Subject: Resolution approving the settlement of the lawsuit: Underground Construction Co., Inc. (UCCO) v. Marks Brothers, Inc. (MBI) and Travelers Casualty and Surety Company of America v. Miami-Dade County (MDC), Case No. 09-80275 CA 13 ("Lawsuit") in the amount of \$237,500

R-125-11

Recommendation

It is recommended that the Board approve the attached Settlement Agreement ("Settlement") of the above referenced lawsuit between Underground Construction Co., Inc. (UCCO), Marks Brothers, Inc. (MBI), and Miami-Dade County in the amount of \$237,500.

Scope

Miami International Airport (MIA) is located primarily within Commissioner Rebeca Sosa's District Six. However, the impact of this agenda item is countywide in nature as Miami International Airport is a regional asset.

Fiscal Impact/Funding Source

The fiscal impact to the County is \$237,500 and shall be paid from Aviation Revenue bonds/Construction Funds.

Background

On November 8, 2007, the County entered into a contract (the "Contract") with MBI to construct the MIA South Terminal Dual Taxiway Project (the "Project"). The scope of the Project consisted of: (1) the construction of dual Taxiways "P" and "Q" providing bi-directional access to the South Terminal Complex serving Concourse "H" and new Concourse "J", (2) relocation of the primary jet-fuel hydrant system control/isolation valve pit and installation/removal of associated jet fuel piping adjacent to the existing Concourse "H" Headhouse, (3) removal and storage of passenger loading bridges from the Concourse "H" Headhouse and repair of the building to close the openings for the removed loading bridges, (4) removal of high-mast apron lighting, (5) construction of a new 9W6 electric ductbank to Concourse "H", and (6) installation of taxiway centerline lights. The work also included airfield pavement, drainage, and other airfield infrastructure necessary to provide a functional taxiway system.

The original Contract amount was for \$11,060,426.63. On January 22, 2009 the first and only change order to the Contract was approved in the amount \$627,655 which brought the Contract amount to \$11,688,081.63. The Project was substantially completed on October 2, 2010 and the County has paid

Honorable Chairman Joe A. Martinez
and Members, Board of County Commissioner
Page No. 2

MBI a total of \$10,876,358.84 for the completed work, leaving a total of \$811,722.79 in unspent contract funds.

The Contract provided for the Project to be completed within 454 days from issuance of the Notice to Proceed. However, the Project was completed 146 days late. MBI filed claims in which it alleges that the County delayed the Project's total duration by preventing the contractor from having access to the construction site during the beginning of the work, making design changes to the layout of the double wall fuel pipe, requiring additional waterproofing for a control valve vault, and redesigning the locations of tie-ins for electric duct-banks due to conflicts with existing utilities that were not shown on the original plans. MBI also claims that it is owed direct costs as a result of these delays and as a result of other work that it claims it was not fully compensated for. Included in MBI's claim is a pass through claim from UCCO, its subcontractor on the Project, in the amount of \$369,428.80. MBI's certified claims against the County total \$1,837,795.71.

Although the County has denied these claims, it does not dispute that it did cause some delays to the Project by preventing MBI from accessing the construction site at the outset of the Project. The County also does not dispute that certain County initiated changes may have impacted the duration of certain Project tasks although the County disputes the impact of these changes on the overall contract duration. The County also does not dispute that MBI performed work, such as dewatering/treatment work, for which it has not been fully compensated.

After two mediations and considerable negotiations between the parties, the attached settlement of this lawsuit was reached and its approval is recommended as being in the best interest of the County. The County's scheduling consultant on this project and MDAD's bond engineer, HNTB, believe the proposed settlement to be a reasonable resolution of these claims.
