The ENGINEER shall not be entitled to an increase in this Agreement sum or payment or compensation of any kind from the COUNTY or direct, indirect, consequential, impact or other costs, expenses or damages, including but not limited to costs of acceleration or inefficiency, arising because of delay, disruption, interference or hindrance from any cause whatsoever; provided, however, that this provision shall not preclude recovery or damages by the ENGINEER for hindrances or delays due solely to fraud, bad faith or active interference on the part of the COUNTY or its agents. Otherwise, the ENGINEER shall be entitled only to extensions of this Agreement time as the sole and exclusive remedy for such resulting delay, in accordance with and to the extent specifically provided below.

For the purpose of this Paragraph, force majeure shall mean an act of God which includes but is not limited to sudden, unexpected or extraordinary forces of nature such as hurricanes, floods, washouts, storms, fires, earthquakes, landslides, epidemics, explosions or other forces of nature. Inevitable accidents or occurrences shall mean those which are unpreventable by the ENGINEER and shall include but not be limited to strikes, lockouts, other industrial disturbances, wars, blockades, acts of public enemies or terrorism, insurrections, riots, federal, state, county and local governmental restraints, military action, civil disturbances, explosions, conditions in federal, state, county and local permits, bid protests, manufacturing and delivery delays, unknown or unanticipated soil, water or ground conditions and cave-ins, and contract default by the COUNTY's other consulting and design engineers and contractors. Such acts or events do not include inclement weather (except as noted above) or the acts or omissions of subconsultants, material men, suppliers, or their subcontractors, unless such acts or omissions are otherwise encompassed by the definition set forth above.

6. COMPENSATION: The COUNTY agrees to pay and the ENGINEER agrees to accept a fee representing full compensation for the performance of the services specified herein. The ENGINEER shall submit monthly invoices for all work in progress using a format and procedure provided by the Department and in accordance with the Prompt Payment Ordinance. Invoices shall be submitted within 120 days of the performance of the service being billed. The COUNTY shall not pay invoices that are not properly submitted within that period. Additionally, the COUNTY may withhold payment of any invoices from the ENGINEER if the COUNTY determines that the ENGINEER submitted and received payment of an inaccurate invoice, without limitation to any other legal or equitable remedies. Fees and other compensation will be computed in accordance with one or a combination of the methods outlined below as specified in a written task authorization:

A. Fee as a Multiple of Direct Salary Cost and Fixed Hourly Rate:

- (1) The fee for professional services rendered by the ENGINEER's employees, principals excluded, shall be computed based on the direct salary cost, as reported to the Internal Revenue Service, excluding bonuses or awards if applicable, for the time of said employee engaged directly in the work, times a negotiated multiplier of 2.85 for office employees, 2.4 for the ENGINEER's employees working in COUNTY offices and 2.1 for all field employees excluding surveying. This fee shall constitute full compensation to the ENGINEER for costs incurred in the performance of the work such as salaries, overhead, fringe benefits, operating margin and all other costs not covered by reimbursable expenses.
- (2) For personnel required to be paid overtime, compensation for overtime work considered necessary and authorized in advance by the Director shall be computed with a multiplier of 1.1 times the overtime rate and number of hours ( 1.1 x overtime rate x number of hours). Principals shall not receive additional compensation for performance of overtime work
- (3) The ENGINEER shall be compensated at the flat rate of \$125.00 per hour for the time of a Principal engaged directly in the work. This rate shall not be subject to the negotiated multiplier.

B. Lump Sum Fee: The fee for any requested portion of work may, at the option of the DEPARTMENT, be a lump sum mutually agreed upon by the COUNTY and the ENGINEER and stated in the written authorization to proceed.

C. Reimbursable Expenses: The ENGINEER may be compensated for certain work related expenditures not covered by fees for engineering services, provided such expenditures are previously authorized by the Director or his designee in writing. Reimbursable expenses may include:

- 1) Expenses for laboratory tasks and analyses, permitting fees, printing and reproduction costs, rental or purchase of specialized equipment and instruments necessary for the efficient performance of the work, provided that such equipment and instruments become the property of the COUNTY upon work completion.
- 2) Expenses for travel, except that ENGINEER shall claim no more in expenses for travel, transportation, and subsistence than would be allowed an "authorized person" pursuant to the terms of Chapter 112.061, Florida Statutes and the COUNTY'S

Administrative Orders 6-1 and 6-3, as presently written or hereafter amended. No such expenses shall be approved without the prior written consent of the Director. For the purposes of this section, the principal place of business shall be considered the ENGINEER's local corporate headquarters. Failure to obtain such prior authorization shall be grounds for nonpayment of such expenses. To be compensated, the ENGINEER shall maintain accurate records in a format and procedure provided by the Department and the ENGINEER shall submit said records with their invoices.

