Memorandum

MIAMI-DADE COUNTY

Date: March 8, 2005

To: Honorable Natacha Seijas, Chair
and Members, Infrastructure and Land Use Committee

INLUC
Agenda Item No. 7(E)

From: George M. Burgess
County Manager

Subject: Report Regarding Contract Measures Used on Capital Improvement Contracts Pursuant to Ordinance No. 00-104 (Expedite Ordinance)

At the January 11, 2005 Infrastructure and Land Use Committee meeting, Commissioner Carey-Shuler requested a report regarding the Community Small Business Enterprise (CSBE), Community Business Enterprise (CBE), Disadvantage Business Enterprise (DBE) and Community Workforce Program (CWF) participation for the projects processed via the Expedite Ordinance No. 00-104 from inception to the present. Attached please find the contract measures report for capital improvement projects processed via the Expedite Ordinance.

The Department of Business Development (DBD) is responsible for reviewing all construction projects regardless of dollar value for Community Small Business Enterprise Program participation. The analyses consist of verification of availability. A minimum of three firms must be available to perform the work in trade(s) for a subcontractor goal. If less than five (5) firms are certified in a trade a written request for availability is made. When making a recommendation on a set-aside a request for availability is required in writing, a minimum of three prime contracting firms with the same certification levels must be available to provide the services required. In addition, all of the sub-trade disciplines are verified for availability. If CSBEs are not available in all the trades for the project, the project is presented requesting that those trades be exempted from CSBE participation. The same process is taken for the Community Business Enterprise Program for Architectural and Engineering Services.

After the analyses, concurrence with the department is confirmed and presentation to the Review Committee (RC) is made. The RC, after public deliberation and consideration of alternatives may accept, reject, modify or alter the staff recommendation. The RC is responsible for recommending to the County Manager whether to apply a CSBE contract set-aside, trade set-aside or subcontractor goals or a CBE set-aside or sub consultant goal. When there is insufficient availability, no measures are applied. It is the County's intent that a minimum of 10% of the County's expenditures on construction and architectural and engineering services be sheltered for CSBE and CBE participation, respectively.

DBD is also responsible for monitoring awarded contracts for compliance with the CSBE and CBE Program Ordinances. It is the County's intent these same CSBEs and CBEs providing services to the County, shall receive payments promptly in order to maintain sufficient cash flow. It is the responsibility of DBD to review, observe, enforce and report on the compliance status of those contracts as to the required CSBE and CBE participation.

In conclusion, although goals are established on a contract-by-contract basis as detailed above and awards processed via the Expedite Ordinance are only part of our overall capital construction contracting volume, the CSBE, CBE and DBE participation totaled $170,315,872 for expedited contracts as compared to $1,377,831,380 total expedited contracting value.

Community Workforce Program: The Board adopted Ordinance 03-1 establishing the Community Workforce Program applicable to capital construction projects equal to or greater than $1 million and located in Designated Target Areas (DTAs), which are defined as Empowerment and Enterprise Zones, Targeted Urban Areas, CDBG Block Groups and Focus Areas. The objective of this Ordinance was to increase employment opportunities for residents of traditionally underserved and undeveloped neighborhoods that have been designated as a DTA. Ordinance No. 03-1 was amended by Ordinance No. 03-237 effective November 2003, which lowered the threshold from $1 million to projects equal to or greater than $250,000.

If a work order issued under this project is determined to be located within a DTA, it is subject to Community Workforce Program goals. As such, the work order will be required to be presented to the Review Committee for the application of a CWP goal recommendation.
