

# Memorandum

**Date:** May 20, 2008

**To:** Honorable Chairman Bruno A. Barreiro  
and Members, Board of County Commissioners

Agenda Item No. 9(A)(1)

**From:** George M. Burgess  
County Manager

**Resolution No. R-587-08**

**Subject:** Resolution establishing new voting precincts and revising existing voting precincts

## Recommendation

It is recommended that the Board approve the attached resolution establishing new voting precincts and revising existing voting precincts. The provisions of this resolution allow for the alignment of new precinct lines, resulting from the division of fifteen (15) existing voting precincts into one additional voting precinct each. This will create a more equitable distribution of voters in these precincts that due to growth in the area has outgrown their existing voting locations. The Elections Department has reviewed the precincts in preparation for the August 26, 2008 Primary Election and the November 4, 2008 Presidential General Election. It is recommended that the new precincts be approved in order to provide the voters in the respective areas a polling location that will be able to adequately accommodate them.

## Scope

The new voting precincts and revised existing voting precincts are located within the boundaries of Board of County Commission (BCC) Districts 1, 8, 9, 10, 11, 12 and 13 as follows:

**Fiscal Impact/Funding Source**

The fifteen additional voting precincts would incur a potential increased cost of \$40,000 in additional facility rental fees, polling place staffing, and sending new Voter Information Cards for all affected registered voters. The prospective fiscal impact would be funded through the Elections Department general fund budget.

**Track Record/Monitor**

The Elections Department will manage this process.

**Background**

Section 101.001(1), Florida Statutes, provides that "the Board of County Commissioners in each county, upon recommendation and approval of the Supervisor of Elections, shall alter or create precincts for voting in the County. Each precinct shall be numbered and, as much as practicable, composed of contiguous and compact areas. The supervisor shall designate a polling place at a suitable location within each precinct."

A review was conducted to identify existing voting precincts countywide that had surpassed its natural capacity in terms of an increased number of registered voters or limited facilities. In doing so, the criteria set forth included the identification of existing voting precincts whose registered voters had outgrown the natural capacity in terms of square footage and/or parking conditions as provided by the polling location. Once the voting precincts were identified, alternate locations were canvassed to provide to divide the existing voting precincts into two equally distributed voting precincts following existing major street and/or roadway lines whenever possible.

Upon approval, the proposed resolution will divide the existing fifteen (15) voting precincts identified into two equitably suitable voting precincts within the specified area, thereby providing more accessibility of equipment and poll workers to the voters. Exhibit A attached presents the existing voting precincts and the proposed additional voting precincts sorted by Board of County Commission District. Exhibit B attached presents the precinct maps and boundary descriptions.

New voter identification cards will be mailed to all active registered voters within the fifteen (15) voting precincts notifying them of their precinct and polling place location. The cards will also contain Congressional, State Senate, State House, County Commission, School Board district, and Community Council district numbers as well as municipal districts and political affiliation where applicable. Pursuant to federal and state laws, identification cards returned by the Post Office will be used to update the voter registration rolls.