- 3) Items not listed shall be reviewed on a case-by-case basis and shall be approved in advance by the Director or his designee
- 4) Reimbursable expenses of the ENGINEER and approved subconsultants shall be reimbursed on a direct cost basis.
- 5) The ENGINEER shall be required to submit original receipts of all reimbursable expenses

D. Maximum Compensation The total of all payments to the ENGINEER pursuant to this Agreement shall not exceed two million three hundred thousand (\$2,300,000). No minimum amount of compensation is guaranteed to the ENGINEER.

E. Contingency Allowance Accounts: Pursuant to County Code 2-8.1, an Allowance Account of 10% of the Basic Services Maximum Compensation as stated in Paragraph 6.D. above is permissible to be used by the Department for unforeseen conditions necessitating additional design. Before any extra work is begun a task authorization from the Department Director shall be given to the Engineer. The Engineer shall have no entitlement to any of these funds. The COUNTY retains all rights to these funds, may expend these funds at its sole discretion, and any funds not expended from this Contingency Allowance Account remains the property of the COUNTY.

F. Certification of Wage Rates In Accordance with Florida Statute 287.055.: The ENGINEER hereby certifies and agrees that wage rates and other factual unit costs, as submitted in support of the compensation provided in this paragraph, are accurate, complete and current as of the date of this Agreement. It is further agreed that said compensation shall be adjusted to exclude any significant costs where the COUNTY shall determine that the price of services was increased due to inaccurate, incomplete or unclear wage rates or other factual unit costs. All such compensation adjustments shall be made within one (1) year from the date of final billing or acceptance of the work by the COUNTY, whichever is later.

7. METHODS OF PAYMENT: The COUNTY agrees to make monthly or partial payments to the ENGINEER, in accordance with Prompt Payment Ordinance No. 94-40, currently in effect or as amended in the future, for all authorized work performed during the previous calendar month or other mutually agreed invoicing period. The ENGINEER is responsible to submit invoices that do not contain charges that are more than 120 days old. In the case where disallowed charges are found, the COUNTY may return the entire invoice for correction and resubmittal. The ENGINEER agrees to provide all records necessary to substantiate payment requests to the COUNTY. Payments shall be made in accordance with the following methods:

- A. Time and/or Material for Professional Fees and/or Reimbursable Expenses.
- (1) The ENGINEER shall submit the invoice in a format provided by the Department. Each invoice shall reference the particular authorization to proceed that authorized the services and shall include a status report describing work completed.
  - (2) With each invoice, the ENGINEER shall submit a "Monthly Utilization Report" form in accordance with the Department of Procurement Management, Small Business Affairs requirements. Invoices shall not be considered valid without said form.
  - (3) The amount of the invoice submitted shall be comprised of the amounts due for all services performed and reimbursable expenses incurred during the previous calendar month or other mutually agreed invoicing period to date in connection with authorized work. The amounts due for professional services and reimbursable expenses shall be calculated in accordance with Paragraph 6.A. and 6.C. hereof, respectively. Invoiced reimbursable expenses must be substantiated by original receipts and other documentation as necessary.

B. Lump Sum Fee

- (1) The ENGINEER shall submit the invoice in a format provided by the Department. Each invoice shall reference the particular task order authorization to proceed which authorized the services and shall include a status report describing work completed.
- (2) With each invoice, the ENGINEER shall submit a "Monthly Utilization Report" form in accordance with the Department of Procurement Management, Small Business Affairs requirements. Invoices shall not be considered valid without said form.
- (3) The amount due on the invoice shall be calculated by applying the percentage of the total work completed to date to the authorized lump sum and subtracting any previous billings.
- (4) Payments shall be calculated on a percentage of work completed.

