

# LAND USE ELEMENT

## Introduction

The Land Use Element of the Comprehensive Development Master Plan (CDMP) for the years 2020 and 2030 constitutes the sixth major update of the CDMP Land Use Element. However, the pattern of land use and urban growth promoted in the original 1975 edition of the CDMP remains essentially unchanged. This growth policy includes, among other intents, that the intensification of physical development and expansion of the urban area should be managed to occur 1) at a rate commensurate with projected population and economic growth; 2) in a contiguous pattern centered around a network of high-intensity urban centers well connected by multimodal intraurban transportation facilities; 3) in locations which optimize efficiency in public service delivery and conservation of valuable natural resources; and 4) in recognition of the County's physical limitations to horizontal expansion due to the location of the Everglades National Parks, wetlands and environmental preserves, and the County's unique agricultural land resources.

The Land Use Element identifies locations in Miami-Dade County where various land uses and intensities of use will be permitted to occur in the future. It establishes and articulates broad policy in keeping with the traditional role of the metropolitan area comprehensive plan as a framework for, or schematic plan of, areawide future development.

The Land Use Element is at the same time both reactive and proactive. It not only reflects previously adopted plans and established land use and zoning patterns, it also establishes the County's policy regarding future zoning and land use patterns. Similarly, while it reflects existing urban service capacities and constraints, it also establishes locations where future service improvements will have to follow. It also both reflects, and seeks to promote, activity in the private land market. Recent development trends are carefully considered, however, the Land Use Element endeavors to assert County influence on locations and intensity of future development activity.

The Land Use Element contains all of the material required by Section 163.3177(6)(a), *Florida Statutes* (F.S.) which establishes the minimum requirements for contents of the future land use element. Moreover, the Miami-Dade County portion of the Big Cypress Area of Critical State Concern is affected by, and addressed in this Element as well as in the Conservation, Aquifer Recharge and Drainage Element. The Big Cypress "Critical Area" boundaries coincide directly with the boundaries of the Big Cypress National Preserve in Miami-Dade County which are identified on Figure 4, Environmentally Protected Parks contained in this Element.

The *Adopted Components* of the Land Use Element include the Land Use Goal, Objectives and Policies, the Land Use Plan map for 2020 and 2030 and related text titled "Interpretation of the Land Use Plan Map", and maps of future historical and natural resources. Also included is a "monitoring program" for periodically measuring progress being made in implementing the comprehensive plan.

Supporting material for this Element includes the 1988 *Support Components* report, the 2003 and the 2010 Evaluation and Appraisal Reports, which contain background data and information, analyses of land use trends and synopses of urban service and environmental opportunities and constraints.

The environmental and service analyses included in the land use support materials are brief synopses of extensive inventory and analyses contained in the Conservation and various service Elements of the Plan. The reader is referred to the 2010 EAR report addressing those elements for complete analyses of those services.

## **GOAL**

**PROVIDE THE BEST POSSIBLE DISTRIBUTION OF LAND USE AND SERVICES TO MEET THE PHYSICAL, SOCIAL, CULTURAL, HEALTH AND ECONOMIC NEEDS OF THE PRESENT AND FUTURE POPULATIONS IN A TIMELY AND EFFICIENT MANNER THAT WILL MAINTAIN OR IMPROVE THE QUALITY OF THE NATURAL AND MAN-MADE ENVIRONMENT AND AMENITIES, AND PRESERVE MIAMI-DADE COUNTY'S UNIQUE AGRICULTURAL LANDS.**

### **Objective LU-1**

**The location and configuration of Miami-Dade County's urban growth through the year 2030 shall emphasize concentration and intensification of development around centers of activity, development of well designed communities containing a variety of uses, housing types and public services, renewal and rehabilitation of blighted areas, and contiguous urban expansion when warranted, rather than sprawl.**

### **Policies**

- LU-1A. High intensity, well-designed urban centers shall be facilitated by Miami-Dade County at locations having high countywide multimodal accessibility.
- LU-1B. Major centers of activity, industrial complexes, regional shopping centers, large-scale office centers and other concentrations of significant employment shall be the structuring elements of the metropolitan area and shall be sited on the basis of metropolitan-scale considerations at locations with good countywide, multi-modal accessibility.
- LU-1C. Miami-Dade County shall give priority to infill development on vacant sites in currently urbanized areas, and redevelopment of substandard or underdeveloped environmentally suitable urban areas contiguous to existing urban development where all necessary urban services and facilities are projected to have capacity to accommodate additional demand.
- LU-1D. In conducting its planning, regulatory, capital improvements and intergovernmental coordination activities, Miami-Dade County shall seek to facilitate the planning of communities which include recreational, educational and other public facilities, houses of worship, places of employment, and safe and convenient circulation of automotive, pedestrian and bicycle traffic throughout the communities.
- LU-1E. In planning and designing all new residential development and redevelopment in the county, Miami-Dade County shall vigorously promote implementation of the "Guidelines for Urban Form" contained in the "Interpretation of The Land Use Plan Map" text adopted as an extension of these policies.
- LU-1F. To promote housing diversity and to avoid creation of monotonous developments,

Miami-Dade County shall vigorously promote the inclusion of a variety of housing types in all residential communities through its area planning, zoning, subdivision, site planning and housing finance activities, among others. In particular, Miami-Dade County shall review its zoning and subdivision practices and regulations and shall amend them, as practical, to promote this policy.

- LU-1G. Business developments shall preferably be placed in clusters or nodes in the vicinity of major roadway intersections, and not in continuous strips or as isolated spots, with the exception of small neighborhood nodes. Business developments shall be designed to relate to adjacent development, and large uses should be planned and designed to serve as an anchor for adjoining smaller businesses or the adjacent business district. Granting of commercial or other non-residential zoning by the County is not necessarily warranted on a given property by virtue of nearby or adjacent roadway construction or expansion, or by its location at the intersection of two roadways.
- LU-1H. The County should identify sites having good potential to serve as greenbelts, and should recommend retention and enhancement strategies, where warranted. Such greenbelts should be suggested on the basis of their ability to provide aesthetically pleasing urban spaces, recreational opportunities, or wildlife benefits. Considered sites should include canal, road or powerline rights-of-way, or portions thereof, particularly where they could link other parklands, wildlife habitats, or other open spaces.
- LU-1I. The County shall consider urban design, water and energy conservation and wildlife habitat when designing sites and selecting landscape material for all public projects.
- LU-1J. Miami-Dade County will maintain its commitment to improve Community Development Block Grant (CDBG)-eligible areas and enhance the County's Enterprise Zone as tools to expand the economy in locally distressed areas.
- LU-1K. Miami-Dade County will maintain and enhance the housing assistance and housing programs addressed in the Housing Element as a means to improve conditions of extremely low, very low, low and moderate income residents. This includes the provision of affordable workforce housing.
- LU-1L. Public facility and service providers shall give priority to eliminating any infrastructure deficiencies to facilitate rehabilitation or renewal of blighted areas.
- LU-1M. In formulating or amending development regulations, Miami-Dade County shall avoid creating disincentives to redevelopment of blighted areas. Where redevelopment occurs within the urban area, requirements for contributions toward provision of public facilities may be moderated where underutilized facilities or surplus capacities exist, and credit toward required infrastructure contributions may be given for the increment of development replaced by redevelopment.
- LU-1N. Miami-Dade County shall continue to support the Miami-Dade Economic Advocacy Trust to improve conditions of disadvantaged groups of the community.
- LU-1O. Miami-Dade County shall seek to prevent discontinuous, scattered development at the urban fringe in the Agriculture Areas outside the Urban Development Boundary,

through its CDMP amendment process, regulatory and capital improvements programs and intergovernmental coordination activities.

- LU-1P. While continuing to protect and promote agriculture as a viable economic activity in the County, Miami-Dade County shall explore and may authorize alternative land uses in the South Dade agricultural area which would be compatible with agricultural activities and associated rural residential uses, and which would promote ecotourism and agritourism related to the area's agricultural and natural resource base including Everglades and Biscayne National Parks.
- LU-1Q. It is the policy of Miami-Dade County that the siting of both public and private schools throughout the County shall conform with the school siting policies adopted under CDMP Objective EDU-3.
- LU-1R. Miami-Dade County shall take steps to reserve the amount of land necessary to maintain an economically viable agricultural industry. Miami-Dade County shall adopt and implement a transfer of developments rights (TDR) program to preserve agricultural land that will be supplemented by a purchase of development rights program to preserve agricultural land and environmentally sensitive property.
- LU-1S. The Miami-Dade County Strategic Plan shall be consistent with the Comprehensive Development Master Plan (CDMP). The Miami-Dade County Strategic Plan includes Countywide community goals, strategies and key outcomes for Miami-Dade County government. Key outcomes of the Strategic Plan that are relevant to the Land Use element of the CDMP include increased urban infill development and urban center development, protection of viable agriculture and environmentally-sensitive land, reduced flooding, improved infrastructure and redevelopment to attract businesses, availability of high quality green space throughout the County, and development of mixed-use, multi-modal, well designed, and sustainable communities.
- LU-1T. Miami-Dade County through its land development regulations shall encourage developments that promote and enhance bicycling and pedestrianism through the provision of bicycle and pedestrian facilities and other measures such as building design and orientation, and shall discourage walled and gated communities.
- LU-1U<sup>[1]</sup>. By 2027, Miami-Dade County should study the feasibility of allowing cluster development in the area designated Agriculture on the CDMP Land Use Plan map to promote the conservation of agricultural land. Cluster development allows for the concentration of allowable residential units on lots that are smaller than would otherwise be permitted in the Agriculture land use designation with the remainder of the property being conserved for agricultural uses. The study should include consideration of potential land use conflicts between residential and agricultural uses, an analysis of similar programs, identification of the advantages and disadvantages of such a program, and include recommendations on whether a cluster development program should be implemented in the County.
- LU-1U. Notwithstanding the designation of the SR-836/Dolphin Expressway southwest

---

<sup>1</sup> Policy in May 2019 Cycle Application No. 5 adopted July 22, 2020, through Ordinance No. 20-76 after but became 'in effect' before Policy LU-1U in October 2017 Cycle Application No. 8 adopted September 27, 2018, through Ordinance 18-109 (due to a Chapter 163 Administrative Challenge) having the same policy name and is herein distinguished by the addition of "[1]" to the policy name.

extension as an Expressway on the CDMP Land Use Plan map and as depicted in the Traffic Circulation Subelement map series, no construction associated with the SR-836 southwest extension shall occur that would restrict farm vehicle and equipment access to agricultural properties adjacent to the SR-836 southwest extension corridor. Moreover, to minimize the impacts of the expressway's southwest extension, the design and construction shall be conducted in a manner that does not cause drainage or the spillage of lighting from the expressway onto adjacent agricultural lands.

- LU-1V. To mitigate the impacts of the SR-836 southwest extension on the agricultural area, the Miami-Dade Expressway Authority (or successor agency) shall preserve agricultural lands outside the UDB commensurate to impacts to agricultural lands that would be taken out of production by the project. Said preservation may be through participation in the County's Purchase Development Rights program or other mechanism acceptable to the Miami-Dade County Department of Regulatory and Economic Resources (or successor Department).
- LU-1W. The alignment of the SR-836 southwest extension shall remain outside and to the east of the boundary of the 10-day travel time contour of the west wellfield area, and all drainage shall be subject to DERM approval for conformance to Chapter 24 of the Code. In addition, prior to the construction of the roadway, or any phase thereof, MDX shall prepare a surface water sheet flow analysis to demonstrate that the wetlands hydrology in this area shall be adequately retained.

## **Objective LU-2**

**Decisions regarding the location, extent and intensity of future land use in Miami-Dade County, and urban expansion in particular, shall be based upon the physical and financial feasibility of providing, by the year 2030, all urbanized areas with services at levels of service (LOS) which meet or exceed the minimum standards adopted in the Capital Improvements Element, among other requirements set forth in this plan.**

### **Policies**

- LU-2A. All development orders authorizing new, or significant expansion of existing, urban land uses shall be contingent upon the provision of services at or above the Level of Service (LOS) standards specified in the Capital Improvements Element (CIE), except as otherwise provided in the "Concurrency Management Program" section of the CIE.
- LU-2B. Priority in the provision of services and facilities and the allocation of financial resources for services and facilities in Miami-Dade County shall be given first to serve the area within the Urban Infill Area and Transportation Concurrency Exception Areas. Second priority shall be given to serve the area between the Urban Infill Area and the Urban Development Boundary. And third priority shall support the staged development of the Urban Expansion Area (UEA). Urban services and facilities which support or encourage urban development in Agriculture and Open Land areas shall be avoided, except for those improvements necessary to protect public health and safety and which service the localized needs of these non-urban areas. Areas designated Environmental Protection shall be particularly avoided.
- LU-2C. Miami-Dade County shall maintain and enhance, as necessary, impact fee and comparable programs and procedures to require all development, regardless of size,

to contribute its proportionate share of capital facilities, or funds or land therefore, necessary to accommodate impact of the proposed development or increment of redevelopment over and above preexisting development on a site. Miami-Dade County shall periodically review and update fee schedules to ensure that all public marginal costs are appropriately recognized, and that fee structures reflect pertinent geographic (i.e., core, fringe, or rural area) variability in facility usage. Miami-Dade County should consider revisions to impact fee structures to better align the provision of County infrastructure with adopted land use development strategies, which promote infill development and development around existing and planned transit corridors.

- LU-2D. Miami-Dade County agencies shall continue and, where possible, improve their efforts to coordinate projects to construct or repair infrastructure such as roadways and utilities in order to minimize the disruption and inconvenience caused by such construction activities.
- LU-2E. The Department of Regulatory and Economic Resources shall coordinate and centralize the compilation of monitoring information necessary to make determinations regarding existing and projected Levels of Service and to prepare Evaluation and Appraisal Reports for adoption by the Board of County Commissioners, as required by Section 2-116 of the Miami-Dade County Code. All Miami-Dade County agencies shall fully cooperate with the Department by carrying out necessary monitoring and reporting activities identified in the CDMP Monitoring Program.

### **Objective LU-3**

**The location, design and management practices of development and redevelopment in Miami-Dade County shall ensure the protection of natural resources and systems by recognizing, and sensitively responding to constraints posed by soil conditions, topography, water table level, vegetation type, wildlife habitat, and hurricane and other flood hazards, and by reflecting the management policies contained in resource planning and management plans prepared pursuant to Chapter 380, Florida Statutes, and approved by the Governor and Cabinet, or included in the Comprehensive Everglades Restoration Plan approved by Congress through the Water Resources Development Act of 2000.**

#### **Policies**

- LU-3A. Development orders in Miami-Dade County shall be consistent with the goals, objectives and policies contained in the Conservation, Aquifer Recharge and Drainage and Coastal Management Elements of this Plan, and with all applicable environmental regulations, as well as all other elements of the CDMP.
- LU-3B. All significant natural resources and systems shall be protected from incompatible land use including Biscayne Bay, future coastal and inland wetlands, future potable water-supply wellfield areas identified in the Land Use Element or in adopted wellfield protection plans, and forested portions of Environmentally Sensitive Natural Forest Communities as identified in the Natural Forest Inventory, as may be amended from time to time.
- LU-3C. Development in the Big Cypress Area of Critical State Concern, and in the East Everglades as defined in Section 33B-13, Code of Miami-Dade County, Florida (1981)

shall be limited to uses, designs and management practices which are consistent with adopted State regulations and policies, the Comprehensive Everglades Restoration Plan, and related federal, State or County policies, plans or regulations as may be formulated, consistent with the goals, objectives and policies of this comprehensive plan. Miami-Dade County shall improve its enforcement of East Everglades development regulations and shall improve such regulations if necessary to enable effective enforcement.

- LU-3D. Miami-Dade County shall not sponsor any growth-subsidizing programs which promote future population growth and residential development on the barrier islands of Miami-Dade County or within the coastal high hazard areas (CHHA). Miami-Dade County shall coordinate with municipalities in Coastal High Hazard Areas, and areas with repetitive losses due to flooding or storm damage, to minimize demand for facilities and services that result from redevelopment and increases in residential densities. The provision of facilities and services to accomplish the timely evacuation of already-developed barrier islands in advance of approaching hurricanes shall be a priority of Miami-Dade County's transportation planning and hurricane preparedness programs.
- LU-3E. Any zoning action or amendment to the CDMP that would approve any use other than direct agricultural production, the sale of agricultural produce, and permitted residential and Bed and Breakfast uses of property, in an area designated as Agriculture, whether as a primary use or as an accessory or subordinated use to an agricultural use, or action that would liberalize standards or allowances governing such other uses on land that is, a) outside the Urban Development Boundary (UDB), and b) within one mile of the right-of-way line of any portions of Krome Avenue designated in this Plan for improvement to 4-lanes, shall require an affirmative vote of not less than five members of the affected Community Zoning Appeals Board and two-thirds of the total membership of the Board of County Commissioners then in office, where such Community Zoning Appeals Board or Board of County Commissioners issues a decision. The term "direct agricultural production" includes crops, livestock, nurseries, groves, packing houses, and barns, but not uses such as houses of worship, schools, sale of produce and other items, and outdoor storage vehicles. This policy is not intended to permit any use not otherwise permitted by the CDMP. Any modification to this section to allow additional uses within the one mile distance from Krome Avenue shall require an affirmative vote of not less than two-thirds of the Board of County Commissioners then in office.
- LU-3F. Any zoning action, or amendment to the CDMP that would approve a use of property other than limestone quarrying, seasonal agriculture or permitted residential use in an area designated as Open Land on land that is, a) outside the Urban Development Boundary (UDB), and b) within one mile of the right-of-way line of any portions of Krome Avenue designated in this Plan for improvement to 4-lanes, shall require an affirmative vote of not less than five members of the affected Community Zoning Appeals Board and two-thirds of the total membership of the Board of County Commissioners then in office, where such Community Zoning Appeals Board or Board of County Commissioners issues a decision. This policy is not intended to permit any use not otherwise permitted by the CDMP. Any modification to this section to allow additional uses within the one mile distance from Krome Avenue shall require an affirmative vote of not less than two-thirds of the Board of County Commissioners then in office.

- LU-3G. Any zoning action, or amendment to the CDMP that would approve a use of property other than seasonal agricultural use in the Dade-Broward Levee Basin or permitted residential use in an area designated as Environmental Protection, on land that is, a) outside the Urban Development Boundary (UDB), and b) within one mile of the right-of-way line of any portions of Krome Avenue designated in this Plan for improvement to 4-lanes, shall require an affirmative vote of not less than five members of the affected Community Zoning Appeals Board and two-thirds of the total membership of the Board of County Commissioners then in office, where such Community Zoning Appeals Board or Board of County Commissioners issues a decision. This policy is not intended to permit any use not otherwise permitted by the CDMP. Any modification to this section to allow additional uses within the one mile distance from Krome Avenue shall require an affirmative vote of not less than two-thirds of the Board of County Commissioners then in office.
- LU-3H. The Dredged Materials Management Plan for Miami-Dade County, as amended from time to time, shall be implemented by PortMiami in coordination with other agencies to ensure the proper long term management of spoil disposal and the beneficial use of dredged material. All activities related to implementation of the Dredged Materials Management Plan, including storage, transportation, disposal or beneficial use of dredged material shall ensure environmental sensitivity and responsiveness. In addition, Miami-Dade County shall continue to identify disposal sites for dredged materials as needed to assure proper long-term management of material dredged from navigation channels, sufficient long-range disposal capacity, environmental sensitivity and compatibility, and reasonable cost and transportation.
- LU-3I. Consistent with the provisions of Coastal Management Element Objective CM-5, Miami-Dade County shall protect and enhance recreational and working waterfronts as defined in Section 342.07, Florida Statutes.
- LU-3J. Miami-Dade County continues to support the Comprehensive Everglades Restoration Plan (CERP), and related regional and local habitat restoration and preservation initiatives through its development review processes and long range land planning initiatives.
- LU-3K through LU-3P. Reserved.
- LU-3Q. Any zoning action or amendment to the CDMP that would approve any use other than direct agricultural production, the sale of agricultural produce, and permitted residential and Bed and Breakfast uses of property, in an area designated as Agriculture, whether as a primary use or as an accessory or subordinated use to an agricultural use, or action that would liberalize standards or allowances governing such other uses on land that is a) outside the Urban Development Boundary (UDB) and b) within one mile of the right-of-way line of any portions of SR-836 southwest extension designated in this Plan, shall require an affirmative vote of not less than two-thirds of the total membership of the Board of County Commissioners then in office.
- LU-3R. Any modification or amendment to this and other policies within this Plan adopted or modified as part of the October 2017 cycle amendment Application No. 8 (SR-836/Dolphin Expressway southwest extension), enumerated below, shall require an

affirmative vote of not less than two-thirds of the total membership of the Board of County Commissioners then in office and no application seeking to amend these policies may be accompanied by an amendment to the land use designation of any property. Policies subject to this supermajority requirement include Land Use Element Policies LU-1U, LU-1V, LU-3Q, LU-3T, and LU-8G, Transportation Element Policy TE-3C, Traffic Circulation Subelement Policies TC-1B, TC-1L, TC-1M, and TC-1N, Mass Transit Subelement Policies MT-4D and MT-4E, Parks, Recreation and Open Space Element Policy ROS-3F, and Intergovernmental Coordination Element Policy ICE-3I.

LU-3S. Reserved.

LU-3T. The SR-836/Dolphin Expressway southwest extension corridor from NW 12 Street to SW 136 Street is planned to traverse and impact wetlands within the Bird Drive and North Trail Wetland Basins and elsewhere along its alignment and will require environmental approval and wetland mitigation. To the maximum extent feasible, mitigation for the SR-836 southwest extension shall be accomplished through the acquisition, preservation, and restoration of wetlands within the Bird Drive and North Trail Basins outside the Urban Development Boundary. At a minimum, preservation of wetlands within the Bird Drive Basin shall be included as a component of the wetlands mitigation for this project. The mitigation shall also include a plan to preserve the hydrological connection and surface water flow of the wetlands remaining in these basins through the use of culverts or bridges.

#### **Objective LU-4**

**Miami-Dade County shall continue to reduce the number of land uses, which are inconsistent with the uses designated on the LUP map and interpretive text, or with the character of the surrounding community.**

#### **Policies**

LU-4A. When evaluating compatibility among proximate land uses, the County shall consider such factors as noise, lighting, shadows, glare, vibration, odor, runoff, access, traffic, parking, height, bulk, scale of architectural elements, landscaping, hours of operation, buffering, and safety, as applicable.

LU-4B. Uses designated on the LUP map and interpretive text, which generate or cause to generate significant noise, dust, odor, vibration, or truck or rail traffic shall be protected from damaging encroachment by future approval of new incompatible uses such as residential uses.

LU-4C. Residential neighborhoods shall be protected from intrusion by uses that would disrupt or degrade the health, safety, tranquility, character, and overall welfare of the neighborhood by creating such impacts as excessive density, noise, light, glare, odor, vibration, dust or traffic.

LU-4D. Uses which are supportive but potentially incompatible shall be permitted on sites within functional neighborhoods, communities or districts only where proper design

solutions can and will be used to integrate the compatible and complementary elements and buffer any potentially incompatible elements.

- LU-4E. Zoning shall be examined to determine consistency with the Comprehensive Plan, and if deemed necessary to remedy an inconsistency, rezoning action shall be initiated. Examination could occur through a special zoning study, area-planning activity, or through a study of related issues.
- LU-4F. Miami-Dade County shall implement the Homestead Air Reserve Base Air Installation Compatible Use Zone (AICUZ) Report guidelines and the Joint Land Use Study recommendations through the Land Use Element of the Miami-Dade County Comprehensive Development Master Plan, and the Miami-Dade County Zoning Code to provide for land use compatibility in the vicinity of the Homestead Air Reserve Base.
- LU-4G. Miami-Dade County shall continue to cooperate with the Homestead Air Reserve Base (HARB) to ensure that future land uses on properties adjacent to HARB maintain or improve compatibility with HARB and its operations.
- LU-4H. By 2014, Miami-Dade County shall amend Article XXXV, Homestead Air Force Base Zoning, of the Code of Miami-Dade County to enhance and promote the compatibility of adjacent land uses and development with HARB and the protection of Base operations and activities. Consistent with the Board of County Commissioners adopted Resolution R-357-10, the amending ordinance shall address the guidelines recommended in the Homestead Air Reserve Base Joint Land Use Study and Air Installation Compatible Use Zone Study, and address the following compatibility criteria:
- (a) Permitted uses and use restrictions;
  - (b) Development density and intensity;
  - (c) Building FARs and setbacks;
  - (d) Height restrictions and notification procedures;
  - (e) Lighting standards;
  - (f) Noise attenuation;
  - (g) variances and appeals;
  - (h) Real estate disclosure process; and
  - (i) Avigation easements
- LU-4I. It is the policy of Miami-Dade County that proposals for future land uses, including the siting of public facilities (such as roads, sewer, schools, and government buildings), on land adjacent to the HARB and/or within the HARB Military Zone shall maintain or improve compatibility with HARB consistent with the provision of Intergovernmental Coordination Element Policies ICE-3G and ICE-3H, and pursuant to the foregoing Policies LU-4A and LU-4B.
- LU-4J. Through its planning, regulatory, capital improvements and intergovernmental coordination activities, Miami-Dade County shall seek to ensure that suitable land is provided for placement of utility facilities necessary to support proposed development. Necessary utility facilities may be located throughout Miami-Dade

County in all land use categories as provided in the "Interpretation of the Land Use Plan Map" text.

#### **Objective LU-5**

**All public and private activities regarding the use, development and redevelopment of land and the provision of urban services and infrastructure shall be consistent with the goal, objectives and policies of this Element, with the adopted Population Estimates and Projections, and with the future uses provided by the adopted Land Use Plan (LUP) map and accompanying text titled "Interpretation of the Land Use Plan Map", as balanced with the Goals, Objectives and Policies of all Elements of the Comprehensive Development Master Plan.**

#### **Policies**

- LU-5A. The textual material titled "Interpretation of the Land Use Plan Map" contained in this Element establishes standards for allowable land uses, and densities or intensities of use for each land use category identified on the adopted Land Use Plan (LUP) map, and is declared to be an integral part of these adopted Land Use Policies.
- LU-5B. All development orders authorizing a new land use or development, or redevelopment, or significant expansion of an existing use shall be contingent upon an affirmative finding that the development or use conforms to, and is consistent with the goals, objectives and policies of the CDMP including the adopted LUP map and accompanying "Interpretation of the Land Use Plan Map". The Director of the Department of Regulatory and Economic Resources shall be the principal administrative interpreter of the CDMP.
- LU-5C. All planning activities pertaining to development and redevelopment and the provision of public services and facilities in Miami-Dade County shall be consistent with the "Population Estimates and Projections" contained in this Element, and with the locations and extent of future land uses as identified by the LUP map and its interpretive text. Plans for providing public facilities and services in Miami-Dade County shall be updated by the responsible service providers as soon as possible after the filing of applications to amend the CDMP population projections, and the corresponding elements of the CDMP shall be updated in association with the updating of the facility/service plans.
- LU-5D. When estimates of current population are periodically updated by the Miami-Dade County Regulatory and Economic Resources or U.S. Census Bureau, and when revised projections of future population or population distributions are officially filed by the Department as applications to amend the CDMP, these new estimates and projections may be used for planning in Miami-Dade County in lieu of previously published population estimates and the population projections currently adopted in the CDMP.

#### **Objective LU-6**

**Miami-Dade County shall protect, preserve, ensure the proper management, and promote public awareness of historical, architectural, cultural and archaeologically significant sites and districts in Miami-Dade County, and shall continue to seek the addition of new listings**

**to the National Register, and increase the number of locally designated historical and archeological sites, districts and zones.**

**Policies**

- LU-6A. Miami-Dade County shall continue to identify, seek appropriate designation, and protect properties of historic, architectural, cultural and archaeological significance.
- LU-6B. Miami-Dade County shall place increased emphasis on districts, thematic groups and multiple resource listings with local as well as National Register historic sites.
- LU-6C. Miami-Dade County shall seek financial resources to develop, and promote implementation of management plans for the preservation, protection and adaptive reuse of historic and archaeological resources on County property. The Office of Historic and Archaeological Resources shall identify possible grants and other funding sources to assist County departments with the maintenance and management of their historic resources.
- LU-6D. Public acquisition of historic and archaeological resources shall be pursued when public ownership would provide a major public benefit to the people of Miami-Dade County, when necessary financial resources can be secured, and when public acquisition is the last available resort.
- LU-6E. Historic structures shall be used to accommodate government functions where reuse of a facility is financially and logistically advantageous.
- LU-6F. Miami-Dade County shall seek to develop technical, legal and financial incentive programs to encourage private sector participation in the preservation and protection of historical and archaeological resources.
- LU-6G. Miami-Dade County will continue to provide technical assistance to municipalities with established historic preservation programs that meet the minimum standards set by the County's Historic Preservation Ordinance, and will continue to act as the governing Historic Preservation Board and support staff for those municipalities that do not have their own historic preservation program or ordinance.
- LU-6H. Through the Office of Historic and Archaeological Resources, Miami-Dade County shall improve communication for multi-agency review processes, and expand informational networking with municipal, State and regional agencies and with the Miccosukee Tribe of Indians and private non-profit organizations.
- LU-6I. Miami-Dade County shall pursue efforts with other local, State and federal agencies to develop policies that recognize the importance of designated historic resources and that comply with the provisions of the County's Historic Preservation Ordinance.
- LU-6J. Miami-Dade County shall seek to increase public awareness of the value of local historic and archaeological resources through support from the print and broadcast media, presentations, conferences, seminars and special programs and events such as Dade Heritage Days and National Historic Preservation Week, and by seeking emphasis of local history from Miami-Dade County Public Schools, particularly in grades K through 12.

- LU-6K. Awareness of historic sites and districts shall be promoted through expansion of the historic plaques and markers program; and production and dissemination of publications on local archaeology, and historic sites.
- LU-6L. Through the Office of Historic and Archaeological Resources in consultation with the Department of Regulatory and Economic Resources, Miami-Dade County shall formulate procedures for establishing Thematic Resource Districts (TRDs) and/or Historic Districts. These districts shall contain architectural and landscape design guidelines, and may authorize approval of additional compatible uses, consistent with and which promote the purposes of the particular district.

### **Objective LU-7**

**Miami-Dade County shall require all new development and redevelopment in existing and planned transit corridors and urban centers to be planned and designed to promote transit-oriented development (TOD), and transit use, which mixes residential, retail, office, open space and public uses in a safe, pedestrian and bicycle friendly environment that promotes mobility for people of all ages and abilities through the use of rapid transit services.**

### **Policies**

- LU-7A. Through its various planning, regulatory and development activities, Miami-Dade County shall encourage development of a wide variety of residential and non-residential land uses and activities in nodes around rapid transit stations to promote mobility, produce short trips, minimize transfers, attract transit ridership, and promote travel patterns on the transit line that are balanced directionally and temporally to promote transit operational and financial efficiencies. Land uses that may be approved around transit stations shall include housing, shopping and offices in moderate to high densities and intensities, complemented by compatible entertainment, cultural uses and human services in varying mixes. The particular uses that are approved in a given station area should, a) respect the character of the nearby community, b) strive to serve the needs of the community for housing and services, and, c) promote a balance in the range of existing and planned land uses along the subject transit line. Rapid transit station sites and their vicinity shall be developed as "urban centers" as provided in this plan element under the heading Urban Centers.
- LU-7B. It is the policy of Miami-Dade County that both the County and its municipalities shall accommodate new development and redevelopment around rapid transit stations that is well designed, conducive to pedestrian, bicycle and transit use, and architecturally attractive. In recognition that many transit riders begin and end their trips as pedestrians or bicyclists, pedestrian and bicycle accommodations shall include, as appropriate, continuous sidewalks to the transit station, cross walks and pedestrian signals, bicycle lanes/paths, bicycle parking facilities, small blocks and closely intersecting streets, buildings oriented to the street or other pedestrian/bicycle paths, parking lots predominantly to the rear and sides of buildings, primary building entrances as close to the street or transit stop as to the parking lot, shade trees, awnings, and other weather protection for pedestrians and bicyclists.
- LU-7C. On all streets served by Metrobus and all arterial or collector streets designated in the

Mass Transit Subelement as year 2030 or 2040 potential service areas:

- i) New non-residential buildings and substantial alterations<sup>1</sup> of existing non-residential buildings, and residential buildings wherever practical, shall provide at least one full-time building entrance that is recognizable and accessible from the street and is comparably as close to the street and/or bus stop as it is to the primary parking lot; and
- ii) New residential and non-residential developments, subdivisions and replats shall provide for buildings that front the transit street, or provide streets or pedestrian connections that intersect with the transit street in close proximity to bus stops not more than 700 feet apart and, as appropriate, shall provide for new bus stops and/or pullouts.

- LU-7D. Redevelopment of property within one-half mile of existing or planned mass transit stations and bus routes shall not cause an increase in walking distances from nearby areas to the transit services and shall, wherever practical, be done by establishing blocks of walkable scale that form an interconnected network of streets, maximizing connectivity with existing streets and promoting a comfortable and attractive environment for pedestrians of all ages and abilities.
- LU-7E. Land uses that are not conducive to public transit ridership such as car dealerships, car oriented food franchises, and uses that require transporting large objects should not be permitted to locate or expand within 1/4 mile of rail rapid transit stations.
- LU-7F. Residential development around existing and proposed rapid transit stations should have a minimum density of 15 dwelling units per acre (15 du/ac) within 1/4 mile walking distance from the stations and 20 du/ac or higher within 700 feet of the station, and a minimum of 10 du/ac between 1/4 and 1/2 mile walking distance from the station. Business and office development around rail stations should have a minimum intensity of 1.5 FAR within 1/4 mile walking distance from the station, 2.0 FAR within 700 feet, and 1.0 FAR between 1/4 and 1/2 mile walking distance from the station. Where existing and planned urban services and facilities are adequate to accommodate this development as indicated by the minimum level-of-service standards and other policies adopted in this Plan, and where permitted by applicable federal and State laws and regulations, these densities and intensities shall be required in all subsequent development approvals. Where services and facilities are currently or projected to be inadequate, or where required by Policy LU-7A, development may be approved at lower density or intensity provided that the development plan, including any parcel plan, can accommodate, and will not impede, future densification and intensification that will conform with this policy.
- LU-7G. Miami-Dade County should partner with the Transportation Planning Organization (TPO) and affected municipalities to establish a systematic program that will produce transit-oriented development (TOD) plans for the areas within ¼ to ½ mile around all Metrorail, the Miami Intermodal Center (MIC), and Strategic Miami Area Rapid Transit (SMART) Plan rapid transit corridor stations. Transit-oriented development is a mix of land uses that promotes transit use and decreases the dependence on automobiles. A phasing program shall also be established as part of this effort to initiate and

---

<sup>1</sup> Substantial alteration, as the term is used in this section, shall mean repair, modification, reconstruction, addition to, or other change to a building during any ten-year period which exceeds 50 per cent of the fair market value of the building.

formulate updated or new station area plans based on the overall priority categories for urban centers established by the Board of County Commissioners. Within each priority category, the factors for individual area plans may include such conditions as locations and amounts of undeveloped and underutilized land providing development and redevelopment opportunities, ownership, land use patterns, infrastructure and service levels, recent and nearby development activity, and expressions of interest in cooperating by the municipalities. Priority for station development or improvement shall be for those municipalities that have established zoning standards that ensure minimum average residential density and non-residential intensity in accordance with Policy LU-7F.

- LU-7H. The Department of Regulatory and Economic Resources shall review land development regulations to identify reforms that would invite, and not impede, transit-oriented development in the station areas, by the year 2020.
- LU-7I. Miami-Dade County will continue to review development incentives to encourage higher density, mixed use and transit-oriented development at or near existing and future transit stations and corridors, and continue to update its land development regulations to remove impediments and promote transit-oriented development.

#### **Objective LU-8**

**Miami-Dade County shall maintain a process for periodic amendment to the Land Use Plan map consistent with the adopted Goals, Objectives and Policies of this plan, which will provide that the Land Use Plan map accommodates projected countywide growth.**

#### **Policies**

- LU-8A. Miami-Dade County shall strive to accommodate residential development in suitable locations and densities which reflect such factors as recent trends in location and design of residential units; a variety of affordable housing options; projected availability of service and infrastructure capacity; proximity and accessibility to employment, commercial, cultural, community, and senior centers; character of existing adjacent or surrounding neighborhoods; avoidance of natural resource degradation; maintenance of quality of life and creation of amenities. Density patterns should reflect the Guidelines for Urban Form contained in this Element.
- LU-8B. Distribution of neighborhood or community-serving retail sales uses and personal and professional offices throughout the urban area shall reflect the spatial distribution of the residential population, among other salient social, economic and physical considerations.
- LU-8C. Through its planning, capital improvements, cooperative extension, economic development, regulatory and intergovernmental coordination activities, Miami-Dade County shall continue to protect and promote agriculture as a viable economic use of land in Miami-Dade County.
- LU-8D. The maintenance of internal consistency among all Elements of the CDMP shall be a prime consideration in evaluating all requests for amendment to any Element of the Plan. Among other considerations, the LUP map shall not be amended to provide for additional urban expansion unless traffic circulation, mass transit, water, sewer, solid

waste, drainage and park and recreation facilities necessary to serve the area are included in the plan and the associated funding programs are demonstrated to be viable.

LU-8E. Applications requesting amendments to the CDMP Land Use Plan map shall be evaluated for consistency with the Goals, Objectives and Policies of all Elements, other timely issues, and in particular the extent to which the proposal, if approved, would:

- i) Satisfy a deficiency in the Plan map to accommodate projected population or economic growth of the County;
- ii) Enhance or impede provision of services at or above adopted LOS Standards;
- iii) Be compatible with abutting and nearby land uses and protect the character of established neighborhoods; and
- iv) Enhance or degrade environmental or historical resources; and
- v) Enhance or degrade systems important to the County as a whole including regional drainage, emergency management, transit service, roadways, facilities of countywide significance, and water quality; and
- vi) If located in a planned Urban Center, or within 1/4 mile of an existing or planned transit station, exclusive busway stop, transit center, or standard or express bus stop served by peak period headways of 20 or fewer minutes, would be a use that promotes transit ridership and pedestrianism as indicated in the policies under Objective LU-7, herein.

LU-8F. The Urban Development Boundary (UDB) should contain developable land having capacity to sustain projected countywide residential demand for a period of 10 years. The estimation of this capacity shall include the capacity to develop and redevelop around transit stations at the densities recommended in policy LU-7F. The adequacy of non-residential land supplies shall be determined on the basis of land supplies in subareas of the County appropriate to the type of use, as well as the Countywide supply within the UDB. The adequacy of land supplies for neighborhood- and community-oriented business and office uses shall be determined on the basis of localized subarea geography such as Census Tracts, Minor Statistical Areas (MSAs) and combinations thereof. Tiers, Half-Tiers and combinations thereof shall be considered along with the Countywide supply when evaluating the adequacy of land supplies for regional commercial and industrial activities.

LU-8G. When considering land areas to add to the UDB, after demonstrating that a need exists, in accordance with the foregoing Policy LU-8F:

- i) The following areas shall not be considered:
  - a) The Northwest Wellfield Protection Area located west of the Turnpike Extension between Okeechobee Road and NW 25 Street and the West Wellfield Protection Area west of SW 157 Avenue between SW 8 Street and SW 42 Street;
  - b) Water Conservation Areas, Everglades National Park, Biscayne National Park, Pennsuco Wetlands, and Bird Drive Wetlands, as depicted on Figure 14;

- c) Comprehensive Everglades Restoration Plan project footprints delineated in Tentatively Selected Plans and/or Project Implementation Reports;
- d) The Redland area south of Eureka Drive (SW 184 Street);
- e) Areas within the accident potential zones of the Homestead Air Reserve Base; and
- f) Applications for residential land uses within the Coastal High Hazard Areas

ii) The following areas should be avoided:

- 1) Wetlands of Regional Significance as depicted on Figure 14 of the Land Use Element not otherwise listed in subsection (i)(b) of this policy; and
- 2) Land designated Agriculture on the Land Use Plan map, except where located in designated Urban Expansion Areas (UEAs); and
- 3) Comprehensive Everglades Restoration Plan projects identified in the 1999 Final Integrated Feasibility Report and Programmatic Environmental Impact Statement, as may be modified formally or informally by the United States Army Corps of Engineers or the South Florida Water Management District or that have been approved by the South Florida Water Management District Governing Board; and
- 4) Land located within the FEMA V Zone.

iii) The following areas shall be given priority for inclusion, subject to conformance with Policy LU-8F and the foregoing provision of this policy:

- a) Land within Planning Analysis SubTiers having the earliest projected supply depletion year; and
- b) Land within the UEAs and contiguous to the UDB; and
- c) Locations within one mile of a planned urban center or transit service station or bus stop providing peak hour headways of 20 minutes or less; and
- d) Locations having projected surplus service capacity that is unrestricted by this Plan or where necessary facilities and services can be readily extended.

iv) Notwithstanding Policy LU-8G (iii), other land may be included to expand an existing unique regional facility, defined as an existing public facility or attraction of regional prominence that has been constructed on publicly owned land with significant public funding and intergovernmental coordination, if it satisfies all of the following criteria:

- a) The land is within the UEA, is contiguous to the UDB, and is contiguous to a unique regional facility;
- b) The use of the land will be limited to the expansion of the unique regional facility, together with ancillary uses; and

c) The expansion will have a positive economic impact, including increased economic development and tourism.

v) Furthermore, lands within the Area of Impact of the SR-836 southwest extension, as defined in Policy TC-1M, shall not be considered for addition to the UDB if the roadway capacity created by the SR-836 southwest extension is included as a basis for the addition of such lands to the UDB.

