

RYAN WHITE PROGRAM PRESCRIPTION DRUG FORMULARY (Sorted by Brand Name)

Revised: 8/10/2009

This is a comprehensive list of medications that may be required by individuals who have HIV or AIDS. Ryan White clients must also reside permanently in Miami-Dade County and have a household income below 400% of the Federal Poverty Level. All items will be reimbursed in their generic equivalent. Reimbursement for name brand items will only be permitted in the event that a generic equivalent is not available on the market. There may be special situations where medications are needed that are not on this list (i.e., HIV-related heart disease or HIV-related kidney failure) and there is a mechanism set up to deal with such extenuating circumstances. However, additions to the Formulary are currently restricted to life-saving or cost-saving medications.

NOTES:

**HRSA d-codes are included as derived from the Multum Lexicon database from Cerner Multum, Inc. This database was modified to fit the Ryan White Prescription Drug Formulary format. A complete copy of the database is available upon request from the County's Office of Grants Coordination.*

*** Medications assigned a letter notation will be covered by the County's Ryan White Part A or Minority AIDS Initiative Programs only if the specified criteria under the designated letter is met. Refer to the accompanying Comments/Notation page for more detail on each letter notation.*

| Drug Classification | Brand Name | Generic Name | *HRSA d-code | ** Notation |
|--|-------------------------------|--|----------------------------|-------------|
| Topicals | A/T/S Solution | Erythromycin Topical Solution | d03200 | |
