### CITIZENS' INDEPENDEN TRANSPORTA

The Plan, The Trust and The Summit The citizans of Moori-Dade County approved the half-cont Charter County Sales Sur-The entitiones of Manni-Dade Country approved the half-caret Charles Country Solie Sour-fac on November 5, 2002. The propose of the Surtax is to institute the approxem Transported which included approach is a constrained program of branch and reading entities which included approach and the Materian system, schemesens to the Materian and read-backback and the Materian system, schemesens to the Materian and the transition of manicipations for the same and read-backback and histories and the transition of manicipations for the same and read inconvention.

As part of the 2002 build question, votars also approved creating the Citizens' indepen-tions Transconductor Travel Travel Travel to any sector to any sect As part of the 2002 biller question, where also approved creating the GRUNN' indepo-dent Transportation Trace (Transportation Trace) to part see Surface proceeding and parts resultation of the PTP. The residence of Menuel Jacks (Transport data service and all independent creating on the PTP. The residence of Menuel Jacks (Transport data service and all independent data service and all indepen dard Transportation Trust (Irransportation Trust) to oversite Startus proceeds and imple-mentation of the PTP. The residents of Mann-Linde County demonstrated their apport to become and a start to be the start of the start of the start oversite ov

The resolution of Marsis-Elide County demonstrated their support. for approving public transportation with the approval of the Size. Issue and here or extransformation oversight of the Pip to the Resource taken Reset.

On June 6, 2013, Major Carlos A. Gimenaz, the Board or county communitions and any transportation rule organized the "2017 Transportation Summit - Visionity ioners and the Transportation Trust organizati are solita maniportation statistic - viacting the Future of Mani-Dade County's Public Transports the "range of many strange works a runne" manaports, then " The goal of the Summark wate to bring together agen.

then it in pose or no common must be using equipment again clear, effects and industry opport to follow on the future of public transportation in Mann-Data County and to simulate al-not an executed and an executed in the reconstruction of the industry of the reconstruction of the reconstruction of the industry of the reconstruction of the reconstruction of the industry of the reconstruction of the reconstruction of the industry of the reconstruction of the reconstruction of the industry of the reconstruction of the industry of the industry of the reconstruction of the reconstruction of the industry of the reconstruction of the reconstruction of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the industry of the industry of the reconstruction of the industry of the reconstruction of the industry of the Patter bamper taken in Mann-Data County and to Situate data cassion of the next major balance taking includes in the community. This event makes the start start taken in the start and a start taken in the community. This event makes the classics on one neurranger transportation projects in the community. This event marks the "first stage" in the process of engaging the public and other stationolders is charing the systems of boult transmissionless descenteers.

More than 500 marchers of the public, elected officials and transportation professional ensured at a General and Alexensions demonstrated wildow and demonstrated and approximated approximated approximated and approximated and approximated and approximated approximated approximated approximated and approximated More than 500 mambers of the public, alected onicsis and tarapportation professional attended the Sammit and decusions dimensional widegread formed and support attended the Sammit and decusions of the second anteneous no somme and excanners interestance interestance interestance excanners in mass transportation among the participants for increased investments in mass transportation among the participants

The Report on Proceedings of the Temportation Summit fully seamine the Mass and humans identified during the Seamint. This brochure provides an overview of the instance of this away. The Proceedings Report will be discussed as the final continues to matter with the public is future transportation forume to further applice these critical leases. While we know that transportation can be described as stropy as getting from point to the second se Wrate we know that transportation can be described as simply as getting from point to point it is also about why we need to get thirt. Transportation helps link and improve the leadable of our conversance and species up accounts: and easier spectrum when and the leadable of our conversance. Date for allow about why we seed to part the's. Transportation heaps that and improve the featurity of our conversations and operating accounties and special other beauting that avects our lines. The presentation of the Conversion for Machine and other beauting that avects our lines. The Probability of our conversions and operation precommission discuss opportunities and other benefits that service our trives. The completion of the (range Lines Mediroval and features to Meany Annual come memory are error or mer. The comparison of the orange Line Medoral et-lension to Manni international Airport (MIA) is an example of the and represents a missions achievement for the PTP. Now we need to answer this question, "What's and and how do we not there?"
