operations required to perform traffic signal improvements and installations including any ancillary work. Traffic signalization upgrades includes the installation of mast arms, traffic controller assemblies, and milling and resurfacing. Contractor to furnish and install grounding electrodes, conduits, pull boxes, foundations, pedestrian signal heads with push buttons and signs, overhead signs, Internally Illuminated Street Name Signs, mounting hardware, loop assemblies, and signal cable. Additional work also includes installation of pedestrian ramps, ground mounted signs, pavement markings, construction of side walk, curb and gutter, installation of truncated dome, and removing existing signs and traffic signalization devices in conflict with the proposed scope of work.

Required Contractor's Certification:

A. Certificate of Competency Requirement:

1. At the time of Bid and pursuant to the requirements of Section 10-3 of the Code of Miami-Dade County, Florida and these Solicitation and Contract Documents, the Bidder must hold a valid, current, and active:
 - a. Certificate of Competency from the County's Construction Trades Qualifying Board as an Electrical Contractor. The specialty contractor shall subcontract with a qualified contractor any work which is incidental to the specialty but is specified in the aforementioned Code as being the work of other than that of the Engineering Specialty for which certified; or
 - b. Certification, as an electrical contractor provided by the State of Florida Electrical Contractors' Licensing Board, pursuant to the provisions of Section 489.511 of the Florida Statutes (F.S.).

B. Experience Requirement:

1. The Bidder, through full time personnel employed by the Bidder, must demonstrate a minimum of five years of continual experience as the prime contractor in projects with scopes comparable to the Project Scope of Work. Demonstrate the experience requirement by:
 - a. Providing a detailed description of completed projects, similar to the Project Scope of Work, in which the Bidder is currently engaged or has completed within the past ten years.
 - b. List and describe those projects performed for government clients, similar size private entities, and any work performed for the County. The description should identify for each project (1) the client, (2) description of work, (3) total dollar value of the contract, (4) contract duration, (5) customer contact person and phone number for reference, (6) statement or notation of whether Bidder is/was the prime contractor or subcontractor, and (7) the results of the project.

RPQ No.: 20130272

RPQ Title: Push-Button Contract for Traffic Signal Improvements (South)

C. Additional Contractor Requirements For Work With Traffic Control Devices

1. In addition to the license(s) required of Contractor, all personnel engaged in installing, modifying, repairing, removing or maintaining; roadway street lighting systems; traffic signalization; or any other electrical/electronic traffic control device in Miami-Dade County must:
 - a. Perform work under the direction of a Master Electrician that is present at the job site or able to respond within 2 hours of notification (4 hours for roadway street lighting systems).
 - b. Perform all work under the direct supervision of a Journeyman Electrician. For Traffic Signalization or Control Devices the Journeyman Electrician must be certified as an International Municipal Signal Association (IMSA) certified Traffic Signal Technician (TST) Level II or Level III. All work related at or pertaining to the controller must be performed by an IMSA certified TST Level II (Field).

INTENTIONALLY LEFT BLANK

RPQ No.: 20130272

RPQ Title: Push-Button Contract for Traffic Signal Improvements (South)

Reason for Recommendation:

This is a single trade project; none of the primary trade related work (Electrical) can be subcontracted in accordance with the recommendation for award of a construction contract pursuant to the MCC/CICC 7360 plan requirements. Additionally, staff has met with the design engineer, construction project manager, and members of the industry and concluded that there is ancillary work required to complete this project which may be subcontracted for CSBE participation. Ancillary work to be performed under this project includes all specialty trade construction trade categories listed under "Areas for possible measures."

The work orders for the contract have identifiable opportunities for a Trade Set-Aside. The types of opportunities provided are appropriate for applying a Trade Set-Aside; and, effective competition exists in that three or more CSBEs appear to be available to perform in the recommended specialty trade area within SIC 17. The awarded Contractor and SBD shall verify with the user department the scope of work, dollar value and percentage of work achieved for CSBE participation on each Work Order upon expiration of the Contract.

Comments:

This type of specialized work is not usually associated with small business enterprise firms that are prime contractors. Also, this type of work is highly specialized and requires special equipment that is typically owned and/or leased by the contractor.

In accordance with the Miami-Dade County Code (The Code), PWWM attached its Project Measure Analysis and Recommendation findings along with other supporting documents for consideration of small business participation. PWWM staff met with the Small Business Development Division's (SBD) Construction Manager in an effort to seek out additional opportunities for CSBEs. There are not specific sites identified for this project. Work orders will identify the location, description, and amount of work to be accomplished. Work orders will be issued subsequent to the Award of the Contract. Work orders will be subject to the requirements of the Community Workforce Program (CWP).

Contracts and Specifications staff completed its review of the scope of work for the subject RPQ. Based on the analysis of factors contained in Section VI D of Implementing Order 3-22, Public Works and Waste Management (PWWM) suggests the following contract measure recommendation: Trade Set-Aside #1: Traffic Stripes and Markings: Painted and/or Thermoplastic.

Concrete Work:

Additional work that initially appeared available for subcontracting was that related to the use of the concrete. However, after further research by staff it was noted that the industry performs their own concrete work utilizing skilled laborers. The items listed under the category concrete work are incidental to the scope of work to be performed and included on the Bid Form to facilitate payment to the contractor, should those items be needed to complete repairs and/or restoration as a result of damage during construction.

RPQ No.: 20130272

RPQ Title: Push-Button Contract for Traffic Signal Improvements (South)

CSBE Prime History of similar Contracts/Projects for previous three years:

None

Scope of Work History Summary – Subcontracting Opportunities:

Areas recommended for CSBE Trade Set-Aside (PWD/SBD):

Traffic Stripes and Markings (Painted and/or Thermoplastic)

Areas used to meet subcontractor goal (Awarded Contractor):

Traffic Stripes and Markings (Painted and/or Thermoplastic)
