Date Returned to ISD-PM:
Justification/Input Document for Non-Competitive Acquisition

It is the policy of Miami-Dade County to consistently purchase goods and services using full and open competition. The citizens of Miami-Dade County are best served when we make sound business decisions based on competitive bids or proposals. Early acquisition planning that includes consultation with Internal Service Department's procurement staff can help avoid delays and facilitates effective market research. However, there may be instances when other than full and open competition may be justified. When a user department(s) determines that other than full and open competition is necessary or in the best interest of the County, appropriate justification for that course of action must be submitted to ISD for approval and execution in order to waive the competitive bid/proposal process.

Please provide the information requested below to support the need and feasibility for waiving the competitive bid/proposal process:

Purpose of the Purchase
Please describe your minimum requirements and the benefits of making the acquisition.

The purpose of this non-competitive acquisition is to obtain a contract to maintain our use of Flight Explorer which is a tool used for MDAD Airside Operations since 1999. It was first introduced in support of our Y2K Command Post by staff to track all in-bound and out-bound flights in the air as Y2K approached. Flight Explorer has since become a vital tool used to coordinate daily flight activity and most importantly coordinate incidents such as hurricanes, storm event, and critical events such as 9/11. This tool allows for FAA data to be organized to coordinate Flight monitoring and facilitates grounding flights and tracking them while on the ground at MIA to keep them out of harm’s way. Flight Explorer has become an invaluable tool used in the daily flight operations of our Airside Operations tower staff.

Best Interest of the County / Uniqueness of Product
Please provide a detailed description as to why a waiver of formal bidding is in the County's best interest (e.g., product standardization, compatibility, proprietary access or distributorship, how vendor is uniquely qualified to provide the needed product or service, etc.). Please note that a lack of advance planning is not an acceptable justification for a non-competitive acquisition.

Sabre, Inc. is the system integrator, developer and owner of the proprietary systems software and they are the only company that can perform maintenance and support on the system.
### Market Research
Please describe your market research and the results thereof. This should include a description of other, similar sources or products available in the market if any and why they are not acceptable.

Throughout the US and the world there are companies that provide similar tracking solutions but Sabre, Inc the manufacturer of Flight Explorer is the world leading manufacturer for a complete and reliable system. This system is also integrated into our Airside Operations and complements other key Airside systems such as our AirIT AOIS, Passur and Flight View.

### Proposed Actions
Please describe the actions the department will take to overcome the present barriers to competition prior to any future acquisitions of this product or service.

Flight Explorer is classified as a sole source system and the access to the software belongs to Sabre, Inc.

RE: Flight Explorer Software Service  

Dear Ms. Craig:

This letter is to confirm that:

- Sabre holds the patent/copyright to the referenced Flight Explorer software.
- Sabre predominately sells the referenced Flight Explorer software only by direct sale to customers; it does not use any resellers for this software service in the airport marketplace.

Should you have any questions or would like to discuss further, please feel free to contact me at +1 609 601 7011.

Sincerely,