LU-8H. In addition to conformance with Policies LU-8F and LU-8G, applications requesting expansion of the UDB must request designation as a "Special District" on the CDMP Land

Use Plan map and include a text amendment under the “Special District” CDMP text to outline the allowable uses, maximum density, maximum floor area ratio, and how the proposed development will satisfy the criteria set forth in this policy. A zoning application must be filed concurrently with the CDMP Land Use Plan map amendment and should meet the following criteria to be approved:

- a) Contain a minimum of 10 acres unless the Board of County Commissioners determines a lesser acreage is appropriate; and
- b) Provide a mix of housing types at a minimum density of 10 du/acre for applications that include residential development; and
- c) Provide a minimum FAR of 0.25 for applications that include non-residential development, excluding public uses, public utilities, public institutions, and public facilities, except when such non-residential uses are provided to support residential uses located on the same site; and
- d) Where multiple project phases are proposed, include a phasing schedule that demonstrates that the minimum density and FAR outlined in subsections (b) and (c) will be accomplished in the first phase of development in a recordable instrument in favor of the County; and
- e) Demonstrate that the project will be served by utility water and sewer service and that adequate public facilities and infrastructure (including water, sewer, roadways, mass transit, solid waste, flood protection, parks and schools) are available or, where not available, ensure the provision of such improvements through a recordable instrument in favor of the County; and
- f) Provide for the non-residential needs of the future residents including but not limited to shopping, schools, parks, and necessary public uses or demonstrate that such uses are available within an acceptable distance of the subject property; and
- g) Demonstrate that a jobs to housing ratio of at least 1.5:1 is available within five miles of the subject property or will be provided on-site for future residents; and
- h) Demonstrate that the proposed development will utilize sound urban design principles contained in the County’s Urban Design Manual or other document approved by action of the Board of County Commissioners and will provide for compatibility and connectivity with adjacent urban land uses; and
- i) Incorporate bicycle and pedestrian accessibility throughout the development with connections to adjacent areas, where appropriate; and
- j) Provide adequate buffering to adjacent agricultural land; and
- k) Provide a minimum of 15% of the gross area as open space; and
- l) Protect environmentally-sensitive areas to the maximum extent feasible including consideration of impacts to threatened and endangered species; and
- m) Demonstrate that the proposed development will have a positive net fiscal impact to Miami-Dade County; and
- n) At least 12.5% of the proposed residential units must be priced affordably for individuals earning up to 140% of the Area Median Income; and

- o) Include commitments to ensure that the proposed development will be served by mass transit with at least 20 minute peak hour headways or include a plan to provide such service; and
- p) Include commitments to ensure that the proposed development will not cause a roadway to exceed its adopted level of service standard or further erode the level of service on a failing roadway;
- q) Provide for the preservation of agricultural land commensurate with the impacts of the application on agriculturally-designated land which may include participation in a Transfer of Development Rights program, Purchase of Development Rights program or other similar effort; however, notwithstanding anything in this paragraph to the contrary, in no event shall properties within the Urban Expansion Area be obligated to preserve agricultural land at a 1-to-1 ratio.

LU-8I. By 2021, Miami-Dade County shall develop land development regulations to implement the criteria outlined in Policy LU-8H.

LU-8J. By no later than the time to file an application in the May 2021 CDMP Amendment Cycle to amend the Urban Expansion Areas (UEA), Miami-Dade County shall complete a study of (i) additional areas that may be identified as urban expansion areas, with a goal of replacing the 1,993 acres that were proposed for removal in Application No. 5 of the Evaluation and Appraisal Report amendments in the May 2019 CDMP Amendment Cycle, and (ii) potential additional uses that would be appropriate for the urban expansion areas, particularly near the Homestead Air Reserve Base. A draft of this study shall be made available for review by the public by March 15, 2021.

## **Objective LU-9**

**Miami-Dade County shall continue to maintain, update and enhance the Code of Miami-Dade County, administrative regulations and procedures, and special area planning program to ensure that future land use and development in Miami-Dade County is consistent with the CDMP, and to promote better planned neighborhoods and communities and well designed buildings.**

## **Policies**

LU-9A. To maintain consistency between Miami-Dade County's development regulations and comprehensive plan, Miami-Dade County's land development regulation commission shall review proposals to amend Miami-Dade County's development regulations and shall report on the consistency between said proposals and the CDMP, as required by Chapter 163, F.S.

LU-9B. Miami-Dade County shall continue to maintain, and enhance as necessary, regulations consistent with the CDMP which govern the use and development of land and which, as a minimum, regulate:

- I. Land use consistent with the CDMP Land Use Element and CDMP Level of Service Standards;
- II. Subdivision of land;

- III. Protection of potable water wellfields;
- IV. Areas subject to seasonal or periodic flooding;
- V. Stormwater management;
- VI. Protection of environmentally sensitive lands;
- VII. Signage; and
- VIII. On-site traffic flow and parking to ensure safety and convenience and that no avoidable off-site traffic flow impediments are caused by development. The provisions of Policy TC-3A of the Traffic Circulation Subelement, which address access management, shall apply.

- LU-9C. Miami-Dade County shall continue to encourage and promote the transfer of Severable Use Rights (SUR) from lands which are allocated SURs in Chapter 33B, Code of Miami-Dade County, to land located within the Urban Development Boundary as designated on the LUP map. When revising development regulations such as may be required to comply with Chapter 163, F.S., the County shall seek to create additional incentives for acquisition and use of SURs. As recommended in Miami-Dade County's State Housing Initiatives Partnership (SHIP) Program Housing Incentives Plan, the receiver area density bonuses in Dade's SUR program should be increased to improve the effectiveness of the program and the production of affordable housing. The County shall consider modifying the SUR program to provide for the transfer of development rights from land acquired by government for uses other than residential or commercial purposes to development sites inside the UDB.
- LU-9D. Miami-Dade County shall continue to investigate, maintain and enhance methods, standards and regulatory approaches which facilitate sound, compatible mixing of uses in projects and communities.
- LU-9E. Miami-Dade County shall enhance and formalize its standards for defining and ensuring compatibility among proximate uses, and requirements for buffering.
- LU-9F. Miami-Dade County shall formulate and adopt zoning or other regulations to implement the policies for development and design of Metropolitan and Community Urban Centers established in the CDMP through individual ordinances for each urban center. By 2025, Miami-Dade County shall complete area plans for station locations along the six rapid transit corridors identified in the Strategic Miami Area Rapid Transit (SMART) Plan.
- LU-9G. Miami-Dade County shall review and revise its development regulations to promote building designs in multi-family residential zoning districts which are more compatible with, and sensitive to, surrounding neighborhoods, and to establish minimum densities for development in multifamily residential zoning districts.
- LU-9H. Miami-Dade County shall continue its special area planning program with emphasis on the preparation of physical land use and urban design plans for strategic and high-growth locations, such as urban centers and certain transportation corridors as defined in the CDMP.
- LU-9I. Miami-Dade County shall continue to update and enhance its land development regulations and area planning program to facilitate development of better planned

- neighborhoods and communities, and well-designed buildings, and shall encourage and assist municipalities to do the same.
- LU-9J. Miami-Dade County shall continue to use the design guidelines established in its urban design manual as additional criteria for use in the review of all applications for new residential, commercial and industrial development in unincorporated Miami-Dade County, and shall consider the inclusion of such guidelines into its land development regulations.
- LU-9K. By 2016, Miami-Dade County shall initiate the review and revision of its Subdivision Regulations to facilitate the development of better planned communities. The Public Works Department shall specifically review and update the Subdivision Regulations for urban design purposes. Changes to be considered shall include provisions for:
- a) Open space in the form of squares, plazas, or green areas in residential and commercial zoning categories; and
  - ii) A hierarchy of street types and designs, ranging from pedestrian and bike paths to boulevards that serve both neighborhood and areawide vehicular and pedestrian trip making needs by addressing cross sections, corner radii, connectivity and rationality of street and pathway networks, and balanced accommodation of automobiles, pedestrians, bicyclists, and landscaping.
- LU-9L. Miami-Dade County shall formulate and adopt zoning overlay or other regulations applicable to land outside the Urban Development Boundary to orient the uses allowed in business and industrial zoning districts to those which support the rural and agricultural economy of the area. Uses permitted by right would relate exclusively to agricultural or mining industries, and other uses would be approvable as special exceptions upon demonstration that the use supports the non-urban economy of that area or is required by residents of the immediate area.
- LU-9M. Building, zoning and housing codes will be vigorously enforced in all areas of Miami-Dade County.
- LU-9N. Miami-Dade County shall continue to update its land development regulations on a regular basis in order to address code amendments recommended by CDMP policy, code deficiencies or changing conditions.
- LU-9O. Miami-Dade County shall revise land development regulations to allow live-work units and structures in urban centers and all land use categories that permit the mixture of residential and non-residential uses. Live-work refers to one or more individuals living in the same building where they earn their livelihood usually in professional, artisanal or light industrial activities. The quiet enjoyment expectations of the residential neighbors take precedence over the work needs in a live-work unit or building. Toward this end, the occupational use of the unit shall not include non-resident employees or walk-in trade. No outdoor activity; noise, vibration, odor, electric interference or other effect of the occupation shall be detectable outside the live-work unit. The regulations should provide for disclosure of neighboring industrial and commercial activities to prospective residential tenants and purchasers.
- LU-9P. Miami-Dade County shall revise land development regulations to allow work-live units in the Business and Office and Industrial and Office land use categories. The term

work-live means that the needs of the work component takes precedence over the quiet expectations of residents, in that there may be noise, odors, or other impacts of the business, as well as employees, walk-in trade or sales. The predominant use of a work-live unit is industrial or commercial work activity and residential activity is secondary.

- LU-9Q. The County shall coordinate with affected municipalities to prepare plans for areas designated as “urban centers” on the Land Use Plan Map, and other small area and neighborhood plans as needed and appropriate. These plans shall formulate a vision for the development and redevelopment of these areas in order to identify appropriate locations for higher density development, recommend area specific design requirements, and produce working and living environments that reflect community goals.
- LU-9R. Miami-Dade County shall conduct a study to address minimum requirements for off-street parking and shared parking in transit corridors and areas with mixed use developments.
- LU-9S. Miami-Dade County shall continue to review, analyze, and revise as necessary the land use intensity standards established in the CDMP, particularly as they apply to non-residential development, to ensure consistency between intensity standards for Urban Centers and those that apply to the Urban Infill Area, the Urbanizing Area (the area between the Urban Infill Area and the Urban Development Boundary) and outside the Urban Development Boundary. The review, analysis and revision shall also address the need for minimum standards as well as maximums. Following revision of these standards, consideration shall be given to countywide adoption of them and establishment of a joint/city review board to address instances where standards cannot reasonably be met.
- LU- 9T. The County shall consider provisions to allow horizontal mixed-use developments, defined as the horizontal integration of parcels with different primary uses within the same site or block, in appropriate future land use categories in the Urban Development Boundary.
- LU- 9U. By 2015, Miami-Dade County shall evaluate and propose update(s) to the Guidelines for Urban Form, Mixed Use Development and Urban Center provisions of this plan in coordination with the “Complete Streets” program to be developed pursuant to Transportation Element Objective TE-4. The updates shall address, as appropriate, the maximum allowable FARs, intensity and density of development, allowances that facilitate transit supportive mixed developments, and shall enhance and further the implementation of the County Area Planning Program and support the intent of the Complete Streets Program.
- LU-9V. By 2020, Miami-Dade County shall adopt form-based zoning regulations to implement the mixed-use development provisions for areas within the Rapid Transit Activity Corridors. Such regulations shall, at a minimum, address compatibility with adjacent land uses, use of alternate modes of transportation, and connectivity between land uses and transit.

## Objective LU-10

**Miami-Dade County should achieve a countywide reduction in greenhouse gas emissions by 80% from the baseline year of 2008 to 2050 and work to achieve zero emissions for countywide energy sources. Miami-Dade County should encourage development patterns that reduce emissions and promote energy efficiency.**

### Policies

- LU-10A. Miami-Dade County shall facilitate contiguous urban development, infill, redevelopment of substandard or underdeveloped urban areas, moderate to high intensity activity centers, mass transit supportive development, and mixed-use projects to reduce emissions and promote energy conservation. To facilitate and promote such development Miami-Dade County shall orient its public facilities and infrastructure planning efforts to minimize and reduce deficiencies and establish the service capacities needed to support such development.
- LU-10B. Miami-Dade County shall continue to update and refine the inventory of countywide greenhouse gas emissions utilizing current data. Further, the County should assess the carbon storage and sequestration capacity of natural and other areas within the County.
- LU-10C. Miami-Dade County shall encourage energy conservation by adopting Florida Green Building Coalition, US Green Building Council Leadership in Energy and Environmental Design (LEED), or other acceptable commercial building standards for County-owned facilities and the Institute for Sustainable Infrastructure Envision standards for County-owned infrastructure.
- LU-10D. Miami-Dade County shall promote energy conservation by encouraging builders, remodelers, homeowners and homebuyers to implement ENERGY STAR, Florida Green Building Coalition green home or other acceptable environmental standards and by encouraging site planners and land developers to implement Florida Green Building Coalition, US Green Building Council Leadership in Energy and Environmental Design (LEED), or other acceptable commercial building standards.
- LU10-E. Miami-Dade County shall continue to investigate opportunities to incentivize energy efficiency and, as appropriate, access available incentives and/or information regarding available incentives and make such information or accessed incentives available for developers and property owners to incorporate energy efficiency and other conservation measures that meet recognized green building standards into the design, construction or rehabilitation of their buildings.
- LU-10F. Miami-Dade County should implement programs to encourage large-scale facilities to track water and electricity consumption and provide efficiency improvements.
- LU-10G. Miami-Dade County shall coordinate with municipalities in the County to develop a greenhouse gas emissions inventory and regional plan that establishes short-, mid-, and long-term greenhouse gas reduction targets and strategies.
- LU-10H. Miami-Dade County shall take steps towards having 30% of countywide energy obtained from solar by 2030 with the ultimate goal of achieving zero emissions for countywide energy sources.

- LU-10I. Miami-Dade County shall consider strategies to reduce the urban heat island effect which may include requirements for high albedo surfaces, porous pavement, tree canopy, and cool roofs.
- LU-10J. By 2025, Miami-Dade County shall consider strategies to expand the availability of electric vehicle charging infrastructure throughout the County.
- LU-10K. Miami-Dade County should take steps to reduce greenhouse gas emissions for County facilities and operations by decreasing fuel consumption, reducing electricity usage and increasing use of renewable energy sources, among other strategies. Specific measures should include:
- 1) Reducing the consumption of gasoline in County operations by 30 percent and the consumption of diesel fuel in County operations by 70 percent from the baseline year of 2016 to 2028 and further move toward conversion of the County's fleet to electric vehicles; and
  - 2) Incorporating green building practices into the design of County facilities and infrastructure; and
  - 3) Reducing electricity usage for County facilities by 20% from the baseline year of 2009 to 2025.

#### **Objective LU-11**

**Miami-Dade County shall take specific measures to promote redevelopment of dilapidated or abandoned buildings and the renovation, rehabilitation or adaptive reuse of existing structures.**

#### **Policies**

- LU-11A. The Department of Regulatory and Economic Resources will develop and maintain an appropriate methodology (model), which contains relevant variables and has been validated with respect to accuracy for indicating sites, which have a high potential for redevelopment. The results from applications of this model will be reported annually.
- LU-11B. Miami-Dade County shall continue to utilize its Community Redevelopment Area (CRA) Program and federal programs such as the Community Development Block Grant and the HOME program to facilitate redevelopment of dilapidated or abandoned buildings and the renovation, rehabilitation or adaptive reuse of existing structures in eligible areas.

#### **Objective LU-12**

**Miami-Dade County shall take specific measures to promote infill development that are located in the Urban Infill Area (UIA) as defined in Policy TC-1B or in an built-up area with urban services that is situated in a Community Development Block Grant (CDBG)-eligible area, a Targeted Urban Area identified in the Urban Economic Revitalization Plan for Targeted Urban Areas, an Enterprise Zone established pursuant to state law.**

## **Policies**

- LU-12A. The Department of Regulatory and Economic Resources will utilize its Geographic Information System (GIS) Land Use File to identify vacant sites, which might be suitable for infill housing. An infrastructure assessment will also be carried out and the results forthcoming from this process will be reported annually by the Department.
- LU-12B. Miami-Dade County shall identify and consider for adoption a package of financial and regulatory incentives for new development on vacant properties in the UIA.
- LU-12C. Miami-Dade County shall evaluate the need to designate an Urban Infill Development Area (UIDA) in the CDMP and if needed develop policies specifying that this area shall receive priority for future public and private investments in infrastructure, services, development and compatible redevelopment.
- LU-12D. The County shall consider developing strategies that promote infill development in specific areas.
- LU-12E. Miami-Dade County shall continue to investigate and seek opportunities to incentivize infill development, shall publicize available incentives, and make information regarding available incentives easily accessible to developers and property owners, particularly for infill development that is transit supportive and provides workforce housing. Such incentives may include, but not be limited to, joint development agreements at transit stations and transit centers, and flexibility of development standards, particularly for irregular shaped or otherwise substandard lots.

## **Objective LU-13**

**Miami-Dade County shall implement strategies to reduce the impacts of climate change on the built environment and address the impacts of the built environment on the natural systems that provide protections against the impacts of climate change.**

## **Policies**

- LU-13A. By 2022, Miami-Dade County shall develop future groundwater maps appropriate for use in the design of structures and stormwater management systems, at a minimum.
- LU-13B. By 2021, Miami-Dade County shall develop a development impact tool or criteria to assess how proposed development and redevelopment project features including location, site design, land use types, density and intensity of uses, landscaping, and building design, will help mitigate climate impacts or may exacerbate climate related hazards. The tool would also assess each development's projected level of risk of exposure to climate change impacts, such as inland flooding.
- LU-13C. Miami-Dade County shall designate areas vulnerable to coastal flooding, storm surge and sea level rise impacts as Adaptation Action Areas and identify policies, capital projects and funding to address such vulnerabilities. Miami-Dade County shall coordinate with its local municipalities to identify Adaptation Action Areas within municipal boundaries and assist with multi-jurisdictional solutions to address identified vulnerabilities.

LU-13D. Miami-Dade County shall continue to identify and address public buildings and infrastructure vulnerable to sea level rise and other climate change related impacts. This analysis shall include public buildings, water and waste water treatment plants, transmission lines and pump stations, stormwater systems, roads, rail, bridges, transit facilities and infrastructure, airport and seaport infrastructure, libraries, parks, fire and police stations and facilities. Miami-Dade County shall identify funding sources to address identified vulnerabilities with priority given to addressing vulnerabilities to critical facilities and infrastructure.

LU-13E. The design, location, and development of infrastructure and buildings operated by or on behalf of Miami-Dade County shall include evaluation of sea level rise utilizing the Unified Sea Level Rise Projection presented below. Miami-Dade County shall develop a sea level rise checklist for use when analyzing County projects.

Source: Unified Sea Level Rise Projection Report (2019), Southeast Florida Regional Climate Change Compact

LU-13F. In order to address and adapt to the impacts of climate change, Miami-Dade County shall continue to improve analysis and mapping capabilities for identifying areas of the County vulnerable to sea level rise, tidal flooding and other impacts of climate change.

LU-13G. Miami-Dade County shall develop standards for adapting the built environment to the impacts of climate change as an integral component of all planning processes, including but not limited to comprehensive planning, infrastructure planning, building and life safety codes, emergency management and development regulations, stormwater management, and water resources management.

LU-13H. Miami-Dade County shall continue to actively participate in the Southeast Florida Regional Climate Change Compact and collaborate to increase regional climate change resiliency by sharing technical expertise, assessing regional vulnerabilities,

advancing agreed upon mitigation and adaptation strategies and developing joint state and federal legislation policies and programs.

- LU-13I. Miami-Dade County shall support the implementation of climate change related policies, through education, advocacy and incentive programs. Public outreach, such as workshops or a website with relevant information, shall seek to shift residents' everyday transportation decisions and housing choices to support transit oriented communities and travel patterns. The County shall provide opportunities for the public, including students, building industry and environmental groups, to participate in the development of climate change related land development regulations and initiatives.

I

PARTIAL PAGE INTENTIONALLY LEFT BLANK

## **Interpretation of the Land Use Plan Map: Policy of the Land Use Element**

This text, which is adopted as County policy, describes each land use category shown on the Land Use Plan (LUP) map, and explains how each category and the Map are to be interpreted and used. Adherence to the LUP map and this text is a principal, but not the sole, vehicle through which many of the goals, objectives and policies of all elements of the CDMP are implemented. The LUP map illustrates where development of various types and densities, including agriculture, is encouraged and areas where natural resource-based development and environmental protection are encouraged. The LUP map also depicts the general location of physical features such as roadways, railways, canals, manmade lakes and ponds. Additional density and uses may be allowed pursuant to the Mixed Use Development text and other policies set forth in this Plan.

The LUP map provides six Residential Communities categories organized by gross density ranges. The non-residential land use categories, notably industrial, office, business, institutional, public facilities and transportation terminals, are organized by the types of predominant uses allowed or encouraged on land so designated, and relative intensities of development authorized in these categories are expressed as allowable land uses, as contrasted with land uses allowed in other LUP map categories. The specific intensity of development which may be approved on a particular parcel designated in a non-residential category on the LUP map will be dependent on the particular land use, design, urban service, environmental, and social conditions on and around the subject parcel at the time of approval including consideration of applicable CDMP goals, objectives and policies, including provisions of this text chapter, and provisions of applicable land development regulations which serve to implement the comprehensive plan. At a maximum, unless otherwise provided in this Plan, as provided for example for Urban Centers, the following shall be the maximum intensities at which land designated on the LUP map in one or more non-residential categories may be developed. Actual intensities approvable on a given site may be significantly lower than the maximum where necessary to conform with an overriding Plan policy, or to ensure compatibility of the development with its surroundings. Moreover, notwithstanding adoption of these intensity ceilings in the CDMP, estimations of prospective urban service demands or impacts of proposed developments will be based on the actual approved uses and/or intensity of a particular development when applicable, and for purposes of long-range areawide service facility planning purposes, such estimations may be based on averages or trends of development types and intensities in localized areas when consistent with sound service/facility planning practice. The following allowable maximum intensities are expressed as the floor area ratio (FAR) of building square footage (not counting parking structures) divided by the net lot area of the development parcel.

### **Maximum Allowable Non-Residential Development Intensity**

Inside the Urban Infill Area UIA	2.0 FAR
Urbanizing Area, UIA to	
Urban Development Boundary (UDB)	1.25 FAR
Outside UDB	0.5 FAR
[See also Mixed Use Development and Urban Centers]	

In order to maintain the County's adopted minimum level of service standards on all State and County roads adjacent to and in the vicinity of the October 2012 Cycle EAR-Based Amendment Application No. 1, Part C, Parcel 296 to amend the CDMP, which is generally bounded by NW 25 Street on the north, the Homestead Extension of the Florida Turnpike (HEFT) on the east, NW 12

Street on the south, and NW 132 Avenue on the west, the maximum allowable intensity under the CDMP shall be a FAR of 0.40 for the Application area.

In order to maintain the County's adopted minimum level of service standards on all State and County roads adjacent to and in the vicinity of the property subject of the November 2013 Cycle CDMP Amendment Application No. 3, generally located on the northwest corner of NW 47th Avenue and NW 199th Street, the maximum allowable development intensity under the CDMP shall be a FAR of 0.35 for the application area.

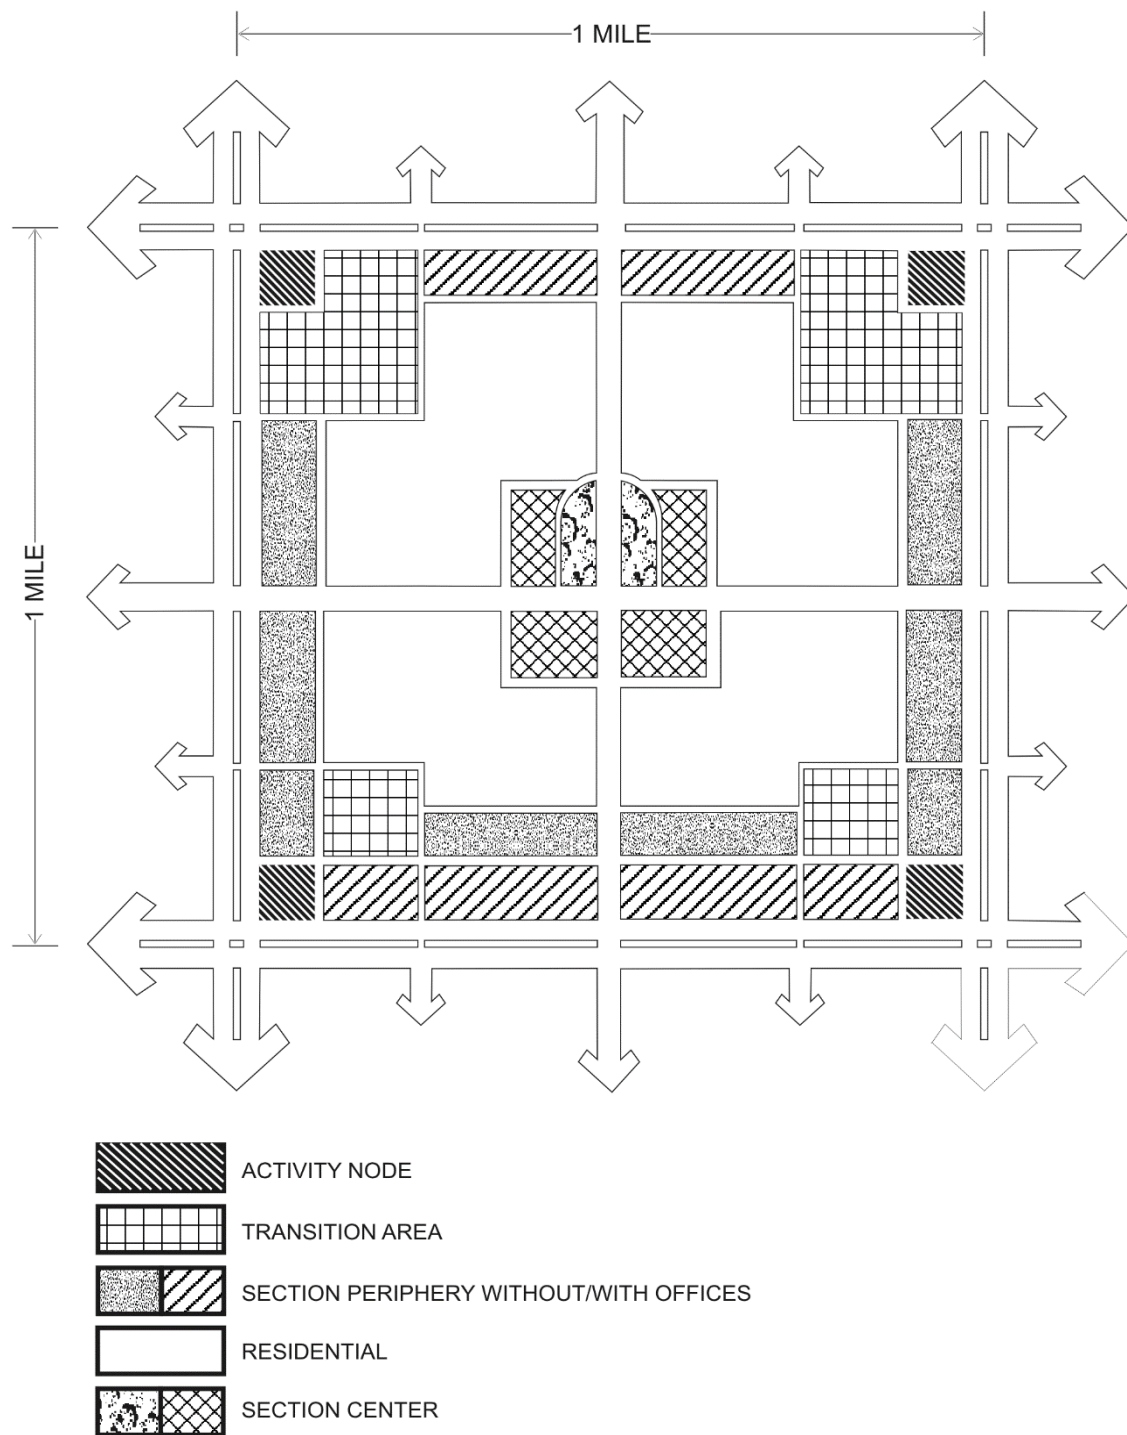

### **Residential Communities**

The areas designated Residential Communities permit housing types ranging from detached single-family to attached multifamily buildings, as well as different constructions systems. Also permitted in residential Communities are neighborhood and community services including schools, parks, houses of worship, day care centers, group housing facilities, and utility facilities only when consistent with other goals, objectives and policies of this Plan and compatible with the neighborhood. The character of the "neighborhood" reflects the intensity and design of developments mix of land uses, and their relationship.

**Guidelines for Urban Form.** The following guidelines establish a generalized pattern for location of different uses, their intensity and density, and the interconnecting network of vehicular and pedestrian movement. The general pattern of land use in residential communities should conform to the following guidelines to the maximum extent consistent with the land use patterns and densities authorized and encouraged by the Land Use Plan (LUP) map, and future amendments to the LUP map should endeavor to promote this localized form within the metropolitan pattern of urban centers and transit corridors. Exceptions may occur (a) for Developments of Regional Impact and Development of County Impact or (b) to conform the density, intensity, use, building, envelope, traffic generation and demand on services and infrastructure of a proposed new use to such contextual elements as the general pattern of use, intensity and infrastructure which exists in an established neighborhood. The general pattern promoted by these guidelines is schematically illustrated in Figure 1.

1. The section line roads should form the physical boundaries of neighborhoods.
2. The section line, half section line, and quarter-section line road system should form a continuous network, interrupted only when it would destroy the integrity of a neighborhood or development, or when there is a significant physical impediment. Pedestrian and vehicular traffic networks should serve as physical links between neighborhoods, with multiple points of access between neighborhoods.
3. Within a section, a variety of residential types and densities are encouraged, with higher densities being located at the periphery, and lower densities in the interior.
4. Intersections of section line roads shall serve as focal points of activity, hereafter referred to as activity nodes. Activity nodes shall be occupied by any nonresidential components of the neighborhood including public and semi-public uses. When commercial uses are warranted, they should be located within these activity nodes. In addition, of the various residential densities which may be approved in a section through density averaging or on an individual site basis, the higher density residential uses should be located at or near the activity nodes.

5. Areas abutting and adjacent to activity nodes should serve as transition areas suitable for eligible higher residential densities, public and semi-public uses including day care and congregate living uses.
6. Areas located along section line roads between transition areas are also authorized for eligible higher residential densities, public and semi-public uses. When section line roads are served by adequate mass transit, these areas are more suitable for office uses than such properties not served by adequate transit.
7. Sites located near the center of the section at or near the intersection of half-section roads may be utilized for neighborhood-serving community facilities such as elementary schools, day care, recreational uses, and open spaces.
8. Pedestrian circulation shall be provided between activity nodes, all public places, and all subdivisions through connectivity of section, half-section and local roadways constructed with sidewalks and supplemented by pedestrian paths.
9. Along arterials, Major and high-speed roadways, pedestrian circulation should be accommodated by sheltering sidewalks from passing traffic by providing landscaping and trees at the street edge. In commercial areas, pedestrian access should be further accommodated by pedestrian pathways from the neighborhood to the business entrances as convenient as those from parking lots, and by providing awnings, overhangs or porticos for protection from the sun and weather.
10. The walling off of neighborhoods from arterial roadways should be avoided by alternatives such as placement of other compatible uses being along the periphery of suburban neighborhoods. These uses include public and semi-public uses, higher density residential building types, and office uses, where any of such uses are otherwise permitted by this category and justified. If lower density residential uses are to be located on an arterial, the building lots should be provided with ample setbacks, side yards and block ends should face the arterial, frontage roads may be utilized, or landscaping should be used in lieu of continuous walls.
11. In planning and designing new residential developments, the frontages of public canals should be designed to remain open and accessible to neighborhood residents by such measures as the provision of adjoining frontage streets, and the avoidance of platting new contiguous building lots which would back up to the canal rights of way and prevent access. Similarly, new developments should be designed so that at least a portion of the shoreline of private water bodies will remain visible and accessible to neighborhood residents.

SOURCE: DEPARTMENT OF REGULATORY AND ECONOMIC RESOURCES, 2004

Figure 1  
**GENERALIZED NEIGHBORHOOD  
 DEVELOPMENT PATTERN**

**DEPARTMENT OF REGULATORY  
 AND ECONOMIC RESOURCES**

**Gross Residential Density.** The basic unit of measurement of residential density is "dwelling units per gross residential acre." Among the land uses that may be included in the "gross residential acreage" when computing the number of dwelling units permitted per gross acre in a residential communities area are the following: housing; streets; public schools; local public parks; fire stations; police stations; private recreational open spaces that are protected by covenant; public or semipublic utility sites, easements or rights-of-way donated at the time of development approval; and nature preserves and water bodies created as open-space amenities during project development or credited for density purposes during previous development approval, or inland waters<sup>1</sup> wholly owned by the applicant. The sites of these nonresidential uses may be included in the gross residential acreage only if they are under the same ownership or are multiple ownerships that are legally unified (legally unified development) as the site for which gross density is being determined. Among the uses not considered to be part of the "residential" area when computing the number of units permitted are industrial, commercial and office sites; communication facility sites; utility sites; easements and rights-of-way unless expressly permitted elsewhere in this section; expressways; non-local parks and nature preserves; universities, colleges and other institutional use; any land that has been credited for other development; previously dedicated road rights-of-way; and any already-developed parcels whether underdeveloped or not. Hotels and motels may be approved in certain areas designated as Residential Communities only as provided in the following paragraphs. Where approved in Residential Communities, each hotel or motel unit shall count as two thirds (2/3) of a dwelling unit when calculating gross density. (Motels and hotels that are located in areas designated Business and Office or Industrial and Office on the LUP map are considered to be commercial uses and, therefore, their units are not considered in determining the number of residential units permitted in an area). In contrast, net density is the number of housing units per acre of land that is used exclusively for residential units. For example, a ten-acre parcel of land, half of which is devoted to 30 residential units and half to a park, would have residential development at a NET density of 6 units per acre and a GROSS density of 3 units per acre. Gross density is used for long-range areawide comprehensive planning because it provides flexibility for design and development of varied unit types, while Net density, typically used in zoning and design regulations, provides greater control over physical characteristics of development such as building massing and height.

The Land Use Plan map includes six residential density categories, each of which is defined in terms of its minimum and maximum allowable gross residential density. Development at a lower than maximum density may be required where conditions warrant. For example, in instances where a large portion of the "gross residential acreage" is not part of the "net" residential building area, the necessity to limit the height and scale of the buildings to that compatible with the surrounding area may limit the gross density.

In order to efficiently use, and not prematurely deplete, the finite development capacity that exists inside the Plan's Urban Development Boundary (UDB), land should not be developed at densities lower than the minimum established for each category. Exceptions to the minimums may exist outside transportation or transit corridors where such an exception would serve the interest of compatibility or protect the public health, safety, or important resources. For purposes of this paragraph, transportation and transit corridors are land areas located within 660 feet of planned Major Roadways identified on the LUP map, and within one-quarter mile from existing rail transit

---

<sup>1</sup> Inland water means all freshwater as defined in Chapter 24 of the Code of Miami-Dade County, and any coastal waters as defined in Chapter 24 having no direct physical connection to Biscayne Bay or to a coastal tributary thereof, except as said connection may occur through ground strata.

stations, express busway stops, future transit corridors and planned transit centers identified in the CDMP.

Open space consisting of green spaces such as natural areas, gardens, greens, squares, and plazas; water bodies, and/or recreational facilities shall be provided for each townhouse or multi-family development. Where practical for the planning of new townhouse developments or multi-family developments, an open space network consisting of interconnected active (e.g. play areas, swimming pools and tennis courts) and passive areas shall be provided for. The passive portion of the open space shall include any on-site archaeological or historic sites, environmentally sensitive areas such as wetlands and Natural Forest Communities, water bodies and the shoreline walkway for sites abutting Biscayne Bay or the Atlantic Ocean. The open space for a parcel shall, whenever practical, be connected to the open space of adjacent parcels, the open space network for the neighborhood, and to the County's interconnected system of parks and open spaces including public spaces, natural and cultural places, greenways, trails, and water trails as described in the Parks Open Space System Master Plan. To provide for the open space on a parcel, the clustering of residential structures on the property will be permitted. If a public park with existing recreational facilities or programmed facilities is located within a ¼ mile of a residential parcel, recreational facilities need not be provided on-site. However, the open space requirement must be met, unless authorized after public hearing. The on-site open space shall be maintained by the property owner for rental apartments and by the homeowner association for ownership housing.

**Estate Density.** This density range is typically characterized by detached estates which utilize only a small portion of the total parcel. Clustering, and a variety of housing types may, however, be authorized. The residential densities allowed in this category shall range from a minimum of 1.0 to a maximum of 2.5 dwelling units per gross acre.

**Low Density.** The residential densities allowed in this category shall range from a minimum of 2.5 to a maximum of 6.0 dwelling units per gross acre. Residential densities of blocks abutting activity nodes as defined in the Guidelines for Urban Form, or of blocks abutting section line roads between nodes, shall be allowed a maximum residential density of 10.0 dwelling units per gross acre. To promote infill development, residential development exceeding the maximum density of 6.0 dwelling units per acre is permitted for substandard lots that were conveyed or platted prior to August 2<sup>nd</sup>, 1938. This density category is generally characterized by single family housing, e.g., single family detached, cluster, and townhouses. It could include low-rise apartments with extensive surrounding open space or a mixture of housing types provided that the maximum gross density is not exceeded.

**Low-Medium Density.** This category allows a range in density from a minimum of 6.0 to a maximum of 13 dwelling units per gross acre. The types of housing typically found in areas designated low-medium density include single-family homes, townhouses and low-rise apartments. Zero-lot-line single-family developments in this category shall not exceed a density of 7.0 dwelling units per gross acre.

**Medium Density.** This category allows densities from 13 to 25 dwelling units per gross acre. The type of housing structures typically permitted in this category includes townhouses and low-rise and medium-rise apartments.

**Medium-High Density.** This category authorizes apartment buildings ranging from 25 to 60 dwelling units per gross acre. In this category, the height of buildings and, therefore, the attainment of densities approaching the maximum, depends to a great extent on the dimensions

of the site, conditions such as location and availability of services, ability to provide sufficient off-street parking, and the compatibility with and impact of the development on surrounding areas. The provisions of the section below entitled “Density Increase with Urban Design” are not applicable to this density category.

**High Density.** This category permits from 60 to 125 dwelling units or more per gross acre. This density is found only in a few areas that are located within certain municipalities where land costs are very high and where services will be able to meet the demands.

**Density Increase With Urban Design.** Some parcels are designated on the LUP map both with a color designating the allowable residential density basis and one of two hatch patterns. The hatch pattern labeled on the LUP map legend as DI-1 (Density Increase 1) denotes that the parcel is eligible for approval of one density category higher than the residential density indicated by the underlying color code, and DI-2 denotes eligibility for approval of up to two density categories higher. A property shall be eligible for a DI-1 designation only if the development containing the designated property utilizes sound urban design principles adopted by County ordinance or incorporated in the Urban Design Manual endorsed by Resolution R-1360-98 as may be amended from time to time, or addresses the urban design concerns contained in another binding instrument approved by action of the Board of County Commissioners. A property shall be eligible for a DI-2 designation only if it meets the above urban design principles, is located in a transit corridor and addresses in a development agreement or site plan the urban design concerns of identifying civic areas, defining open spaces and streets, incorporating any historic theme and providing a pedestrian-friendly environment along roadways. For purposes of this paragraph, transit corridors are land areas located within 660 feet of planned Major Roadways identified on the LUP map, and within one-quarter mile from existing rail transit stations, express busway stops, future transit corridors and planned transit centers identified in the CDMP. To provide a transition between the transit corridor and adjacent neighborhoods, the height of buildings along the edge of the corridor should taper for at least 20 horizontal feet to the height of the existing adjacent buildings outside the corridor. However, where the adjacent property is vacant, heights of buildings at the edge of the corridor may be based on adopted comprehensive plans and the zoning of the surrounding area. Existing or proposed developments with vehicular entrances that are controlled or have entry gates with private streets are not eligible for a density increase designation of DI-1 or DI-2. If the referenced urban design principles are not employed, the allowable density shall be limited to that authorized only by the underlying color code.

 (DI-1) One Density Increase With Urban Design

 (DI-2) Two Density Increase With Urban Design

**Density Bonus Programs for Affordable/Workforce Housing:** The following describes the various density bonus incentives for affordable housing and workforce housing that may be approved:

**17% Density Bonus for Affordable Housing:** A density bonus up to 17% above the maximum land use designation may be approved if it is certified that that no less than 30% of the units in the development, excepting accessory dwelling units, will be priced affordable to low and very-low income households (households at or below 80% of the Area Median Income [AMI]).

**25% Density Bonus for Workforce Housing:** Through the Voluntary Inclusionary Zoning program, a density bonus of up to 25% may be allowed for projects that set aside residential

units for workforce housing. The Workforce Housing Development Program (Voluntary Inclusionary Zoning program) defines workforce as households with incomes between 60 and 140% of the County's Area Median Income.

