Memorandum

Date: January 23, 2013

To: Honorable Chairwoman Rebeca Sosa
and Members, Board of County Commissioners

From: Carlos A. Gimenez
Mayor 

Subject: Resolution Authorizing the Conveyance of Two Easements to Florida Power and Light Company for County-Owned Land Located at the North Dade Landfill at 21500 NW 47 Avenue, Miami, Florida

RECOMMENDATION

It is recommended that the Board of County Commissioners (Board) approve the attached resolution which authorizes the following:

- conveyance of a 2,130 square foot easement to Florida Power and Light Company (FPL) related to the existing overhead utility lines at the North Dade Landfill; and
- conveyance of a 12,610.89 square foot easement to FPL to service the Industrial Generating Company (INGENCO) landfill gas to electric plant being built at the North Dade Landfill.

The attached easements have been prepared by the Internal Services Department at the request of the Public Works and Waste Management Department.

SCOPE

The property is located at 21500 NW 47 Avenue, Miami, FL, in Commission District 1.

FISCAL IMPACT/FUNDING SOURCE

There is no fiscal impact to Miami-Dade County with the conveyance of the easements.

However, the resulting electrical service connection and operation of the landfill gas utilization system will be a revenue-generating operation for the County.

TRACK RECORD/MONITOR

Shannon Clark of the Internal Services Department is the Real Estate Officer for the conveyance of these easements.

DELEGATION OF AUTHORITY

This item authorizes the County Mayor or the County Mayor's designee to execute same for and on behalf of Miami-Dade County; and authorizes the County Mayor or the County Mayor's designee to exercise any and all other rights conferred therein.

BACKGROUND

The North Dade Landfill occupies approximately 270 acres of County-owned property located immediately south of the Homestead Extension of the Florida Turnpike between NW 47 and NW 57 Avenues and north of the South Florida Water Management C-1 (Snake Creek) Canal. It has been a County landfill site since the early 1950s and serves as the final disposal site for some of the Class III type waste generated in the County. Class III type waste is the State of Florida's designation for bulky, relatively inert wastes such as yard waste, furniture, trash, construction debris and similar materials. As a consequence of the landfill disposal process, the waste decomposes forming a mixture of gases containing primarily methane and carbon dioxide. The mixture is collectively

referred to as landfill gas. Landfill gas is required by environmental regulations to be controlled, which is currently done using an engineered flare (combustion chamber) in which the mixture is ignited and burned in a carefully regulated and controlled manner.

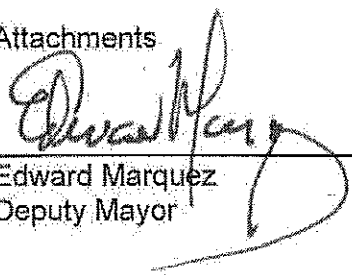

The County awarded Contract 8578 to INGENCO for the design, building, operation, and maintenance of a Landfill Gas Utilization System (LFGUS) at the North Dade Landfill that would convert landfill gas into electrical energy for sale to the electric power grid. The proposed easements are needed in order to permit the construction and future maintenance of the electric line and allow connection of an electric generating plant (LFGUS), which will use the landfill gas as a fuel for the engines to turn an electric generator and produce electric energy for export to the electric power grid. INGENCO will pay the construction costs associated with the new electric line.

Landfill gas will be reused as fuel, as opposed to simply burning off in the combustion chamber. This type of application is classified as a green energy application. The electric energy produced will be sold to the electric power grid by INGENCO. INGENCO will pay the County for the landfill gas that is used as fuel. Revenues to the County from the sale of landfill gas to INGENCO are estimated at approximately \$12,000 per month. The County will also save costs for operation and maintenance of the Flare since the LFGUS will be the landfill gas control device. There are no other economically beneficial uses of landfill gas available at this site.

The first easement request by FPL is a 12-foot wide by 144.18-foot long electric utility easement through 2,130 square feet of County-owned land located at the North Dade Landfill, which will connect the electric-generating facility to the power grid.

FPL is requiring a second easement for the existing utility service to the North Dade Landfill facility. This service has existed at the site for several decades and powers the scales, operation and maintenance buildings, the Water and Sewer Department lift station serving the site, and other related County facilities. For this easement, FPL is requesting a 12-foot wide corridor for the existing utility service, which is 1,050.91 feet long and would traverse 12,610.89 square feet of County-owned land.
