

Date: February 1, 2011

To: Honorable Chairman Joe A. Martinez
and Members, Board of County Commissioners

Agenda Item No. 7(H)

From: George M. Burgess
County Manager

Ordinance No. 11-08

Subject: Ordinance Amending the County's Targeted Jobs Incentive Fund Program

This item was amended at the January 12, 2011 meeting of the Economic Development and Social Services Committee to: 1) adjust the bonus incentive for businesses in designated priority areas from 0.10 percent to 0.175 percent, and 2) adjust the bonus incentive for a green certified business from 0.25 percent to 0.175 percent. Both bonus incentives are equal in value.

Recommendation

It is recommended that the Board of County Commissioners (Board) approve the attached ordinance that would amend Sections 2-1252, 2-1253, 2-1254, 2-1255, 2-1256, 2-1257, 2-1258, 2-1259 and 2-1260 of the Code of Miami-Dade County, all of which are related to the County's Targeted Jobs Incentive Fund (TJIF) Program.

The TJIF Program was initially created through Ordinance 00-98 and modified through Ordinances 02-251 and 05-91. The proposed ordinance would modify and enhance the TJIF program, which is used to attract new-to-market businesses and support local business expansions, and repeals the existing sunset provision but allows businesses interested in participating in the TJIF Program to apply to The Beacon Council through September 30, 2020.

Scope

The TJIF Program is available to any business that meets the criteria set in the attached ordinance; however, a business looking to locate in a Designated Priority Area (DPA), as defined under Section 2-1252 of the Code, is eligible for a higher incentive award.

Fiscal Impact

The TJIF Program is structured so that revenues received from the TJIF project will meet or exceed incentives paid by the County. As a result, the TJIF Program has a positive, fiscal impact on the countywide general fund during the incentive payout period.

More specifically, TJIF incentives paid over a six-year period, subsequent to the capital investment of the TJIF project appearing on the tax roll, may equal up to 1.7 percent of the total real property capital investment and 1.15 percent of the tangible personal property capital investment. The TJIF project is eligible for additional incentive amounts, for both real property and tangible personal property capital investments, if it is:

1. A Miami-Dade County "green certified" business, as applicable (an additional 0.175 percent);
2. Located in a DPA (an additional 0.175 percent);
3. Located in a "green certified" building pursuant to Section 2-1258 (an additional 0.05 percent); and/or
4. Classified as having its principal business activity in the manufacturing, installation, and repair of Solar Thermal and Photovoltaic energy production or other clean energy projects (an additional 0.05 percent).

In no case will any TJIF project ever receive an actual award greater than the amount of countywide ad valorem revenues paid in. In the event that there is less capital investment, the TJIF project will only be eligible to receive a payout based on the approved percentage of the actual capital investment.

Background

On July 6, 2000, the Board adopted Ordinance 00-98 creating the TJIF Program as a local business incentive. At that time, The Beacon Council, in its capacity as Miami-Dade County's official economic development partner, and County staff developed the self-funding TJIF business initiative. The TJIF Program is available to companies from outside of the County (with the exception of those located in Palm Beach, Broward, and Monroe Counties) wishing to relocate to Miami-Dade County and to existing Miami-Dade companies that undertake a business expansion and create jobs as a result of the local expansion. The TJIF Program spurs business activity and is utilized to expand Miami-Dade County's economy.

The TJIF Program works by providing cash incentives to qualifying companies in selected industries that create new above-average paying jobs (at least 10 new jobs for both relocating and expanding businesses) and make a capital investment of at least \$3 million. Businesses that expand or relocate within the boundaries of the Enterprise Zone, Targeted Urban Areas, Brownfield areas, and Community Development Block Grant eligible areas are eligible for an additional incentive amount. All disbursements of incentive awards occur after jobs are created, capital investments are made, and after a qualifying company pays its taxes.

It is important to note that a Palm Beach, Broward or Monroe County-located company that is planning to relocate outside South Florida is eligible for the TJIF inducement program and may be solicited by The Beacon Council in an effort to retain the business in South Florida. Information regarding a company's location and/or expansion evaluation may be held confidential in accordance with Florida Statutes 288.075 and 288.1066. Any company interested in participating must submit a complete application to The Beacon Council. The Beacon Council then submits the application with its analysis and recommendation to the Mayor or the Mayor's designee. If the Mayor or the Mayor's designee concurs, County staff will prepare a Resolution for the Board's consideration, as appropriate.

The "business" of attracting and retaining businesses is dynamic and highly competitive and an effective local business incentive program such as the TJIF Program is a tool to achieve this feat. Several other local governments nationwide have relocation incentive programs. The TJIF Program is Miami-Dade County's own local business incentive program; however, from time to time, the incentives must be re-evaluated for Miami-Dade County to remain competitive in attracting new-to-market (relocating) firms, assisting existing local companies expand, and promoting job growth.

