VERIFICATION OF AVAILABILITY TO BID

SCOPE OF WORK:

This project requires a very unique specialty trade, since it involves a “cured-in-place-pipe” process. By inserting a resin impregnated felt tube into the existing pipe and curing through a unique process, the resin hardens to form a structurally sound pipe within a pipe.

The work consists of furnishing all materials, labor, services, supervision, tools, equipment, and all other items necessary for the successful completion of the job. The scope of work includes, but is not limited to, reconditioning through cured-in-place-pipe process the following: one (1) four inch (4”) cast iron drain pipe for eight (8) public water closets; one (1) four inch (4”) cast iron drain pipe for a handicap-accessible water closet; and one (1) two inch (2”) cast iron lavatory drain stack to be structurally lined from multiple sinks to existing vertical stack.

Please see attached GSA Scope of Work for detailed work scope.

This work is performed under a Master Plumber’s License. Does your firm have a Master Plumber’s License? _____

Please list all projects that have been completed in which your firm has obtained experience performing the cured-in-place-pipe process. Failure to complete this information will result in the Verification of Availability to Bid Letter not being considered.

**GENERAL, SUPPLEMENTAL, AND SPECIAL CONDITIONS
GSA/FUMD- STRUCTURALLY RELINING INTERIOR WASTE LINE PIPES
GSA PROJECT NO. X000132
BID DUE DATE: August 31, 2011**

ALL WORK SHALL BE PERFORMED IN ACCORDANCE WITH THIS REQUEST FOR PRICE QUOTATION (RPQ) AND MISCELLANEOUS CONSTRUCTION CONTRACT MCC 7360 PLAN.

1. Scope of Work

The scope of work consists of furnishing all materials, labor, services, supervision, tools, equipment, and all other items necessary for the successful completion of the job. Scope will consist of, but not limited to:

The Women's restroom consist of an existing four inch (4") cast iron drain pipe for eight (8) public water closets, one (1) four inch (4") cast iron drain pipe for a handicap-accessible water closet, and one (1) two inch (2") cast iron lavatory drain stack to be structurally lined from multiple sinks to existing vertical stack.

Nine (9) water closets have been removed from the floor flanges, and all drain lines under toilets have been inspected with a sewer camera. The existing piping system is currently in functional condition with no obstructions, collapsed pipe, fittings, cracks, breaks, leaking fittings, including joints, and approximately four feet (4') down the vertical stack.

There is a DVD Sewer Camera video showing the pipe layout, which is attached to these documents.

General Services Administration, through its Renovation Services Section (GSA/RSS), Plumbing Shop will provide an opening in the concrete floor from one side to the other of the water closet, in order to expose the drain pipe and provide the structural pipe lining system with a pull point. The pipe system will be repaired with PVC DWV fittings by GSA/RSS Plumbing Shop.

The vertical stack connecting the existing eight (8) water closets, as well as the one (1) handicap-accessible water closet can be accessed through the basement. The handicap-accessible water closet "Y" connected to the floor drain will be cut and replaced with a PVC fitting, which will be used as a support point for the structural pipe lining system.

GSA/RSS Plumbing Shop shall test repairs in the new drain system for water leaks to maximum water level after structural pipe lining process has been completed. No water leakage shall be permitted through any joint, pipe, fixture, bend, fitting, wall, or floor, from the new drain pipe system on the 3rd floor of the women's restroom.

Please note, due to the security level required within this facility, all workers will be required to sign-in at the Security Front Desk, provide a driver's license, and obtain a security badge each day. If the Contractor works during the normal working hours, they will only be able to park one vehicle by the facility. The Court's security staff will perform a background check on each worker/employee, which they must pass in order to work at this secured site.
