Miami Dade Water & Sewer

Subject: One Year County Wide Contract for Rehabilitation of Manholes Inflow and Infiltration Repair for PSIP Projects, RPQ P0154

Miami-Dade Water and Sewer Department (WASD) respectfully requests that you review the attached recommendation for "0 % CSBE Participation

This project is required to be open competitive under the 7360 Contract, just as the previous one was bid approximately three months ago, RPQ P0132. Contractors that do this type of work are specialist with specialized equipment. Some have regional agreements with coating manufacturer's to apply the product in selected parts of the Country. A 7040 contract would not meet the operational needs of the Department.

There is an approved product list of products that can be used in the WASD system. The project requires a Contractor experienced with rehabilitation of sewer manholes and has the coating manufacturer's product application certification. In order to have this project competitively bid with all approved products available in needs to be open competitive.

This project is work order driven and each work order will take about 20 to 30 days to complete.

Primary Trades for this project are General Engineering, Pipeline Engineering, Pipe Line Contractor and Underground Utility / Excavation.

1.00 SCOPE

The Project consists of furnishing all labor, material and equipment for rehabilitation of approximately 415 manholes anywhere within the limits of Miami-Dade County, Florida, as ordered by the Department during a one year period. The manholes to be rehabilitated are listed in the Appendix Section.

This is a non-exclusive contract, and as such, the Department does not guarantee that the full amount of the Contract will be issued to the Contractor. The actual amount of Work Orders assigned will be the prerogative of the Department in its sole discretion and dependent only upon its needs.

The project shall include, but not be limited to, cleaning of the manhole structures; surface preparation; concrete repair and restoration; furnishing and installing concrete protective coating; sealing exterior voids of leaks with a chemical grout; cleaning and restoring exposed reinforcing; rehabilitation of the manhole bench and flow channels; furnishing and

installing plugs, thru plugs and thru pipe as required; bypass pumping of sewage, if necessary; traffic control; legal disposal of debris; furnishing and utilizing all required safety equipment; and all other appurtenant and miscellaneous related items and work necessary for a completed project at various locations throughout Miami-Dade County.

The Miami Dade County Ordinance No.90-143 is applicable to this Project. The Contractor shall review the "Supplemental General Conditions" and the "Wage and Benefit Schedule" that are included within these documents.

Qualifications

The Contractor shall have completed a minimum of (15) fifteen manhole rehabilitations or similar structures within the past 10 years. Two verifiable references are required with Project Name, Organization Name, Contact Person, Phone Number, Date of Work and Work Performed. Submit experience history with a minimum of two references along with the bid. The work shall have been completed with the Contractor's own forces or key personnel.

The experience of key senior personnel with other firms may be counted toward the experience requirement, if acceptable to the Engineer. Should such evidence not be satisfactory to the Engineer, whose decision shall be final, the bid will be considered non-responsive, and the second low bidder will be considered for award.

In the event a firm consists of executives, supervisors and other senior field staff (key employees) that would have met these minimum experience requirements with a prior firm, the Miami-Dade Water and Sewer Department reserves the right to qualify the firm based on WASD's sole determination and evaluation of the knowledge and prior experience of these key employees employed by the new firm.

Community Workforce Program is not applicable to this project.
