**Chair's Remarks
GOE Committee
July 11, 2007**

Item _____
Exhibit _____
Meeting _____

I want to thank the members for being here today. We have altered our usual meeting date. I know that we all spent a long day in these chambers yesterday...so I really do appreciate your being here.

I will be leaving this afternoon to go to Washington, DC to thank Senator Nelson for putting \$6.25 Million into the Water Resources Bill, and I will be asking our House Members to make sure the money stays in the Bill as it goes to Conference Committee. These funds will help us pay for a water pipeline to move reclaimed water from the Treatment Plant in South Dade to where it needs to go. Besides the proposal to Recharge the Wellfield, we also have interest from FPL to use some of the water at the Turkey Point site.

NACo has its Annual Conference later this week. The subcommittees begin meeting on Friday. I will be there as a member of NACo's Energy, Environment and Land Use Committee.

During this conference, I will be meeting with the people from King County, Washington. They are our "sister county" as members of the Chicago Climate Exchange. We will be working closely with them, to learn from their experience, and to develop policy positions that all counties can rally behind in the effort to address the problem of Global Warming.

In 1998, the board of county commissioners approved three (3) contracts for an "Energy Conservation Performance Program." These contractors agreed to identify energy conservation opportunities, pay out of their pocket to do the work, and then be reimbursed by the savings the projects generated. I know FPL was one of these companies.

This type of contract is exactly what we need in order to reduce our energy consumption and succeed as members of the Chicago Climate Exchange. I would like the County Manager to compile a Status Report on these Contracts, which do not expire until next year, and be prepared to present the information to this committee in September. I want to know all the projects that have been completed, all the projects that have been proposed, and all of the departments that are involved in this effort.

Before we begin, I want ask the members to allow the staff to present the add-on items that are before you today. I allowed these items to come forward because they are both extremely important items. If there is unreadiness, after the discussion, I would ask that we consider moving the items Without a Recommendation, rather than invoking a Three-day Rule.

With that, Madam Attorney, please read the changes to the agenda...

Charles A. Wilcox
President and Chief Operating Officer

June 28, 2007

VIA HAND DELIVERY

Mr. Roger Carlton, Assistant County Manager
Miami-Dade County
111 N.W. First Street, 29th Floor
Miami, Florida 33128

Re: RFP # 545, Curbside Recycling Program

Dear Mr. Carlton:

As you are aware, during negotiations on May 30, 2007, WSI offered to provide the processing services at its Miami-Dade MRF on precisely same terms as WMI proposed, including a payment to the County of \$10 per ton of materials processed and \$75,000 per year to fund a public education effort, both subject to an annual 3% CPI adjustment. Our offer allows the County the convenience and efficiency of having one contractor perform all recycling functions at a maximum savings and the added benefit of having all processing performed in Miami-Dade County. Moreover, by accepting our offer, the County would save the jobs of at least 44 Miami-Dade County residents currently employed at WSI's Miami-Dade MRF. Those employees and their positions are listed on the attached spread sheet.

As such we were surprised to learn that the negotiating committee plans to recommend that the County contract with WMI for the processing function. We carefully reviewed the tape of the June 6, 2007 negotiation meeting with WMI and the negotiating committee's deliberation and we believe that the only change in WMI's position is their offer to accelerate the \$75,000 per year payment to make it a one-time, lump sum payment of \$525,000 to the County. As pointed out by one of the members of the negotiating committee, this provides only a marginal financial benefit. Nevertheless, in an effort to save the jobs of 44 Miami-Dade County residents and provide the County with the efficiency and convenience of contracting with a single operator, WSI would be willing to match this offer as well.

We believe this offer provides several distinct advantages in addition to the substantial cost savings. First, the County would be contracting with a single provider and would thus avoid the administrative, accounting and accountability issues inherent in dealing with two separate entities. The County and our customers could be assured of receiving an instant response to questions or problems rather than the finger pointing that can occur when there is more than one provider. Our research indicates that the residue rate in single stream collections generally exceeds the 5% allowance in WMI's proposal, and that disputes over rejected loads would inevitably arise if collection and processing are split between two companies.

Second, the materials would be taken to a facility in Miami-Dade County that operates under a Miami-Dade County permit rather than a facility in Broward County that is not regulated or permitted by Miami-Dade County. Thus the County would have greater control over the processing of the materials and fewer materials would be rejected. There would also be less environmental impact as a result of the shorter hauling distance and, as stated above, our proposal would save the jobs of 44 Miami-Dade residents.