**30% Density Bonus for Affordable/Workforce Multifamily Housing:** A density bonus of up to 30% above the maximum allowable density may be approved for projects that are located in close proximity to transit service and provide a mix of market rate, workforce and affordable housing opportunities. Below is a list of the conditions that must be met for the 30% density bonus to be awarded:

- 1) At least 30% of the total residential units shall be priced affordable to households at or below 140% of the AMI, and no less than 20% of the total units shall be priced affordable to households at or below 80% of the AMI for a period of no less than 30 years, pursuant to a deed restriction;
- 2) The site shall have a land use designation of Low-Medium Density Residential, Medium Density Residential, Medium-High Density Residential, Office/Residential, or Business and Office (Estate, Low Density or High Density land use designations shall not be eligible);
- 3) The site shall front a major roadway and be located within ¼ mile radius of transit service, which is defined as a transit station or bus stop with at least one route that provides 20 minute peak-hour headways or better during weekdays;
- 4) The location of the site shall be consistent with the guidelines for urban form;
- 5) The site is located within ½ mile radius of activity nodes with neighborhood retail establishments;
- 6) The property is located within ½ mile radius of public recreational open space or a public school, unless 15% of the site is set aside for recreational open space facilities. Recreational facilities are defined as play areas, swimming pools, tennis courts, and other active outdoor facilities.
- 7) Existing and planned public services and facilities, including water and sewer facilities, shall be adequate to serve the maximum development allowed on the proposed site; and
- 8) The development shall obtain a certification rating from LEED (Leadership in Energy and Environmental Design) or a similar organization accredited by the U.S. Green Building Council (USGB); and

**60% Density Bonus for Not-for-Profit or Government/Public Sponsored Affordable Housing Providers:** A density bonus of up to 60% above the maximum allowable density may be permitted if: 1) the developer is a not-for-profit affordable housing provider, a government/public sponsored affordable housing provider, or if the application site is publicly owned and made available for the development of affordable/workforce housing; and 2) all the conditions for the 30% Density Bonus for Affordable/Workforce Multifamily Infill Housing are satisfied. A government/public sponsored affordable housing provider is defined as a private developer or organization that has been awarded public funding or is participating in a public housing program to develop affordable/workforce housing, and/or a private developer or organization that has received approval to develop affordable/workforce housing on a County or publicly owned site either through donation of the land, a lease, or other form of legal agreement.

Density Bonus programs of 30% or higher shall only take effect upon the adoption of an ordinance providing for implementation of such programs. A density bonus of 30% or higher may only be approved following public hearing.

To be eligible for any of the density bonuses described above, the proposed development shall be consistent with the adopted goals, objectives, and policies of the Comprehensive Development Master Plan. The actual density achieved on a particular property will depend on all applicable land development regulations and compatibility standards. Sites shall be within the Urban Development Boundary, and sound urban design principles adopted by County ordinance or other binding instrument approved by action of the Board of County Commissioners must be applied. Appropriate compatibility standards must be followed to assure that the proposed development is compatible or made compatible with any adjoining or adjacent uses. Density bonuses shall not be combined. Furthermore, all residential units set aside for workforce housing or affordable housing should be disbursed throughout the housing development and be similar in size and type, as well as appearance on the exterior from non-set-aside units in the housing development. Prior to receiving the certificate of occupancy for market-rate units, all of the affordable housing units shall be under actual construction.

**Transferrable Development Rights.** Miami-Dade County may create and implement Transfer of Development Rights (TDR) programs to provide for the preservation of agricultural land, environmentally sensitive land, historic structures, archaeological resources, or to ensure airport compatibility. The entire area within the UDB may be eligible to receive and utilize Transferrable Development Rights (TDRs) including Severable Use Rights (SURs). When TDRs are utilized on parcels within the designated receiving area, development shall be allowed to exceed the maximum density or Floor Area Ratio limits designated for the site or affected portions of it; however, this provision does not authorize the approval of a zoning district that would exceed the Plan limits without use of TDRs. In no case shall the density cap of the land use category be exceeded by more than 20 percent through the use of TDRs.

By March 2021, Miami-Dade County shall adopt and implement land development regulations establishing a Transferrable Development Rights program that provides for the preservation of agricultural land. These land development regulations may allow development rights to be transferred at a greater ratio to incentivize transfer of development rights from certain areas.

**Density Averaging.** The land use density ceiling designated on the LUP map will apply to every parcel of land. However, in certain instances, the averaging of density may be authorized among different parcels. Specific provisions for this to occur are specified below. All of the following allowances are limited to lands located within the Urban Development Boundary, which are designated for urban uses. Where groups of parcels under a single ownership or multiple ownerships that are legally unified (hereinafter legally unified development) are located within a unit area bounded by Major or Minor Roadways as indicated on the Land Use Plan map, portions of the unified development may be developed at densities higher than that shown on the LUP map provided that other portions are developed at correspondingly lower densities so that the average density of the entire development does not exceed the maximum gross density limits shown on the LUP map. Where a parcel or group of contiguous parcels under a single ownership or legally unified development has two different LUP map residential designations, the number of units permitted under one designation may be averaged with the number of units permitted under the other and developed at varying densities providing that the total number of units built on such property does not exceed the total number permitted under the two designations. Further, where 50 percent or more of the boundary of a parcel or group of contiguous parcels, not exceeding 20

acres in size, adjoins land that is developed or zoned for densities that are higher than those which are shown on the LUP map, such property may be zoned for a density higher than that shown on the LUP map but not higher than the highest density which is permitted by zoning on the adjoining properties. Density may be transferred across a Major or Minor roadway to an adjacent and legally unified parcel or portion thereof contiguous to the Roadway provided, further, that the site receiving the increased density shall be developed at a density no greater than the higher of adjoining or adjacent existing residential development or zoning, or if the adjoining land is undeveloped and not zoned for urban use, one density category higher than the LUP map designation of the parcel. The above provisions, however, are all conditioned upon a determination being made that the requested density and housing types are compatible with the surrounding development and would not create a significant negative impact on services within the area.

The land use and residential density patterns indicated for municipalities represent the development basis that Miami-Dade County will use to plan and program public facilities and services that are its responsibility. The patterns of land use and densities indicated along municipal boundaries also seek to minimize conflicts between different jurisdictions. Because municipal planning agencies possess greater familiarity and the authority to plan land use of their jurisdiction, adopted municipal comprehensive plans may average densities among different density categories indicated on the LUP map, within unit areas bounded by Major and Minor Roadways indicated on the Land Use Plan map. However, the total potential number of dwelling units and acreage of other land uses should not be changed from the total indicated by the County plan for the unit area bounded by these roadways. Moreover, maintenance of compatible uses and housing types at local government jurisdictional boundaries is particularly important.

**Housing Variety.** Residential communities having a variety of housing types, such as standard single-family detached homes, townhouse, other single-family attached homes, and multi-family units, are encouraged by this plan. Toward this end, all new residential developments should include housing types, which will contribute to the diversity of housing types in the immediate area, and in all instances residential developments exceeding 40 acres in size shall contain more than one of the foregoing housing types. It is especially important to mix townhouses with single-family detached and the former with multi-family units. Multi-family buildings should offer a variety of sizes ranging from efficiency units through two and three bedroom apartments.

**Accessory Dwelling Units.** Accessory dwelling units ranging from 400 to 800 square feet of habitable area are authorized on single-family lots with a minimum area of 7,500 square feet that are located inside the Urban Development Boundary. The appearance of the structure(s) containing the primary and accessory units shall maintain an appearance consistent with the character of the neighborhood. Accessory dwelling units provided in accordance with this section shall not be counted toward the LUP map residential density maximum which governs the subject property.

**Uses and Zoning Not Specifically Depicted.** As provided in the previous paragraphs, mixing of different housing types and densities is allowed within certain unit areas. The average gross residential densities depicted on the Land Use Plan map reflect such averaging. They also reflect certain non-residential use sites previously credited in accordance with the section titled "Gross Residential Density" and its predecessor standard.

Existing lawful residential and non-residential uses and zoning are not specifically depicted on the LUP map. They are however reflected in the average Plan density depicted. All such lawful uses and zoning are deemed to be consistent with this Plan as provided in the section of this

chapter titled "Concepts and Limitations of the Land Use Plan Map." The limitations referenced in this paragraph pertain to existing zoning and uses. All approval of new zoning must be consistent with the provisions of the specific category in which the subject parcel exists, including the provisions for density averaging and definition of gross density.

**Other Potential Uses in Residential Communities.** The uses generally permitted in Residential Communities are listed above under the residential, and gross residential density headings. The establishment of other new uses in residential areas is not allowed; however, under limited circumstances and conditions, some other land uses may be permitted to locate in Residential Communities. These special use situations are described below. No "other new use" in a residential area as described in this section shall be deemed consistent with the CDMP where the use or zoning district has, or would have, an unfavorable effect on the surrounding area: by causing an undue burden on transportation facilities including roadways and mass transit or other utilities and services including water, sewer, drainage, fire, rescue, police and schools; by providing inadequate off-street parking, service or loading areas; by maintaining operating hours, outdoor lighting or signage out of character with the neighborhood; by creating traffic, noise, odor, dust or glare out of character with the neighborhood; by posing a threat to the natural environment including air, water and living resources; or where the character of the buildings, including height, bulk, scale, floor area ratio or design would detrimentally impact the surrounding area.

**Congregate Living Facilities, Group Homes, Foster Homes, Nursing Homes, and Day Care Facilities.** "Congregate residential uses" and nursing homes, with ancillary rehabilitation facilities to serve only the needs of the residents of the home or congregate facility and occupying no more than 10% of the total floor area, may be permitted at suitable locations in Residential Communities in keeping with the following density allowance: Each 2.5 occupants shall be considered to be one dwelling unit, and the maximum number of dwelling units allowed shall be no greater than the number allowed in the next higher residential density category than that for which the site is designated. For example, a ten-acre site located in an area designated for six dwelling units per gross acre may be permitted up to 13 units per gross acre or in this instance, up to 130 units. Assuming 2.5 occupants per unit, up to 325 persons could occupy the site. The foregoing density provision does not apply to "daytime service uses". The intensity of use that may be approved for "daytime service uses" such as day care facilities shall be limited as necessary to be compatible with adjacent uses and to comply with water supply and sewage regulations contained in Chapter 24 of the Miami-Dade County Code.

If located in Estate, Low or Low-Medium Density neighborhoods, congregate residential uses, and daytime service uses such as day care centers, shall locate only in activity nodes, transition areas and section centers as indicated in the Guidelines for Urban Form, or on sites that are transitional to higher density or higher intensity land uses, to public uses or to other areas of high activity or accessibility. In particular, nursing homes are best located on a Major or Minor Roadway and in, or adjacent to commercial or institutional areas, higher density areas or other situations transitional from lower density residential areas.

**Public Facilities.** Large-scale public facilities, institutional and communications uses, and utilities are specifically identified in the Institutions, Utilities, and Communications category on the Plan map. Small-scale uses and the facilities intended to serve the immediate needs of the residential community may be permitted on compatible sites in Residential Communities subject to adequate design and buffering. These facilities include fire stations, electrical sub-stations and distribution facilities, cell antenna, natural gas, telephone, fiber optic, cable, water and sewer facilities. They are preferably located in activity nodes, transition areas, and along major thoroughfares, and also at section centers if designed to serve the immediate neighborhood. Larger uses and facilities

which are designed to serve more than a local area are preferably located in or adjacent to Industrial and Office, or Business and Office areas. Cemeteries may also be permitted in Residential Communities where direct access to a Major or Minor Roadway is provided or where traffic would not disrupt adjacent residential areas.

**Commercial Uses (in Residential Communities).** Commercial uses are prohibited in areas designated as Residential Communities except as specifically provided in this chapter; ample sites for business and office uses are provided in the Business and Office, Industrial and Office, and Office/Residential Categories on the Land Use Plan map. However, under the following specific circumstances limited commercial uses may be authorized in areas designated as Residential Communities.

**Office Uses** smaller than five acres in size may be approved in areas designated as Residential Communities where other office, business or industrial use(s) which are not inconsistent with this plan already lawfully exist on the same block face. However, where such an office, business, or industrial use exists only on a corner lot of a subject block face or block end, approval of office use elsewhere on the block is limited to the one block face or block end which is the more heavily trafficked side of the referenced corner lot. Office uses may be approved on such sites only if consistent with the objectives and policies of the CDMP and the use or zoning district would not have an unfavorable effect on the surrounding area: by causing an undue burden on transportation facilities including roadways and mass transit or other utilities and services including water, sewer, drainage, fire, rescue, police and schools; by providing inadequate off-street parking, service or loading areas; by maintaining operating hours, outdoor lighting or signage out of character with the neighborhood; by creating traffic, noise, odor, dust or glare out of character with the neighborhood; by posing a threat to the natural environment including air, water and living resources; or where the character of the buildings, including height, bulk, scale, floor area ratio or design would be out of scale with the character of the neighboring uses or would detrimentally impact the surrounding area. In applying this provision, the maximum limits of an eligible residentially designated block face along which office uses may be extended shall not extend beyond the first intersecting public or private street, whether existing, platted or projected to be necessary to provide access to other property, or beyond the first railroad right-of-way, utility transmission easement or right-of-way exceeding 60 feet in width, canal, lake, public school, church, park, golf course or major recreational facility.

In addition, office uses may be approved along the frontage of major roadways in residential community areas where residences have become less desirable due to inadequate setbacks from roadway traffic and noise, or due to a mixture of nonresidential uses or activities in the vicinity in accordance with the limitations set forth in this paragraph. These office uses may occur in combination with or independent of residential use. Such limited office uses may be approved on such sites in residential community areas only where: a) the residential lot fronts directly on a Major Roadway as designated on the Land Use Plan map (Frontage roads are not eligible for consideration); b) the lot or site size does not exceed one acre; and c) the residential area is not zoned, developed or designated on the Land Use Plan map for Estate Density Residential, nor does subject frontage face such an Estate Density area. Office use approvals, pursuant to this paragraph may only authorize: a) conversion of an existing residence into an office; b) addition of an office use to an existing residence; or, c) the construction of a new office building on lots which were finally platted prior to March 25, 1991 in a size one acre or smaller. Additionally, such office uses may be approved only if the scale and character of the prospective office use are compatible with the surrounding residential neighborhood and if the site has sufficient dimensions to permit adequate on-site parking and buffering of adjacent residences from the office. Other factors that will be considered in determining compatibility include, but are not limited to traffic, noise, lighting,

shadows, access, signage, landscaping, and hours of operation. Signage shall be restricted both in size, style, and location to preclude a commercial appearance. Landscaping and buffering of adjacent residences and rear properties will be required. Emphasis shall be placed on retention of the general architectural style of the area, where the area is sound and attractive. Development Orders authorizing the conversion of existing homes into offices, the addition of offices to existing residences or the construction of new buildings encompassing office uses pursuant to this paragraph may be approved only where compatible and where the intensity and character of the new building including gross floor area, lot coverage and height, will be consistent with the homes which exist or which could be built on the immediately adjacent parcels.

**Hotels, Motels, and Bed and Breakfasts** shall not be approved in the Estate or Low Density residential categories. They may be approved in the Low-Medium, Medium, Medium-High or High Density residential categories if the site on which the hotel, motel or Bed and Breakfast is located has frontage on a Major roadway as identified on the LUP map and where compatible with adjacent uses. Factors considered in determining compatibility include, but are not limited to traffic, noise, lighting, shadows, on-site parking, landscaping and buffering. In addition, hotel-motel uses may be approved where they are incidental to, and integrated with a recreational facility internal to a planned residential development. Hotel-motel or Bed and Breakfast uses may also be approved as an oceanfront resort or as part of an oceanfront resort.

**Convenience retail facilities** may be permitted in multifamily developments as an accessory use for the convenience of the development's residents. Such facilities shall be restricted in size to relate solely to the needs of the development's residents and shall be limited to convenience commercial and personal service uses such as restaurants, food and drugstores, barbershop and dry cleaning service pick up/drop off. Wherever possible, such uses should be located in the principal structure or in a community service structure. Where this ancillary use must be self-standing, its site shall be no larger than one-half acre per 300 dwelling units. These uses shall not be visible from sites outside the subject development or have direct access from public roads, and shall not utilize signage to attract persons from outside the development. In addition, the location of any such convenience facilities shall be designed as an integral part of the total development, and will be subject to site plan approval.

**Marina facilities and recreation facility clubhouses**, private and semiprivate, (including commercial uses which are incidental and complementary to, and usually associated with, clubhouses, such as pro-shops, snack bars, restaurants, and the sale of alcoholic beverages) within, and primarily designed, sized and scaled to serve the immediate needs of a residential development may also be permitted in the residential classifications if compatible with the neighborhood.

**Neighborhood Corner Store** development may also be considered for approval in Residential Community-designated areas except Estate-designated areas. Up to one acre of neighborhood corner store development may be considered for approval on land designated as Residential Communities for each 600 dwelling units in the development. The siting and design of Neighborhood Corner Store developments on land designated residential communities shall be as consistent as reasonably feasible with the Guidelines for Urban Form presented on the preceding pages.

**Home Occupations.** Home occupations may be approved as a subordinate, accessory, conditional use in single-family residences in accordance with the following conditions: The occupational use must be incidental and secondary to the primary use as a residence; all structures must maintain a residential appearance; no signs or displays are allowed in windows

or outdoors; all occupational materials and activity must occur indoors; employment shall be limited solely to residents who live on the premises; no products or goods in trade may be sold from stock on the premises; no activities will be allowed which cause noise, vibration, heat, light, odor, or electrical interference detectable outside the residence; uses will be restricted to maintain residential traffic characteristics; and periodic inspections, annual operating permits, and business licenses shall be required to protect the safety and tranquility of the residential neighborhood.

**Hospitals in Residential Communities.** New hospitals may not be permitted in Residential Communities except that they may be approved to locate in the Medium-High and High Density categories. They should be located in areas designated Institutional, Business and Office or Industrial and Office. However, existing hospitals and associated medical buildings which are not specifically depicted on the LUP map may be approved for addition or expansion in all density categories where compatible with the surrounding neighborhood. Notwithstanding the foregoing, new outpatient health facilities may be located along a major roadway in Residential Communities, except the Estate Density and Low Density categories, where such facilities are compatible with the surrounding neighborhood.

**Thematic Resource District (TRD).** Pursuant to Land Use Policy LU-6L, Thematic Resource Districts (TRDs) may be established in areas designated as Residential Communities on the LUP map to provide protection and replication of community historical, architectural, design or other physical attributes that constitute aesthetic, cultural and economic assets of the community. TRDs established pursuant to Policy LU-6L may be established in Residential Community areas which allow residential use at a density up to one Land Use Plan map density category higher than the underlying LUP map designation, and compatible non-residential uses.

**Traditional Neighborhood Developments (TNDs).** Traditional neighborhood developments which incorporate a broad mixture of uses under specific design standards may also be approved in Residential Communities in the manner specifically authorized in this subsection. The purpose of the traditional neighborhood development is to enable the creation of new communities that offer social and architectural quality, characteristic of early American town planning. Many of these early models, developed prior to 1940, offer insight into the design of coherently planned communities. The concept is patterned after those inherent in these earlier developments and provides design clarity through a hierarchy of streets, a focus towards pedestrian activity, low scale community support activities and the use of civic symbols of community buildings and open squares as the focal point of the neighborhood. The objectives of a traditional neighborhood development shall include the following:

- To provide a physical environment and to foster a social environment that allows inhabitants to satisfy such basic psychological needs as security, community identity and self-esteem;
- To provide significant employment within the neighborhood, allowing both small and large scale businesses. This mixing of jobs and housing reduces traffic impacts and adds to the liveliness and security of the neighborhood;
- To provide a full range of housing types, from detached single family houses to apartments above shops, fostering social and cultural integration;
- To provide neighborhood civic buildings, squares and parks to reinforce community identity;

- To reduce dependence on the automobile by encouraging foot and bicycle traffic, by providing consumer services, jobs, recreation, and cultural opportunities within walking and cycling distance, and by general compactness of community layout;
- To create streets that accommodate pedestrians as well as automobiles;
- To provide guidelines for building placement and street design that protect the neighborhood environment while allowing latitude for individual choices.

Within areas designated on the LUP map as Residential Communities, a mixed use Traditional Neighborhood Development permitting business, office, industrial, artisanal, live-work, home occupations and other uses authorized by this subsection may be approved providing that the following criteria are met:

1. The minimum contiguous land area is 40 acres and is not located within the Estate Density category; and
2. The site is under single-ownership at the time the master development plan or equivalent is approved; and
3. Residential density does not exceed the density depicted on the Land Use Plan Map, except that a maximum density of ten dwelling units per acre may be approved in the Low Density category; and
4. Public open spaces such as squares or parks comprise a minimum of five acres or five percent of the developed area, whichever is greater; and
5. Civic uses, such as meeting halls, schools, day care centers and cultural facilities comprise a minimum of two percent of the developed area; and
6. Business, office, and industrial uses, that are separate from residential mixed uses do not exceed seven percent of the gross land area; and
7. Where the TND borders or is adjacent to land that is designated Estate, Low Density or Low-Medium Density Residential and the land so designated is used for residences or is vacant, the separate business, office and industrial uses identified in item No. 6 above, and those business, office and industrial uses mixed with other uses shall not be permitted within 175 feet of the TND boundary and all non-residential components of such uses shall be acoustically and visually screened from said bordering or adjacent land; and when a TND borders land designated Agriculture or Open Land, said business, office or industrial uses shall not be permitted within 330 feet of said TND boundary; and
8. Residential areas, and residential uses mixed with shop-front, artisanal home occupation uses comprise the remainder of the developed area; and
9. In calculating gross residential density, uses listed in item No. 6 shall be excluded, however, all other uses may be used to determine the maximum permitted density.

## **Industrial and Office**

Manufacturing operations, maintenance and repair facilities, warehouses, mini-warehouses, office buildings, wholesale showrooms, distribution centers, and similar uses are permitted in areas designated as "Industrial and Office" on the LUP map. Also included are construction and utility-equipment maintenance yards, utility plants, public facilities, hospitals and medical buildings. The full range of telecommunication facilities, including switching and transmission facilities, satellite telecommunications facilities, microwave towers, radar stations and cell towers

is also allowed. Very limited commercial uses to serve the firms and workers in the industrial and office area are allowed dispersed as small business districts and centers throughout the industrial areas. Hotels and motels are also authorized. Freestanding retail and personal service uses and shopping centers larger than 10 acres in size are prohibited in these areas because they would deplete the industrial land supply and they are better located in commercially designated areas and in closer proximity to residential areas. Freestanding retail and personal service uses and shops that are approved in Industrial and Office areas should front on major access roads, particularly near major intersections. In addition, uncommon commercial uses such as amusement uses, and others with unusual siting requirements may also be considered at appropriate locations. Quarrying activities and ancillary uses may also be approved in areas designated Industrial and Office where compatible with the surrounding area and environment. The specific range and intensity of uses appropriate in a particular Industrial and Office area vary by location as a function of the availability of public services and access and, among other factors, compatibility with neighboring development. Through the zoning review process, use of particular sites or areas may be limited to something less than the maximum allowed in this category. Moreover, special limitations may be imposed where necessary to protect environmental resources.

If the land is the subject of an application for rezoning, zoning approval or a plan amendment and is located in an MSA with less than a 15-year supply of industrial land, in order to receive approval for a non-industrial use, the applicant must demonstrate that such use will not have a significant adverse impact on future industrial development.

In general, the typical residential development is incompatible with major industrial concentrations and shall not occur in areas designated as "Industrial and Office" on the LUP map to avoid use conflicts and for health and safety reasons. Exceptions may be granted for the following: (1) the development of live-work or work-live buildings or the adaptive reuse of existing structures for these purposes in areas of light industrial uses such as office, wholesale, distribution and the assembling of pre-manufactured parts; (2) the development of a TND as provided herein; and (3) the residential development of a portion of an industrially designated area where the portion is, a) 10 acres or smaller and is bounded on two or more sides by existing residential development or zoning, or is b) the perimeter of a Plan-designated industrial area which perimeter does not exceed a depth of 150 feet; and c) the subject portion of the industrially designated site immediately adjoins a currently developed or platted residential area and the Director of the Department of Planning and Zoning determines that the inclusion of a residential component in the Industrially designated area, designed to provide compatible transition along the boundary, is the best means of maintaining the quality of the adjoining residential area. Notwithstanding the foregoing, applications for residential zoning that were properly filed prior to August 25, 2000, can be considered where adjoining land is residentially zoned, designated or developed. Residential developments in this land use category may participate in the inclusionary zoning program. The properties utilized for residential development will be eligible within the limits provided in this paragraph for the density allowances of the inclusionary zoning program in the Residential Communities section.

TNDs may be permitted in Industrial and Office areas where: 1) compatible with nearby development and with the objectives and policies of this Plan, 2) necessary services exist or will be provided by the developer, and 3) adjacent to land designated Residential Communities on the LUP map (including across an abutting major or minor roadway) along 30 percent or more of the total perimeter of the TND, provided that land designated Residential Communities exists along at least some portion of the two or more sides. (Multiple sides created by an out parcel shall count as one side only). TND located within Industrial and Office areas shall allocated to

Workshop Uses a minimum of 15 percent and a maximum of 30 percent of the gross built up area planned for development within a TND, and shall have a residential density no greater than the average of the adjacent Residential Communities designations or ten units per acre, whichever is higher. Workshops Uses shall be oriented to adjacent non-residential areas, while the residential uses shall be oriented to the adjacent Residential Communities designations. All criteria for TNDs enumerated in the Residential Communities section of this Chapter, other than the provisions governing percent of built up area which may be devoted to workshop uses addressed herein and the maximum permitted residential density, shall govern the development of TNDs in areas designated Industrial and Office.

**Restricted Industrial and Office.** Industrial and Office areas designated as "Restricted" are areas where the range of uses and design of facilities are governed by special groundwater protection regulations. This category primarily affects "wellfield protection areas" designated in the Miami-Dade County Code (Chapter 24, Code of Miami-Dade County). The boundaries of the "Restricted" areas shall be periodically reviewed and amended as necessary to maintain consistency with wellfield protection area boundaries provided by Chapter 24, Code of Miami-Dade County. Development in Restricted Industrial and Office areas should generally be limited to office uses, but certain business, warehousing and manufacturing uses may be permitted, provided that the use employs best management practices, and the use does not involve the on-site use, handling, storage, manufacture or disposal of hazardous materials or waste as defined in Chapter 24 of the County Code. Provisions of the "Industrial and Office" category which allow and limit residential and business uses, TNDs and hotels also apply to the Restricted category. Quarrying and environmentally compatible ancillary uses may also be approved in these areas. The inclusion of this Restricted category on the LUP map does not preclude the application of these or similar use limitations to other land contained in the Industrial and Office or any other land use category where necessary to protect groundwater resources.

**Uses and Zoning Not Specifically Depicted.** Some existing uses and zoning are not specifically depicted on the LUP map. All existing lawful uses and zoning are deemed to be consistent with this Plan as provided in the section of this chapter titled "Concepts and Limitations of the Land Use Plan Map." The limitations referenced in this paragraph pertain to existing zoning districts and uses. All approval of new industrial locations must be consistent with the LUP map or the specific exceptions provided in the various LUP map categories, the objectives and policies of this Plan.

### **Business and Office**

This category accommodates the full range of sales and service activities. Included are retail, wholesale, personal and professional services, call centers, commercial and professional offices, hotels, motels, hospitals, medical buildings, nursing homes, entertainment and cultural facilities, amusements and commercial recreation establishments such as private commercial marinas. Light industrial uses are also permitted in the Business and Office category within an approved Employment Center. Also allowed are telecommunication facilities such as cell towers and satellite telecommunication facilities (earth stations for satellite communication carriers, satellite terminal stations, communications telemetry facilities and satellite tracking stations). These uses may occur in self-contained centers, high-rise structures, campus parks, municipal central business districts or strips along highways. In reviewing zoning requests or site plans, the specific intensity and range of uses, and dimensions, configuration and design considered to be appropriate will depend on locational factors, particularly compatibility with both adjacent and adjoining uses, and availability of highway capacity, ease of access and availability of other public services and facilities. Uses should be limited when necessary to protect both adjacent and

adjoining residential use from such impacts as noise or traffic, and in most wellfield protection areas uses are prohibited that involved the use, handling, storage, generation or disposal of hazardous material or waste, and may have limitations as to the maximum buildable area, as defined in Chapter 24 of the County Code. When the land development regulations are amended pursuant Policies LU-9O and LU-9P, live-work and work-live developments shall be permitted on land designated as Business and Office, as transitional uses between commercial and residential areas.

Residential uses, and mixing of residential use with commercial, light industrial, office and hotels are also permitted in Business and Office areas provided that the scale and intensity, including height and floor area ratio of the residential or mixed use development, is not out of character with that of adjacent or adjoining development and zoning, and it does not detrimentally impact, and it provides a sensitive well designed transition to any adjacent or adjoining residentially developed or designated areas of different development intensity. Where these conditions are met residential development may be authorized to occur in the Business and Office category at a density up to one density category higher than the LUP-designated density of the adjacent or adjoining residentially designated area on the same side of the abutting principal roadway, or up to the density of any such existing residential development, or zoning if the adjacent or adjoining land is undeveloped, whichever is higher. If there is no adjacent or adjoining residential use existing, zoned or designated on the same side of the roadway, the maximum allowable residential density will be that which exists or which this plan allows across the roadway. Where there is no residential use, zoning or designation on either side of the roadway, the intensity of residential development, including height, bulk and floor area ratio shall be no greater than that which would be permitted for an exclusively commercial use of the site.

**Employment Centers.** Within the Business and Office category, the integration of business, office, light industrial and limited residential uses is permitted through the development of employment centers. Employment centers are intended to create a synergistic relationship between industries that rely on one another for the exchange of goods, ideas and services and allow for the efficient use of shared resources and infrastructure. It is also intended to create an environment that connects industries with customers and the local workforce. Employment centers may be approved on properties designated as Business and Office on the CDMP Land Use Plan Map that meet the following: 1) are located inside the UDB, 2) contain a minimum of 10 acres, and 3) have direct access to a Major Roadway, as identified on the CDMP Land Use Plan Map.

In addition to uses otherwise permitted in the Business and Office category, light industrial uses are also permitted provided such uses do not detrimentally impact adjacent or adjoining development and zoning. Residential uses are also permitted where not otherwise incompatible. Uses should be limited when necessary to provide compatibility with other uses within the employment center and protect adjacent and adjoining residential uses from impacts such as noise, vibrations, fumes or traffic. Light industrial uses shall generally include small-scale warehousing, wholesaling, manufacturing, packaging and distribution of products for personal or household consumption including food products. Light industrial uses shall also include specialized medical, technology and biotechnology research and manufacturing.

Employment centers shall be reviewed through the Planned Area Development zoning process or other similar process to allow for the implementation of design standards to ensure that uses are compatible with each other and adjacent properties and contribute to the character of the surrounding community. The standards for employment centers should remain flexible enough to

allow for varying mixes of residential, business and industrial uses while providing an environment that is accommodating to consumers, residents and employees.

A minimum of 50 percent of the linear roadway length within each land use area shall be designed to emphasize pedestrian mobility, interest, safety and comfort. Buildings located along these pedestrian-friendly streets shall be oriented in a manner that frames the street and provides sufficient fenestration to ensure pedestrian safety and interest. Emphasis shall be placed on sidewalks, with width and street-edge landscaping increased where necessary to accommodate pedestrian volumes or to enhance safety or comfort of pedestrians on sidewalks. The length of blocks and network of streets shall be designed so that walking routes through the center and between destinations in the center are direct, and distances are short. A minimum of 10 percent of each land use area shall be devoted to public open spaces such as squares or parks which are directly accessible by a pedestrian-friendly street. Land use areas shall be designated within the Employment Center, as follows:

**Commerce-Oriented (required):** The commerce-oriented land use area shall comprise a minimum of 50 percent up to a maximum of 100 percent of the total employment center area. The commerce-oriented land use area may contain professional offices, commercial, light industrial and live-work residential units. Light industrial uses shall not comprise more than forty (40) percent of the floor area designated for non-residential uses. The commerce oriented land use area may also contain residential uses only when vertically-integrated with other permitted uses and only when located along a pedestrian-friendly street. The ground floor use along pedestrian-friendly streets shall be limited to lobbies, neighborhood-serving business uses and light industrial storefronts. The regulations should provide for disclosure of neighboring industrial and commercial activities to prospective residential tenants and purchasers.

**Community-Oriented (optional):** The community-oriented land use area is an optional component of the employment center. When provided, it shall comprise no more than 50 percent of the total employment center area. Such area shall contain a mix of residential and neighborhood-serving business uses with an emphasis on the residents and/or consumers. Neighborhood-serving business uses shall include professional office, general retail, restaurants, personal service establishments, and the like.

**Strips and Nodes.** The plan recognizes existing strip commercial development along many roadways. However, commercial development in newly developing areas is designated as nodes at major intersections. Allocation of commercial development rights among quadrants of such nodes will depend on locational factors, geographic constraints, ownership fragmentation, compatibility with adjacent uses and availability of highway capacity and other public services and facilities.

Ribbons or strips of commercial use along roadway frontages are identified along one or both block faces fronting certain roadways. Where only one block face is indicated, this specifically provides that only that block face is intended for commercial use and is not to suggest that the opposite face is also included. The lateral boundary of the ribbon indicates the extent to which business uses may be allowed to expand along the roadway frontage.

The depth of the ribbon for commercial development and other uses permitted under the Business and Office land use category is more generalized. In general, the depth should be limited to the norm for the strip, but may be approved at such other depth that will provide a logical transition to adjacent commercial and residential uses or accommodate vehicular parking to serve an adjacent

use, provided that liberal permanent buffering is provided or other site planning or design features are used, to provide compatibility with any adjoining and adjacent residential uses that exist or are designated on the Land Use Plan map, in keeping with the Plan's policies. Extension of commercial strip depth beyond the mid-block to the frontage of an interior street does not necessarily authorize vehicular access on that interior street, and such access may be prohibited if it would be incompatible with neighboring development. Intervening areas between commercial ribbons along a highway face may be used only for the uses permitted in the designated land use category. Further lateral extension of the ribbon beyond that shown on the Plan map will require a Plan amendment.

**Uses and Zoning Not Specifically Depicted.** Some existing lawful uses and zoning are not specifically depicted on the LUP map. However, all such existing lawful uses and zoning are deemed to be consistent with this Plan as provided in the section of this chapter titled "Concepts and Limitations of the Land Use Plan Map." The limitations referenced in this paragraph pertain to existing zoning and uses. All approval of new commercial locations must be consistent with the LUP map or the specific exceptions provided in the various LUP map categories, and the objectives and policies of this Plan.

### **Office/Residential**

Uses allowed in this category include both professional and clerical offices, hotels, motels, and residential uses. Office developments may range from small-scale professional office to large-scale office parks. Satellite telecommunication facilities that are ancillary uses to the businesses in a development are also allowed. A specific objective in designing developments to occur in this category is that the development should be compatible with any existing, or zoned, or Plan-designated adjoining or adjacent residential uses. The maximum scale and intensity, including height and floor area ratio of office, hotel and motel development in areas designated Office/Residential shall be based on such factors as site size, availability of services, accessibility, and the proximity and scale of adjoining or adjacent residential uses. Where the Office/Residential category is located between residential and business categories, the more intensive activities to occur on the office site, including service locations and the points of ingress and egress, should be oriented toward the business side of the site, and the residential side of the site should be designed with sensitivity to the residential area and, where necessary, well buffered both visually and acoustically.

Residential uses are also allowed in the Office/Residential category. In these locations, residential density may be approved up to one density category higher than that allowed in the adjoining or adjacent residentially designated area on the same side of the abutting principal roadway, or up to the density of existing adjoining or adjacent residential development, or zoning if the adjacent or adjoining land is undeveloped whichever is higher. If there is no adjacent or adjoining residential development existing, zoned or designated on the same side of the abutting principal roadway, then the allowable maximum residential density shall be based on that which exists or which the plan allows across the roadway. Where there is no residential use, zoning or designation on either side of the roadway, the intensity of residential development, including height, bulk and floor area ratio shall be no greater than that which would be permitted for an exclusively office use of the site. When residential uses are mixed with office uses, the overall scale and intensity, including height and floor area ratio of the mixed-use development shall be no greater than that which would be approved if the parcel was developed in either office use only or residential use only, whichever is higher. Within the Office/Residential category, business uses ancillary and to serve the on-site use(s) may be integrated in an amount not to exceed 15 percent of the total floor area. However, the Office/Residential category does not authorize other business or commercial uses.

The plan recognizes existing strip office development along roadways. Ribbons or strips of office use along roadway frontages are identified along one or both block faces fronting certain roadways. Where only one block face is indicated, this specifically provides that only that block face is intended for office use and is not to suggest that the opposite face is also included. The lateral boundary of the ribbon indicates the extent to which office uses may be allowed to expand along the roadway frontage. The depth of the ribbon for office development and other uses permitted by the Office/Residential land use category is more generalized. In general, the depth should be limited to the norm for the strip, but may be approved at such other depth that will provide a logical transition to adjacent uses or accommodate vehicular parking to serve an adjacent use, provided that site planning or design features are used, to furnish compatibility with any adjoining and adjacent residential uses that exist or are designated on the Land Use Plan map, in keeping with the Plan's policies. Extension of the strip depth beyond the mid-block to the frontage of an interior street does not necessarily authorize vehicular access on that interior street, and such access may be prohibited if it would be incompatible with neighboring development. Intervening areas between ribbons along a highway face may be used only for the uses permitted in the designated land use category. Further lateral extension of the ribbon beyond that shown on the Plan map will require a Plan amendment.

As indicated in the section of this chapter titled "Concepts and Limitations of the Land Use Plan Map", some existing lawful uses and zoning are not specifically depicted on the LUP map. That text, titled Uses and Zoning Not Depicted, applies equally to office uses and zoning.

### **Mixed Use Development**

Mixed-use development allows a mix of compatible uses in a high quality pedestrian-oriented street environment. This form of development includes permitted uses mixed within the same building (vertical) or in separate buildings on the same site or within a 5-minute walk (one-quarter mile) (horizontal). The section of this element, entitled "Urban Centers," addresses mixed-use development occurring within designated urban centers. The purpose of this section is to address the mixed-use projects that are to be located outside of the designated urban centers and outside of areas otherwise addressed by the Rapid Transit Zone Development Standards pursuant to Chapter 33C of the Code of Miami-Dade County.

Horizontal mixed-use development is hereby defined as the horizontal mix of uses, such as single use buildings on the same site or within one-quarter mile. Such uses may only be permitted in accordance with the following:

- 1) A single use building is located on a site that contains a mix of uses or multiple sites containing a mix of uses joined through a unity of title; or
- 2) Where the saturation of a single use, including residential or commercial, does not currently or would not be caused to exceed 70% of the total building area within one-quarter mile of the application site.

Vertical mixed-use development is hereby defined as projects that contain both residential and non-residential components, such as live-work spaces, neighborhood and specialty retail, convenience services, entertainment, other businesses providing for day-to-day living needs, institutional and civic uses, and professional offices. The residential component must be at least 20 percent of the total floor area but no more than 85 percent of the total floor area. Hotels and apartment hotels, governmental offices, civic uses, and schools may be exempt from these mix requirements.

Vertical and horizontal mixed-use development may be allowed within the Urban Development Boundary (UDB), provided that the development is located in:

1. Corridors with a maximum depth of 660 feet that are located along 'Major Roadways' as identified on the adopted Land Use Plan map and in areas designated Residential Communities (with the exception of Estate Density and Low Density), Business and Office, and Office/Residential; or
2. Corridors designated as mixed-use corridors in an area plan that has been accepted by the Board of County Commissioners; or
3. Rapid Transit Activity Corridors which includes the areas within one-half mile of the existing Metrorail corridor and the following proposed SMART Plan corridors: Kendall Drive, Beach Corridor, North Corridor, Northeast Corridor, and the South Dade Transitway Corridor. It also includes the area within one mile of the proposed East-West SMART Plan Corridor.

Appropriate design standards are essential to ensure that the uses permitted in mixed-use developments are compatible with each other and adjacent properties and contribute to the character of the street and the surrounding community. A specific objective in designing mixed-use developments is that the development should be compatible with any existing, or zoned, or Plan-designated adjoining or adjacent uses. The exact residential density that can be achieved on a particular property will depend upon the intensity permitted, the average size of the residential units, the residential percentage of the project and land development regulations concerning building envelopes, parking and open space. Intensities are generally measured as floor area ratios (FARs), which for a particular property is the square footage of the buildings (not counting parking structures or covered pedestrian walkways that are open to the street), divided by the net land area of the parcel. The maximum intensities and densities shall be the greater of those provided in the table below or the maximum intensities and densities of the underlying land use designation. However, the entire development must fit within the building envelope established by the floor area ratio.

<b>Mixed-Use Developments Located Within:</b>	<b>Floor Area Ratio Range</b>	<b>Maximum Residential Density (dwelling units)</b>
Major Corridors	from 1.0 to 1.5	36
Mixed-use Corridors identified in an area plan	Up to 2.0	60
<b>Rapid Transit Activity Corridors</b>		
Within one-quarter mile	Up to 2.0	60
Between one-quarter and one-half mile	Up to 1.5	36
Between one-half and one mile (East-West Corridor)	Up to 1.25	18

## Urban Centers

Diversified urban centers are encouraged to become hubs for future urban development intensification in Miami-Dade County, around which a more compact and efficient urban structure will evolve. These Urban Centers are intended to be moderate- to high-intensity design-unified areas which will contain a concentration of different urban functions integrated both horizontally and vertically. Three scales of centers are planned: Regional, the largest, notably the downtown

Miami central business district; Metropolitan Centers such as the evolving Dadeland area; and Community Centers which will serve localized areas. Such centers shall be characterized by physical cohesiveness, direct accessibility by mass transit service, and high quality urban design. Regional and Metropolitan Centers, as described below, should also have convenient, preferably direct, connections to a nearby expressway or major roadways to ensure a high level of countywide accessibility.

The locations of urban centers and the mix and configuration of land uses within them are designed to encourage convenient alternatives to travel by automobile, to provide more efficient land use than recent suburban development forms, and to create identifiable "town centers" for Miami-Dade's diverse communities. These centers shall be designed to create an identity and a distinctive sense of place through unity of design and distinctively urban architectural character of new developments within them.

