The following report provides the status of legislation and appropriations related to Miami-Dade County from the 2014 session of the Florida Legislature that ended on May 2, 2014. The information compiled was provided by Miami-Dade's contract lobbyists, CAO Jess McCarty and Office of Intergovernmental Affairs.

The sections are broken down as follows: "Section A" addresses Miami-Dade County Priorities as set by the Board of County Commissioners and other issues of significance; Sections B through F address issues in various policy areas.

While the 2014 legislative session has concluded, bills are still being transmitted by the Senate President and House Speaker to the Governor. This process usually continues over a period of several months, as bills are presented to the Governor in groups on a daily basis. Once the bills are presented to the Governor, he has fifteen days to sign, veto or allow the bill to become law. Unless otherwise noted below, bills listed below have not yet been transmitted to the Governor.

67. Tax Package –APPROVED by the Governor- HB 5601 by the House Finance and Tax Committee contains \$100 million in tax reductions. An amendment offered in the Senate Appropriations Committee resolved the Public Education Capital Outlay (PECO) issue. This will prevent a \$20 million fiscal impact to local governments statewide. Additionally, the reduction in the communications services tax was removed entirely from the bill. As passed, the legislation no longer has a significant fiscal impact on local governments. The major provisions of this omnibus \$105 million tax cut package include the following:

- Creates a 3-day sales tax holiday from September 19-21, 2014, for the first \$1,500 of the sales price for energy-efficient appliances;
- Creates a sales tax holiday from May 31-June 8, 2014, for certain hurricane preparedness supplies;
- Expands from \$178.8 million to \$216.44 million, of the credits available under the New Markets Tax Credit program, which directs investment into low income communities.
- Provides a one-year extension of the Community Contributions Tax Credit program and includes an additional \$7.9 million;
- Changes the tax treatment of mobile phone prepaid calling plans;
- Allows a local government to repeal or reduce the Local Business Tax by majority vote;
- Allows sales tax dealers to receive partial credits or refunds of sales taxes paid on purchases made with uncollectable private-label credit card accounts;
- Revises the calculation of the premium tax imposed on bail bond premiums;
- Reduces the sales tax rate on electricity purchases and creates an additional Gross Receipts tax rate on electricity purchases – the new combined sales tax/gross receipts tax rate is 6.95% instead of 7% as provided under current law;
- Provides an increase in the cigarette tax distribution proceeds to the Lee Moffitt Cancer Center and Research Institute from 2.755 to 4.04%;
- Provides a new sales tax exemption for therapeutic veterinary diets available from a licensed veterinarian;
- Creates a sales tax exemption for certain prepaid college meal plans;
- Includes cement mixing drums to an existing temporary sales tax exemption for manufacturing machinery and equipment, which will expire in 2017; and

- Provides a permanent sales tax exemption for child restraint systems and booster seats for use in motor vehicles, and for bicycle helmets marketed for use by youth.

HB 5601 passed on the last day of session and was approved by the Governor.
