

NEW WINDOWS, MULLIONS GLASS DOORS REQUIRED AS PART OF A BUILDING PERMIT

Check off each item being included. All 3 items are required. Do not submit if not complete and legible.

- 1.** A complete Permit Application (yellow form) with:
Category 82 marked; a process number; and the total area (sq. ft.) of windows or glass doors being installed. Include that master permit number in the application)
Note: If all windows, doors, and mullions are impact resistant check here.
- 2.** The permit plans or a copy shall be submitted.
The plan shall contain the information requested below:
Identify the **size** and **“product approval number”** of each window/door;
The size of all mullions; and
Indicate the required positive and negative pressure of each window/door being used.
- 3.** Two complete and legible copies of the Miami-Dade County Building Code Compliance, “Notice of Acceptance”* for each window, glass door or mullion used. If more than one mullion or method of application is covered on the “Notice of Acceptance”, highlight or mark the “Notice of Acceptance”, identifying the mullion and connection to be used.

* *In lieu of Approval for Miami-Dade County Building Code Compliance, “Notice of Acceptance” The product may provide “High Wind Velocity Zone Approval” from the Florida Building Commission*

IMPORTANT

- 3a.** Applicant must indicate on the permit plans or the “Notice of Acceptance”, which glass type/ thickness and which options are to be used, including mullion sizes and type of connection to be used.

Provide two complete sets containing items 2 & 3 (if the permit set is used in lieu of a plan, two copies of item 3 are not required). Item 1 is to be included with the office set.
