The Miami-Dade County **Division of Environmental Resources Management (DERM)** is a part of the Regulatory and Economic Resources Department.

DERM implements monitoring, education, restoration, regulatory, and land management programs to protect water quality, drinking water supply, air quality, and natural resources that are vital to the health and well-being of all Miami-Dade County residents and visitors and the ecosystem.

Beyond DERM's work, residents, business owners, and visitors alike, should understand the importance of protecting our air, land, and water. Our beautiful coast, natural areas, and shallow aquifer are vulnerable to overuse and pollution. We live and work over the water that we drink! There are numerous ways that we can all help: participate in natural areas cleanups such as Baynanza; understand how to comply with environmental regulations; put in place simple pollution prevention tips at home and at work; or report pollution or environmental damage on our 24-hour hotline. For more information, please contact DERM's main line 305-372-6789 or derm@miamidade.gov.

The following page contains a list of phone numbers for various DERM programs. Residents and business owners should keep these numbers handy. You can also visit us at www.miamidade.gov/environment
