## Insurance Requirements for Cartage Companies

All cartage companies doing business at the Port of Miami must provide the Permit Section with a list of insured drivers and vehicles on a monthly basis due by the last County business day of each calendar month. Failure to provide the requested information will result in the suspension of the permit until the information is received.

By the conclusion of each month, either the insurance company issuing the policy or the managing general agent for the insurance company issuing the policy must provide the Port of Miami with an ACORD certificate of insurance evidencing at least \$1,000,000 in vehicle liability insurance coverage and a list of the tractors (year, make, and 17-digit vehicle identification number) that are covered under the policy. If the insurance company's managing general agent provides the requested information, the managing general agent must also provide a notarized letter signed by an authorized officer of the insurance company issuing the policy identifying the managing general agent and confirming that the managing general agent has the insurance company's authority to provide the information requested by the Port of Miami.

Information submitted by the insurance company and/or the managing general agent concerning the number of insured drivers will be compared to the Port's identification system as to the number of issued Port ID cards. Discrepancies will result in a suspension of the permit which will be effective two (2) business days after identification and notice of the discrepancy is provided to the permit holder and such discrepancy is not remedied within those two (2) business days. The permit shall remain suspended until such time the insurance coverage is sufficient and certified by the insurance company and/or the managing general agent. Discrepancies identified on Fridays or during holiday time off will receive special consideration.

In the case of any discrepancies not cured within two (2) business days, or in the event a permit holder has a discrepancy more than twice in a fiscal year, a fine of \$3,000 will be assessed for the first violation. The second violation will result in the revocation of the permit.

A cartage company's failure to report a change in an employee's work status (termination) within 7 days after the change may result in revocation of the Port of Miami business permit.

Reactivation and addition of any cartage company's drivers will be granted only if confirmation is received from the Permit Section verifying that the cartage company is in compliance with the insurance requirements.

**Re:** Miami International Airport  
Non-terminal Rental Rates  
October 1, 2011 – September 30, 2012

Dear Mr. Abreu:

Pursuant to Resolution No. R-34-03, we are submitting a summary of our conclusions for:

- 1) Land Rental Rates
- 2) Paving Rates
- 3) Building Rental Rates

**Waronker & Rosen, Inc. (formerly as part of Quinlivan /Waronker Joint Venture)** has been preparing the annual rental rate report on the non-terminal properties at Miami International Airport since 1994. For the preparation of these annual reports, the following steps have been taken:

- Inspected non-terminal buildings at Miami International Airport in order to determine the condition of the buildings.
- Gathered and analyzed land sales in the areas surrounding Miami International Airport and derived appropriate rates of return on land value from various sources.
- Personally inspected non-terminal properties at major hub airports in the United States and interviewed property managers regarding land rental rates and non-terminal building rates at these airports.

Mr. Jose Abreu, Director  
Miami-Dade Aviation Department  
September 6, 2011

- Gathered and analyzed building rental rates in the areas surrounding Miami International Airport. The findings indicate there is a direct relationship between office building rental rates at Miami International Airport and the nearby off-airport office buildings rental rates and there is no particular advantage for office tenants being on the airport.
- Gathered and analyzed warehouse rental rates in the Airport West market area, just west of Miami International Airport as well as surrounding industrial markets. Results indicated there is a relationship between off-airport warehouse rental rates and cargo/warehouse rental rates on-airport. The security, minimum truck transportation and/or the ability to bring an aircraft to a cargo building are benefits of being on-airport. Therefore, on-airport cargo/warehouse buildings command a rental premium. This relationship between on-airport cargo rates and off-airport warehouse rates has been examined at other airports.

The market rental rates are based on the data, analyses and conclusions within a report that is available for review in our office.

Market rent is defined as the rental income that a property would most probably command in the open market indicated by the current rents paid for comparable space as of the date of the appraisal.

After analyzing land sales surrounding Miami International Airport and land rental rates at comparable airports the following was considered in the conclusion of market land rates;

- 1) Subject land will be limited to airport and aviation purposes.
- 2) No assignment of leasehold without approval of the County.
- 3) No subordination permitted on said leasehold.
- 4) The General Use Master Plan.

After due study and investigation and taking all factors into consideration which apply to the area leased within the confines of Miami International Airport, it is our opinion that the market rent of the land, as of this date, is as reported on the sheet captioned "Land Rental Rates" (page four).

The real estate market over the past year has been stable with some and this is reflected in there being no increase in the land rates. There has been some modification of the off airport land rates. No rates were increased for any of the buildings, except for the test cell buildings (Buildings 703 and 703A) based on current economic conditions with regard to the aviation industry and to the general economy.

Jose Abreu, Director  
Miami-Dade Aviation Department  
September 6, 2011

In estimating the building rental rates, each building structure has been inspected, cargo/warehouse and office rentals in the area were reviewed, building rental rates at comparable airports were reviewed and developers/investors of airport cargo buildings were interviewed. All of the above comparable rental information is contained within the *Self-Contained Appraisal Report* which is retained in the appraisers' office.

In addition to the comparable building rental information, also considered was the following:

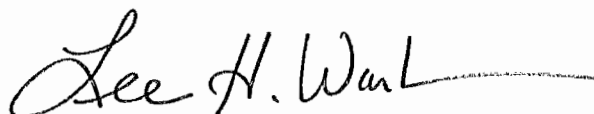

- 1) Use, occupancy and utility of subject improvements.
- 2) Condition and building life expectancy of said improvements.
- 3) Demand for such facilities at the airport.
- 4) Replacement cost estimate less depreciation.
- 5) No assignment of leasehold without approval of the County.
- 6) No subordination permitted on said leasehold.

The rental rates estimated herein presume that the building spaces are in rentable condition and are in compliance with life safety standards which are typical requirements of the landlord (MIA). Assumed is that the buildings have completed their 40 year recertification which is required by Miami-Dade County. Some buildings and building spaces at Miami International Airport are unoccupied and not in rentable condition. If the tenant decides to expend the cost to bring the building or building space into a rentable condition, the tenant should receive a rent credit at least equal to the amortization of the tenant's expenditure over the term of the lease.

The estimated market rents consider that the tenant is responsible for land rental, all utilities, and interior maintenance, except where noted.

Respectfully submitted,

Very truly yours,

Lee H. Waronker, MAI, SRA
