Correction - the canopy was not deleted from the previous contractor's scope of work. It was terminated. That is an important legal distinction that the Judge agreed with.

Ileana, the increase in the required years of experience for this work relates to the negative experience that Parks had with the contractor from whose contract this outstanding scope of work was deleted. The canopy is highly specialized work that that contractor proved unable to complete. The scope of work completed, the seating replacement and the stage and support building, was a more standard construction project, and when the canopy was aggregated with that scope the 5-year experience requirement was more appropriate; but as a standalone element, the canopy warrants a 10-year experience requirement.

Please let me know if you need further information on this matter. Thank you.
