EXPLANATION: This project was advertised as an Invitation to Bid on June 25, 2009. Twelve (12) bids were received and opened on July 27, 2009. The bids were reviewed for contract and DBE compliance and a bid tabulation was prepared by CSA Group, Inc., the consulting engineer. The low bidder offered a bid of $4,038,929.32, which is 49.5% under the Engineer's Estimate of $8,000,000.00. The second low bidder offered $4,513,713.71 which is 11.8% higher than the low bidder. The third low bidder was 5.5% above the second low bidder. According to the Engineer of Record, the rather significant difference in price from the Engineer's estimate is due to the extreme economic condition presently affecting pricing of construction worldwide (see letter attached). As a result of the analysis performed, H&R Paving, Inc., was deemed the lowest responsive and responsible bidder and is recommended for award.

BACKGROUND:

TMB is one of the designated general aviation relievers to Miami International Airport and one of the busiest general aviation airports in South Florida. Currently, aircraft using this airport are limited in their takeoff weight due to the current runway length, thus preventing them from departing with a full allotment of aviation fuel, cargo capacity, or both. This proposed increase in runway length will allow aircraft to increase their fuel and/or cargo load and allow them to arrive at destinations and markets that are currently unattainable without first having to land and refuel at other airports. This project includes the extension of Runway 9R-27L from 5,002 x 150 feet to 6,002 x 150 feet and also the extension of the 50 foot wide asphaltic parallel Taxiway "E" Echo. Other related work shall include required airfield signage and runway & taxiway pavement markings, Medium Intensity Taxiway Lights (MITL), High Intensity Runway Edge Lights (HIRL), and the relocation of all visual and electronic NAVAIDS including replacing the existing Precision Approach Path Indicators (PAPIs) with a Visual Approach Slope Indicator (VASI), the Localizer, Glide Slope and the Runway Medium Intensity Approach Lighting System with Runway Alignment Indicator Lights (MALSR).

RE: AWARD LETTER
Tamiami Airport Runway 9R/27L Extension

Bid Analysis and Recommendation for Award

CSA Group has completed the bid analysis and recommendation for award. Enclosed you will find the Bid Tabulation Summary, Bid Tabulation Analysis and Bid Envelopes.

The enclosed documentation shows the lowest bid to be from H & R Paving Inc. in the amount of $4,452,919.58. This represents a cost of approximately 46% below the Engineer's estimate of $9,658,254.41. The bids ranged from $4,452,919.58 to $6,987,652.61

The comparison of bid item unit prices provides information on the lowest, highest and average prices for each item along with the Engineer's estimate price for each bid item. The tabulation analysis shows the bid item unit prices and totals as submitted by the contractors. The bid amounts are verified by multiplying the unit quantities by the item unit prices provided by the contractors. A few discrepancies were found in the bid amounts, and they ranged from $ 0.60 to $ 10,800.00. However, the $ 0.60 discrepancy was with the low bidder. The rather significant difference in price from the Engineer's estimate is due to the extreme economic conditions presently affecting pricing of construction worldwide.

The bid tabulation summary provided a checklist of all required documents for each bid. H & R paving included all the required forms with their bid. Lemartec Engineering failed to submit Letters of Intent from their DBE subcontractors and therefore is considered non responsive.

Based upon the bid analysis CSA Group recommends the award of the contract to the lowest responsive bidder, H & R Paving, Inc.

Respectfully Submitted,
CSA Group

Juan M. Villar P.E.
Project Manager

TRADE RESTRICTION CLAUSE

Pursuant to 49 CFR, Part 30.13, FAA Order 5100.38, the Entity, by submission of a bid an offer and/or execution of a contract, certifies that it:

a. is not owned or controlled by one or more citizens of a foreign country included in the list of countries that discriminate against U.S. firms published by the Office of the United States Trade Representative (USTR);

If the contractor knowingly procures or subcontracts for the supply of any product or service of a foreign country on said list for use on the project, the Federal Aviation Administration may direct through the Sponsor cancellation of the contract at no cost to the Government.

Further, the contractor agrees that, if awarded a contract resulting from this solicitation, it will incorporate this provision for certification without modification in each contract and in all lower tier subcontracts. The contractor may rely on the certification of a prospective subcontractor unless it has knowledge that the certification is erroneous.

The contractor shall provide immediate written notice to the sponsor if the contractor learns that its certification or that of a subcontractor was erroneous when submitted or has become erroneous by reason of changed circumstances. Dear Julio Nieto:

Small Business Development (SBD) has completed the review of your application and attachments submitted for certification. Your firm is officially certified as a Disadvantaged Business Enterprise (DBE) in the categories listed below.

While DBE certification qualifies your firm to bid and participate on projects with DBE participation requirements, please note that this certification does not allow you to participate on projects with Community Small Business Enterprise (CSBE), Small Business Enterprise (SBE) and/or Community Business Enterprise (CBE) requirements unless you are specifically certified for these programs.

Your DBE certification requires you complete a Continuing Eligibility Form annually. To ensure timely processing, please complete the Continuing Eligibility Form available at http://www.miamidade.gov/sba/forms.asp and return it along with supporting documentation by the anniversary date. A hard copy is available upon request and may be sent to you via mail or facsimile. Failure to complete the required form subjects your firm to removal from the Flodda DBE Unified Certification Directory.

If any changes occur within your company during the certified period (such as ownership, address, telephone number, trade category, licensing, technical certification, bonding capacity, or if the business ceases to exist) you are required to notify this department in writing, immediately. It is of critical importance that the current information regarding your company be updated. All inquiries or changes related to this certification should be directed to the SBD Certification Unit.

Should you have questions regarding your firm's certification, please contact the Certification Unit at SBDcert@miamidade.gov or call (305)375-3111.

We look forward to your participation and success in Miami-Dade County's small and/or disadvantaged business programs.

Sincerely,

Penelope Townsley, Director
Small Business Development

- *According to CSA Group, the consulting engineer, in a letter dated July 31, 2009, "The rather significant difference in price from the Engineer's estimate is due to the extreme economic conditions presently affecting pricing of construction worldwide.*
- *Additionally, MDAD received a letter dated January 11, 2010, from Berkley Regional Insurance Company, as surety consenting and acknowledging to MDAD, the validity of the captioned bid bond extended to April 22, 1010.*

Background

Relevant Legislation

At the December 4, 2009, Airport and Seaport Committee meeting a resolution was passed approving the First Amendment to the Professional Services Agreement (PSA) between Miami-Dade County and Brown & Brown Architects, and will be placed on the January 21, 2010, Board of County Commissioners Meeting Agenda for consideration.

Brown & Brown Architects, designed the extension of the TMB Runway 9R-27L, Project No. L141A. MDAD has an opportunity to take advantage of available matching State funds that may be available to further improve the safety of the runway by extending it to its full permitted length.