Third, this offer would have a greater likelihood of increasing participation. Allowing a second firm to handle processing creates disincentives to increasing participation, whereas, allowing WSI to perform collection and processing creates not only more incentive, but more ability to educate the public and respond to customer needs because WSI will have direct contact with every customer.

Finally, as you mentioned during the June 6, 2007 meeting, WMI has been given every opportunity to offer a proposal for the entire operation and has never been willing to perform the collections. Conversely, we have worked with you to respond to your needs to have an efficient and cost effective recycling program.

We urge you to take another look at these issues before issuing a final recommendation. Thank you in advance for all of your efforts to reach a mutually beneficial agreement. We are happy to meet with you again if you feel that further discussion would be beneficial.

Very truly yours,

Charles A. Wilcox
President and Chief Operating Officer

Waste Services, Inc.

Investor Presentation

June 12, 2007

Safe Harbor for Forward-Looking Statements

Certain matters discussed in this presentation are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements describe the company’s future plans, objectives and goals. These forward-looking statements involve risks and uncertainties which could cause actual results to differ materially from the plans, objectives and goals set forth in this presentation. Factors which could materially affect such forward-looking statements can be found in the company’s periodic reports filed with the Securities and Exchange Commission, including risk factors detailed in the company’s Form 10-K for the year ended December 31, 2006. Shareholders, potential investors and other readers are urged to consider these factors carefully in evaluating the forward-looking statements and are cautioned not to place undue reliance on such forward-looking statements.

The forward-looking statements made in this presentation are only made as of the date hereof and Waste Services undertakes no obligation to publicly update such forward-looking statements to reflect subsequent events or circumstances.

Company Overview

■ Leading Regional North American Solid Waste Operator

- Projected 2007 Revenue of \$500 million
 - Proforma 2006 Revenue at \$427 million
 - Internal Growth at \$25 million (6%)
 - Miami-Dade Revenue for 3 quarters of \$48 million
- Projected 2007 EBITDA at \$110 to \$115 million