The core of the centers should contain business, employment, civic, and/or high-or moderate-density residential uses, with a variety of moderate-density housing types within walking distance from the centers. Both large and small businesses are encouraged in these centers, but the Community Centers shall contain primarily moderate and smaller sized businesses which serve, and draw from, the nearby community. Design of developments and roadways within the centers will emphasize pedestrian activity, safety and comfort, as well as vehicular movement. Transit and pedestrian mobility will be increased and areawide traffic will be reduced in several ways: proximity of housing and retail uses will allow residents to walk or bike for some daily trips; provision of jobs, personal services and retailing within walking distance of transit will encourage transit use for commuting; and conveniently located retail areas will accommodate necessary shopping during the morning or evening commute or lunch hour.

Urban Centers are identified on the LUP map by circular symbols noting the three scales of planned centers. The Plan map indicates both emerging and proposed centers. The designation of an area as an urban center indicates that governmental agencies encourage and support such development. The County will give special emphasis to providing a high level of public mass transit service to all planned urban centers. Given the high degree of accessibility as well as other urban services, the provisions of this section encourage the intensification of development at these centers over time. In addition to the Urban Center locations depicted on the Land Use Plan Map, all future rapid transit station sites and their surroundings shall, at a minimum, be developed in accordance with the Community Center policies established below.

### **Policies for Development of Urban Centers**

Following are policies for development of Urban Centers designated on the Land Use Plan (LUP) map. Where the provisions of this section authorize land uses or development intensities or densities different or greater than the underlying land use designation on the LUP map, the more liberal provisions of this section shall govern. All development and redevelopment in Urban Centers shall conform to the guidelines provided below.

**Uses and Activities.** Regional and Metropolitan Centers shall accommodate a concentration and variety of uses and activities which will attract large numbers of both residents and visitors while Community-scale Urban Centers will be planned and designed to serve a more localized community. Uses in Urban Centers may include retail trade, business, professional and financial services, restaurants, hotels, institutional, recreational, cultural and entertainment uses, moderate to high density residential uses, and well planned public spaces. Incorporation of residential uses is encouraged, and may be approved, in all centers, except where incompatible with airport or

heavy industrial activities. Residential uses may be required in areas of the County and along rapid transit lines where there exists much more commercial development than residential development, and creation of employment opportunities will be emphasized in areas of the County and along rapid transit lines where there is much more residential development than employment opportunity. Emphasis in design and development of all centers and all of their individual components shall be to create active pedestrian environments through high-quality design of public spaces as well as private buildings; human scale appointments, activities and amenities at street level; and connectivity of places through creation of a system of pedestrian linkages. Existing public water bodies shall also be incorporated by design into the public spaces within the center.

**Radius.** The area developed as an urban center shall extend to a one-mile radius around the core or central transit station of a Regional Urban Center designated on the LUP map. Designated Metropolitan Urban Centers shall extend not less than one-quarter mile walking distance from the core of the center or central transit stop(s) and may extend up to one-half mile from such core or transit stops along major roads and pedestrian linkages. Community Centers shall have a radius of 700 to 1,800 feet but may be extended to a radius of one-half mile where recommended in a professional area plan for the center, consistent with the guidelines herein, which plan is approved by the Board of County Commissioners after an advertised public hearing. Urban Center development shall not extend beyond the UDB.

**Streets and Public Spaces.** Urban Centers shall be developed in an urban form with a street system having open, accessible and continuous qualities of the surrounding grid system, with variation, to create community focal points and termination of vistas. The street system should have frequent connections with surrounding streets and create blocks sized and shaped to facilitate incremental building over time, buildings fronting on streets and pedestrian pathways, and squares, parks and plazas defined by the buildings around them. The street system shall be planned and designed to create public space that knits the site into the surrounding urban fabric, connecting streets and creating rational, efficient pedestrian linkages. Streets shall be designed for pedestrian mobility, interest, safety and comfort as well as vehicular mobility. The size of blocks and network of streets and pedestrian accessways shall be designed so that walking routes through the center and between destinations in the center are direct, and distances are short. Emphasis shall be placed on sidewalks, with width and street-edge landscaping increased where necessary to accommodate pedestrian volumes or to enhance safety or comfort of pedestrians on sidewalks along any high-speed roadways. Crosswalks will be provided, and all multi-lane roadways shall be fitted with protected pedestrian refuges in the center median at all significant pedestrian crossings. In addition, streets shall be provided with desirable street furniture including benches, light fixtures and bus shelters. Open spaces such as public squares and greens shall be established in urban centers to provide visual orientation and a focus of social activity. They should be located next to public streets, residential areas, and commercial uses, and should be established in these places during development and redevelopment of streets and large parcels, particularly parcels 10 acres or larger. The percentage of site area for public open spaces, including squares, greens and pedestrian promenades, shall be a minimum of 15 percent of gross development area. This public area provided outdoor, at grade will be counted toward satisfaction of requirements for other common open space. Some or all of this required open space may be provided off-site but elsewhere within the subject urban center to the extent that it would better serve the quality and functionality of the center.

**Parking.** Shared parking is encouraged. Reductions from standard parking requirements shall be authorized where there is a complementary mix of uses on proximate development sites, and near transit stations. Parking areas should occur predominantly in mid-block, block rear and on-

street locations, and not between the street and main building entrances. Parking structures should incorporate other uses at street level such as shops, galleries, offices and public uses.

**Buildings.** Buildings and their landscapes shall be built to the sidewalk edge in a manner that frames the adjacent street to create a public space in the street corridor that is comfortable and interesting, as well as safe for pedestrians. Architectural elements at street level shall have a human scale, abundant windows and doors, and design variations at short intervals to create interest for the passing pedestrian. Continuous blank walls at street level are prohibited. In areas of significant pedestrian activity, weather protection should be provided by awnings, canopies, arcades and colonnades.

**Density and Intensity.** The range of average floor area ratios (FARs) and the maximum allowed residential densities of development within the Regional, Metropolitan and Community Urban Centers are shown in the table below.

	Average Floor Area Ratios (FAR)	Max. Densities Dwellings per Gross Acre
Regional Activity Centers	greater than 4.0 in the core not less than 2.0 in the edge	500
Metropolitan Urban Centers	greater than 3.0 in the core not less than 0.75 in the edge	250
Community Urban Centers	greater than 1.5 in the core not less than 0.5 in the edge	125

In addition, the densities and intensities of developments located within designated Community Urban Centers and around rapid transit stations should not be lower than those provided in Policy LU-7F. Height of buildings at the edge of Metropolitan Urban Centers adjoining stable residential neighborhoods should taper to a height no more than 2 stories higher than the adjacent residences, and one story higher at the edge of Community Urban Centers. However, where the adjacent area is undergoing transition, heights at the edge of the Center may be based on adopted comprehensive plans and zoning of the surrounding area. Densities of residential uses shall be authorized as necessary for residential or mixed-use developments in Urban Centers to conform to these intensity and height policies.

As noted previously in this section, urban centers are encouraged to intensify incrementally over time. Accordingly, in planned future rapid transit corridors, these intensities may be implemented in phases as necessary to conform with provisions of the Transportation Element, and the concurrency management program in the Capital Improvement Element, while ensuring achievement of the other land use and design requirements of this section and Policy LU-7F.

**Douglas Road Metrorail Station.** The policies for development of Urban Centers as set forth in this Land Use Element shall govern the Douglas Metrorail Station Metropolitan Urban Center (Douglas Station MUC) except as set forth herein. The CDMP Statement of Legislative Intent provides that the policies for development of Urban Centers are a fundamental CDMP growth management component, required for Miami-Dade County's central metropolitan government, and shall serve as minimum standards for zoning, service, and regulation for municipal governments to implement through their comprehensive plans and land development regulations. The Douglas Station MUC is located entirely within incorporated areas, and the County's Rapid Transit Zone land development regulations (Chapter 33C, County Code) govern the Douglas Road Metrorail Station property. Densities and intensities of developments located within the Douglas Station MUC should not be lower than those provided in Policy LU-7F. Further,

development within the Douglas Station MUC core shall have a minimum Floor Area Ratio (FAR) of 3.0, and a maximum FAR of 8.0, and in the MUC edge an FAR of not less than 0.75 and a maximum FAR of 1.50; and a maximum density of 250 dwelling units per gross acre. The Douglas Road Metrorail Station property shall constitute the core of the Douglas Station MCU and be developed accordingly. However, properties outside of the Douglas station MUC core shall be developed in accordance with the following criteria: (1) The particular uses that are approved outside of the Douglas Station MUC core should, (a) respect the character of the nearby community, (b) strive to serve the needs of the community for housing and services, and, (c) promote a balance in the range of existing and planned land uses along the subject transit line; (2) where services and facilities are currently or projected to be inadequate, the municipality may approve development at a lower density or intensity provided that the development plan, including any parcel plan, can accommodate, and will not impede, future densification and intensification that will conform with this paragraph; and (3) Development outside of the Douglas Station MUC core shall be developed in accordance with the applicable municipality's adopted comprehensive master plan and zoning, until such time as those municipalities amend their respective comprehensive plans and land development regulations to allow densities and intensities of developments within the Douglas Station MUC as set forth in this paragraph.

**Chapter 380 Regional Activity Centers.** Chapter 380.06(2)(e), Florida Statutes (F.S.) and Chapter 28-24.014, Florida Administrative Code (FAC), authorize local governments to designate areas as regional activity centers, hereinafter "Chapter 380 regional activity centers", where the local government seeks to encourage higher intensities of development by increasing the threshold of the development size required to undergo State review as a Development of Regional Impact (DRI). In addition, Policy 11.14 of the Adopted 2004 Strategic Regional Policy Plan for South Florida authorizes the designation of "Regional Development Districts" to provide for the designation of geographic areas highly suitable for increased (DRI review) threshold intensity. The designation of a specific area and boundaries as a Chapter 380 regional activity center for the purpose of increasing DRI review thresholds does not change the CDMP Land Use Plan map designation of any land, nor does it change the uses or intensities of development authorized by the CDMP. It only changes the circumstances under which proposed developments in the designated area would have to be reviewed through the Chapter 380, F.S., DRI process. The following areas are hereby designated to be Chapter 380 regional activity centers and, subject to approval by the South Florida Regional Planning Council, regional development districts (a geographic area specifically designated as highly suitable for increased threshold intensity), for the purpose of increasing DRI review thresholds: 1. Dadeland, as depicted on Figure 2; and 2. N.W. 107th Avenue and N.W. 12th Street, as depicted on Figure 3.

**Special Districts.** Land designated as “Special District” on the CDMP Land Use Plan Map comprises areas with unique characteristics where special land use provisions are warranted. Special Districts may be approved on properties that are located inside the UDB, and contain a minimum of 10 acres. The specific land use provisions for each Special District are defined herein.

### **Ludlam Trail Corridor District**

The Ludlam Trail Corridor District (“District”) applies to an approximately 5.8-mile segment of the former Florida East Coast Railway South Little River Branch spur-line that is generally 100 feet wide and extends from SW 80 Street to approximately 400 feet north of NW 7 Street and generally along theoretical NW/SW 69 Avenue (“Corridor”) as depicted on Figure 3.1. Approximately 0.6 miles of the Corridor between SW 8 Street and the Tamiami Canal is located within the boundaries of the City of Miami (“Miami Segment”).

The purpose of the Ludlam Trail Corridor District is to enhance regional mobility, provide opportunities for physical activity, and improve the economic vitality of the area by facilitating the conversion of this former railway corridor into a continuous publicly-accessible primarily pedestrian and bicycle trail while ensuring that development along the Corridor occurs at appropriate locations, and in a manner that is sensitive to and compatible with adjacent uses. Several regional and local studies have identified an opportunity for a regionally significant trail and greenway along the Corridor that will connect to the County's greenway and trail network, link the surrounding communities, and provide vital neighborhood connections.

The portion of the Ludlam Trail Corridor District within unincorporated Miami-Dade County, as indicated in Figure 3.1, is hereby designated as an Area or Facility of Countywide Significance, and for those portions located within the City of Miami, Miami-Dade County shall work collaboratively with the City of Miami to similarly designate those portions of the District.

The land use provisions of the Ludlam Trail Corridor District shall be implemented through the adoption of Land Development Regulations (“LDRs”). LDRs shall be adopted for all portions of the District within unincorporated Miami-Dade County prior to the issuance of the first building permit for vertical construction within the Development Areas defined below. The LDRs shall define the urban form of development within the Corridor including flexible design standards and appropriate transitions to adjacent uses, as well as the configuration and design parameters of the recreational trail. Access to the Development Areas shall be provided in a manner that minimize negative impacts to adjacent residential neighborhoods. In addition, the Downtown Kendall Urban Center District regulations shall be amended to require the continuation of the trail to the M-Path/Underline. All portions of the Corridor shall have received final abandonment approval, an interim trails use agreement approval, or a combination thereof, from the U.S. Surface Transportation Board prior to the issuance of the first building permit for vertical construction within the Development Areas. However, nothing herein shall be deemed to authorize vertical construction within areas covered by an interim trails use agreement approved by the U.S. Surface Transportation Board to the extent that such vertical construction is not authorized by or is otherwise inconsistent with federal law.

Development and trail standards shall be coordinated with Miami-Dade Department of Regulatory and Economic Resources, Parks, Recreation and Open Spaces Department and Department of Transportation and Public Works (or their successor departments) and shall emphasize convenient pedestrian and bicycle access to public transportation. The trail standards should incorporate Crime Prevention Through Environmental Design (CPTED) principles to enhance trail safety and security. Canal crossings shall conform to the Miami-Dade County Manatee Protection Plan.

Development Areas and Recreational Trail Segments are identified on Figure 3.1 and described below. The precise boundaries between the Development Areas and Recreational Trail Segments within the District shall be established in the LDRs in approximately the locations identified on Figure 3.1. Miami-Dade County shall work cooperatively with the City of Miami to ensure consistent application of development regulations that provide for the seamless continuation of a recreational trail along the length of the Corridor. The specific location, density/intensity, and configuration of development within the Miami Segment of the Corridor shall be governed by the City of Miami.

**Recreational Trail Segments.** The Recreational Trail Segments shall generally include the following portions of the Corridor:

- $\pm 400$  feet north of the centerline of NW 7 Street to NW 7 Street
- SW 12 Street to  $\pm 270$  feet north of the centerline of Coral Way
- $\pm 240$  feet south of the centerline of Coral Way to  $\pm 248$  feet north of the centerline of Bird Road
- $\pm 2,600$  feet south of the centerline of Bird Road to SW 80 Street

Those portions of the Corridor that are designated for Recreational Trail use shall be developed solely with recreational uses, including but not limited to a pedestrian and bicycle trail, parks and associated amenities. Associated amenities may include but not be limited to above-grade pedestrian crossings, parking, restroom facilities, signage, benches, information and vending kiosks, recreational equipment and bicycle rental stations, and shelters, where appropriate. Recreational Trail Segments and associated amenities shall be designed in a manner sensitive to adjacent uses. Buffering should be considered in the design of the Recreational Trail Segments where adjacent to single-family residential.

Access roads may also be provided within the Recreational Trail Segments in the following circumstances: 1) to provide access to public recreational space; or 2) to provide limited ingress and egress to a Development Area for official vehicles providing emergency, municipal, or utility services; or 3) where necessary for access to development areas and where such access does not directly and detrimentally impact residential neighborhoods. Where provided, such access roadway(s) shall be the minimum reasonably necessary to meet the need.

**Development Areas.** Development Areas in unincorporated Miami-Dade County shall be limited to Blue Lagoon, Tamiami Trail, Coral Way and Bird Road as defined herein.

Development Areas shall be developed in a manner that is compatible with adjacent uses. Open space shall be provided in the form of a minimum 15-foot wide continuous trail within each Development Area. Building features oriented toward the recreational trail shall have a human scale, and design variations at short intervals to create interest for users of the trail. The maximum development allowed without a publicly accessible trail component, is a total of: (i) 582 residential units and 256,132 square feet of industrial uses, or (ii) a combination of 281 residential units, 256,132 square feet of industrial uses, 103,572 square feet of office uses, and 39,377 square feet of retail uses. If a publicly-accessible trail is developed along the length of the Corridor, or a legally binding instrument or recordable agreement running with the land is executed by the property owner(s) of the Corridor, demonstrating to the satisfaction of the County Mayor or Mayor's designee when and how the publicly-accessible trail will be accomplished, then development shall be permitted up to the maximum allowable density and/or floor area ratio and building heights specified for each Development Area below.

If a building or site within a Development Area is designed to accommodate a grade-separated Recreational Trail connection, then, in addition to the number of stories permitted in the paragraphs below in each Development Area, there may be permitted up to two (2) additional stories above the maximum height allowed for the building or site in the applicable Development Area, where each such additional story has dedicated at least seventy percent (70%) of its square footage to trail, associated trail amenities as defined above, or to non-habitable areas such as common operational uses (such as trash rooms, maintenance closets) or parking areas.

Land use provisions for each Development Area are:

**Blue Lagoon Development Area:** The Blue Lagoon Development Area includes those portions of the Corridor located between NW 7 Street and the Tamiami Canal. Uses permitted in the Blue Lagoon Development Area shall include the full range of sales and service activities. Residential uses, and mixing of residential use with commercial, office and hotels are also permitted. Development shall be limited as follows:

- Maximum Density: 125 dwelling units per gross acre
- Maximum Floor Area Ratio: 5.0
- Maximum Building Height: Twelve (12) stories

**Tamiami Trail Development Area:** The Tamiami Trail Development Area includes those portions of the corridor located between SW 8th Street and SW 12th Street. Uses permitted in the Tamiami Trail Development Area shall include the full range of sales and service activities. Light industrial uses are also permitted where compatible with existing residential uses. Residential uses and mixing of residential use with commercial, office and hotels are also permitted. The LDRs shall provide for a notification process to inform prospective purchasers of residential units located in close proximity to an active industrial use that such industrial use may generate significant noise, dust, odor, vibration, or truck traffic. Development shall be limited as follows:

- Maximum Density: 125 dwelling units per gross acre
- Maximum Floor Area Ratio: 5.0
- Maximum Building Height: Twelve (12) stories

**Coral Way Development Area.** The Coral Way Development Area includes those portions of the corridor located between 270 feet north of the centerline of Coral Way and 240 feet south of the centerline of Coral Way. Uses permitted in the Coral Way Development Area shall include the full range of sales and service activities, residential uses, and the mixing of residential use with commercial, office and hotels are also permitted. Development shall be limited as follows:

- Maximum Density: 60 dwelling units per gross acre
- Maximum Floor Area Ratio: 2.5
- Maximum Building Height: Six (6) stories

**Bird Road Development Area.** The Bird Road Development Area includes those portions of the corridor located between  $\pm 248$  feet north of the centerline of Bird Road to  $\pm 2,600$  feet south of the centerline of Bird Road. Uses permitted in the Bird Road Development Area shall include the full range of sales and service activities, residential uses, and the mixing of residential use with commercial, office and hotels are also permitted. Development shall be limited as follows:

- Maximum Density: 90 dwelling units per gross acre
- Maximum Floor Area Ratio: 2.5
- Maximum Building Height: Six (6) stories

## **Development of Properties Adjacent to Development Areas, Density Bonuses, and Mixing of Uses**

The LDRs that are adopted to implement this District may encourage flexible and creative development on adjacent properties along the Development Areas.

The LDRs may increase the residential densities or intensities in the Development Areas in accordance with bonuses provided for affordable or workforce housing. The averaging of densities among a Development Area and different parcels to the east or west of a Development Area may be allowed in accordance with the density averaging policies set forth in the CDMP Land Use Element

The mix of residential and non-residential uses allowed in each Development Area may be modified in the respective Development Area in accordance with a land use equivalency conversion matrix adopted as part of the LDRs. The LDRs may also provide for the transfer of density or intensity to the Bird Road Development Area from other Development Areas, so long as the transfer does not result in an exceedance of the maximum number of vehicle trips calculated for the development program described above, as of July 19, 2017, based on standards established by the Institute of Transportation Engineers.

Notwithstanding the foregoing allowances regarding density and intensity, in no event shall the height of any building exceed the maximum height established above for the applicable Development Area.

## **Amendments to Ludlam Trail Corridor District Recreational Trail Segment Policies**

Any amendment to the Recreational Trail Segment policies in this Special District category shall require an affirmative vote of not less than two-thirds of the total membership of the Board of County Commissioners then in office.

## **Parks and Recreation**

The Land Use Plan map specifically illustrates parks and recreation areas of metropolitan significance, including State parks and the Biscayne and Everglades National Parks. Also illustrated are golf courses and other parks of approximately 40 acres and larger which are significant community features. Most neighborhood local parks smaller than 40 acres in size are not specifically shown on the Plan map; however, this omission should not be interpreted as meaning that these parks will be taken out of public use. Compatible parks are encouraged in all of the residential categories and may be allowed in all other categories of the LUP map. The siting and use of future parks and recreation areas shall be guided by the Recreation and Open Space, and Capital Improvements Elements, and by the goals, objectives and policies of the CDMP, and by the Miami-Dade County Parks and Open Space System Master Plan. Both governmentally and privately owned lands are included in areas designated for Parks and Recreation use. Most of the designated privately owned land either possesses outstanding environmental qualities and unique potential for public recreation, or is a golf course included within a large-scale development. Unless otherwise restricted, the privately owned land designated as Parks and Recreation may be developed for a use or a density comparable to, and compatible with, surrounding development providing that such development is consistent with the goals, objectives and policies of the CDMP. Except as consistent with the provisions below, however, this allowance does not apply to land designated Parks and Recreation that was set aside for park recreation or open space use as a part of, or as a basis for approving the density or other aspect of, a residential (or other) development or is otherwise subject to a restrictive covenant accepted by a public entity.

The long-term use of golf courses or other private recreation or open space on privately owned land designated as Parks and Recreation may be previously limited by deed restriction or restrictive covenant. A new development plan governing such land set-aside for park, recreation or open space use (restricted lands) may be approved at public hearing by the Board of County Commissioners or the applicable zoning board only if the following is demonstrated: (1) that the restricted land is subject to a restrictive covenant relating to development served by the open space, that such restrictive covenant continues to limit the use of the land to open space, and that this limitation in the restrictive covenant may be modified only with the written consent of adjacent or proximate property owners or a prescribed percentage thereof; (2) that the required written consents of the adjacent or proximate property owners have been obtained; and (3) that the proposed development will replace park or recreation land or open space that has fallen into prolonged disuse or disrepair to the detriment of the surrounding neighborhood. The development plan for such land (1) shall provide for development compatible with adjacent development; (2) shall provide by restrictive covenant that not less than two-thirds of the land subject to the new development plan (or such other proportion deemed appropriate by the Board of County Commissioners and/or appropriate Community Zoning Appeals Board but in no event less than 50 percent of such land) shall be maintained as Park, Recreational or open space for use by residents or other residents or users of the entire development for which the open space had originally been provided; (3) shall provide a financial means of assuring such maintenance, by homeowner's association, special tax district or other comparable means approved at public hearing or by the Director of the Department of Regulatory and Economic Resources or successor agency; and (4) shall provide that the residential density of the portion of the Park and Recreation-designated land eligible for development shall not exceed either the gross existing density of the development in connection with which the park-designated land was originally set aside, or the gross density of all the ownership parcels immediately abutting the entire park-designated land, whichever is lower. An approval pursuant to this provision may allow the gross density of the combined new and existing development, and its existing zoning, to exceed the

maximum otherwise allowed by the LUP map, but only to the extent necessary to enable reuse of the park designated land in accordance with this provision. Nothing herein shall be construed to permit development of property subject to a restrictive covenant accepted by the county or other public entity without compliance with the terms that covenant including, but not limited to, those terms governing modification or amendment thereof.

Certain commercial activities that support the recreational uses and relate to the resources of the park, such as marine supply stores, fuel docks or tennis and golf clubhouses may be considered for approval in the Parks and Recreation category. Other commercial recreational, entertainment or cultural uses may also be considered for approval in the Parks and Recreation category if authorized in accordance with Article 7 of the Miami-Dade Charter, as amended, and if they are related to, and would increase the quality, utility or enjoyment of the site and its natural, historical, and archaeological resources and facilities.

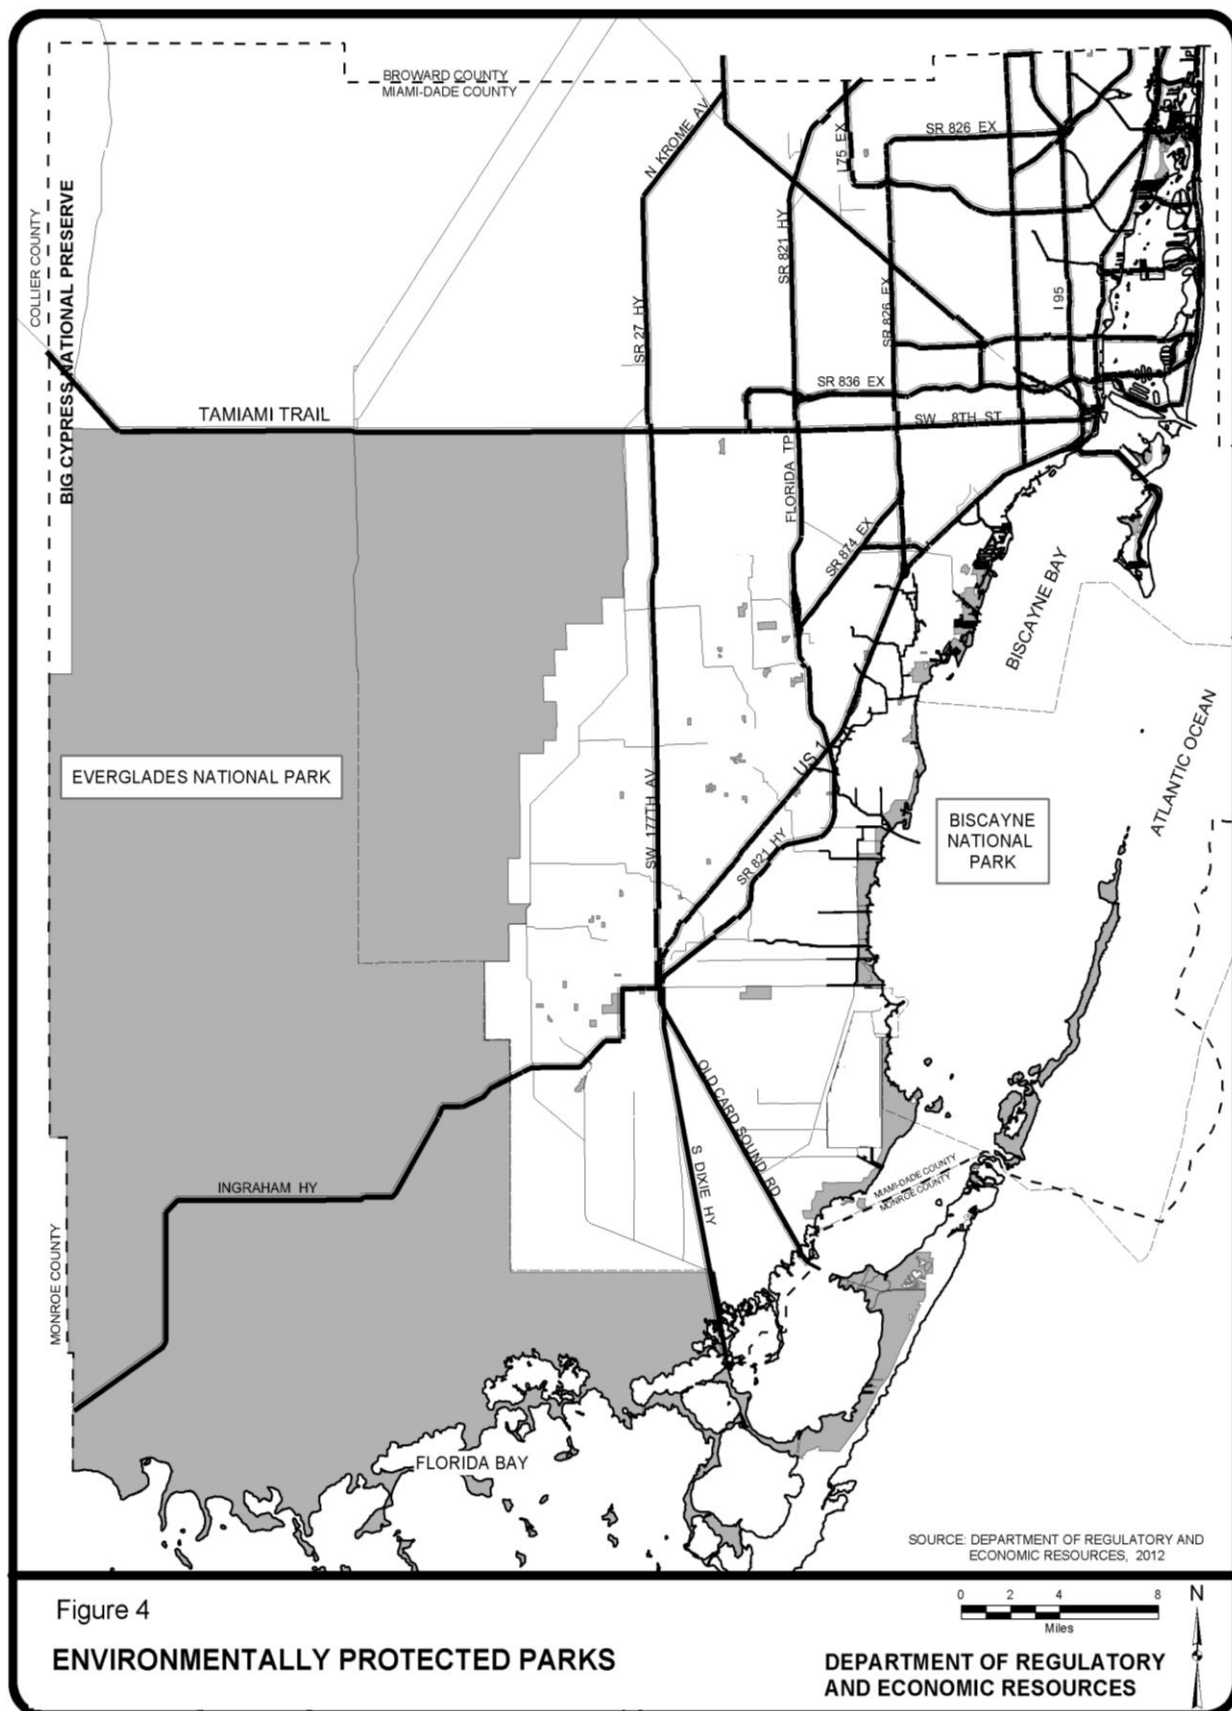

Some of the land shown for Parks is also environmentally sensitive. While most of these environmentally sensitive areas are designated on the LUP map as “Environmentally Protected Parks” some may be designated as Parks and Recreation due to graphic constraints (the environmentally sensitive portion of the park that is smaller than five acres). Park land which is characterized by valuable environmental resources shall be managed in a manner consistent with the goals, objectives and policies for development of the applicable environmental resources or protection area. Accordingly, resource enhancing facilities including boardwalks, nature trails, canoe trails and launches and interpretive facilities may be provided in these areas.

### **Environmentally Protected Parks**

The “Environmentally Protected Parks” designation is mainly comprised environmentally sensitive land and water areas within the authorized boundaries of Big Cypress National Preserve, Everglades National Park, and Biscayne National Park. The National Park Service retains ownership of most of the land in these areas and is currently pursuing the acquisition of the remainder. Additionally, some sites that carry this designation are proposed for public acquisition or have been acquired under Miami-Dade County Environmentally Endangered Lands (EEL), Florida's Conservation and Recreational Lands (CARL) and Florida Forever programs and include tropical hardwood hammocks, high-quality Dade County pineland and viable mangrove forests. These sites are identified in this category on the LUP map although they may be as small as ten acres in size.

Land uses and activities, which may occur in the National Parks and Big Cypress National Preserve, are outlined in management plans for those areas prepared and adopted by the National Park Service. In addition, any development, which might be contemplated for non-federal lands in the Big Cypress area or Everglades National Park, is also limited by the applicable management plan and by provisions of the Miami-Dade County Code to uses that are consistent with Florida Rules governing the Big Cypress Areas of Critical State Concern (Chapter 28-25, Part III, F.A.C.) or the County-adopted East Everglades Resource Management Program (Chapter 33-B, Code of Miami-Dade County).

Miami-Dade County supports the implementation of the National Park Service's management policies and programs. Accordingly, until acquisition has been completed, uses permitted in the Big Cypress Preserve area by Miami-Dade County will be limited to rural residential use at a maximum density of one dwelling unit per five acres and utility and communication facilities with limited ground coverage, provided that the site can be designed and accessed in a manner consistent with the goals, objectives and policies of this Management Plan, all prevailing environmental regulations and the referenced State Rules governing the Big Cypress Critical Area, whichever are most protective.

Because of their wetlands value, areas within the boundaries of Everglades National Park that are not owned by the National Parks Service are subject to careful evaluation on a case-by-case basis by federal, State, regional and County environmental agencies should they propose new uses or site alterations. The County-adopted East Everglades Resource Management program (Chapter 33-B, Code of Miami-Dade County) shall continue to govern land use and site alteration for privately-owned areas within the park.

All portions of parkland designated Environmentally Protected Parks shall be managed in a manner consistent with the goals, objectives and policies for development of the applicable environmental resources or protection area. Accordingly, resource enhancing facilities including boardwalks, nature trails, canoe trails and launches and interpretive facilities may be provided in these areas. Figure 4 depicts the larger federal lands located within the "Environmentally Protected Parks" designation, but due to map scale, does not include smaller federal, state or county-owned parcels within this category.

#### **Zoo Miami Entertainment Area (Areas I and II)**

This category is for tourist attractions and ancillary uses that are adjacent to the zoological park and that are themed to establish a unified Zoo Miami Entertainment Area. Primary uses in the Zoo Miami Entertainment Areas may include one or more of the following: attractions and recreation facilities (such as theme park and water park rides and attractions, family entertainment center, museums, and parks and open space) and hotels or other lodging. Certain other related and support activities such as theme-related retail concessions, food and beverage establishments, administrative offices, and passenger transportation facilities that are supportive of the primary uses may also be considered for approval in the Zoo Miami Entertainment Area category. The allowable primary uses shall be distributed as follows:

<b>Zoo Miami Entertainment Area (Areas I and II)</b>	<b>Percent</b>
Attractions and Recreation	60 -99
Hotels or other lodging	1- 40

The specific range and intensity of uses appropriate in the Zoo Miami Entertainment Areas may vary by location as a function of the availability of and ease of access to public services and facilities, and compatibility with neighboring development. The areas within the Zoo Miami Entertainment Areas designated for the water theme park, theme park rides and attractions, and the Gold Coast Railroad Museum shall have a maximum allowable floor area ratio (F.A.R.) of 0.30 and the areas designated for the family entertainment center and the hotels shall have a maximum F.A.R. of 0.40. Through the zoning review process, the use of particular sites or areas may be limited to something less than the maximum allowed in these categories. Moreover, special limitations may be imposed where necessary to protect environmental resources or to ensure compatibility with adjacent sites. Notwithstanding the foregoing, the use of the Gold Coast

Railroad Museum property shall be limited to Parks and Recreation uses, museums, and ancillary food service and related retail establishments that support museum uses, as authorized pursuant to the approved General Plan and Program of Utilization (R-493-85) and Article 7 of the Home Rule Amendment and Charter, Miami-Dade County Florida, as amended from time to time.

The Zoo Miami Entertainment Areas shall be developed in a manner that: is consistent with the adopted goals, objectives, and policies of this plan and with all applicable environmental regulations; preserves Natural Forest Communities (NFC) and other environmentally sensitive areas that are at or adjacent to the site; enhances the quality, utility, or enjoyment of the site and its recreational, entertainment, natural, historical, or archaeological resources; and promotes a pedestrian-oriented environment and provides safe and easy transportation between the primary uses. The development program specific to each Zoo Miami Entertainment Area is as follows:

**Zoo Miami Entertainment Area I:** This area is located generally between SW 152 Street and theoretical SW 168 Street and between theoretical SW 122 Avenue and theoretical SW 132 Avenue and abuts the north side of the existing Zoo Miami. The F.A.R. shall apply only to developable areas (building structures) and shall not apply to parking facilities, landscaped areas, environmentally protected lands, and other non-buildable common areas. The development program of the Zoo Miami Entertainment Area I may include the following uses:

- Water Theme Park (23 acres)  
2,500 visitors  
Food service with 150 seats  
500 parking spaces
- Family Entertainment Center (20 acres)  
Entertainment and arcade (75,000 sq. ft.)  
Food service with 200 seats  
275 parking spaces
- Gold Coast Railroad Museum (45 acres)  
New museum exhibition structures (50,000 sq. ft.)  
Themed Retail (20,000 sq. ft.)  
Restaurant space ancillary to the Museum (30,000 sq. ft.) with 600 seats  
Transit railroad with stops throughout the Zoo Miami DRI site  
385 parking spaces
- Hotels (15 acres)  
200 hotel rooms  
275 parking spaces

**Zoo Miami Entertainment Area II:** This area is located at the southwest corner of SW 152 Street and SW 117 Avenue to the northeast of the existing Zoo Miami, and east of the Zoo Miami Entertainment Area I. To further protect environmental resources, the redelineation of any NFCs within this area shall be required prior to approval of a zoning change or development order. The development program of the Zoo Miami Entertainment Area II may include the following uses:

- Resort Hotel (36 acres)  
600 hotel rooms  
Conference Center (130,000 sq. ft.)  
Restaurants (2) with 600 seats and Bar with 50 seats  
Swimming Pool/Resort Amenities

- Theme Park (174 acres)  
1,500,000 visitors  
Entertainment Venues (3,000 seats)  
Theme Park Rides and Related Attractions  
Food service with 1,200 seats

## **Institutions, Utilities and Communications**

The Plan map illustrates, for information purposes, only the location of major institutional uses, communication facilities and utilities of metropolitan significance. Depicted are such uses as major hospitals, medical complexes, colleges, universities, regional water-supply, antenna fields, radio and television broadcast towers, wastewater and solid waste utility facilities such as the resources recovery plant, major government office centers and military installations. The full range of institutions, communications and utilities may be allowed under this land use category. Offices are also allowed in this map category. Internally integrated business areas smaller than 5 acres in size or up to 10 percent of the total floor area of an institutional, public facility or office use may also be approved in this map category. If the owner of land designated as Institutions, Utilities and Communications chooses to develop the land for a different use and no public agency intends to use the site for a public facility, the land may be developed for a use or a density comparable to and compatible with surrounding development providing that such development is consistent with the goals, objectives and policies of the CDMP especially Policies LU-4A and LU-4B.

Neighborhood or community-serving institutional uses, cell towers and utilities including schools, libraries, sanitary sewer pump stations, electric distribution substations and fire and rescue facilities in particular, and cemeteries may be approved where compatible in all urban land use categories, in keeping with any conditions specified in the applicable category, and where provided in certain Open Land subareas. Compatibility shall be determined in accordance to Policy LU-4A. Co-location of communication and utility facilities are encouraged. Major utility and communication facilities should generally be guided away from residential areas; however, when considering such approvals, the County shall consider such factors as the type of function involved, the public need, existing land use patterns in the area and alternative locations for the facility. All approvals must be consistent with the goals, objectives and policies of the Comprehensive Development Master Plan.

Electric power transmission line corridors are permitted in every land use category when located in established right-of-ways or certified under the Florida Electrical Power Plant Siting Act (Sections 403.501-403.518, F.S.) as an ancillary use to a new power plant, or the Transmission Line Siting Act (Sections 403.52-403.5365 F.S.) for individual electrical transmission lines. If an electric power transmission line corridor does not meet either of the above conditions, it shall be situated in an area designated as Institutions, Utilities and Communications; Industrial and Office; Business and Office; or Parks and Recreation on the adopted Land Use Plan map.

When compatible with adjacent uses and permitted by County and State regulations, non-utility ancillary uses that may be located in transmission line corridors include agriculture, parking lots, open space, golf courses, bikeways and paths for walking and exercising.

Included in this category is the Homestead Air Reserve Base (HARB) and the adjacent HARB Redevelopment and Economic Development Area (HARB REDA). The HARB REDA, which was once part of the former Homestead Air Force Base (HAFB), includes land conveyed to Miami-Dade County for economic development purposes by the federal government through an Economic Development Conveyance (EDC) Agreement, and property conveyed to other entities

through other federal conveyance mechanisms and legal instruments. The range of uses that may occur on the HARB property and on the HARB REDA include those uses allowed under the "Institutions, Utilities and Communications" land use category, and in particular, uses on the HARB property shall emphasize military aviation and related uses and national security. In addition, industrial, commercial, and other land uses consistent with the EDC Agreement, and the Department of the Air Force Record of Decision (ROD) issued by the Secretary of the Air Force are authorized within the HARB REDA, provided such uses are:

1. Compatible with HARB and its operations;
2. Compatible with other adjacent uses;
3. Consistent with CDMP provisions of this plan, including but not limited to all applicable coastal management and environmental protection policies.

## **Transportation**

The LUP map includes a summarized portrayal of the major components of Miami-Dade County's existing and future transportation network. Included are roadways, rapid transit corridors, railways and major switching yards, and such major terminals as the County airports and the Miami-Dade Seaport. This information is included on the LUP map to provide orientation and locational references, and to relate future development patterns to the future transportation network. The Transportation and Capital Improvements Elements of the CDMP provide additional details about these facilities, including their intended sizes, functions, uses, and designs and, with the exception of local streets, schedules of improvements.

