RESOLUTION NO. R-270-15

RESOLUTION SUPPORTING HB 321, SB 512, OR SIMILAR
LEGISLATION THAT COULD INCREASE HIV TESTING IN
HEALTH CARE SETTINGS

WHEREAS, human immunodeficiency virus (HIV) is an immune system virus that can lead to the fatal acquired immunodeficiency syndrome (AIDS), a condition which can be fatal; and

WHEREAS, HIV affects specific cells of the immune system and, over time, the virus can destroy so many of these cells that the body cannot fight off infections and disease; and

WHEREAS, with proper medical care, however, HIV can be controlled for many patients; and

WHEREAS, according to the United States Centers for Disease Control and Prevention (CDC), Florida has the second highest number of newly-diagnosed HIV infection cases in the country; and

WHEREAS, according to the CDC, of the Metropolitan Statistical Areas in the United States, Miami-Dade County has the seventh highest number of newly-diagnosed HIV infection cases; and

WHEREAS, currently, every person who is tested for HIV in this state must first give his or her informed consent, with certain exceptions; and

WHEREAS, in 2006, the CDC revised its recommendation for HIV testing to include opt-out HIV testing in all health-care settings and no requirement for separate written consent; and

WHEREAS, bills have been filed for consideration during the 2015 state legislative session, specifically, House Bill 321 (HB 321) by Representative Bryan Avila (R – Hialeah) and Senate Bill 512 (SB 512) by Senator Geraldine F. Thompson (D – Orlando), which would allow providers in health care settings to administer HIV tests without receiving the individual's informed consent, provided that the individual is notified and given an opportunity to opt-out of testing; and

WHEREAS, HB 321 and SB 512 provide definitions of a "health care setting" and "non-health care setting," differentiating between notification and informed consent requirements for the two settings; and

WHEREAS, under the proposed bills, for a person to be tested for HIV in a health care setting, the provider need not receive informed consent, but would have to notify the person that the HIV test is planned and advise the person that he or she has the right to decline the HIV test; and

WHEREAS, under the proposed bills, for a person to be tested for HIV in a non-health care setting, the provider would have to receive informed consent; and

WHEREAS, by allowing HIV tests to be performed in the health care setting upon notification and opportunity to opt-out without otherwise requiring informed consent; the proposed legislation could lead to increased frequency in HIV testing, thereby slowing down the rate of transmission of HIV in Miami-Dade County; and

WHEREAS, this Board wishes to strongly support HB 321 and SB 512,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MIAMI-DADE COUNTY, FLORIDA, that this Board:
