The awarded contractor will supply and deliver, in metered trucks, gasoline and diesel fuel on an as needed basis. The vendor will be utilizing a subcontractor to provide the services; but the fixed service adder charged by the recommended vendor is approximately 50 percent lower than the adder being charged by the incumbent vendor.

The petroleum industry experienced unprecedented price increases and volatility over the past few years. These unforeseen increases have negatively impacted the funding allocations on contracts for services or products that are petroleum industry-dependent. The funding allocations on this solicitation have been adjusted to provide for price fluctuations similar to those experienced in the past years. These adjustments are based on the average price increases experienced over the past three years.

The Small Business Enterprise Bid Preference and the Local Preference were applied in accordance with the applicable ordinances. This contract will replace existing Contract No. M7594-3/08-3, which expires on June 30, 2008.

ESTIMATED CONTRACT COMMENCEMENT DATE: Upon approval by the Board of County Commissioners and expiration of the Mayoral veto period.

BACKGROUND

This contract will provide mechanical integrity testing of deep injection wells and associated services for WASD. The monitoring wells will also be examined to ensure that their structural and operational integrity are in compliance with State of Florida (State) requirements. These tests and associated services must be conducted and completed within a specified time frame every five years.

Previously, these services were obtained from a consulting services contract administered by the Office of Capital Improvements. The previous tests were completed in one year under Contract No. S-776, which expired on July 7, 2004. WASD's interpretation of the State requirements led them to believe that no further compliance testing was required until 2009. After seeking clarification, the Florida Department of Environmental Protection (FDEP) has provided WASD with an official interpretation of the regulations which require mechanical integrity testing of as many as seven of the 21 injection wells during this fiscal year. Additional wells must also be tested based on time frames contained in the contract specifications and terms. WASD will be subject to fines if the integrity tests are not performed within these required time frames.

The solicitation was advertised with a five-year term due to WASD's previous understanding that it would have five years to complete testing. After receiving clarification from FDEP, the contractor must complete testing within one year, or by April 13, 2009. Upon completion and acceptance of the project by WASD, the County may terminate the contract per Section 1, Paragraph 1.22.
