Subject: Resolution Authorizing the Execution of a Joint Participation Agreement between the Florida Department of Transportation and Miami-Dade County for Engineering, Surveying, and Mapping Services Related to the Environmental Protection Agency National Pollutant Discharge Elimination System Program in Miami-Dade County

Recommendation

It is recommended that the Board of County Commissioners approve the attached resolution authorizing the execution of a Joint Participation Agreement with the Florida Department of Transportation (FDOT) whereby Miami-Dade County will provide engineering, surveying, and mapping services related to the Environmental Protection Agency (EPA) National Pollutant Discharge Elimination System (NPDES) Program.

Scope

This Joint Participation Agreement is countywide in nature.

Fiscal Impact/Funding Source

This Agreement provides Miami-Dade County with a total of \$2.6 million from October 1, 2011 through September 30, 2016 for providing services to the FDOT. No matching funds are required by the County.

Track Record/Monitor

The Water Management Division of the Department of Environmental Resources Management will monitor this agreement.

Background

The EPA NPDES Program requires the FDOT to inventory, survey, and map their stormwater infrastructure. Miami-Dade County has already surveyed and mapped roadways and highways to complete a portion of the FDOT stormwater inventory and the FDOT has modeled their NPDES database after the Miami-Dade County Stormwater Utility Master Plan Program. The development of a comprehensive Stormwater Management Master Plan is required under the five (5) year NPDES Permit No. FLS000003 issued to Miami-Dade County and the FDOT as co-permittees.

Pursuant to this requirement, the FDOT previously entered into an existing agreement with Miami-Dade County that expires September 30, 2011. The FDOT has requested that the County continue to assist the FDOT's District Six office with the various activities and services including the engineering, surveying, and mapping related to the fulfillment of all NPDES permit requirements. The specific activities are outlined in the attached agreement (Attachment A, Exhibit A).

The FDOT has programmed funding for the work to be performed under this agreement and has agreed to reimburse the County for eligible costs up to a five (5) year not-to-exceed amount of \$2.6 million. The County will perform, contract, supervise and inspect all aspects of the work funded under this agreement. No matching funds are required by the County.

SCOPE OF SERVICES

The PROJECT is comprised of the following elements:

1.0 Conduct Surveys and Mapping

- 1.1 The COUNTY shall conduct surveys of those DEPARTMENT roadways where: 1) Priority #1: no design or "As-Built" plans are found; 2) Priority #2: designs are available, but no "As-Built" plans are found; Priority #3: "As-Built" plans are found, which are more than ten (10) years old; or Priority #4: previously surveyed and mapped, and need to be revisited and updated based on new improvements, as requested by the DEPARTMENT. The surveys shall be conducted through the COUNTY's established survey crews or private surveying contracts, depending on surveying crew availability. The DEPARTMENT shall be charged for the direct man-hour cost and overhead expenses of obtaining these surveys if conducted through the COUNTY or the COUNTY's cost, if the survey is done through a private survey firm.
 - 1.2 The survey shall consist of crown of the road elevation every 500 feet; catch basin grate elevation, catch basin type and dimensions, bottom of structure, incoming pipes material type, direction and origin of pipe and source upstream to next structure, invert elevation and diameter, bottom of swale and top of swale, if visible. The survey shall seek to identify the type of existing drainage system (positive, French drain, slab covered trench, etc.).
 - 1.3 The COUNTY shall coordinate all maintenance support requests with the DEPARTMENT project manager or his designee. Some types of maintenance support that may be needed during survey related activities are:
 - a) Cleaning drainage structures of soil and debris
 - b) Opening welded manholes
 - c) Maintenance of Traffic (MOT)
- The DEPARTMENT will be responsible for performing these maintenance activities.
- 1.4 The DEPARTMENT desires that the COUNTY assist the DEPARTMENT NPDES district office in conducting required inspections, monitoring, assessment, and televising of the DEPARTMENT owned facilities in accordance with the NPDES Application and Operating Permit.

13

2.0 Inspect and Clean Drainage Systems

The COUNTY shall provide contract services and management for the cleaning of selected drainage slab-covered trenches identified by the DEPARTMENT. The COUNTY shall clean the slab-covered trenches and provide reports to the DEPARTMENT. DEPARTMENT maintenance is limited to cleaning of inlet structures within ten feet of the inlet opening. This limited maintenance does not provide for cleaning of the entire length of the slab-covered trenches. Over time the capacity of the trenches are reduced from the accumulation of silt and debris from storm water and rainfall events. Periodic system maintenance is an NPDES permit requirement.

3.0 Information Technology Support

3.1 The COUNTY shall provide information technology support to the DEPARTMENT for this Agreement. The information technology support consists of hardware, software, and datasets, as detailed below:

- 3.1.1 Hardware. The COUNTY shall provide technical support for the project-related hardware (i.e., two laptops) on an as-needed basis. Services to be provided by COUNTY include, but are not limited to, laptop repair/replacement and problem troubleshooting.
- 3.1.2 Software. The COUNTY shall provide technical support for the project-related software (i.e., Arc View, Arc GIS, AutoCAD) on an as-needed basis. Services to be provided by COUNTY include, but are not limited to, license upgrades and problem troubleshooting.
- 3.1.3 Datasets. The COUNTY shall provide technical support for the project-related datasets (i.e., FDOT, DERM, and ETSD) on an as-needed basis. Services to be provided by COUNTY shall include quarterly updating of the DEPARTMENT's District VI drainage structures datasets (i.e., shape files), which are maintained by the COUNTY, and quarterly updating of selected Miami-Dade County Enterprise Technology Services Department (ETSD) shape files (e.g., aerials, GIS coverages, property) as they become available.

4.0 Illicit Discharge Inspection Program

Develop and implement an Illicit Discharge Inspection Program. The program will be based on a televising agenda to inspect requested DEPARTMENT drainage system for illicit connections, restrictions, infiltration, broken pipes and/or damaged connections, and the like.

14

5.0 Field Inspections

The COUNTY shall inspect the DEPARTMENT's facilities for NPDES compliance, sample as required, and report to the DEPARTMENT in writing, on those construction sites (permitted or none permitted) assigned for inspection by the DEPARTMENT. The DEPARTMENT inspections performed by the COUNTY shall also include permitted facilities with non-stormwater discharges to the DEPARTMENT's municipal separate storm sewer system (MS4). The DEPARTMENT will generate a list and a priority schedule for the inspections.

6.0 Quality Assurance and Quality Control

During the implementation phase of the aforementioned tasks, the survey must meet the standards and be completed in accordance with the Minimum Technical Standards for Land Surveying in the State of Florida, set forth in Chapter 5J-17 of the Florida Administrative Code.

7.0 Project Status

Project status meetings shall be conducted on an as-needed basis with representatives of the COUNTY and the DEPARTMENT.

8.0 Miscellaneous

- 8.1 The COUNTY shall record on compact discs and report any PROJECT related televised inspections.
- 8.2 The COUNTY shall request and submit a MOT plan to be approved by the DEPARTMENT, as needed.
- 8.3 The COUNTY shall provide the DEPARTMENT with Laboratory Sampling Reports, concerning the NPDES parameters, as needed.
