MDT is currently using equipment that was purchased in 1997. This equipment is beyond its useful life and most repair parts are now obsolete. There is an average annual cost of \$7,000 for the cleaning solvent used in these machines. The equipment to be leased are self contained distillers that recycle cleaning solvents and generate minimal waste products that are recycled with used motor oil. Leasing the parts washing equipment eliminates the requirement to purchase the cleaning solvent separately, resulting in an average annual savings of \$7,000.

**REASON FOR CHANGE**

Authorization is requested to modify this contract to increase the allocation to allow Miami-Dade Transit (MDT) Department to use MDT Operating Funds for to pay for additional equipment and services required for installation of the Automated Fare Collection System (AFCS). These services include unforeseen repairs of subfloor ducts and conduits, installation of Emergency Mode Open (EMO) interfaces at each rail and mover station, and programming changes to the ticket vending machines.

During the installation of the AFCS equipment at the Metrorail stations, MDT staff discovered that the condition of the underlying wiring, ducts, and conduits had deteriorated. This deterioration included defective wiring and corroded, damaged or obstructed subfloor power ducts and conduits which required repairs. Power supply equipment and cable connections were needed to activate the EMO circuit between the fare gates and fire alarm panels. This allows for the opening of the gates in an emergency situation. This work was not included in the original scope of services in the awarded contract as these conditions were not known at the time of the solicitation and award process. The contract does not include contingency funds to cure latent defects such as these.

In addition, a policy change by the Board eliminated a fifty-cent charge for EASY Tickets and this required programming changes to the ticket vending machine screen and audio instructions. "Ease of use" features including user-friendly screens, and the EASY card balance inquiry utility also require programming changes.

**Previous Contract**

- The previous contract was from July 1, 2004 to June 30, 2005 and included four, one-year OTRs through June 30, 2009. That contract had allocations from twenty-six departments including an MDT allocation.

**Questions / Comments**

According to DPM, the overage is due to the current contract being extended administratively for an additional four (4) months, from September 1 to December 31, 2009. To request an increase in the allocation was deemed unnecessary since the overage was due to the contract extension.

Item No.	Contract Term & Amount	Amount per year	Previous Contract Term & Amount	Previous Contract Amount per year

**Questions / Comments:**

**Questions / Comments:**

According to the County Manager’s memo, this contract includes a 21% increase in allocation to cover preventative maintenance which was not covered under the previous contract. Prior to this contract, light maintenance was performed by County maintenance crews.

According to DPM, the Aviation department acknowledged the need for professional comprehensive preventive maintenance to be performed by qualified technicians to avoid catastrophic failures of existing equipment and to prevent premature failures. The Aviation department requested that this provision be included in this new contract.

**Questions / Comments:**

The Public Works Department Special Taxing Districts Division utilizes this contract to purchase replacement gate cards for the various guardhouses in public right-of-ways. This contract is funded by special taxing revenue from each Special Taxing district. The funding source for the Public Works Department is amended to reflect the use of Special Assessment Funds.

In addition, the Library Department withdrew its allocation. The Miami-Dade Police Department's allocation is amended to reflect \$500,000 and the funding source for Vizcaya is Proprietary Funds. The total award is amended to \$10,404,000.

According to the County Manager's memo, in November of 2008, Johnson Controls Inc.'s performance on Contract No. MDAD-01-07 was the cause of a train crash in Terminal E-Satellite. The County is considering litigation in order to recover damages. There are no other known performance issues with this firm.
