Memorandum

Date: September 4, 2007

To: Honorable Chairman Bruno A. Barreiro
and Members, Board of County Commissioners

Agenda Item No. 8(P)(1)(A)

From: George M. Burgess
County Manager

Subject: County Incentive Grant Program (CIGP) Agreement Between Miami-Dade County and the Florida Department of Transportation in the Amount of \$3,000,000 to Fund the Procurement and Installation of Hardware to Support Countywide Deployment of the Advanced Traffic Management System for 620 Traffic Signalizations within Miami-Dade County

RECOMMENDATION

It is recommended that the Board of County Commissioners (BCC) authorize the County Mayor to execute a County Incentive Grant Program (CIGP) Agreement, in substantially the form attached, with the Florida Department of Transportation (FDOT) in the amount of \$3,000,000, for the procurement and installation of hardware to support countywide deployment of the Advanced Traffic Management System for 620 traffic signalizations within Miami-Dade County.

SCOPE

This Agreement will provide funding for the procurement and installation of hardware to support countywide deployment of the Advanced Traffic Management System for 620 traffic signalizations within Miami-Dade County.

FISCAL IMPACT/FUNDING SOURCE

The total cost of this phase of the ATMS deployment is estimated to be \$3,000,000. FDOT has programmed CIGP funding for it in that amount. The County will cover any overage as required by the JPA, and will continue funding other phases of the overall project with People Transportation Plan (PTP) funds.

TRACK RECORD/MONITOR

The County will let, supervise and inspect all aspects of project construction and administration. The County shall submit quarterly invoices to FDOT's Project Manager for approval and processing.

BACKGROUND

The CIGP was created by Section 339.2817 of the Florida Statutes. Its purpose is "to provide grants to counties to improve a transportation facility which is located on the State Highway System or which relieves traffic congestion on the State Highway System". This particular phase of the long-range ATMS deployment project will result in 620 signalized intersections on major state roads throughout Miami-Dade County being transferred from the thirty-two-year-old Traffic Control System to the ATMS. All necessary hardware and software upgrades necessary for each of those intersections to operate under the control of the new system will be covered by this project.

D. If the Agreement is terminated before performance is completed, the COUNTY shall be paid only for that work satisfactorily performed for which costs can be substantiated. Such payment, however, may not exceed an amount which is the same percentage of the contract price as the amount of work satisfactorily completed is a percentage of the total work called for by this Agreement.