OCI Contract No. 07MWA006

Project No. E07-WASD-03

Work Order No. 1

---

## PROJECT BACKGROUND

Under the Agreement for OCI Contract No. 07MWA006, the Miami Dade Water and Sewer Department (Department) has requested that MWH Americas, Inc. (MWH) perform Work Order No. 1 for the Central District Wastewater Treatment Plant (CDWWTP) Water Reclamation Facility, defined as the "PLANT". The objective of this Work Order No. 1 will be to gather existing documentation, perform Regulatory and practical reviews, confirm the initial size of the PLANT, recommend preferred treatment, storage and transfer options and to draft a report summarizing the above.

The South Florida Water Management District has designated the County as a "critical water supply problem area". In discussions between the District and the Department about the renewal application for the consumptive use permit, the District required identification of alternative sources of water to offset additional demands from growth in the County. This Work Order will provide the initial sizing of the approximately 1 MGD reuse facility at the Central District Wastewater Treatment Plant.

The anticipated duration of Work Order No. 1 is twelve weeks from the Notice to Proceed.

The scope for this task order will be performed for a lump sum fee of \$154,300.00.

## SCOPE OF SERVICES

### TASK 1 Preliminary Work Plan and Schedule

MWH will prepare a Preliminary Work Plan for executing the project. The Work Plan will be based on Project Management Institute guidelines and will include the following:

- Description of the project understanding including project background, objective, and a list of existing documents pertaining to the project
- Work Breakdown Structure identifying and defining the required tasks to complete the project
- List of Project Deliverables to establish formal elements of interaction with the Client
- Project Schedule with critical path and milestones identified. If the Department has developed and implemented its Proliance Project Management Tool, MWH will incorporate its progress reporting into the format compatible within Proliance.
- Organization Chart defining roles and responsibilities of project team members
- Quality Control Plan outlining procedures for quality control and assurance for each deliverable
- Communication Plan establishing the channels of communication between MWH, the Department, sub-consultants, permitting agencies, and other pertinent agencies.

#### DELIVERABLES:

- 1) Draft Preliminary Workplan

### TASK 2 Kick-off and Progress Meetings

MWH will prepare for and attend three (3) project meetings with the Department.

#### *Subtask 2.1: Kick-off meeting*

MWH will prepare for and attend the initial kick-off meeting with representatives from the Department. The purpose of this meeting will be to confirm the project objectives of Work Order No. 1, review the Draft Preliminary Work Plan, and to review the list of background data to be provided by the Department. An anticipated list of documents to be provided is presented below:

- 1) Record drawings

- 2) Operational Permits, permit warnings, and/or violations issued by regulatory agencies for the CDWWTP
- 3) Geotechnical reports, boundary and topographical surveys and other available information of the CDWWTP site
- 4) Department design criteria and standards
- 5) Other reports, evaluations and studies regarding the PLANT.

**DELIVERABLES:**

- 1) Kick-off Meeting Agenda
- 2) Kick-off Meeting Minutes which includes action items and assignments listing.

Subtask 2.2: Progress Meeting

MWH will prepare for and attend one (1) progress meeting with representatives from the Department. The purpose of this meeting will be to discuss the project progress, current budget and schedule status, and any project issues requiring discussion or resolution.

**DELIVERABLES:**

- 1) Progress Meeting Agenda
- 2) Progress Meeting Minutes which includes action items and assignments listing.

Subtask 2.3: Project Completion Meeting

MWH will prepare for and attend one (1) project completion meeting with representatives from the Department. The purpose of this meeting will be to discuss and agree upon the recommendations from the technical memorandums and report.

**DELIVERABLES:**

- 1) Completion Meeting Agenda
- 2) Completion Meeting Minutes

**TASK 3      Review of Existing Information and Site Visit**

MWH will review the existing information provided by the Department and perform one site visit and meeting with CDWWTP operating personnel. This information shall include but not be limited to the Reuse Feasibility Study, the CDWWTP Operations permits, CDWWTP influent and effluent water quality, and the Wastewater Facilities Master Plan. Specific attention will be given to the characterization of the variations in CDWWTP influent and effluent water quality to better understand operational challenges in designing the PLANT. A data gap analysis will be performed to identify additional data information needs and conflicting information. MWH will prepare for and attend a minimum of one (1) meeting with the Wastewater Master Plan consultant to discuss the future CDWWTP layout and the available area for the PLANT. A Technical Memorandum briefly summarizing the information compiled and reviewed will be developed.

