

Memorandum

MIAMI-DADE
COUNTY

Date: February 19, 2014

To: Honorable Chairwoman Rebeca Sosa
and Members, Board of County Commissioners

Agenda Item No. 3(B)(3)

From: Carlos A. Gimenez
Mayor

Subject: Ratification of First Amendment to the Professional Services Agreement for MIA Runway 12-30 Pavement Rehabilitation with H.J. Ross Associates, Inc., increasing the Agreement amount by \$500,000.00

RECOMMENDATION

It is recommended that the Board of County Commissioners (Board) adopt the attached Resolution ratifying the actions of the County Mayor's designee, pursuant to the provisions of the Miami-Dade Aviation Department's Expedite Ordinance No. 95-64, codified as Section 2-285 of the Miami-Dade County Code, approving the First Amendment to the Professional Services Agreement (PSA) with H.J. Ross Associates, Inc. for the Miami International Airport (MIA) Runway 12-30 Pavement Rehabilitation increasing the Agreement amount by \$500,000.00 for additional aircraft parking apron design services.

SCOPE

Miami International Airport is located primarily within Chairwoman Rebeca Sosa's District Six; however, the impact of this item is countywide as MIA is a regional asset.

FISCAL IMPACT/FUNDING SOURCE

Design services for the portion of the MIA Pavement Rehabilitation of Runway 12-30, Taxiways P, Q, and R, and a common-use apron total \$4,356,319.45. Of that amount, the Federal Aviation Administration is paying \$3,267,239.60, the Florida Department of Transportation is funding \$544,539.93, and the Miami-Dade Aviation Department (MDAD) will fund the remaining \$544,539.92.

TRACK RECORD/MONITOR

Based on the County's Capital Improvements Information System, H. J. Ross Associates, Inc. has a rating of 3.7 (with 4.0 being the highest) based on six (6) evaluations for this firm. The MDAD Project Manager is Franklin Stirrup.

COMPLIANCE DATA

There is no history of violations for this firm in the County's Small Business Development database.

BACKGROUND

Pursuant to Resolution R-115-12, H. J. Ross was awarded the subject Agreement on February 7, 2012, to provide design services for MIA's Runway 12-30 and Taxiways P, Q, and R pavement rehabilitation, including but not limited to engineering design, engineering construction management, civil, electrical, and structural engineering. Services include preparing and/or generating topographic surveys, plans, contract documents, engineer's report(s), construction estimates, quality assurance/quality control, project management, and assisting the County with the bidding and award of the project, federal and state grant documentation, and work-site and work-related services during the construction phase. H.J. Ross is required to certify the as-built/record drawings and compliance of the construction to the design documents at the completion of the project.

PROJECT DESCRIPTION:

The Pavement Rehabilitation project involves MIA's Runway 12-30 and Taxiways P, Q, and R, including the upgrading of all associated utilities; pavement markings; centerline, edge, and hold bar lighting. The rehabilitation project will provide the required reliability and safety for a primary runway at MIA, mitigate recurring pavement maintenance issues, and reduce associated operational impact closures and costs.

As aircraft traffic projections at MIA increase annually, the demand for aircraft hard-stand parking positions increase as well. MDAD is currently operating the common-use aircraft hard stands within a confined 3,320-acre site at capacity. With the expansion of Concourses "D" and "J", the numbers of available aircraft hard-stands have been dramatically reduced. Accommodations have been further reduced due to increases in carrier overnight flights and cargo demands. The proposed air cargo apron on the southwest sector of the airport will provide critical relief to this aircraft hard-stand capacity issue.

Utilizing the existing H.J. Ross PSA to perform the design will provide the County with the ability to meet the federal and state grant deadlines for both the design and construction. Additionally, coupling the apron with the proposed Runway rehabilitation will capitalize on the extensive coordination and intricate maintenance of traffic developed with the Federal Aviation Administration's Air Traffic Control and stakeholders at MIA. Finally, the utilization of the common-use apron during the construction of the project will mitigate the impacts to the tenants of MIA Building 716 during the rehabilitation of Taxiway 'R'.

This PSA presents the most cost-effective manner to accomplish this work because the design and construction administration costs will be reduced by 40% to 50% of the projected budget.
