

Memorandum

Date: September 10, 2010

To: Honorable Chairman Dennis C. Moss and Members,
Board of County Commissioners

From: George M. Burgess
County Manager

Agenda Item No. 8(D)(1)(A)

Subject: Resolution Approving the Environmentally Endangered Lands Acquisition List with One Addition to the List

Recommendation

It is recommended that the Board adopt the attached resolution approving the Environmentally Endangered Lands (EEL) Acquisition List with one addition to the list. The Wink Eye Slough Addition will be added to the existing South Dade Wetlands Project. This recommendation was unanimously approved by the Land Acquisition Selection Committee at their May 25, 2010 public hearing.

Scope

The EEL Program is countywide in nature. The parcels of the Wink Eye Slough Addition are located in Commission District 9.

Fiscal Impact/Funding Source

This resolution has no fiscal impact. Future purchases of any parcels within the Wink Eye Slough Addition would require Board approval. As of May 31, 2010, the balance of the EEL Trust Fund (Subfund 081, Project Numbers 081005/-6/-7/-8) is \$58,940,189 of which \$26,549,596 is reserved for acquisition and \$32,390,593 is reserved for management.

Track Record/Monitor

Not Applicable.

Background

On May 25, 2010, the Land Acquisition Selection Committee unanimously approved the recommendation to add the Wink Eye Slough Addition to the EEL Acquisition List. Containing 16 parcels on 57 acres, the Wink Eye Slough Addition is proposed to be added to the South Dade Wetlands Project on the EEL Priority A List (see Attachments A and B). The natural areas of these parcels consist of seasonally flooded freshwater and marl prairie wetlands, including sawgrass, native shrubs and some exotic species. Sixty four plant species have been identified to date within the Wink Eye Slough Addition, including four listed by the State of Florida as protected and another four listed by either the Florida Natural Areas Inventory or the Institute for Regional Conservation as imperiled or rare. Over 89% of the identified vegetative species are native. The addition of these lands to the EEL list would further protect the historic slough that connects to other EEL lands in the South Dade Wetlands Project and would continue to provide habitat and ecological corridors for protected animal species.

The South Dade Wetlands Project area contains an important wetland system in the southern part of the County. Land in this area is targeted for acquisition because of its strategic location between two national parks (Everglades National Park and Biscayne National Park) within the watersheds of Florida Bay, Biscayne Bay, Card Sound and Barnes Sound. Preserving and maintaining these wetlands is important for protecting against saltwater intrusion of the Biscayne Aquifer and because of the importance of the region to endangered and threatened species.