**DELIVERABLES:**

- 1) Technical Memorandum

**TASK 4      Regulatory and Practical Reviews**

MWH will perform a regulatory review of current and proposed rules regarding the project. MWH will identify and evaluate potential implications to the project (e.g. metering requirements, cross-connection

control). Chapter 62-610 FAC will be reviewed and a summary will be provide of rules pertaining to public access areas, residential irrigation.

MWH will perform a literature review and local experts will be contacted to establish the tolerances of vegetation grown in areas to receive reclaimed water to constituents contained in the water as well as any requirements for blending.

The required quality of irrigation water for specific end users will be evaluated with attention given to different water quality requirements for different crops and to the acceptable maximum limits and variation in range of certain water quality parameters still allowing for crop vitality. An evaluation of potential affects of the reclaimed water on the soils to which it will be applied will also be included in order to demonstrate that the reclaimed water can be applied in an acceptable manner and will not harm the vegetation or impair the soil's ability to absorb and contain the reclaimed water on-site. Limitations on total dissolved solids, chlorides, and sodium adsorption ratio will be established (62-610.865 FAC).

**DELIVERABLES:**

- 1) Technical Memorandum

**TASK 5 Confirmation of Initial and Future Plant Capacity**

MWH will confirm the initial plant size by verifying the commitment and demand requirements by surveying users identified in the Wastewater Facilities Master Plan. The survey includes telephone calls to the Facilities Masterplan consultant, the Village of Key Biscayne, WASD staff, Miami Dade Parks and Recreation and other potential customers along Crandon Blvd. Definition is required for the following issues:

- Reclaimed water quantity needs, as peak and annual average flows, typical daily cycle and anticipated future trends
- Required reclaimed water quality
- Required delivery pressure
- Security of supply
- Outline Terms of Reclaimed Water Supply

**DELIVERABLES:**

- 1) Technical Memorandum

**TASK 6 Evaluations of Reuse Storage and Piping**

Following the confirmation of the initial and future size of the reuse facility and determination of the demand patterns of the major customers, MWH will review options to determine size and location of reclaimed water storage facilities. Dependent upon the required security of supply, additional storage facilities may be required at the customer facility. A decision will be made on the redundancy requirement of the treatment processes.

Delivery pipeline routing options will also be reviewed to transfer reclaimed water from the reuse facility to the customers. This will be based on GIS mapping supported by fact-finding inspections.

**DELIVERABLES:**

- 1) Technical Memorandum

**TASK 7 Review of Treatment Options for Initial Approximately 1mgd PLANT**

**OCI Contract No. 07MWA006**  
**Project No. E07-WASD-03**  
**Work Order No. 1**

---

MWH will review available treatment options to meet the reclaimed water requirements. This will include evaluation of micro-filtration (MF) for suspended solids removal and reverse osmosis (RO) for salinity reduction. Other potential processes will also be briefly discussed to present quantitative and non-quantitative comparison criteria and to enable transparent decision taken. Attention will be given to the different sub-options for MF, such as ultra-filtration (UF) as alternative to MF, pressurized versus submerged and a description of the different membrane vendors, including an initial discussion on potential options for membrane procurement. A summary of the preferred treatment process will be provided, including the major process design criteria.

**DELIVERABLES:**

- 1) Technical Memorandum

**TASK 8 Final Report**

MWH will prepare a report summarizing the above findings. A preliminary site plan and process flow diagram of the recommended options will be provided.

**DELIVERABLES:**

- 1) Report

**ASSUMPTIONS**

1. Department will provide existing background information to MWH in electronic, native-file or \*.PDF format and one reproducible copy.
2. MWH will provide the Department with six copies of draft and final documents and one electronic version in \*.PDF on CD for TM and Report deliverables.
3. Department PM will provide consolidated staff review comments to the MWH PM within 5 working days of receipt of the TM and Report deliverables in order to complete the completed work order within the scheduled 90 days.
4. MWH will produce draft meeting minutes within 3 working days of each meeting. MWH will allow 2 working days for receipt of comments from all attendees before proceeding to issue final meeting minutes.