The proposed changes to the existing ordinance are designed to enhance the TJIF Program and better focus our efforts on encouraging heightened business activity from specific industries. In addition to the correction of minor scrivener's errors and the update of agency/departmental names and responsibilities, the most significant highlights and changes by Section are as follows:

Section 2-1252 - Definitions

- Allows the use of either Miami-Dade County's or the State of Florida's average annual wage figures to determine the compensation amount of each new job created by the TJIF project. This change would make the TJIF Program consistent with the State's QTI program.
- Clarifies the definition of "capital investment" to mean the amount of money a business spends on local taxable real and/or tangible personal property, limited to new construction, renovation of buildings, and new equipment.

- Removes the definition of "Economic Impact Model" as specific types of accepted econometric models are referenced in Section 2-1256.
- Removes the definition of "incremental tax revenues" and "sufficient incremental tax revenue" because the incentives are capital investment formula based rather than the amount of incremental tax revenue generated.
- Includes a definition for "new-to-market" businesses previously referred to under the old program as relocating businesses.

Section 2-1254 – Eligible Industries

- Deletes the list of 33 eligible industries under the existing program and replaces them with a consolidated list of industries that have the potential to diversify our economy and add high-value jobs. The proposed industries under Section 2-1254 include: 1) Advanced Manufacturing, 2) Aviation/Aerospace, 3) Clean Energy (i.e. such as solar photovoltaic and solar thermal energy, biofuels, smart grid technologies, energy storage, and ocean energy), 4) Financial/Professional Services, 5) Homeland Security/Defense, 6) Information Technology, 7) Life Sciences, 8) Creative Industries, 9) Global Logistics, and 10) Corporate Headquarters. Each of these industry groups are identified by their US North American Industry Classification System (NAICS) code. These specific industries were identified by Enterprise Florida, a public-private partnership serving as the State's main entity for economic development, as important industry clusters or business activities of special importance to Florida's future economic growth and development. These eligible industries were identified in Enterprise Florida's report "Roadmap to Florida's Future: 2010-2015 Strategic Plan for Economic Development."

Section 2-1255 – Program Requirements

- Continues the requirement that companies receiving TJIF incentives must pay all of its employees no less than the Living Wage Rate to remain eligible.
- Clarifies that the jobs promised under the TJIF application/agreement must pay an estimated average annual wage at least equal to the average private sector wage of the County or the statewide private sector wage. Furthermore, the proposed ordinance clarifies that only new jobs (not existing jobs) are to be included when determining the average annual wage and that only the Board, at its discretion, may waive the average annual wage requirement at the request and justification of The Beacon Council or the Mayor or the Mayor's designee.
- Specifies that both new-to-market and expanding businesses must create the minimum of ten jobs within three years of starting operations or completing the capital investment, and must maintain those jobs for at least an additional three years. This change means that expanding businesses are no longer required to create the greater of five new jobs or the equivalent of ten percent of the existing workforce at the time of application. Staff felt the current requirement on expanding businesses puts them at an unfair disadvantage, in comparison to new-to-market businesses, if the expanding business would have more than 110 employees at the time of application and therefore required to create a minimum of 11 jobs. Under the existing program, new-to-market (previously known as relocating) businesses are only required to create ten new jobs regardless of their workforce size.
- Removes reference to the Return on Investment as incentive amounts are explained further in the ordinance in Section 2-1258.
- Verification of the capital investment must be performed by County staff from various sources provided by the Company, the Tax Collector's records, or any other sources. The Company, if so requested by the County, must provide an audited financial statement to verify the final capital investment costs.
- Adds language stating that the County shall withhold incentive funds if the Company is delinquent in paying its County taxes; further adds language that the incentive award shall be cancelled, and

the Company disqualified from participating in the TJIF program, if the Company has been delinquent in paying its taxes for over one year.

Section 2-1256 – Application Process

- Extends the period for which an interested business can submit an application to The Beacon Council from September 30, 2010 to September 30, 2020.
- Continues the requirements of confidentiality in accordance with Sections 288.075 and 288.1066 of the Florida Statutes; however, the language has been clarified.
- Clarifies the language regarding any business decisions committing the company to a location in Miami-Dade County and the applicable waivers.
- Specifies that The Beacon Council shall prepare its recommendation and include an economic analysis using a professionally accepted econometric model. Currently, there is no requirement to use a professionally accepted econometric model in the preparation of an economic analysis.
- Adds language that the County's Chief Economist, at the request of The Beacon Council, the Mayor, or the Mayor's designee, can also perform an economic analysis using a professionally accepted econometric model.