As provided in the policies of the Transportation Element, transportation facilities such as terminals and transit stations shall contain the transportation uses and may contain other uses as provided in the applicable Transportation Subelement. Railroad terminals may include uses designed to serve the traveling public and on-site employees, such as offices, personal services, retail activities, restaurants, auto rental business, and lodging establishments. Rail yards may also be developed with industrial, office and similar uses that are customary and incidental to the primary railroad use.

All proposed uses on lands owned by Miami-Dade County at the Opa-locka Executive Airport, Kendall-Tamiami Executive Airport, Homestead General Aviation Airport, and Miami International Airport that are designated as Terminal on the LUP map, may be developed for the uses described in this subsection. All proposed uses on such lands shall comply with the requirements of the Future Aviation Facilities Section of the Aviation Subelement, shall be compatible with, and not disruptive of, airport operations occurring on such lands, and shall comply with all applicable regulations of the Federal Aviation Administration and other applicable law.

The portion of the Opa-Locka Executive Airport, Kendall-Tamiami Executive Airport, Homestead General Aviation Airport, and Miami International Airport designated in the Comprehensive Development Master Plan for aviation uses, shall be deemed to consist of all portions of the airports where general public access is restricted (but not including terminal concourses), shall generally be limited to aviation uses, including but not limited to airfield uses such as runways, taxiways, aprons, runway protection zones, landing areas, and support and maintenance facilities such as control towers, flight service stations, access roads, fire stations, storage and aircraft maintenance and repair facilities and hangars, aircraft and aircraft parts manufacturing and storage, fixed based operators, air cargo operations, specialized aircraft service operations, and fuel farms. Up to fifty (50) percent of the areas designated for aviation uses may be developed with aviation-related uses. Aviation-related uses shall include, but not be limited to,

manufacturing, storage, office, service, or similar uses ancillary to or supportive of aviation uses. The Director of the Miami-Dade Aviation Department, or the Aviation Department's designee, in consultation with the Director of Miami-Dade Department of Regulatory and Economic Resources, shall determine whether any particular use is an aviation use or an aviation-related use. Where not otherwise prohibited by law, open space and interim or existing agricultural uses and zoning may also be permitted in the portions of these airports designated for aviation use, subject to such conditions and requirements as may be imposed to ensure public health and safety.

The portion of these airports designated in the Comprehensive Development Master Plan for aviation related and non-aviation uses, shall be deemed to consist of all portions of the airports where general public access is not restricted and terminal concourses only at Miami International Airport, and may include aviation, aviation-related, and non-aviation uses that are compatible with airport operations and consistent with applicable law.

Aviation uses where general public access is allowed may include existing uses and the following or substantially similar uses:

- passenger terminal area, which may include non-aviation related uses designed to serve the traveling public and on-site employees, such as offices, personal services, retail activities, restaurants, auto rental businesses, and lodging establishments,
- parking garages and lots serving the airport,
- access roadways serving the airport,
- offices of aviation industry companies and the Miami-Dade County Aviation Department,
- facilities of fixed base operators,
- hangar rentals and tie downs,
- ground transportation services,
- aircraft and automobile rental establishments,
- aviation-related educational uses such as flight schools, simulator training facilities, helicopter and aerobatics training and other educational facilities providing aviation courses,
- aviation-related governmental agency facilities,
- flying club facilities,
- aviation-related entertainment uses such as skydiving establishments, museums and sightseeing services, and
- aviation-related retail uses such as aircraft sales, electronic an instrument sales and pilot stores.

Subject to the restrictions contained herein, the following non-aviation-related uses may be approved in the portions of the Opa-Locka Executive Airport, Kendall-Tamiami Executive Airport, Homestead General Aviation Airport, and Miami International Airport designated for non-aviation uses on the Airport Land Use Master Plan maps:

- lodgings such as hotels and motels (except for Homestead General),
- office buildings (except for Homestead General),

- lodgings and office buildings at Miami International Airport (except in terminal concourses),
- industrial uses such as distribution, storage, manufacturing research and development and machine shops (except for Homestead General),
- agricultural uses,
- retail, restaurants, and personal service establishments (except for Homestead General), and
- gaming establishments (limited to Miami International Airport only).

Such non-aviation uses at the Opa-Locka Executive Airport, Kendall-Tamiami Executive Airport, Homestead General Aviation Airport, and Miami International Airport shall be limited as follows:

- (1) The land area within Opa-Locka Executive, Miami International, and Kendall-Tamiami Executive airports that may be devoted to particular non-aviation uses shall be limited to the following percentages of the land area designated for aviation-related and non-aviation uses within each airport. Non-aviation-related at Opa-Locka Executive Airport shall range from 20 to 85 percent for industrial uses, 5 to 35 percent for commercial uses, 5 to 25 percent for office uses, 0 to 10 percent for hotels and motels, and 0 to 20 percent for institutional uses. Non-aviation-related at Miami International Airport shall range from 20 to 85 percent for industrial uses, 5 to 50 percent for commercial uses and/or office uses, 0 to 50 percent for hotels and motels, and 0 to 20 percent for institutional uses. Non-aviation-related at Kendall-Tamiami Executive Airport shall range from 0 to 85 percent for industrial uses, 0 to 100 percent for commercial uses, 0 to 25 percent for office uses, 0 to 10 percent for hotels and motels, and 0 to 20 percent for institutional uses.

The portions of the Opa-Locka Executive Airport designated in the Comprehensive Development Master Plan for Aviation-Related (Other Uses/Flexible) may also be developed with non-aviation uses that are compatible with airport operations and consistent with applicable law, including FAA regulations and any airport layout plan governing permissible uses on the entire airport property. Such non-aviation uses shall not exceed the above referenced percentages of uses for the entire airport.

The distribution, range, intensity and types of such non-aviation related uses shall vary at these three airports by location as a function of the availability of public services, height restrictions, CDMP intensity ceiling for the Urban Infill Area (FAR of 2.0 not counting parking structures), at Opa-Locka Executive and Miami International airports or for the Urbanizing Area (FAR of 1.25 not counting parking structures) at Kendall-Tamiami Executive Airport, impact on roadways, access and compatibility with neighboring development. Freestanding retail and personal service uses and shopping centers shall front on major access roads preferably near major intersections, where practical, and have limited access to major roadways.

- (2) Those portions of Homestead General Aviation Airport that are not developed for uses that are aviation-related or directly supportive of airport operations shall be developed with agricultural uses.
- (3) Each non-aviation use shall comply with applicable law, including but not limited to FAA regulations and the current airport layout plan on file with the Miami-Dade County Aviation Department governing permissible uses on the entire airport property.

- (4) At Kendall-Tamiami Executive Airport, the development of the 8.2 acre (973.52 ft x 363 ft) parcel for non-aviation uses at the southwest corner of SW 137 Avenue and theoretical SW 124 Street shall be limited to access roads, open space, parking and drainage facilities.

The Port of Miami and downtown Miami maritime park areas are also included in this category. Because the CDMP does not generally preempt municipal plans and because the City of Miami comprehensive plan allows a broad range of land uses and facilities in addition to transportation facilities, it is the intent of the CDMP that all actions of the County with regard to development in the downtown Miami maritime park area are deemed to be consistent with the CDMP if consistent with the adopted comprehensive plan of the City of Miami. Further, notwithstanding

the City's comprehensive plan, it is the intention of the CDMP that Port developments on Dodge and Lummus Islands and on the mainland may include other uses including, but not limited to, commercial, recreational and cultural uses accessible to Port users, County visitors and residents.

The summarized roadway classification used on the LUP map distinguishes between Limited Access facilities, Major Roadways (3 or more lane arterials and collectors) and Minor Roadways (2 lane arterials and collectors). Also shown are existing and proposed Rapid Transit corridors. The term rapid transit, as used herein, includes any public heavy rail or light rail, or busses operating on exclusive bus lanes. The transportation network depicted is a year 2030 network that will develop incrementally as funding becomes available. In addition, rapid transit corridors may be provided with an interim type of service such as express bus service during much of the planning period while more permanent facilities are being planned, designed and constructed. The roadway and transit alignments shown in the CDMP are general indications of the facility location. Specific alignments may be modified through detailed transportation planning, DRI review and approval processes, subdivision platting, highway design and engineering or other detailed planning or engineering processes. Moreover, most station locations along future rapid transit lines are not identified in the Plan; they will be selected as part of the detailed planning of transit facilities in the corridor.

Because of the critical relationships between transportation facilities and the land uses served and impacted by those facilities, land use and transportation planning decisions must be made in direct concert with one another. Accordingly provisions for nonlocal roadways, public mass transportation facilities, rail lines, airports and the Miami-Dade Seaport facilities contained in the Transportation Element should not be amended without concurrent evaluation and, as applicable, amendment of the Land Use Plan map. In particular, extension or widening Major or Minor Roadways beyond 2 lanes outside the Urban Development Boundary (UDB) of the LUP map may occur only if indicated on the LUP map.

## **Water**

This category includes all natural waters such as coastal waters and navigable rivers or waters. Water-dependent uses and water-related uses along coastal shorelines as discussed under Objective CM-5 as well as ancillary structures or uses may be permitted for flood control or recreational purposes. Man-made water bodies are permitted in any land use category subject to applicable environmental and other regulations, may be filled and developed pursuant to the applicable land use category, and are therefore illustrated on the LUP map as water features and not designated as "Water."

## **Urban Development Boundary**

The Urban Development Boundary (UDB) is included on the LUP map to distinguish the area where urban development may occur through the year 2030 from areas where it should not occur. Development orders permitting urban development will generally be approved within the UDB at some time through the year 2030 provided that level-of-service standards for necessary public facilities will be met. Adequate countywide development capacity will be maintained within the UDB by increasing development densities or intensities inside the UDB, or by expanding the UDB, when the need for such change is determined to be necessary through the Plan review and amendment process.

The CDMP seeks to facilitate the necessary service improvements within the UDB to accommodate the land uses indicated on the LUP map within the year 2030 time frame. Accordingly, public expenditures for urban service and infrastructure improvements shall be focused on the area within the UDB, and urban infrastructure is discouraged outside the UDB. In particular, the construction of new roads, or the extension, widening and paving of existing arterial or collector roadways to serve areas outside the UDB at public expense will be permitted only if such roadways are shown on the LUP map and in the Transportation Element.

No new commercial agricultural use of property may be established within the Urban Development Boundary, except on property designated Agriculture on the LUP map or zoned AU (Agriculture) or GU (Interim). All property within the Urban Development Boundary not designated Agriculture or zoned AU or GU shall not be permitted to be used for the establishment of any new commercial agricultural use. An additional exception is that land in utility easements or rights-of-way or airport or other large government - owned properties may be approved for new commercial agricultural uses where the use would be compatible with, and would have no unfavorable effect on, the surrounding area. Commercial agricultural uses include, without limitation, all uses of property associated with commercial horticulture; floriculture; viticulture; forestry; dairy; livestock; poultry; apiculture; pisciculture, when the property is used principally for the production of tropical fish; all forms of farm production; and all other such uses, except retail nurseries and retail greenhouses. Incidental agricultural use of property, such as non profit community or rooftop gardening, specifically authorized by zoning which is otherwise consistent with the LUP map does not constitute commercial agriculture use within the meaning of this provision.

## **Urban Expansion Area**

The Land Use Plan map also contains a year 2040 Urban Expansion Area (UEA) Boundary. The UEA is comprised of that area located between the 2030 UDB and the 2040 UEA. The Urban Expansion Area is the area where current projections indicate that further urban development beyond the 2030 UDB may be warranted some time between the year 2030 and 2040. Until these areas are brought within the UDB through the Plan review and amendment process, they are allowed to be used in a manner consistent with the provisions set forth for lands designated as "Agriculture" or the applicable "Open Land" area.

Urban infrastructure and services should be planned for eventual extension into the UEA, sometime between the years 2030 and 2040. However, if water or sewer lines or major roadway improvements are extended beyond the UEA in order to serve a necessary public facility that has been approved consistent with the Comprehensive Development Master Plan, these improvements should be sized or restricted to accommodate only the needs of the public facility.

## **Agriculture**

The area designated as "Agriculture" contains the best agricultural land remaining in Miami-Dade County. As stated in the Miami-Dade County Strategic Plan, approved by the Board of County Commissioners, protection of viable agriculture is a priority. The principal uses in this area should be agriculture, uses ancillary to and directly supportive of agriculture and farm residences. Uses ancillary to and directly supportive of agriculture are defined as those uses related to preserving, processing, packaging or selling of agricultural products from Florida (except that wineries may utilize imported products for winemaking), and farm supplies, as well as sale and service of farm machinery and implements, subject to the requirements of Chapter 24 of the County Code. Uses that are directly supportive of agriculture but not ancillary to an on-site agricultural use may occur in this area where it can be demonstrated that the use is primarily addressing a need of the local agricultural industry or that the use significantly furthers agritourism to the agricultural area. Uses necessary to support the rural residential community of the agricultural area may also be approved, including houses of worship. However, schools shall not be approved in Agriculture areas but should be located inside the UDB in accordance with Policy EDU-3A.

In order to protect the agricultural industry, uses incompatible with agriculture, and uses and facilities that support or encourage urban development are not allowed in this area. Residential development that occurs in this area is allowed at a density of no more than one unit per five acres. Creation of new parcels smaller than five acres for residential use may be approved in the Agriculture area only if the immediate area surrounding the subject parcel on three or more contiguous sides is predominantly and lawfully parcelized in a similar manner, and if a division of the subject parcel would not precipitate additional land division in the area. Unless expressly permitted elsewhere in this section, no business or industrial use should be approved in the area designated Agriculture unless the use is directly supportive of local agricultural production, and is located on an existing arterial roadway, and has adequate water supply and sewage disposal in accordance with Chapter 24 of the County Code, and the development order specifies the approved use(s); however, agricultural processing facilities for produce grown in Florida and uses that promote ecotourism and agritourism consistent with Policy LU-1P are not restricted to locating on an existing arterial roadway. Other uses, including utility uses compatible with agriculture and with the rural residential character may be approved in the Agriculture area only if deemed to be a public necessity, or if deemed to be in the public interest and the applicant demonstrates that no suitable site for the use exists outside the Agriculture area.

Existing quarrying and ancillary uses in the Agriculture area may continue operation and be considered for approval of expansion.

The parking and storage of operable, non-disabled commercial motor vehicles may be considered for approval on properties ten acres or greater in the area east of the Urban Development Boundary, south of the theoretical extension of SW 236 Street, and north of SW 248 Street, as depicted on Figure 5.1, subject to the following requirements: (a) commercial vehicle storage facilities shall obtain an annual operating permit from the Division of Environmental Resources Management in the Department of Regulatory and Economic Resources and be subject to required quarterly groundwater quality monitoring; (b) all vehicles and equipment shall be stored or parked only on paved impervious surfaces with county-approved drainage systems; (c) truck washing, mechanical repair, or maintenance of any kind shall be prohibited; (d) the storage, handling, use, discharge and disposal of liquid wastes or hazardous wastes shall be prohibited; and (e) a vegetative buffer shall be provided along the perimeter of the property to provide visual screening.

A Bed and Breakfast establishment that is owner-occupied, owner-operated, and located on a parcel with a current agricultural classification, as determined by the Property Appraiser's Office, may be allowed. A designated historic structure that is owner-occupied and owner-operated may be converted to a Bed and Breakfast use. An agricultural classification is not needed for a Bed and Breakfast use designated as a historic structure.

In an effort to enable compatible diversification of the economy of Agriculture areas and provide additional land use options for owners of properties that surround structures having historical significance, after such time as the County adopts procedures for the establishment of Thematic Resource Districts (TRDs) pursuant to Policy LU-6L, and a TRD including architectural and landscape design guidelines is established in an area designated Agriculture, additional uses may be authorized in such TRDs established in Agriculture areas. Such additional uses must be designed and developed in accordance with TRD standards, must promote ecotourism or agritourism activities in the Agriculture area, and must not be incompatible with nearby agricultural activities.

Also included in the Agriculture area are enclaves of estate density residential use approved and grandfathered by zoning, ownership patterns and platting activities which predate this Plan. The grandfather provisions of the Miami-Dade County Zoning Code shall continue to apply in this area except that lots smaller than 15,000 square feet in area are not grandfathered hereby. Moreover, all existing lawful uses and zoning are deemed to be consistent with this Plan unless such a use or zoning: (a) is found through a subsequent planning study, as provided in Policy LU-4E, to be inconsistent with the foregoing grandfather provisions or with the CDMP as provided in the section of this chapter titled "Concepts and Limitations of the Land Use Plan Map". This paragraph does not, however, authorize the approval or expansion of any use inconsistent with this plan. To the contrary, it is the intent of this Plan to contain and prevent the expansion of inconsistent development in the Agriculture area. It is provided, however, that existing parcels that: a) have existing lawful zoning of IU-1 (Industry-Light) since November 29, 1988; and b) are bifurcated by the UDB; and c) have any portion of the parcel located within a designated urban center, may be developed with any of the industrial uses permitted in the IU-1 zoning district, as long as adequate buffering and drainage is provided to limit impacts to adjacent agriculturally-designated properties.

**Commercial Vehicle Storage Area 1**

DEPARTMENT OF REGULATORY  
AND ECONOMIC RESOURCES

## Open Land

The land designated as "Open Land" is not needed for urban uses between now and the year 2030 and has been set aside for uses other than urban development. It is not simply surplus undeveloped land, but rather it is land that is intended to serve one or more of the following functions: production such as agriculture, limestone extraction or other resource-based activity such as development of potable water supplies; rural residential development at a maximum density indicated for the specific Open Land subarea, but no greater than one unit per five acres; recreation; commercial vehicle storage as indicated for the specific Open Land Subarea; compatible utility and public facilities as indicated for the specific Open Land Subarea, and conservation, maintenance or enhancement of environmental character. Lower residential densities may be required in some areas for purposes of avoiding flood conditions or to avoid degradation of environmental systems or features. Because of the water supply-related or other environmental functions of those areas, they may also be considered for acquisition by federal, State, regional, County or private institutions that would manage these areas to optimize environmental functions, and for location of project features such as reservoirs, stormwater treatment areas, canals, and flow-ways constructed pursuant to the Comprehensive Everglades Restoration Plan.

Also included in some Open Land areas are some existing year-round agricultural activities, and some enclaves of estate density residential use approved and grandfathered by zoning, ownership patterns and platting activities, which predate this Plan. The grandfather provisions of the Miami-Dade County Zoning Code shall continue to apply in Subareas 1, 2, 3 and 5, except that residential lots smaller than 15,000 square feet in area are not grandfathered hereby. Moreover, all existing lawful uses and zoning are deemed to be consistent with this Plan unless a use or zoning: (a) is found through a subsequent planning study, as provided in Policy LU-4E, to be inconsistent with the foregoing grandfather provisions or inconsistent with the CDMP as provided in the section of this chapter titled "Concepts and Limitations of the Land Use Plan Map". This paragraph does not, however, authorize the expansion of any use inconsistent with the specific provisions for the applicable Open Land subarea. To the contrary, it is the intent of this plan to contain and prevent the expansion of such inconsistent development in Open Land areas.

Because Open Land areas primarily consist of wetlands, all proposed uses will be reviewed on a case-by-case basis. No particular use, other than rural residential use at specified densities is definitively allowed. Following is an indication of the uses and residential densities that are likely to be permitted in each of five Open Land Subareas, subject to conformity with the pertinent goals, objectives, and policies of this Plan. The Land Use Plan map depicts the precise boundary of the entire Open Land area. The map titled "Open Land Subareas" (Figure 6) and the following text indicate the boundaries between Open Land Subareas.

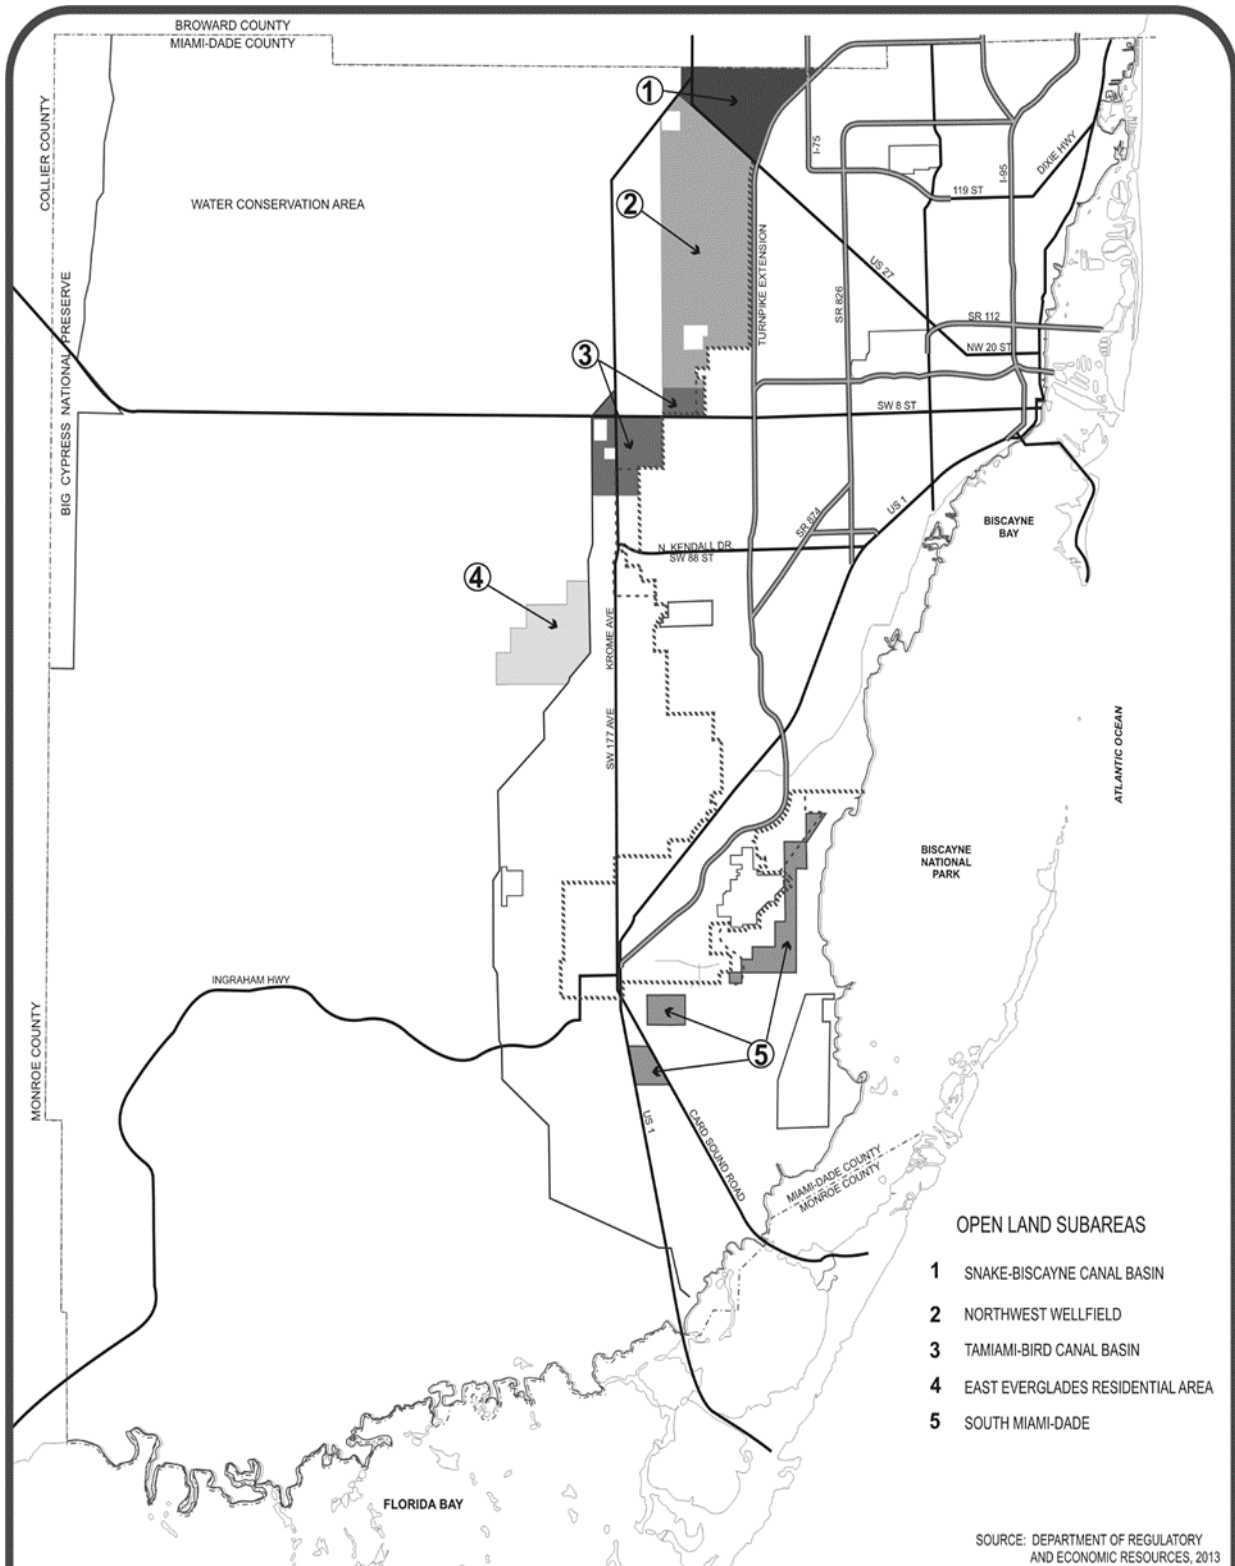

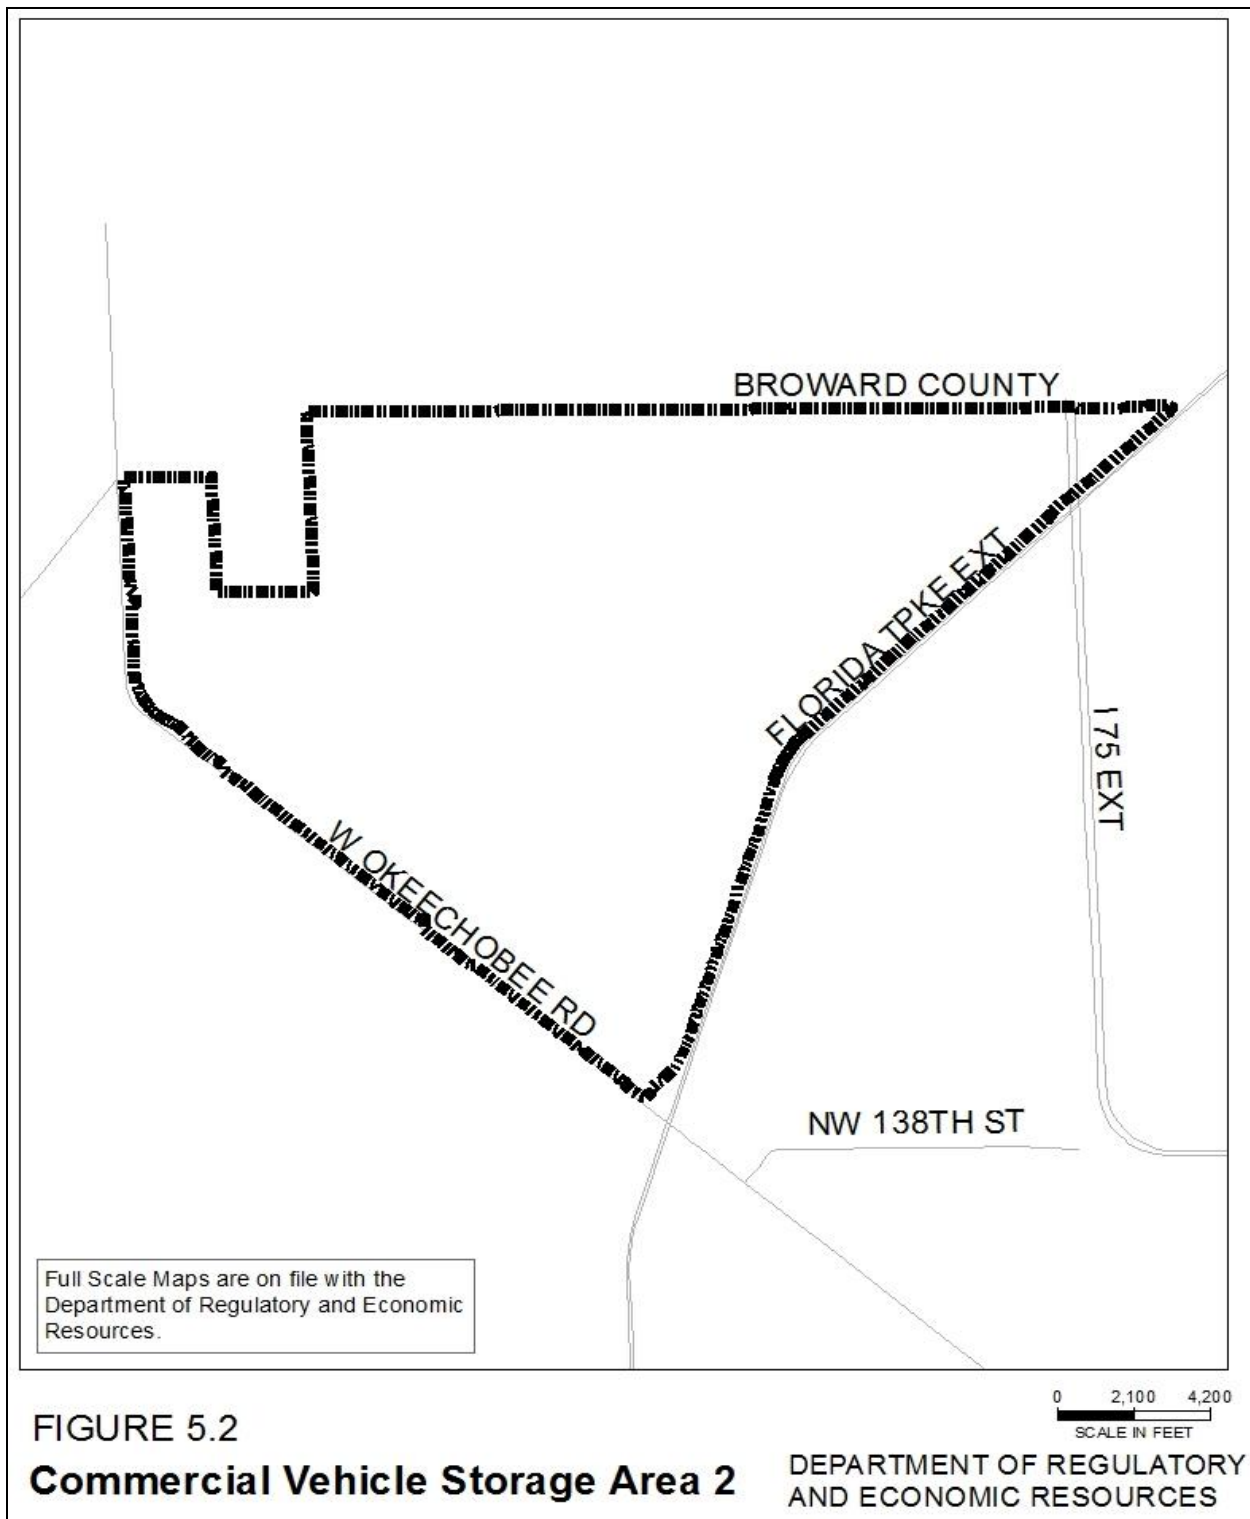

Figure 6  
**OPEN LAND SUBAREAS**

DEPARTMENT OF REGULATORY  
AND ECONOMIC RESOURCES

**Open Land Subarea 1 (Snake-Biscayne Canal Basin).** This subarea is located north of the Miami Canal (Canal-6) in northwestern Miami-Dade County. Rural residential use at 1 dwelling unit per 5 acres, limestone quarrying and ancillary uses, compatible institutional uses, public facilities, utility facilities, and communications facilities, recreational uses, outdoor vehicle recreational areas and/or recreational motorsport facilities on the decommissioned Opa-locka West Airport site, subject to Board of County Commission approval for specific uses, nurseries and tree farms, agriculture production<sup>1</sup> and the limited raising of livestock may be considered for approval in this subarea. The following uses may also be considered for approval in the portion of Open Land Subarea 1 located east of Okeechobee Road as depicted on Figure 5.2: parking and storage of operable, non-disabled commercial motor vehicles, including construction equipment and agricultural equipment, as defined in section 320.01, Florida Statutes, and incidental temporary parking and storage of operable, non-disabled passenger automobiles to serve such allowable uses on the same parcel (but not to include stand-alone automobile parking and storage uses such as car rental facilities). It is provided that such parking and storage uses shall be allowed only on properties ten acres or greater. Such parking and storage of vehicles and equipment shall be subject to the following requirements: (a) commercial vehicle storage facilities shall obtain an annual operating permit from the Division of Environmental Resources Management in the Department of Regulatory and Economic Resources and be subject to required quarterly groundwater quality monitoring; (b) all vehicles and equipment shall be stored or parked only on paved impervious surfaces with county-approved drainage systems; (c) mechanical repair or maintenance of any kind shall be prohibited; (d) the storage, handling, use, discharge and disposal of liquid wastes or hazardous wastes shall be prohibited; (e) the use will be analyzed in accordance with Policy CON-7J; (f) the use shall not be located within 100 feet of a body of water, canal, or lake as measured from the top of bank or within 25 feet of a wetland that has not otherwise been mitigated or will not otherwise be mitigated pursuant to Chapter 24 of the Code; and (g) truck washing shall be permitted as an ancillary use at commercial vehicle storage facilities provided that the truck washing shall be done with 100% recyclable water systems as approved by the Division of Environmental Resources Management in the Department of Regulatory and Economic Resources; truck washing services shall only be provided for trucks stored at the commercial vehicle storage facilities for at least 4 hours; truck washing shall be conducted only in fully enclosed buildings as approved by the Division of Environmental Resources Management in the Department of Regulatory and Economic Resources; facilities shall allow inspections at any time during operating hours; facilities shall provide secondary containment surrounding all storage tanks; and be subject to required quarterly groundwater quality monitoring. In addition, if a violation of these provisions related to truck parking and truck washing or the operating conditions is found on a property on three separate occasions within a three year period, truck washing shall no longer be permitted on the subject property. The County, by ordinance, shall provide a process to reestablish the use, taking into account any change in ownership, the nature of the violation, and a period of repose for the property. Uses that could compromise groundwater quality shall not occur west of the Turnpike Extension.

<sup>1</sup> Miami-Dade County shall formulate and adopt a zoning overlay or other land development regulations specific for land designated Open Land Subarea 1 (Snake-Biscayne Canal Basin) on the CDMP Land Use Plan map to specifically address the type of agriculture production uses, and the limited raising of livestock uses that are permitted; that also considers the limited flood protection that is provided in this subarea.

**Open Land Subarea 2 (Northwest Wellfield).** This Open Land subarea is bounded on the north by the Miami Canal, on the east by the Turnpike Extension, on the west by the Dade-Broward Levee, and on the south by NW 25 Street between the Turnpike Extension and NW 137 Avenue and by NW 12 Street and its hypothetical extension between NW 137 Avenue and the Dade-Broward Levee. Limestone quarrying and ancillary uses including the continued operation of existing cement plants, necessary and compatible institutional uses, public facilities, utility facilities, and communications facilities, recreational uses, rural residences at a maximum density of 1 dwelling unit per 5 acres and seasonal agriculture<sup>2</sup> may be considered for approval in this area, in keeping with the Northwest Wellfield Protection Plan (Board of County Commissioners Resolution R-1541-85) and Chapters 24 and 33 of the Miami-Dade County Code, and wetland protection requirements. Uses that could compromise groundwater quality shall not occur in this area. In furtherance of Board of County Commissioners Resolution R-1098-88, the creation of a State Protection Area in this subarea is also supported.

**Open Land Subarea 3 (Tamiami-Bird Canal Basins).** This subarea is bounded on its north by hypothetical NW 12 Street and SW 8 Street, on the east by the year 2030 UDB, on the south by the year 2030 UDB and hypothetical SW 56 Street, and on the west by SW/NW 147 Avenue and Levee 31N. The subarea includes the eastern portion of the North Trail basin and the Bird Drive Everglades basin. Uses that can be considered for approval in this subarea include rural residences at a maximum density of 1 dwelling unit per 5 acres, compatible institutional uses, public facilities, utility and communications facilities, seasonal agricultural use, recreational use, or limestone quarrying and ancillary uses.

Uses that could compromise groundwater quality shall not occur in this area. Any land alteration and development in the Bird Drive or North Trail basins shall conform to the wetland basin plans adopted for those basins pursuant to policies of the CDMP.

**Open Land Subarea 4 (East Everglades Residential Areas).** This subarea is bounded on the north, west and southwest by Everglades National Park, on the east by Levee 31N, and on the south by SW 168 Street. Uses which may be considered for approval in this area are agriculture production and raising of livestock<sup>3</sup> and rural residences at a density of 1 dwelling unit per 40 acres, or 1 dwelling unit per 20 acres if ancillary to an established agricultural operation, or 1 dwelling unit per 5 acres, after such time as drainage facilities become available to protect this area from a one-in-ten-year flood event in keeping with the adopted East Everglades zoning overlay regulation (Section 33B, Code of Miami-Dade County) and compatible and necessary utility facilities. Uses that could compromise groundwater quality shall not occur in this area.

**Open Land Subarea 5 (South Miami-Dade).** This Open Land subarea lies south and east of Homestead and Florida City. It is bounded on the north and west by the Agriculture area, and on the south and east by Environmental Protection areas. Future uses which may be considered for approval in this area include seasonal agriculture, limestone quarrying and ancillary uses, compatible institutional uses, public facilities, utility facilities, and communications facilities, recreational uses and rural residences at a maximum density of 1 dwelling unit per 5 acres. Uses that could compromise groundwater quality shall not occur within three miles of Biscayne Bay.

<sup>2</sup> For purposes of this chapter, seasonal agriculture means those agricultural activities which occur during the months November through April on land at natural elevation, or which occur during the months May through October on land that is, or has been bedded or filled to an elevation at or above Miami-Dade County flood criteria, and given that no additional off-site drainage will occur.

<sup>3</sup> Miami-Dade County shall formulate and adopt amendments to Miami-Dade County Code Section 33B Areas of Critical Environmental Concern, Article II. - East Everglades, and adopt land development regulations applicable to land designated Open Land Subarea 4 (East Everglades Residential Areas) to specifically address the type of agriculture production uses and the limited raising of livestock uses that may be allowed; that considers water quality and that there is no flood protection provided in this Subarea.

## **Environmental Protection**

The Environmental Protection designation applies to those areas in the County most environmentally significant, most susceptible to environmental degradation and where such degradation would adversely affect the supply of potable fresh water or environmental systems of County, regional, State or national importance.

These lands are characteristically high-quality marshes, swamps and wet prairies, and are not suited for urban or agricultural development. However, some high-quality uplands such as tropical hammocks and pinelands on the State Conservation And Recreation Lands (CARL), Florida Forever and Miami-Dade County Environmentally Endangered Lands (EEL) acquisition lists are also included. Most of the CARL and Florida Forever projects are designated on the future Land Use Plan (LUP) Map, but some are not because of their small size. EEL projects that are acquired and are large enough to be depicted at the Plan Map scale are also designated on the Future Land Use Plan Map. It is the policy of this Plan that all land areas identified on the State CARL and Florida Forever, Miami-Dade County EEL, and South Florida Water Management Save Our Rivers (SOR) acquisition lists shall have equally high priority for public acquisition as those land areas designated Environmental Protection on the Future LUP Map. Uses permitted within these areas must be compatible with the area's environment and the objectives of the Comprehensive Everglades Restoration Plan, and shall not adversely affect the long-term viability, form or function of these ecosystems. Residential development in this area shall be limited to a maximum density of one unit per five acres, and in some parts of this area lower densities are required to protect the fresh water supply and the integrity of the ecosystems. Public and private wetland mitigation banks and restoration programs may also be approved in Environmental Protection areas where beneficial to county ecological systems.

Because of the importance of maintaining the natural form and function of these areas, many of these areas have been slated for purchase by State or federal agencies. Miami-Dade County will encourage the acquisition of these areas by public or private institutions that will manage these areas toward this objective. However, so long as these lands remain in private ownership, some compatible use of this land will be permitted by Miami-Dade County consistent with the goals, objectives and policies of this Plan and the objectives of the Comprehensive Everglades Restoration Plan. All proposed uses will be reviewed on a case-by-case basis for compliance with environmental regulations and consistency with this Plan and the Comprehensive Everglades Restoration Plan. The following provides an indication of the uses and residential densities that may be considered for approval subject to conformity with the pertinent goals, objectives and policies of this Plan. The precise boundary of the entire Environmental Protection area is depicted on the LUP map. The map titled "Environmental Protection Subareas" (Figure 7) and the following text indicate the boundaries between subareas of the Environmental Protection Area.

**Environmental Protection Subarea A (State Water Conservation Area).** This subarea contains the land and water areas within the authorized boundaries of Water Conservation Area No. 3 of the South Florida Water Management District (SFWMD). The westernmost portion of this subarea contains a portion of the Big Cypress National Preserve and the Dade-Collier Training and Transition Airport. Most of the land in this subarea is under ownership of the National Park Service or the SFWMD, and acquisition of the remainder is currently being pursued. Miami-Dade County encourages full acquisition of these areas, with the understanding that revenue obtained from the purchase of the Dade-Collier Training and Transition Airport will be used to acquire another acceptable site to accommodate the long-term growth of commercial aviation activity traditionally accommodated by Miami International Airport.

