

What is Vinci (MSP) Micro Scalp Pigmentation?

Micro Scalp Pigmentation (or MSP) is a procedure to permanently hide balding and thinning hair as well as scars on the scalp.

The procedure involves placing medical grade pigments in the bald or thinning areas using a specialist delivery technique that simulates hair follicles.

Pigment color tones are matched to your existing hair color and simulate perfectly the desired look, skillfully camouflaging bald areas and scars.

**No maintenance, No surgery,
No medication required**

Male Pattern Baldness

What Can (MSP) Micro Scalp Pigmentation Do For Me?

Male Pattern Baldness

Whatever level of hair loss you have due to male pattern balding, MSP can redefine your hairline.

Thinning Hair

If you have fine or thinning hair, our Scalp Pigmentation technique can give you a dense, thicker look.

Alopecia

MSP works perfectly to mask the signs of Alopecia Areata, and give you back the look of a full head of hair.

Hair Transplant Scars

If you have had a hair transplant in the past and need to hide the scar, Scalp Pigmentation is the treatment for you!

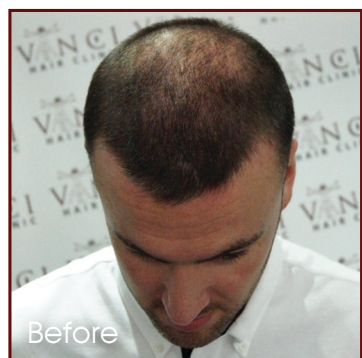

Female Hair Loss

MSP is not only for men. If your hair looks thin, Scalp Pigmentation can give the impression of thicker hair.

To disguise your hair loss we use medical grade pigments to recreate the look of hair follicles where you have none. Our purpose built needles, pigments and techniques produce the most natural results in the world.

Customer Feedback

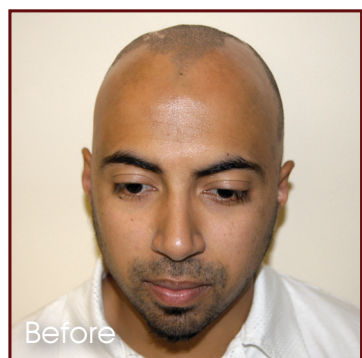

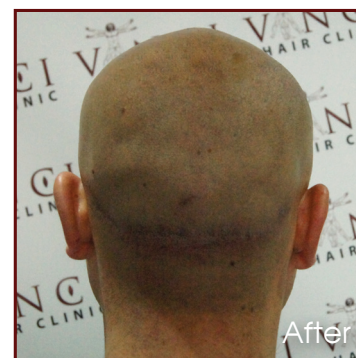

- » "It looks like I have a full head of hair" - **Paul K.**
- » "Everyone keeps asking me why I don't grow my hair back?" - **Simon Beck**
- » "My hair loss was getting me down, I feel complete now!" - **Juan Gonzales**
