

Memorandum

Date: March 3, 2009

To: Honorable Chairman Dennis C. Moss and Members,
Board of County Commissioners

Agenda Item No.8(D)(1)(H)

From: George M. Burgess
County Manager

Subject: Resolution Authorizing Execution of Joint Funding Agreement No. 09E0FL208017 for Water Resources Investigations with the US Geological Survey

Recommendation

It is recommended that the Board approve the attached resolution authorizing the execution of Joint Funding Agreement (No. 09E0FL208017) between Miami-Dade County (County) and the US Geological Survey (USGS) for Water Resources Investigations for FY09.

Scope

The water level recording stations are operated countywide.

Fiscal Impact/Funding Source

The fiscal impact to the County for this JFA is \$682,037 to be funded between the Department of Environmental Resources Management (DERM) for \$250,650 and the Water and Sewer Department (WASD) for \$431,387. The USGS will match \$108,929 toward the total estimated project cost of \$790,966.

Track Record/Monitor

The Director of the Department of Environmental Resources Management (DERM) will monitor this contract.

Background

Through Joint Funding Agreement (No. 09E0FL208017), the USGS will provide services for continuing equipment maintenance and data collection related to groundwater elevations and saltwater intrusion. These services are needed by the County to conduct County stormwater management/modeling, to support infrastructure development, to perform environmental restoration/protection activities and to comply with WASD permit requirements. County records indicate that the County has contracted with the USGS for these services and related services since at least the 1950s. The USGS is a federal agency that is regarded as the national expert in the field of groundwater studies.

The services funded by DERM include: (1) the operation and maintenance of 40 water level recording stations, one canal stage meter and flow Doppler instrumentation and the related data reporting (\$215,595) and (2) the monitoring and maintenance of 26 saltwater interface monitoring stations (\$35,055). The services funded by WASD include the operation and maintenance of 24 water level and 18 saltwater interface monitoring stations, the operation and maintenance of five Doppler instruments and one rain gauge, the installation of additional water level/saltwater monitoring stations and satellite data platforms and the collection of additional data during droughts (\$431,387).

This agreement becomes effective upon execution and will terminate on September 30, 2009.