Land uses and activities, which may occur in the Big Cypress National Preserve, are outlined in management plans prepared and adopted by the National Park Service. In addition, any development, which might be contemplated for non-federal lands in the Big Cypress area, is also limited by this Plan and by provisions of the Miami-Dade County Code to uses that are consistent with Florida Rules governing the Big Cypress Areas of Critical State Concern (Chapter 28-25, Part III, F.A.C.). Land uses and activities in Water Conservation Area 3 are governed by the SFWMD. Miami-Dade County supports the implementation of land use and management policies and programs established by the SFWMD.

Miami-Dade County supports the implementation of those agencies management policies and programs. Accordingly, until acquisition has been completed, uses permitted in the Big Cypress Preserve area by Miami-Dade County will be limited to rural residential use at a maximum density of one dwelling unit per five acres and utility and communication facilities with limited ground coverage, provided that the site can be designed and accessed in a manner consistent with the goals, objectives and policies of this Plan, all prevailing environmental regulations and the referenced State Rules governing the Big Cypress Critical Area, whichever are most protective. In Water Conservation Area No. 3, Miami-Dade County will support the use policies established by the South Florida Water Management District and will consider approval of no use in excess of one dwelling unit per forty acres.

**Environmental Protection Subarea B (Miami-Dade-Broward Levee Basin).** This subarea is bounded on the west and north by Levee 30, on the east by the Dade-Broward Levee and on the South by the Tamiami Canal (C-4). The majority of the subarea (north of hypothetical NW 12 Street) is addressed by the adopted Northwest Wellfield Protection Plan (Board of County Commissioners Resolution R-1541-85). The subarea is predominantly wetland and all land use and site alteration proposals will be closely evaluated on a case-by-case basis by federal, State, regional and County agencies for conformity with all prevailing environmental regulations and compatibility with objectives of the Comprehensive Everglades Restoration Plan. The South Florida Water Management District has listed this area as an acquisition proposal in its 5-year Save Our Rivers acquisition program.

Land uses that may be considered for approval include rural residences at a maximum density of one dwelling unit per five acres, communications facilities with limited ground coverage, recreational facilities, and necessary, compatible public facilities including water management facilities. Existing permitted uses, including seasonal agricultural uses, may be continued. Within the Northwest Wellfield Protection area, uses will be closely regulated to ensure the protection of water quality.

**Environmental Protection Subarea C (Canal-111 Wetlands).** This subarea contains portions of the East Everglades. The subarea is bounded on the west and south by Everglades National Park, on the east generally by Levee 31N, Canal 111 and US Highway 1, and on the north by Open Land Subarea 4 (See Figure 7). The area is traversed by Canal-111 and is the subject of ecosystem restoration projects including a Comprehensive Everglades Restoration Plan project seeking to remedy degraded hydrological and biotic conditions in this portion of the Everglades. Most of this area is under the ownership of the South Florida Water Management District and most of the remainder is proposed for acquisition by the State of Florida. The lands that are not yet slated for public acquisition should be studied to determine whether public acquisition would be mutually beneficial to public and private interests in the area. These areas are predominately wetlands and subject to case-by-case evaluation of use or site-alteration proposals by federal, State, regional and County agencies. Moreover, most of this land is also included in the area

governed by the East Everglades Resource Management program (Chapter 33-B, Code of Miami-Dade County).

Land uses that may be considered for approval on land governed by the referenced East Everglades Resource Management Program include rural residences at a maximum density of one dwelling unit per 40 acres, or one dwelling unit per parcel fronting US Highway 1 in accordance with provisions of the referenced East Everglades program. Rural residences at a maximum density of up to one dwelling unit per five acres may be considered for approval on those parcels not governed by the East Everglades regulation. Approval of any use and its access should be conditioned on its demonstrated consistency with the adopted goals, objectives and policies of the CDMP, and conformity with all prevailing environmental regulations and compatibility with objectives of the Comprehensive Everglades Restoration Plan. Existing uses may continue, but no improvements or expansions involving further filling or drainage of wetlands should be permitted. It is further provided that, in the area that is generally bounded on the north by SW 168 Street; on the east by Levee 31N and Canal 111; on the south by the Southern Glades and Everglades National Park; and on the west by Everglades National Park, which was redesignated to Environmental Protection in the May 2019 CDMP Amendment Cycle (Application No. 4), existing agricultural uses may be reestablished even if discontinued provided the use is consistent with land stewardship goals contained in the management plan for the area and there is no further filling or drainage of wetlands.

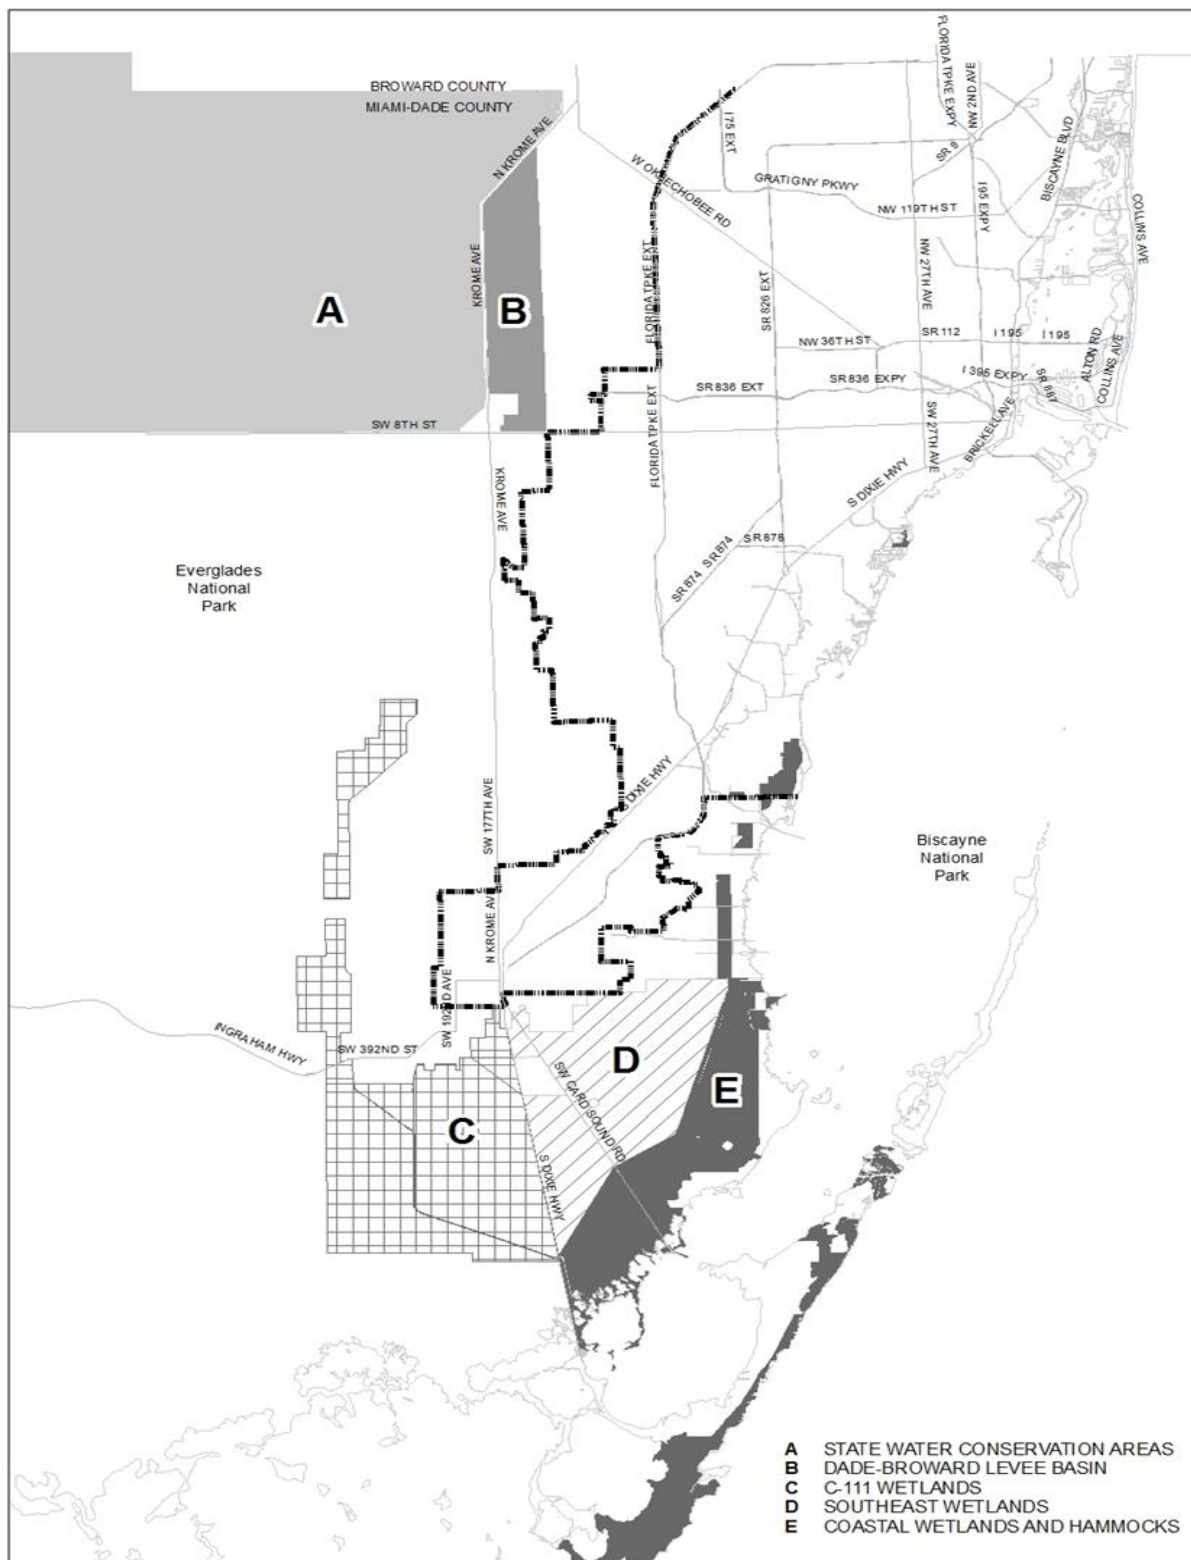

**Environmental Protection Subarea D (Southeast Wetlands).** This Environmental Protection subarea is bounded on the west by US Highway 1 on the north by Open Land Subarea 5, on the east by Levee 31E and on the south by a hypothetical line extending between the point at which Card Sound Road meets Levee 31E, and the intersection of US Highway 1 and Canal-111. The area is low lying, poorly drained, flood prone, and is characterized predominantly by high-quality wetland communities. Accordingly, any land use or site alteration proposal will be carefully evaluated on a case-by-case basis by federal, State, regional, and County agencies for conformity with all prevailing environmental regulations and compatibility with objectives of the Comprehensive Everglades Restoration Plan.

Because of the importance of maintaining the biotic and hydrologic functions provided by this area, the southeast wetlands should be studied to determine whether public acquisition would be mutually beneficial to public and private interests in the area. Uses which could be considered for approval include rural residential use at a maximum density of one dwelling unit per five acres or communications, utility or recreation facilities with limited ground coverage. Approval of any use and its access roads or easements should be conditioned on its demonstrated consistency with the adopted goals, objectives and policies of this plan, and conformity with all prevailing environmental regulations.

**Environmental Protection Subarea E (Coastal Wetlands and Hammocks).** This subarea includes all coastal wetlands designated as Environmental Protection Area on the LUP map, which are not within the authorized boundaries of Biscayne or Everglades National Parks. These areas are low-lying, flood prone and characterized predominantly by coastal wetland communities. Accordingly, all land use or site alteration proposals will be carefully evaluated on a case-by-case basis by federal, State, regional, and County agencies.

Because of the importance of maintaining biologic and hydrologic functions provided by these areas, the coastal wetlands should be managed toward these ends and acquired whenever possible. However, until these lands are acquired for natural resource management uses which could be considered for approval include residential use at a density not to exceed one dwelling

unit per five acres, water-dependent uses, or necessary compatible public, water related facilities consistent with the Conservation, Aquifer Recharge and Drainage Element and the Coastal Management Element of this Plan. In addition, necessary electrical generation and transmission facilities are also permitted in this area. The approval of any new use, and the replacement or expansion of any existing use will be conditioned upon its demonstrated consistency with the adopted goals, objectives and policies of this plan, conformity with all prevailing environmental regulations and compatibility with objectives of the Comprehensive Everglades Restoration Plan.

AND ECONOMIC RESOURCES**

## Concepts and Limitations of the Land Use Plan Map

The Land Use Plan map of the Comprehensive Development Master Plan provides the general land use framework indicating how, where and the extent to which land may be used between now and the year 2030. It also indicates locations where urban expansion may be warranted between the years 2030 and 2040.

The LUP map is based on many considerations including existing development patterns, zoning, provision of public services and infrastructure, characteristics of both the man-made and natural environment, suitability of areas for developments, growth projections, programmed infrastructure and service improvements, as well as the goals, objectives and policies of the Plan Elements.

**Concepts.** Among the long-standing concepts embodied in Miami-Dade County's CDMP are the following:

1. Control the extent and phasing of urban development in order to coordinate development with the programmed provision of public services.
2. Preserve and conserve land with valuable environmental characteristics, recreation uses or scenic appeal.
3. Encourage development in areas most suitable due to soil conditions, water table level, vegetation type and degree of flood hazard. Restrict development in particularly sensitive and unique natural areas.
4. Maximize public ownership of beaches and shorelines within the Coastal Area to insure their preservation, conservation or public use.
5. Minimize consumption of energy for transportation purposes and the amount of air pollution from transportation sources by encouraging a more compact urban form.
6. Shape the pattern of urban development to maximize the efficiency of existing public facilities and support the introduction of new public facilities or services such as improved mass transit systems.
7. Preserve sound and stable residential neighborhoods.
8. Rejuvenate decayed areas by promoting redevelopment, rehabilitation, infilling and the development of activity centers containing a mixture of land uses.
9. Promote development of concentrated activity centers of different sizes and character to provide economies of scale and efficiencies of transportation and other services for both the public and private sectors.
10. Redirect higher density development towards activity centers or areas of high countywide accessibility.
11. Allocate suitable and sufficient sites for industrial and business districts to accommodate future employment needs.
12. Prohibit new residential development and other noise sensitive activities from locations near airport noise impact zones.
13. Avoid excessive scattering of industrial or commercial employment locations.
14. Encourage agriculture as a viable economic use of suitable lands.

**Population Distribution.** The concepts above have been considered not only as a basis for delineating areawide patterns of development, but also to develop a time-phased distribution of population within Miami-Dade County. Accordingly, the projected distribution of population for the years 2030 and 2040 (Figure 8) reflects the following factors:

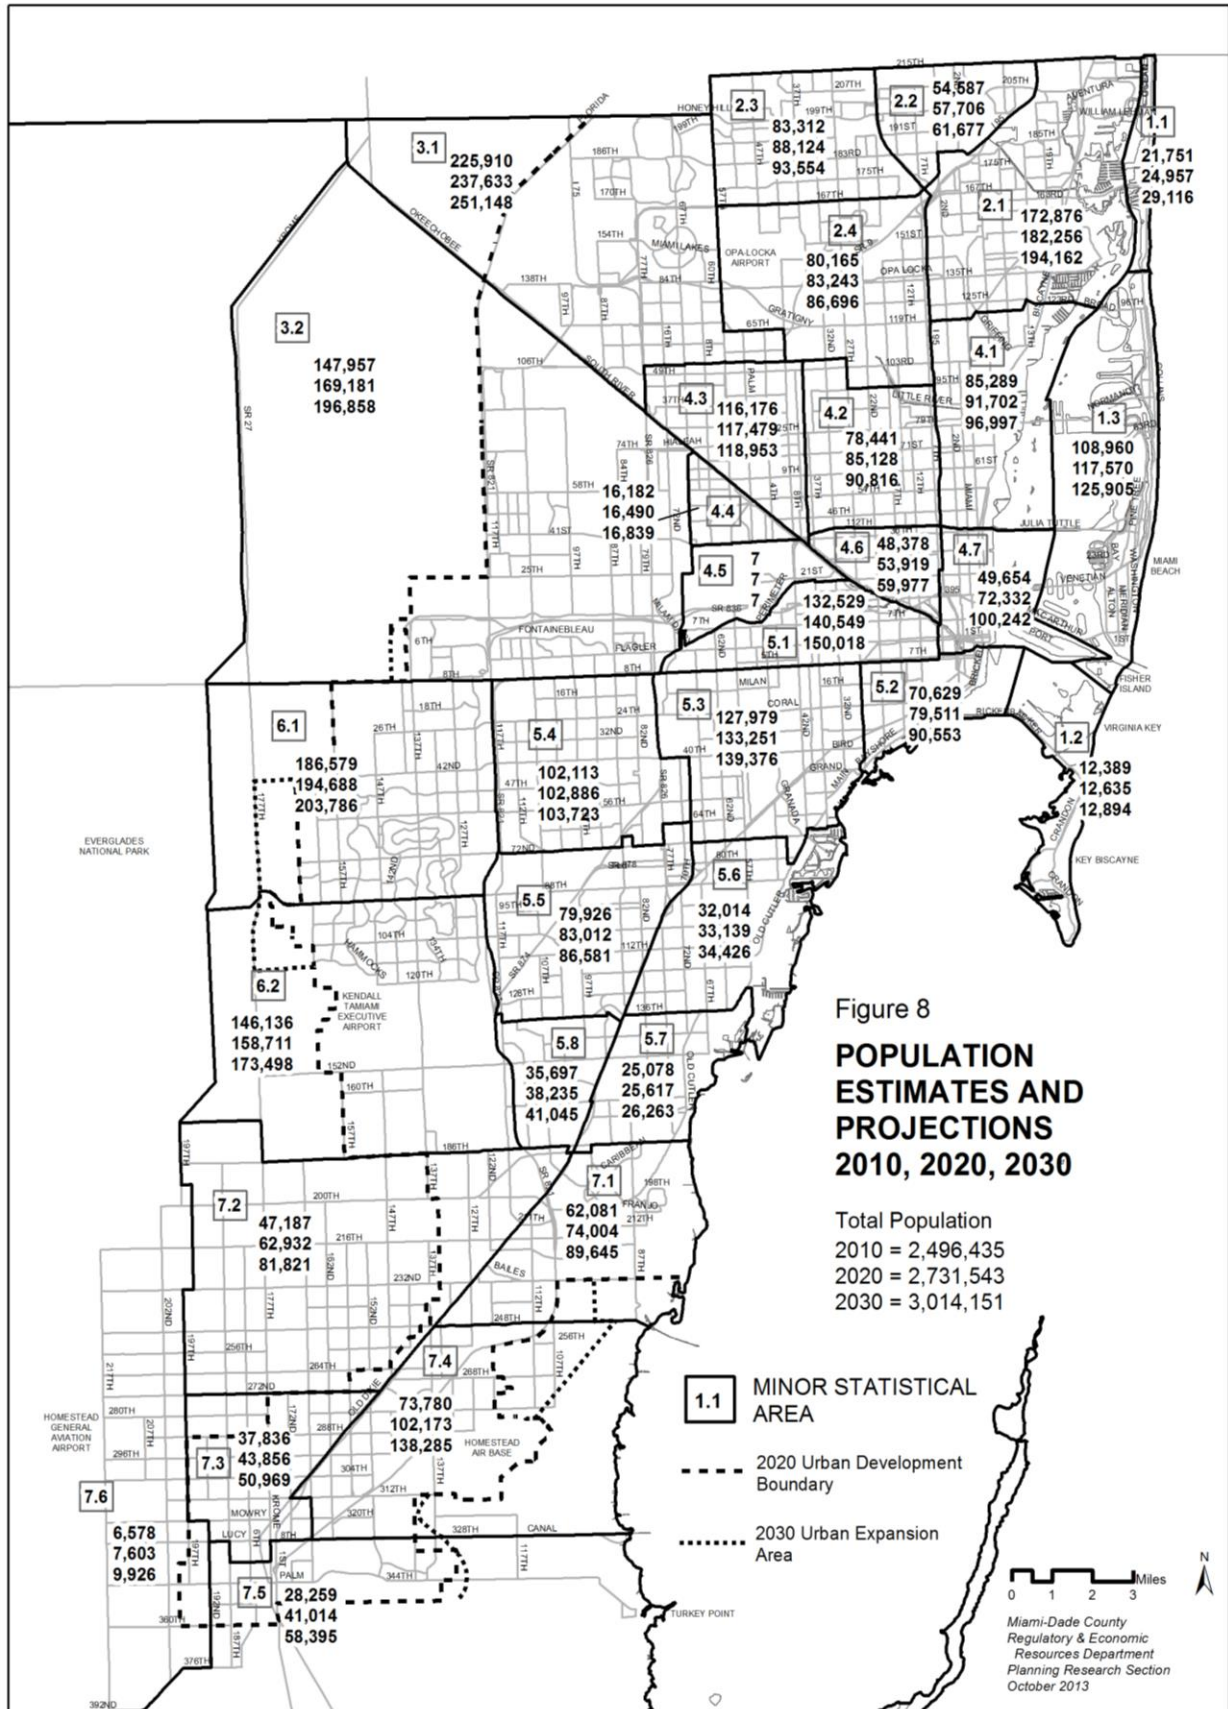

- Existing conditions (land uses; densities; distribution of vacant land suitable or available for residential, commercial, or industrial development; approved projects and existing zoning);
- Emerging demographic and economic trends (housing markets, household sizes, limited redevelopment potential, and mobility patterns);
- Planning studies (municipal master plans, area studies and other special studies such as rapid transit station area plans); and
- Existing, programmed and planned public improvements (roads, sewers, water, fire protection, parks and schools).

The subarea populations shown on the Population Estimates and Projections map are those for which Miami-Dade County will strive to provide urban services. These numbers will be used by public agencies to plan for the range of public facilities and services including roads, parks, schools and sewers. The numbers reflect a middle course of action between planning for the minimum projected growth and planning for the maximum population projection.

**Coordinated-Managed Growth.** The Land Use Plan map, the Population Estimates and Projections map and this interpretive text all help translate the goals, objectives and policies of the Comprehensive Development Master Plan into a more specific course of action. They are intended to be used in directing public and private developmental activities. Actions that must be consistent with these maps and related text include functional service plans and amendments, capital improvements programs, public facilities site approvals, subdivision plat and zoning actions, and federal grant application reviews. Before any decision is made in connection with any of these or other developmental processes, a determination will be made as to the consistency of the proposed developmental action with the goals, objectives and policies of the CDMP, including the Land Use Plan map, the Estimated Population Distribution map, and this text. Proposed developmental actions and orders should be evaluated to determine the extent to which they are consistent with these Plan components, which embody the essence of the County's development policy. Vested rights and legal non-conformity shall be given consideration in all determinations of developmental action or order approval. Developmental actions or orders that preceded the official adoption of this Plan shall not be deemed inconsistent with the Plan until so determined through one of the several developmental decision processes.

Critical in achieving the desired pattern of development is the adherence to the 2030 Urban Development Boundary (UDB) and 2040 Urban Expansion Area (UEA) Boundary. Given the fundamental influences of infrastructure and service availability on land markets and development activities, the CDMP has since its inception provided that the UDB serve as an envelope within which public expenditures for urban infrastructure will be confined. In this regard the UDB serves as an urban services boundary in addition to a land use boundary.

Consistency with the CDMP will ensure that the actions of one single-purpose agency does not foster development that could cause other agencies to subsequently respond in kind and provide facilities in unanticipated locations. Such uncoordinated single-purpose decision making can be fiscally damaging to government and can undermine other comprehensive plan objectives.

**Plan Amendments.** It is recognized that the development capacity of the area within the UDB and UEA will vary with time. Part of the supply will be utilized and additional supply will be added from time-to-time through the approval of Plan amendments. Some land will be built upon at densities, which are higher than permitted by existing zoning because rezonings will occur in the future, and some development will occur at densities lower than that permitted by zoning. Moreover, impediments can arise to the maximum utilization of all lands within the boundaries. In some urbanized areas, it may be difficult to acquire sufficiently large parcels of land. In other areas, neighborhood opposition to proposed developments could alter the assumed density or character of a particular area. Because the development capacity of the LUP map fluctuates with time, it will be reevaluated on a periodic basis as part of the Plan review and amendment process.

**Limitations.** The Comprehensive Plan, as used in large metropolitan areas, establishes broad parameters within which the various levels of government can conduct detailed land use planning and zoning activities, and functional planning and programming of urban infrastructure and services. It also serves the full range of other governmental planning and programming activities which required information about the location and extent of future population growth and land use. Among the primary purposes for adopting the long-range Land Use Plan map are to establish continuity and certainty as bases for individual, small-scale land use decisions in both the public and private sectors, and to enable coordinated, timely, cost-effective expansion, maintenance and utilization of the full range of urban facilities and services. The existence of an adopted comprehensive plan does not obviate the need to conduct detailed examinations of localized land use and service conditions. Nor does the Comprehensive Plan substitute for detailed functional plans for infrastructure such as roadways, water and sewer facilities.

Given the range and scope of the comprehensive plan elements as now required in Florida, the extent and complexity of development patterns in Miami-Dade County, the long-range time horizons of the plan and the legal status of the comprehensive plan, it is critical to maintain viable programs to augment the CDMP. The Land Use Plan map of the CDMP is a framework indicating the large-scale pattern of future land use in the metropolitan area. The land use pattern indicated on the Plan map is very detailed from a countywide perspective. However, the map does not specifically depict each and every individual occurrence of land use and zoning throughout the hundreds of neighborhoods, which comprise Miami-Dade County; each of the land use categories indicated on the LUP map contains dominant uses, ancillary uses and secondary uses.

The land use categories used on the LUP map are necessarily broad, and there are numerous instances where existing uses and parcels zoned for a particular use, are not specifically depicted on the Land Use Plan map. This is due largely to graphic limitations as the Adopted LUP map has a scale of one inch to one mile (1":1 mile) and is a generalized land use plan. Miami-Dade County encompasses more than 1,549,792 acres (2,420 square miles) of land and water, of which about 346,859 acres (541 square miles) were developed for urban or agricultural uses as of 2013. In addition, the mixing of uses in individual buildings, projects and neighborhoods is common in many parts of the urban area, and is becoming a more widely accepted land use practice when compatible uses are properly integrated through the use of sound land use, planning and design principles. Accordingly, a countywide land use plan map for an area the size of Miami-Dade County cannot readily depict specific land use, let alone parcel-specific density or intensity of use, without broadly defining the land use categories and areas. Generally, the smallest area distinguished on the LUP map is 5 acres (smaller existing use-areas are not specifically shown). Each of the land use categories utilized on the LUP map also provides for the inclusion of some other uses under certain conditions. As noted on the LUP map, the LUP map may be interpreted only as provided in the adopted plan text titled "Interpretation of the Land Use Plan Map: Policy of the Land Use Element".

**Other Land Uses Not Addressed.** Certain uses are not authorized under any LUP map category, including many of the uses listed as "unusual uses" in the zoning code. Uses not authorized in any LUP map category may be requested and approved in any LUP category that authorizes uses substantially similar to the requested use. Such approval may be granted only if the requested use is consistent with the objectives and policies of this Plan, and provided that the use would be compatible and would not have an unfavorable effect on the surrounding area: by causing an undue burden on transportation facilities including roadways and mass transit or other utilities and services including water, sewer, drainage, fire, rescue, police and schools; by providing inadequate off-street parking, service or loading areas; by maintaining operating hours, outdoor lighting or signage out of character with the neighborhood; by creating traffic, noise, odor, dust or glare out of character with the neighborhood; by posing a threat to the natural environment including air, water and living resources; or where the character of the buildings, including height, bulk, scale, floor area ratio or design would detrimentally impact the surrounding area. However, this provision does not authorize such uses in Environmental Protection Areas designated in this Element.

**Uses and Zoning Not Specifically Depicted on the LUP Map.** Within each map category numerous land uses, zoning classifications and housing types may occur. Many existing uses and zoning classifications are not specifically depicted on the Plan map. This is due largely to the scale and appropriate specificity of the countywide LUP map, graphic limitations, and provisions for a variety of uses to occur in each LUP map category. In general, 5 acres is the smallest site depicted on the LUP map, and smaller existing sites are not shown. All existing lawful uses and zoning are deemed to be consistent with this Plan unless such a use or zoning (a) is found through a subsequent planning study, as provided in Policy LU-4E, to be inconsistent with the criteria set forth below; and (b) the implementation of such a finding will not result in a temporary or permanent taking or in the abrogation of vested rights as determined by the Code of Miami-Dade County, Florida. The criteria for determining that an existing use or zoning is inconsistent with the plan are as follows: 1) Such use or zoning does not conform with the conditions, criteria or standards for approval of such a use or zoning in the applicable LUP map category; and 2) The use or zoning is or would be incompatible or has, or would have, an unfavorable effect on the surrounding area: by causing an undue burden on transportation facilities including roadways and mass transit or other utilities and services including water, sewer, drainage, fire, rescue, police and schools; by providing inadequate off-street parking, service or loading areas; by maintaining operating hours, outdoor lighting or signage out of character with the neighborhood; by creating traffic, noise, odor, dust or glare out of character with the neighborhood; by posing a threat to the natural environment including air, water and living resources; or where the character of the buildings, including height, bulk, scale, floor area ratio or design would detrimentally impact the surrounding area. Also deemed to be consistent with this Plan are uses and zoning which have been approved by a final judicial decree, which has declared this Plan to be invalid or unconstitutional as applied to a specific piece of property. The presence of an existing use or zoning will not prevent the County from initiating action to change zoning in furtherance of the Plan map, objectives or policies where the foregoing criteria are met. The limitations outlined in this paragraph pertain to existing zoning and uses. All approval of new land uses must be consistent with the LUP map and the specific land use provisions of the various LUP map categories, and the objectives and policies of this Plan. However, changes may be approved to lawful uses and zoning not depicted which would make the use or zoning substantially more consistent with the Plan, and in particular the Land Use Element, than the existing use or zoning.

**Wellfield Areas.** Miami-Dade County's sole source of drinking water is the Biscayne Aquifer, which is discussed in the Conservation, Aquifer Recharge and Drainage Element of the Plan. Many characteristics of the Aquifer make it highly vulnerable to contamination from activities on

the land surface. Land uses and activities near and upgradient from wellfields directly impact the quality of water ultimately withdrawn from the wells.

Numerous public water supply wellfields exist throughout Miami-Dade County, and new ones will be constructed in the future. Only the largest existing wellfields are depicted on the Land Use Plan map. However, the County restricts land use within portions of cones of influence of all public water supply wellfields to minimize the threat of water pollution. Moreover, newly constructed and future regional wellfields warrant greater and more extensive protection for two reasons. First, the opportunity still exists to maintain pristine water quality around the new and future wellfields because the land within the full extent of their cones of influence is largely undeveloped. Secondly, if these become contaminated there are no alternative sites for the construction of comparable high-capacity wellfields.

In order that the new and future regional water supply wellfields constructed in predominantly undeveloped areas will remain free from contamination, land use and development within and upgradient from the full extent of their cones of influence must be carefully controlled to limit land uses to those which will pose no threat to water quality. County regulations governing land use and development within the full extent of the cones of influence are necessary to provide desirable levels of protection to new and future wellfields. Future wellfields and their protection areas are identified on Figure 10 in the following section of this Element. The protection area boundaries identified in this Plan will be periodically reviewed and revised, when appropriate, to maintain consistency with the wellfield protection area boundaries established pursuant to Chapter 24 of the Miami-Dade County Code. The County's wellfield protection regulations and protection area boundary maps must be consulted when applying or interpreting the Land Use Plan map as it relates to wellfield protection areas.

**Wetland Areas.** As discussed throughout the CDMP, extensive areas of Miami-Dade County are wetlands whose development is regulated pursuant to federal, State, and County environmental laws. Most of these areas are intentionally left outside the planned Urban Development Boundary (UDB). However, there are some exceptions. Whether or not included inside the UDB, all wetlands shall continue to be governed by applicable environmental laws. Moreover, where wetland basin plans were adopted pursuant to policies of the CDMP, all development shall conform with provisions of the adopted basin plan applicable to the area, as well as other applicable laws and regulations.

**Ultimate Development Area.** The 2030 and 2040 Land Use Plan map identifies the areas that will be urbanized within those time frames. As indicated throughout this Plan, these are the areas of the County where resources should be directed for the construction and maintenance of urban infrastructure and provision of services. Growth of Miami-Dade County, however, is not projected to cease after the year 2040. Therefore, prudent long-term planning for infrastructure may need to anticipate locations for possible future extension. For example, it may be desirable to reserve rights-of-way in certain growth corridors as well as on section, half-section, and quarter-section lines, well in advance of need so that opportunities to eventually provide necessary roadways are not irrevocably lost.

It is difficult to specify where and how much of Miami-Dade County's total area may ultimately be converted to urban development. This is due to uncertainty regarding long-term rates of population and economic growth; housing and community preferences; availability and price of energy, water, agricultural and mineral resources; and State, federal and international influences. It is reasonably safe to assume, however, that the areas least suitable for urban development today will remain least suitable in the future. These areas include the remaining high-quality

coastal and Everglades wetland areas in the County, the coastal high hazard areas, and the Northwest Wellfield protection area. When the need for additional urban expansion is demonstrated, such expansion should be carefully managed to minimize the loss of agricultural land and to maximize the economic life of that valuable industry.

Development-inducing infrastructure shall not be built by the year 2030 in areas designated Agriculture or Open Land. The Urban Expansion Area is projected for development beyond the year 2030 contingent upon those areas being brought into the UDB by plan amendment; therefore, facilities may be planned for provision to those areas during the long term.

Reservation of corridors and right-of-way outside of the 2030 UDB and 2040 UEA is not precluded by the adoption of this Plan. This may be necessary to ensure that a strategic grid pattern and supplemental corridors are available for future highway, transit or other infrastructure. However, the planning, design, programming and financing of infrastructure shall be focused on the area within the UDB and UEA. Until the needs of these areas have been satisfactorily met, financial resources shall not be diverted to non-urban areas. Moreover, Environmental Protection areas designated by this plan shall be specifically avoided in all planning and design of development-inducing infrastructure and services.

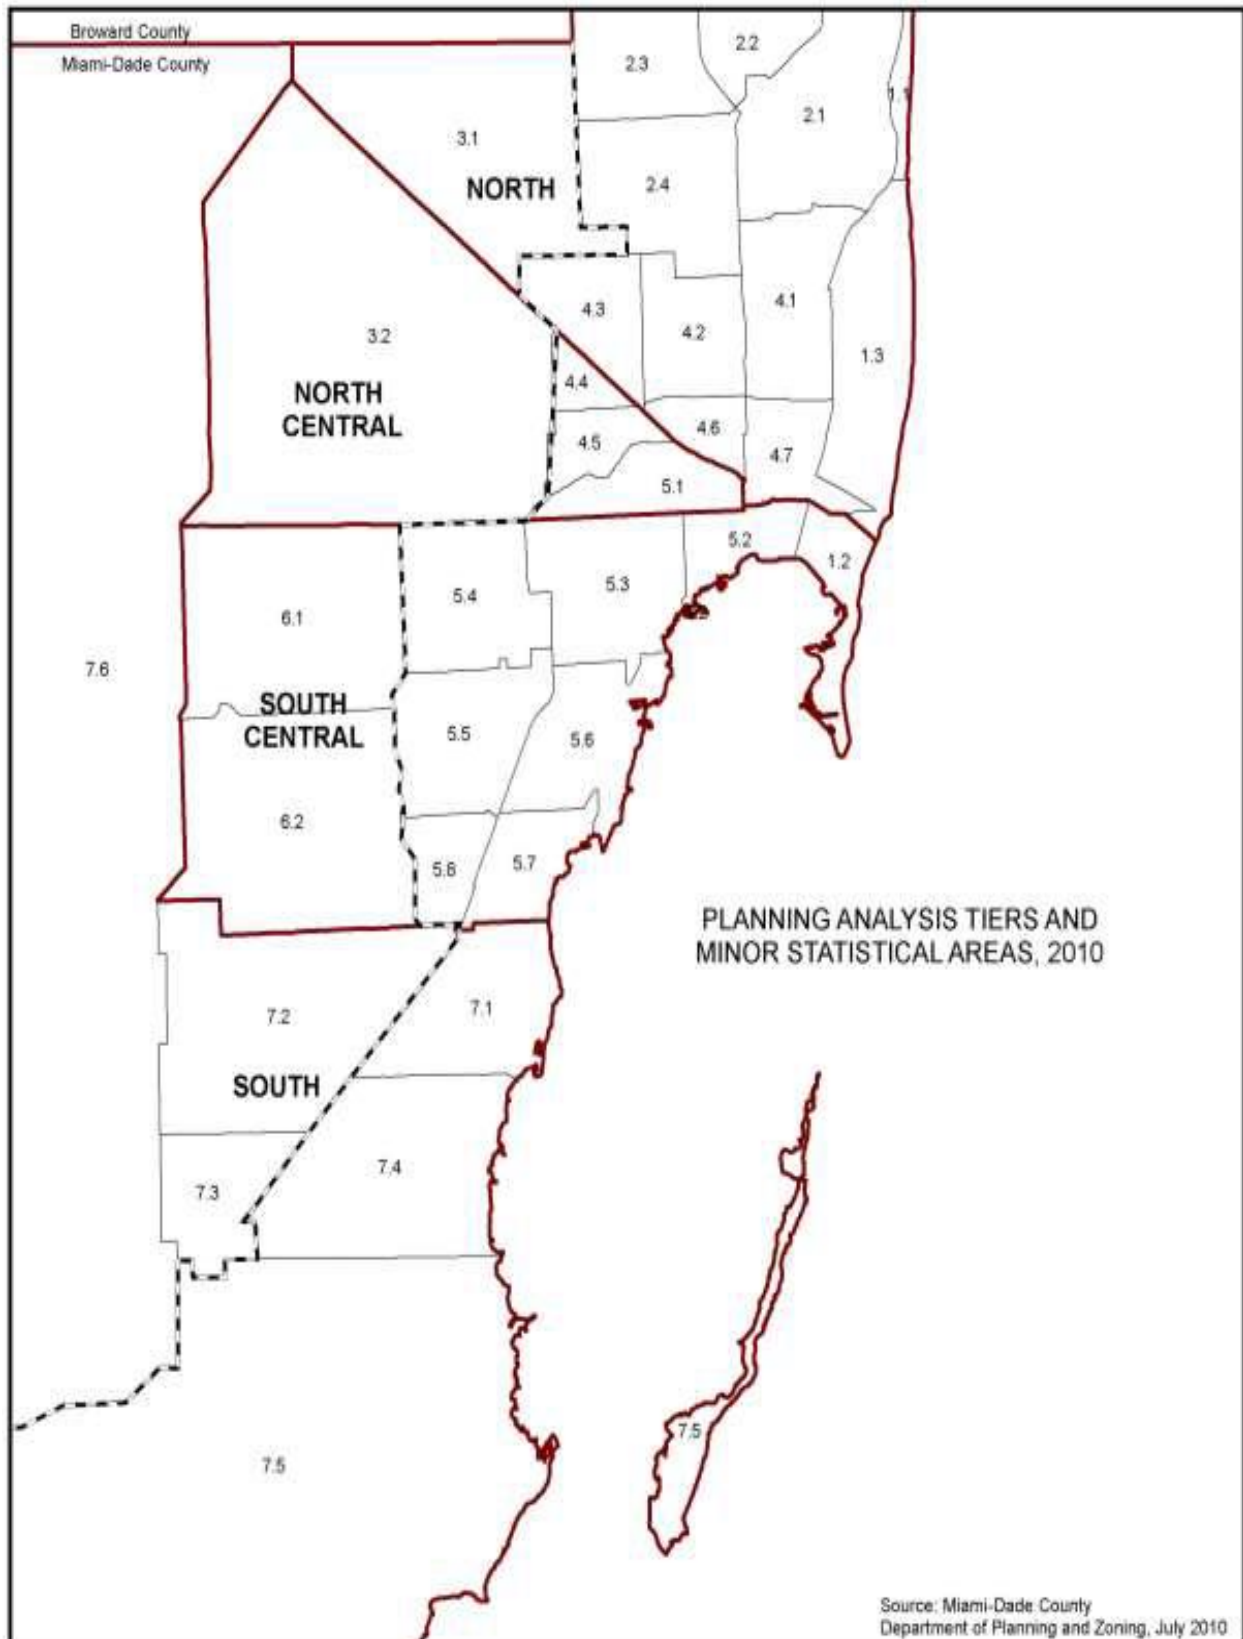

Figure 8.1  
**Planning Analysis Tiers**

## **Future Historic and Natural Resources**

In addition to the presentation of future land use expressed on the Land Use Plan (LUP) map for 2030 and 2040 and described in the previous text, certain future historical and environmental resources are also identified herein. Rather than attempt to map these features on the Land Use Plan map, they are presented separately to preserve the legibility of the LUP map. Included with these maps is a brief description of the resources. The reader is referred to the *Support Components* and Evaluation and Appraisal Report addressing this Element, and to the Conservation, Aquifer Recharge and Drainage, and Coastal Management Elements, for complete background information.

### **Future Historic Districts and Archaeological Zones**

Figure 9 shows the designated historic sites and districts, and the archaeological sites and zones, as recognized by the Miami-Dade Office of Historic and Archaeological Resources and designated by the Miami-Dade County Historic Preservation Board. Many of these sites and districts may also be eligible for listing in the National Register of Historic Places. This map only shows those sites that were designated by the County. It does not include those sites which may have been designated by local municipalities which have their own designation jurisdiction, including: the City of Miami, Miami Beach, Coral Gables, South Miami, Miami Shores, Homestead, Miami Springs, Sunny Isles Beach, Opa-Locka, and Hialeah. The remaining 24 municipalities in the County are under the Miami-Dade County historic preservation jurisdiction.