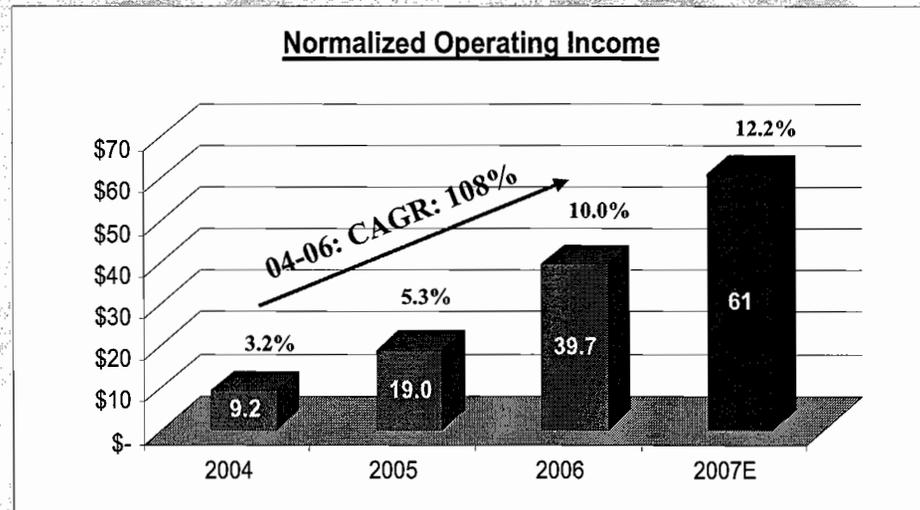

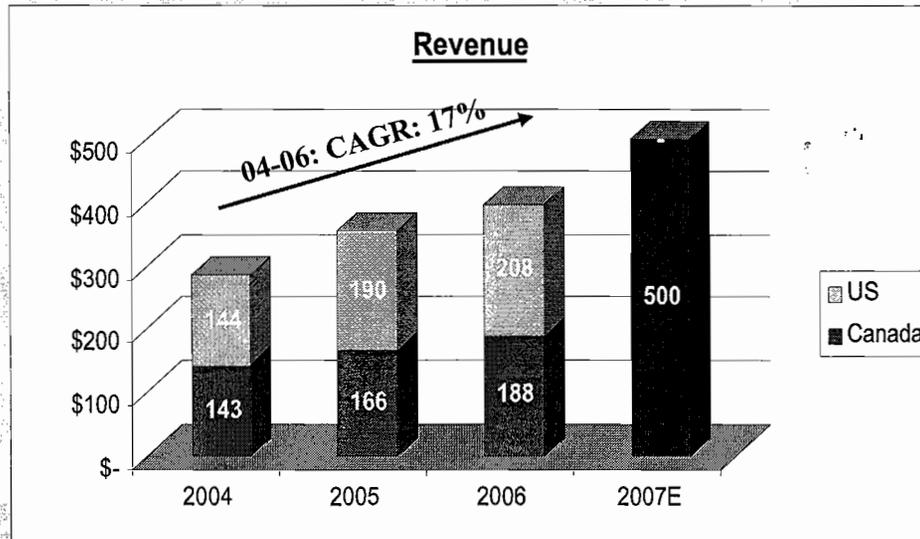

■ Successful business model geared to vertically integrated regional concentration

- United States - landfill dominated in strong organic growth markets
 - Lead with disposal, consolidate collection and transfer to gain operating leverage
- Canada – solid performance from collection assets
 - Low cost structure affords market share growth, and identifiable tuck-ins

■ Commitment to shareholder value

- Since 2001 over \$250 million in common equity invested by management and insiders
- Pay for performance based long-term incentive compensation plan

Financial Summary

Revenue Growth

- Acquisitions
- Price increases (5.7% in 2005, 6.8% in 2006)
- Organic Volume Growth

Income Growth

- Price Increases
- Volume growth over existing assets
- Increased landfill volumes (high operating leverage)
- Revenue Management
 - Elimination of low or zero margin municipal contracts

Road Map to Profits

■ Interest hurdle

- Past three years – approximately \$50 million with cost of preferred
- Refinancing eliminated preferred in December 2006

■ Taxes

- High effective tax rate due to accounting rules, will reverse in future years
- Normalized effective tax rate of 38%

■ 2007 Guidance provided by company

- Revenue \$500 million
- EBITDA between \$110 and \$115 million
- Internal growth rate 6%
- CAPX \$55 to \$60 Million
- Free cash flow expected in second half and full year

Key Investment Themes

- Stable revenue and cash flow streams
 - Recession-resistant business, providing a necessary and essential service
 - Diversified revenue by geography, waste stream and customer
 - Majority of revenue under contracts ranging from 1-5 years
- Strong market positions with critical mass and density in Canada and Florida
- Long-lived disposal assets in attractive markets
- Financial results and credit statistics consistently improving
- Experienced management team
- Disciplined operating strategy – focusing on the basics

Appendix: Reconciliation with Reported Net Loss

Operating depreciation and amortization	27.0	33.9	37.9
Adjusted EBITDA (1)	36.1	52.8	76.8

- (1) Normalized Operating Income and EBITDA as defined in our credit agreement ("Adjusted EBITDA") are non-GAAP measures used by management to measure performance. We also believe that these measures may be used by certain investors to analyze and compare our operating performance between accounting periods and against the operating results of other companies that have different financing and capital structures or tax rates and to measure our ability to service our debt. Our lenders also use Adjusted EBITDA to measure our ability to service and/or incur additional indebtedness under our credit facilities. However, Normalized Operating Income and Adjusted EBITDA should not be considered in isolation or as a substitute for net income, cash flows or other financial statement data prepared in accordance with US GAAP or as a measure of our performance, profitability or liquidity. Normalized Operating Income and Adjusted EBITDA are not calculated under US GAAP and therefore are not necessarily comparable to similarly titled measures of other companies.
- (2) Other non-operating expenses include foreign exchange gains and losses, corporate office relocation costs and other non-cash expenses.

Adjusted EBITDA (1)	13.7	19.4	22.3	21.4	76.8	22.2

- (1) Normalized Operating Income and EBITDA as defined in our credit agreement ("Adjusted EBITDA") are non-GAAP measures used by management to measure performance. We also believe that these measures may be used by certain investors to analyze and compare our operating performance between accounting periods and against the operating results of other companies that have different financing and capital structures or tax rates and to measure our ability to service our debt. Our lenders also use Adjusted EBITDA to measure our ability to service and/or incur additional indebtedness under our credit facilities. However, Normalized Operating Income and Adjusted EBITDA should not be considered in isolation or as a substitute for net income, cash flows or other financial statement data prepared in accordance with US GAAP or as a measure of our performance, profitability or liquidity. Normalized Operating Income and Adjusted EBITDA are not calculated under US GAAP and therefore are not necessarily comparable to similarly titled measures of other companies.
- (2) Other non-operating expenses include foreign exchange gains and losses, corporate office relocation costs and other non-cash expenses.

