206	Polk County, FL	85,554	80,733	90,375

Source: U.S. Census Bureau, 2001 Supplementary Survey, Ranking Tables.

**Notes:**

The 2001 Supplementary Survey used the same questionnaire and methods developed for the American Community Survey (ACS) to collect demographic, social, economic, and housing data from a national sample of 700,000 households in 1,203 counties. (Group quarters were not included in the sample.) The Ranking Tables were created by ACS to provide a quick visual representation of comparative data on key issues for the top 220 counties nationwide. The margin of error, represented by the lower and upper bounds of the 90-percent confidence interval. The confidence interval gives a range of values likely to include the population true value. The smaller the confidence interval the more precise the estimate of the characteristic of interest.

Specified Owner-Occupied Units are owner-occupied, one-family, detached or attached, units that are on less than 10 acres, without a business or medical office on the property. The data excludes mobile homes and housing units in multi-unit buildings. The value is an estimate of how much the property (house and lot, mobile home and lot, or condominium unit) would sell for if it were for sale. If the house or mobile home was owned or being bought, but the land on which it sits was not, the respondent was asked to estimate the combined value of the house or mobile home and the land. For vacant units, value was the price asked for the property.
