RYAN WHITE PROGRAM
Letter of Medical Necessity (LOMN) for Testosterone Supplementation
(A LOMN must accompany each prescription)

Date: _______________________

As the prescribing practitioner treating ________________________, I intend to place this patient on testosterone supplementation (duration may NOT exceed 12 months). I have educated the patient on the consequences of testosterone supplementation and have explained the risks associated with this therapy, including venous blood clots, and increased risk of heart attacks and strokes.

I certify that the patient (mark all that apply):

___ has a documented low (<350 ng/dL) testosterone lab level at initiation of therapy;

OR

___ has a documented history of testosterone therapy but has discontinued therapy for 60 calendar days to re-evaluate levels and still has a documented low (<350 ng/dL) testosterone lab level.

AND/OR

___ has primary hypogonadism, in which there is low testosterone accompanied by increased follicle-stimulated hormone and increased luteinizing hormone. Common causes include: Klinefelter’s syndrome, anorchism, undescended testicles, mumps orchitis, hemochromatosis, injury to testicles, cancer treatment, and normal aging.

AND/OR

___ has secondary hypogonadism, in which there is low testosterone accompanied by low to normal follicle-stimulated hormone and luteinizing hormone. Common causes include: Kallmann syndrome, pituitary disorders, inflammatory diseases, HIV/AIDS, medications, obesity, and stress-induced hypogonadism.

AND

___ is physically symptomatic (e.g. malaise, fatigue, lethargy, muscle loss, depression, decreased bone mass or bone mineral density, etc.).

The following restriction is placed on the medications: Maximum dose is 400 mg per month unless clinically indicated per labs.
