## **SECTION I - REQUEST FOR PROPOSAL OVERVIEW & PROPOSAL PROCEDURES**

### **A. INTRODUCTION/BACKGROUND**

Miami-Dade County, hereinafter referred to as the "County", is seeking proposals [also referred to as "application(s)"] from qualified community based organizations to provide community based services in the areas of Environmental Enhancement and Education.

The 2008-2009 Community Based Organization (CBO) Grant Program Request For Proposal (RFP) format is designed to establish a standard procedure for the screening, evaluation and allocation of County funds to qualified community based organizations.

### **B. ELIGIBILITY**

- ◆ Proposers must be legally incorporated as not-for-profit organizations, with a designated tax-exempt status determined by the United States Internal Revenue Service, *at the time of proposal submission. Universities, public schools and other governmental entities will not be considered.*

### **C. PROJECT PROPOSAL RESTRICTIONS**

- ◆ Project activities which receive funding through this RFP must take place within the County's fiscal year (October 1, 2008 - September 30, 2009). A CBO grant award carries no commitment for future County support beyond this time period and scope of the project.
- ◆ All proposed activities must take place in Miami-Dade County and benefit Miami-Dade County residents.
- ◆ Due to the limited availability of funds, one-time events will not be considered for funding.
- ◆ Grant funds cannot be used in furtherance of fundraising efforts but may be used as leverage to secure additional funding.

### **DEFINITIONS**

Environmental Justice- The fair treatment of people of all races, cultures, and income with respect to the development, implementation, and enforcement of environmental laws, regulations, programs, and policies. Fair treatment means that no racial, ethnic, or socioeconomic group should bear a disproportionate share of the environmental consequences resulting from the operation of industrial, municipal, and commercial enterprises and from the execution of federal, state, local and tribal programs and policies.

Pollution Prevention- The reduction or elimination of pollutants through source reduction, increased efficiency in the use of raw materials, energy, water, or other resources; or the protection of natural resources by conservation. Pollution prevention measures reduce the amount of pollutants released into the environment prior to recycling, treatment and disposal.

Environmental Education- The increase of public awareness and knowledge about environmental issues; providing the public with the skills needed to make informed decisions and take responsible actions; enhancing critical-thinking, problem-solving, and effective decision-making skills, teaching individuals to weigh various sides of an environmental issue to make informed and responsible decisions. It does not advocate a particular viewpoint or course of action.

Sustainable Development- Integrating environmental protection, and community and economic goals. It meets the needs of the present generation without compromising the ability of future generations to meet their own needs. The sustainable development approach seeks to encourage broad-based community participation and public and private investment in decisions and activities that define a community's environmental and economic future and community well being.

Ecosystem Management- An integrated flexible approach to management of Florida's biological and physical environments conducted through the use of tools such as planning, land acquisition, environmental education, regulation, economic incentives and pollution prevention designed to maintain, protect and improve, the state's natural, managed and human ecosystems.