Section 2-1257 – Approval Process

- Removes the TJIF Committee as an entity that can review an application recommended by The Beacon Council, but now states that County staff required to review such an application recommended by The Beacon Council must include, but is not limited to, the County's Office of Economic Development and International Trade, a representative from the Office of Strategic Business Management, and any other staff deemed necessary by the Mayor or the Mayor's designee.
- Removes reference to the Return on Investment as incentive amounts are explained further in the ordinance in Section 2-1258.

Section 2-1258 – TJIF Incentives

- Continues the requirement that a TJIF company must agree to create at least 10 jobs and make a significant amount of capital investment to receive the incentive. The number of jobs to be created will vary depending on each TJIF application/agreement.
- Adjusts the way incentives are calculated. Under the present TJIF program, the incentive amount can be calculated on the basis of either the number of jobs created or the amount of total capital investment. The TJIF award, regardless of whether it is based on the calculation of jobs created or the project's capital investment, cannot exceed more than the incremental revenues generated by the TJIF project over the same six-year payout period. The change to the TJIF program would allow for the calculation of the maximum incentive award based on a percentage of the total capital investment and not the number of jobs created. This recommendation is based on three reasons:
 1. Businesses that create a large number of jobs, but do not make a significant capital investment, cannot realize the total amount offered on a per job basis because their incentive is capped by amount of revenues generated by the capital investment.
 2. Businesses that create a large number of jobs, and also make a large capital investment, usually receive the maximum incentive award based on the capital investments and not the number of jobs created.
 3. Businesses receiving this incentive must still create the number of jobs set forth in the Board approved TJIF application/agreement even though the incentive amount is not calculated based on the number of jobs created. If a company agrees to create 25 new jobs pursuant to the TJIF application/agreement, then it must create that set number to receive the incentive award.

- Changes the TJIF incentive over the six-year period subsequent to the taxable value of the Capital Investment appearing on the tax roll, and in each year that the application/agreement is in effect, to no more than 1.7 percent of all real property capital investments and no more than 1.15 percent of all tangible personal property capital improvements plus any of the following applicable bonuses:
 1. An additional 0.175 percent if the Project is a Miami-Dade County “green certified” business.
 2. An additional 0.175 percent if the TJIF project is located within a DPA.
 3. An additional 0.05 percent if the Project is located in a “green certified” building under one of the following certification systems: a) U. S. Green Building Council Silver-level certified building under the New Construction, Core and shell, Healthcare, Retail, Commercial Interior, Retail Interior, Existing Building or equivalent applicable LEED rating, or comparable third party certification; or b) Green Globes 3 globes-level certified building under the New Construction or Continual Improvement of Existing Building rating.
 4. An additional 0.05 percent if the TJIF Project’s principal business activity is in the manufacturing, installation, and repair of Solar Thermal and Photovoltaic energy production or other clean energy products.
- Continues the following requirements under the existing TJIF Program:
 1. A company may not receive award payments of more than 25 percent of the total awards specified in the approved application/agreement in any fiscal year even if all the new jobs are created in one year.
 2. A company may not receive more than \$1.5 million in awards in any single fiscal year or more than \$2.5 million in any single fiscal year if the project is located in a DPA.
 3. A Company may not receive more than \$5 million in award payments in all fiscal years, or more than \$7.5 million if the project is located in a DPA.
- Adds language that the Board, at its discretion, may waive the applicable total award cap mentioned immediately above at the request and recommendation of The Beacon Council and the County Mayor or the County Mayor’s designee. However, in no event shall the total award exceed the amount of countywide ad valorem property taxes paid in as a result of the project.
- Continues the requirement that a company must always generate at least as much revenue as it receives in combined County incentive funds from the QTI, TJIF, and Enterprise Zone programs.

Section 2-1259 – Source, Claim Period, and Disbursement of TJIF Incentives

- Clarifies that the incentive award disbursement will begin in the County’s fiscal year following the capital investment appearing on the tax roll.
- Confirms that no incentive amounts shall be disbursed after the last year set forth in the TJIF application/agreement and the Board approved Resolution.
- Adds language that an adjustment in the taxable value of the TJIF Project’s capital investment subsequent to the submission of an application and disbursement of a TJIF award may reduce the company’s allowable incentive below the amount specified in the Board approved TJIF application/agreement. When such an event occurs, the company will reimburse the County any difference between the amount of TJIF incentive disbursed and the allowable TJIF award based on the adjusted taxable value.

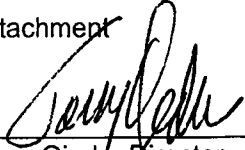

Section 2-1260 – Sunset Provision

- Deletes the sunset provision for this program. Interested companies can apply through September 30, 2020 under this proposal. This program will come to an end upon the final disbursement of incentive funds to the last business that applied by the September 30, 2020 deadline.