1000

The Top 100 Players in the Industry

Waste Age presents
its 14th annual list of the largest solid
waste firms.

CASH CONTINUED TO FLOW INTO the solid waste industry in 2006. That's one of the conclusions to take away from the 14th annual Waste Age 100.

The top five companies remained the same when compared with the 2005 listing, and all of those firms posted revenue increases from the previous year. Furthermore, the list is heavily populated with companies that did the same. And in this era of rising fuel prices, spiking insurance costs and more expensive containers, that's news that the industry will gladly take.

Industry executives are optimistic about how their firms will perform in 2007. "We produced excellent financial results throughout 2006 and laid a foundation on which we will build during 2007," said David Steiner, CEO of Houston-based Waste Management, in a press release announcing the company's end-of-year results.

James O'Connor, chairman and CEO of Fort Lauderdale, Fla.-based Republic Services, is similarly bullish about his firm. "In 2006, we experienced another record-setting year," he said in a press release detailing Republic's 2006 financials. "Annual revenue increased 7.2 percent for the full year as the company exceeded \$3 billion in revenue for the first time in its history."

Moving past the publicly traded companies, the revenue increases continued throughout the list.

Westboro, Mass.-based E.L. Harvey & Sons, which is ranked No. 42 on this year's list, reported \$45 million in revenue for last year, a whopping increase of 25 percent from the \$36 million the firm brought in in 2005.

Also, coming in at No. 95 on this year's ranking, Gap, Pa.-based TIER Holdings received \$8.3 million in revenue in 2006, up from \$7.9 in 2005.

Whatever challenges waste firms may have, continued revenue growth indicates they're getting the job done.

1 Waste Management¹

Waste Services Credit Rating Raised By One Notch To 'B', Outlook Stable

Rationale

On April 2, 2007, Standard & Poor's Ratings Services raised its corporate credit rating on Boca Raton, Fla.-based Waste Services Inc. to 'B' from 'B-'. The outlook is stable. The upgrade acknowledges the strengthening of the financial profile following the recent refinancing of the company's debt-like preferred stock with mostly common equity. The upgrade also incorporates the company's improved operating performance and our expectation that positive operating trends will continue. Although the company is likely to remain acquisitive, we expect management to adhere to a disciplined financial policy, thereby supporting credit quality.

Standard & Poor's also raised the rating on the company's senior secured credit facility to 'B+' (one notch higher than the corporate credit rating) from 'B' and affirmed the '1' recovery rating, indicating a high expectation of full recovery of principal in a payment default. Waste Services' \$355 million credit facilities include a proposed incremental \$50 million senior secured incremental term loan. Waste Services will use proceeds from the incremental term loan to acquire USA Recycling and repay outstanding borrowings under the revolving credit facility at closing. Pro forma for the financing transaction, total adjusted debt will be about \$485 million. We adjust debt to include capitalized operating leases and asset-retirement obligations, on a tax-adjusted basis.

The ratings on Waste Services reflect the company's highly leveraged financial risk profile, its vulnerable business risk profile due to an acquisitive growth strategy, and the company's modest scale of operations relative to its peers. These factors are only partially offset by favorable industry characteristics, including high barriers to entry and recession resiliency; some geographic diversity; and the ownership of several permitted, well-positioned, long-lived landfills.

With annual sales of about \$400 million, Waste Services is a multiregional, integrated solid waste services company, providing collection (74% of sales), transfer (11%), landfill disposal (12%), recycling and other services (3%) to commercial, industrial, and residential customers in the U.S. and

Publication Date

April 2, 2007

Canada. The nonhazardous solid waste industry is highly fragmented on a national basis but offers more attractive and consolidated competitive dynamics on a local or regional basis. Still, in each of its local markets, Waste Services competes with well-established multinational and regional solid waste companies. In the U.S., the company benefits from its strong market position in Florida. Waste Services is also the third-largest operator in Canada by revenue, with leading market positions in Ontario, Alberta, and British Columbia. Canadian operations account for less than half of total revenues.

Waste Services continues to maintain a financial policy that favors growth through debt-financed acquisitions. The material delay in commencing operations at two transfer stations in Central Florida in 2004 highlights a key risk factor in this growth strategy, as missteps in the successful integration of acquired assets into existing operations hurt operating profitability. However, these two transfer stations began accepting waste during the second quarter of 2005, and since then the company has been steadily increasing the internalization of market volume to its JED landfill in Orlando.

