From: George M. Burgess
County Manager

Subject: Resolution Authorizing the Acquisition of the Designated Properties Known as
Parcels 121, 821-A, 821-B and 721 for the Replacement of a 20-inch Water Main
Located in Fisherman's Channel, to be a Public Necessity

Agenda Item No. 8(P)(1)(A)

Resolution No. R-361-10

Recommendation

It is recommended that the Board of County Commissioners (BCC) approve the attached resolution which declares to be a public necessity the acquisition of Parcels 121, 821-A, 821-B and 721 for the replacement of an existing 20-inch water main installed in Fisherman's Channel. The resolution also authorizes the County Mayor or the County Mayor's designee and the County Attorney to employ appraisers, expert witnesses, obtain required environmental audits, and to take any and all appropriate actions to acquire a permanent and a temporary construction easement at values established by appraisal, by donation, purchase, or by eminent domain proceedings, including a declaration of taking as necessary for and on behalf of Miami-Dade County.

Scope

The properties to be acquired are located in Commission District 5, however, the impact of this project is countywide.

Fiscal Impact/Funding Source

The Miami-Dade County Water and Sewer Department (WASD) operating revenues will fund the right-of-way acquisition and construction for this project.

Background

WASD is managing a design-build project to replace an existing 20-inch water main installed in Fisherman's Channel. This pipeline is currently in conflict with the proposed dredging route for the Miami Harbor Federal Navigation Project. Such dredging of the channel will allow the large container vessels access to the Port of Miami in 2014.

This resolution is for the acquisition of Parcels 121, 821-A, 821-B and 721 which are required to replace the existing 20-inch water main. The water main provides water service from Port Island to Fisher Island and continues onward to Virginia Key. It will be replaced with a water main installed deeper in the Channel to avoid conflict with the proposed dredging project. After the replacement water main is constructed and put into service, the existing water main will be removed from service and permanently abandoned.