More information on recorded (previously known, but not necessarily designated) archaeological sites can also be found in the Florida Master Site File, maintained by the Division of Historical Resources, Florida Department of State. Permanent records and the background materials used to designate these sites are kept in the Miami-Dade County's Office of Historic and Archaeological Resources.

## Future Natural Resources

Map series Figures 10 through 17 identify certain future natural resources in Miami-Dade County. Background information on topography, soils, mineral resources, freshwater wetlands, lakes, floodplains, flood prone areas, public wellfields and cones of influence is found in the Conservation, Aquifer Recharge and Drainage Element. Additional information on public wellfields and activities permitted within cones of influence is presented in the Water, Sewer and Solid Waste Element. Background information on bays, estuaries, rivers, harbors, beaches and shores, coastal wetlands, and areas subject to coastal flooding is contained in the Coastal Management Element.

The *Land Use Element Support Components* report and Evaluation and Appraisal Report address existing topography, soils, wetland conditions and functions, historic resources in undeveloped areas of the County, and development in floodplains. The information that is summarized below, together with the extensive information contained in the Conservation, Aquifer Recharge and Drainage, and Coastal Management Elements, are reflected in the delineation of Future Open Land and Environmental Protection Sub-areas as shown on Figures 6 and 7.

**Future Waterwells and Cones of Influence.** The public water supply wellfields in Miami-Dade County that are expected to be operational in the year 2030 and their respective protection area boundaries are shown on Figure 10. The protection area boundaries identified herein will be periodically reviewed and revised, when appropriate, to maintain consistency with wellfield protection area boundaries established pursuant to Chapter 24 of the Miami-Dade County Code. Also included on this figure are the general locations of two future wellfield study areas. One future wellfield study area is located in south Miami-Dade County and the other is in northwest Miami-Dade. Miami-Dade County shall continue to maintain and enforce its wellfield protection regulations, which restrict the use, handling, storage, transport or disposal of hazardous materials; excavations; and non-residential uses served by septic tanks.

**Beaches, Shores, Estuaries, Rivers, Bays, Lakes and Harbors.** Figure 11 shows these natural features. The only lakes shown on this figure are the natural lakes that occur within Everglades National Park. Many of the former rock pits and lakes that have been dredged to provide fill during developments appear on the LUP map (or will appear on the color version printed after readoption of the Plan). Estuaries have not been mapped, per se, because their extent varies depending on the season and the amount of rainfall. In the very flat coastal glades in south Miami-Dade County, the freshwater/saltwater ecotone may migrate as much as a mile or more landward or bayward depending upon antecedent climatic conditions. Extensive background information on these resources is presented in the Coastal Management Element.

**Floodplains.** As shown on Figure 12, a very large percentage of the land within Miami-Dade County is considered to be a floodplain, or Special Flood Hazard Area (SFHA). An SFHA is defined as an area that will flood to varying depths during the 100-year flood, which is defined as an event that has a 1% chance to occur in any one year. Within the urban area, all of the former sloughs and transverse glades and the barrier islands are floodplains or SFHAs under this definition. For purposes of clarification, an additional map (Figure 13) is presented to show the areas that are subject to coastal flooding during hurricanes of varying intensity. Due to issues such as continued development and improvements to the water management system in the County, there have been changes to the floodplains and areas subject to coastal flooding. These changes are reflected in a flood insurance re-study and attendant revised Flood Insurance Rate Maps adopted by the Board of County Commissioners in July 2009 (Ordinance 09-66). Another factor is that, by the year 2030 the area subject to coastal flooding may increase if current

predictions about the rate of sea level rise prove to be true. Additional information on floodplains and drainage issues is presented in the Conservation, Aquifer Recharge and Drainage Element (Objective CON-5 and associated policies in particular) and the evaluation of the element contained in the adopted 2010 Evaluation and Appraisal Report. Development within floodplains shall be subject to flood criteria requirements of the Miami-Dade County Code and the Florida Building Code.

**Wetlands.** Figure 14 includes wetlands and Comprehensive Everglades Restoration Plan (CERP) Water Management Areas. These wetlands and water management areas serve to filter and purify surface and groundwater, provide habitat for wildlife, provide direct recharge of water to the Biscayne Aquifer (the County's source of drinking water), and provide natural flood protection. Extensive information on these systems is presented in the Conservation, Aquifer Recharge and Drainage Element, and the Coastal Management Element, and the Evaluation and Appraisal Reports addressing those elements. There are several factors that will determine the future of the wetland communities in Miami-Dade County. Among the most important will be the ability of Miami-Dade County and the South Florida Water Management District to maintain more natural water table levels or hydroperiods in these areas; the ability of the U.S. Army Corps of Engineers to recreate a more natural flow of water into the NE Shark River Slough, Everglades National Park and Biscayne National Park; the speed with which biological or other controls for the spread of invasive exotic plant species such as *Melaleuca* can be found, tested and implemented; and the commitment to wetland management and restoration efforts including the Comprehensive Everglades Restoration Plan. The current CERP plan represents the single greatest opportunity to dramatically improve the ecological health and function of the greater Everglades in south Florida. Wetland areas include lands that are publicly owned and managed as well as privately owned lands which possess wetland qualities and functions which could warrant protection as part of the ongoing ecosystem or water supply protection, restoration and management programs.

**Mineral Resources.** Most of Miami-Dade County is underlain by Miami limestone. The general extent of Miami Limestone and mineral extraction areas is shown on Figure 15. The Conservation Element presents the locations of existing rock quarries in Miami-Dade County. The "lake belt" region in northwestern Miami-Dade north of Tamiami Trail, west of the turnpike extension, including the NW Wellfield Area, is expected to continue to be the area of greatest mineral extraction activity in the County through the year 2030.

**Soils.** The soils that overlay the limestone in the County can generally be grouped into five broad categories: peats and mucks, marls, sands, rocky lands and man-made soils. These are shown on Figure 16. In general, the peats and mucks are unsuitable foundations for buildings or roadways and must be removed prior to development. Marls also frequently require special treatment prior to construction. This map presents a very generalized summary of soils in the County. Detailed soil surveys of Miami-Dade County produced by the Soil Conservation Service, U.S. Department of Agriculture, should be consulted for more specific information.

**Water Resource Summary.** Water resource characteristics and the County's subtle variations in topography are significant features which must be recognized in the formulation of land use, as well as water supply and management policies and plans, for Miami-Dade County. The water resource summary map presented at the conclusion of this section (Figure 17) is a composite of water resource features presented on previous maps in this series and discussed at length in the Conservation and Potable Water Element Support Documents and Evaluation and Appraisal Reports. The Major Canals presented are primary canals and levees of the South Florida Water Management District and significant secondary canals of the County. These serve both to

recharge the aquifer at the coast and at water supply wellfields, and to provide flood protection by draining surplus stormwater to tide. The Wellfield Protection Areas were described in a preceding paragraph. The Aquifer Recharge Areas depicted include the Everglades, Everglades buffer areas and other areas which are poorly drained by the canal system and which provide prolonged recharge of the Biscayne Aquifer after rainfall events.

The extent of saltwater intrusion into the Biscayne Aquifer is shown by a line near the coast as a reminder that it is essential to maintain water table elevations in the Biscayne Aquifer that are high enough to prevent further contamination by encroachment of denser saltwater. Adequate freshwater levels must be maintained both at the coast and inland to continually replenish freshwater which flows through the transmissive aquifer and canals to the coast. Excessive drainage of inland areas would jeopardize invaluable public and private water supplies, as well as regional ecological systems.

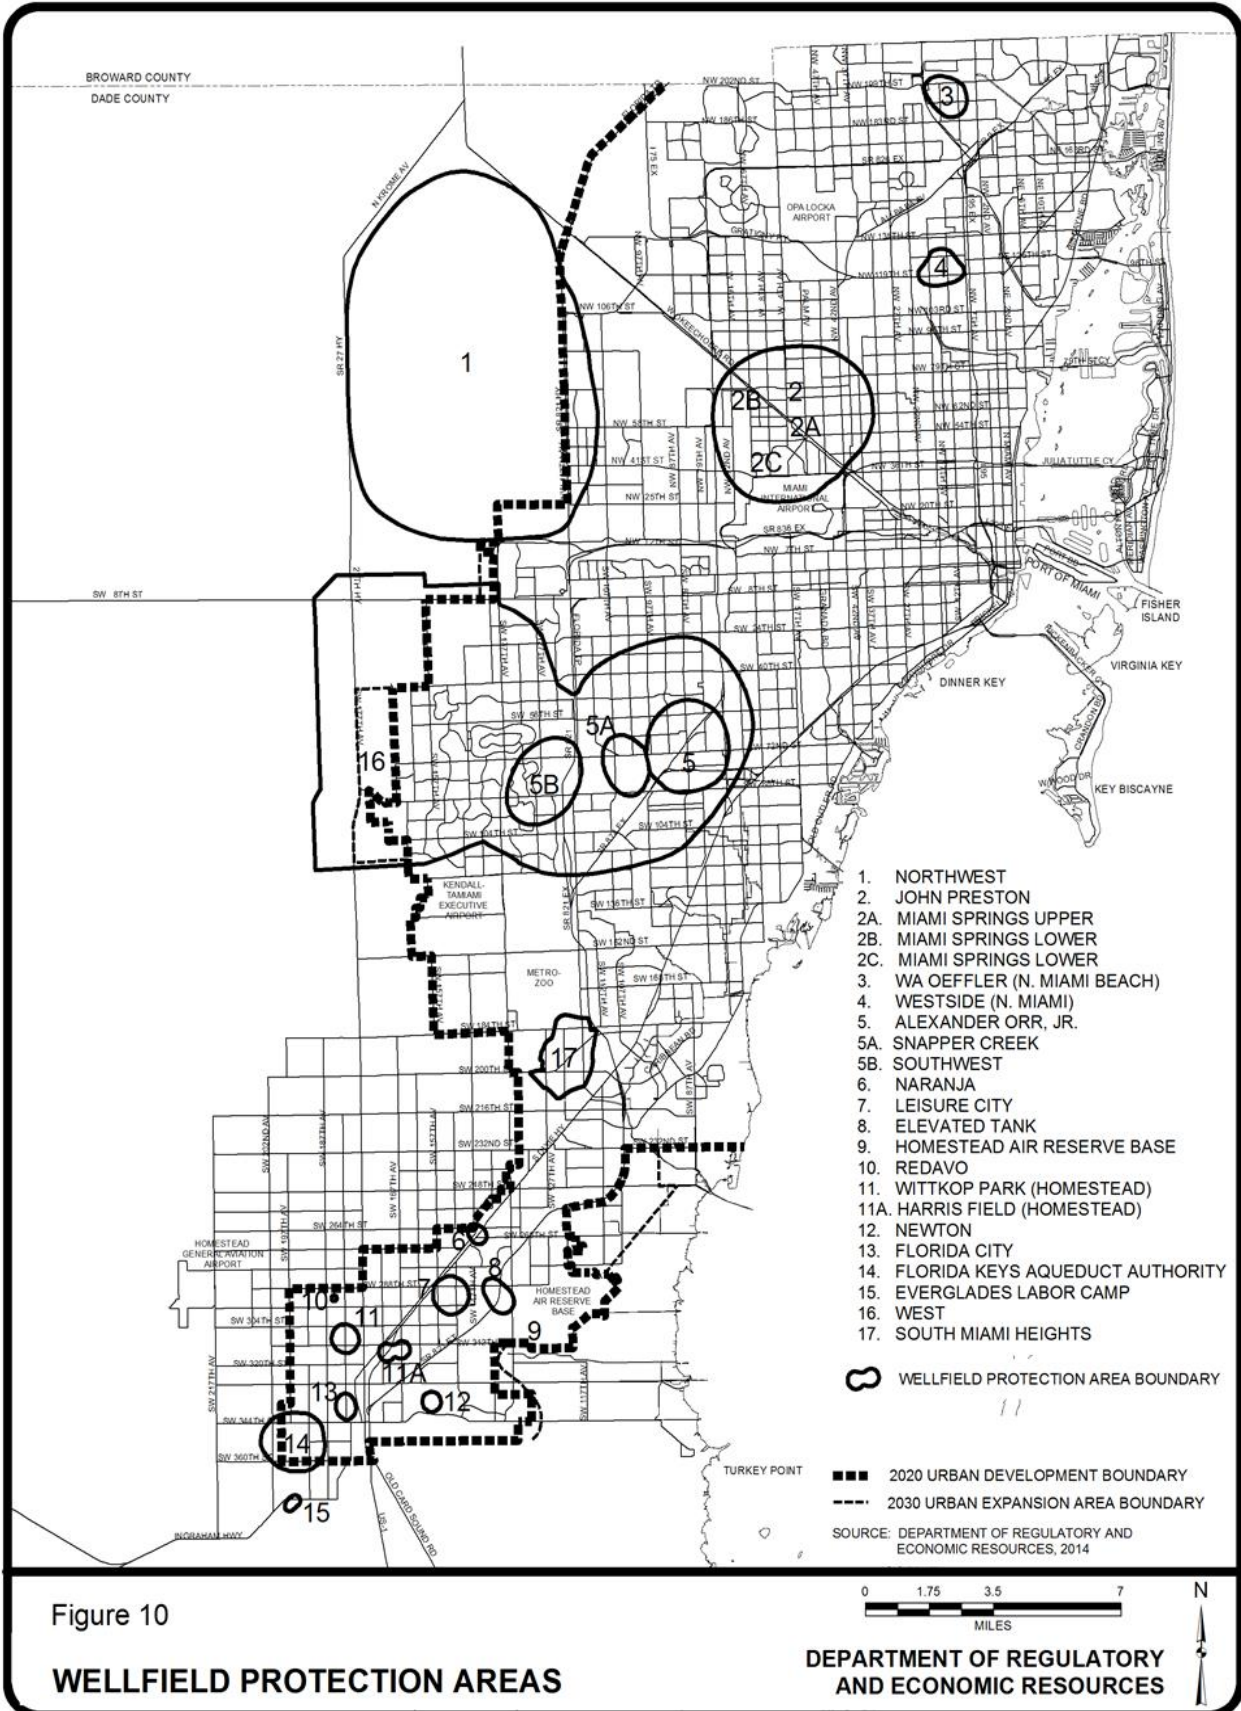

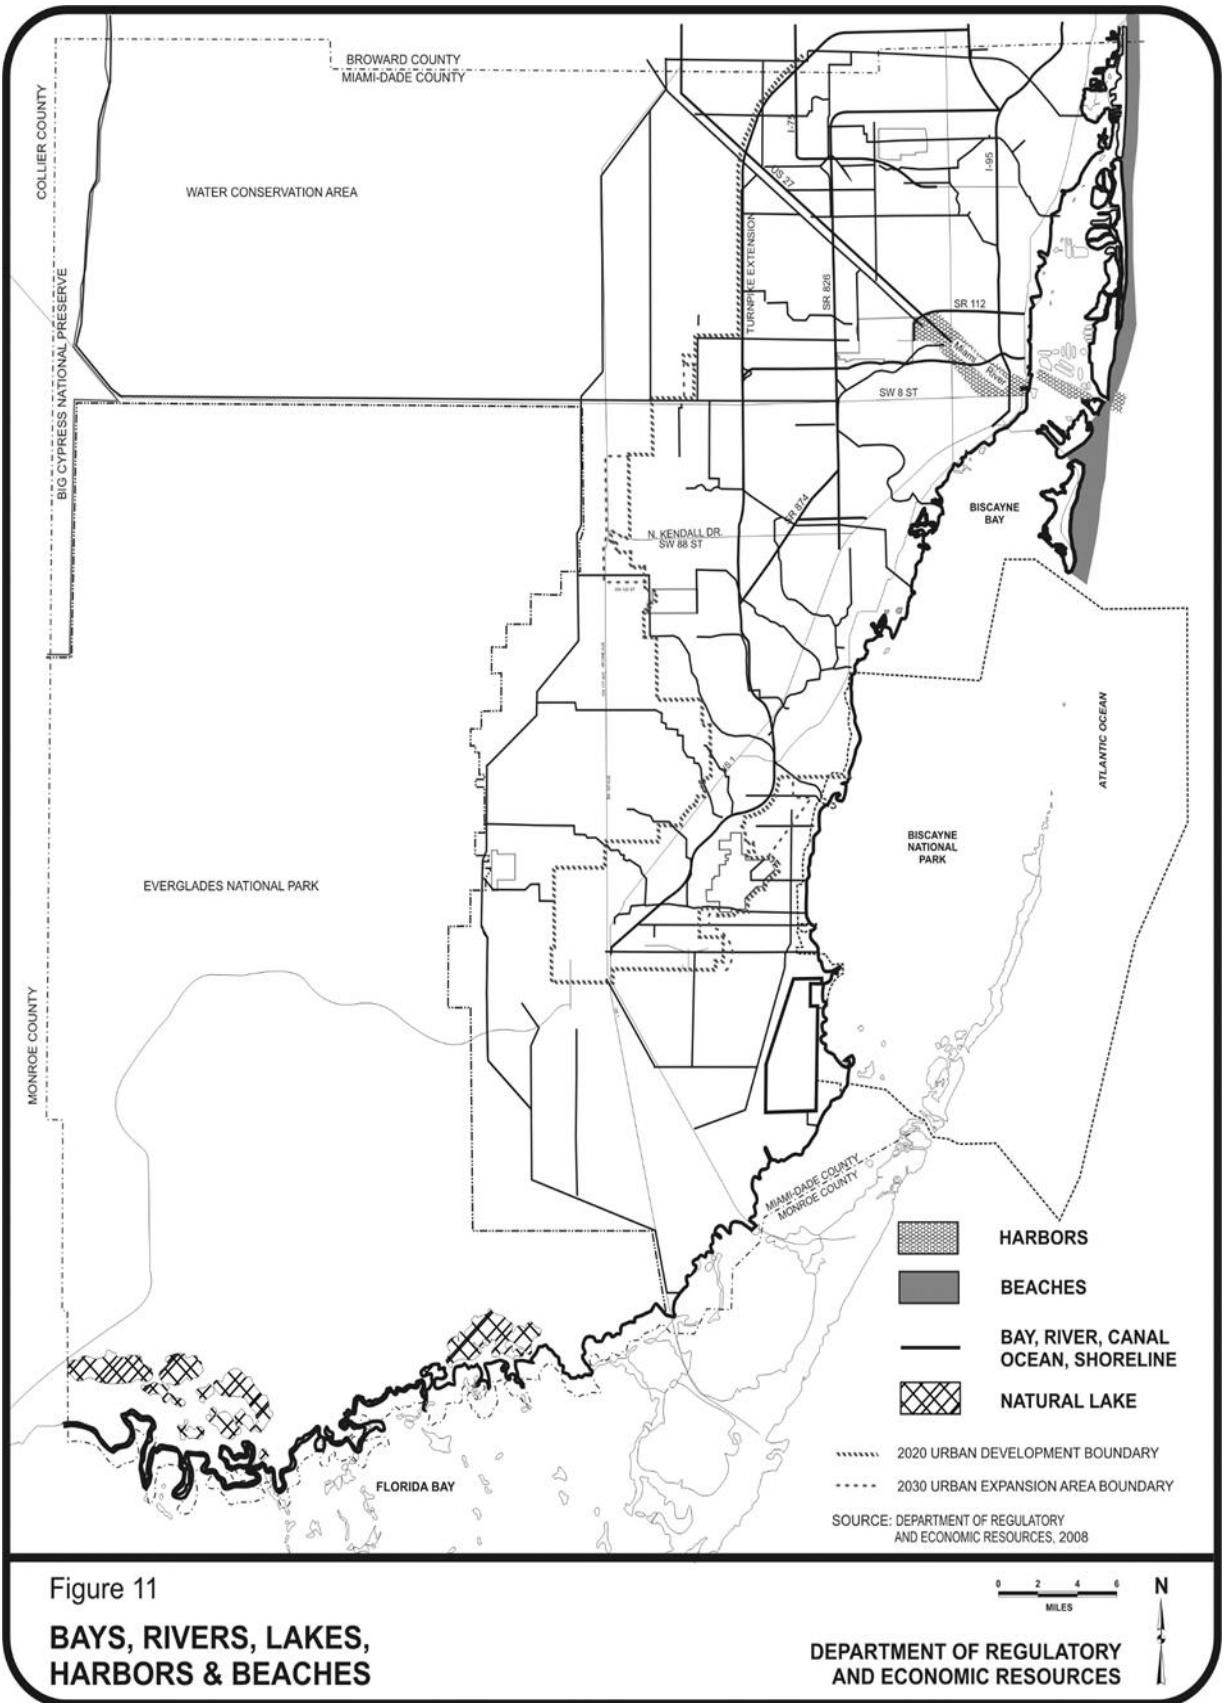

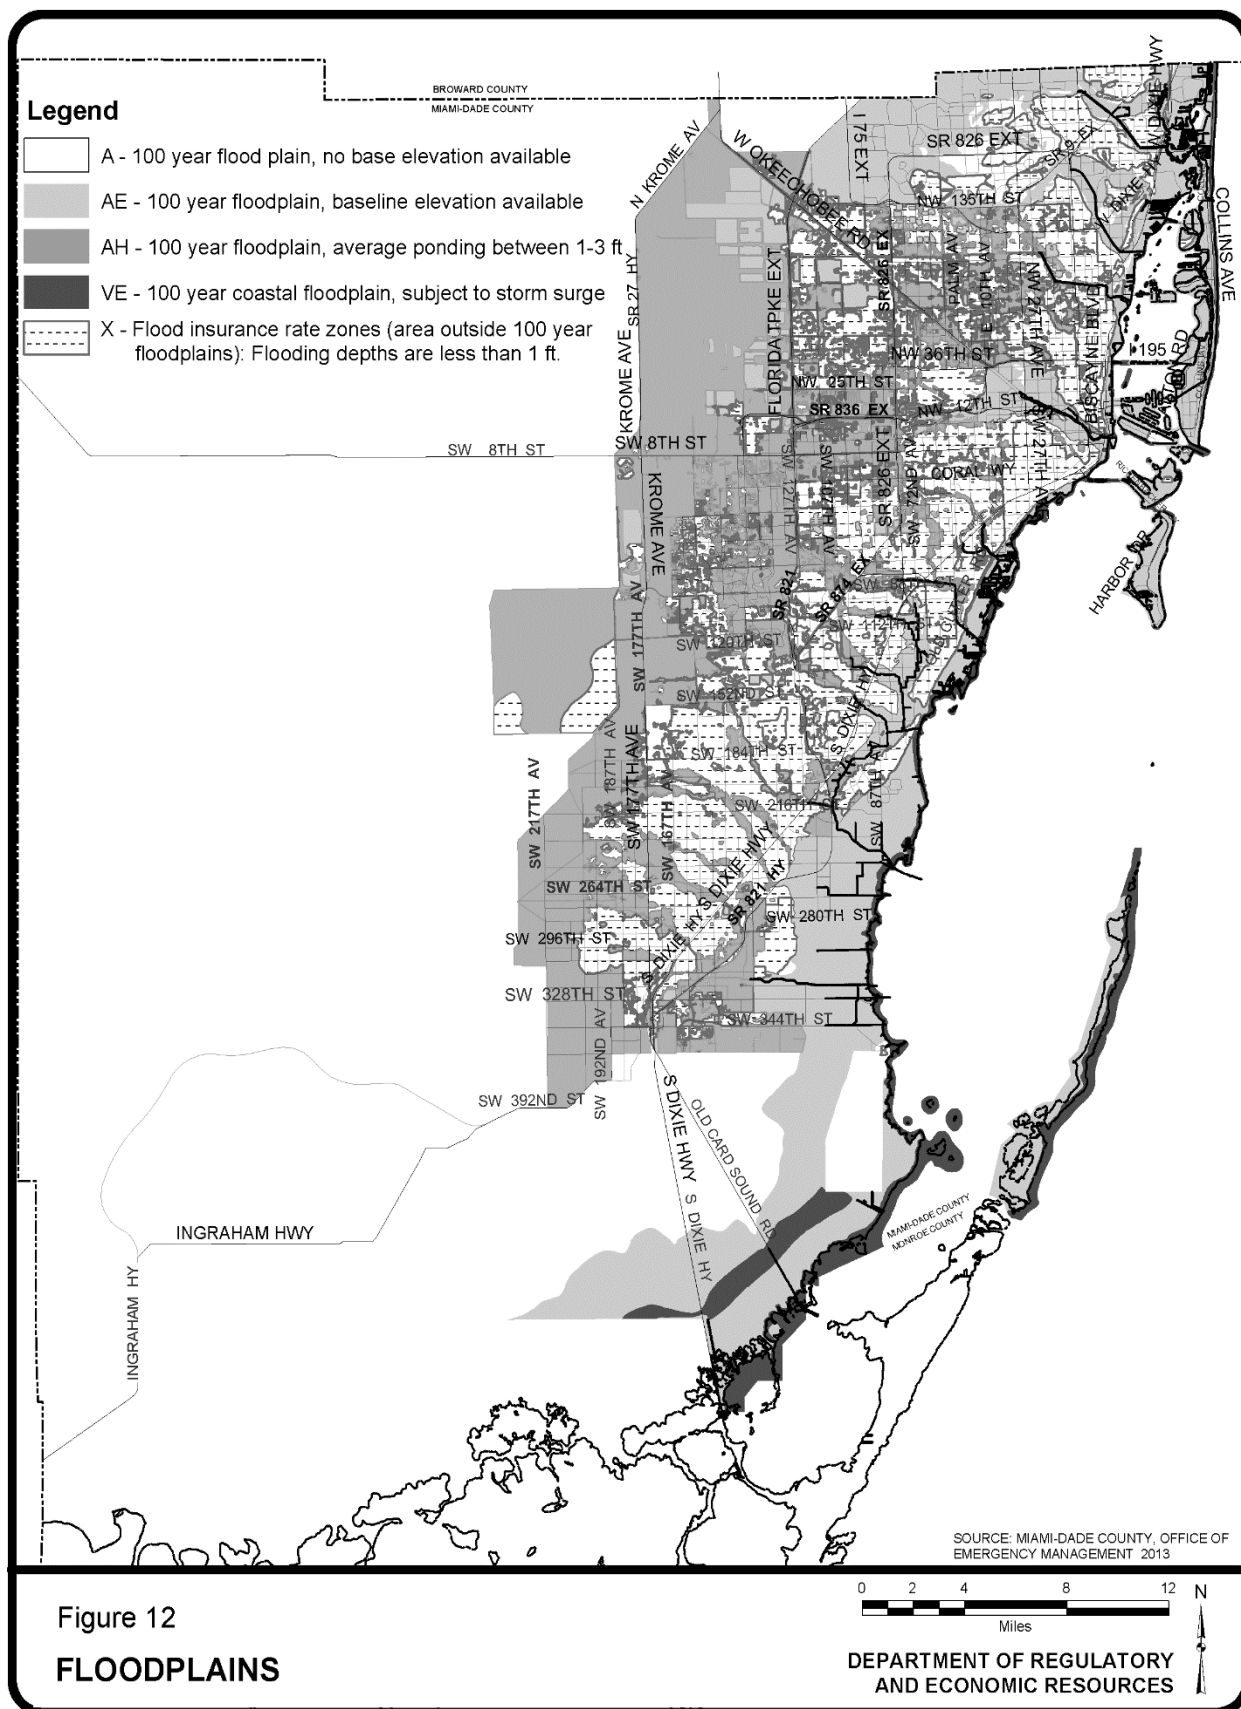

Figure 10

## WELLFIELD PROTECTION AREAS

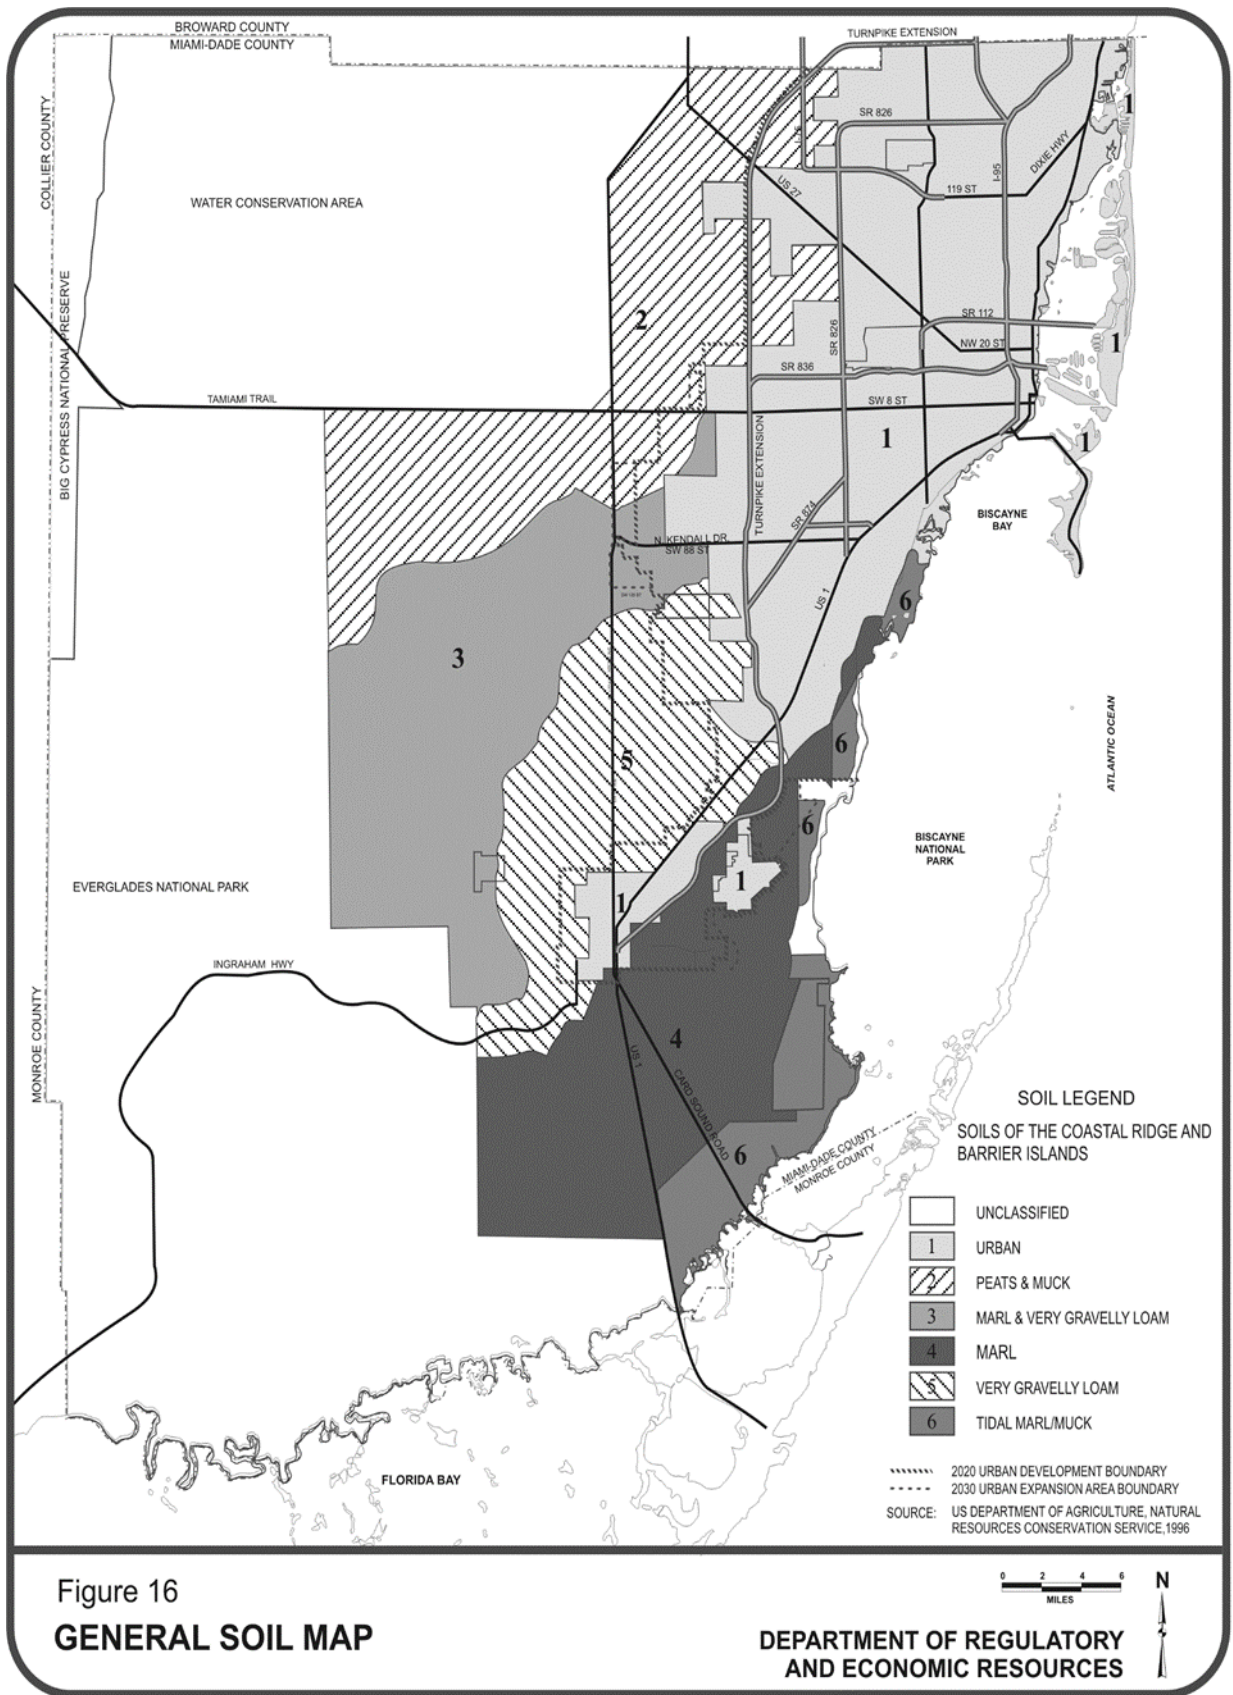

## **Land Use Monitoring Program and Evaluation and Appraisal Reporting Procedures**

In order to periodically conduct an evaluation and appraisal of the CDMP as required by Section 163.3191, *Florida Statutes* (F.S.) and to prepare periodic Evaluation and Appraisal Reports (EARs) as required by Section 2-116 of the Miami-Dade County Code, the CDMP contains adopted procedures for monitoring and evaluating the Plan and its implementation. In addition, successful implementation of level of service standards, and requirements that services be available at the time of development, also require the maintenance of monitoring and reporting programs.

This section outlines Miami-Dade County's monitoring program pertinent to the objectives, policies and parameters referenced in the Land Use Element. It should be understood that the County's programs will be refined over time as more experience is gained. They are not repeated in the other Elements to avoid redundancy. However, the reader is referred to the other Plan Elements for a presentation of the substantive monitoring requirements of those Elements.

The first section of this presentation relates directly to the Objectives of the Land Use Element. Here, "measures" are listed which will be monitored to enable determinations to be made regarding progress in achieving the Element's twelve Objectives. These "measures" are variables which are referenced directly in an Objective or one or more of the policies listed under the Objective, or which closely relate and are valid measurable indicators of progress toward the Objective. Other basic characteristics of the monitoring activity are also noted, such as the agencies involved and frequency of reporting

### **Measures to be Monitored**

#### **Objective LU-1.**

- A. Acreage added to the UDB and population density within the UDB of the LUP map since adoption of the last EAR. These measurements shall be made by the Department of Regulatory and Economic Resources immediately preceding preparation of the EAR.
- B. Residential dwelling units and non-residential square footage permitted, or for which certificates of occupancy (COs) have been issued (for new uses and rehabilitation) in Neighborhood Revitalization Strategy Areas (NRSA) and/or Community Development Block Grant (CDBG)-eligible census block groups within unincorporated Commission District Areas. This information will be compiled annually by the Department of Regulatory and Economic Resources from the computerized permitting file. The cumulative totals will be reported in the EAR.
- C. Numbers and dollar value of public facility improvements in the NRSA and/or CDBG-eligible census block groups. The Department of Regulatory and Economic Resources will acquire this information annually and shall report cumulative totals in the EAR.
- D. Development activities since adoption of the last EAR within urban centers and areas subject to zoning ordinances adopted under the County's area planning program and other new or revised ordinances and programs established to promote improved design of neighborhoods, developments and buildings in unincorporated Miami-Dade County. List the number of developments approved, which implemented urban design principles contained in the County's Urban Design Manual and/or the Guidelines for Urban Form.

- E. Total acreage of agricultural land and environmentally sensitive properties preserved, since adoption of the last EAR, as a result of Miami-Dade County Purchase of Development Rights (PDR) and Transfer of Development Rights (TDR) programs referenced in Policy LU-1R. This Information is to be acquired from the annual report provided by the Agriculture Manager pursuant to Resolution No. 1036-07.

### **Objective LU-2**

The extent of area experiencing conditions below minimum adopted LOS, at LOS, and substantially above minimum LOS will be monitored by the Department of Regulatory and Economic Resources and reported in the EAR for each service addressed in the CDMP.

### **Objective LU-3**

Approval of any of the following shall be logged by the Department of Regulatory and Economic Resources and reported in the EAR:

- A. Number of dwelling units and other structures approved which are inconsistent with Miami-Dade County's East Everglades Zoning Overlay regulation (Chapter 33-B, Code of Miami-Dade County);
- B. Any CDMP amendments that would increase the allowable number of dwelling units or nonresidential floor area in the environmentally sensitive areas such as wetlands, Natural Forest Communities and Environmentally Endangered Lands or other natural preserves; and
- C. Any permitted development or infrastructure improvement that increases capacity beyond what is needed to serve existing development on the barrier islands or the Coastal High Hazard Area in Miami-Dade County.

### **Objectives LU-4 and LU-5**

The number of rezoning applications filed by the Department of Regulatory and Economic Resources and approved by the Board of County Commissioners to bring preexisting zoning into closer uniformity with the LUP map shall be logged by the Department of Regulatory and Economic Resources and reported in the EAR.

### **Objective LU-6**

The number of new listings on the National Register, and the number of locally designated historic and archaeological sites, districts and zones shall be compiled by the Office of Historic and Archaeological Resources and shall be reported by the Department of Regulatory and Economic Resources in the EAR.

### **Objective LU-7**

The number of new development or redevelopment projects applied for and approved under a TOD plan, consistent with appropriate development standards as required in Objective LU-7 and associated policies, shall be documented and analyzed every 5 years. The monitoring shall include the ridership of the transit system in relation to the economy of the areas around the stations. The Department of Regulatory and Economic Resources shall conduct the analysis to the extent possible and report findings in the subsequent EAR.

### **Objective LU-8**

The supply and consumption rates of residential, commercial and industrial land shall be analyzed by the Department of Regulatory and Economic Resources for compliance with Objective LU-8 and findings will be reported in the subsequent EAR.

### **Objective LU-9**

The number of significant regulatory revisions made, consistent with CDMP, will be annually logged by the Department of Regulatory and Economic Resources and reported in the subsequent EAR.

### **Objective LU-10**

- A. A greenhouse gas community inventory will be conducted using a standard framework for accounting and reporting and will be reported in the EAR.
- B. Number of County-owned and privately-owned energy efficient or green buildings certified by Energy Star, Florida Green Building Coalition, US Green Building Council Leadership in Energy, Environmental Design (LEED) or other acceptable sustainability building standards reported by Department of Regulatory and Economic Resources.
- C. Number of large-scale facilities in Miami-Dade County tracking water and electricity consumption.
- D. Number of mixed-use projects approved by Miami-Dade County and in particular mixed use projects approved in Urban Centers or that are transit supportive projects. Total number of mixed use projects will be compiled annually by the Department of Regulatory and Economic Resources and reported in the subsequent EARs.
- E. Number of building permit applications that receive expedited review and approval under the green building permit approval process pursuant to Section 8-6 of the Miami-Dade County Code.
- F. Number of Miami-Dade County permits issued annually for Solar Energy Systems (SES) such as solar photovoltaics for generating electricity and solar thermal systems for water heating; and total design capacity in kilowatts (kW) of the solar energy systems as reflected on the applicable permit.

### **Objective LU-11**

The annual reports documenting sites suitable and having high potential for redevelopment as referenced in Policy LU-11A will serve as the monitoring measure for this Objective.

### **Objective LU-12**

An annual assessment of the vacant sites suitable for infill, as identified in the annual reports referenced in Policy LU-12A, shall be done and development activities that have occurred on all previously vacant sites shall be reported.

