Subject: RPQ P0193 ONE YEAR COUNTYWIDE CONTRACT FOR THE REHABILITATION OF SANITARY SEWERS BY THE CURED-IN-PLACE PIPE LINING METHOD FOR PMCM PROJECT (FY2017)

Miami-Dade Water and Sewer Department (WASD) respectfully requests that you review the attached recommendation for "No measures or goals"

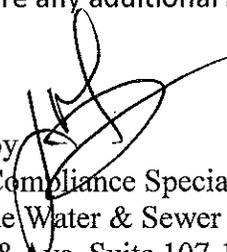

Cured in Place Pipe work is by a specialty contractor. There are no local CSBE contractors that perform this work. Most cured in place work is performed by national companies such as Insituform, Lanye Liner or large contractors with trenchless units such as Lanzo and Ricman. The Department has bid out other CIP projects thru 7360 (RPQ P130, RPQ P145 and RPQ P168) within the past two years. One time the WASD was required by ISD to bid the CIP project through the 7040 and no bids were received.

The Qualifications for Cued in place work are recommended by the National Associated of Sewer Service Companies and adopted by the WASD. They are stringent in terms of materials and experience because of the high cost of repairs to underground sewers. This experience requirement will be added to the RPQ.

6.00.1 Qualifications and Experience of the Contractor

The successful bidder shall submit a schedule of their proposed work, as bid, including information on the experience of the firm, the personnel assigned to the repair work, and especially the experience of the crew leaders who will actually run the work in the field, as well as information on all equipment and the type of process that will be used for lining (see questionnaire in the Quotation). The Contractor must certify that he has a minimum of two (2) installation crews and equipment in order to complete the work in a timely fashion. The contract will not be awarded and no work shall commence until these submittals have been approved and the successful bidder has received a written Notice to Proceed, respectively. The Department reserves the right to reject individual crew leaders due to either inadequate experience, or unsatisfactory or poor performance on the job (in the Department's or the Engineer's opinion). Along with his bid, the Contractor must submit proof that his/her firm has been regularly and successfully engaged in the commercial installation of the liner product for a minimum of one (1) year, and has successfully performed an aggregate amount of at least 100,000 linear feet of sanitary sewer repairs of pipes 8 through 27 inches in diameter in subaqueous conditions.