Consistent with its acquisition strategy, in December 2006, the company used proceeds from a \$100 million additional term loan to acquire a construction and demolition waste landfill from Southwest Land Developers Inc. and all of the outstanding shares of Pro Disposal Inc., as well as to repay outstanding borrowings under the revolving credit facility. In addition, in an asset swap transaction that closed on March 31, 2007, Waste Services acquired hauling, transfer station, and recycling operations in Miami, Fla., from various affiliates of Allied Waste Industries Inc. (BB/Stable/—) and sold its Arizona operations to Allied.

Despite recent and proposed debt-financed acquisitions, Waste Services' financial profile is improving. In December 2006, the company used proceeds from a stock issuance, together with about \$10 million of borrowings under the revolving credit facility, to redeem a portion of the outstanding 17.75% series A preferred stock. The previous holders of the series A preferred stock converted the remaining balance into common shares. Pro forma for recent acquisitions as well as for the proposed transaction, we expect total adjusted debt to EBITDA to be about 4x. Standard & Poor's adjusts debt to include capitalized operating leases and asset-retirement obligations, on a tax-adjusted basis. We also expect the ratio of funds from operations to total adjusted debt to be above 10%, a level appropriate for the current ratings.

Liquidity

After the completion of the proposed financing, Waste Services will have about \$37 million of availability, after deducting outstanding letters of credit, under its \$60 million revolving credit facility due April 2009. The revolving credit facility and term loans include restrictive financial covenants regarding maximum total and senior leverage, minimum interest coverage, and limitations on capital expenditures. We assume that the company will refinance its revolving credit facility in a timely manner.

Term loan amortization will consist of annual payments of about \$3 million for the next few years. In 2007, capital spending should be about \$60 million and cash interest expense about \$39 million. We expect the company to be free cash neutral in 2007.

Recovery analysis

Waste Services' \$355 million senior secured credit facilities are rated 'B+', one notch above the corporate credit rating; this and the '1' recovery rating indicate a high expectation of full recovery of principal in the event of a payment default. (For the complete recovery analysis, see "Recovery Report: Waste Services Inc.'s \$355 Million Bank Financing," to be published on RatingsDirect immediately following the release of this report.)

Outlook

The outlook is stable. The ratings and outlook incorporate the company's improved financial profile and the expectation that Waste Services will generate free cash flow next year. We expect that the company will benefit from improving operating results and will maintain sufficient liquidity and compliance with covenants under its credit facilities. We could revise the outlook to negative or lower the ratings if the company faces operating challenges integrating acquisitions or if it is unable to preserve a solid liquidity position.

Waste Services Announces Exchange of Assets

Waste Services acquires WCA Ft. Myers transfer station, a WCA collection business operating in Southwest Florida and receives \$23.7 million in cash

WCA acquires Waste Services' Texas assets

Waste Services to pay down debt

BURLINGTON, Ontario, June 29 /PRNewswire-FirstCall/ -- Waste Services, Inc. (Nasdaq: WSII) today announced that it has completed the simultaneous sale of its Texas operations and the acquisition of a transfer station and hauling company near Ft. Myers Florida with WCA Waste Corporation (Nasdaq: WCAA). Waste Services also received \$23.7 million in cash in the transaction and has agreed to pay WCA a monthly amount of \$125,000 for seven years in relation to the operation of the transfer station. Both parties have provided non-compete agreements for the respective market areas.

Waste Services intends to internalize all of the waste flow from the collection operation and transfer station in to its SLD landfill.

Waste Services has used \$20 million of the cash proceeds to retire debt. The payments to WCA will be accounted for as new debt at the discounted present value of approximately \$8.0 million.

David Sutherland-Yoest, Chairman and Chief Executive Officer of Waste Services, stated, "We are very pleased to have found another win-win situation that allows us to monetize the company's Texas assets at maximum value to our shareholders and obtain assets in Florida that meet our strategic goal of increasing waste flow into our landfills. Our U.S. operations are now totally focused in Florida where we will continue our efforts to increase market density and improve margins and free cash flow through the vertical integration of waste collection, transfer and disposal operations."

Waste Services, Inc., a Delaware corporation, is a multi-regional integrated solid waste services company that provides collection, transfer, disposal and recycling services in the United States and Canada. The company's web site is <http://www.wasteservicesinc.com>. Information on the company's web site does not form part of this press release.