## APPENDIX A

**Restrictions.** Restrictions accepted by the Board of County Commissioners in association with applications to amend the CDMP, including LUP map amendments, such as Declarations of Restrictions, shall be considered as an adopted part of the CDMP. Restrictions that have been accepted and take effect on or after July 1, 2006, are identified in the table below:

### Restrictions Accepted by the Board of County Commissioners in Association with Land Use Plan Map Amendments

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
April 2005-2006	1	Change 26.13 gross acres on the south side of NE 215 Street approximately 900 feet west of San Simeon Way / (51-31-42)	Declarations of Restrictions	Requires provision of workforce housing units; commits to water conservation measures and to connecting to any regional wastewater re-use system constructed by the County.
April 2005-2006	3	Change 15.5 gross acres on the west side of Biscayne Boulevard to NW 13 Avenue between NE 112 and NE 115 Streets / (52-42-32)	Declarations of Restrictions	Limits development of the property in accordance with design guidelines (Exhibit B); commits to neighborhood outreach meeting and to coordinate with the Biscayne Corridor Redevelopment Agency prior to seeking rezoning for the property; commits to educational facilities mitigation, transit improvements, public park contribution, workforce housing units, and water- saving measures.
April 2005-2006	4	Change 27.6 gross acres located between NW 12 Avenue and NW 9 Avenue and between NW 95 Terrace and NW 99 Street (53-41-2)	Declarations of Restrictions	Owner agrees to: convey to the County a two acre parcel within the subject property; site plan filed shall not depict multi-family units within Parcels D and E; submit a plan to Director to mitigate adverse impacts to Public School System; comply with County workforce housing requirements; prohibit vehicular access from subject property to NW 99 Street; fund the preparation of a traffic calming study; utilize water conservation measures; and preserve specimen-sized tress.
April 2005-2006	15	Change 10 gross acres at Northwest corner of SW 147 Avenue and SW 184 Street, lying southeast of CSX	Declarations of Restrictions	Prohibits residential uses and requires initial development of the property to include a grocery store.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
		Railroad ROW / (55-39-33)		
April 2005-2006	21	Change 0.91 gross acres at the southeast corner of SW 112 Avenue and SW 224 Street / (56-40-18)	Declarations of Restrictions	Prohibits residential uses.
April 2005-2006	22	Change 62.51 gross acres located at northwest and southeast corners of SW 127 Avenue and SW 240 Street / (56-39-23, 24)	Declarations of Restrictions	Limits development to be consistent with Princeton CUC and Urban Design Manual; commits to educational facilities mitigation, transit improvements, traffic impact mitigation, workforce housing units, water conservation measures, and preservation of specimen sized trees; and exempts from restrictions any portion of the property developed in accordance with existing zoning approval.
October 2005-2006	1	North East 116 to 117 Street and Lying west of NE 16 <sup>th</sup> Avenue / (52-42-32)	Declarations of Restrictions	Include site plan depicting a development program according to design guidelines; Applicant to accommodate future transit facilities within property by allowing transit-related encroachments on property; Applicant to contribute to County for park improvements; Applicant to comply with County, or municipality workforce housing requirements; Applicant to incorporate water conservation measures
October 2005-2006	4	East side of Biscayne Boulevard/East Dixie Highway between North east 108 and 109 Streets / (52-42-32)	Declarations of Restrictions	Applicant to comply with County, or municipality workforce housing requirements; Applicant to incorporate water conservation measures.
October 2005-2006	5	North side of NW 78 Street between NW 22 and NW 24 Avenues / (53-41-10)	Declarations of Restrictions	Uses of property limited to mixed-use multi story structures, ground floor for retail uses, residential on second and higher floors, temporary staging of construction equipment for development of Poinciana Bio-Pharmaceutical Park; Applicant to comply with County, or municipality workforce housing requirements.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
October 2005-2006	6	Between theoretical North West 33 and NW 34 Avenues and between NW 79 Street and theoretical NW 78 Street / (53-41-9)	Declarations of Restrictions	Property limited from certain uses as listed in exhibit C; Applicant to provide vehicular and pedestrian interconnections between property and adjacent parcels; Applicant to accommodate future transit facilities within property by allowing transit-related encroachments on property.
October 2005-2006	12	Northeast corner of SW 186 Street and Homestead Avenue / (56-40-5)	Declarations of Restrictions	Applicant to provide a minimum of 25% of units for residential independent senior housing and/or affordable housing or minimum 10% for workforce housing.
April 2006-2007	3	2260 NW 27 Avenue between NW 22 Street and NW 23 Street / (53-41-28)	Declarations of Restrictions	Limits residential development to no more than 500 units; 90-foot maximum height limit; provides minimum of 25% workforce housing; provides transit improvements; implement water conservation and re-use.
April 2006-2007	8	Northeast corner of SW 127 Avenue and SW 104 Street / (55-39-01)	Declarations of Restrictions	Limits the property's use to a senior residential building with a maximum of 176 "affordable housing" units; 28-ft. maximum height limit; provide ancillary residential services; a 20-ft wide landscaped buffer on east side of property; plant trees at a minimum of 25-feet on center for the length of the berm and buffer; on-site professional management; and provide units with "Florida Water Star Basic Qualification Checklist" water conservation measures.
April 2006-2007	9	East side of Hammocks Boulevard approximately 360-ft north of SW 88 Street/Kendall Drive / (54-39-32)	Declarations of Restrictions	Prohibits residential use of the property.
April 2006-2007	12	Northwest corner of SW 200 Street/Quail Roost Drive and SW 127 Avenue/Burr Road / (56-39-02)	Declarations of Restrictions	Prohibits development of auditoriums, auto and truck sales; auto service and gas stations, bowling alleys, medical observation dormitories, skating rinks, heavy truck rentals, and residential uses.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
April 2006-2007	13	North side of theoretical SW 338 Street between theoretical SW 194 and SW 192 Avenues / (57-38-23)	Declarations of Restrictions	Provide a Minimum set aside of 20% "workforce housing" units if property receives zoning approval for 90% of maximum density permitted under approved CDMP designation, but provide a set aside of no less than 10% "workforce housing" units; provide transit improvements; provide units with "Florida Water Star Basic Qualification Checklist" water conservation measures; owner shall not seek a certificate of completion for more than 24 residential units until owner, at its cost, connects to a water treatment plant with sufficient water treatment capacity.
April 2006-2007	14	Between SW 336 and SW 344 Streets and between SW 192 and SW 197 Avenues / (57-38-23)	Declarations of Restrictions	Provide a Minimum set aside of 20% "workforce housing" units if property receives zoning approval for 90% of maximum density permitted under approved CDMP designation, but provide a set aside of no less than 10% "workforce housing" units; provide transit improvements; maximum of 940 residential units; maximum of 6 DU/Ac west of SW 194 Avenue; provide transit improvements; provide units with "Florida Water Star Basic Qualification Checklist" water conservation measures; owner shall not seek a certificate of completion for more than 299 residential units until owner, at its cost, connects to a water treatment plant with sufficient water treatment capacity; and owner shall not seek a certificate of completion for more than 255 residential units until owner, at its expense, completes construction of SW 344 Street between SW 182 and SW 192 Avenues.
April 2006-2007	15	Southwest corner of SW 344 Street and SW 192 Avenue / (57-38-26)	Declarations of Restrictions	Property shall be developed at a maximum of 10 residential units per gross acre; minimum of 10% units for "workforce housing;" transit improvements; provide

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				units with "Florida Water Star Basic Qualification Checklist" water conservation measures; owner shall not seek a certificate of completion for more than 124 residential units until owner, at its cost, connects to a water treatment plant with sufficient water treatment capacity; and owner shall dedicate, at no cost to a government entity, the right-of-way along the property's frontage as required to allow improvement of SW 344 Street as a 4-lane arterial.
April 2007-2008	1	100 feet east of NW 27 Avenue between NW 87 Terrace and NW 89 Street / (53-41-03)	Declarations of Restrictions	Submit a landscape site plan at the time of zoning to assure appropriate landscaping and buffering and applicant will not file for zoning proposing residential uses until the County adopts a public school facilities element, enters into the Interlocal Agreement with the School Board, and amend its CDMP to implement school concurrency.
April 2007-2008	2	Southeast corner of NW 57 Avenue and Blue Lagoon Drive / (53-41-31)	Declaration of Restrictions	Water conservation measures in Exhibit B; a site plan at the time of initial rezoning that incorporates design concepts from the County's Urban Design Manual and includes a pedestrian promenade along the waterfront; and limit uses to those permitted under the existing RU-4A zoning category or BU-1A for rezoned portions of the property (See Declaration of Restrictions for the 22 prohibited BU-1A uses).
April 2007-2008	6	300 feet west of SW 84 Avenue and south of SW 38 Street / (54-40-15)	Declarations of Restrictions	Limit construction to 49 units; 30-foot setback from northern boundary; residential buildings within the northern 50-feet of the property will not exceed 35-foot height; incorporate water conservation measures into the design, construction and operation of any residential development; provide 10% workforce housing; owner will proffer a covenant to address tenant relocation by

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				providing the option to rent comparably priced rental housing within 10 miles; will not file for zoning until County adopts public school facilities element and enters into Interlocal Agreement with School Board; preserve specimen trees.
April 2007-2008	8	Southside of SW 88 Street west of SW 167 Avenue / (54-31-39)	Declarations of Restrictions	Construct and dedicate to Miami-Dade County, a 70-foot wide right-of-way containing 4, travel lanes - identified as SW 172 Avenue (the roadway improvement) - prior to the issuance of any Certificate of Occupancy. The roadway improvement will extend SW 172 Avenue from the southern boundary of the Property to the northern boundary of the Property and be at the Owner's cost and expense. In addition, the applicant proffers to seek a signal warrant for the intersection of SW 172 Avenue and Kendall Drive and, if warranted, fund the signalization of the intersection.
April 2007-2008	10	Southwest corner of Homestead Avenue and SW 184 Street (Eureka Drive) / (56-40-5)	Declaration of Restrictions	A minimum of 10% workforce housing units for sale or rental to persons within the income range of 65% to 140% of medium family income for Miami-Dade County.
April 2007-2008	11	34250 SW 192 Avenue / (57-38-23)	Declaration of Restrictions	A minimum of 20% workforce housing under certain conditions with 25% set aside of workforce housing units for sale or rent to persons with 65% to 105% of median family income. A maximum density of 50 dwelling units; incorporate water conservation measures; owner will not seek a certificate of use and occupancy for more than 17 dwelling units until the owner, at own expense, connects to a water treatment plant with sufficient treatment capacity; owner will not seek a certificate of use or occupancy for more than 30 dwelling units until the construction of SW 344 Street as a 4-lane

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				divided arterial roadway from SW 182 and SW 192 Avenues is completed.
October 2007-2008	3	An area between NW 51 and NW 53 Streets and between NW 23 Court and NW 24 Avenue / (22-53-41)	Declaration of Restrictions	Owner agrees that all residential units constructed on the property shall be designated for affordable housing for the sale or rent, and/or workforce housing for sale or rent to persons with 65% to 105% of median family income, and shall meet the criteria of affordable and/or workforce housing in Miami-Dade County. Maximum number of dwelling units shall be 280.
October 2007-2008	4	Northwest corner of SW 117 Avenue and SW 95 Street / (55-40-06)	Declaration of Restrictions	Prohibits call centers as permitted use. Professional offices residential in appearance, excluding medical offices, with building heights not exceeding 2 stories or 35 feet above finished grade. Prior to issuance of CO, a decorative wall of masonry or reinforced concrete compatible with the main structure, 6 feet in height, shall be erected along all interior property lines abutting residentially zoned property. Limits residential development to the density currently allowed under the Estate Density Residential and Section 33B-45, Miami-Dade County Code.
Beacon Lakes DRI/CDMP Amendment (2008 Out of Cycle)	None	Generally located at the northeast corner of NW 137 Avenue and SR 836 Extension, within the Beacon Lakes DRI	Declaration of Restrictions	Prohibits residential use within the amendment site, but does not prohibit hotel or motel use.
April 2008-2009	2	West side of NW 7 Avenue between NW 155 Lane and Biscayne Canal / (52-41-14)	Declaration of Restrictions	Limits residential development to the density currently allowed under the existing Medium-High Density Residential (25-60 DU/acre)
April 2008-2009	3	Southeast corner of NE 135 Street and NE 3 Lane/ (52-42-30)	Declaration of Restrictions	Limits development to a conceptual site plan, has a maximum of 102,600 sq. ft. of floor area, prohibits residential development, and restricts

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				development of retail, office and commercial uses including self-storage.
April 2008-2009	4	10940 NW 14 Avenue (an area southwest of intersection of NW 14 Avenue and NW 111 Street) / (52-41-35)	Declarations of Restrictions	Restricts the development to an increase of 100 dwelling units, for a maximum 308 dwelling units, with the utilization of the workforce housing program which provides for a 25% increase in residential density.
April 2008-2009	5	East side of NW 72 Avenue between 36 and 41 Streets / (53-40-26)	Declaration of Restrictions	Prohibits residential development.
April 2008-2009  [November 2013-2014]	8  [1]	North side of W. Flagler Street between theoretical NW 90 and NW 94 Avenues / (54-40-04)	Declarations of Restrictions  [Modification to Existing Declaration of Restrictions]	Existing Declaration of Restrictions on property modified to restrict development of residential dwelling units to 824 on residentially designated areas. An additional Declaration of Restrictions limits development on property to 240,000 sq. ft of retail. Prohibits residential, office and certain commercial uses on commercially designated area. Owner agrees to afford Miami-Dade County Public Library Department first choice to lease space for neighborhood library. Restricts building height on property. Owner agrees to maintain pedestrian pathway between commercial development and neighboring residential areas. Limits hours of operation of commercial development.
April 2008-2009  [May 2013-2014]	9  [3]	Northeast corner of West Flagler Street and NW 102 Avenue / (54-40-05)	Declarations of Restrictions  [Modification to Existing Declaration of Restrictions]	Restricts non-residential development on property to 375,000 sq. ft. of retail, commercial, personal services, and offices. Restricts residential development to no less than 150 and no more than 200 elderly housing units; or no less than 125 and no more than 150 student housing units; or no less than 150 and no more than 175 multi-family units. Any storm water retention areas may occupy the north 2 acres of the property. Restricts

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				height of buildings and proximity to residential areas to west of property. Landscaped buffer shall be installed to the west and north area of property, including a six feet high CBS wall along the outside line of buffer. Prohibits certain uses on property. Prohibits delivery trucks from entering/exiting property from West Park Drive. Owner agrees to implement water conservation and re-use standards. Owner to allow encroachment on property for the provision of a bus pull-out bay and bus shelter along property frontage on West Park Drive and W. Flagler Street.
April 2008-2009	10	Southwest corner of SW 112 Avenue and SW 248 Street / (56-40-30)	Declarations of Restrictions	Owner agrees to develop property with a mix of uses. Owner also agrees that type of retail uses would satisfy the essential and frequent needs of the surrounding residential community. Owner represents that the property will be developed according to design guidelines contained in Exhibit "B" attached to this Declaration of Restrictions.
April 2009-2010	3	Northeast corner of SW 137 Avenue and SW 96 Street / (55-39-02)	Declarations of Restrictions	At initial rezoning hearing, owner shall include entire property as the defined subject property and shall not seek partial rezoning of subject property; owner at initial rezoning shall submit a site plan for entire property or submit an Architectural Code together with recordable declaration of restrictions and shall design the site plan and/or Architectural Code, as applicable at time of rezoning, with the intent to obtain 'green building' certification.
October 2009-2010	2	Southwest corner of NW 19 Avenue and NW 81 Street / (10-53-41)	Declarations of Restrictions	Total number of residential units on the property shall be limited to no more than 94 units. No buildings within the property shall exceed three stories in height. Owner shall install a landscaped berm along the northern property

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				line, with the exception of a driveway connecting the property to NW 81 Street, at a height of at least three feet as measured from grade. Owner agrees to install trees along the top of the berm that will be at least eight feet in height at time of planting as measured from the top of the berm.
October 2009-2010	3	Southwest corner of SW 127 and SW 200 Street / (11-56-39)	Declarations of Restrictions	Owner shall incorporate some of the components of the U.S. Green Building Council's LEED for New Construction and Renovations Rating System version 3 into the design and construction of proposed building on property.
October 2009-2010	6	Southwest corner of NW 32 Avenue and NW 79 Street / (53-41-09)	Declarations of Restrictions	Residential density on the property shall be limited to no more than 1,200 dwelling units. Prior to plat approval, the owner shall work with Miami-Dade Transit to accommodate future transit facilities within the property, including bus shelters, pull-out bays, and other facilities by allowing transit-related encroachments onto the property. The owner shall also provide pedestrian accommodations for transit connectivity within the property, consistent with Policy LU-7B of the CDMP.
October 2009-2010	7	Northwest corner of NW 107 Avenue and NW 12 Street / (53-40-31)	Declarations of Restrictions	The maximum Development Program (MDP) is 1,050 dwelling units or 1,701,000 sq. ft., 799,900 sq. ft. of retail/service space, 430 hotel rooms or 225,000 sq. ft. and 225,000 sq. ft. of office space. Owner may increase density/intensity of MDP land use categories provided cumulative impact of reallocated land uses does not exceed the PM peak hour trips or the average/maximum daily potable water demand for the MDP. Owner shall incorporate a MetroBus terminal for multiple MetroBus routes, which shall include a maximum of ten (10) saw-tooth bus bays, the driveway

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				network serving the bays, 260 parking spaces in a garage, transit-oriented commercial uses not to exceed a maximum of 10,000 square feet, and transit lounge. The Owner agrees to fund and construct the terminal pursuant to a phased development schedule. Phase I, including the surface parking lot with 189 parking spaces, will be constructed by August 31, 2012. Phase II, including the parking garage, will be constructed within five years from effective date of the user operations agreement. Owner agrees to reserve a portion of dedicated land to County for a possible future MetroRail station. The Owner shall fund and construct certain roadway improvements; support the creation of a non-ad valorem fire assessment fee; implement design guidelines contained in Exhibit C; all buildings on property shall be LEED certified; provide for a minimum of 10% of dwelling units for workforce housing; and incorporate water conservation measures into the design, construction and operation of residential and commercial development.
October 2010-2011	2	8300 SW 40 Street (Southwest corner of SW 40 Street and SW 83 Avenue) / (54-40-22)	Declaration of Restrictions	If the property is developed with residential uses, the maximum residential density shall not exceed 10 dwelling units per gross acre.
October 2010-2011	3	Southeast corner of SW 137 Avenue and SW 288 Street (55-39-07 and 08)	Declaration of Restrictions	Prohibits residential use of the property; requires transit, bicycle and pedestrian accessibility to be addressed at rezoning through acceptable site plan and Declaration of Restrictions.
Homestead-Miami Speedway, LLC, CDMP Amendment	N/A	Between SW 132 and SW 142 Avenues, and between theoretical SW 333 and SW 336 Streets / (57-39-23)	Declaration of Restrictions	The property shall be used for up to 12,000 additional spectator seats; temporary and permanent parking facilities; temporary event concessions consisting of kiosks, tents, and other similar portable

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
(2011 out of cycle)				facilities; a 6,000 sq. ft. kitchen facility; provided, however, that the property shall not be used for hotels, motels, residential dwelling units, commercial office buildings, shopping centers or other similar development; when not being used for speedway purposes, the property may be used for certain agricultural uses, such as packing facilities, truck gardens and outdoor storage of vehicles or equipment associated with agricultural production, farms, grooves, nurseries, greenhouses, and fruit and vegetable stands. 100% of the stormwater runoff from the 100-year, 3-day storm event for the property shall be retained within the property and the adjacent Homestead-Miami Speedway
Dolphin Center Properties, LLC, CDMP Amendment Application (2011 out of cycle)	Not Applicable	Between NW 199 and NW 195 Streets, and between the Florida Turnpike and NW 22 Avenue / (52-41-03)	Declaration of Restrictions	Notwithstanding the re-designation of the property to "Business and office", development of the property shall be limited solely to those uses that are permitted under the "Office/Residential" land use category within the CDMP, as such may be amended from time to time; and a water park tourist attraction, together with such ancillary, associated and accessory uses customary thereto.
October 2011-2012  [November 2014 Cycle]	1  [6]	Between NW 22 Avenue and NW 27 Avenue, and between NW 132 Street and NW 107 Street (±196 Gross Acres; ±180.4 Net Acres) / (52-41E-27 and 34)	Declaration of Restrictions  [Replaces original Declaration of Restrictions]	There are twelve (12) restrictions and/or conditions including the following: Restricts non-residential development on the "Business and Office" parcels to a maximum 400,000 square feet of retail, service and office uses, and 1,600,000 square feet of office, light industrial, warehouse and flex space uses on the "Industrial and Office" parcels, to be developed in phases. Limits warehouse and/or distribution space to a maximum of 700,000 square feet. Restricts residential development to 2,000

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				dwelling units on the "Business and Office" portions of the site through simultaneous increase and decrease in the intensity of uses provided that the total vehicular trip generation shall not exceed 3,297 net external PM peak hour trips. Prohibits all IU-3 uses and of all IU-2 uses except the storage and distribution of cement and clay products are permitted. Limits access to the property to NW 119 Street, NW 22 Avenue, and NW 24 Avenue, and provides for improvements to NW 119 Street, among others.
October 2011-2012	3	Southwest corner of SW 124 Avenue and SW 152 Street / (55-39E-25 and 26-)	Declaration of Restrictions	Restricts development to 370,000 square feet of retail, commercial, office, and service uses; up to 900 residential units; a minimum 18,000 square feet library site; a school for up to 1,350 students; and up to a 35% simultaneous increase and decrease in uses provided that in no event vehicular trip generation exceeds 1,660 net external PM peak hour trips. Also Requires agreement between the owner and the County for management of Natural Forest Communities (NFC) on site and that all future owners/lessees be provided written notice of NFC management activities and impacts from the proximate Zoo Miami and its further development.
April 2012-2013	1	Southeast corner of the intersection of NE 213 Street and NE 26 Avenue / (34-51-42)	Declaration of Restrictions	Restricts maximum residential development on the property to 125 units, and requires the incorporation of good urban design principles into any development application seeking the density increase provided by the DI-1 overlay.
April 2012-2013	2	South side of SW 24 Street, and between SW 69 Court and SW 71 Avenue / (54-40-14)	Declaration of Restrictions	Restricts development to 200,000 square feet of such uses as may be permitted under the "Business and Office" land use designation and prohibits residential development on the property.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
October 2012-2013	2	Northwest corner of the intersection of SW 127 Avenue and SW 132 Street / (55-39-14)	Declaration of Restrictions	<ul style="list-style-type: none"> <li>• Requires notification to prospective purchasers of the property's location proximate to the Kendall-Tamiami Executive Airport and Environmentally Endangered Lands Preserve and its associated preservation and management requirements;</li> <li>• Requires burrowing owls survey prior to development and compliance with the Florida Fish and Wildlife Conservation Commission Burrowing Owl Nest Protection Guidelines and Procedures in Urban Area; and</li> <li>• Prohibits application for a Certificate of Occupancy for any residential dwelling within an 18-month period subsequent to adoption of the amendment.</li> </ul>
Lucky Start at the Hammocks, LLC, CDMP Amendment Application (2014 out of cycle)	N/A	West of SW 147 Avenue between SW 112 Street and SW 120 Street [on the south side of Hammocks Boulevard] / (09-55-39)	Declaration of Restrictions	<ul style="list-style-type: none"> <li>• Requires incorporation of at least 25 decibel (db) Noise Level Reduction (NLR) into the design and construction of any dwelling unit on the property;</li> <li>• Grant and convey to Miami-Dade County an avigation easement for the free and unobstructed flight of aircrafts over the property;</li> <li>• Provide notice to prospective purchasers regarding the property's location proximate to the Kendall-Tamiami Executive Airport and the impacts therefrom;</li> <li>• Dedication of a ±0.75 gross-acre park prior to issuance of a certificate of occupancy;</li> <li>• Contribution of \$460,000.00 to the Parks Foundation of Miami-Dade; and</li> <li>• Requires burrowing owls survey prior to development and compliance with the Burrowing Owl Nest Protection Guidelines and Procedures in Urban Area.</li> </ul>

May 2013-2014	2	Southwest corner of the intersection of West Flagler Street and SW 92 Avenue / (54-40-04)	Declaration of Restrictions	Residential development is prohibited on the subject property.
May 2013-2014	3	Northeast corner of the intersection of West Flagler Street and NW 102 Avenue / (54-40-05)	Declaration of Restrictions	Owner to contribute \$200,000 to Parks Foundation of Miami-Dade County; owner shall submit an On-site Security Plan to the Department of Regulatory and Economic Resources.
May 2013-2014	5	Northwest corner of the intersection of theoretical SW 2 Street and SW 137 Avenue / (54-39-03)	Declaration of Restrictions	Maximum development on the property shall not exceed 113,700 square feet of commercial uses. Residential development is prohibited on the property.
May 2013-2014	7	Southwest corner of the intersection of SW 137 Avenue and SW 272 Street / (56-39-34)	Declaration of Restrictions	Residential development on the property to be limited to a maximum of 272 units; owner to provide at least 0.80 acres of publicly accessible open space in the form of up to two separate park areas; and prior to final plat, owner shall work with Miami-Dade Transit to accommodate future transit facilities on the property, or on adjacent streets.
November 2013-2014	1	North side of West Flagler Street between theoretical NW 90 and NW 94 Avenues / (54-40-04)	Declaration of Restrictions	Existing Declaration of Restrictions on property modified to restrict development of residential dwelling units to 824 on residentially designated areas. An additional Declaration of Restrictions limits development on property to 240,000 sq. ft. of retail. Prohibits residential, office and certain commercial uses on commercially designated area. Owner agrees to afford Miami-Dade County Public Library Department first choice to lease space for neighborhood library. Restricts building height on property. Owner agrees to maintain pedestrian pathway between commercial development and neighboring residential areas. Limits hours of operation of commercial development, but allow fitness centers/gyms and restaurants to begin daily

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				operations at 5:00 am rather than at 6:00 am.
May 2014-2015	4	Southeast corner of SW 4 Street and SW 92 Avenue / (54-40-04)	Declaration of Restrictions	Limits development to a maximum of 203 dwelling units and commits to incorporating sound urban design principles into the design and development of the site to create a pedestrian friendly environment and ensure compatibility with adjacent development.
May 2014-2015	5	Southeast corner of SW 286 Street and SW 132 Avenue / (57-39-02)	Declaration of Restrictions	Commits to incorporating 25 decibel noise level reduction into the design and construction of any dwelling unit on the property.
November 2014-2015	2	Southeast corner of the intersection of SW 40 Street and SW 107 Avenue / (54-40-20)	Declaration of Restrictions	Prohibits residential uses on the property.
November 2014-2015	3	East side of SW 120 Avenue at theoretical SW 91 Street / (55-39-01)	Declaration of Restrictions	Restricts development to a maximum of 6 townhomes at a maximum 2-story in height; and requires landscape buffer along southern boundary of property.
November 2014-2015	4	West of US-1 at the northwest corner of SW 122 Street and the South Dade Busway / (55-40-15)	Declaration of Restrictions	Restricts development to a maximum of 12 dwelling units consisting of 6 residential buildings and one accessory building; requires preservation of specimen trees on property; and requires owner to prepare a traffic calming measure on SW 84 Avenue and SW 122 Street and pay for such improvement if approved by the County.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
November 2014-2015	5	North of SW 152 Street and 300 feet west of theoretical SW 97 Avenue / (55-40-20)	Declaration of Restrictions	Requires the incorporation of sound urban design principles into any development seeking to utilize the density increase provided by the DI-1 overlay designation; limits development to a maximum of 175 workforce housing dwelling units; and requires the owner to work with Miami-Dade Transit to accommodate transit facilities within the property or on adjacent streets.
November 2014-2015	7	Between NW 97 and NW 87 Avenues and between West Flagler Street and theoretical NW 8 Street (south of SR 836) / (54-40-04)	Modification to an existing Declaration of Restrictions and separate Declarations of Restrictions for Tract 1 and Tract 2	Second Modification to Declaration of Restrictions (covenant) recorded in Official Records Book 23413, Page 1136 of Miami-Dade County Official Records to exclude ±5.2 acre Parcel A (Tracts 1 & 2) from covenant. New covenants limit development of Tract 1 to a charter school and ancillary pre-k school and Tract 2 to a Community Center or civic uses and require the owner to coordinate with United States Fish and Wildlife Service and other federal and state agencies regarding protection of bonneted bats if they exist on the property.
May 2015-2016	1	Northeast corner of the intersection of NE 109 Street and NE 13 Avenue / (52-42-32)	Declaration of Restrictions	Permits only Business and Office commercial use on the property to a ground level commercial parking and such other uses permitted in and consistent with the Medium Density Residential land use designation and a landscape buffer abutting the residential property to the north of the application site.
May 2015-2016	2	Southeast corner of the intersection of SW 56 Street and SW 89 Avenue / (54-40-28)	Declaration of Restrictions	Prohibits residential uses on the property and requires uses allowed under the Business and Office land use designation to be compatible with the adjacent residences.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
May 2015-2016	5	Northeast corner of the intersection of SW 184 Street and SW 112 Avenue / (56-40-31)	Declaration of Restrictions	Prohibits residential uses on the property and restricts development of the property to a maximum of 30,000 square feet of such uses allowed under the Business and Office land use designation.
May 2016-2017	1	Southeast corner of East Dixie Highway and NE 110 Street, east of Biscayne Boulevard / (32-52-42)	Declaration of Restrictions	Limits buildings on the property within 35 feet of the east property line to a maximum height of 45 feet and requires a landscape buffer along the east property.
May 2016-2017	5	North of NW 178 Street between the Turnpike and I-75/ (52-40-8, 52-40-9)	Declaration of Restrictions	Limits development to 3.5 million square feet of retail use, 1.5 million square feet of entertainment use, 2,000 rooms of lodging, 1.2 million square feet of back of house space, and allows simultaneous increase and decrease of uses provided the retail does not exceed 3.5 million square feet and the vehicle trip generation does not exceed 5,784 net external PM peak hour vehicle trips. Requires notice of proximity to Rock-mining activity; mitigation of environmental and infrastructure impacts; inclusion of roadway and transit improvements necessary for LOS to be included in Table 10-A and Table 11-B of the Capital Improvements Element (CIE); hiring of local workforce, veterans and local universities.
May 2016-2017	6	Between the Homestead Extension of the Florida Turnpike and I-75, and between NW 170 Street and NW 180 Street / (52-40-8, 52-40-9)	Declaration of Restrictions	Limits development to 3 million square feet of business park use, 1 million square feet of commercial/retail, 2,000 multifamily rental units, hotel uses as allowed under the permitted uses. Simultaneous increase and decrease of uses are allowed provided the retail does not exceed 1 million square feet and the vehicle trip generation does not exceed 5,315 net external PM peak hour vehicle trips. Requires notice of proximity to Rock-mining activity; mitigation of environmental and infrastructure

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				impacts; inclusion of roadway improvements necessary for LOS in Table 10-A of the Capital Improvements Element (CIE); hiring of local workforce, veterans and local universities.
October 2016-2017	4	Southwest corner of the intersection of SW 87 Avenue and SW 94 Street / (55-40-04)	Declaration of Restrictions	Limits building heights to 45 feet and 3 stories on eastern 170 feet of property and 29 feet and 2 stories on remainder of property; provides for 50 feet minimum from western and southern property lines; requires 10-foot wide landscape buffer and 6-foot high decorative wall along western and southern property lines; requires parking in excess of that required for medical offices; requires LEED certification for development on property.
January 2017-2018	1	Approximately 530 feet west of SW 87 Avenue between SW 72 Street and SW 74 street / (33-54-40)	Declaration of Restrictions	Requires the Owner to provide a 10-foot wide landscape buffer along south property line; no vehicular ingress or egress on SW 74 Street; development on property shall be limited to density/intensity of uses that do not generate sewage flows exceeding 30,000 gallons per day, unless approved otherwise by Miami-Dade County Environmental Quality Control Board.
January 2017-2018	2	Northeast corner of SW 280 Street and SW 128 Place (±500 feet west of SW 127 Avenue) / (35-56-39)	Declaration of Restrictions	Provides project design criteria to be followed for development accessing the one density increase DI-1 overlay designation; requires water saving measures be integrated into the project design where practical; requires notice to be provided to prospective tenants and/or owners of the property regarding adjacent existing and potential industrial uses and impacts from the operations of the Homestead Air Reserve Base.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
May 2017-2018	2	South side of SW 136 Street and ±200 feet east of SW 157 Avenue / (21-55-39)	Declaration of Restrictions	Requires minimum 25 decibel noise level reduction in the design and construction of residential units; Commits to granting an avigation easement to Miami-Dade County for free and unobstructed flight operations; Requires notice requirements to potential owners and buyers of airport impacts, and limits residential development to 156 units.
May 2017-2018	3	Northeast corner of SW 184 Street/ Eureka Drive and east of SW 110 Avenue) / (31-55-40)	Declaration of Restrictions	Requires incorporation of sound urban design principles into the design of development on the site including architectural elements and building scale compatible with surrounding developments. Provides for water saving measures.
May 2017-2018	8	Northeast corner of SW 207 Avenue and SW 272 Street / (34-56-38)	Declaration of Restrictions	Owner to use 10.5 acres for only uses allowed in the AU Zoning District. Owner to abide by subsequent amendments made to requirements and permissible uses of the AU Zoning District. Uses in the 10.5 acres are confined to agricultural and related uses. Residential development shall not be permitted on the 10.5 acres.
October 2017-2018	2	West of SW 69 Avenue between SW 40 and 44 Streets / (23-54-40)	Declaration of Restrictions	Property limited to uses allowed within the Bird Road Development Area; Development on the property shall not generate more than 446 PM peak hour trips; Requires trip generation analysis at time of site plan approval to ensure the trip cap is not exceeded.
October 2017-2018	3	Southeast corner of SW 71 Avenue and SW 44 Street / (23-54-40)	Declaration of Restrictions	Property limited to uses allowed within the Bird Road Development Area; Development on the property shall not generate more than 395 PM peak hour trips; Requires trip generation analysis at time of site plan approval to ensure the trip cap is not exceeded.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
October 2017-2018	6	South side of SW 136 Street and ±1,340 feet east of SW 157 Avenue / (21-55-39)	Declaration of Restrictions	Limits residential development to 264 units; requires 100% of units to be affordable to households earning between 60% and 140% of Area Median Income; requires development seeking the one density increase (DI-1) to incorporate sound urban design principles into the design of the project; owner to incorporate minimum 25 decibel noise level reduction in the design and construction of residential units; commits to granting an avigation easement to Miami-Dade County for free and unobstructed flight operations; requires notice requirements to potential owners and buyers of airport impacts.
October 2017-2018	7	North of NW 170 Street between NW 97 Avenue and I-75 / (52-40-9)	Declaration of Restrictions	Limits development to 1,652 net external PM peak hour vehicle trips, restricting the maximum development to 454,500 sq. ft. of retail space, or 1.2 million sq. ft. of industrial, or 755 residential units (unless the CDMP authorizes a higher amount of residential units). Commits to transit, local recreation open space, and fire flow improvements to maintain LOS.
Expedited Process	CDMP2018 0006	Southeast corner of SW 40 Street and SW 70 Court / (23-54-40)	Declaration of Restrictions	Development on the property shall be limited to no more than 313 residential units and 10,000 square feet of retail.
Expedited Process	CDMP2018 0013	Between SW 8 and SW 12 Streets and between SW 69 and SW 71 Avenues / (23-54-40)	Declaration of Restrictions	Development on the property shall be limited to no more than 677 residential units and 100,000 square feet of retail.
Expedited Process	CDMP2018 0005	Southwest corner of SW 136 Street and SW 157 Avenue / (22-55-39)	Declaration of Restrictions	Covenant provides for incorporation of at least 25 decibel noise level reduction into design and construction of development; provision of an avigation easement to the County allowing flights over the property; and a commitment to providing notice to prospective buyers regarding proximity of property to the airport, its operations, and safety risks.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
May 2018-2019	1	Southwest corner of NE 12 Avenue and NE 215 Street / (32-51-42)	Declaration of Restrictions	Workforce housing units shall be provided in any residential development having a density greater than 6 units per gross acre and maximum development shall not exceed 115 units. Maximum 92 residential units allowed if CDMP density bonus for workforce housing is not applied to the development. The County's Urban Design Manual shall guide development site seeking to use the DI-1 Overlay. Prior to approval of final plat, owner shall accommodate future transit facilities within the property.
May 2018-2019	3	Northwest corner of SW 88 Street and SW 149 Avenue / (33-54-39)	Declaration of Restrictions	Residential development on the property is prohibited. Buildings shall not exceed two stories in height. Commercial development on site is limited to 43,351 square feet.
May 2018-2019	4	West side of NW 62 Avenue between NW 183 Street and NW 186 Street / (52-40-12)	Declaration of Restrictions	Residential use limited to 304 multi-family units; commits 192 dwelling units for senior housing (persons 55 years and older) for persons with incomes up to 60% AMI, 80% AMI, and 100% AMI; commits 112 dwelling units for market-rate rental, workforce or affordable housing or any combination thereof; limits the maximum building height to six (6) stories.
May 2018-2019	5	South of SW 184 Street between SW 136 Court and SW 132 Place / (56-39-2)	Declaration of Restrictions	Residential use limited to 80 single-family homes; requires buffering to adjacent agricultural areas; requires installation of pedestrian crosswalk at Eureka Drive and SW 134 Avenue, land dedication for the widening of SW 134 Avenue for a dedicated right turn lane, and provision of a bench and bus shelter within property, subject to approval by DTPW. Require notice of prescribed burning to be recorded by owners prior to final plat approval and

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				included in every contract for sale of any dwelling unit in the property.
October 2018-2019	1	Northeast corner of NW 2 Avenue and NW 161 Street / (13-52-41)	Declaration of Restrictions	Limits development to a maximum 100 residential units. Commits to minimum urban design criteria for development seeking the density increase of the DI-1 Overlay, including location of primary entrances. Limits the eastern 400 feet of the property to two-story townhomes and allows multi-family on the western 200 feet.
October 2018-2019	2	Northeast corner of NW 6 Avenue and NW 159 Street / (13-52-41)	Declaration of Restrictions	Commits to: 1) providing a minimum of 20% of the residential units for Workforce Housing, in accordance with Chapter 33, Article XIIA of the Code of Miami-Dade County; 2) securing LEED or other green building certification; and 3) minimum development design principles to include abundant fenestration, minimum 6-foot wide sidewalks, uniform street furniture, one or more outdoor playgrounds, among other conditions.
October 2018-2019	4	Northeast corner of SW 117 Avenue and SW 224 Street / (18-56-40)	Declaration of Restrictions	Commits Owner to: 1) apply for a multi-family residential development comprised entirely of workforce housing units, in accordance with Chapter 33, Article XIIA of the Code of Miami-Dade County; and if denied to pursue a congregate living facility for the elderly; 2) utilize the County's Urban Design Manual for development seeking to use the density increase of DI-1 Overlay.
October 2011-2012  November 2014 Cycle	1  6	Between NW 22 Avenue and NW 27 Avenue, and between NW 132 Street and NW 107 Street (±196 Gross Acres; ±180.4 Net Acres / (52-41E-27 and 34)	Declaration of Restrictions  Replaces original Declaration of Restrictions	There are twelve (12) restrictions and/or conditions including the following: Restricts non-residential development on the "Business and Office" parcels to a maximum 400,000 square feet of retail, service and office uses, and 1,600,000 square feet of office, light industrial, warehouse and flex space uses on the "Industrial and Office" parcels, to be developed in

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
October 2018 Cycle	5		(Industrial and Office and Business and Office north parcels released from limitations of covenant except for the 3,297 net external PM peak hour trip cap)	phases. Limits warehouse and/or distribution space to a maximum of 700,000 square feet. Restricts residential development to 2,000 dwelling units on the "Business and Office" portions of the site through simultaneous increase and decrease in the intensity of uses provided that the total vehicular trip generation shall not exceed 3,297 net external PM peak hour trips. Prohibits all IU-3 uses and of all IU-2 uses except the storage and distribution of cement and clay products are permitted. Limits access to the property to NW 119 Street, NW 22 Avenue and NW 24 Avenue, and provides for improvements to NW 119 Street, among others.
October 2018 Cycle	5	Between NW 22 Avenue and NW 27 Avenue and between Gratigny Parkway (NW 119 Street) and NW 131 Street / (24-56-39)	Declaration of Restrictions	Development limited to a maximum 990 residential units and 5,000 square feet of retail. Property released from 2015 CDMP covenant, except for the 3,297 net external PM peak hour trip cap. Owner shall, (1) prior to building permit, obtain appropriate DERM and SFWMD permits and plan approvals for drainage and stormwater and dedicate a canal right of way or provide canal easement; (2) incorporate pedestrian accessibility into residential development; (3) provide a bus stop shelter on the north side of NW 119 Street; (4) comply with the County First Source Hiring Program; and (5) work with the County's Office of Historic Preservation to safeguard historic or archaeological resources on the property.
October 2018 Cycle	6	Between SW 120 Avenue and SW 117 Avenue and between theoretical SW 234 Street and SW 248 Street / (56-39-24)	Declaration of Restrictions	Limits development to a maximum of 767 residential units on the portion of the application area south of SW 238 Street and a maximum of 70,000 square feet of retail; Owner shall cause the

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
				design, permitting and installation of an emergency signal on SW 248 Street for the County's Fire Station No. 70.
January 2019 Cycle	2	Southeast corner of SW 69 Avenue and SW 80 Street / (35-54-40)	Declaration of Restrictions	No more than 30 units may be built on site; Owner to plant shrubs and trees within the southern swale area of SW 80 Street in order to discourage vehicle parking in swale area; trees shall be persevered pursuant to Tree Permit No. 9272.
January 2019 Cycle	3	Between SW 216 Street and theoretical SW 228 Street and located on the east side of SW 107 Avenue / (17-56-40)	Declaration of Restrictions	Development limited to 400 residential units; 390 units to be made available to persons earning up to 140% of Area Median Income of Miami-Dade County; 10 units to be conveyed to Miami-Dade County Homeless Trust; building height limited to 3 stories at 35 feet; and development seeking to use the "DI-1 density increase" shall utilize urban design principles as outlined in the covenant.
May 2019 Cycle	2	Northeast corner of SW 288 Street and SW 142 Avenue / (03-57-39)	Declaration of Restrictions	Development limited to a maximum of 216 units. 100% of units will be affordable to households earning between 60% to 140% of the Area Median Income of Miami-Dade County. Maximum height is limited to three stories at 35 feet. Owner to provide and maintain a six-foot wide landscape buffer on the western portion of site, subject to approval of a waiver or variance of the requirement to dedicate or extend SW 142 Avenue. If said waiver is not approved, then owner shall be required only to provide the buffer required by Miami-Dade County Code.

<b>Amendment Cycle</b>	<b>Application No.</b>	<b>General Location/ (Township-Range-Section)</b>	<b>Type of Restriction</b>	<b>Summary of Restrictions</b>
